HOLIDAYS: Christmas Day; New Year's Day; Good Friday; Easter Monday; Spring Bank Holiday (last Monday in May) and Late Summer Holiday. Cargo work can be arranged on these days by request.

POLICE/AMBULANCE/FIRE: Tel. 999.

TELEPHONES: Can be fixed aboard by arrangement.

AUTHORITY: Blyth Harbour Commission.

BRIDLINGTON: 54.05 N. 00.12 W.

DOCUMENTS:
Crew List.
Passengers List.
Ship's Register.
Customs Documents.
Manifests.
Bills of Lading.
Ship's papers.

PILOTAGE: Vessels approach within 0.25 mile, flying "G" Flag. Local fishermen act as Pilots and board approx. 1 hour prior to berthing time.

ANCHORAGES: For small vessels of not more than 12 ft. draft, 1 mile S.E. of harbour. Deeper-drafted vessels 3 miles East of Harbour. Good holding grounds except in heavy weather from East to South.

RESTRICTIONS: In accordance with state of tide and draft restrictions.

HEALTH: Pratique required from all vessels other than from a British port. "Q" Flag to be flown.

Also see "Health – All Ports" before first U.K. port.

RADIO: Humber Radio Station is the best for a vessel to route ETA, etc.

TUGS: None available.

BERTHING: No cargo vessels now, due to large fishing fleet.

MEDICAL: Agents require advance notice of required medical attention. Hospital facilities available. Relevant medical information, i.e. fever, etc., required.

DENSITY: Sea water.

FRESH WATER: Unlimited quantity available. Delivery from shore pipe-line at the rate of 3 t.p.h.

FUEL: All grades available. Delivery by road tankers.

OPENING/CLOSING HATCHES: Normally carried out by crew.

IDENTIFICATION CARDS: Not required.

CONSULS: No local Consuls. Nearest port of availability, Hull, Yorks.

REPAIRS: Limited engine and deck repairs.

REPATRIATION: No facilities exist for crew change.

AIRPORT: Yeadon, 45 miles, served by regular airlines.

HOLIDAYS: Normal Bank Holidays. Cargo can be worked on these days.

POLICE/AMBULANCE/FIRE: Police Bridlington 72222; Ambulance 0482 – 881198; Fire 73585.

TELEPHONES: No arrangements exist for placing telephones aboard.

SHORE LEAVE: Crew members allowed ashore.

AUTHORITY: Bridlington Harbour Master: Harbour Commissioners.

BRISTOL: 51.27 N. 02.35 W. (See Plan Book)

DOCUMENTS:
1 Maritime Declaration of Health.
1 Crew's Effects List.
2 Ship's Report by Master.
1 Home Office form I.B.6.
1 Stores List.
1 Certificate of Deck Cargo tonnage.
1 Grain Certificate.
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List.
1 Landing Card for each passenger.
Ship's Certificate of Registry.
Mercantile Marine Office Certificate (British ships only).

In addition, Manifests and Bills of Lading are usually sent to Agent direct from loading port.

PILOTAGE: Telegraphic address, "Brispilot Avonmouth". Notice required, not less than 12 hours (preferably more) before arrival Breaksea Lighthouse buoy. VHF Channel, calling 16, working 6. A 58 ft. motor pilot boat, black hull, "Bristol Pilot" in large white letters amidships.

Position: Principle pilotage station. Breaksea station at Breaksea extends from a line drawn 180° from Sully Island. Weather and other circumstances permitting the motor pilot boat operates from Barry Harbour to board vessels expected to dock at Bristol.

Pilot boats in Bristol Channel have adopted distinctive pilot signals, made audibly during foggy weather when the fog signal for a vessel is heard, and by morse lamp at night in clear weather. The distinctive signal for Bristol pilots is the International Morse Code Number 2, viz ··--- Vessels desiring to embark or disembark a Pilot are invited to adopt a similar procedure.

ANCHORAGES: Barry Road affords good anchorage in moderate weather for vessels awaiting a Pilot. Walton Bay affords good anchorage within 6 miles of Avonmouth.

RESTRICTIONS: Avonmouth Docks. No restrictions at night. Sill clearance of 4 ft. for all vessels with a maximum draft of 34 ft. salt water. There are restrictions on draft during neap tides to possible 28 ft. Range of high water – 33 ft. to 48 ft.

Portishead Docks. Sill clearance of 5 ft. for vessels up to 55 ft. beam. Sill clearance of 6 ft. for vessels up to 60 ft. beam.

MAX. SIZE: Avonmouth Docks. Max. length 690 ft., beam 95 ft., draft 34 ft.

Royal Portbury: Max. length 950ft. Max. beam 130 ft. Max. draft 40 ft. There are restrictions on draft during Neap tides to possible 11.5 m. (37.7 ft.).

Portishead Docks. Max. length 415 ft., beam 60 ft., draft 26 ft. (normal tides).

HEALTH: Foreign arrivals are required to complete Maritime Declaration of Health and to report to Port Health Authority by radio, sickness, prior to arrival if possible, otherwise report on arrival at dock entrance.

Health clearance by Port Medical Officer must be obtained.

Foreign arrivals which have had no sickness aboard do not need to submit Maritime Declaration of Health or to obtain Health Clearance.

Onus of reporting sickness is the personal responsibility of the Master.

All vessels are required to report the presence of animals or birds aboard vessel and any disease amongst such animals or birds.

Vessels arriving from ports within the excepted area and coastal arrivals need not present Declaration, but when there is sickness on board Port Health Authority must be informed.

Also see "Health – All Ports" before first U.K. port.

RADIO: Niton Radio, Lands End Radio, Portishead Radio.

RADAR/VHF: No port radar service, but an extensive VHF coverage exists from West of Barry Roads, to all dock entrances.

TUGS: Vessels docking on flood tide normally meet tugs at old oil jetty to Northward of the entrance lock. Vessels docking on ebb tide, tugs join between Firefly and Cockburn Buoys. Ship's line always used.

Ships for Royal Portbury Docks are normally met by tugs West of Portishead Point.

BERTHING: See "Max. Size" and "Developments".

BRIDGES: Avonmouth Docks. Junction between Avonmouth Dock and Royal Edward available at all times if necessary by arrangement with Dock Master.

STEVEDORES: At least 24 hours notice required in order that necessary labour may be allocated.

MEDICAL: Absolutely necessary for Agent to have as much notice as possible of any medical attention required. All facilities available.

DENSITY: Avonmouth Docks: Average density 1012 to 1015; in the river fluctuates according to tides. Portishead Docks: The density is 1015.

FRESH WATER: Avonmouth and Portishead Docks: available at all berths, 24 hours a day from hoses connected to standpipe. Delivery rate 25 – 30 t.p.h.

FUEL: Most grades available – 24 hours notice required.

FIRE PRECAUTIONS: According to local laws, available on request.

GANGWAY/DECK WATCHMEN: Not absolutely necessary – Available if required.

OPENING/CLOSING HATCHES: If crew open hatches on the first day then they must continue to do so whilst vessel is discharging/loading, otherwise dockers attend to this.

CERTIFICATES:
Load Line Certificate.
Safety Equipment Certificate.
Lloyd's Construction Certificate.
Derat Certificate.
Ship's Register.
Light Bills.
Safety Radio Certificate.

CUSTOMS ALLOWANCE: Customs allowance for crew members of British and foreign ships in British waters at present are:

Tobacco: (incl. cigars and cigarettes) – 30 grammes (1 oz.)

Spirits: (incl. liqueurs, perfume and toilet water) – 0.185 litre (0.75 of a bottle) of which not more than half may be perfume

Wine: 1.5 litres (2 bottles)

IDENTIFICATION CARDS: Not necessary unless being repatriated.

CONSULS:
Belgian Consul
Chilean Consul
Danish Consul
French Consular Agent
Finnish Vice Consul
German Consul
Greek Consul
Icelandic Consul
Italian Consular Agent
Netherlands Vice Consul
Norwegian Vice Consul
Portuguese Vice Consul
Spanish Vice Consul
Swedish Vice Consul

REPAIRS: All types of repairs are carried out.

DRY DOCK:

	Total length	*Length over blocks*	*Width of Entrance*	*Depth of water on sill*
Avonmouth Docks	875 ft.	850 ft.	100 ft.	32 ft.

REPATRIATION: Repatriation can be effected to all parts of world.

AIRPORT: Local airport approximately 12 miles away. London can be reached in 1.5 hours by train.

TIME: BST is GMT plus 1 hour. GMT in Winter months.

HOLIDAYS: New Year's Day; Easter (varies); May Day; Spring Bank Holiday (last Monday in May): Summer Bank Holiday (varies, usually last Monday in August); Christmas Day (25th December); Boxing Day (26th December). Work can be arranged on these holidays, although unusual to work 25th/26th December.

POLICE/AMBULANCE/FIRE: Avonmouth Docks. Can be contacted by telephoning Avonmouth 2591.

Portishead Docks. Emergency services obtained by dialling 999 at public call boxes.

TELEPHONES: Can be put on board at most berths.

DEVELOPMENTS: *Royal Portbury Dock:* The Port of Bristol's new Royal Portbury Dock received its first commercial vessel in April 1978. The 1,000-acre site is being developed to provide space for modern cargo handling methods with provision for Roll-on/ Roll-off cargoes. A second container crane has been ordered.

Situated on the South bank of the River Avon opposite Avonmouth Docks, with a depth of water of 45 ft., Royal Portbury Dock is already handling unitised cargoes on the common user quays whilst other berths await development.

At the Oil Basin, a bulk liquid storage installation for petroleum, molasses and chemicals has been constructed. Major development schemes now operational include reconstructed and modernised grain discharging berths at the Royal Edward Dock.

AUTHORITY: Port of Bristol Authority.

AGENT: Hodder, Whitwell Ltd., Gloucester Road, Avonmouth, Bristol BS11 9BH. Cables: "James Avonmouth". Tel. Bristol 823671. After office hours: Bristol 822855. Telex 44718.

BRIXHAM: 50.24 N. 03.30 W.

PORT LIMITS: The area below the level of high water enclosed by:—

(a) An imaginary line drawn from Shoalstone Point in the Parish of Brixham, extending in a W.N.Westerly direction for a distance of 6,500 ft. or thereabouts, until it intersects the imaginary line next described:—

(b) An imaginary line drawn from the centre of the Old Quarry at O.S. Ref. SX91445723, in a N.Easterly direction for a distance of 3,000 ft., or thereabouts, until it intersects the imaginary line first described, and:—

(c) The land line of the coast from the centre of Old Quarry aforesaid to the said Shoalstone Point.

DOCUMENTS:

1 Crew List,
1 Passenger List,
2 General Declarations (Customs),
1 Health document,
1 Manifest,
1 Each bill of Lading,
1 Ships papers,
1 Ships Certificate,
or
as for other Small U.K. Ports.

PILOTAGE: Trinity House Pilot, tel. Brixham 2214.

DEEP SEA AND COASTAL PILOTAGE: Pilots for Channel, North Sea, British Coast and Baltic. 48 hours before arrival radio "HUTCHINSON GRAVESEND" stating ETA off Brixham and port(s) of destination. On approaching Brixham contact Brixham Pilots on VHF Channel 16 and 9. Pilots board by motor-launch 1 mile N.E. off Berry Head. Pilot boats, length 40 ft. flying "G" flag and flashing "H". Pilots can also board at any British or Continental port as required.
Also see "London" – Pilotage.

ANCHORAGES: In Torbay. Middle of Bay on line Brixham (Victoria) Breakwater and entrance to Torquay Harbour. 6 fathoms chart datum.

MAX. SIZE: Depending on draft (36 ft. to 50 ft.).

HEALTH: See "Health – All Ports" before first U.K. port.

VHF: Berry Head Coastguard station, Harbour Office and Torbay and Brixham Shipping Agents on VHF Channel 16. "Brixham Port Radio" on Channel 14.

TUGS: None.

BERTHING: Small coastal vessels in Inner Harbour by arrangement with Harbour Master. Vessels up to 500 ft. (draft 26 ft.), at Jetty, on Brixham breakwater by arrangement with Brixham Bunkering and Devon Marine Ltd., (Telephone Brixham 2250), or with Harbour Master, Brixham.

MEDICAL: Contact Brixham and Torbay Shipping Agents.

DENSITY: Salt water. 1025.

FRESH WATER/FUEL: Available from Brixham Bunkering and Devon Marine Jetty on Breakwater.

REPAIRS: Engine welding, plumbing by local firms.

SURVEYORS: Lloyds Agent – Mr. J. S. Churchill, 25 Fore Street, Brixham, telephone 2171.

REPATRIATION: No facilities.

AIRPORT: Exeter, 35 miles away.

POLICE/AMBULANCE/FIRE: Brixham 2231 or 3065 or 999.

SERVICES: No tank cleaning. Compass adjusting with arrangement with Harbour Master. (Tel: Brixham 3321.)

SHORE LEAVE: Allowed.

AUTHORITY: Harbour's Administrator, Torbay Borough Council, and Harbour Master.

BUDE: 50.50 N. 04.33 W.

GENERAL: Port little used by commercial shipping.

DOCUMENTS/HEALTH/CONSULS: Port not equipped to accept vessels from abroad.

PILOTAGE: Not normally available (special arrangements may be made).

ANCHORAGES: Outer Harbour dries out at half tide.
Inner Harbour (Canal) 8ft. draft maximum.

MAX. SIZE: Inner Harbour (Entry via Lock) length 90 ft. Beam 25 ft. Draft 8 ft.

RADIO: MF Ilfracombe Radio. VHF Severn & Celtic Radio.

VHF: Bude Harbour Office listens on VHF Channel 16 when a vessel is expected.

FRESH WATER: Available via 0.5 in. hose pipe.

TELEPHONE NUMBERS: Harbour Master Bude 3111 (Office), Bude 3531 (Home), Coastguard Harland 235, Police Bude 2131.

SPECIAL REGULATIONS: Entry to the Harbour is made by leaving Chapel Rock (linked to the Main Land by a Breakwater) to starboard. Head towards the Lock in the Channel marked by 2 pairs of Leading Beacons.

The outer pair of Beacons, bearing 075° 30′ (T) consist of a front mark – white Spar with Yellow Diamond Topmark, rear mark – white flag staff, both on cliff top on North side of Harbour.

The inner pair of Beacons, bearing 131° 30′ (T) consist of a front beacon – white Pile Beacon with Yellow Triangle Topmark, rear beacon – white spar with Yellow Triangle Topmark, placed 0.5 cable West of Lock Entrance.

The approach to Bude, either from the North or South, should be made from a S.W. direct direction in line with the first pair of Leading Marks.

Immediately on passing Barrel Rock (0.5 cable North of Chapel Rock and marked by a Beacon Barrel) turn to starboard and pick up the inner pair of Leading Marks from which the Lock is clearly visible.

Entry to the Harbour at night not recommended.

Heavy ground swell and breaking seas may prohibit entry and exit.

The Harbour dries out at each Tide and entry of vessels is normally restricted to 2 hours either side of High Water.

For Locking, 18 ft. minimum of water above Chart Datum is required to Lock. A heavy swell may also prohibit the operation of the Lock.

Prior notification of arrival should be made to the Harbour Master if possible.

AUTHORITY: North Cornwall District Council.

CALEDONIAN CANAL: 57.27 N. 04.18 W.

PORT LIMITS: Craft are considered to be within the Canal when they have entered the sea lock structures.

DOCUMENTS: Masters of craft on through passage must report to the Sea Lock Office at Corpach with the ship's measurement certificates to enable toll declaration to be made. Masters of craft on partial passage starting and returning to the East coast should report to the Clachnaharry Canal Office.

PILOTAGE: Approach pilotage compulsory at Inverness end. Contact Inverness Pilots by Link Call through Kessock 217 (Ships of NRT under 100 tons are exempted). Pilotage within the Canal and West approaches optional. For Pilotage into Corpach from the West contact Mr. H. McKinnon at Corpach by Link Call to Corpach 304 and for Canal Pilotage, by Link Call to Caledonian Canal Office, Inverness 33140.

RESTRICTIONS: Entrances to sea locks restricted for 2 hours either side of LW springs. There is generally no restriction at LW neaps. The Canal is operated on normal manning from 0800 until 1700 hrs. (Sundays excepted).

MAX. SIZE: 48.77 m. (160 ft.) length overall × 10.67 m. (35 ft.) beam × 2.74 m. (9 ft.) draft fresh water or, alternatively, 45.72 m. (150 ft.) × 10.67 m. (35 ft.) × 4.11 m. (13 ft. 6 ins.) draft fresh water.

Corpach sea lock will admit craft to the Corpach Basin only of size 61.87 m. (203 ft.) length overall × 10.67 m. (35 ft.) beam × 4.11 m. (13 ft. 6 ins.) draft fresh water.

All dimensions are overall and *NOT* moulded.

HEALTH: Vessels from foreign ports will be boarded by the Customs/Immigration/Health at the sea locks and they should fly the appropriate international flags on approach.

Also see "Health – All Ports" before first U.K. port.

RADIO: Western approaches via Oban Radio. Eastern approaches via Wick or Stonehaven Radio.

VHF: None.

RADAR: None.

TUGS: A Canal tug is available if required. Service should not be required on normal passage.

BERTHING: At Corpach Old and New Wharves (limited Customs approval). At Inverness Glenmhor and Glen Albyn Wharves below Muirton and Upper Muirton Wharf at the top of Muirton. Water depth available for craft having 4.110 m. (13 ft. 6 in.). Normally ships gear or road mobile cranes used. Corpach New Wharf equipped with 2 × 7-ton Derrick Cranes owned and operated by Scottish Pulp and Paper Mills.

BRIDGES: Road and rail swing bridges are operated to permit the passage of craft. Headroom restricted to 36.576 m. (120 ft.) by overhead electric cables near Inverness.

STEVEDORES: Traffic to Scottish Pulp and Paper Mills at Corpach unloaded by Pulp Mill gangs. Elsewhere arranged through Shipping Agent.

MEDICAL: Normal General Practitioners service available at main centres along the Canal. Full Hospital facilities at Inverness.

FRESH WATER: Fire hose supply available at Glen Albyn Wharf, Inverness. Small domestic supplies available at the main lock flights. Hydrant supply at 30p. per 100 gallons.

FUEL: Available by road tanker from principal oil companies by telephoning Shell, Inverness 38850 or Fort William 2404; Esso, Inverness 37222 or Fort William 2903.

REPAIRS & DRY DOCK: Limited repairing facilities at the Thornbush Slipway and Engineering Company Limited, Inverness.

AIRPORT: Highlands and Islands domestic flights from Inverness (Dalcross).

POLICE/FIRE/AMBULANCE: Emergency calls to these services on 999.

DEVELOPMENTS: Likely future headroom restriction to approximately 28.96 m. (95 ft.) over HW springs in about 1980 upon construction of the new Kessock Bridge at Inverness.

GENERAL: The Caledonian Canal is part of the Customs Port of Inverness.

AUTHORITY: British Waterways Board. Caledonian Canal Office, Clachnaharry, Inverness.

CAMPBELTOWN: 55.26 N. 05.36 W. (See Plan Book)

DOCUMENTS: 2 Crew Lists; 2 Passenger Lists; 1 Store List; 1 Personal Effect List; Ship's Register; 1 Manifest or Bill of Lading.

PILOTAGE: Although *not* in Clyde Port Authority area, where large vessels are concerned, it is advisable to have the services of a qualified Clyde River Pilot or where applicable a Certificated Naval Pilot. As neither are based in Campbeltown, it is essential that at least 24 hours notice be given to Agent, when required.

ANCHORAGE: For large vessels in 6 to 10 fathoms in the area between the Orange leading lights and the Methe bank buoy, for smaller vessels a wider area can be used but south side of loch best holding.

HEALTH: Normal UK Port requirements. In event of disease or fever prior notice should be given to Agent.

Also see "Health – All Ports" before first U.K. port.

RADIO: All messages through normal coastal stations or by radio telephones via Portpatrick Radio when nearer port. Cables should be addressed to Agents as "Coal, Campbeltown".
RADAR/VHF: No port radar service. Direct contact with Harbour Authority on VHF Channels 12, 13 and 14. P.O.L. Depot, Campbeltown can be called on 30 – 40 mile radius on Channels 6, 12, 18. Same channels for tugs, lying off port, when arranged previously.
TUGS: Must be ordered at least 24 hours beforehand as they come from Glasgow area further north on River Clyde. Precise requirements concerning arrival/departure times requested owing to heavy costs entailed for waiting time.
BULK CARGO FACILITIES: Berth for vessel up to 230 ft. in length with maximum permissable draft 12 ft. (Salt water). Discharge by shore crane, Maximum lifting 5 tons.
SPECIALISED CARGO-HANDLING FACILITIES: One berth for roll-on/roll-off ferry inside harbour, max. draft of vessel 8 ft., general cargo discharged.
STEVEDORES: Agents arrange all cargo discharges through another department of D. McNair & Son, including mechanical handling. Portable cranes only available. Ship's gear used when available to minimise costs.
MEDICAL: One casualty hospital available. Serious casualties transferred to Glasgow either by Air or road, according to condition. Five local doctors.
TANKERS: All intended arrivals should be notified to Officer-in-Charge, P.O.L. Depot, Campbeltown (Tel. No. 0586/2226) at earliest.

P.O.L. Jetty, minimum depth, 40 ft. One discharging berth available.
FRESH WATER: Available at all times, delivery by hose, cost per ton 10p.
FUEL: Marine Gas Oil supplied on commercial quay. Naval requirements by arrangement with P.O.L. depot.
REPAIRS: Minimal repairs only. Notify Agent as early as possible.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Ship's option.
CARGO GEAR: See "Stevedores". Ship's gear preferred where possible.
REPATRIATION: Air service available once daily in forenoon, except Sunday.
AIRPORT: Machrihanish – 3 miles distant.
TIME: G.M.T.
HOLIDAYS: New Years Day (1st January) Christmas Day & Boxing Day, 3 Statutory Local Holidays, Annual Holidays 1st fortnight in August.

Work can be carried out by arrangement with Stevedores.
POLICE/AMBULANCE/FIRE: Dial 999.
TELEPHONES: By arrangement.
SERVICES: Laundry/Dry Cleaner, Minimal Radar/Radio, VHF Repairs. No tank-cleaning equipment available or compass adjusting.
SHORE LEAVE: After clearing inwards, crew members are allowed to go ashore without special permission.
IDENTIFICATION CARDS: Not required. P.O.L. Depot request production of Seamen's Cards.
GENERAL: Basin of the Clyde Lat. 55° 25′ 0″ N., Long. 5° 35′ 30″ W.
Tides: Spring rise 8.9 ft; Neap rise 7.5 ft.; depth at sea entrance, 12 ft. low water spring tide; there is a rise of 8 ft. in spring tide in harbour.
DEVELOPMENTS: The outer end of the old quay will be reconstructed during 1980/81.
AUTHORITY: Commercial, Harbour & Loch Area – Strathclyde Regional Authority, c/o Harbourmaster, Campbeltown.

P.O.L. Depot, Campbeltown. Officer-in-Charge, Kilkerran Road, Campbeltown.
AGENT: McNair & Son, Kinloch Road and 27a Longrow, Campbeltown. PA28 6EG Tel. Nos. 0586/2020 or 2039. Cables – "Coal, Campbeltown". After hours – 2039 – Mr. Shaw.

CARDIFF: 51.29 N. 03.10 W. (See Plan Book)

PORT LIMITS: A vessel is considered as "arrived" when it is in the lock.
DOCUMENTS:

1 Crew List.
1 Health Form.
1 Port Immigration, i.e. Crew List, and where applicable, a passenger list.
Pratique issued by Customs.
1 List of Consumable Stores (tobacco, snuff, alcohol, etc.).
3 Bills of Lading (one original and two copies).

PILOTAGE: Channel pilotage and dock pilotage not compulsory except for vessels carrying passengers. Pilots embark from pilot cutters operating from Barry Harbour.

Pilot Cutters are marked on each side "Pilots" and operate radio continuous watch on VHF. Signal for pilot cutter – numeral "7" on whistle or siren. Telegraphic address Carpil Barry. Minimum of 24 hours notice required of ETA. VHF Channels 16, 9, 14 and 11.
ANCHORAGE: Barry Roads: Good anchorages in moderate weather in depths from 5 to 6 fathoms (9.1 to 11 metres) about 0.5 mile S.W. of the entrance to Barry Docks. Clay bottom.
RESTRICTIONS: Entry to docks restricted to a period of 4 hours before and 3 hours after high tide, according to size and draft of vessel.

Entrance lock 850 ft. length, 90 ft. wide.
MAX. SIZE:
Queen Alexandra Dock. LOA 660 ft., beam 88 ft., max. draft 34 ft.
Roath Dock. LOA 650 ft., beam 86 ft., max. draft 33 ft.

Vessels near maximum dimensions may be accepted on certain tides after consultation with the Dock Master.
HEALTH: Maritime Declaration of Health to be made to Port Authority or Customs Officer, whoever boards ship first. In event of contagious fever on board, Port Health Authority must be advised by radio before arrival. No pratique necessary if vessel is entering port from another port in U.K.

Also see "Health – All Ports" before first U.K. port.

RADIO: Ilfracombe Radio and Portishead Radio.
VHF: A port operation VHF service maintained at dock entrance during tidal hours. Call sign "Cardiff Radio" calling on Channel 16 and operating on Channel 14. There is also "Severn Radio".
TUGS: Tugs normally join vessel 0.5 mile to seaward of Outer Wrach Channel Buoy, and arrangements for attendance of tugs should be made through ship's Agent.
BERTHING: Arranged through Dockmaster, and berths within docks are flat quays. Rise and fall usually varies up to 1 ft.
SPECIALISED CARGO HANDLING FACILITIES:

Grain: Spillers berth, 2 Suction Plants. Average discharge 900 tons per day (450 tons per 8 hours per gang).

Coal (Imports): Pontoon berth, Roath Dock. Self-discharging vessels. Average discharge 4,000-5,000 tons per day (2,000-2,500 tons per 8 hours per gang).

There are no specialised berths equipped for containers, roll-on/roll-off traffic, liquid chemicals, LPG carriers, fertilisers, sulphur, etc.
BRIDGES: Bridges throughout the port can be operated on tide times.
STEVEDORES: Arrangements for employment of stevedores undertaken by Docks Board through ship's Agent.
MEDICAL: All facilities available. Agents should be advised in advance if medical services required.
TANKERS: Three tanker berths available, one in Queen Alexandra Dock, two in Roath Dock where there is also a tanker-cleaning berth. Special instructions are issued to Master on arrival at port. Average discharge approximately 448 cu.m.p.h.

Penarth. One berth, 500 ft. long.
DENSITY: 1018.
FRESH WATER: Available 24 hours daily from quayside, delivery 20 t.p.h. maximum.
FUEL: Fuel of all grades available.
FIRE PRECAUTIONS: For tankers, strict fire precautions required in accordance with latest safety procedures.

Emergency Action – Fire: In the event of an outbreak of fire (no matter how small) immediately dial 999 on the ship-to-shore telephone. When the operator answers, say "Fire", and wait until you are connected to the Fire Station Control. Then repeat: "Fire at the Petroleum Berth, Roath Dock". In event of the ship-to-shore telephone being inaccessible or out of order, use short blasts on ship's siren to alert police and port authority. VHF can be used on tide times.
GANGWAY/DECK WATCHMEN: Performed by ship's crew and necessary for tankers.
OPENING/CLOSING HATCHES: Carried out by ship's crew.
CUSTOMS ALLOWANCE: Tobacco, 1 oz. per day per man, max. 8 days. Wine/Spirits, 0.25 pint spirits per man per day every 4 days.
IDENTIFICATION CARDS: Not needed.
CONSULS: Ships should contact Agent.
REPAIRS: All types of repairs possible.
DRY DOCKS: Dimension of largest dry dock 635 ft. × 75 ft. Dimension of smallest dry dock 600 ft. × 71.5 ft.
REPATRIATION: Facilities exist to exchange crews and repatriate to any part of world.
AIRPORT: Airport 11 miles from Cardiff, serving other airports to all parts of world.
TIME: Local time is British Standard Time, GMT plus 1 hour. GMT in Winter months.
HOLIDAYS: Good Friday; Easter Monday; Whit Monday (Spring Holiday); August (Summer Holiday) one day; Christmas Day; Boxing Day.
POLICE/AMBULANCE/FIRE: Dial 999 on public telephone service and ask for service required, or short blasts on ship's siren to alert police.
TELEPHONES: Ship/Shore telephone supplied at certain berths – service organized through ship's Agent.
GENERAL: Cardiff is a port which has very big range of tides and important that accurate ETA's and max. drafts supplied by ship's Master in order that Agent may place orders for tugs and Pilots in sufficient time to be in attendance when required.
AUTHORITY: British Transport Docks Board, Cardiff Docks.
AGENT: Lambert Brothers Ship Agencies Ltd., Exchange Buildings, Cardiff. Tel. 25201. Telex: 49348, Cables: "Lambert Cardiff".

CARRICKFERGUS: 54.43 N. 05.48 W. (See Plan Book)

PORT LIMITS: No. 1 Buoy Belfast Lough.
DOCUMENTS:

2 Crew Lists,
2 Passenger Lists,
1 Store List,
1 Personal effects List,
Ships Register,
1 Manifest or Bill of Lading.

PILOTAGE: Port Pilotage not compulsory but advisable. Pilots based at Carrickfergus Harbour. All Pilotage carried out by Belfast Pilots. Pilots board at No. 1 Buoy, Belfast Lough. Pilots can be contacted by VHF Channel 16.

ETA Messages: Advise Agents at least 24 hours before arrival through any British Coast Station. Pilots not less than 1 hour. ETA No. 1 Buoy (B) ETA GMT or BST (C) Draft SW.
ANCHORAGE: Midway between Harbour and Greypoint.
HEALTH: No Certificates required, in event of disease contact Agents.

Also see "Health – All Ports" before first U.K. port.
RADAR/VHF: Port Radar Service Nil. Harbour VHF Channels 14, 12 and 16 operated approximately 3 hours before HW to 1 hour after if ships are due.
TUGS: No tugs in Harbour but if required can be ordered from Belfast.

BERTHING: *Harbour Tidal:*

Depth alongside all berths MHWST	4.88 m.
Depth alongside all berths MLWST	1.83 m.
Max. draft of vessels	4.88 m.
Max. Beam of vessels	12.20m.
Width at entrance	16.20 m.
Quays:	
Length of Commercial Quay	321 m.
No. 1 Berth (Caustic Acid)	61 m.
No. 2 Berth (Tanker Berth)	74 m.
No. 3 Berth (Most bulk cargoes)	76 m.
No. 4 Berth (Coal, Sulphur, Meal, etc.)	75 m.

Vessels discharging take bottom on soft mud.

Average Discharge 2 Grabs 150 t.p.h. at No. 3 and 4 Berth.

STEVEDORES: Provided by Messrs. John Kelly Ltd., Tel. 63612. Telex 74210.

TANKERS: Discharge controlled by Texaco Ltd., as plant is owned by them privately. Rate of discharge approximately 200 t.p.h. two 8 in. diameter pipes and one 6 in. pipe.

Usual safety precautions prevail.

Tankers not to enter Port without permission of Harbour Master.

Max. draft MHWST 4.88 m.

MEDICAL: One hospital available.

DENSITY: 1024.

FRESH WATER: Supplied alongside Quay approximately 10 t.p.h. Charge 10p. per ton.

FUEL: Supplied by Road Tankers. All grades available from major Oil Companies.

GANGWAY/DECK WATCHMEN: Not compulsory.

OPENING/CLOSING HATCHES: All vessels by crew.

CERTIFICATES: Ships Register on arrival.

CUSTOMS ALLOWANCE: 200 cigarettes each crew member, spirit, wine, etc., at discretion of Water Guard.

CARGO GEAR: Three crawler mounted diesel grab cranes. Two 3100 KGs., one 3045 KGs.

IDENTIFICATION CARDS: Not required.

CONSULS: None. Most countries are represented at Port of Belfast approximately 9 miles from Harbour.

REPAIRS: Light repairs and welding only major repairs can be arranged at Belfast.

DRY DOCKS: None. Nearest at Belfast.

REPATRIATION: Good facilities for crew changes. Good railway and bus services.

AIRPORT: Belfast Airport approximately 22 miles served by regular lines.

TIME: GMT, plus 1 hour in Summertime.

HOLIDAYS: New Years Day, Easter Monday and Tuesday. 12th and 13th July, Xmas Day and Boxing Day.

Port Stevedores cease work Friday before 12th July for a period of 14 days.

POLICE/FIRE/AMBULANCE: Carrickfergus 62021.

TELEPHONES: Not possible to place on board. Good phone service convenient to ships.

SERVICES: All services readily available from Port of Belfast.

SHORE LEAVE: After clearing inwards no restriction on shore leave.

SURVEYORS: Most Classification Societies based at Belfast.

AUTHORITY: Carrickfergus Borough Council and Harbour Master.

CLYDE PORT (Including Glasgow, Finnart, Faslane, Hunterston and Greenock): 55.51 N. 04.16 W.

(See Plan Book)

DOCUMENTS: For Customs Clearance and to meet Immigration Authorities requirements, following valid documents are required:

Ship's Crew List.
Port Health Declaration.
Register, Load-line Certificate.
Safety Equipment, Safety Construction and Safety Radio Certificates.
Derat Exemption or Fumigation Certificate.
British Tonnage Certificate.
Copy Manifests and Bills of Lading.
Grain Form (No. S/107) if bulk grain.
Completed Customs Form C.142.

PILOTAGE: Compulsory pilotage.

Pilotage shall be compulsory in the portion of the Pilotage District within the area bounded on the West by that part of the line of Longitude 5° 06′ West commencing on the North shore of Loch Striven and then proceeding in a Southerly direction to the North shore of the Island of Bute and by the same line of longitude, from the South shore of the Island of Bute South to the latitude of Gull Point; thence by a line extending due East (T) to Gull Point; thence towards the S.E. by a line proceeding in a 143° (T) direction for 7 nautical miles; and thence on or towards the N.E. by a line proceeding in a 053° (T) direction to the North boundary of the Harbour of Saltcoats.

In this area all vessels in excess of 1,599 g.r.t. will require to take a Pilot.

To the East and North of a straight line drawn from Kempock Point, Gourock, to Strone Church Spire, every vessel in excess of 100 g.r.t. will require to carry a Pilot.

(Gourock pilot station) tel. Gourock 34631. "Gourock Pilots Radio" Channel 14 — frequency 156.7 Mc/s.

Optional pilotage is available to and from Cumbrae Island.

Vessel to advise Agent 72, 48 and 24 hours before arrival with subsequent advice of any changes to ETA, stating where Pilot required to board, ETA and draft.

Normal ladder, etc., for Pilot boarding.

Limits of Pilotage District:

(i) To the East of the Isle of Arran a line drawn due East and West across the river or firth of Clyde from the coast of Ayrshire to Corrygills Point on the East Coast of the Isle of Arran; and

(ii) in Kilbrannan Sound a line drawn due East and West across the river or firth of Clyde from the N.W. coast of the Isle of Arran to the coast of Kintyre being an extension of a line drawn due East and West from the Southernmost point of the island of Little Cumbrae to the N.W. of the Isle of Arran.

ANCHORAGES: As defined by Clyde Port Authority and in special circumstances (e.g. draft, condition of ship, hazardous cargo, etc.) under advice of Pilot.

Anchorages are available for vessels of all drafts in the Tail of the Bank area (off Greenock) and lower Firth of Clyde.

RESTRICTIONS: As defined by Clyde Port Authority and under Clyde Pilotage Authority requirements.

MAX. SIZE: As defined by Clyde Port Authority for berths in Glasgow and Greenock and subject to consideration of particular circumstances prevailing in each case.

HEALTH: The Master of a foreign-going vessel proceeding direct from a foreign port must send a wireless message to "PORTELTH GLASGOW" when he is required to do so under the Public Health (Ships) Regulations. Also see "Health – All Ports" before first U.K. port.

RADIO: Any GPO radio station.

There is a Port Operations VHF/FM system in operation utilising Channels 12, 14 and 16 in the International Maritime Band as under: West of Newark Castle, Port Glasgow Channel 12, East of Newark Castle, Port Glasgow Channel 14, calling up, Channel 16.

RADAR/VHF: Radar service not available. Port Radio service.

TUGS: As required by Master and under advice of the Pilot. Tug's lines only are used.

CONTAINER HANDLING FACILITIES: Container terminal at Greenock for two container ships to berth and work simultaneously. 22 straddle carriers and three transporter cranes available. Length of Quay 1,200 ft. Depth 42 ft. LWOST.

GRAIN HANDLING FACILITIES: *Meadowside Granary:* Total capacity, 176,000 tons. Six grain elevators, each with discharge rate of 200 t.p.h.

BULK HANDLING FACILITIES: *Bulk Iron Ore/Coal:* Hunterston Iron Ore/Coal jetty operated by British Steel and the Clyde Port Authority is capable of accommodating vessels of up to 350,000 tonnes d.w.t.

The West side of the jetty is served by 2 grab unloaders, each having a maximum capacity of 3,000 tonnes p.h.

The East side of the jetty is served by an outloader with a maximum capacity of 4,000 tonnes p.h.

STEVEDORES: Arranged by Agent in accordance with Master's advice of ETA.

MEDICAL: Full medical and hospital facilities available.

TANKERS: Agents will advise Master by radio to prepare appropriate manifold connections. No slop facilities at Old Kilpatrick, Bowling, Faslane, Finnart.

Oil installations:

Bowling (ESSO): Private berth. Maximum length of vessels swinging off Bowling Basin is 550 ft. under suitable conditions. Berthing and unberthing is permitted day and night, according to state of tide.

A port regulation prohibits ships which are not gas free and have on board or have carried cargo with a flash-point of below 73 degrees from navigating the river East of Bowling.

Old Kilpatrick: Admiralty oil installation. Canting facilities in the river off Rothesay Dock, maximum length of vessels permitted is 630 ft. during daylight and under suitable weather conditions. Admiralty, Old Kilpatrick, advise maximum length at the berth is 570 ft., draft 30 ft.

Berthing and unberthing is permitted day and night, according to state of tide. Fully loaded vessels are berthed port side to at high water and must be capable of discharging over the tide. Light or partly loaded vessels may swing on arrival, berth starboard side to.

No low flash-point cargo may be discharged and vessels having low flash-point on board are not permitted at this berth.

Vessels which have carried crude oil as previous cargo are not permitted to load at this berth unless all tanks have been cleansed. There are no facilities for receiving dirty ballast.

Finnart: B. P. Installation. Maximum permissible size of vessel 330,000 d.w.t. – maximum draft 90 ft. salt water.

Faslane: Esso Petroleum. Maximum permissible size of vessel 40,000 d.w.t.

DENSITY: Port of Glasgow – Brackish.

FRESH WATER: Available at all berths by shore hose.

FUEL: All major oil companies represented in Glasgow. As much notice as possible required, all grades can be supplied.

FIRE PRECAUTIONS: As per Clyde Port Authority Regulations. Tanker berths — as per B.P., Esso and Admiralty Regulations.

GANGWAY/DECK WATCHMEN: At Master's discretion.

OPENING/CLOSING HATCHES: To be carried out by ship's crew.

CUSTOMS ALLOWANCE: On arrival from a foreign port with foreign cargo an allowance of 100 cigarettes per man for each four days in port, whilst discharging foreign cargo, and an allowance of a 0.25 pint of spirits is allowed for each man per day in port up to four days.

CARGO GEAR: Valid test certificates required for all cargo gear.

IDENTIFICATION CARDS: Not required.

CONSULS:

American
Brazilian
Danish
Ecuador
German
Italian

Panama
Spanish
Uruguayan
Belgian
Cuban
Dominican

Finnish
Netherlands
Liberian
Norwegian
Portuguese
Swedish

REPAIRS: All types of deck and engine repairs can be effected in the Clyde Area.
DRY DOCKS: Size of largest dock in Clyde area: Scott Lithgow dry dock, Greenock: 1,000 ft. long clear from gate to head of dock; 156 ft. cope to cope; 150 ft. clear width between altars; 145 ft. clear width at entrance; 45 ft. top of keel blocks to cope; 37 ft. draft on sill HWOST; 27 ft. draft on sill LWOST.

In addition, there are eight other dry docks in Glasgow/Greenock area.
REPATRIATION: Facilities for crew changes, and full repatriation services are available.
AIRPORT: Glasgow Airport (12 miles from city centre) and Prestwick Airport (30 miles from city centre) are served by most major domestic and international airlines.
TIME: BST (1 hour ahead of GMT) in operation. GMT in Winter months.
HOLIDAYS: Details of official dock holidays on which cargo work cannot be arranged can be obtained from the Marketing Department of the Port Authority on request.
POLICE/AMBULANCE/FIRE: These services can be called by telephone by dialling 999 or contacting Clyde Port Harbour by VHF.
TELEPHONES: Telephones can be placed on board at most docks by the G.P.O., charges vary according to berth, type of service and whether pre-pay call-box type or linked to exchange.
SERVICES: Facilities are available for service to ship's radio, navigation aids, etc.
SHORE LEAVE: Crew allowed ashore at Master's discretion and subject to compliance with Immigration and any other interested Authorities' requirements.
AUTHORITY: Clyde Port Authority.

COLCHESTER: 51.54 N. 00.55 E. (See Plan Book)

PORT LIMITS: Brightlingsea anchorage.
DOCUMENTS: As normal British port.
PILOTAGE: Part of Trinity House London District. Sunk Pilot Cutter cruises near the Sunk light vessel. Give as much notice as possible by radio telephone or VHF Channel 16. River pilots are ordered by local Agents and board vessels at Brightlingsea anchorage.
ANCHORAGES: Off Brightlingsea, in 3 to 4 fathoms.
RESTRICTIONS: Vessels with deck cargoes of timber, and vessels which are large for the port not worked at night.
MAX. SIZE: Max. length at Colchester, 200 ft. Max. length at Rowhedge and Wivenhoe, 250 ft. Max. draft at Colchester, 12 ft. 06 in. Spring tides, 8 ft. 06 in. neap tides. Max. draft at Rowhedge and Wivenhoe, 14 ft. 06 in. Spring tides, 10 ft. neap tides.
HEALTH: Normal procedure. Any abnormal conditions advise Harbour Master. Pratique automatic if from U.K. port.

Also see "Health – All Ports" before first U.K. port.
RADIO: North Foreland Radio, Humber Radio or Niton Radio. 2182 kc/s.
VHF: 'Colchester Harbour Radio', VHF Channel 14, Office hours watch plus tide time watch when ships expected. Vessels should call when approaching port anchorage, giving deepest draft, and keep listening watch on Channel 14 when manoeuvring.
RADAR: None.
TUGS: Small motor tug available through Harbour Master.
BERTHING: 1,000 ft. of private quays. 3,200 ft. of public (corporation) quays. All berths use shore equipment and handle all cargoes. Port dries at LW. (Berths at Wivenhoe 450 ft., at Rowhedge 500 ft. additional to above.)
CRANES: A number of 4/6 ton mobile cranes.
BULK CARGO FACILITIES: Bulk cargoes handled at most berths, 3 grain silos.
STEVEDORES: Arranged by Local Agents. Average rate for all cargoes 50 metric t.p.h.
MEDICAL: Advance notice if possible. Hospital available.
TANKERS: One oil depot for discharging only, light fuels handled. No slop facilities.
DENSITY: Density varies with tide, average 1015.
FRESH WATER: Fresh water points on quays, rate approximately 9 metric t.p.h, cost approximately £1 per tonne.
FUEL: All fuel deliveries by road tanker.
FIRE PRECAUTIONS: None.
CONSULS: None.
REPAIRS: Repairs can be carried out. One shipyard (J. W. Cook) at Wivenhoe.
SURVEYORS: Lloyds Agent can arrange.
GANGWAY/DECK WATCHMEN: Not normally required.
OPENING/CLOSING HATCHES: By crew.
CUSTOMS ALLOWANCES: British standard allowances.
CARGO GEAR: Shore gear, no heavy lifts.
REPATRIATION: Arranged by Agents.
AIRPORT: London 70 miles.
TIME: GMT.
HOLIDAYS: Normal British holidays, work sometimes arranged.
POLICE/AMBULANCE/FIRE: Tel. 999.
TELEPHONES: None.
SERVICES: Compass adjusting arranged by Agents.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not required.
DELAYS: Normally tidal delays only.
AUTHORITY: Colchester Borough Council and Harbour Master.

COWES (including Newport, Isle of Wight): 50.46 N. 01.18 W.

DOCUMENTS: As for "Portsmouth".
PILOTAGE: See Southampton for sea pilotage. As Cowes is within the Isle of Wight Pilotage District, a Sea Pilot must be employed by all vessels subject to compulsory pilotage. Trinity House Cowes Pilots conduct vessels between the anchorage area and berths in Cowes Harbour and Newport, 5 miles further up the River Medina. Pilots board from launches *Thosbro 1 and 2,* which are equipped with VHF, Channels 16, 12, 9 and 6. A Pilot can always be obtained by making a link-call to Cowes 293812 or 292501 (24 hours service) or via Southampton Pilots VHF Channel 16.
ANCHORAGES: Vessels waiting to proceed to Cowes or Newport should anchor within the area bounded by Old Castle Point, "Prince Consort" light-buoy and the harbour entrance light-buoy. The prohibited anchorage on either side of the leading line must be respected, and vessels must not obstruct the fairway into Cowes, nor the deep water channel used by large vessels bound for Southampton. The mooring buoys are reserved for hovercraft and the Trinity House lighthouse tender. Mooring chains run East and West for 500 ft. from each of these mooring buoys. Tidal streams in the anchorage are strong. Cowes is an international yachting centre, and the anchorage is often crowded with small craft, especially during July, August and September.

Cowes Roads anchorage, North of the deep water channel, is used by large vessels waiting to berth in Southampton Water, taking bunkers or changing crews.
MAX. SIZE: Cowes – 300 ft. long, 17 ft. draft at high water springs. Vessels must expect to take the bottom in soft mud at low water. Newport – 150 ft. long, 8 ft. draft. Newport Harbour practically dries out at low water.
RESTRICTIONS: Tankers may load and discharge at all times, subject to the Petroleum Acts.

A channel marked by small orange buoys is reserved for the use of hovercraft. Other vessels using the area should do so with caution.

Overhead cables at Kingston; 115 ft. above MHWS.
FLOATING BRIDGE: A chain ferry plies between East and West Cowes. An all-round amber light is shown from the leading end of the bridge when under way. Approaching vessels should sound 1 prolonged blast on the whistle when not less than 0.5 mile away. The bridge gives way to all river traffic. The chains of the ferry are at least 2 ft. above the river bottom in mid-channel at all times.
HEALTH: See "Portsmouth".
RADIO: See "Southampton" for Sea Pilot communications. See "Pilotage" for local communications.

Southampton Port Radio, the port operations and radar station for the port of Southampton, will often assist in cases of difficulty, although there is no obligation for them to do so and they accept no responsibility. Southampton Port Radio VHF Channels 16, 14, 12, 11, 10, 18, 20 and 22. Medium frequency through Nitonradio.
TUGS: Tow-boat launches are available to assist vessels.
BERTHING: *Medina Wharf.* Vessels 17 ft., spring draft, length 270 ft. OAL. Loading and unloading bulk cargoes of stone, coal, fertilisers, grain, etc.

Kingston Wharf. As for Medina Wharf, above.
STEVEDORES: By arrangement with Agent and wharf owners. Normal working hours: 0800–1700 Monday to Friday. Overtime on Saturdays, etc., by arrangement. No work on public holidays.
MEDICAL: All medical facilities are available. Agent should be given advance notice of requirements. If call is solely to land sick personnel, see "Southampton" entry.
DENSITY: Cowes – 1025 salt water.

Newport – varies according to amount of recent rainfall and state of tide.
FRESH WATER: Available on all commercial wharves.
FUEL AND DIESEL OIL: Available by arrangement with Agent.
CRANES: Hammerhead crane at Elliot Turbo Machinery Ltd., 50 tons. Medina Wharf: 2 grabbing cranes of 4.5 tons for bulk cargoes.
OPENING/CLOSING HATCHES: By ship's crew.
REPAIRS: All hull and engine repairs undertaken to vessels capable of Cowes entry. Graving dock for ships up to 200 ft. in length and 14 ft. draft.
SERVICES: Compass adjuster, radar and radio mechanics available locally. Charts and general stores available locally.
OIL POLLUTION: Cowes and the Solent are world-famous yachting centres. Pollution is dealt with severely.
AUTHORITY: Cowes Harbour Commissioners. Harbour Master.

DARTMOUTH: 50.21 N. 03.34 W. (See Plan Book)

PORT LIMITS: A line from Inner Froward Point to Combe Point.
DOCUMENTS: Normal documents for U.K. ports.
PILOTAGE: No direct radio contact with Pilots. Contact local Agent or Berry Head Coastguard Station who will telephone Pilot.

Pilot station 5 cables S.S.E. Castle Ledge Conical Buoy.
ANCHORAGE: Anchor at pilot station.
MAX. SIZE: Max. length 400 ft., max. draft 26 ft.
HEALTH: Pratique granted by Customs on arrival.

Also see "Health – All Ports" before first U.K. port.
RADIO: Route cables, etc., through Niton or Lands End Radio Stations.
TUGS: Tugs are not normally available.
BERTHING: All berthing on midstream buoys.
MEDICAL: All medical services are available; if possible give notice of requirement.
DENSITY: Normally salt. 1025.
FRESH WATER: Available only for small vessels.
FUEL: Not available.

FIRE PRECAUTIONS: Normal.
GANGWAY/DECK WATCHMEN: It is advisable to have watchmen.
OPENING/CLOSING HATCHES: Crew open.
CARGO GEAR: Ship's gear.
REPAIRS: All repairs unless of a major or underwater type can be carried out.
REPATRIATION: Facilities exist.
AIRPORT: 35 miles from Exeter airport. Internal and short range Continental flights.
TELEPHONES: Not normally available, except for H.M. ships.
HOLIDAYS: Not applicable.
POLICE/AMBULANCE/FIRE: Dial 999 for emergencies. Local hospital adjacent to Harbour Office.
SHORE LEAVE: Permitted. Seaman's book adequate.
GENERAL: Dartmouth does not now operate as a commercial port except for small vessels up to about 800 d.w.t. en route to Totnes, although the harbour is suitable for ships of 18,000 d.w.t., and mooring buoys are available for such vessels.

Lay-up facilities available for small coasters.
AUTHORITY: Dart Harbour and Navigation Authority.

DOUGLAS: Isle of Man: 54.09 N. 04.28 W. (See Plan Book)

PORT LIMITS: That part of the coast including all creeks, bays and headlands from HW mark Ordinary Spring Tides which extends from Port Soderick landing jetty (Lat. 54° 07′ 24″ N., Long. 04° 31′ 48″ W.) in a Northerly direction to the most Easterly point of Clay Head (Lat. 54° 11′ 42″ N., Long. 04° 23′ 05″ W.) thence in a straight line drawn in a 135° True (S.E.) direction for 3 nautical miles, thence in a straight line drawn to a position 3.5 nautical miles 135° True (S.E.) from Port Soderick landing jetty, thence in a straight line drawn to Port Soderick landing jetty.

All shipping entering the above defined area should contact Douglas Radio on Channel 16 VHF.
DOCUMENTS: Same as for all U.K. Ports.
PILOTAGE: Not compulsory. Arrangements usually made at least 24 hours before vessels' arrival, through Ships' Agent, or to Harbour Master, Douglas – Telephone: 23813. Call Douglas Radio on Channel 16 and then transfer to Channel 12 for instructions when entering control area 3 miles off Douglas.
ANCHORAGES: In Douglas Bay:
Douglas Head bearing 196° (T) 7 cables in 6 fathoms.
„ „ „ 199° (T) 9.3 cables in 7 fathoms.
„ „ „ 200° (T) 8 cables in 6.5 fathoms
„ „ „ 212° (T) 7.9 cables in 10 fathoms
RESTRICTIONS: Enter only on Harbour Master's instructions.
MAX. SIZE: Max. size of Cross Channel Vessels 350 ft. LOA, draft 13 ft.

Max. Size of Cargo Vessels 190 ft. LOA, draft 12 ft. Spring tides 9 ft., Neaps to Inner Harbour, dries out at LW.

Max. size of Tankers 230 ft. LOA, draft 13 ft. at LWOST.
HEALTH: See "Health – All ports" before first U.K. port.
RADIO: Port Patrick for vessels coming from North. Anglesey for vessels coming from South.
VHF: Douglas Radio manned when vessels expected. Channel 16 and 12 only.
RADAR: Port Radar available for use in fog or when required. Used with Channel 12 VHF.
TUGS: 2 tugs with bollard pull of 4 tons and 2.5 tons operated by Laxey Towing Company Ltd. Tugs fitted with VHF.
BERTHING: Passenger vessels – 6 berths for vessels of 350 ft. in length, 13 ft. draft LWST at Victoria Pier and King Edward Pier. Roll-on/Roll-off linkspan operated by Manx Line Ltd.

Isle of Man Steam Packet Company Cargo Berth – vessels 225 ft. LOA draft 13 ft., dries out at LW. Served by 28 ton crane for container traffic.

Cargo Vessels – Battery Pier (22 ton crane on 25 ft. radius) berth vessels 180 ft. LOA with draft 12 ft. aft, 8 ft. forward at LWST.

Coffee Palace Berth will accommodate vessels of 190 ft. LOA draft 12 ft. Springs, 9 ft. Neaps, dries out at LW.

Market Berth same as Coffee Palace Berth.

Battery Pier – Tankers up to 230 ft. LOA, draft 13 ft. at LWOST. Gas Tankers can berth at inner end of Battery Pier, vessels of up to 180 ft. LOA, draft 12 ft. aft, 8 ft. forward at LWST. Discharging of cargo vessels and container vessels can be done by shore crane.

All berths at Douglas are salt water.
CRANES: One 22 ton crane on 25 ft. radius at Battery Pier. The other cranes are 5 ton mobile cranes, capable of lifting about 2 – 3 tons when working at full radius. One mobile grab crane.
BULK CARGO FACILITIES: Bulk cargoes of coal and scrap metal are handled at Coffee Palace and Market Berths described above.

Rate of discharge for coal about 60 – 70 t.p.h. by grab crane.
SPECIALISED CARGO-HANDLING FACILITIES: Containers are handled at Isle of Man Steam Packet Company Berth and by 22 ton crane at Battery Pier

Roll-on/Roll-off service operated to Victoria Pier by Manx Line Ltd.

L.P.G. cargoes are handled at inner end of Battery Pier as described above.
BRIDGES: Swing Bridge only to Inner Harbour.
STEVEDORES: Advice required to Ship's Agent. Rate of discharge – cement 60 t.p.h.; coal 60 – 70 t.p.h.
MEDICAL: Advise Agent when possible, alternatively contact Harbour Master with advance warning. Hospital available.
TANKERS: Tankers pipe-lines 6 in. 2 Tanker berths at Battery Pier – Max. draft. 16 ft. to be taken in on flood tide only. 13 ft. only at LW Spring tides. Discharging rate 180 – 200 t.p.h.
DENSITY: Density of water salt (1025).
FRESH WATER: Fresh water available on request to Agent or Harbour Master.
FUEL: Fuel delivered by road tanker only. Contact Manx Petroleums or Esso.
FIRE PRECAUTIONS: Fire precautions as normal.
CONSULS: None.
REPAIRS: Limited facilities only.
DRY DOCKS: None.
SURVEYORS: None.
GANGWAY/DECK WATCHMEN: Could be arranged by Agent.
OPENING/CLOSING HATCHES: Handled by crew.
CUSTOMS ALLOWANCE: Same as U.K.
CARGO GEAR: Cargo can be discharged by ships own gear or mobile cranes. 22 ton crane at Battery Pier.
REPATRIATION: Repatriation only done through arrangement with Agents.
AIRPORT: Ronaldsway Airport 8 miles from Douglas and served by regular airlines.
TIME: Same as U.K.
HOLIDAYS: Good Friday, Easter Monday, Spring Holiday, T.T. Friday (1st week in June), Tynwald Day (5th July), August Holiday, Christmas Day, Boxing Day, New Year's Day, 2nd January.
TELEPHONES: No connections to ships.
POLICE/AMBULANCE/FIRE: Police phone, 26222; Ambulance phone, 3661; Fire Brigade phone, 3333.
SERVICES: None.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Identification cards not required for British Ships. Same as U.K.
REGULATIONS: No unusual regulations.
DELAYS: Delays can be expected due to tidal conditions, or awaiting a berth; also delays caused by strong Easterly winds, which make Douglas Outer Harbour untenable.
AUTHORITY: Chief Harbour Master, Isle of Man Harbour Board.

DOVER: 51.07 N. 01.18 E. (See Plan Book)

DOCUMENTS: Required on arrival:

Crew List H.O. Form I.B.6. for H.M. Immigration.
Crew Declaration Form C.142 for H.M. Waterguard. (Duplicate).
Deratisation Certificate.

It is required to report and clear a vessel at Customs House if remaining in port more than 24 hours for loading and discharging cargo or embarking and disembarking passengers, with following:

Passenger List. Cargo Manifests. Ship's documents.
PILOTAGE: Requests for Pilot normally made by local Agent.

Vessels from Westward obtain Pilot from pilot station, Folkestone.

Vessels from Eastward obtain Pilot from position approx. 1 mile S.E. of Dover Harbour Eastern Arm Head.

Vessels approaching Dover Harbour Entrances should do so with caution in accordance with instructions from Port Control. Masters are warned of the high frequency of cross channel vessels and hovercraft entering and leaving by both entrances.

Port Control: Signal Station situated at end of Eastern arm operates VHF Channels 74 (Port Control Frequency) if not fitted with Channel 74 vessels should call on Channel 16 and will be directed to use Channel 12.

Motor launches serving Pilots are also fitted with VHF Channels 74, 12 and 16.
DEEP SEA AND COASTAL PILOTS: For Channel, North Sea, British Coast and Baltic.

Contact agency 36 hours before arrival by radio, giving ETA Dover and destination port(s).

Agencies are: "Hutchinson Gravesend" and "Hammond Dover".

On approaching Dover contact Port Control by VHF for instructions and: For "Hutchinson" Pilot – hoist, flash or sound No. 1. For "Hammond" Pilot – hoist, flash or sound "B".

Pilots will also board at any UK or continental port as required.
ANCHORAGE: Limited space available in Outer Harbour. Contact Port Control in advance for instructions.
RESTRICTIONS: Attention is drawn to the strict requirement of obtaining permission to enter or leave the harbour. It will be noted that although the traffic control signal may be exhibited for entry/departure, every vessel manoeuvring to enter or leave the port is required to obtain specific permission to enter or leave, as the case may be.

Vessels awaiting permission to proceed should keep at a safe distance and clear of the entrance until so authorised. Responsibility for entering or leaving with caution and the safe navigation of each vessel subsequent to the receipt of permission to proceed continues to remain the responsibility of the Master.

Explosives – dangerous cargo: Declaration to be made and permission obtained prior to entering the harbour. Board not compellable to receive within the harbour any articles which in their opinion would endanger safety of harbour or vessels or goods.
HEALTH: Vessels arriving in Dover Outer Harbour are boarded by Water guard who grant pratique on arrival. Coastwise vessels from U.K. ports have automatic pratique.

Also see "Health – All Ports" before first U.K. port.
RADIO: Vessels from East use North Foreland Radio call sign GNF and vessels from Westward use Niton Radio call sign GNI.
RADAR/VHF: Port Control is fitted with radar and VHF, and Masters can make initial contact with Port Control VHF Channels 74, 16 and 12. Operational frequency is Channel 74. See "Pilotage".
TUGS: 2 tugs of 1,200 h.p. Tugs normally join vessels inside Dover harbour, but meet vessels outside by arrangement. Charges per movement. Tug's ropes normally used.
BERTHING: All berths in Outer Harbour can be reached at all times. Those in dock can be reached from 2 hours before each high water. All berthing requirements are allocated by Port Control.

Spring rise 19.4 ft. (5.9 m.). The Outer Harbour which comprises an area of approx. 600 acres with depths of water up to 30 ft. (9 m.) at MLWS is bounded by the Southern Breakwater (detached mole), the Eastern Arm and the Admiralty Pier. Anchorage restricted to limited area as shown on Admiralty Charts – normally used by vessels awaiting to berth or enter dock.

Western Docks: Comprising the Admiralty Pier, the Train Ferry Dock the Inner Harbour, Tidal Basin, Granville and Wellington Docks.

Admiralty Pier: Length 4,140 ft. (1,260 m.), protects the Harbour from the West. There are 4 deep water berths with depths from 17 to 26 ft. (5.2 m. – 7.9 m.) at MLWS. The 3 inner berths are used for Cross Channel traffic, 2 berths being for passenger ferries only, and the third for roll-on/roll-off traffic.

Prince of Wales Pier: This separates the Inner and Outer Harbours and offers 1,600 ft. (488 m.) of berthing for vessels up to 23 ft. (7.0 m.) at MLWS. It should be noted that berthing on Prince of Wales Pier is only permitted by special arrangement with the Quay Manager.

West Hoverport: All hovercraft services operate from here and Hoverport in Eastern Docks will transfer all operations to West Hoverport which is adjacent to and West of Prince of Wales pier. "Seaspeed" operate daily services for passengers and accompanied cars to Boulogne and Calais.

Train Ferry Dock: Adjacent to Admiralty Pier is operated by British Rail. Trains run direct into the ferries which operate daily services of Passengers and Freight to Dunkirk throughout the year.

Tidal Basin: Forming the entrance to the Wellington and Granville Docks is entered between the Admiralty and Prince of Wales Piers. It comprises an area of approximately 12 acres, the channel partly drying at low water. The entrance is 140 ft. (42.7 m.) wide with a depth of 19 ft. (5.8 m.) at MHWS. There are 2 berths in the Tidal Basin with quay frontage of 300 and 360 ft. (91.4 m. and 109.7 m.) respectively, at which vessels take the ground at low water. These berths are principally used for the discharge of stone, slag and aggregates.

Granville Dock: (Approach channel with depth of 21 ft. (6.4 m.) at MHWS).

This dock is non tidal and comprises an area of 4.5 acres with depths of water of 21 ft. (6.4 m.) at MHWS, 17 ft. (5.2 m.) at MHWN with a total quay frontage of 1,850 ft. (564 m.). The entrance is 65 ft. (19.8 m.) wide and depth on the sill at MHWS is 21 ft. (6.4 m.). Electric portal cranes of 3 tons are installed and 3 ton mobile cranes are available. Transit sheds and open storage space are available at the dockside.

Wellington Dock: Non tidal and comprises an area of 8 acres with depth of water of 15 ft. (4.6 m.) at MHWS, 11 ft. (3.4 m.) at MHWN. Total quay frontage of 2,500 ft. (762 m.). The entrance is 70 ft. (21.3 m.) wide and depth on sill at MHWS is 15 ft. (4.6 m.). Transit shed and open storage are available at the dockside. 3 ton mobile cranes are available. Patent slipway 567 ft. (173 m.) in length is capable of taking vessels on its cradle of up to 175 ft. (53.3 m.).

Eastern Docks: The docks comprise the Eastern Arm, the Camber, Car Ferry berths and Hoverport.

The Eastern Arm: Length 1,700 ft. (518 m.) protects the Harbour from the East. Berthing for vessels up to 27 ft. (8.2 m.) at MLWS.

Consisting of 3 berths which are used for passengers (not cross-Channel passengers), general cargo and reefer vessels, regular coastal oil tankers and for vessels taking water or stores.

The Camber: A tidal basin divided from the Outer Harbour by the South Jetty and Pier "A", it comprises an area of 21 acres with a depth of water of 5.0 m. at MLWS. A two deck "Roll-on/Roll-off" freight berth operated by Townsend Car Ferries Ltd. provides daily freight services to Zeebrugge and Calais. There is also a single deck pontoon berth used by Worms Cargo as Agents for Schiaffino with daily services for freight to Ostend. Additional berthing accommodation for vessels with drafts from 10 to 14 ft. (3.0 m. – 4.3 m.) at MLWS

Car Ferry and Freight Terminal: Operated by Dover Harbour Board. Berths 1 and 2 are situated in the Camber, Berths 3 and 4 being situated to the Westward between Pier "A" and Pier "B". The Car Ferry/Freight Berths provide berthing for vessels up to 400 ft. (122 m.) in length with depths of water of 19 ft. (5.8 m.) at MLWS. Berths are connected with loading bridges to enable cars, coaches and freight vehicles to drive direct on board the vessels operating to Calais, Boulogne, Ostend and Zeebrugge. Shore facilities provide modern Reception Buildings, Customs Clearance Halls, Restaurant, Banking facilities, Shipping Operators' Offices, Freight Compound and Assembly Area, Forwarding Agents' Offices. Spacious Assembly Car Parks for vehicles. 2 Container Gantries each with a lifting capacity of 20 tons which have a combined lifting capacity of 40 tons are available at the Freight Terminal.

CARGO HANDLING FACILITIES: Seven berths equipped for handling roll-on/roll-off traffic. Two additional berths available in Summer of 1980, with double-lane width, double deck bridges plus additional bridge for passengers. These two berths are 23.0 m. width with draft of 7.0 m.

STEVEDORES: No particular ETA required as ship's Agent makes all necessary arrangements.

Packaged Goods. Approximately 25 tons per gang per hour average discharging rate.

MEDICAL: Medical assistance can be arranged by Agent to vessels passing Dover Harbour. Doctor will board a vessel in English Channel or on arrival at anchorage in Outer Harbour. Hospital facilities are available.

DENSITY: 1020.

FRESH WATER: Available to all vessels by pipe-line 25 t.p.h.

FUEL: Gas oil available from Shell Mex & B.P. Ltd., and Esso. 24 hours notice required.

GANGWAY/DECK WATCHMEN: Supplied on request.

OPENING/CLOSING HATCHES: By crew.

CERTIFICATES: Certificates to be obtained for foreign clearance, Register, Load Line, Safety Construction, Passenger and Safety Equipment.

IDENTIFICATION CARDS: Necessary plus passes for ships personnel at Eastern Arm berths having to pass through Eastern Docks terminal. Passes obtainable from Dover Harbour Board Staff at berths.

CONSULS:

Belgium	Dover 203 203	Netherlands	Dover 201 201
Denmark	,, 201 201	Norway	,, 201 201
Finland	,, 201 201	Portugal	,, 201 201
France	Folkestone 52561	Spain	,, 201 201
Germany	Dover 201 201	Sweden	,, 201 201
Italy	Folkestone 53692		

REPAIRS: Facilities available for minor engine repairs. Radio and Radar repairs also possible.

REPATRIATION: All facilities exist.

AIRPORT: Most repatriations by air through London Airport.

TIME: Local time BST 1 hour in advance of GMT. Reverting to GMT in Winter months.

HOLIDAYS: Official holidays: 1st January; Good Friday; Easter Monday; Spring Holiday (end May); August Bank Holiday; Christmas Day; Boxing Day.

POLICE/AMBULANCE/FIRE: Dover 999.

TELEPHONES: Not available.

SERVICES: Repairs to radar equipment, compass adjusting, supply of charts and crew changes can be arranged outside Dover Harbour in the English Channel at all times.

SHORE LEAVE: Allowed.

AUTHORITY: Dover Harbour Board.

DUNDEE: 56.28 N. 02.57 W. (See Plan Book)

PORT LIMITS: A vessel is considered to be an "arrived ship" when:

(a) For berthing turn-arrival at Fairway Buoy.

(b) For Laytime – usually "off or at the berth" and subject to Charter-Party terms.

DOCUMENTS:

3 Crew Lists.
3 Passenger Lists.
1 Tobacco Manifest.
1 Health Declaration.
Cargo Manifests.
Bills of Lading.
Derat.
Lights Certificate.

PILOTAGE: Port Control Service, call sign "Dundee Harbour Radio", maintains a 24 hour listening watch on VHF Channel 16 (156.8 mc/s) and also operates on Channels 12 and 11 (156.6 mc/s and 156.5 mc/s).

Pilotage is compulsory in Dundee Pilotage District. Pilots board incoming vessels within a 3-mile radius seaward of Tay Fairway Buoy or as close to as weather permits. The pilot boat is only on sea station when shipping is expected and accurate ETAs are essential.

ETA should be given 6 hours before arrival either by radiotelephone link call to Dundee Port Control 24121 or by radiotelegram to "Dockyard Dundee" Dundee. Amendments may be made up to 2 hours before the original ETA. When within VHF range (approx. 25 miles from Tay Fairway Buoy) ETAs may be confirmed by contacting "Dundee Port Control" on Channel 16 and transferring to Channel 12 to pass messages.

Pilot boats, when on station, keep a listening watch on Channel 16 and transfer to Channel 6 (156.3 mc/s) to pass messages.

ANCHORAGES: Pilots are instructed where to anchor vessels. There are 3 deep-water anchorages to accommodate vessels up to 28 ft. draft. 2 to accommodate vessels up to 22 ft. draft, and other minor anchorages.

RESTRICTIONS: Tide and draft 28 ft. at MHWS. Vessels enter 2 hours before HW. 26 ft. at MHWN. Vessels enter 2 hours before HW.

MAX. SIZE: Length 600/700 ft., beam 90 ft., draft 28 ft.

HEALTH: Health declaration on arrival – if clean, automatic pratique. Suspect disease as per international requirements. Pratique automatic if already called at another port.

Also see "Health – All ports" before first U.K. port.

RADIO: Any UK coast station. Nearest stations – Stonehaven and Forth.

VHF: Tugs operate on Channels 16, 12 and 6. Also see "Pilotage".

TUGS: Tugs join vessel in vicinity of West Ferry. Tug lines optional, charge made if tugs lines used.

STEVEDORES: One ETA to Agent or port suffices for all services.

MEDICAL: If vessel arrives from a suspect port (e.g. India/Pakistan) doctor will board and request smallpox certificates. Advance notice required for ordinary medication for arrivals week-ends. Hospitals and casualty stations available.

TANKERS: Diameter of hoses – 8 in. Slop discharge facilities not available. 2 tanker berths – 28 ft. draft. Discharge only at West berth.

DENSITY: 1005 oz. at MLWS. 1002 oz. at MHWS.

FRESH WATER: Available, 24 hour service. Delivery, hose from quays. Rate, 30 t.p.h.

FUEL: Small quantities gas oil by road tanker. Also at Princess Alexandra Wharf and Shell jetty for other than large vessels by arrangement.

FIRE PRECAUTIONS: Regulations are handed to Master on arrival.

GANGWAY/DECK WATCHMEN: Recommended for large vessels.

OPENING/CLOSING HATCHES: Stevedores will give weather cover only.

CERTIFICATES: As required by Board of Trade (Lifesaving, Radio, Registry, Medicines, Crew Agreement, Load Line) also derat.

BERTHING: Deep-drafted vessels must arrive at the fairway buoy at least 2 hours before HW to berth on same tide.

CUSTOMS ALLOWANCE: Foreign-going, 25 cigarettes or 1 oz tobacco per day. 8 days allowance granted. Home trade, same as for foreign-going but only 4 days allowance granted. Spirits, quarter pint per day for 4 days, further issue granted after 4 days for foreign-going only.

CONSULS:

Denmark	23044	Netherlands	23111
Finland	23111	Norway	23044
France	21252	Sweden	25512

REPAIRS: Engine and deck repairs by Robb/Caledon Shipyard and Kestrel Marine Ltd., Peterhead Engineering Ltd. and Yarrow Engineers Ltd.

DRY DOCK: Dry dock available for vessels of up to 500 ft. length, 46 ft. beam, draft 13 ft. 6 in. Springs.

SURVEYORS: Lloyds and DTI.

REPATRIATIONS: Facilities exist.

AIRPORT: Dundee Airport: Only U.K. flights available.

TIME: British Standard Time (GMT plus 1 hour). GMT in Winter months.

HOLIDAYS: 1st, 2nd and 3rd January; 2nd Monday April; 1st Monday in May; Last Monday July; 1st Monday October; Christmas Day and 26th December.

POLICE/AMBULANCE/FIRE: Tel. 999.

TELEPHONES: Quay telephones installed.

SHORE LEAVE: At the discretion of the Master.

IDENTIFICATION CARDS: Not required.

REGULATIONS: Absolutely no smoking, penalty £50.

AUTHORITY: Dundee Port Authority.

FALMOUTH: 50.09 N. 05.04 W.

DOCUMENTS:

1 Crew's Effects List.
2 Ship's Report by Master, or Authority X S 4.
1 Home Office Form 1S6.
1 Stores List.
1 Certificate of Deck Cargo Tonnage.
1 Light Certificate.
1 Port Dues Certificate
Ship's Certificate of Register.
Mercantile Marine Office Certificate – for British ships only.
Load-line Certificate.
Safety Equipment and Construction Certificates.
Lloyds Certificate.
Derat Certificate.
Ship's Register.
Light Bills.
Agents to complete Health Arrival Report.

PILOTAGE: This is a compulsory pilotage district. The Pilot will board from a cutter 2 miles South of St. Anthony's Lighthouse. In poor visibility a ship requiring a Pilot uses the distinguishing signal of "G" to which Pilot Cutter will reply with "H". Pilots operate R/T on Channel 16, 12 and 9.

ANCHORAGES: Vessels in excess of 665 ft. usually anchor in Falmouth Bay. Other vessels in outer harbour. Mooring Buoys available.

MAX. SIZE: See "Tankers".

HEALTH: Foreign arrivals to complete Maritime Declaration of Health. They are cleared immediately on arrival by either a port doctor or an officer of H.M. Customs depending on where the ship comes from and whether there is sickness on board.

Vessels arriving from ports within accepted area (N. European ports) and coastal arrivals need not present Declaration in all cases; when there is sickness on board the Port Health Authority must be informed preferably not more than 12 hours and not less than 3 hours before arrival.

Also see "Health – All ports" before first U.K. port.

TUGS: Available. On call during working hours and outside of hours when required if advance notice given. Tug's lines are to be used.

BERTHS: There is a large and 3 smaller dry docks and in addition, B.P. maintain a bulk storage plant. 13 deep-water berths. Combined frontage 8,000 ft. Vessels of 920 ft. have been accommodated. Draft LWOST 18 ft. – 27 ft. depending on berth.

Offshore Exploration: Falmouth Docks and Engineering Co. operates an offshore supply base with all services and on an exclusive basis.

STEVEDORES: Employed through The Falmouth Docks and Engineering Co.

TANKERS: Tankers berth at Eastern Breakwater provided draft not more than 27 ft. berthing at H.W. Max. length 550 ft. Coast Lines Berth: Max. draft 16 ft. There is a tank-cleaning installation available. Tankers of 840 ft. with draft 17 ft. forward and 23 ft. aft have been accommodated at Eastern wharf.

FUEL AND FRESH WATER: All classes of fuel oil and diesel oil are available and water is piped on the Dock Company wharves. At the repair berths, or in Carrick Roads, bunkers and water must be delivered by barge. Water by tug in Carrick Roads.

CONSULS: Denmark, France, Greece, Netherlands, Norway, Sweden and Spain.

GANGWAY/DECK WATCHMEN: Available in shipyard on request.

OPENING/CLOSING HATCHES: Normally carried out by crew.

AIRPORTS: London (Heathrow and Gatwick) 5.5 hours via Reading, or Bristol, St. Mawgan, 28 miles.

MEDICAL: Doctors and hospital facilities available. Agents should be advised in advance of any medical attention required.

CUSTOMS ALLOWANCE: At the discretion of Local Customs Inspector. Normal allowances are equivalent to 0.5 lb. tobacco per man and equivalent to 1 bottle of wine per man. Allowances may be halved for home trade vessels. Vessels in port for more than 3 or 4 days may receive extra allowances.

REPAIRS: All ship repairs can be carried out by local repair yards.

DRY DOCKS: Falmouth Shiprepair Ltd.

Queen Elizabeth Dock:	length	850 ft.	width	130 ft.
Falmouth Docks, No. 1:	,,	555 ft.	,,	75 ft.
Falmouth Docks, No. 3:	,,	750 ft.	,,	88 ft.
Falmouth Docks, No. 4:	,,	648 ft.	,,	86 ft.

TIME: British Standard Time is GMT. British Summer Time – GMT plus 1 hour (Summer).

HOLIDAYS: 1st January; Good Friday (variable date); Easter Monday (variable date); Spring Bank Holiday (variable date); August Bank Holiday (variable date); Christmas Day (25th December); Boxing Day (26th December).

POLICE/AMBULANCE/FIRE: Dial 999 from any telephone and ask for service required. Or County Police, Penryn 72231; Dock Police, Falmouth 311400; County Fire Service, Falmouth 314274; Docks Fire Service, Falmouth 311400; Ambulance, Truro 2349.

TELEPHONES: Can be placed on board in dry dock and most repair berths but not at Eastern Oil Wharf.

SHORE LEAVE: Granted.

AUTHORITY: Falmouth Harbour Commissioners, Falmouth Docks and Engineering Co. (Statutory Co.).

FELIXSTOWE: 51.57 N. 01.21 E. (See Plan Book)

DOCUMENTS:

Stores List.
Crew List.
Health Declaration.
Manifests.
Bills of Lading.

Ship's papers, including Register, Load-line Certificate, Safety Equipment Certificate, Radio Certificate, U.K. Light Dues, if any.

PILOTAGE: Cork or Sunk Pilot station, Master's option. 12 hours notice ETA vessel Cork or Sunk Pilot Cutters to be given via G.P.O. Coastal Station (Northforeland, Humber Radio) stating g.r.t., max. draft, and port of destination. Cables: "Sunk Pilot Vessel" – Northforeland Radio within MF range. Sunk Pilot Cutter 2182 kc/s, VHF range 156.8 mc/s, VHF Channel 16 then transfer to 156.3 mc/s, VHF Channel 6. Also see "Radar/VHF".

ANCHORAGES: At Cork Light Vessel; Quarantine anchorage off Harwich Road; "Northshelve" off Harwich; and in River Stour.

RESTRICTIONS: All vessels up to 25 ft. draft can enter Harwich Roads day and night on any state of tide. Max. draft for Container Quays and Oil Terminal 30/33 ft. depending on tides. At least 3 ft. keel clearance required at all times between channel bed and keel of vessel.

MAX. SIZE:

(a) General cargo vessels: Dock Basin 145 ft. wide entrance. Depth 18 ft. LWOST. No lock gates. Suitable vessels able to leave on any state of tide.

North Quay: 640 ft. in length.
South Quay: 610 ft. in length.
East Quay: 430 ft. in length.
North Development: Depth 33 ft. LWOST.

(b) Container vessels. Container Terminal depth: 33 ft. LWOST. Approach Channel Harwich Harbour Estuary: 23.5 ft. LWOST.

(c) Roll-on, roll-off vessels; Ferry Terminal: Vessels up to 450 ft. overall. Depth 22 ft. LWOST. No. 3 Roll-on/Roll-off Bridge: vessels up to 500 ft. LOA. Depth 24 ft. LWOST.

No. 4 Roll-on/Roll-off Bridge: Depth 33 ft. LWOST.

(d) Tankers. Oil Terminal: Vessels 600 ft. overall. Depth 30 ft. LWOST.

HEALTH: Pratique flag in daylight and lighted signals in darkness to be displayed by vessel on arrival. Health Declaration to be given in writing or verbally by Master on arrival. If disease suspected, then report to pilot station who will advise Health Authorities.

Also see "Health – All ports" before first U.K. port.

RADIO: Northforeland, Humber, Niton (or any other radio station convenient to vessel's position).

RADAR/VHF: To facilitate the arrival and departure of vessels trading to and from the Port of Felixstowe, a pilot station operates in the vicinity of the Cork Lanby in position Latitude: 51° 56′ 42″ N., Longitude: 01° 27′ 06″ E. This station is additional to, but is not a substitute for, the Sunk Pilot Vessel. It is only for the use of vessels bound to or leaving the port, whose normal course does not take them past this vessel. Full service is provided at the Sunk Station.

Inward bound ships: Vessels requiring a Pilot at the Cork Station should apply to the Sunk Pilot Station, or Harwich Pilot Station (Telex: 98472) giving 24 hours' advance notice, and an 8-hour estimated time of arrival (ETA) at the Cork should be given through a G.P.O. Coast Station as should the gross tonnage, maximum draft and port of destination. Any adjustment to this time should be given at least two hours before arrival. Messages should be addressed to "Sunk Pilot Vessel Northforelandradio". As soon as *within MF range* (approximately 50 miles), they should call the Sunk Pilot Vessel on 2182 kc/s. When contact has been established, the pilot vessel will transmit and listen on 2241 kc/s. or any other agreed licensed intership frequency for passing messages. The pilot vessel should be contacted again as soon as *within VHF range* (approximately 20 miles), calling on 156.8 mc/s (VHF Channel 16) and then transferring to 156.3 mc/s. (VHF Channel 6) for further messages. It should be remembered that attempts to establish contact by radio at extreme ranges cause much interference.

Outward bound ships: Masters of vessels about to sail from Felixstowe proceeding Northbound, via Shipway, should order their Pilot to the Cork Pilot Station and vessels Southbound should order their Pilot to the Sunk Pilot Station. These requirements to be made known when order is given to the Harwich Pilot Station. Pilots for ships outward bound should be ordered by telephoning Harwich (code 02555) 3129, giving at least two hours notice.

Service is provided by 40 ft. fast pilot launches with black hulls, white wheelhouses and flying the pilot flag. The launches keep a constant listening watch on Channel 16 VHF (change to Channel 6 for working). It is recommended that the vessel about to ship or land her Pilot should keep in VHF communication with the launch. There is a shore VHF station with a duty Pilot; allocated frequencies are 156.8 mc/s. (Channel 16) for calling and 156.45 mc/s. (Channel 9) for working.

Harbour operations service and port signals: An operations service, jointly operated by the Harwich Harbour Conservancy Board and the Trinity House Pilotage Service, is provided from Harbour House, Harwich, and the Trinity House Pilotage Operations Service. This valued service is provided by Harbour Board officers and Trinity House duty Pilots, co-operating mutually, on a continuous 24 hours a day basis to provide vessels using the port with information and advice. The following communication facilities are available:

1. *Very high frequency radio telephone:* Channel 16, calling and safety: Channel 12, prime harbour working frequency: Channel 14, secondary harbour working frequency: Channel 20, Harbour Board radar *information* frequency: Channel 11, harbour service frequency: Channel 9, pilotage service frequency: Channel 38, Trinity House frequency:

2. *Land line communications:* (i) *Telephones:* harbour operations: Harwich 6535/6; Pilotage service: Harwich 3129 and 6300; (ii) *Telex:* Trinity House pilotage service and Harwich; harbour joint operations service: 98472;

3. *Other equipment:* The centre is provided with a standard harbour surveillance radar 2, 16 in. conventional marine displays; also provided is an electronic tide gauge, wind direction and force instruments. All vessels should provide timely advice of their arrivals and departures to and from the port and report their movements through the harbour and its approaches as directed.

The dock closed signal will be exhibited at the seaward end of the South Pier at the entrance to the dock basin when vessels are manoeuvring within or leaving the tidal basin. The red revolving light, one second flashing, 19 ft. above HWOST is visible over an arc of about 180° from Landguard Point to the River Orwell entrance.

TUGS: 3 tugs (18 tons bollard pull) stationed at Felixstowe, join vessels Harwich approaches or where ordered by Pilots. Vessels to use tug lines at additional cost. Tugs on VHF Channel 16 (24 hours) Channels 6, 8, 9 or 12 working. Also 2,182 kHz.

BERTHING: Regulated by Harbour Master through Pilot stations and tugs. Vessels able berth within restrictions of individual berths.

	Depth of water at LWOST	*Length of quay in feet*
Transatlantic Container Terminal	dredged annually to 33 ft.	1,540. Three container berths and 1 Roll-on/Roll-off berth
Dock Basin	18 ft.	East Quay 430; North Quay 640; South Quay 610. Vessels up to 350 ft. in length are accepted
Ferry Terminal	22 ft.	360. Vessels up to 450 ft. in length are accepted
Northern Development	dredged annually to 24 ft.	No. 3 Roll-on/Roll-off bridge 450. Vessels up to 500 ft. in length are accepted
	dredged annually to 33 ft.	Dual purpose berth for General Cargo and No. 4 Roll-on/Roll-off bridge 1,100 ft.

CARGO HANDLING FACILITIES: *General Cargo Division:* Mobile pneumatic grain discharger, discharge rate 30 t.p.h. into silo with capacity of 3,500 tons.

Mobile cranes, capacity 27.5 tons. Scotch derrick crane, capacity 32 tons at 90 ft. radius.

Roll-on/Roll-off Division: No. 1 Berth: Transport Ferry Terminal. Upper and Lower deck loading ramps. Electric travelling crane, capacity 32 tons at 110 ft.

No. 2 Berth: One hydraulic loading ramp designed to carry loads up to 140 tons. Upper loading ramp designed to carry loads up to 32 tons. Least depth 24 ft. LWOST.

No. 3 Berth: Hydraulic loading ramp designed to carry two lanes of traffic with loads up to 140 tons. Electric travelling crane with capacity of 35 tons at 95 ft. radius.

No. 4 Berth: Allows a combination of Roll-on/Roll-off and conventional vessels to be accommodated. The hydraulic loading ramp is designed to carry two lanes of traffic with loads of up to 140 tons.

Container Division: The Container Terminal South of the Ferry Terminal is equipped with one 40 ton and two 30 ton Portainer cranes capable of handling 20, 30, 35 and 40 ft. containers on automatic spreaders.

STEVEDORES: 24 hours notice required by Agent to advise stevedores of vessel's ETA, in order to arrange berthing and allocation of labour. All stevedoring arranged between Dock Company and vessel's Agent.

MEDICAL: Prior notice desirable through Agent to arrange attention. All services available.

TANKERS: 4-in. and 6-in. connections. No slop facilities. No facilities for gas freeing alongside or in harbour.

One tanker berth available. Vessels up to 600 ft. overall, 25,000 d.w.t. Depth of water 30 ft. LWOST.

DENSITY: 1025 salt water.

FRESH WATER: Pipe-line connections to all quays. Delivery approx. 50 t.p.h. Barge service available for supplies to vessels at anchor.

FUEL: Marine diesel and gas oil available, pipe-line and barge delivery. 24 hours notice required.

FIRE PRECAUTIONS: Standard precautions at all berths.

GANGWAY/DECK WATCHMEN: Not compulsory. If required, cost negotiable.

OPENING/CLOSING HATCHES: Work undertaken by crew.

CERTIFICATES:

Valid Derrick and Rigging Certificates.
Ship's Register.
Load-line.
Safety Equipment.
Radio.
Derat.
Construction.
(Light Dues Receipts).

CUSTOMS ALLOWANCE: 100 cigarettes or equivalent in tobacco or cigars per man. 1 bottle spirits.

IDENTIFICATION CARDS: Not necessary if in possession of Seaman's Book or Passport.

CONSULS: Royal Norwegian Vice-Consul Ipswich (9) 59281; Royal Swedish Vice-Consul Felixstowe 78844, Icelandic Vice-Consul Felixstowe 5651/4.

REPAIRS: Facilities exist for small repairs only.

DRY DOCKS: None available.

REPATRIATION: All facilities available.

AIRPORTS: Southend – 70 miles; Heathrow – 90 miles. International flights.
TIME: GMT. In Summer months, April to October, time advanced 1 hour.
HOLIDAYS: All normal Bank Holidays, but official notification of port closures for such holidays is given well in advance of relevant dates.
POLICE/FIRE/AMBULANCE: Emergency points on all quays. Tel. 300 or, outside dock area, 999.
TELEPHONES: Shore connections available by prior arrangement for vessels on regular trades.
GENERAL: ETA to Agent required 72 hours, 48 hours, and 24 hours prior arrival.
SERVICES: Most services available for dry cargo vessels, but no special tank cleaning or tank washing facilities for tankers.
SHORE LEAVE: No restrictions.
DEVELOPMENTS: A 1,400 ft. (60 acres) extension to the North of the port is expected to be completed mid to late 1981.

The expansion scheme will eventually more than double the port's container handling capacity The first deep-draft vessel is expected to berth alongside in late January 1981.

Phase I comprises of 400 ft. of multi-purpose common-user quay, to be built as an extension of the present Northern Development to form an 800 ft. quay, dredged to 32 ft. (9.75 m.) and equipped for container handling operations.

Phase II comprises of a 1,000 ft. long deep draft (39 ft.) container terminal to be operated by Walton Container Terminal Ltd.

The main navigation channel is to be dredged to 30 ft. (9.2 m.) MLWS.

Equipment – Phase I: Two 40-ton capacity rail-mounted quayside container handling cranes designed and built by Conrad-Stork BV of Haarlem, Holland.

Four 35-ton capacity Paceco Transtainer rubber tyred gantry cranes built by N.E.I. Clarke Chapman Cranes Limited of Leeds.

Equipment – Phase II: Two 40-ton capacity rail-mounted quayside container handling cranes of Ishikawajima-Harima Heavy Industries Company Limited of Tokyo. Constructed by Magrini Galileo of Italy.

Five 35-ton capacity Paceco Transtainer rubber tyred gantry cranes built by N.E.I. Clarke Chapman Cranes Limited of Leeds.

Phase I and Phase II will also be equipped with associated purpose-built terminal tractor/trailer units and forklift trucks.
AUTHORITY: Felixstowe Dock & Railway Co.

AGENT: Hargreaves Fuel & Shipping, "B" Block, Container Control Office, Felixstowe Docks, Felixstowe, Suffolk. Tel: Felixstowe 6255, After hours, Felixstowe 2196. Telex: 98411. Cables: "Hargreaves, Felixstowe".

FISHGUARD: 52.01 N. 04.58 W. (See Plan Book)

DOCUMENTS: as for "Cardiff".
PILOTAGE: Local Pilot available on request. Pilotage compulsory.
ANCHORAGES: Eastward of a line joining Northern and Eastern breakwaters.
MAX. SIZE: Max. draft 18 ft.
HEALTH: See "Health – All ports" before first U.K. port.
RADIO/VHF: Fishguard Radio, VHF Channel 16 and 14.
TUGS: None.
FACILITIES: Stern loading, car and roll-on/roll-off Ferry Port. Also lift-on/lift-off crane of 22 tons.
CRANES: 2×6 tons and 1×22 tons.
STEVEDORES: No stevedores – vessels worked by British Railway staff.
MEDICAL: Doctors available. Hospital facilities 16 miles away.
DENSITY: 1025.
FRESH WATER: Available alongside quay.
FUEL: Available with prior warning.
GANGWAY/DECK WATCHMEN: Ship's crew.
OPENING/CLOSING HATCHES: Crew.
REPAIRS: Minor repairs by BR workshops and contractors.
SURVEYORS: At Milford Haven.
AIRPORT: Cardiff and Swansea.
CUSTOMS ALLOWANCE: (Crew allowance) 40 cigarettes. No wine or spirits unless proceeding on leave.
POLICE/FIRE/AMBULANCE: Dial 999. British Rail police on duty 24 hours.
SHORE LEAVE: Allowed.
AUTHORITY: Shipping and Port Manager.

FLEETWOOD: 53.55 N. 03.00 W. (See Plan Book)

DOCUMENTS:
- Manifests.
- Bills of Lading.
- Ship's papers.
- Crew Lists.
- Customs Documents.
- Health Documents.

PILOTAGE: Pilot to be picked up off No. 1 Fairway Buoy. Ordered through ship's Agent giving 24 hours notice of ETA.
ANCHORAGES: Good anchorage in outer limits of harbour in Lune Deeps in 14 fathoms.
RESTRICTIONS: Vessels under power must not navigate any portion of this harbour above No. 11 Buoy at a greater rate of speed than is necessary to navigate safely, also on passing other vessels, either steam or sail, hopper barges, pontoons in tow, etc., in the channels outside the above mentioned No. 11 Buoy and within harbour limits due care must be taken to pass them at a rate of speed that will not cause risk from displacement or what is commonly called "backwash", and that all vessels must be navigated in this harbour strictly in conformity with Rule 9 (Narrow channels) contained in the Collision Regulations for Preventing Collisions at Sea, 1972.

Vessels bound into Fleetwood must not enter the river without being sure they have sufficient depth of water to ensure their getting to the quays or piers to which they are bound.

In the event of any vessel grounding on the "Tiger's Tail" or in any other part of the Fleetwood Harbour, the Master shall not attempt to refloat the vessel by reversing the engines, or by any other means whatsoever, until all incoming vessels following have passed the stranded vessel and the channel is clear of shipping.

Locks are normally open from 2 hrs. before HW to 1 hr. after HW.
MAX. SIZE: (Within enclosed docks): 350 ft. LOA: 46 ft. 6 in. beam.

So far as draft is concerned, allowances have to be made for clearing the lock invert. These allowances vary according to the beam of the ship and the following scale may be taken as a guide:

Beam of Vessel		*Clearance Required*	
ft.	in.	ft.	in.
37	0	2	3
44	0	4	0
45	6	6	0
46	0	7	3
46	4	9	3
46	6 max.	10	3

HEALTH: See "Health – All ports" before first U.K. port.
RADIO: VHF Port Operations and Information Service. Call sign: Fleetwood Harbour Radio Channel 16 (156.80 mc/s): Calling and Safety. Channel 12 (156.60 mc/s): Port Operations.

All movements of vessels arriving for and sailing from the Harbour and Docks are controlled by the Harbour Master using the VHF Port Operations and Information Service located in the Harbour Master's Office on the West side of Fleetwood Harbour. (Lat. 53° 55′ 30″ N., Long 3° 00′ 12″ W.). This service is operated for the 24 hour period, and vessels must maintain a listening watch when approaching or leaving the Port. Messages must be restricted to matters appertaining to general navigation, berthing instructions and the safety of ships or persons within the Port Area. Messages of any other nature will not be accepted.
TUGS: Tug service operated by Fleetwood Exchange, Station Road, Fleetwood.
BERTHING: Under normal conditions the lock gates operate for 2 hours each side of high water.

There is a 25 tonne capacity scotch derrick available for lifts at the Wyre Dock. 3 mobile cranes with 35 tonne capacity. The General Cargo berths can be used for handling liquid chemicals and bulk cargoes. Grain can be shipped direct into silo (rate 200 t.p.h.) at one of these berths. There is a Roll-on/Roll-off berth in the harbour. This is a daily service to Larne and Dublin for wheeled vehicles and trailer loads.
STEVEDORES: Arranged through ship's Agent.
MEDICAL: Ship's Agent will organise medical attention if required.
DENSITY: 1015 at half tide; 1025 at high water.
FRESH WATER: Fresh water available through stand pipes. Charge according to consumption (sliding scale).
FUEL: All grades of fuel available.
FIRE PRECAUTIONS: No specific requirement outside usual "No smoking" precautions.
GANGWAY/DECK WATCHMEN: Ship's watchmen required.
OPENING/CLOSING HATCHES: Normally carried out by crew.
REPAIRS: 2 slipways located in Fish Dock with lifting capacities of 1,050 and 150 tons respectively.
REPATRIATION: Arranged through ship's Agent.
AIRPORT: Squires Gate, Blackpool, 10 miles away.
TIME: GMT in Winter. GMT plus 1 hour in Summer months.
HOLIDAYS: Christmas Day and Boxing Day; New Years Day; Good Friday and Easter Monday; Spring Bank Holiday; May 1st; Autumn Bank Holiday.

Cargo working can be arranged on any of these days upon request.
POLICE/AMBULANCE/FIRE: British Transport Police available on Docks Estate. Ambulance 999; Fire 999.
TELEPHONES: Can be arranged through Post Office.
SERVICES: Compass adjusting.
SHORE LEAVE: Crew members are allowed ashore.
AUTHORITY: British Transport Docks Board.

FOWEY: 50.20 N. 04.39 W. (See Plan Book)

PORT LIMITS: The whole of the Fowey River to a line across the entrance to the harbour. A vessel is considered to have arrived on entering the harbour unless she is anchored just outside by the Pilot to await suitable conditions for entering, in which case she is considered to have arrived on being so anchored.
DOCUMENTS:
- Crew and Passenger Lists are helpful, but not essential.
- Aliens List is essential.
- List of Bonded Stores, including beer.
- List of Personal Dutiable Articles owned by Crew.
- Bill of Health, if available.
- De-Ratisation Certificate.
- Manifest of all cargo on board.
- Copies of Bills of Lading.
- Stowage plan, if available.
- Normal Ship's Papers.

PILOTAGE: Vessel requiring Pilot gives ETA as far in advance as possible to Agent. Vessel displays normal signals off port. VHF calling Channel 16, working Channel 9. Pilot boats are black. The Pilot boards off entrance. Vessels can anchor South of entrance if necessary.

Pilots VHF station open for messages from arriving ships up to 2 hours before time of ETA received by Agent.

RESTRICTIONS: Vessels can enter at any time, if their draft is less than 18 ft. Otherwise according to tide. Depth of ship channel at LWOST – 20 ft.
MAX. SIZE: LOA 450 ft., beam 60 ft. Loaded draft of 28 ft. Vessels of this draft have to be handled at or near high water.

Vessels up to 486 ft. in length have been handled, but subject to prior consultation with the Harbour Master and owners of the loading berths.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Land's End Radio, Niton, or Portishead.
VHF: For arriving vessels see under "Pilotage".

Fowey Harbour Commissioners "Fowey Harbour Radio" calling Channel 16, working Channel 10, ECC Ports Ltd., loading berths operators, "Fowey Port Radio", calling Channel 16, working Channel 12.
TUGS: Two diesel tugs are available and normally join vessels on entering entrance. Ship's lines usually used. Only 1 tug required for vessels under 350 ft. length.
BERTHING: Vessels waiting for berths are normally moored, using their own anchor with their stern to a buoy. On the berth, vessels require long ropes.

Berth	*Max. LOA (approx.) (ft.)*	*Depth of Water at LWOST (ft.)*
Jetty No. 3	350	24
Jetty No. 4	380	24
Jetty No. 5/6	550	22
Jetty No. 8	450	28

CARGO FACILITIES: The port is specially equipped to handle china clay and ball clay in bulk and to a limited extent in bags. No other commodity passes through the port either inwards or outwards. There are 5 berths each with a bulk conveyor capable of handling up to about 330 t.p.h. Two of the berths (No. 3 and 4) have a 3 ton crane.
STEVEDORES: Earliest ETA possible is required, especially when a vessel arrives over week-end.
MEDICAL: If Medical Officer is required on arrival, advise Agent earliest opportunity. Hospital facilities are available.
DENSITY: River fully salt at all states of the tide.
FRESH WATER: Available at all jetties, delivered by hose and rate very variable.
FUEL: Gas/Oil only available. As much notice as possible is advisable.
GANGWAY/DECK WATCHMEN: Not normally employed.
OPENING/CLOSING HATCHES: Carried out by crew.
CUSTOMS ALLOWANCE: 200 cigarettes *or* 100 cigarillos *or* 50 cigars *or* 250 grams tobacco. Drink over 22% alcohol 0.5 litre *or* under 22% alcohol 1 litre *or* 1 litre fortified sparkling wine. 2 litres still wine. 50 grams perfume. 0.25 litre toilet water. Half this allowance for vessels arriving from home trade ports which for this purpose is from Elbe/Brest range of ports.
IDENTIFICATION CARDS: Not needed.
CONSULS:

Belgium	J. H. Samuel, Trafalgar Square, Fowey. Tel. 3414
Finland	,, ,, ,, ,,
France	,, ,, ,, ,,
Sweden	,, ,, ,, ,,
Denmark	Ross Carter, Albert Quay, Fowey. Tel. 3274.
Netherland	Ross Carter, Albert Quay, Fowey. Tel. 3274.

REPAIRS: Not possible. Minor repairs only.
REPATRIATION: Facilities exist.
HOLIDAYS: Saturdays, Sundays, and all Public Holidays.
POLICE/AMBULANCE/FIRE: Telephone 999.
TELEPHONES: No arrangements made for connection on board.
SERVICES: Compass adjusting can be arranged.
SHORE LEAVE: Allowed.
DELAYS: There is a possibility of delay in heavy rain.
AUTHORITY: Fowey Harbour Commissioners.
AGENT: Toyne Carter & Co. Ltd., Fowey, Cornwall. Tel. Fowey (072683) 3274. Telegraphic address: "Toyne Fowey". Telex: 45331 – AB: "Toyne G". After hours tel. Fowey 3428; 2370, 2525 or 2592. Ship's Agents and Shipbrokers.

GARSTON: 53.21 N. 02.54 W. (See Plan Book)

DOCUMENTS, HEALTH: and all general information, refer to "Liverpool".
RESTRICTIONS: Locking into/out of Garston commences 3 hours before HW and ceases 3 hours after for vessels of 250 ft. in length or under. Vessels over this length must enter when the river and dock are level – about 1 hour before HW to half an hour after.
MAX. SIZE: 500 ft. length, 63 ft. beam.
RADIO: As Liverpool. VHF Channel 20.
BERTHING: *Stalbridge Dock:*

Width of entrance	65 ft.
Depth on sill	26 ft. 8 in.
Lock length	276 ft.
Total water area	14.5 acres
Length of quays	3,200 ft.

Old and North Docks: entered from Stalbridge Dock

Total water area	14 acres
Length of quays	4,610 ft.

Dock Facilities:
Stalbridge Dock:

	No.	*Capacity*
Cranes	1 (Scotch Derrick)	32 tonnes
	2	10 tonnes
	2	7.5 tonnes
	5	6 tonnes
Coaling appliances	1	30 tonnes

High capacity fork and clamp lift trucks available.
Equalising beam giving a maximum lift of 18 tonnes available.
Old & North Docks:

	No.	*Capacity*
Cranes	2	7.5 tonnes
	5	6 tonnes
Coaling appliances	2	23.5 tonnes

Warehouses 3,031 sq. m. (3,625 sq. yd.)
CONTAINER FACILITIES: North Dock Container Berth in operation, equipped with 2×30.5 tonne transporter cranes and back-up facilities.
DENSITY: 1025.
FRESH WATER: Available Monday to Friday 0800 to 1600 hrs. All watering required outside of these hours is by arrangement and must be paid for at overtime rates. Rate of delivery, 10 t.p.h.
OPENING/CLOSING HATCHES: Hatches to be opened and closed by the crew except on request.
AIRPORT: Liverpool Airport, 1 mile distant.
HOLIDAYS: Normal English Bank Holidays. Vessels can be worked on these days but this involves additional payment.
POLICE/FIRE/AMBULANCE: Dial 999 and ask for service required.
TELEPHONES: No connection can be made to vessels.
GENERAL: Vessels are required to "stem" on entering the dock; that is, to send an Officer to the Pierhead Office to enter the vessel into the Stemming Book giving all details regarding the vessel and cargo and to sign the sheet.
DEVELOPMENTS: Modernisation of coaling facilities under consideration.
AUTHORITY: British Transport Docks Board.

GOOLE: 53.42 N. 00.50 W.

PORT LIMITS: Goole is a river port with conservancy jurisdiction to the junction of rivers Humber, Ouse, Trent. However, laytime commences from commencement of next normal working shift after ship is on berth and ship's Agent has issued "Notice of Readiness". This may be 0800 hrs. or 1300 hrs. dependent on time of issue of notice.

Precedence of order of arrival of vessels is determined by arrival time at Ocean Lock Entrance, Goole Docks.
DOCUMENTS:
Bills of Lading/Manifests (prepared by Agents at port of origination).
"Imperfect" Customs Entry.
Request (to work vessel).
*Request for Immigration Officer to be in attendance – if carrying passengers.
*Crew List to Immigration Officer (for foreign personnel).
Ship's Register.
Ship's Agent will normally notify Immigration Officer.
PILOTAGE: Compulsory from Spurn to Goole, two stages.
1st stage: Spurn Light Vessel to Hull Roads.
See "Grimsby" Pilotage.
2nd stage: Hull Roads to Goole. Pilot will board vessel in Hull Roads.
ANCHORAGES: Bull Anchorage on chart of Humber Estuary, or in Hull Roads, otherwise only on advice of Pilot.
RESTRICTIONS: State of tide, springs or neaps. Port entered during tidal hours, 3.25 hours before high water to half an hour after high water, according to draft. Pilots will advise.
MAX. SIZE: Vessels should be within following measurements: 300 ft. overall length, 50 ft. beam and 17/18 ft. draft. Vessels exceeding any of these measurements should seek advice before arranging to visit the port.
HEALTH: Pratique issued by H.M. Customs Waterguard (in absence of Port Health Official). Pratique accepted when entering after calling at another port in the U.K.

Also see "Health – All Ports" before first U.K. port.
RADIO: Via Humber Radio, call sign GKZ – call on Channel 16. Give ship's name and call sign and pass message.
VHF: See "Hull".
TUGS: Tugs available but not normally used. If required, to be arranged through Ship's Agent.
BERTHING: Berthing instructions given to vessel on arrival at entrance locks. No specific requirements.
SPECIALISED CARGO HANDLING FACILITIES: Three appliances for loading of rail-borne bulk cargoes, e.g. coal, coke, pitch, fluorspar, etc.

Two appliances for loading of canal-borne bulk cargoes (coal, coke, pitch, etc.).

Discharging of bulk cargoes by 12×7.5-ton and 5×6 tonne quay cranes, also 10 mobile cranes up to 40 tonne capacity, equipped with suitable grabs for sand, ores, fertilisers, coal, grain, sulphur, scrap iron, etc.

Road-borne bulk cargoes loaded by same grabs.
Two 32-ton Scotch derrick cranes for container handling.
50-ton and 40-ton electric travelling cranes for heavy lifts.
Roll-on/roll-off traffic (cars, etc.) accommodated at various berths. The docks are maintained at a constant level and specialised link span berths are not necessary.
No bulk liquid berths.
STEVEDORES: Arrangements made by ship's Agent who should be given ample notice of time of arrival of vessel, Port Authority will advise.
MEDICAL: Ship's Agent will arrange for attendance of doctor on notification. Doctor's, dentists and hospital services available. Ship's Agent can arrange service required.
DENSITY: Water in Goole Docks is fresh water and is maintained at constant level. Entry is by locks. Density 1000.
FRESH WATER: Delivery by water-boat through hose-pipes. Rate 30 t.p.h.

FUEL: All grades available on reasonable notice being given to Ship's Agent.
FIRE PRECAUTIONS: No specific precautions unless there are exceptional circumstances, when special arrangements can be made with local Fire Service.
GANGWAY/DECK WATCHMEN: Necessary. Usually provided from crew. Otherwise by negotiation locally.
OPENING/CLOSING HATCHES: Responsibility of crew.
SHIP CERTIFICATES:
Ship's Register (including load-line).
Radio Safety.
Life-Saving.
Light Dues.
Change of Articles.
Deratisation Certificates.
CARGO GEAR: Normally not required, as ample port facilities available.
IDENTIFICATION CARDS: May be required to be produced to Immigration Officer or H.M. Customs offical, especially in the case of foreign flags.
CONSULS: France, Netherlands and Denmark.
REPAIRS: All types of deck and engine repairs possible by local ship repairers.
DRY DOCKS: No. 2 Dry Dock: 301 ft. length, 50 ft. width at entrance, 15 ft. depth on sill. Two other dry docks. The water in the wet docks at Goole is maintained at a constant level and all dry docks are entered direct from the wet docks.
REPATRIATION: Arranged by Ship's Agent.
AIRPORT: Humberside Airport. Daily services to Amsterdam, Aberdeen and London.
TIME: GMT in Winter; GMT plus 1 hour in Summer months.
HOLIDAYS: Good Friday; Easter Monday; May Day; Spring Bank Holiday (last Monday in May); late Summer Bank Holiday (last Monday in August); Christmas Day; Boxing Day and New Years Day. No cargo working on these days.
POLICE/AMBULANCE/FIRE: Dial 999 and ask for service required.
TELEPHONES: No arrangements for ship connection.
SHORE LEAVE: No restrictions.
REGULATIONS: Visitors to vessels require permits from Port Authority and Master or ship's Agent. Smoking not permitted ashore in dock area.
AUTHORITY: British Transport Docks Board.

GRANGEMOUTH: 56.01 N. 03.43 W. (See Plan Book)

PORT LIMITS: At Grangemouth a vessel is not considered to be an "arrived vessel" until she is tied up at the allocated berth.
DOCUMENTS:
1 Crew List.
1 Passenger List.
1 List of all high duty goods in crew's possession.
1 Cargo Manifest.
All Valid Certificates.
PILOTAGE: Compulsory in river. Pilot boards at Inchkeith. Pilot boat on VHF, also see "Radio".
ANCHORAGES: North of Grangemouth West Buoy, 2 fathoms. Charleston Roads 5 fathoms. East of Inchkeith, up to 8 fathoms.
RESTRICTIONS: 24 hour locking system in operation depending on draft. The height of the tide must always be taken into account when dealing with larger vessels.
MAX. SIZE: Dry cargo vessels: Length 600 ft., beam 90 ft. Tankers: Length 575 ft., beam 90 ft. Draft according to state of tide. Vessels other than tankers max. draft 25 ft. 6 in. Tankers, up to 34 ft. max. draft.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Wick – Stonehaven – Cullercoats, coastal stations.

Port VHF (FM) Communications: Station: Lock Control Office, Lock Entrance, Grangemouth. This centre will maintain a continuous watch. Call sign: Grangemouth Docks.

156.8 Mc/s. Channel 16 calling and safety. All vessels should maintain a listening watch on this Channel and use it to establish contact with Grangemouth Docks. Once contact is established the Duty Operator will request vessels to shift to the Port Operations Channel.

156.7 Mc/s. Channel 14, Port Operations. A working Channel restricted to messages relating to the movement and safety of ships, and in emergency, to the safety of persons.

156.6 Mc/s. Channel 10, Inter-ship. A working Channel for tug-to-tug and tug-to-bridge communications.

156.3 Mc/s. Channel 6, Inter-ship. A working Channel for communication with other vessels.

No message of a personal character or messages of any other nature than those pertaining to the general navigation and safety of ships and persons within the Port Area can be accepted.
TUGS: Can join vessel at Hen and Chicken Buoy or Lock Gates. Tugs lines used.
BERTHING: The water in Grangemouth Docks is maintained at the same level by impounding pumps. On passing through the lock entrance berthing is allocated according to the nature of the cargo and draft of vessel.

The depth of water available at the berths varies in each dock, the max. depths being approx.: Grange Dock 26 ft.; Carron Dock 23 ft.; Old Dock 17 ft.
CARGO HANDLING FACILITIES: Bulk cargoes can be handled at most berths within the port. The East Wall berth has four 10-ton grabbing cranes. Other berths have 7.5 and 6-ton cranes. One 35 tonne Scotch derrick. Container berth is 1,000 ft. long and has two 32-ton transporter cranes.

A Roll-on/Roll-off berth in operation. Liquid chemicals and LPG Carriers are handled at the LPG berth and BP jetties. No. 1 North Jetty, which is a common user jetty handles chemicals.
STEVEDORES: No particular advice necessary to stevedores. Essential, however, advise Agent 24 hours prior arrival, who will advise stevedores.
CUSTOMS ALLOWANCE: At the discretion of Local Customs Inspector. Normal allowances are equivalent of 5 ounces tobacco per man and equivalent of 1 bottle of wine per man. Allowances may be halved for home trade vessels. Vessels in port more than 3 or 4 days may receive extra allowances.
MEDICAL: No advance notice necessary. Hospital facilities available in immediate district.
TANKERS: B.P. Refinery (Grangemouth) Limited. Private jetties in Eastern Channel: Nos. 2 and 3, 34 ft.; Nos. 4 and 5, 19 ft. 6 in. draft No. 1 North Side Jetty, pipe-lines connected to Ross Chemical and Storage Co. are 1.5 in. nitrogen line, 6 in. chemical line, 10 in. heavy fuel line, 2 in. fresh water supply, 8 in. motor spirit line, 8 in. gas oil line. Draft at No. 1 North 32 ft. 6 in.
DENSITY: 1019 average.
FRESH WATER: Available in most berths. Watermen supervise delivery on request. Delivery rate varies depending on berth.
FUEL: All grades available from oil installations.
GANGWAY/DECK WATCHMEN: Not necessary but can be done by ship's personnel.
OPENING/CLOSING HATCHES: Custom of port crew open and close hatches but stevedores will do so if required.
CERTIFICATES: For Customs Clearance valid Certificates in respect of radio, load-line, construction, safety equipment, deratisation, necessary.
CONSULS: Norwegian, Danish and Swedish consuls available locally.
REPAIRS: All types of repairs can be carried out afloat.
DRY DOCKS: Carron dry dock length 350 ft., breadth 50 ft., depth 22 ft. Middle dry dock length 335 ft., breadth 50 ft., depth 19 ft.
REPATRIATION: All facilities exist.
AIRPORT: 1 hour from Glasgow and Edinburgh airports where numerous connections for London thence world wide travel.
TIME: British Standard Time (1 hour ahead of GMT). GMT during Winter months.
HOLIDAYS: 1st, 2nd and 3rd January; 1st Monday May; 3rd Monday July; 2nd Monday September; Christmas Day and 26th December.
POLICE/AMBULANCE/FIRE: In public telephone dial 999 and ask for appropriate service. With dock circuit telephone dial 34 for Police or dial 51 and ask for Fire/Ambulance.
TELEPHONES: Telephones available at A and B sheds for placing on board.
SERVICES: Compass adjusting, calibrating, etc., can be done in river. No equipment for tank cleaning but can accept tank washings ashore.
SHORE LEAVE: Allowed.
AUTHORITY: Forth Ports Authority.

GRANTON: 55.59 N. 03.13 W. (See Plan Book)

DOCUMENTS:
1 Crew Declaration Form C.142 (Tobacco List).
1 Crew List.
1 Passenger List.
(Also see "Glasgow").
PILOTAGE: Pilot station Firth of Forth located at Granton, boarding station Inchkeith Island. Contact with Pilot cutters can be made on VHF Channel 16 and R/T 2182 kHz.
ANCHORAGES: Good holding ground at Inchkeith Island and Leith roadstead 18.3 m. – 31 m. Request should be made to Forth Navigation Service.
RESTRICTIONS: The entrance between the breakwaters is 103 m. in width. The rise of tide, 5.182 m. at springs and 3.658 m. at neaps, permits the entry or exit of vessels up to 6.7 m. draft at HW.

A red flag bearing St. George's Cross exhibited at the Middle Pier Head signifies that vessels should not enter the harbour until the flag is lowered. A green light takes the place of the flag during hours of darkness.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Forth, Stonehaven and Cullercoats radio stations.
RADAR/VHF: Port and estuary radar service. VHF contact can be made with Leith Harbour Radio on Channel 16. Forth Navigation Service now in operation.
TUGS: Sound signal for vessels requiring tug services is four long blasts. Tugs, if required, join the vessel in the roads. Ship's lines normally used. Tugs towing gear available, not compulsory.
BERTHING: *Middle Pier:* Quayage 210 m. max. depth 5.1 m. LWOST. In addition, there is a 137 m. crosspiece at the end of the pier where depth of water is 7.6 m. LWOST.

West Pier: Quayage 140 m. max. depth 7.0 m. LWOST.
TANKERS: Tankers up to 18,000 d.w.t. are accommodated at the end of the West Pier, adjoining port entrance.
MEDICAL: No advance notice of medical attention required. All hospital facilities available.
FRESH WATER: Available alongside at all berths.
FUEL: All grades available subject 24 hours notice in advance.
REPAIRS: Facilities available for all minor repairs.
AIRPORT: Edinburgh Airport, served by regular airlines, situated about 6 miles away.
HOLIDAYS: Public holidays observed annually: Third Monday in April; third Monday in September; Christmas Day (25th December); 26th December; 1st, 2nd and 3rd January.
AUTHORITY: Forth Ports Authority.

GRIMSBY: 53.34 N. 00.04 W. (See Plan Book)

DOCUMENTS: See "Immingham".
PILOTAGE: Compulsory. *Humber Pilotage District–Spurn Pilot Station:* A Pilotage Control and Radar Station (telephone No. 096–46–392; telex No. 527393) has been established on the Spurn Peninsula in a position Lat. 53° 34′ 29″ N., Long. 00° 06′ 48″ E.

The station is manned at all times with a Pilot Master in attendance and vessels bound to the Humber requiring the services of Humber Pilots must give advance notice by signal through a G.P.O. Coast Station to the Spurn Pilot Station giving ETA at the seaward limits of the Humber Pilotage District, draft, and destination at least 12 hours in advance. Any adjustment to the time should be given at least 2 hours before arrival.

Vessels wishing to communicate direct with the Spurn Pilot Station by VHF radio telephony may if within VHF range (approximately 20 miles) call "SPURN PILOT" on VHF Channel 16 and after contact transfer to Channel 14 for passing messages.

(Note: Attempts to establish communication on VHF at extreme range can cause unnecessary interference).

Inward vessels bound for ports up river of Hull desiring to pick up a Goole or Trent Pilot in Hull Roads should give at least two hours advance notice of the ETA in Hull Roads to the Humber Ports Operation and Information Service on VHF Channels 16 or 12 or through a G.P.O. Coast Station (telegraphic address "Humberops") or by Telex No. 527656.

Compliance with this procedure will ensure as far as possible, the shipping of Pilots without delay.
ANCHORAGES: Hawke and Sunk Roads, Haile, Spurn and Bull Anchorages. See "Hull". The Pilots will advise where to proceed to anchor and also provide Pilot.
MAX. SIZE: Maximum breadth 67 ft., maximum length of vessel that can be locked 268 ft. but vessels of greater length can enter docks on HW when all lock gates are open. 3 ft. clearance under the keel is required. Vessels having a draft of 19 ft. can normally enter the docks on any tide when the height of water is sufficient to allow 3 ft. clearance. Vessels with 21 ft. draft can be taken on spring tides. Vessels can enter usually approx. 3 hours before and 2.5 hours after high water.
HEALTH: Master has to report any "Reportable" illness as detailed in Form "Port 38" to "Porthealth Grimsby". Also see "Health – All Ports" before first U.K. port.
RADIO: Humber Radio, 2182 kc/s, or VHF Channel 16. Also see "Hull".
VHF: See "Hull".
TUGS: Normally join in Grimsby roads. Optional whether use ship's or tug's lines. Tugs operate from Immingham so plenty of notice required.
BERTHING: *Grimsby Docks:*

	Commercial Docks	Fish Docks
Entrance Locks:		
Length	90.0 m.	43.6 m. & 21.4 m.
Width	21.4 m.	10.6 m. & 13.0 m.
Sill level MHWN	6.8 m.	5.7 m. & 6.8 m.
Quay cranes	15 electric – capacity 3 to 7.5 tonnes 3 mobile cranes – for ship discharge	1 electric – capacity 15 tonnes 1 electric – capacity 5 tonnes 1 mobile – capacity 15 tonnes

There are two Roll-on/Roll-off berths in the Royal Dock, one to/from Esbjerg and a second to/from Norway. There is also one in the Alexandra Dock for motor vehicles.
STEVEDORES: Vessels are allocated labour in order of arrival so it is only necessary to give the Agent the ETA preferably before noon on the previous day. Normal working hours 0800 to 1700 hrs. Overtime can be worked 1700 to 1900 hrs. Monday to Thursday. On Saturdays and Sundays as required.
MEDICAL: Hospitals and all other medical facilities are readily available. If immediate attention is required on arrival please advise Agent by radio or telegram.
FRESH WATER: Available at all quays. Rate approx. 20 t.p.h.
FUEL: Normal gas and diesel oils available by both road and barge with at least 24 hours notice.
GANGWAY/DECK WATCHMEN: Not necessary, but the service is available if Master requires it.
OPENING/CLOSING HATCHES: Responsibility of the crew. The hatch beams can be removed and replaced by the shore cranes but there is an extra charge for this operation.
CUSTOMS ALLOWANCE: 200 cigarettes per 8 days. 1 bottle wine and 1 bottle spirits per 4 days. All seals to be broken.
CARGO GEAR: In accordance with the regulations laid down by H.M. Factories Inspector.
IDENTIFICATION CARDS: Some sort of identification whilst crew are ashore is advisable. (Seaman's Book or Passport).
CONSULS:

Belgium, Vice-Consul	Grimsby	59101
Denmark, Vice-Consul	„	57521
Dominican Republic	„	59101
Finland, Vice-Consul	Immingham	72387
France Consular Agent	Grimsby	50815
Germany (F.R.) Consul	„	77830 or 59101
Greece, Vice-Consul	Immingham	76246
Iceland, Consul	Grimsby	44721
Netherlands, Vice-Consul	„	43177
Norway, Vice-Consul	„	55324
Sweden, Vice-Consul	Immingham	72387

REPAIRS: Facilities are available for all deck and engine repairs.
DRY DOCKS: Nearest at Immingham.
REPATRIATION: Can be arranged if required.
AIRPORT: Humberside, 15 miles from Grimsby, daily service to Amsterdam, London and Aberdeen. Easy access to all major airports via rail, etc.
HOLIDAYS: New Years Day; Christmas Day; Boxing Day; Good Friday; Easter Sunday and Monday; May Day; Spring Bank Holiday (end May); Late Summer Bank Holiday (end August). All except Christmas Day, New Years Day, Good Friday and May Day can be worked as overtime if sufficient staff are willing.
POLICE/AMBULANCE/FIRE: Docks Police – Grimsby 59181 (Day), 42210 (night); Grimsby Police – Grimsby 57571. Emergency – Police/Fire/Ambulance 999.
TELEPHONES: Not available for connection on board.
GENERAL: The Grimsby Dock Master can be contacted on VHF Channel 16 and then change to Channel 18 for speaking.
SERVICES: Compass adjusting, tank cleaning, etc., are available.
SHORE LEAVE: Crew are allowed ashore.
AUTHORITY: British Transport Docks Board, Grimsby.
AGENT: See "Immingham".

HARTLEPOOL: 54.42 N. 01.12 W. (See Plan Book)

DOCUMENTS: *Ship's Official Papers including:*

Ship's Register.
Ship's Construction Certificate.
Load Line Certificate.
Deratisation Certificate.
Safety Equipment Certificate.
Radio Equipment Certificate.
U.K. Light Dues Certificate.
Crew List.
Bills of Lading, Manifest and Stowage Plan (Usually sent in advance).
Ship's Stores List.

PILOTAGE: Call by VHF when 3 hours from port and again half an hour before arrival. 2 hours required for sailing. VHF Channel 16, 14, 12, 9, 8 and 6.

Pilotage not compulsory. Tel. No. Hartlepool 66030.

Pilots usually board in vicinity of Longscar Buoy from a cutter showing the usual international signals.
ANCHORAGE: N.E. of Longscar Buoy but special care must be exercised in vicinity of prohibited anchorages near Ekofisk Oil Pipe-line and River Tees Fairway.
RESTRICTIONS: Daylight entry only for vessels exceeding 24.4 m. beam. Entrance channel 1.1 km. long. 61 m. wide. Nominal dredged depth 5.7 m. below L.A.T.
MAX. SIZE: Overall length 181.3 m. Beam 29.2 m. reduced draft of 7.92 m. Vessels approaching any of the max. sizes must consult Dock Master in advance.
HEALTH: New Regulations. The Public Health (Ships) Regulations in force from 1st April, 1978. Also see "Health – All Ports" before first U.K. port.
RADIO: Cullercoats Radio. VHF Hartlepool Port Radio Channel 16 and 12.
TUGS: 2 twin screw diesel (1,200 h.p.) tugs available during tidal periods. Tugs ropes available at extra charge.
BERTHING: Victoria Harbour, Deep Water Berth. 295 m. Depth 9.5 LAT. Equipped with 10-tonne cranes.

Entrance to the enclosed docks at Hartlepool is by 'The North' entrance, Victoria Harbour, which has a depth of water 8.18 m. on the sill at MHWST the entrance width is 21.33 m.

North Basin (non-tidal)

No Cranes. Length of Dock 182.87 m. Depth on sill is 3.1 m. below LAT.

Central Dock (non-tidal).

No Cranes. Length of Dock 301.73 m. Width of Entrance 21.33 m. Depth alongside is 2.5 m. below LAT.

West Quay — Conveyor.

A dry cargo bulk loading appliance capable of loading any cargo of sizes up to 3 in. cube into vessels of 8,000 tonnes carrying capacity or less, according to tidal conditions prevailing at the entrance locks.

North-West Corner.

Roll-on/Roll-off Berth. Max. length of vessel 135 m. Max. beam 20 m. Max. draft 6.25 m.

Union Dock (Non-tidal) 11 Cranes 10 tonnes – 3 tonnes. Length of quayage 1,551.94 m. Width of Entrance 20.32 m. Depth of Water of 2.2 m. below LAT.

Roll-on/Roll-off berth to handle loads of up to 450 tonnes. Max. length of vessel 85.34 m. Max. beam 14.93 m. Max. draft 5.79 m.

Coal Dock (Non-Tidal).

Length of Quayage 689.11 m. Width of Entrance 20.32 m. Depth of Water of 2.2 below LAT.

Jackson Dock (Non-Tidal).

Length of Quayage 600 m. Width of Entrance 20.32 m. Depth of Water of 1.6 m. below LAT.
STEVEDORES: All stevedoring undertaken by Port Authority on day work basis with voluntary overtime available (including week-ends). Shift working can also be provided.
MEDICAL: Full hospital and emergency services available at all times. Shore Telephone No. 999 or call on VHF 16.
DENSITY: 1025.
FRESH WATER: Available from shore hydrants and tugs at 20 t.p.h.
FUEL: Available by road and bunkering vessels.
GANGWAY/DECK WATCHMEN: Available by private arrangement through Agents.
HATCHES: To be opened and closed by ship's crew.
IDENTIFICATION CARDS: Seaman's Book or Passport advisable.

CONSULS:
Swedish
Norwegian
Danish
Netherlands
Portuguese
Belgium
West Germany
French Consular Agency
Finland

REPAIRS: Deck and engine repairs available.

AIRPORT: Teeside Airport nearby with regular U.K. and Continental Services.

TIME: GMT and BST (GMT plus 1 hour) during Summer months.

HOLIDAYS: Normal Bank Holidays.

AUTHORITY: Tees and Hartlepool Port Authority.

HARWICH (Including Parkeston Quay):

51.56 N. 01.15 E. **(See Plan Book)**

DOCUMENTS:

1 Home Officer Form 1.B.6 may be obtained from H.M. Customs Boarding Officer.
1 C.142 Crew Declaration List.
1 Maritime Declaration of Health ("Q" Flag procedure).
2 Ship's report by Master.
1 Stores List.
1 Certificate of Deck Cargo Tonnage (if carried).
1 Grain Certificate (if carried).
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List required by vessels other than packet vessels.
1 Landing Card for each passenger.
1 Ship's Certificate of Registry.
1 Mercantile Marine Office Certificate – for British vessels only.
1 Load Line Certificate.
1 Safety Equipment Certificate.
1 Lloyd's Certificate.
1 Derating Exemption Certificate.
1 Ship's Register.
1 Lights Bill.
1 Radio Safety Certificate.

In addition Manifests and Bills of Lading are usually sent to Agent direct from loading port.

PILOTAGE: Pilotage into the harbour is compulsory for all ships of 50 tons and over, with the exception of vessels of not more than 3,500 tons gross regularly employed in the home and coasting trades and not carrying passengers.

SUNK PILOT STATION

The Sunk Pilot vessel has a black hull, a buff funnel, the word "Pilots" painted on her sides and flying the Pilot flag, and at night exhibiting lights and signals in accordance with Rule No. 29 of the International Rules for the Prevention of Collisions at Sea, cruises in the vicinity of the Sunk Light vessel to provide Pilots for ships making for the Port of London and other ports in London Pilotage District and to disembark Pilots from outward–bound ships; if unable to carry out her duties there through stress of weather, she moves into smoother water. In these circumstances shipping is warned by means of radio navigation warnings broadcast from North Foreland, Humber and Scheveningen radio stations, which give her position.

The attention of Masters is drawn to the requirement of stopping and giving a satisfactory lee for the pilot vessel's boarding boats. These 18 ft. boats have a max. speed of 5 knots and if ships being served maintain excessive headway, unnecessary difficulty is caused to both the pilot vessel and boats, and the operation of shipping a Pilot will be unduly prolonged.

Masters must ensure that these boarding boats are clear of their ships before proceeding to avoid damage and to safeguard the lives of the Pilots and Boat Crews.

Ships proceeding to either Maldon or Heybridge Basin must exchange their North Channel Pilots for Essex River Pilots at the Knolls, in favourable weather conditions, and in Brightlingsea Roads in adverse weather conditions.

The attention of Masters of VLCC's is drawn to the special arrangements for Pilot boarding described below.

ETA's and Amendments: Ships requiring a Pilot at the Sunk station should give the pilot vessel, 12 hours in advance and through a Post Office Coast station, their estimated time of arrival, gross tonnage, maximum draft and port of destination. Confirmation of ETA should be given at least 2 hours before arrival. Anything less than 2 hours notice must involve ships in delay.

Contact Procedure: Vessels wishing to contact the pilot vessel at the Sunk by radio telephony direct may:

(i) when within MF range (approximately 50 miles), call on 2182 kHz. (MF).
(ii) when within VHF range (approximately 20 miles), call on Channel 16 (VHF).

The pilot vessel may also be contacted by either W/T or R/T through any Post Office Coast Station addressed Sunk Pilot Vessel Northforeland radio.

Working Frequencies: Having made contact on 2182 kHz. (MF) or Channel 16 (VHF) ships should transfer to the working frequencies as follows:

2241 kHz (MF) or any other agreed licensed intership frequency for passing messages; Channels 6 or 9 (VHF).

Pilot Boarding Arrangements for VLCC's:

The Masters of all VLCC's requiring a Pilot at the Sunk pilot station are requested to comply with the following directions so as to ensure that the boarding operation can be carried out safely and with the minimum of inconvenience to the ship.

The Master of the VLCC should establish voice contact with the Sunk Pilot Cutter at the earliest possible time, consistent with the maximum range of either VHF or MF communication, as described above.

The Sunk Pilot Cutter will advise the VLCC:

(a) The position in which the Pilot will board and the time of boarding;
(b) The mode in which the Pilot will board i.e. with the VLCC under way or at anchor. If the VLCC is advised that the Pilot will board with the ship under way then the speed ordered should be minimal, consistent with maintaining steerage way or, alternatively, the ship should be stopped in the water.

In the interests of the safe boarding of the Pilot the VLCC should not proceed inwards beyond the vicinity of the agreed boarding position.

CORK PILOT STATION

Boarding Point: To facilitate the arrival and departure of ships trading to and from the ports of Felixstowe, Harwich and Ipswich, a Pilot station operates in the vicinity of the Cork *Lanby* in a position Lat. 51° 56′ 42″ N., Long. 01° 27′ 06″ E. *This station is additional to, but is not a substitute for, the Sunk pilot vessel. It is for the use of ships bound to or leaving the above-mentioned ports whose normal course does not take them past the Sunk pilot vessel.* Full service is also provided at the Sunk station.

The Cork station is operated by a fast Pilot launch with black hull and white wheelhouse, flying the Pilot flag, and at night exhibiting lights and signals in accordance with Rule No. 29 of the International Rules for the Prevention of Collisions at Sea.

The attention of Masters is drawn to the requirement when being served by a fast pilot launch of maintaining headway throughout the operation of shipping or landing a Pilot.

ETAs and Amendments: Inward Bound Ships. Ships requiring a Pilot at the Cork station should apply to the Sunk pilot vessel in the same manner and giving the same information but stating their estimated time of arrival at the Cork.

Outward Bound Ships: Masters of ships about to sail from Harwich and Felixstowe and wishing to use the Cork pilot station should state this when ordering their Pilots for departure. However ships may carry their Pilots out to the Sunk pilot station should they so desire. Pilots for ships outward bound should be ordered by telephoning Harwich (code 02555) 3129 – see Harwich Shore pilot station below.

Contact Procedure: The Cork pilot launches keep a constant listening watch on Channel 16 (VHF).

Working Frequencies: Having made contact on Channel 16 (VHF) ships should transfer to the working frequency Channel 9 (VHF).

HARWICH SHORE PILOT STATION (OPERATIONS)

The Shore pilot station (Operations) is situated at Harbour House, Harwich and is part of the Port Operations Service jointly operated by the Harwich Harbour Conservancy Board and Trinity House. It should be noted that Pilots' accommodation and administrative offices are situated at the main pilot station at Town Quay, Harwich.

The pilot station (Operations) is manned by a Duty Pilot and is equipped with VHF, telex, telephone and radar.

All requests for the services of Pilots for ships bound into or out of Harwich and Felixstowe should be made to this station. Orders for Pilots for outward bound ships should state whether the Pilot will be landed at the Sunk or the Cork. Requests from inward bound ships for the services of the Ipswich Pilots and for the Pilots for the Rivers Colne, Blackwater, Crouch and Roach may also be passed through this station.

Contact Procedure: A 24-hour listening watch is maintained on Channel 16 (VHF). The call sign is "Harwich Pilots Radio".

Working Frequencies: Having made contact on Channel 16 (VHF) ships should transfer to the working frequencies, Channels 9 and 12 (VHF).

Ships not fitted with VHF may contact the pilot station (Operations) through the Sunk pilot vessel on MF.

Other communication details are:

Telephone number:	Harwich (code 02555) 3129 or 6300
Telex number:	98472, Pilots Harwich

ANCHORAGES:

Ewarton: Situated to the North and West of Parkeston Quay with an average depth of 3.5 fathoms at low water.

Parkeston: Situated to the North of Parkeston Quay, with an average depth of 3 fathoms at low water.

Shelf: Situated on the Western side of the main Channel between the North and South Shelf Buoys. Average depth of 2.5 fathoms at low water.

Inner: Situated at the Pitching Ground. Average depth 4.5 fathoms at low water.

Cork: Situated to the Westward of the Cork Light buoy. Area approx. 2 miles × 1 mile. Average depth 4 fathoms.

RESTRICTIONS: Normal max. draft allowed alongside the berths at Parkeston Quay is 20 ft.

Normal cargo working at Parkeston Quay ceases at 2200 hrs., but berthing and night work by arrangement at any time.

MAX. SIZE: Normal max. permissible length 500 ft. arrangements for larger vessels can be made. Normal max. permissible breadth for roll-on/roll-off is 75 ft. Normal max. permissible draft – 20 ft. The height of the tide does not restrict a vessel berthing alongside the quay if her draft is within 20 ft.

HEALTH: Maritime Declaration of Health required ("Q" Flag procedure). Obtain Pratique through H.M. Customs Boarding Officer if no sickness on board.

If there is sickness on board the Customs Official will notify the Duty Port Medical Officer.

If the vessel is from another port in the U.K. Pratique is automatic.

Also see "Health – All Ports" before first U.K. port.

RADIO: North Foreland Radio (call sign GNF) or Humber Radio (call sign GKZ) are the most convenient stations to pass ETA cables, etc., to

Agents or receivers. The Pilot Land Station has a Surveillance Radar.
VHF: British Rail at Parkeston Quay keep a 24-hour listening watch on VHF Channel 16 and work on VHF Channel 18. Also see "Felixstowe" – VHF.

Harwich Harbour Conservancy Board operate Harbour Operations Station. Call sign "Harwich Harbour Radio". Listens on Channel 16 and operates on Channel 14. Channel 71 is the secondary working channel. The station is equipped with radar, information available on request on VHF Channel 20.
TUGS: 3 tugs are based at Harwich for use in the area – MT *'Sauria'* 1,600 h.p. MT *'Egerton'* 1,200 h.p. MT *'Langton'* 1,610 h.p. Tugs lines usually used, cost £7.20.

24-hour service, 7 days per week. Constant watch on 2182 kc/s. and Channel 16 VHF. Additional tugs up to 2,250 h.p. can be obtained from London at 24 hours notice.
BERTHING: There are 8 berths at Parkeston Quay, of which 2 are Portal Roll-on/Roll-off berths and 1 is a Pontoon Roll-on/Roll-off berth. Normally max. draft permissible alongside is 20 ft.

Berthing, etc., by arrangement. Applications for berths must be made through the Shipping or Port Manager, British Rail, Parkeston Quay, giving as much advance notice as possible.

Navyard, Harwich:
Operators: Harwich Dock Co. Ltd. Telephone: Harwich 8949 Telex: 98229.
Berths:

Berth No. 1: Length	42 m.
Berth No. 3: Length	160 m., depth 8.6 m.
Berth No. 4: Length	90 m., depth 4.5 m.
Berth No. 5: Length	160 m., depth 6.0 m.

(Berths 3, 4 and 5 equipped with Ro/Ro ramps).
Developments:
Berth 3 to be lengthened in due course and extra back-up area created.
Stevedores:
All labour at Navyard is employed by Harwich Dock Co. Ltd. Berths and labour must be booked through Operations Manager.
Cargo Equipment:
2 Ransome Rapier NCK 60 mobile cranes – capacity 35 tonnes.
1 Wild Gantry Crane – capacity 18.5 tonnes, for internal use only.
Other equipment includes 14 tugmasters, 10 forklifts to 10 tonnes.
Other Services:
Telephones, fresh water, bunkers, medical services can all be arranged. Harwich Dock Company Ltd., provides ships and goods agency services at this and other ports.
STEVEDORES: All labour at Parkeston Quay are members of National Union of Railwaymen, and arrangements for their use must be made through the Shipping and Port Manager, British Rail, Parkeston Quay.
MEDICAL: Prior notice through British Rail, Parkeston Quay, desirable to arrange attention. All services are available.
TANKERS: A berth is available for tankers for the purpose of discharging and loading to the local oil refinery.
DENSITY: 1025 (sea water).
FRESH WATER: Fresh water can be supplied from quayside hydrants.
FUEL: Can be arranged by either barge or road tanker.
GANGWAY/DECK WATCHMEN: Watchmen are not provided or required by the port, but ships may use their own watchmen.
OPENING/CLOSING HATCHES: To be carried out by ship's crew.
CARGO GEAR: There are 8 level luffing cranes, safe working load averaging from 3 tons to 10 tons, which can be used for discharging and loading. There are also 2 transporter cranes, 30 tons SWL.
IDENTIFICATION CARDS: Seaman's Identity Cards sufficient.
CONSULS: Dutch, German, Danish, Belgian.
REPAIRS: Minor repairs can be carried out by British Rail workshops at Parkeston Quay. As much advance notice as possible required.
REPATRIATION: All facilities available.
AIRPORT: Nearest is Ipswich, 22 miles; Southend, 70 miles.
HOLIDAYS: All normal Bank Holidays. Only passengers and car travellers are dealt with at Parkeston Quay on these days. Freightliners sail only if loaded before the holiday. Train ferries operate normal services.
POLICE/FIRE/AMBULANCE: Dial 999 and ask for service required.
TELEPHONES: Arrangements can be made, with advance notice given.
DEVELOPMENTS: Eastern end of Parkeston Quay to be lengthened in due course to provide more container berths.
AUTHORITY: General Manager and Harbour Master, Harwich Harbour Conservancy Board.

HEYSHAM: 54.02 N. 02.55 W. (See Plan Book)

DOCUMENTS: As for other British ports plus Walney Light Dues.
PILOTAGE: Trinity House Pilotage Service, Barrow District. Compulsory for all vessels of 50 tons gross tonnage and over with the exception of vessels of not more than 1,500 tons gross regularly employed in the home and coasting trades and not carrying passengers. Also see "Barrow-in-Furness".
RADIO: Heysham Harbour Radio, VHF Channels 16 and 14.
MAX. SIZE: 480 ft. (146 m.) length, draft 17 ft.
HEALTH: See "Health – All Ports" before first UK port.
TUGS: None available.
ANCHORAGES: Heysham Lake. 0.5 mile N.W. of No. 1 Buoy. Position: 53° 59'.4 N., 3° 00.0' W. Depth: 40 ft. at LW.
RESTRICTIONS: Entry possible at all states of tide. Harbour maintained at 4.1 m. below Admiralty chart datum of chart No. 2010.
BERTHING: Vessels may be berthed at any time. 1 Roll-on/Roll-off ramp. 2 Lift-on/Lift-off berths. 2 general cargo berths.
CRANES: 1×30 ton portal crane; 1×10 ton portal crane; 1×32 ton Scotch Derrick on North Quay; 4×7.5 ton portal cranes on South Quay.
DENSITY: Salt water.
FRESH WATER: Available from the quays.
FUEL: Gas oil by road vehicle.
GANGWAY/DECK WATCHMEN: Ship's watchmen required.
SHORE LEAVE: No restrictions on landing.
AIRPORT: Nearest, Liverpool and Manchester; 60 miles.
REPAIRS: Small repairs possible, no docking facilities.
PROVISIONS: Available locally.
POLICE/AMBULANCE/FIRE: Telephone 999 in emergency.
AUTHORITY: Shipping and Port Manager, Sealink UK Ltd.

HOLYHEAD: 53.19 N. 04.41 W. (See Plan Book)

DOCUMENTS:
1 Crew List and where applicable a Passenger List.
1 Pratique issued by Customs.
1 Crew Declaration (C.142 for H.M. Customs).
1 List of Consumable Stores (tobacco, snuff, alcohol).
1 Declaration of Health.
1 Cargo Manifest.
1 Ship's Report.
PILOTAGE: Pilotage compulsory under Trinity House Authority. Local Pilot available on request.
ANCHORAGES – PROHIBITED ANCHORAGE: The breakwater affords partial shelter to the outer anchorage and complete protection to New Harbour; there are depths of from 19 to 42 ft. in the former and of from 17 to 40 ft. in the latter.

The accommodation for vessels of deep draft in New Harbour is limited. Small vessels should always proceed into New Harbour and anchor in the S.W. part, leaving the outer part and the roadstead for large vessels. The bottom is hard, overlaid with mud but the holding ground is sufficiently good if an adequate amount of cable is veered. During Easterly winds an uncomfortable sea is raised; vessels may then obtain shelter in the Eastern part of outer anchorage. Anchorage is prohibited within 1.5 cables on either side of the track followed by Mail Steamers from the head of the breakwater to the entrance to Old Harbour; the limits of this area are shown on charts.
MAX. SIZE:
Inner Harbour: Restricted to vessels of 15 ft. draft and vessels exceeding this draft will only be accepted after consultation with the Shipping and Port Manager.
Outer Harbour: Vessels of approximately 60,000 tons can be accepted alongside the Anglesey Aluminium Jetty where the berth is dredged to 46 ft. at MLWS.
HEALTH: See "Health – All Ports" before first U.K. port.
TUGS: Available through Agents. Tugs up to 1,375 h.p.
RADIO: Holyhead Radio, VHF Channel 16, No Port Radar.
BERTHING: By prior arrangement with Shipping and Port Manager.
STEVEDORES: No stevedores. Vessels loaded and discharged by Sealink dock porters. Outside vessels berthing at Public Quay can be discharged and loaded by making prior arrangements with Agent.
MEDICAL: Medical Officer available. Stanley Sailors Hospital situated in close proximity to Harbour.
DENSITY: Salt water (1025).
FRESH WATER: Available at all berths within the Inner Harbour and alongside Anglesey Aluminium Jetty.
FUEL: Fuel oil and diesel oil available provided that adequate warning is given to Agent. Only 1 berth available for bunkering of large vessels of deep draft alongside Anglesey Aluminium Jetty.

Prior arrangements must be made with Sealink UK Ltd. in conjunction with Anglesey Aluminium Metals Ltd., telephone Holyhead 3333.

No oiling barge available for bunkering vessels at anchor.
GANGWAY/DECK WATCHMEN: Required at all times when vessels are in port.
REPAIRS: Repairs can be carried out by Sealink UK Ltd. workshops, dry dock available:
Dry dock: Length 412 ft., breadth 70 ft. 3 in., depth on sill 20 ft. at Spring tides.
AIRPORT: RAF Station Valley, Anglesey (6 miles away).
HOLIDAYS: Saturdays, Sundays and all Public holidays.
POLICE/AMBULANCE/FIRE: Tel. 999.
TELEPHONES: No telephone connection for outside vessels. Public telephone within port limits.
SERVICES: Compass adjusting can be arranged.
SHORE LEAVE: Allowed.
AUTHORITY: Sealink UK Ltd.

HOUND POINT: 56.00 N. 03.22 W. (See Plan Book)

SHIPMASTER'S REPORT:

Vessel called at Hound Point Terminal for the purpose of loading Forties Crude Oil (North Sea Oil). The terminal is operated by B.P. Position of terminal Lat. 56° 00' 20" N., Long. 03° 21' 45" W.
DOCUMENTS:
1 Crew List.
1 Passenger List.
1 Crew's Effects List.
1 Stores List.
All valid Certificates.
PILOTAGE: Pilotage in Firth of Forth is compulsory. Contact "Forth

Pilot" VHF Channel 16. Pilot boards large vessels in vicinity of Fairway Buoy 56° 03.5′ N., 03° 00′ W. as there is limited depth and manoeuvring space at normal Pilot boarding ground East of Inchkeith.

ANCHORAGE: When vessel has to wait for Pilot, berth or tide, "Forth Navigation Service" will assign anchorage. These anchorages are in a line E.S.E. to S.W. of Fairway Buoy. Good holding ground at anchorages.

RESTRICTIONS: Vessels will be berthed at slack water – flood or ebb – only. The same accounts in most cases for unberthing.

MAX. SIZE: Vessels up to 300,000 d.w.t. can berth at Hound Point Terminal with no defined restriction on LOA. Vessels berth starboard side alongside, heading East.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: *Arrival advice:* For advance notice refer to Charterer's instructions. In our case ETA was given to Agent upon sailing from Rotterdam.

RADAR/VHF: Estuary radar service. VHF contact can be made with Forth Navigation Service Channel 16. Hound Point Terminal operates VHF Channel 9; B.P. Grangemouth VHF Channel 16 (calling) and Channel 19.

TUGS: 4 tugs of about 3,000 h.p. each available. Tugs ropes are used.

BERTHING: Hound Point Terminal is a Sea Island in the Firth of Forth about 13 miles from Fairway Buoy. The approach channel from Fairway Buoy to berth is marked by buoys and has a guaranteed minimum depth of 66 ft. at LWST.

Maximum of 4 loading arms of 16 in. available for deballasting and/or loading. Loading rate about 8,000 t.p.h. by gravity and with 2 arms connected. This rate decreases as tank level drops.

When 4 arms are connected loading rate can be as high as 18,000 t.p.h. by means of booster pumps.

Facilities to receive any amount of dirty ballast are available. Discharge through 16 in. loading arms into 24 in. line with minimum of 5 kg/sq.cm. back pressure.

No need to prepare ship's derricks unless stores are taken on board. API of cargo about 36.7.

DENSITY: 1020 – 1025.

TIME: GMT in Winter. GMT plus 1 hour in Summer.

GENERAL: Outside the Firth of Forth, clear of the land on the South side, streams are weak, spring rate up to 1 knot, but at spring tide the velocity at the terminal is up to 3.5 knots (Refer to Tidal Stream Atlas).

AUTHORITY: Forth Ports Authority, Leith.

HULL: 53.44 N. 00.14 W. (See Plan Book)

DOCUMENTS:

1 Maritime Declaration of Health.
1 Crew's Effects List.
2 Ships Report by Master.
1 Home Office Form 1B6.
1 Stores List.
1 Certificate of Deck Cargo Tonnage.
1 Grain Certificate.
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List.
1 Landing card for each passenger.
Ships Certificate of Registry.
Mercantile Marine Office Certificate – for British Ships only.
Load Line Certificate.
Safety Equipment Certificate.
Lloyds Certificate.
Derat Certificate.
Ships Register.
Light Bills.
Safety Radio Certificate.

In addition Manifests and Bills of Lading are usually sent to Agents direct from the loading Port.

PILOTAGE: Compulsory. Humber Pilotage District – Spurn Pilot Station. A Pilotage Control Station (telephone No. 096-46-392; telex No. 527393) is established on the Spurn Peninsula in a position Lat. 53° 34′ 29″ N., Long. 00° 06′ 48″ E.

The station is manned at all times with a Pilot Master in attendance and vessels bound to the Humber requiring the services of Humber Pilots must give advance notice by signal through a G.P.O. Coast Station to the Spurn Pilot Station giving ETA at the seaward limits of the Humber Pilotage District, draft, and destination at least 12 hours in advance. Any adjustment to the time should be given at least 2 hours before arrival.

Vessels wishing to communicate direct with the Spurn Pilot Station by VHF radio telephony may if within VHF range (approximately 20 miles) call "SPURN PILOT" on VHF Channel 16 (156.80 mHz) and after contact transfer to Channel 14 (156.70 mHz) for passing messages.

(Note: Attempts to establish communication on VHF at extreme range can cause unnecessary interference).

Inward vessels bound for ports up river of Hull desiring to pick up a Goole or Trent Pilot in Hull Roads should give at least 2 hours advance notice of their expected time of arrival in Hull Roads to the Humber Ports Operation and Information Service on VHF Channels 16 or 12 or through a G.P.O. Coast Station (Telegraphic address "HUMBEROPS") or by telex No. 527656.

Compliance with this procedure will ensure, as far as possible, the shipping of Pilots without delay.

ANCHORAGES: The undermentioned anchorages have been designated for the use of sea-going vessels. Masters are asked to co-operate by using these anchorages and to avoid anchoring in the Fairway or elsewhere.

Spurn anchorage should normally be used by inward-bound vessels and Bull anchorage by outward-bound vessels and vessels awaiting a berth.

Spurn Anchorage. From position "A" 121° distant 3.65 miles from Spurn Lighthouse, in a 125° direction 1.60 miles; thence in a 020° direction 0.60 mile; thence in a 077° direction 1.00 mile; thence in a 347° direction 0.70 mile; and thence in a 257° direction 2.40 miles to position "A".

Haile Anchorage (Explosives): From position A, 216° distant 2.18 miles from Spurn High Lighthouse in a 284° direction 0.77 mile; thence in a 139° direction 0.80 mile; and thence in a 027° direction 0.46 mile to position A.

Bull Anchorage. From Position "A", 193° distance 2.1 miles from Spurn High Lighthouse, in a 090° direction 1.96 miles thence in a 294° direction 1.76 miles, thence in a 274° direction 0.93 miles, thence in a 206° direction 1.0 miles, thence in a 116° direction 0.88 miles, thence in a 026° direction 0.55 miles to Position "A".

RESTRICTIONS: Vessels may be accepted through the day and night, the only restrictions on the larger vessels being influence of tides together with the undermentioned physical limitations. The larger deep drafted vessels are usually docked from 3 hours before HW until HW, with similar restrictions on vessels sailing. Ships drawing up to 19 ft. can have access to the docks over the full 24 hours on neap tides and can be docked/undocked over an 18 hour period on spring tides.

MAX. SIZE: The maximum permissible dimensions for a general cargo/bulk carrier vessel (excluding tankers) requiring a berth in the enclosed docks are as follows: King George & Queen Elizabeth Docks, length 635 ft., beam 83 ft., draft 31 ft. at neaps, up to 36 ft. at springs.

HEALTH: Pratique granted by Customs Authorities after berthing. If vessel from non-infected area pratique given after Master declares all well on board. If from infected area pratique given after Port Health Authorities doctor has examined crew and given health clearance to Customs Officer. In case of suspected illness Master can send radio to Port Health Authority – telegraphic address "Portealth" Hull. Pratique is automatic when entering after calling at another port or ports in the U.K. and being granted pratique there, unless of course, illness has developed whilst on passage from previous U.K. port.

RADIO: Portishead Radio – call sign GKL but when within 200 miles of the Humber can go through Humber Radio – call sign GKZ.

VHF: *Humber Ports Operation and Information Service:*

The Humber Ports Operation and Information Service operates a VHF (FM) radio telephone service available to all vessels navigating the Rivers Humber, Ouse, and Trent from the Humber Pilot Office Building, Queen Street, Hull, HU1 1XB (Lat.: 53° 44′ 18″ N., Long.: 0° 19′ 54″ W.).

A continuous watch is maintained on Channels 16 and 12. The call sign is "Hull Radio". The Telephone Number is Hull 0482 – 223999. Telegraphic address "Humberops", telex 527656.

The Service provides information regarding the arrival, berthing, anchoring and departure of vessels and also information on navigational aids, navigation generally, visibility, and the safety of vessels and persons. Tidal information, including the height of tide at Bull Sand Fort and at Immingham in the Lower Humber, is also available on request. Messages of any other nature and messages of a personal character cannot and will not be accepted. Messages of this kind should be passed through the Post Office Ships Telephone Service via "Humber Radio" on Channel 26.

Other VHF (FM) Stations situated on the River Humber and the Channels used are shown in the Appendix to this Notice. These Stations provide direct communication between a vessel and the Dock or Pier Master at the place of destination. In general, vessels should obtain their navigation and safety information from the Humber Ports Operation and Information Service and their berthing, docking and other pre-arrival information from the Station serving their destination.

A general broadcast giving weather reports, tidal information and navigational warnings is made by the Humber Ports Operation and Information Service on Channel 12 every 2 hours commencing at 0103 hrs., prior notification being given on Channel 16.

Procedure:

(i) Vessels fitted with appropriate VHF R/T equipment on approaching the Humber should set watch on Channel 16.

(ii) Vessels wishing to communicate with the pilot station should call "Spurn Pilot" on Channel 16 and shift to Channel 14 for exchange of traffic.

(iii) On entering and before sailing or moving in the Humber, vessels should call "Hull Radio" on Channel 16. When contact is established they will be requested to transfer to Channel 12 for exchange of arrival or departure information. Watch should then be resumed on Channel 16, unless requested to remain on Channel 12 for port operational reasons.

(iv) Vessels wishing to communicate with the Station serving their destination should do so at the appropriate time on the Channels shown in the Appendix, reporting their departure from Channel 16 to "Hull Radio". Vessels are advised that, when communicating with these Stations, contact with the Humber Ports Operation and Information Service can only be re-established through Channels 16 and 12 and it is particularly advisable to maintain a listening watch on Channel 16 whenever practicable in the event of unforeseen circumstances developing in the River.

All times in messages should be given in local time using the 24 hour notation.

To achieve the full advantage of efficient communication, strict telephone discipline and attention to procedure, particularly on the Calling Channel, is imperative. The operating procedure should be in accordance with that laid down in Chapters VI and VII of the G.P.O. Handbook for Radio Operators (1975 Edition).

These services will be offered and will be rendered on the condition that neither the British Transport Docks Board, nor any of its servants or Agents, shall be liable to any person for loss or damage of any kind howsoever caused or arising whether as a result of negligence or otherwise or as a result of the non-availability of the services.

Also see Appendix on page 1078.

BULK HANDLING FACILITIES: Container terminal at Queen Elizabeth Dock equipped with 2 transporter cranes, one 40 tons and one 35 tons capacity and 10 straddle carriers. Two shift working in operation from Sundays to Fridays inclusive 0700 hrs. to 2100 hrs., and on Saturdays 0700 hrs. to 1300 hrs.

Roll-on/roll-off container services operated from King George, Queen Elizabeth and Alexandra Docks. Grain silo of 60,000 tons capacity.

STEVEDORES: Enable Agent order gangs important receive accurate ETA particularly when week-end work involved. Latest time to order gangs: Normal day work 0730 hrs. same morning. Saturday and Sunday 1100 hrs. Friday.

MEDICAL: Necessary for Agents to be advised of any urgent cases of illness in order that they can arrange for a doctor or if necessary an ambulance to be available immediately on berthing. Hospital facilities available.

If vessel required to remain in river awaiting berth, arrangements can be made for any serious case to be taken from vessel by lifeboat and conveyed to Grimsby for immediate treatment.

TANKERS: The Oil terminal at Salt End handles refined or semi-refined chemical and petroleum products which are transferred from the vessel along the oil jetties through a series of chemical and service pipes which range from 4 in. for chemicals, 8 in. and 12 in. for spirit and 16 in. for fuel oils and molasses. Facilities available for the discharge of Slop residue.

There are 2 tanker berths at Salt End and maximum dimensions of vessels are length 670 ft., draft 34 ft.

DENSITY: 1013/1015.

FRESH WATER: King George and Queen Elizabeth Docks. Available at any time. Ex Quay. Rate of delivery – 15 t.p.h.

All other Docks. Available at any time. Ex Mains. Rate of delivery – 15 t.p.h.

If water required urgently after 1700 hrs. weekdays or on Saturdays or Sundays Agents must be notified in good time to enable them order men out.

FUEL: Fuel oil available, viscosity up to 3,500 secs. Redwood. Gas oil and diesel also available. At least 24 hours notice required.

FIRE PRECAUTIONS: Masters receive an emergency services dock plan with an explanatory leaflet.

GANGWAY/DECK WATCHMEN: Watchmen available if required by Master.

OPENING/CLOSING HATCHES: Can be carried out by stevedores when ordered. Ship charged with actual cost, but ship's crew may do so if required.

CUSTOMS ALLOWANCE: Foreign trade – max. allowance 0.5 lb. cigarettes or cigars or tobacco. Home Trade – (Elbe/Brest limits) half the above. Wine and/or Spirits. Foreign Trade – 1 pint – opened. Home Trade – (Elbe/Brest limits) half the above allowance.

CARGO GEAR: When working with ship's gear a Register of Machinery, Chains and Wire Ropes, etc., with all Test Certificates and record of inspections to be produced to the stevedores before work commences.

Form C.13 General Declaration (In duplicate).

Form C.14 Ship's Stores (In triplicate).

Form C.142 Crew Declaration (In duplicate).

Form C.143 Small Parcels List. (1 Copy) if appropriate.

Form D.C.1 Self Declaration Deck Cargo (In duplicate).

1 Copy Cargo Manifest.

1 Copy Dangerous Cargo List.

PILOTAGE: Compulsory.

Humber Pilotage District – Spurn Pilot Station: A Pilotage control and radar station (telephone No. 096–46–392; telex No. 527393) has been established on the Spurn Peninsula in a position Lat. 53° 34′ 29″ N., Long. 00° 06′ 48″ E.

The station is manned at all times with a Pilot Master in attendance and vessels bound to the Humber requiring the services of Humber Pilots must give advance notice by signal through a G.P.O. Coast Station to the Spurn Pilot Station giving ETA at the seaward limits of the Humber Pilotage District, draft, and destination at least 12 hours in advance. Any adjustment to the time should be given at least 2 hours before arrival.

Vessels wishing to communicate direct with the Spurn Pilot Station by VHF radio telephony may if within VHF range (approximately 20 miles) call "SPURN PILOT" on VHF Channel 16 and after contact transfer to Channel 14 for passing messages.

(Note: Attempts to establish communication on VHF at extreme range can cause unnecessary interference).

Inward bound vessels for ports up river of Hull desiring to pick up a Goole or Trent Pilot in Hull Roads should give at least two hours advance notice of their ETA in Hull Roads to the Humber Ports Operation and Information Service on VHF Channels 16 or 12 or through a G.P.O. Coast Station (telegraphic address "Humberops") or by telex No. 527656.

Compliance with this procedure will ensure, as far as possible, the shipping of Pilots without delay.

ANCHORAGES: Hawke and Sunk Roads – Spurn and Bull anchorages. The Pilot station will advise where to proceed to anchor and also provide Pilot. See "Hull".

RESTRICTIONS: No restrictions, vessels may enter the harbour day or night. Max. draft for entering harbour 34 ft. HW. Compulsory Pilots boarding Spurn Light-vessel, decide whether vessel shall proceed up river or anchor and await suitable state of tide.

MAX. SIZE: Also see "Tetney Terminal" and Immingham Oil Terminal under "Tankers".

Immingham Dock max. length 650 ft., breadth 86 ft., draft 34 ft. on density 1010.

National Coal Terminal, length no restriction, beam no restriction, draft average 30 ft. Also see "Berthing and Tankers".

HEALTH: Master to report any "Reportable" illness as detailed in form "Port 38" to "Porthealth Immigration".

See "Health – All Ports" before first U.K. port.

RADIO: Humber Radio – 2182 kc/s. or VHF Channel 16. Dock Master VHF Channel 16. Tankers use Channel 19.

VHF: See "Hull".

TUGS: Will join vessel off dock entrance, optional use of tow lines. If using tug's tow lines, charge for this service, depending on vessel's length.

BERTHING: Unless Master or Agent indicates preference, the Port Authorities will decide which side alongside. River Pilot deciding in conjunction with Dock Master most suitable berthing time for harbour and river installations.

British Steel Corporation Ore Terminal:
Adjoins N.C.B. Terminal. Max. length 1,095 ft., max. draft subject to approach channel, 39 – 43 ft.

CRANES: 24 electric cranes 3 – 20 tonnes capacity and 1 electric derrick 32 tonnes capacity.

STEVEDORES: Firm ETA to Agent required if possible before noon on previous day before arrival.

MEDICAL: No advance notice necessary for medical treatment as all hospital facilities available.

TANKERS: Also see "Tetney Terminal".

Immingham Oil Terminal. Up to 280,000 d.w.t. with part cargo conducive with Humber dredged channel. Length up to 1,100 ft., breadth, no restriction, draft depends on height of water in channel, average 43 ft. Three 12 in. lines for crude oil. Two lines 12 in. and 10 in. all other products. One 8 in. line for bunkers.

Eastern Jetty: Max. Length approx. 650 ft. breadth, no restriction, draft depends on low water, range 27 ft to 36 ft. 10 in., 8 in., 6 in. lines, depends on Receivers. Bunker line available.

Western Jetty: Max. Length approx. 800 ft. breadth, no restriction, draft depends on low water, range 27 ft. to 36 ft.

Killingholme North: Length 580 ft. max., beam, no restriction, draft 30 ft. 6 in. One 8 in. line. One 4 in. bunker line.

Killingholme South: Length 565 ft. max., beam, no restriction, draft 31 ft. One 8 in. line. Bunker line available. No slop tanks available.

DENSITY: In harbour 1010.

FRESH WATER: Available all berths by hose. Rate of delivery 20 t.p.h.

FUEL: 24 hours notice required. All grades available.

FIRE PRECAUTIONS: Copy of these regulations handed to the Master on arrival.

GANGWAY/DECK WATCHMEN: Watchmen not usually employed, but left to the discretion of the Master.

OPENING/CLOSING HATCHES: See "Grimsby".

CERTIFICATES:

Ship's Register.

Load Line.

Safety Radio.

Safety Equipment.

Safety Construction and any British Light Dues Receipts.

Derat Certificate.

Oil Pollution Certificate (Tankers).

CUSTOMS ALLOWANCE: 8 days – 200 cigarettes per person approx. Wine/spirits, 4 days – 0.25 pt. per day; this depends on the Customs Officer's discretion.

CARGO GEAR: This must comply with the Department of Employment and Productivity regulations. Normally discharge carried out by shore cranes, although overside berths available.

IDENTIFICATION CARDS: Seaman's book or passport sufficient for crew members going ashore.

CONSULS:

INVERGORDON: 57.41 N. 04.10 W. (See Plan Book)

DOCUMENTS: *At Boarding on arrival:*

1 copy Maritime Health Declaration and Deratisation Exemption.

Lists C.142 – Crew's declaration of dutiable and prohibited goods obtained abroad or during the voyage.

Form I.B.6 – List of members of the crew who are aliens or who were engaged outside the United Kingdom.

List 142.A – Parcels list – small packages of merchandise and addressed packages not borne on the ship's report.

List of ship's surplus stores and live animals on board.

Account of cargo in unregistered spaces (deck cargo) if arriving from a port outside Home Trade limits.

At Customs House when making report:

Form XS1.3 (in duplicate) – Master's report inwards. (A third copy is required if the vessel is carrying cargo for another United Kingdom port or for export.)

Surveys 107 – grain-laden ships only.

Surveys 104 – if carrying deck cargo from outside Home Trade limits.

Forms PR.4, PR.8 or PR.10 – passenger returns in duplicate (1 copy for Customs 1 copy for Immigration). Vessels with passengers only.

Certificate of Registry.

Certificate of British Tonnage.

Light Dues Certificate relating to the vessel.

To the Agent:

Bills of Lading.

Cargo Manifests.

PILOTAGE: Pilotage not compulsory for Cromarty Firth except West of 04° 09′ W. and to Admiralty Pier. Vessels under 300 g.r.t. are exempt. Cruising station of pilot boat is the Cromarty Lighthouse where Pilot will board. Pilot boat painted black hull, buff upper structure.

Approaching vessels may give their ETA to pilot station via VHF Channel 16, when in the vicinity of 30 miles, but a 24 hour notice will be required. In the event of bad weather, vessels will be guided by Pilot launch to safety where Pilot will board. Watch kept on VHF Channels 16 and 14 during normal office hours (at present) by Cromarty Firth Port Authority. Call sign "Cromarty Firth Base".

ANCHORAGES: In vicinity of Cromarty Bank Buoy and Cromarty Ness Light.

RESTRICTIONS: Vessels may enter between 0600 hrs. and 2200 hrs. when Pilot will be available.
MAX. SIZE: Max. permissible length 800 ft., draft 36 ft. Also see "Berthing".
HEALTH: International quarantine signals to be used. Advise "Portelth Dingwall" in advance if any suspected diseases on board.
Also see "Health – All Ports" before first U.K. port.
RADIO: Vessels approaching from North should pass their ETA cable via Wick Radio GKR 431, and vessels approaching from East via Stonehaven Radio GND 458 to their Agents.
VHF: Link calls through Cromarty Radio (based at Wick) Channel 16 and working Channel 28. Also see "Pilotage".
BERTHING: *Admiralty Wharf:* The wharf is the property of M.O.D. (Navy), however the berths are used regularly by commercial vessels.
Berths 1 and 2 (Outer South): Lengths 443 ft. Max. draft 36 ft. Max. LOA 800 ft. Also see "Tankers".
Berth 3: Max. draft 18 ft. Max. LOA 220 ft.
Berth 6: Max. draft 18 ft. Max. LOA 180 ft.
British Aluminium Pier: Outer Berth: Length 318 ft. Dredged depth 38 ft. MLWS (1974). Max. berthing length 900 ft. approx. using dolphins. (50,000 d.w.t.)
Inner Berth: Length 200 ft. Depth 20 ft. MLWS (1974).
CRANES: Mobile cranes up to a maximum 50 tons available from stevedoring firm.
TUGS: Caledonian Towage Co. Ltd. – Tel: Invergordon 852345 – suitable tugs stationed at the port which work in conjunction with Pilots. Tug's lines used.
STEVEDORES: James Jack (Stevedores and crane hirers) – Tel: Evantown STD (0349) 830 – 388/9. F. Lyons (Stevedores and crane hirers) – Burghead 360.
MEDICAL: Medical cases can be dealt with at short notice through local Agent. Hospital facilities available.
TANKERS: Vessels up to 800 ft. Max. draft 36 ft. may use Admiralty Wharf, Berths 1 and 2 combined.
DENSITY: 1022.
FRESH WATER: Obtainable alongside quay. Rate of delivery 50 t.p.h., each hydrant.
FUEL: This can be ordered through local Agent, delivery by road tanker, small quantities, notice required.
GANGWAY/DECK WATCHMEN: Ships gangway and safety net required. Watchmen from ship's personnel.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CERTIFICATES: The following Certificates are required to be held on board for production when required:

- International Load Line Certificate.
- Safety Construction Certificate
- Safety Equipment Certificate.
- Safety Radio Certificate.

CUSTOMS ALLOWANCE: Following quantities are generally left out for use on board by each member of crew:
Ships arriving from foreign ports within Home Trade Limits: Tobacco 125 gms. (4 oz. or 100 cigarettes). Spirits 0.185 litre (0.25 bottle), wine 0.375 litre (0.5 bottle).
All other ships from foreign ports: Tobacco 250 gms. (8 oz. or 200 cigarettes). Spirits 0.375 litre (0.5 bottle), wine 0.75 litre (1 bottle).
IDENTIFICATION CARDS: Not required.
REPAIRS: General repairs undertaken by Cromarty Firth Engineering Co. Ltd. – Tel: Evanton 291/551.
REPATRIATION: Can be arranged.
AIRPORT: Dalcross Airport at Inverness, operated by British Airways, distance from Invergordon 45 miles.
TIME: British Summer Time, 1 hour advanced on GMT. GMT in Winter months.
HOLIDAYS: 1st and 2nd January. Christmas Day.
POLICE/AMBULANCE/FIRE: Police, tel. Invergordon 852222 or dial 999; Ambulance, arrangements through local doctor, tel. Invergordon 852522; Fire Station, dial 999 and ask for their service.
TELEPHONES: H.M. ships only.
SHORE LEAVE: Allowed.
GENERAL: Permit must be obtained from Port Authority or Ministry of Defence when burning or welding is to be carried out.
AUTHORITY: Cromarty Firth Port Authority.

INVERNESS: 57.29 N. 04.14 W.

DOCUMENTS:

- 2 Crew Lists.
- 2 Passenger Lists.
- Customs and Excise and Health Documents.
- Manifest.
- Bills of Lading, etc.

PILOTAGE: Apply direct to Agent or to Pilot, telephone Inverness 32845. ETA 24 hours. Pilot equipped with VHF. Pilot cutter blue launch with letter "P". Pilot station Munlochy Buoy. Location of anchorage while awaiting Pilot – Munlochy Buoy.
ANCHORAGES: Munlochy Buoy in 5 – 8 fathoms. Beauly Basin in 15 fathoms. Munlochy Bay in 5 fathoms.
RESTRICTIONS: Vessels may enter and leave from 2 hours before HW until 2 hours after HW.
MAX. SIZE: Ship max. 300 ft. length, 20 ft. draft, high water springs. 18ft. draft, high water neaps
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Wick Radio.
VHF: Harbour Office on VHF Channels 16, 14 and 12 during office hours.
TUGS: None.
BRIDGES: Kessock Road Bridge, completion expected 1981, max. clearance 29 m. at MHWST.
STEVEDORES: Arrange through Agent. 24 hours notice required.
MEDICAL: Doctor available.
DENSITY: 1012.
FRESH WATER: Available on demand, 20 t.p.h., ex-hose on quay.
FUEL: Marine diesel and petroleum on request.
GANGWAY/DECK WATCHMEN: Supplied by ship.
OPENING/CLOSING HATCHES: Done by crew.
CUSTOMS ALLOWANCE: Tobacco/Wines/Spirits. Usual amount allowed by Customs and Excise.
IDENTIFICATION CARDS: None.
CONSULS: Netherlands, tel. Inverness 31171.
REPAIRS: Thornrush Slipway Tel. 33813.
REPATRIATION: Facilities available.
AIRPORT: Dalcross, 7 miles from Inverness.
HOLIDAYS: 1st and 2nd January; Easter Monday; July Bank holiday; First Monday in October; and Christmas Day. All official holidays, cargo work can be arranged on these days.
POLICE/AMBULANCE/FIRE: Police Inverness 39191; Fire Brigade Inverness 222722; Ambulance Inverness 31511.
TELEPHONES: On Quay.
SHORE LEAVE: Unrestricted.
AUTHORITY: Inverness Harbour Trust, Harbour Master.

IPSWICH: 52.02 N. 01.10 E. (See Plan Book)

DOCUMENTS: Masters can conclude all documentation in port. Ship's Agent will give the necessary advice.
PILOTAGE: Normal International signals for "I require Pilot", VHF Channel 16 calling, Channels 9 and 14 working. 30 ft. launch painted black, with word "Pilot" in white on side, available at Sunk and Cork Light Vessels or Harwich Harbour. Desirable that Agents are advised of vessel's ETA at least 2.5 hours prior to vessel's arrival at Harwich Roads or, at the Master's option, at either the Sunk or Cork Pilot stations.
A new pilot station has been established in the Orwell Navigation Centre at Ipswich Dock head, telephone Ipswich 211347 who will receive orders, and requests for information, regarding the pilotage of vessels in the Ipswich pilotage district – Pilots should be ordered at least 2 hours prior to departure.
ANCHORAGES: No anchorages within port. All vessels will proceed direct to berth, otherwise anchorage provided in Harwich Harbour.
RESTRICTIONS: Up to 250 ft. (76 m.) in length the lowest permissible U.K.C. is 2 ft. 6 in. (0.76 m.). Over 250 ft. (76 m.) and up to 360 ft. (109.7 m.) in length the lowest permissible U.K.C. is 3 ft. 0 in. (0.91 m.) Over 360 ft. (109.7 m.) in length by special arrangement. (U.K.C.=Under Keel Clearance).
Night Navigation: Vessel of up to 330 ft. (100.6 m.) in length can navigate at any time provided the U.K.C. is observed.
Certain vessels between 330 ft. (100.6 m.) and 360 ft. (109.7 m.) in length may be navigated at any time at the discretion of the Pilot provided that a request is received by the Ipswich Pilot Office, 48 hours in advance of the vessel's arrival/departure, so that the vessel's capabilities in relation to the river can be assessed by the Trinity House Pilots and the Ipswich Port Authority Harbour Master.
Petroleum Tankers – Daylight: There will be no special restrictions or requirements other than conforming with the U.K.C.
Petroleum Tankers – Night: Tankers up to 260 ft. (79.2 m.) in length can navigate at any time provided that U.K.C. requirement is observed. Tankers between 260 ft. (79.2 m.) and 330 ft. (100.6 m.) in length can navigate provided that:

(a) The U.K.C. requirement is observed.
(b) There will be no opposing traffic on the river above No. 5 Buoy.
(c) Visibility is at least 2.5 miles.

Chemical Tankers having on board Hazardous Cargo (i.e. Commodities specified in IMCO Hazardous Codes): Will navigate in the river during daylight only.
N.B. Tankers in this category having discharged their cargo and having no hazardous cargo remaining on board will not be constrained by this provision.
MAX. SIZE: 460 ft. (140.2 m.) overall length and 25 ft. 6 in. (7.7 m.) draft.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Masters to contact ship's Agent through North Foreland, Humber, Niton or Portishead depending on position of vessel. All these radio stations hold cable addresses and staff telephone numbers of Agents.
VHF: A 24 hour VHF radio facility has been established. Vessels arriving should contact "Ipswich Port Radio" on VHF Channel 16 on entering the River Orwell and report and/or maintain a listening watch as instructed. Channels 14 and 12 will be used for the passing of messages which should be restricted to the safety of navigation or persons.
TUGS: Vessels of 360 ft. (109.7 m.) in length and up to 415 ft. (126.5 m.) will use 1 tug. Vessels of 415 ft. (126.5 m.) in length and up to 460 ft. (140.2 m.) will use 2 tugs. Vessels of less than 360 ft. (109.7 m.) in length but having a deadweight capacity of 5,000 tons or more will use 1 tug.
Special consideration may be given to vessels fitted with Bow Thrust facilities.
BERTHING: Vessels bound for berths in the Wet Dock should arrive off the lock two hours before high water.
Cliff Quay: Length: 3,250 ft (990 m.).
Depth of water alongside: 28 ft. (8.5 m.) below LWOST. Subject to silting.
Approach Channel: 19 ft. (5.7 m.) below LWOST.
Cranes: 15 portal jib cranes from 3.00 to 15.25 tonnes lifting capacity

and one derrick crane capable of lifting 32.5 tonnes at 90 ft. (27.4 m.) radius, and 40 ft. (12.1 m.) outreach from the face of the quay.

Largest vessel which can be accommodated: 460 ft. (140.2 m.) overall in length, 25 ft. 6 in. (7.7 m.) draft inwards, 24 ft. 6 in. (7.4 m.) outwards.

The Quay handles containers and heavy lifts up to 32.5 tonnes and is particularly well equipped to handle cargoes direct to and from both road and rail transport. The South end has been developed as a modern terminal for handling all types of general cargo, including containers, flats and palletised units. Spacious modern transit sheds, together with a container park, are sited conveniently behind this part of the Quay. Vessels up to 25 ft. 6 in. (7.7 m.) draft can be handled at the terminal.

West Bank Terminal: This Terminal provides two berths with a total quay frontage of 240 m. and is dredged to 20 ft. (6.1 m.). A container berth is backed up by 4 hectares of hardstanding, including a Transit Shed of 2,750 sq.m. floor area. The berth is served by two portal cranes of 35 and 10 tonnes capacity and is adjacent to a Freightliner Terminal offering daily services and incorporated into the Railfreight Speedlink network.

A Roll-on/Roll-off berth is backed up by 5 hectares of hardstanding. The bridge ramp is designed to carry a load of 180 tonnes with maximum axle loads of 45 tonnes. The ramp has a carriageway of 36.9 m. long×7 m. wide and can handle traffic at all states of the tide.

The Dock: The dock is situated within the town of Ipswich. It is some 26.25 acres (10.63 hectares) in extent and is approached by an entrance lock 300 ft. (91.4 m.) long by 50 ft. (15.2 m.) wide and ships up to 47 ft. 6 in. (14.4 m.) beam can be brought in.

The following are the depths on the outer sill: At HWOST, 23 ft. 6 in. (7.16 m.). At LWOST, 10 ft. (3.04 m.). At HWONT, 20 ft. 6 in. (6.25 m.). At LWONT, 12 ft. (3.65 m.).

Owing to the shape of the lock-pit modern vessels require the following clearances:

Beam	*Clearance*
40 ft. (12.19 m.)	3 ft. (0.91 m.)
42 ft. (12.80 m.)	4 ft. (1.22 m.)
45 ft. (13.71 m.)	5 ft. (1.52 m.)
48 ft. (14.63 m.)	5 ft. 6 in. (1.67 m.)

Inside, in addition to some 2,700 ft. (823 m.) of private quays owned by merchants having warehouses or mills adjoining, where small vessels can berth, there are the following quays owned by the Authority:

(i) *South West Quay:* This quay is 800 ft. (244 m.) in length with a depth of 19 ft. (5.79 m.) of water alongside at mean dock level. The quay is served by three modern 7.63 tonne portal electric travelling cranes and mobiles as required.

(ii) *Timber, Public Warehouse,* and *End Quays* total 940 ft. (286 m.) in length and have a depth of water alongside varying from 12 ft. (3.65 m.) to 20 ft. (6.09 m.). Public Warehouse Quay has transit shed and warehouse space behind the quay and is served by mobile cranes capable of lifting up to 5 tonnes.

(iii) *Tovell's Wharf* is a 600 ft. (183 m.) reinforced concrete quay with 22 ft. (6.70 m.) of water alongside. It is served by two 4 tonne and one 5 tonne electric travelling luffing cranes.

(iv) *Orwell Quay* is 775 ft. (236 m.) in length, with 18 ft. (5.48 m.) of water alongside and includes a combined container and roll-on/roll-off berth with a derrick capable of lifting 32.5 tonnes at 112 ft. (34.14 m.). Two transit sheds, with a floor area of 96,700 sq. ft. (8,983 sq. m.) are situated immediately behind the Quay apron together with further extensive covered and open areas.

STEVEDORES: Ship's Master normally advises his Agent of his ETA, disposal of cargo on board, and all relevant details. The Agent passes this information to Stevedores.

MEDICAL: All medical facilities available in port. Vessels requiring medical assistance on arrival should advise all details by radio telephone or on their ETA cables.

TANKERS: It is desirable that when Master of a tanker gives an ETA he also indicates the size of pipe-line, size of connection and discharging point in order that necessary arrangements can be made at discharging point of receiving oil terminal. There are no slop facilities at port of Ipswich, and all cleaning and gas-free operations must be carried out outside precincts of the Harwich Harbour Conservancy Board. Only one tanker berth at Ipswich but there are six intake points on quay and it is usual for four coastal tankers to be accommodated, depending on the overall length and berth availablity. A maximum draft on the berth of 25 ft. 6 in.

DENSITY: Approx. 1020 oz. depending on the amount of fresh water in river due to heavy rain.

FRESH WATER: Available at all quays. Delivery by hose through meter at 10 t.p.h.

FUEL:

Gas oil 35 secs. Redwood.
Light fuel oil 200 secs. Redwood.
Medium fuel oil heated 950 secs. Redwood.
Heavy fuel oil heated 3,500 secs. Redwood.
At least 24 hours' notice required.

GANGWAY/DECK WATCHMEN: No watchmen required by Port Authority, but sufficient men available at all times to move vessels, if necessary.

OPENING/CLOSING HATCHES: Hatches opened by ship's crew.

CERTIFICATES: Following certificates are required by Agents in order to arrange Customs clearance:

Ship's Register.
Radio Certificate.
Load Line Certificate.
Safety Equipment Certificate.
Derat Certificate.
British Tonnage Certificate, if required.

CUSTOMS ALLOWANCE: Tobacco, 200 cigarettes, or equivalent in tobacco, per man. Wine and/or Spirits, One bottle per man.

CARGO GEAR: Cargo working gear is supplied by stevedores. Normally, quayside cranes are used for discharging and loading. In event of cargo gear being used in port, ship's gear certificate, duly certifying that all gear has been examined and is in every way workable and suitable for discharge and/or loading of cargo, is to be produced.

IDENTIFICATION CARDS: Not required as long as each crew member has in his possession a seaman's book and/or passport.

CONSULS: Vice-consul for Sweden and Vice-Consul for Norway. Tel. 59281.

REPAIRS: Only small repairs on board.

REPATRIATION: Facilities exist at port for effecting crew changing and arranging repatriation.

AIRPORT: A non-customed airport.

HOLIDAYS: Normal holidays for English ports.

TIME: GMT in Winter months. Summer time, GMT plus one hour.

POLICE/AMBULANCE/FIRE: In emergency dial 999. Otherwise Police – Ipswich 55811; Ambulance – Ipswich 56407; Fire – Ipswich 75345.

SHORE LEAVE: Allowed.

AUTHORITY: Ipswich Port Authority.

KING'S LYNN: 52.53 N. 00.15 E. (See Plan Book)

DOCUMENTS:

Pilot Note to be filled in and signed by the Master on completion of pilotage services both inwards and outwards.

Cargo tonnage return to be completed by the ship's Agent.

PILOTAGE: Pilotage is compulsory between an East-to-West line through Bar Flat Buoy in the Wash and the Freebridge at King's Lynn.

Vessels may be boarded and unboarded by pilot cutter in the Wash from approx. 2.5 hours before high water between Cork Hole, the Sunk Buoy and Roaring Middle Light Float. Unless prevented by weather or breakdown a pilot cutter cruises between King's Lynn No. 1 Light Buoy and the Sunk Light Buoy approx. 2.5 hours before high water until such time as it is too late for a vessel to transit the Approach Channel on that tide.

Requests for a Pilot sent at least 24 hours before the service is required (with amendments if necessary up to 14 hours before) to the Pilot Office, Common Staith, King's Lynn (tel. King's Lynn 3411, telegrams "Conservator" King's Lynn) or through local Agent. The Pilot Office is at the Harbour Office and maintains VHF R/T watch on Channels 16 and 14 from 0900 to 1700 hrs. Monday to Friday and from 4 hours before high water until 1 hour after high water on each tide after 1700 and before 0900 hrs. The pilot cutter listens on Channel 16 when on station and is fitted with Channels 14, 12, 11 and 6 as working channels.

No. 3 and 4 pilot launches "Brackley" and "Denver" are 40 ft. fibre glass craft with blue hulls, white superstructure and orange tops to the wheelhouses. In the event of bad weather the pilot launch on duty will fore-run vessels into Cork Hole (52° 53′ N. 00° 24′ E.) before boarding Pilots.

Requests for Pilots for ships in port, should be made to the Pilot Office at least 2 hours before the Pilot is required to attend the ship. The signals to be used or displayed where the services of a Pilot are required in accordance with the provisions of the Merchant Shipping (Pilot Signals) Order, 1970. Pilots are boarded and unboarded directly to and from the pilot cutter as conditions allow.

ANCHORAGE: In the Wash vessels anchor within an area bounded by the Roaring Middle Light Float and the King's Lynn No. 1 Light Buoy and the Sunk Light Buoy. Anchoring close to No. 1 buoy in sufficient depth of water assists early boarding of Pilots. Depth of water min. of 20 ft.

RESTRICTIONS: King's Lynn Harbour is situated on the River Great Ouse about 2 miles inland from its mouth, at the S.E. corner of the Wash.

The shipping channel in the approaches to King's Lynn and its approaches in the Wash is subject to changes in depth and direction as published on Admiralty Charts.

Harbour Master will advise in advance upon the suitability of vessels and tides.

All ship movements are at high water, times in accordance with a position list maintained at the Harbour Office on the basis of information supplied in advance from Masters of vessels and their Agents.

At the Docks entrance lock docking signals are exhibited from a signal mast. Gale warnings are exhibited from a signal mast on Common Staith.

MAX. SIZE: Max. dimension for vessels entering the Harbour: length 260 ft., beam 45 ft., draft 11 ft., on lowest neap tides, and 17 ft. on highest spring tides. Access over high tide only. Harbour Master to be consulted for vessels approaching these limits.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: The King's Lynn Conservancy Board operates in the River Great Ouse and its approaches in the Wash a VHF (FM) port operations and information radio-telephone service in the International Maritime Band, call signs: "King's Lynn Harbour Radio" (Channels 16, 14, 12 and 11); "King's Lynn Pilots" (Channels 16, 14, 12, 11 and 6).

British Transport Docks Board operates a docks operations and information service, call sign: "King's Lynn Docks Radio" (Channels 16, 14 and 11).

TUGS: Controlled by King's Lynn Conservancy Board and in attendance at the discretion of the Board's Harbour Master. Vessels joined in the Wash Approaches and/or lower reach of River Great Ouse (Marsh Cut). Vessels should provide own hawsers. If ordered, tug hawser available.

Harbour Master may require any vessel to use and employ a tugboat.

BERTHING: *Alexandra Dock:* Size 780 ft. × 310 ft. Approached from the River Great Ouse and King's Lynn Harbour by a lock 50 ft. wide and 200 ft. between gates. The depth of water on sill is 22 ft. to 26 ft. (springs) and 18 ft. (neaps).

Bentinck Dock: Size 1,000 ft. × 400 ft. Connected with the Alexandra

Dock by a passage and gates over which pass 2 swing bridges. Double-sided jetty 235 ft. long.

The quays of the 2 docks have a water frontage of approximately 1 mile and provide a total of 16 berths.

STEVEDORES: Gangs usually can be provided at minimum notice. Main commodities and handling rates: timber (200 cbm pre-pack, pre-slung, per gang-hour), steel coils (250 tons per gang-hour), tinplate (90 tons per gang-hour), also roll-on/roll-off and container handling.

TANKERS: 4 tanker berths in enclosed docks. Discharge from vessels is to 6-in. connecting pipes feeding 8-in. pipes to storage tanks.

MEDICAL: It is advisable to give advance notice of required medical attendance via Agent. In emergency the Harbour Office will pass on requests received over the VHF R/T Port Operations and Information Service. For other medical information, refer to the Port Medical Officer of Health and H.M. Customs.

FUEL: Available at berths alongside King's Lynn Harbour on 24 hours previous notice. Light-grade fuel oil, gas oil, petrol and paraffin only.

FRESH WATER: Available on all berths through 4-in. pipes off hydrants from public supply.

OPENING/CLOSING HATCHES: Done by crew. Cranes available for heavy beams.

GANGWAY/DECK WATCHMEN: Vessels responsible for providing own gangways at King's Lynn Harbour berths, where the Regulations require the Master or other person having the care of any ship or other craft to have a proper number of hands on board to attend moorings and to comply with all the requirements and directions of the Harbour Master or his Deputy or Assistants.

CONSULS: Vice-Consul for the Netherlands and German F.R. Vice-Consul for Sweden and Denmark.

REPAIRS: Limited facilities only available locally for hull and engine repairs.

AIRPORT: Charter flights from Cambridge and Norwich airports about 45 miles from King's Lynn. Regular flights from London (Heathrow) about 100 miles from King's Lynn.

POLICE/AMBULANCE/FIRE: In emergency dial 999 and ask for the service required. Normal service: Police – King's Lynn 61311; Ambulance – King's Lynn 3503 or 3910; Fire Service – King's Lynn 5163.

HOLIDAYS: Cargo work usually available at overtime rates on Saturday and Sundays and on all public holidays.

AUTHORITY: The King's Lynn Conservancy Board.

LARNE: 54.51 N. 05.48 W. (See Plan Book)

DOCUMENTS: See "Belfast".

PILOTAGE: Not compulsory, though private Pilots operate who, when required, are engaged by ship's Agent. Pilots board off Fairway Buoy. Port VHF. Channels 16 and 14.

ANCHORAGES: Inner anchorage in Larne depth up to 5 fathoms. Anchorage outside Fairway Buoy exposed in N.E. winds.

MAX. SIZE: Draft dependent on berth but max. 18 ft. at MLWS, and 19 ft. at MLWN. Oil tankers proceed to Ballylumford Power Station which lies across Larne Lough directly opposite Larne Harbour. Approach channel has depth of 30 ft. at MLWS and berth has 35 ft. at MLWS.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Portpatrick.

TUGS: Not based at Larne, only heavy-duty motor launches, suitable for small vessels. As a rule tugs are not required for vessels using Larne Harbour. Tugs from Belfast serve oil tankers to Ballylumford.

BERTHING: 1 berth equipped with two 5-ton cranes for grabbing and general cargo work. 2 berths are equipped with cranes of 32 and 35-ton capacity for handling containers. 4 berths are equipped with roll-on/roll-off ramps, capable of taking loads up to 180 tons and ships up to 70 ft. beam.

STEVEDORES: Larne Harbour Ltd. carry out all the stevedoring. 24 hours notice required for arrangements.

MEDICAL: No advance notice required for medical attention, a hospital being situated 1 mile from harbour. No special inoculations or certificates required.

TANKERS: 1 tanker berth in Larne Harbour. Depth alongside, 18 ft. below datum. Max. length of vessel 260 ft. Pipe diameter 8 in. Discharging only. LPG tankers max. LOA 171 ft., pipe diameter 4 in. For Ballylumford, see "Max. Size".

DENSITY: 1025.

FRESH WATER: Unlimited by shore hose. Rate 7 to 10 t.p.h.

FUEL: Fuelling carried out by road tanker. Arrangements to be made through ship's Agent.

GANGWAY/DECK WATCHMEN: Agents arrange watchmen.

OPENING/CLOSING HATCHES: Performed by crew.

CUSTOMS ALLOWANCE: Agents arrange with Customs.

IDENTIFICATION CARDS: Not required.

CONSULS: Consuls in Belfast can be contacted through ship's Agent.

REPAIRS: Limited repairs by local firms. Major repairs by Belfast firms.

REPATRIATION: Possible.

AIRPORT: 20 miles. Regular flights.

HOLIDAYS: 12th and 13th July, Easter Monday and Tuesday, 1st May, Christmas Day, Boxing Day and New Year's Day. No cargo worked on these days.

POLICE/FIRE/AMBULANCE: Dial 999 and ask for Emergency service required.

TELEPHONES: Only on Cross Channel vessels.

AUTHORITY: Larne Harbour Ltd.

LEITH: 55.59 N. 03.10 W. (See Plan Book)

DOCUMENTS:

1 Crew Declaration Form C.142 (Tobacco List).
1 Crew List.
1 Passenger List.
(Also see "Glasgow".)

PILOTAGE: Pilot station Firth of Forth located at Granton, boarding station Inchkeith Island. Contact with pilot cutters can be made on VHF Channels 16 and radio-telephone 2182.

ANCHORAGES: Good holding ground at Inchkeith Island and Leith roadstead depths 18.3 – 31.0 m. Request should be made to Forth Navigation Service.

RESTRICTIONS: None. Vessels can enter harbour day or night.

MAX. SIZE: Governed by draft of vessels. Max. permissible draft alongside in Imperial Dock 9.1 m. and in Western Harbour 9.7 m., in dock water density is 1015.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Forth, Stonehaven and Cullercoats Radio Stations.

RADAR/VHF: Port and Estuary radar service. VHF contact can be made with Leith Harbour Radio on Channel 16. Forth Navigation Service now in operation.

TUGS: Attend inward-bound vessels in Leith roads. Tug's towline available but not compulsory.

BERTHING: Vessels arriving on max. permissible drafts of 9.1 m. and 9.7 m., in dock water of density 1015, normally docked by Pilots 1.5 hours before high water.

STEVEDORES: ETA advices given by Master to ship's Agent and conveyed by them to stevedores.

MEDICAL: No advance notice of medical attention required. All hospital facilities available.

TANKERS: 1 tanker berth available – max. permissible draft 9.1 m. in dock water of density 1015. Discharge lines 6 in. and 8 in. No slop discharge facilities.

DENSITY: 1015.

FRESH WATER: Available alongside at all berths.

FUEL: All grades available subject to 24 hours notice in advance.

GANGWAY/DECK WATCHMEN: Usually supplied by ship but shore watchmen arrangeable by special agreement.

OPENING/CLOSING HATCHES: Custom of the port is that this work is normally carried out by ship's crew.

CERTIFICATES:

Ship's Register.
Load-line.
Safety Radio.
Safety Equipment.
Cargo Construction.
Deratisation Certificates.
Light Dues receipt.

CUSTOMS ALLOWANCE: Usual amounts allowed by Customs and Excise.

CARGO GEAR: No additional requirements necessary to comply fully with local safety regulations as all gear supplied by stevedores.

IDENTIFICATION CARDS: Not required.

CONSULS:

Foreign Consular Offices in Edinburgh and Leith:

American Consulate General	031-556 8315

REPAIRS: Facilities available to carry out all types of deck and engine repairs.

DRY DOCKS: Largest dry dock "Imperial", length 167.6 m. width of entrance 21.3 m. depth over blocks at 7.7 m. also 2 smaller dry docks.

REPATRIATION: All facilities available for effecting crew changes and repatriation by sea, air and rail.

AIRPORT: Edinburgh Airport served by regular airlines and located approx. 9 miles from Leith.

TIME: British Standard Time, GMT plus 1 hour. GMT in Winter months.

HOLIDAYS: Public holidays observed annually: 3rd Monday in April; 3rd Monday in September; Christmas Day (25th December); 26th December; 1st, 2nd, and 3rd January. Cargo work can be arranged on public holidays except 1st and 2nd January.

POLICE/AMBULANCE/FIRE: Tel. 999 and ask for service required.

TELEPHONES: Can be arranged with G.P.O. or VHF Channel 16 with Leith Harbour Radio.

SERVICES: Compass adjusting facilities available.

SHORE LEAVE: No restrictions.

DELAYS: Minimal delays in berthing, loading and discharging.

AUTHORITY: Forth Ports Authority.

LERWICK: 60.09 N. 01.08 W. (See Plan Book)

PORT LIMITS: All waters contained within the following boundaries including Dales Voe and Aith Voe.

Straight line drawn from the N.E. extremity of Hawks Ness (60° 13′ 27″ N., 1° 10′ 00″ W. approx.) in an E.S.E.'ly direction to the N.E. extremity of Green Holm and thence in a S.E.'ly direction to the N.E. extremity of Score Head in the island of Bressay. Thence in a W.'ly and S.'ly direction along the high Water Mark of all foreshores to Whinna Skerry (60° 07′ 45″ N., 1° 07′ 17″ W. approx.). Thence in a straight line in a W.'ly direction to the S. extremity of Ness of Sound. Thence along high water mark of all foreshores in a generally N.'ly direction to Hawks Ness.

DOCUMENTS: See "London".

PILOTAGE: *Pilot Office:* At foot of Victoria Pier in Harbour Master's office. Lat 60° 09′ N., Long. 1° 08′ W. Limits of Pilotage District similar to Port limits given above. Licenced Pilots always available on 24 hour service subject to following correct procedure given below.

Call Sign: Lerwick Harbour Radio.

Frequencies: Calling: VHF Channel 16. Working: VHF Channel 12. Pilot Cutter: VHF Channels 6, 11, 12 and 16.

Port Control: Fitted with VHF Channels 11, 12 and 16. Continuous watch is maintained 24 hours per day, 7 days per week on Channel 16 except when working vessels on Channel 12.

Procedure: The Port Control Office controls the movement of all vessels arriving or departing by either entrance and all movement within the harbour from public or private quays or supply bases, whether such vessels are under the control of Pilots or not.

(a) Vessels requiring pilotage should arrange with Agent not less than 24 hours before arrival. Vessels without Agent should contact Lerwick Harbour Master through Coast Radio Stations not less than 24 hours before arrival. Vessels leaving ports less than 24 hours steaming away should advise time of sailing, projected speed and ETA at time of leaving last Port. Vessels inward from Continental Shelf should advise time of leaving location, projected speed and ETA at time of leaving last location. Amended ETA's should be advised 2 hours before the time given in the last transmitted ETA. VHF contact should be made with Lerwick Harbour Radio while still 1 hour away when final pilotage and berthing arrangements will be made. Port control cannot guarantee a Pilot on station unless 1 hour's notice is given.

(b) ETA messages should also contain information on which harbour entrance is to be used, draft and length overall. Vessels entering by the South entrance will be boarded West of Kirkabister Lighthouse or near Knab Point if weather conditions are unsuitable. Vessels entering by the North entrance will be boarded abeam of the Green Holm and 0.5 miles N.E. of Beosetter Holm. If boarding conditions in this area are unsuitable the South entrance must be used.

(c) "Knab", 18 m. Dark blue hull, white upperworks. Pilot boat and tug, can be used for towing, bollard pull 8 tons.

(d) Outward vessels should call the Port Control 1 hour before departure when information on traffic movement will be given and arrangements for pilotage will be made. When moving within the harbour all vessels should maintain a continuous listening watch on Channel 16. All vessels moving within the harbour should report to the Port Control immediately prior to leaving the berth or anchorage, whether a Pilot is on board or not.

(e) Pilotage within Lerwick Harbour is compulsory, but all vessels not carrying passengers are exempt.

(f) Telephone number of Lerwick Harbour Master and Pilot station is Lerwick 3462.

ANCHORAGE: Ample anchorages in harbour roads.

MAX. SIZE: Vessels up to 20 ft. draft and 320 ft. long alongside berth as routine. Vessels of greater length and for draft may be accommodated alongside after discussion with Harbour Master. Anchorages available for any size of vessel subject to prior consultation with Harbour Master, if above 10,000 g.r.t. No mooring buoys available.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Nearest Coast Radio station "Shetland Radio" Frequency and other details as for "Wick Radio" except for VHF working Channel which is Channel 27.

"Lerwick Harbour Radio" see "Pilotage".

TUGS: No tugs available but Pilot cutter will give towage assistance within her capabilities.

BERTHING: Berths are available for the handling of most cargoes including Roll-on/Roll-off and arrangement should be made through Agents well in advance of arrival. No berths available for handling liquid chemicals. Mobile cranes available from Harbour Authority up to 30 tons capacity or through private operation to 110 tons capacity.

STEVEDORES: Arranged through Agent.

MEDICAL: Medical aid can be arranged through Agent or Coastguard at any time day or night.

COASTGUARD: Lookout on top of Knab Point manned 24 hours a day. Fitted with MF and VHF Radio Channels 16, 13, 10 and Zero.

TANKERS: BP Oil have their own discharging berth. Tankers are also able to discharge at various Offshore Oil Industry Supply berths

DENSITY: Density 1025 at all states of tide.

FRESH WATER: Available at most berths, 65 to 100 t.p.h. No water boat.

FUEL: Gas oil available on demand.

FIRE PRECAUTIONS: No-smoking regulations in operation inside all transit sheds. Usual tanker terminal regulations in operation. Handling of explosives covered by local Bye-Law.

GANGWAY/DECK WATCHMEN: Ships usually supply own watchmen. No fixed sum if shore watchman is employed.

OPENING/CLOSING HATCHES: Crew open hatches.

CUSTOMS ALLOWANCE: Tobacco, wine/spirits; at the discretion of the Customs and Excise.

IDENTIFICATION CARDS: Foreign seamen have to supply same if left behind, i.e. hospital, etc.

DRY DOCKS: No dry dock available, slip available to take small vessels up to 100 d.w.t.

CONSULS:

Denmark (Vice)	3057	Iceland	4121
Finland (Vice)	3057	Netherlands(Vice)	3057
France (Vice)	3057	Norway	3057
W. Germany	2556	Sweden	2556

REPAIRS: Repairs to fishing vessels and other small craft in steel, wood and fibre glass. Also engine and machinery repairs. Comprehensive electronics repair facilities.

REPATRIATION: Facilities exist.

AIRPORT: 25 miles to airport. 5 services per day operated by British Airways. Charter flights by Dan Air and other airlines.

Tingwell, 7 miles from Lerwick, Logan Air Twin Otter service to Edinburgh.

HOLIDAYS: Scottish holidays. Working can be arranged on these days if so desired.

POLICE/AMBULANCE/FIRE: Emergency telephone 999 or call Port Control VHF Channel 16. Harbour Master and Port Control 3462 night or day.

TELEPHONE: Ships telephones can be arranged.

SERVICES: No tank-cleaning equipment. Compass adjuster can be procured if necessary.

SHORE LEAVE: No restrictions.

AUTHORITY: Lerwick Harbour Trust.

LIVERPOOL: 53.32 N. 03.19 W. (See Plan Book)

DOCUMENTS: Required on arrival, Crew List Form I.B.6 to be completed; this list to include all passengers and any British subjects who joined vessel outside of U.K. If any person falling into this category should be on board they must not leave until permission to land is granted by Immigration Officer.

Customs Form C.142, Declaration of goods obtained abroad or during a voyage, must be completed and signed by Master, and each crew member. Health Declaration must be completed. Above forms should be obtained from Pilot.

Manifest and Bills of Lading should be forwarded to vessel's Agent so as to be available before vessels arrival.

Ship's Papers Required:

Ship's Register.
Certificate for British Tonnage (if issued).
Safety Equipment Certificate.
Safety Radio Certificate.
Safety Construction Certificate.
International Load-line Certificate.
Derating Exemption Certificate.

PILOTAGE: At least 48 hours before arrival, inward vessels should give ETA Lynas/Mersey Bar to Agent. Agent will then arrange docking and advise Pilot Office, the Master will receive radio message giving final docking instructions.

Pilot Stations. Vessels arriving from South should take Pilot on board at Point Lynas. Contact shore based pilot station on VHF Channel 9 for boarding instructions. Pilot will board from 40 ft. pilot launch.

Vessels arriving from North should take Pilot at Mersey Bar Pilot Station at entrance to the principle buoyed channel leading to the Mersey. Contact pilot boat on VHF Channels 16 or 12 for boarding instructions.

Description of Bar Pilot Boat. Black top sides with 2 in. yellow ribbon and white boot topping to water line. Yellow funnel with black top. The name "Liverpool Pilot" painted on each side.

In heavy weather, if Master of the pilot boat considers it imprudent to send a launch to put a Pilot on board an incoming vessel, he will make the appropriate signals by VHF, morse or other means that effect.

Also see "VHF".

ANCHORAGE: In the event of berths not being readily available for vessels, normally they must wait at the Mersey Bar Anchorage which is in the open roadstead. There are river anchorages, but these are only usually for vessels about to enter the dock system.

RESTRICTIONS: No restrictions on night entry, except VLCC's, tidal restrictions depend on vessel's draft and to which berth vessel proceeding, larger vessels usually have to wait for high water.

MAX. SIZE: Tranmere: up to 48 ft. (14.6 m.) draft dependent on tide. Birkenhead: up to 28 ft. 06 in. (8.68 m.) draft. Liverpool Docks: up to 40 ft. (12.2 m.) draft.

Seaforth Dock: 50 ft. (15.2 m.) of water depth, up to 75,000 d.w.t.

HEALTH: Maritime Declaration of Health Form must be completed and handed to Customs Officer or Port Health Officer, whoever first boards ship. This form is obtainable from Pilot. In event of any suspected disease or fever on board, or if ship has called during last 4 weeks at any port in Brazil, China, Indo-China, India, Pakistan, Burma, Colombia and the port of Dar-es-Salaam, West African ports between Lat. 20° North and 20° South, the Master should, prior to entering port, make radio contact with Liverpool Port Health Authority, via Anglesey Radio or Port Radar Station (Signal "Portelth Liverpool") giving them following information:

1. Name of Ship. 2. Date of departure from and name of last infected port. 3. Number, ages and sex of any cases of infectious diseases or other relevant information. 4. Expected time of arrival at Rock Light. Before reaching the Rock Light if medical clearance has not been obtained the following signal must be displayed: by day – fly the flag signal "Z W". By night – show red light over white light.

When medical clearance is obtained pratique will be issued at discretion of Customs Officer.

If there is no suspected disease on board and vessel has not called at any of the above ports listed, Master can radio for Free Pratique. Unless otherwise instructed, Customs Officer will again issue pratique.

Vessels arriving from another U.K. port do not require pratique or health clearance.

Also see "Health – All Ports" before first U.K. port.

RADIO: Portishead Radio, call sign: GKL; Landsend Radio, call sign: GDL; Wick Radio, call sign: GKR; but on approaching Liverpool, the local radio station is Anglesey Radio, call sign: GLV.

RADAR/VHF: Vessels should establish contact by VHF/RT with the Port Radar Station call sign "MERSEY RADIO" before sailing and inward bound when within VHF/RT range and not later than when in the vicinity of the Bar Lighted Buoy.

Harbour Radar: The Liverpool Port Radar Station is situated at the N.W. corner of the Royal Seaforth Dock Lat. 53° 27′ 56″ N. Long. 03° 02′ 22″ W.

The radar coverage extends seaward over Liverpool Bay for a radius of 20 miles from the station and in the River Mersey as far south as the approaches to the Manchester Ship Canal.

Vessels entering or leaving the Port in conditions of low visibility can, on request, be supplied with continuous information of their position whilst navigating in the river or sea channels, providing such vessels can be identified.

A general situation and movement statement, giving all intended movements inwards and outwards for the Port of Liverpool, Eastham, Bromborough, Garston and Cammell Lairds and approximate times at the dock entrance or river berth, together with a list of Local Navigation warnings in force, latest weather reports and area forecast, is broadcast on Channel 9 at 3 hours before each high water. This full statement is repeated with any amendments and the disposition of the River Anchorages North and South at 2 hours before each high water.

Any local navigation warning is broadcast on receipt on Channel 12.

A full list of navigation warnings is broadcast on Channel 9 every 4 hours, commencing at 0001 hrs. No separate broadcast of this list is made during the period from 4 hours before high water to 1 hour before high water as such warnings are included in the General Situation and Movement Statement. An updated taped recording of the above General Situation and Movement Statement is broadcast on request on Channel 4.

Docking Instructions: The VHF/RT Stations at the Dock Entrances and Stages are provided to facilitate docking and berthing operations and to provide direct communication between the Dock Master or Stage Master and a vessel. The Range of these stations is limited to a distance of 6 to 8 miles.

Tug Communications: Channels 8 and 10 are reserved for tug communications and should not be used for any other purpose. Due to the heavy working of these Channels, especially at tide time, and in order to minimise interference, vessels and their tugs when communicating to one another on VHF/RT, should, when possible transmit on reduced power.

Large Vessels Swinging: Vessels of 150 m. or over in length intending to swing in the river should give advance notice of at least 10 minutes to Mersey Radio of their intentions so that Mersey Radio can broadcast on Channel 12 a swinging warning to all ships.

Port VHF Radio Telephone Communications System:

Station	*Call Sign*	*Hague Channel Number*	*Remarks*
Liverpool Port Radar Station	Mersey Radio	16	Calling and safety
		12	Port Operations – Calling and navigation.
		9	Port Operations and routine broadcasts
		18, 22	Port Operations and Radar information
		19	Radar information and general, for tanker traffic for Tranmere only.
		4	Navigation Broadcasts. Transmitting Only.
			A continuous watch is kept on Channels 16 & 12 at Port Radar Station

		6	Intership

*Includes Liverpool Landing Stage.

Local Priority Messages: A vessel which has an urgent message to transmit to Mersey Radio concerning urgent navigation matters and which message should receive priority over normal Port Operations R/T Communications, should indicate the urgency of the message by prefixing the call sign of the Port Radar Station with the spoken word "PRIORITY" i.e. "PRIORITY MERSEY RADIO" repeated 3 times followed by normal procedure.

In special circumstances such as the launch of a vessel or in an emergency such as a wreck, it may be necessary temporarily to establish a patrol for the control of traffic. Vessels will be warned of the existence of any such patrol by "Mersey Radio" and any such patrol vessels or launches will maintain a listening watch on Channel 12 and communicate with other vessels on Channel 6.

R/T Procedure

Channels to be used for calling and for Preparatory Signals: Mersey Radio and ship stations will call on Channel 12. Channel 16 should only be used for distress, urgency or safety communications.

Channels for reply: Calls received on Channel 12 should be replied to on the same Channel, but if calls are received on Channel 16, replies should be made on this Channel.

Indication of the Channel to be used for radio telephone traffic: When communication has been established on Channel 12 between a ship and "Mersey Radio", the shore station will indicate the number of the Channel to be used for passing and receiving information if Channel 12 is busy.

Times: All times in messages should be given in local time, i.e. BST or GMT, using the 24 hour notation.

R/T Discipline: To ensure that the full advantage of efficient communication is achieved, strict telephone discipline and attention to procedure, particularly on the calling Channel is imperative. Channel 16 must only be used for establishing contact between ship and shore or ship and ship, and must not be used for the passing of messages except in cases of distress within Port limits. Channel 12 should be used for establishing contact between ship and shore or ship and ship.

Sequence of R/T communication for vessels entering the River Mersey:

(i) Vessels wishing to communicate with the Liverpool Pilotage District Point Lynas Shore Station should call "Lynas Pilot" on Channel 9. Channel 16 shall only be used in case of difficulty in establishing initial contact.

(ii) Vessels wishing to communicate with the Bar Pilot Cutter should call the Pilot Cutter on Channel 16 and shift to Channel 6 for exchange of traffic. The Pilot Cutter also maintains watch on M/F R/T on 2182 KHz.

(iii) When within VHF R/T range and not later than when in the vicinity of the Bar Lighted Buoy the vessel should establish contact with Mersey Radio on Channel 12 and pass her arrival information on Channel 12 or other Channel indicated by Mersey Radio, watch should be kept on Channel 12 unless instructed to remain on another working Channel for Port Operational reasons. A vessel at anchor at the Bar anchorage should keep watch on Channel 16.

(iv) Vessels requiring radar information or assistance will be requested to shift to Channel 18 or 22, or if a tanker for Tranmere, Channel 19.

(v) Vessels should inform Mersey Radio when they are ceasing to keep a listening watch on Channel 12. If they are shifting to a tug or a dock entrance or Tranmere Oil Stage Channel they should inform Mersey Radio of such intention.

Vessels sailing from the River Mersey: Vessels, on sailing from any Stage or Dock, should establish contact with Mersey Radio on Channel 12 and then maintain watch on that Channel unless instructed to remain on another working Channel for Port Operational reasons. Vessels requiring radar information or assistance will be requested to work on Channel 18 or 22, or if a tanker from Tranmere, Channel 19.

TUGS: Join vessel after passing Rock Light. Normally use tug's lines but optional. Charge for tug's hawsers.

STEVEDORES: Earliest possible ETA to be given to arrange gangs.

MEDICAL: If doctor is required to attend immediately on arrival of vessel, prior notice will be required, but generally doctor is arranged for most convenient time after vessel's arrival. All seamen should be vaccinated against smallpox.

Hospitalisation is available, but seamen will only be admitted if immediate treatment is required. It is preferred for foreign seamen requiring hospital treatment to be repatriated, if able to travel.

Dentist available by appointment only.

BULK HANDLING FACILITIES: Seaforth Grain Terminal designed to accommodate up to 75,000 d.w.t. vessels, length 850 ft. Max. draft 42 ft. Discharge capacity up to 2,000 t.p.h. Two marine towers with storage for 100,000 tons.

The container terminal at Seaforth Dock provides four berths, each 900 ft. in length, max. draft 42 ft. Equipment includes five container cranes and 24 straddle carriers.

Four berths equipped for container handling provided on North side of Seaforth Dock. Each length 900 ft. depth 42 ft.

Bulk handling of sugar at North side, Huskisson Branch Dock No. 3. Two berths each equipped with four grab cranes delivering direct to conveyors.

Iron ore is handled at North Bidston Dock. This berth has a quay frontage of over 1,000 ft. and can accommodate vessels of 28.5 ft. draft. There are three transporters, each with an hourly free digging capacity of 350 tons which discharge either into road or rail vehicles via 175-ton hoppers, or into coasters or barges.

At Cavendish Quay there are two 20-ton cargo level luffing jib cranes with a grabbing capacity of 15 tons. Each crane is designed to handle up to 450 t.p.h. The loading of bulk materials into either road or rail wagons is speeded up by the use of two 100-ton capacity mobile weigh hoppers.

Duke Street Wharf also has specialised facilities for the handling of these commodities. There are four 7.5 ton electric level luffing cranes, each with a lifting speed of 250 ft. per minute. There is good road access to this berth where vessels drawing up to 28.5 ft. can be accommodated.

Packaged forest products are handled at two adjacent berths at Seaforth with a combined quay length of 1,400 ft. with a back-up area of 18 acres which includes approximately 15 acres for timber stacking with a timber-storage barn.

Meat is handled at the following berths: North 2 Alexandra and No. 2 Seaforth. Seaforth meat terminal, with an 800 ft. quay, can handle the largest refrigerated ships in commission.

There are 8 berths in the port with roll-on/roll-off facilities, namely No. 3 Seaforth, S10, S6, the B+I Terminal, Princes Dock, Nelson Dock, North 3 Canada and North West Alexandra Dock.

Birkenhead: East Tower grain berth can accommodate vessels up to 630 ft. length, max. draft 29 ft. 6 in.

Buchanans Mill, max. length 475 ft.* draft 28 ft. 6 in.; Ranks Mill, max. length 475 ft.* draft 28 ft. 6 in.; Spillers Mill, max. length 450 ft.* draft 28 ft. 6 in.

*Up to 500 ft. by special arrangement.

TANKERS: Oil tanker cleaning and slops discharging may be carried out at Rock Ferry Tanker Cleaning Jetty.

Tranmere South Stage – Capable of accommodating tankers up to 100,000 d.w.t., max. draft 40-48 ft. (12.20-14.60 m.), depending on height of tide.

Tranmere North Stage – Capable of accommodating tankers up to 275,000 d.w.t. after lightening to 140,000 tons, max. 48 ft. (14.60 m.) at high water.

Queen Elizabeth II Dock, Eastham – 4 berths – can take vessels of 28,000 tonnage dependent on height tide and vessels dimensions. (See "Manchester".)

DENSITY: River Mersey salt water. Docks approx. 1020.

FRESH WATER: Available at all berths, ex quay. No water barges available. Rate of delivery 15-20 t.p.h.

FUEL: Most major oil companies are represented and can supply range of fuels of various viscosities. Notice required depends on the berth at which vessel is lying as bunkers are supplied ex-lighter at most berths. Notice required can vary depending on availability of barges, but generally at least three to four days notice is required.

FIRE PRECAUTIONS: Tankers may not carry out repairs whilst at discharging berth unless permission is obtained from Harbour Authorities. Fire precautions notice is placed on board by Harbour Authorities.

GANGWAY/DECK WATCHMEN: Watchmen not necessary but available if required.

OPENING/CLOSING HATCHES: Carried out by ship's crew for bulk cargoes and by stevedores for general cargoes.

CERTIFICATES:
Register/Certificate of Measurement.
Certificate of British Tonnage (if issued).
Safety Radio Certificate.
Safety Construction Certificate.
Safety Equipment Certificate.
Load-line Certificate.
Derating Certificate.
Cargo Gear Test Certificates.

CUSTOMS ALLOWANCE: Crew members who remain on vessel during vessel's stay in port may be allowed, under certain conditions, to keep for their own use on board small quantities of any tobacco, spirits and other goods declared on Customs Form C.142. The amount allowed depends on the number of days the vessel is in port.

CARGO GEAR: Cargo Gear Certificates must be produced with the necessary up-to-date endorsement.

IDENTIFICATION CARDS: Not required.

CONSULS: The following countries have representatives in Liverpool:

Argentina
Belgium
Bolivia
Brazil
Chile
Colombia
Denmark
Dominican Republic
Ecuador
El Salvador
Finland
France
Germany
Greece
Haiti
Iceland
Italy
Japan
Liberia
Netherlands
Norway
Panama
Paraguay
Peru
Philippines
Portugal
Spain
Sweden
Thailand
Uruguay
U.S.A.
Venezuela

REPAIRS: All types of deck and engine repairs can be carried out.

DRY DOCKS: Largest – length 950 ft.×140 ft. Also 5 smaller dry docks.

REPATRIATION: Can be effected, but must be arranged through Agent, so that Immigration Clearance can be arranged.

AIRPORT: City Centre to Airport approximately 7 miles, regular service to London for international connections.

TIME: British Standard Time, which is one hour in advance of Greenwich Mean Time, reverting to GMT in Winter months.

HOLIDAYS: Good Friday; Easter Monday (moveable); 1st Monday in May; last Monday in May; last Monday in August or first Monday in September, whichever may be closest to August 31st. December 25th-26th and New Year's Day. Weekly holidays Saturday, Sunday. Cargo can be worked on official holidays, other than 25th-26th December, also arrangements can be made for cargo to be worked on Sundays.

POLICE/AMBULANCE/FIRE: Telephone 999, ask for service required.

TELEPHONES: A temporary telephone can be placed on board a vessel, at most berths, whilst in port.

SERVICES: Tanker cleaning and slops services at Rock Ferry Tanker Cleaning Berth. Compass adjusting, D.F. Calibration can be arranged.

SHORE LEAVE: All bona fide crew members may be granted temporary shore leave during the vessel's stay in port, on condition that they leave in the same ship. This permission does not apply to any alien member of the crew who is refused leave to land by an Immigration Officer, or to whom an Immigration Officer has given notice prohibiting him from landing without leave.

AUTHORITY: Mersey Docks and Harbour Company.

AGENT: Lambert Brothers (Ship Agencies) Ltd., Peel House, 5 Harrington Street, Liverpool, L2 9UG. Tel. 051-236 7206. Telex: 629510. Cables "Lambert Liverpool".

LONDON and Thames District: 51.30 N. 0.05 W. (See Plan Book)

PORT LIMITS: The seaward limit means lines drawn from 51° 37′ 00″ N. 00° 57′ 19″ E. (Foulness Point in the county of Essex) to 51° 46′ 05″ N. 01° 20′ 32″ E. (Gunfleet old Lighthouse) and thence to 51° 26′ 36″ N. 01° 25′ 30″ E. and thence to 51° 24′ 55″ N. 00° 54′ 21″ E. (Warden Point in the county of Kent).

An arrived ship is considered (subject to Charter Party terms) to have arrived when vessel is instructed to anchor at a designated anchorage, as ordered by the Port Authority, if berth where vessel's operations are to be carried out is not available. Otherwise when vessel is alongside. Usual anchorage for larger vessels is below Southend, which is allocated to vessels by the Port Authority.

DOCUMENTS:
1 copy of H.M. Customs and Excise form C.142 to be completed showing each crew members declaration as to the amount of cigarettes, tobacco, spirits, wine, radios, lighters, etc., belonging to them on board the ship to enable Customs to ascertain if in conformity or excess of requirements.
1 copy of H.M. Immigration Office (pink form) showing Master's declaration of crew members on board.
1 copy of List of Passengers on board, showing names, place of joining vessel, passport details.
Ship's Register to be available for inspection on arrival.
List of space occupied by cargo in unregistered space.
Chief Engineer's declaration as to the quantity of fuel carried in double bottom tanks.
Details of any livestock on board.
Ship's Stores declaration arrival Form C14 to be completed.
Details of previous ports of call.

PILOTAGE: Pilotage by licensed Pilots in London Pilotage District is compulsory unless previous exemption is granted.

Vessels approaching from South enter the pilotage area off Folkestone Harbour, position (Lat. 51° 04′ 37″ N. Long. 01° 11′ 21″ E.).

Vessels approaching from the North collect the Pilot at Sunk Pilot Cutter which operates in the vicinity of the Sunk Light Vessel off Harwich. Also see "Harwich".

Radio Communication – General: The maximum range for radio messages is about 20 miles for VHF. The shore Pilot stations and shore based fast launches operate on VHF only.

Attempts to establish communication at extreme ranges cause much unnecessary interference. The first estimated time of arrival should be sent through a Post Office Coast Station giving at least 1 hours' notice of the ETA. Anything less than 1 hour's notice *must* involve ships in delay. The maximum range for MF radio messages is about 50 miles.

Ships should if possible remain in direct contact with the pilot launch or pilot vessel on their approach, as this facilitates shipping the Pilot.

FOLKESTONE PILOT STATION

Pilot launches, with black hulls and white wheelhouses and flying the pilot flag, operate from a shore station at Folkestone to provide Pilots for ships making the port of London and other ports in the London Pilotage District and to disembark Pilots from outward bound ships. The conspicuous building is 77 ft. high and flies a pilot flag by day; by night it displays an illuminated sign with the word "Pilots". The launches normally ship and land Pilots in a position 225° distant 1 mile from Folkestone Pier Light in fine weather but farther off in bad weather.

A shore VHF station is maintained at Folkestone (Lat. 51° 04′ 37″ N. Long. 01° 11′ 26″ E.), and all requests to ship and land Pilots off Folkestone should be made to it.

Ships requiring a Pilot at the Folkestone Station should give the shore station, 12 hours in advance and through a Post Office Coast Station, their estimated time of arrival, gross tonnage, maximum draft and port of destination. Any adjustment to this time should be given at least 2 hours before arrival. The message should be addressed to "Pilots Folkestone".

The following Channels are in use by Folkestone Shore VHF station (call sign "Folkestone Pilots Radio"):

Channel 16 (Calling): A 24 hour listening watch is kept on this Channel, and ships should make contact on it.

Channel 9 (Working): After initial contact has been made on Channel 16, a transfer should be made to Channel 9 for the exchange of operational messages. It is stressed that the shore station has no other working frequency and that ships wishing to communicate with it must have Channel 9 fitted.

Masters of ships approaching Folkestone are advised to maintain a listening watch on Channel 16 so that they can receive any messages for their ships from the Pilot station.

Masters are warned that it is difficult to receive VHF signals from Folkestone when their ships are to the Westward of Dungeness owing to the presence of very large buildings.

The station is manned by a duty Pilot and is equipped with telex, telephone, radar and a daylight signalling lamp. The communications details are:

Tel. Folkestone (code 0303) 56766.
Telex 96381, Pilots Folkestn.
Telegraphic address "Pilots Folkestone".

Ships without VHF should send any amendment of their ETA in sufficient time to allow its delivery through the Post Office telex network. Ships without VHF should also establish their identity by visual means during their final approach.

If requested Folkestone Station Pilots may also be embarked off Brixham 1.5 miles N.E. of Berry Head in position 50° 24′ N., 3° 27′ W., or off Cherbourg at buoy "CH I" in position 49° 43′ N., 1° 40′ W. 24 hours notice is required by Folkestone pilot station for picking up at Brixham, and 36 hours for Cherbourg.

Should a deep drafted vessel not wish to approach too closely to the Folkestone pilot station, then the pilot cutter will meet this vessel 1 mile to the South-east of the East Road port red can lighted buoy, Gp. Fl. 4

red every 15 seconds, which is moored about 4.75 miles North-eastwards of Dungeness in position 50° 58′ 18″ N., 01° 03′ 48″ E.

N.E. SPIT.

Ships bound to or from ports between Amsterdam and Dieppe inclusive may land or ship their Pilots by means of a pilot launch which operates as required, but does not cruise, in the vicinity of the N.E. Spit Buoy, but it is emphasised that ships from beyond these 2 ports or bound to ports beyond them are required to ship or land their Pilots at the Sunk or Folkestone pilot stations.

A shore VHF station operates from North Foreland Lighthouse (51° 22′ 27″ N., 01° 26′ 49″ E.) which is linked by land-line to the pilot station at Folkestone. The call sign is "North East Spit Pilots Radio" and the only Channel available is Channel 9. A 24-hour listening watch is kept on this Channel.

Advance notification of ships requiring services of a Pilot at the N.E. Spit should be given 6 hours beforehand through a Post Office Coast Station, addressed "Pilots Folkestone", or by telephone to Folkestone (code 0303) 56766 or telex 96381.

"North East Spit Pilots Radio" should then be contacted when within VHF range.

Communication with North East Spit pilot launch may be made on Channel 9 VHF. A ship about to ship or land her Pilot should keep in radio contact with the pilot launch.

Ships without VHF should send their ETA or any subsequent amendment in sufficient time to allow its delivery through the Post Office telex network.

The N.E. Spit Pilot will board vessels between the "Elbow Bury" and the "East Margate Buoy", depending on weather, from a fast launch which is based in Ramsgate Harbour.

RIVER MEDWAY

Messages for the Medway Pilots may be passed through the launches of the Medway Ports Authority, call sign "Medway Patrol". They keep a continuous watch on 2,182 kHz.

Ships bound for the River Medway are requested to call on 2,182 kHz., when 20 to 30 miles from Sheerness, stating their estimated time of arrival, requirements and draft. When contact has been made on 2,182 kHz ships should transfer to 2,241, 2,246 or 2,301 kHz or other licensed intership frequency for passing messages. Ships may also call the Medway Port Operations Service, call sign Medway Radio, when within 20 miles of Sheerness, on VHF Channel 16, transferring to Channel 14 for passing messages.

Sea Pilot leaves vessel at Gravesend when River Pilot boards for final river passage.

PROCEDURE FOR OBTAINING THE SERVICES OF A LICENSED TRINITY HOUSE CHANNEL PILOT.

Ships outward bound from above Gravesend: Masters are requested to give advance notice of estimated time of arrival at Gravesend. Masters of ships fitted with VHF may pass this information direct to Gravesend Radio on the appropriate Port Operations Channel.

Channel Pilots for outward-bound ships are obtainable only from the Royal Terrace Pier, Gravesend, from where they board ships by means of black-painted pilot vessels flying the pilot flag, in response to the statutory signals or a VHF message to Gravesend Radio. In thick or foggy weather 1 prolonged blast followed by 4 short blasts should be sounded by means of a whistle or fog horn or a VHF message should be sent to Gravesend Radio.

In addition to the above, the following signals should be displayed:

Ship's gross registered tonnage	*By day* *International Code pendant*	*by night* *White lights*
Not exceeding 2,000	—	1 over the starboard bow
Exceeding 2,000 but not exceeding 6,000	3	1 over the bridge
Exceeding 6,000 but not exceeding 12,000	2	1 over the starboard bow and 1 over the bridge
Exceeding 12,000	1	1 over the starboard bow

Ships outward bound from below Gravesend or shifting between the Nore or Sheerness and Gravesend: When the services of a Channel Pilot are required for shifting a ship inwards between the Nore and Sheerness and Gravesend, or for conducting a ship outwards from below Gravesend, a telephone message should be sent to the Channel Pilots, tel. Gravesend (0474) 3619, stating Name of ship. Time and place at which Pilot is required to join ship. Where bound, Ship's gross tonnage. Ship's draft.

It is particularly stressed that the Pilot must be given adequate time to travel from Gravesend to the ship for her time of sailing, and that allowance must be made for the slowness of night travel and the inaccessibility of some wharves and moorings.

PROCEDURE FOR OBTAINING THE SERVICES OF A LICENSED TRINITY HOUSE RIVER THAMES PILOT.

Duty Pilot: A Trinity House River Thames Duty Pilot is available in the Information Room at the Gravesend pilot station. He can be contacted by telex (Pilot Gravesend 96444) or by telephone Gravesend (0474) 67716/7. Among his duties is the provision of information to Shipowners and Agents, and the Duty Pilot will be pleased to give advice and guidance on the pilotage of ships in the River. The Duty Pilot is in continuous touch with the Duty Officer of the Thames Navigation Service.

Ships outward bound or shifting: When the services of a Trinity House River Thames Pilot are required for piloting a ship down river to Gravesend, or for shifting a ship in the river above Gravesend, a telex message should be sent to Pilot Gravesend 96444. If the message cannot be passed by telex the same information should be given by telephoning Gravesend (0474) 67716/7.

The telex message must start with the word "Pilot" to show that it is an order for a Pilot, and to be consistent with other information now received at the pilot station by telex, should be in the following form:

1. *Order for Pilot.* The word "Pilot" should be used to show that it is an order for a Trinity House Pilot rather than general information on expected movement. This should be on a separate line from the other information.

2. *Time Pilot required.* This should be expressed as a time on the 24-hour clock followed by a date, e.g. 1035/15 or 2215/16.

3. *Ship's Name.*

4. *Draft.* This should be given in feet.

5. *Berth where lying.* If a shift is required the shift should be shown as "FM Smiths WHF to Jones WHF". If one location is given this is the place where the ship is lying and where the Pilot is required. The abbreviation FM (From) should precede the place where the ship is lying in all messages.

6. *Route or where is bound.* This should state N., S., or E. to show where ship is bound, i.e. N. for ships outward bound to the North, S. for ships outward bound to the South, and E. for ships outward bound to near continental ports between Amsterdam and Dieppe. If an outward Channel pilot is required the letter "P" should be added so that it reads NP, SP or EP.

7. *Name of Owner or Agent.*

The message should start with the heading of "Pilot" and should continue as follows:

Time	*Ship*	*Draft*	*Berth*	*Route*	*Agent*
2030/15	*Tasman*	13	FM Robinsons WHF	S	E. Wright
0010/16	*British Isles*	18.5	FM Hightown Tier	NP	Despatch Co.
0830/17	*Nicola*	14	FM Black Bys to Spring WHF		Noel S.S. Co.

It is particularly stressed that the Pilot must be given adequate time to travel from Gravesend to the ship for her time of sailing, and that allowance must be made for the slowness of night travel and the inaccessibility of some wharves and moorings. Normally a minimum of 3 hours is required.

Inward bound ships: It is most important that all inward bound ships notify their estimated time of arrival at Gravesend and keep this information up to date. An estimated time of arrival should be given by using the Post Office public correspondence service through North Foreland Radio at least 3 hours before arrival at Gravesend and preferably immediately after the embarkation of the Sea Pilot. When in VHF range this information may be passed direct to Gravesend Radio on the appropriate port operations channel. In addition the following supplementary information should be communicated: draft, and, if known, berth and name of Agents.

Trinity House River Thames Pilots for inward-bound ships are obtainable only from the Royal Terrace Pier, Gravesend, from where they board ships, by means of black-painted pilot vessels flying the pilot flag, in response to the statutory signals or a VHF message to Gravesend Radio. In thick or foggy weather the letter "G" in Morse code should be sounded by means of a whistle or fog horn or a VHF message should be sent to Gravesend Radio.

Table of Abbreviations: Abbreviations used in this notice are:

FM=From. WHF=Wharf. N=The route of an outward ship is to the North. S=The route of an outward ship is to the South. E=The route of an outward ship is to near continental port between Amsterdam and Dieppe. NP=The route of an outward ship is to the North and she requires a Channel Pilot. SP=The route of an outward ship is to the South and she requires a Channel Pilot. EP=The route of an outward ship is to the East and she requires a Channel Pilot. Bys=Buoys.

Pilot Ladders: Instances of the use of unsatisfactory and unsafe pilot ladders continue to be reported by Trinity House Pilots.

Faulty ladders endanger the lives of Pilots.

Instructions have been issued to all Trinity House Pilots to report immediately any pilot ladders which do not comply strictly with the provisions of the Merchant Shipping (Pilot Ladders) Rules 1965, the Merchant Shipping (Pilot Ladders) (Amendment) Rules 1971 and the Merchant Shipping (Pilot Ladders) (Amendment) Rules 1972.

Masters of ships are reminded of their obligation to comply with the statutory rules and are requested also to comply with the following Trinity House recommendations, ensuring that:

1. The Officer responsible for the embarkation and disembarkation of the Pilot is a Watch-keeping Deck Officer.
2. The ladder is in one length and does not consist of two or more lengths shackled or lashed together.
3. The ladder is secure.
4. The ladder is used solely for embarking and disembarking Pilots.
5. A light is provided so that the pilot ladder overside and also the position where the Pilot boards the ship is adequately lit.
6. The ladder is clean and free from oil and grease.
7. Means are provided to enable the Pilot to pass safely and conveniently from the head of the ladder into the ship or on to the ship's deck. Where portable stanchions and accompanying bulwark step ladders are used for this purpose, the portable stanchions *must* be rigidly secured to the ship's structure against being unshipped and supported at not less than 2 points to prevent lateral movement, and the bulwark step ladder should also be independently attached and firmly secured. The stanchions should be of reasonable height and adequately capped to allow firm grip. *Under no circumstances should a stanchion or handrail be attached to the bulwark step ladder.*
8. The ladder is in good condition and its treads remain horizontal. The treads are to have a rough upper surface.
9. The length of the ladder does not exceed 30 ft. Whenever the distance from sea level to a point of access to the ship is more than

30 ft., access from the pilot ladder to the ship must be by means of an accommodation ladder or other equally safe and convenient means.

10. The ladder is rigged so that each step rests firmly against the ship's side.

11. Spreaders are provided not more than 10 ft. apart to prevent the ladder twisting.

12. 2 manropes and a safety line are provided; and a lifebuoy with self-igniting light is available.

13. The ladder is rigged well clear of discharges and water outlets, and at a place where most lee can be given to the Pilot Vessel.

14. Where a pilot hoist is used a ladder must be at hand ready for use in case the hoist fails.

The Masters of small, "all-aft" ships, in which the main deck is frequently awash when a Pilot is being shipped or landed, or of any type of ship in which the bulwark rails are below the deck of the pilot vessel coming alongside, are asked to provide a boarding platform on each side of the forward end of the raised quarter deck and on the same level as that deck.

The platform should be easily accessible from the quarter deck and should have adequate handrails, those on the outboard side being portable. Fittings should also be provided for the rigging of a pilot ladder. When a pilot ladder is rigged from a boarding platform the top rung of the ladder should be not less than 12 in. nor more than 15 in. below the level of the platform. The top of the ladder should be secured at least 3 ft. 6 in. above the platform in such a way as to make a safe handhold for the Pilot entering or leaving the platform.

If a pilot ladder is unsafe a Pilot may refuse to board, thus delaying the ship. If the ladder is unsatisfactory for boarding the Master of that ship renders himself liable to a fine of double the amount of the pilotage dues involved, for failure to comply with the pilotage act 1913; and if the ladder does not meet the statutory requirements, the Master renders himself liable to a fine not exceeding £50 in accordance with the Merchant Shipping Act 1894.

RESTRICTIONS: Certain restrictions are placed on the navigation of vessels carrying petroleum, chemicals, explosives and other hazardous commodities.

Vessels which are carrying any of the above mentioned cargoes should call Gravesend for details of these restrictions and ascertain whether it is permitted for them to navigate.

Notwithstanding any of the aforementioned restrictions, all vessels should comply with the "General Directions for Navigation in the Port of London 1975". (Copies obtained from the Director of Marine Operations, Port of London Authority, Thames House, Gallions Entrance, London, E.16.).

The tides at London Bridge have a range of 4.6 m. at mean neeps and 6.6 m. at mean springs.

The sea approach to Shellhaven is dredged to allow the passage of vessels to 13.7 m. at mean neap tides. The depth to Gravesend Reach is about 7.9 to 8.1 m. below LAT.

THAMES NAVIGATION SERVICE:

Traffic Co-ordination Centre, Gravesend: This centre programmes all movements within the port, including the docks. All information required by the Authority regarding ETA, ETD, etc., should be passed through this Centre. Also deals with all matters concerning provision of tugs in docks, floating derricks, dummy pontoons, or other services for vessels in dock, moorings in the river and any enquiry reference bye-laws, regulations, etc.

Gravesend Radio: VHF R/T Channel 16, Working Channels 12, 18 and 20.

Radar coverage – Erith to Tongue Anchorage. Information supplied on request.

All vessels to report to this station on entering the port or before leaving the berth and whilst manoeuvring in the River. Also report position at stated intervals at points laid down in Notice to Mariners.

Tidal heights – Tilbury to Estuary given on request and included in navigation broadcast given every 30 minutes on the hour and half-hour.

Woolwich Radio: VHF Channel 16; Working Channels 14 and 22. All vessels entering the area above Crayfordness leaving the berth, manoeuvring and whilst on passage, report to this station.

Navigation broadcast given every 30 minutes at 15 and 45 minutes past the hour.

Receives advance warning of intention to pass through Thames Flood Barrier.

Tidal heights and routings at Royals given on request.

Radar coverage Greenwich to Erith: This station is situated adjacent to the Thames Barrier on the south side of Woolwich Reach. It exercises traffic control over ALL vessels and craft wishing to proceed through the Barrier Control Zone which extends from Margaretness to Blackwall Point. All vessels intending to navigate through the barrier must pass their ETA's to Woolwich Radio on VHF Channel 14 when:

(a) Passing Crayfordness Point inward bound.
(b) On leaving a berth which lies between Crayfordness Point and Margaretness Point inward bound.
(c) When clearing Tower Bridge outward bound.
(d) On leaving a berth or lock between Tower Bridge and Blackwall Point outward bound.

For full details regarding traffic control in the Thames Barrier Control Zone see Notice to Mariners No. 8 of 1980. Vessels wishing to leave from a berth within the Barrier Control Zone should first obtain permission to proceed.

Patrol Service: 24-hour patrol by launches fitted VHF Channels 16, 14, 12, 6 and radar. Can be contacted through Gravesend or Woolwich Radio.

Liaison is maintained through the Thames Navigation Service with Owners, Agents, Pilots, Watermen and all emergency services.

For help, advice, assistance or any matter affecting ships and shipping, contact: Thames Navigation Service:

Traffic Co-ordinator	Gravesend 60311
Duty Officer	Gravesend 68111

ANCHORAGES: Great Nore and Little Nore anchorages allocated by Medway Port Operations, all other anchorages allocated by the Thames Navigation Service dependent upon the size and draft of vessel, the length of stay required at the anchorage and the specific details of the vessel, i.e. explosives, petroleum, etc.

MAX. SIZE: Tankers:

Berth	*Depth at low water*	*Length*
Coryton	14.0 m. maximum	1,100 ft.
Shellhaven	14.6 m. maximum	1,200 ft.
Holehaven	11.2 m. maximum	720 ft.
Purfleet	8.6 – 11.2 m. maximum	700 ft.
Grays	11.2 m. maximum	620-750 ft.

Other river and tanker berths restrictions apply according to tides and berth.

Deep-draft tankers for berthing at Shellhaven is sometimes over a period of 2 tides. Passage on the 1st tide to deep water anchorage, vessel to leave anchorage on make of 2nd tide and arrive off the installation half an hour before high water of this tide.

HEALTH: Port of London Health Authority:
Public Health (Ships) Regulations, 1979.

Notes for the guidance of Masters/ships Agents:

(1) It is the responsibility of the Master of a vessel due to arrive in the Port of London to report to the Port Health Authority the presence of sickness or animals on board, or of the occurrence, during the voyage, of the death, other than by accident, of a crew member or passenger.

(2) This information should be transmitted to North Foreland Radio Station for forwarding to "Portelth London", not more than 12 hours or less than 4 hours before the vessel's arrival in the Port.

(3) Vessels already in the Port can contact the Port Health Authority directly by telephoning Tilbury (03752) 2663.
At Public Holidays (and all times other than 0900 – 1700 hrs. Monday to Friday) an answering machine is connected to this number giving the telephone number of the Duty Officer who will give any advice or assistance required.

(4) The Port of London Health Authority District includes that part of the River Medway comprising Sheerness, Isle of Grain, Ridham Dock and Queenborough.

Also see "Health – All Ports" before first U.K. port.

RADIO: Outside UK waters from the South, call long range station "Portishead Radio"; approaching London, "Niton Radio" or Northforeland Radio giving Agents draft and ETA.

TUGS: Tugs usually pick up vessels for Shellhaven and Holehaven in reaches approaching berth, or Gravesend for berths/docks up river. Tug lines can be hired to ships.

BERTHING:

Cargo Berths: The Port of London Authority operate the three enclosed dock systems:–

India & Millwall Docks (for tennants berths only)
Royal Docks
Tilbury Docks (Essex)

Facilities for general cargo handling, Roll-on/Roll-off and container handling can be provided in Royal Docks and Tilbury Docks according to specific requirements. In particular the PLA operate deepwater, common user container, forest products and Roll-on/Roll-off facilities at Tilbury Docks.

The Tilbury riverside grain terminal is capable of handling vessels up to 83,000 tonnes.

Continued on pages 1088 and 1089.

CRANES: (See "Berthing").

BULK CARGO FACILITIES: (See "Berthing").

SPECIALISED CARGO HANDLING FACILITIES: (See "Berthing").

BRIDGES: No bridges below Tower Bridge which opens for shipping on request.

STEVEDORES: Ordered by the Agents; no ETA to stevedores from vessel necessary; labour to be ordered by 1200 hrs. day before required.

MEDICAL: Not necessary to contact Agents once port health requirements satisfied unless urgent medical treatment required on board on arrival. All medical treatment, vaccinations available.

TANKERS: See page 1090.

DENSITY: Varies according to position and tides.

FRESH WATER: Available at all berths either from shore or barge.

FUEL: All types, grades available by barge, or from terminals.

FIRE PRECAUTIONS: Tankers – no smoking on open decks, only cabins. Deck fire hoses to be connected. Explosive workings at Chapman anchorage, same precautions. Red flag to be flown by these vessels. Fire tug to be in attendance when explosives being worked. Smoking not permitted in the docks or berths.

GANGWAY/DECK WATCHMEN: Available but not compulsory, Master's discretion.

OPENING/CLOSING HATCHES: Liner vessels by crew, with stevedore assistance. Tramp vessels according to charter party.

CERTIFICATES: These certificates to be on board.

Ship's Register.
Load Line.
Safety Radio.
Safety Equipment.
Safety Construction.
Derat. Exemption.
Previous U.K. Light Due Bills.
Cargo Gear and Chain Register complying to U.K. Factory Acts.
British Tonnage Certificate if available.

CUSTOMS ALLOWANCE: Customs usually permit 200 cigarettes or 0.25 lb. tobacco per person on board for 4 days. They can refuse to issue duty free or amount allowed at their discretion. Usually permit 1.3 pints or 1 bottle spirits per person for 4 days. They can issue less or refuse to allow as duty free at their discretion.

(Berthing continued)

Port of London Authority:

Depths of water shown for berths in the enclosed docks are the authorised depths to which the berths may be dredged. Actual depths may be less than the authorised depth and the advice of the local marketing manager should be sought if necessary.

Berth	*No. of Berths*	*Length (ft.)*	*Depth (ft.)*	*Equipment*	*Remarks*
INDIA AND MILLWALL DOCKS: Entrance lock dimensions: Length 584 ft. (178 m.). Width 80 ft. (24 m.). Depth 29.5 ft. (9 m.).					
Montague L. Meyer Ltd.	1	560	32.25	Mobile cranes and fork lifts.	Timber and forest products.
Poplar Dock	Adequate to accommodate barges and ships up to maximum dimensions of length 275 ft., beam 37 ft., draft 19 ft.			Quay and mobile cranes, forklift trucks.	General cargo and steel from rail and road transport to and from barges and ships.
PLA Bulk Wine Terminal	1/2	700	27.0	5 pumps each of 90,920 litres (20,000 gallons) per hour capacity. 25 pumps each of 13,638 litres (3,000 gallons) per hour capacity. Automatic gauges, flow meters, carbon dioxide blanketing system, sterilisation facilities.	Wine in bulk.
PLA Container Berths	2	962	24/28	1 Crane 32 tonne, 1 mobile crane 30 tonnes (at 30 m. radius), 1 floating crane 60 tonne, straddle carriers, heavy duty forklift trucks, etc.	Small container vessels and mixed container and conventional general cargo vessels. Heavy lift berth.
PLA General Cargo Berths	11	6,984	24/32	3 and 5 tonne quay cranes, 1×32 tonne shore based derrick and up to 120 tonne floating heavylift cranes, forklift trucks, mobile cranes, straddle carriers.	Conventional and unitised general import and export cargoes. Fresh fruit and vegetables.
Rank, Hovis, McDougall Ltd.	1	380	32.5		Flour millers and grain importers.
ROYAL DOCKS: Entrance lock dimensions: Length 800 ft. (244 m.). Width 100 ft. (30 m.). Depth 45.5 ft. (13.7 m.).					
Comclear Terminal	(South side – Royal Victoria Dock).			Forklift trucks, straddle carriers, mobile cranes, tractor/trailer units.	Groupage and I.C.D.
Hollis (Ldn.) Ltd.	1	525	17.0	Mobile cranes, forklift trucks.	Forest products.
PLA General Cargo Berths	10	15,364	29.5-38.0	3 and 5 tonne quay cranes, 1×25 tonne shore based heavylift crane, 1 floating crane (up to 120 tonnes), forklift trucks, mobile cranes, tractor/trailer units.	Conventional and unitised general import and export cargoes.
Spillers Mill	2	670	28.0	Suction elevators.	Flour millers and grain importers.
TILBURY DOCKS: Entrance lock dimensions: Length 1,000 ft. (305 m.). Width 110 ft. (33.5 m.). Depth 45.5 ft. (13.9 m.). Tilbury Docks are managed in three divisions: Containers, Conventional and Grain. Access to berths (except the Grain Terminal, Northfleet Hope Container Terminal, cargo and repair jetties, riverside roll-on/roll-off terminal and passenger landing stage) is gained through an entrance lock.					
Northfleet Hope Terminal	1 (in dock) 1 (in river)	850 1,000	40.0 42.0 (MLWS)	2 container cranes 45 tonnes, 2 container cranes 35 tonnes, straddle carriers, tractors and trailers.	(Container Division). Australia/New Zealand/Canada container trade. Accommodation for 1,464 reefer containers at any one time. Operation: 24 hours per day, 7 days a week.
PLA Container Terminal	4	3,240	38.0-40.0	5 container cranes 30 tonnes, 1 Twinlift container crane 45 tonnes, van carriers, tractors and trailers, heavy duty forklift trucks.	(Container Division). Containers to and from cellular and purpose built lift-on/lift-off all container or semi-container vessels. Electrical reefer points. Floating cranes for uncontainerisable cargo. Operation: 24 hours per day, 7 days a week.
Brostrom Terminal	2	950	38.0	Forklift trucks and prime movers.	(Conventional Division). Ro-Ro and self sustaining container vessels.
Canadian Transport Terminal	1	700	38.0	Heavy duty forklift trucks, mobile cranes, tractors and 35 tonne trailers.	(Conventional Division). Forest products.
PLA General Cargo Berths	15	9,022	38.0-42.5	3 and 5 tonne quay cranes, forklift trucks, mobile cranes, van carriers, tractor/trailer units, 1×40 tonne land based and up to 120 tonne floating heavy lift cranes.	(Conventional Division). Conventional, ro-ro and unitised general import and export cargoes. Containers to and from self sustaining general cargo semi-container/ro-ro vessels.
PLA Packaged Forest Products Terminal	1	820	42.5	6 quay cranes 5 tonnes, forklift trucks, side-loaders.	(Conventional Division). Forest products.
PLA Riverside Ro-Ro Terminal	1	Ship length up to 500 ft.	20.0 (MLWS)	Tractors	(Conventional Division). Ro-ro. Suitable for stern ramp vessels.
Tilbury Passenger Landing Stage	1	Ship length up to 740 ft.	Dredged to 10 m. below datum	2 covered gangways.	(Conventional Division). Embarkation and disembarkation of passengers for ships, hovercraft, hydrofoils and launches and Tilbury/Gravesend local ferry.
Seaboard Pioneer Terminal	1	870	38.0	Forklift trucks, etc.	(Conventional Division). Forest products.
Svenska Terminal	1	750	38.0	Straddle carriers, forklift trucks, trailers.	(Conventional Division). Forest products and ro-ro cargo.
West Africa Terminal	4 (ship) 2 (barge)	2,700 100 ft. each	38-42.5	9 quay cranes 10 tonnes, 2 quay cranes 15 tonnes, 5 mobile cranes 15 tonnes, 2 mobile cranes 35 tonnes, light and heavy duty forklift trucks, tractors and trailers.	(Conventional Division). Cargo to and from West Africa – conventional general cargo, forest products, including logs, containers and ro-ro.
PLA Tilbury Grain Terminal	Deep Sea Short Sea 6 barge berths Coaster discharge berth	900	42.0 (MLWS)	2×1,000 tonnes per hour marine leg elevator towers, coaster and barge loading points, 2×200 tonnes per hour pneumatic elevators (coastal jetty).	(Grain Division). Terminal has direct feed by conveyor to 4 adjacent privately-owned mills: Allied Mills Ltd., R.H.M. Flour Mills Ltd., Spillers French Milling Ltd., Cargill Albion Ltd.

(Berthing continued)
Private Cargo Wharves:

Berth/Wharf Name	*No. of Berths*	*Length (ft.)*	*Depth (ft.)*	*Equipment*	*Remarks*
Aberdeen Wharf	1	250	15.0 (MHWS)	2×6 tonnes, 1×7.5 tonnes	Regular service to/from Denmark and Southern Sweden covering all commodities, LASH lighters and other forms of barge traffic.
Lower Aberdeen Wharf	1	230	15.0 (MHWS)		
Anchor Bay Wharf	3	750 (total length)	15.0 (MHWS)	6×20 tonnes	Bulk cargo grabwork, steel cargo, hardwood logs and lumber, liner board, wood pulp, palletised, cased and drummed cargo. Heavy lifts.
Bridge Wharf (Bow Creek)	6 (barges)	270-290	15.0 (MHWS)	Up to 5 tonnes, mobile.	Metals of all descriptions and bulk ore by grabs.
Bridges Wharf (Battersea)	1	225	13.0 (MHWS) Dries at LW	2×3 tonne.	Handling and storage of inflammable and hazardous chemical products etc.
Bruce's Wharf	3	205-300	22.0 (MHWS)	4 cranes up to 46 tonnes.	Terminal for Cast Lines Container Service. Terminal for Lykes Lines Seabee barge cargo. Terminal for Montague L. Meyer Ltd. Timber Importers.
Convoys Wharf	1	800	39.0 (MHWS) 18.0 (MHWS)	6×2 tonnes. Ro-Ro pontoon.	Newsprint, forestry products and general cargo. Operators of nationwide warehousing and transport interests.
Crowns Wharf	1	320	21.0 (MHWS)	2×3.5 tonnes mobile.	Bulk handling, overside or direct delivery.
Dagenham Dock	5	440-610	35.0 (MLWS)	14×5 – 40 tonnes.	Steel and metal ingots, forestry products and any bulk commodity for grab discharging or loading.
Denton Wharf	3	260-600	34.0 (MHWS)	11×3 – 30 tonnes.	Discharge and loading of all types of conventional cargo and containers to and from ships and barges. Groupage service. Licensed for handling explosives.
Dreadnought Wharf	1	150-260	16.5 (MHWS)	6 cranes up to 25 tonnes.	Metals of all descriptions. Conventional cargo and containers to and from ships and barges. Import and export groupage services.
Erith Deep Wharf	1	600	21.0 (MLWS)	5×6.5 – 7.5 tonnes.	Direct handling ship/road transport or ship/warehouse. Handling of forestry products.
Express Wharf – The London Steel Terminal	2	351	18.0 (MHWS)	3 cranes up to 30 tonnes.	Handling of steel using electro-mechanical grabs for steel coils. All operations including shipwork carried out under cantilevered roof providing all weather working.
Goldsmiths Wharf	1	320	13.0 (MHWS)	6 cranes up to 40 tonnes.	No particular specialisation.
Lovells Wharf	1	280	18.0 (MHWS)	3 cranes up to 20 tonnes.	Steel and other metals (London Metal Exchange approved warehouse).
Mast Pond Wharf	1	220	16.5 (MHWS)	1×5 tonne, mobile.	Bulk handling, overside or direct delivery.
New Caledonian Wharf	1	230	12.0 (MHWS)	6×1 – 2 tonnes.	Metals in ingots (metal exchange approved for issue of negotiable warrants for same). Canned, bagged and cased foodstuffs. Landing and sorting of all types of cargo.
Palmers Wharf	2	145-300	12.5 (MHWS)	Mobile cranes up to 15 tonnes.	Cocoa, coffee and rubber trades approval.
Phoenix Wharf	2 (floating jetty)	625-800	20.0 (MLWS)	4 cranes up to 30 tonnes. (8 – 10 tonnes ex-ships hold).	Forest products in all forms, steel, fertilisers and bulk cargoes, empty containers.
Ro-Ro Berth	1	450	16.0 (MLWS)	3 tugmasters.	For continental ferry service and Import/Export of motor vehicles.
Pinns & Limmer Wharves	3-4	850	18.0 (MHWS)	4×50 tonnes. (30 tonnes on ships).	Bulk materials, heavy lifts and unitised cargoes.
Purfleet Deep Wharf	—	1,000	24.5 (MLWS)	8 (jetty)×5 – 6 tonnes. 1 (shoreside)×40 tonnes.	Equipped with modern floating roll-on/roll-off berth. Handling of forestry products.
Tower Wharf	4	750	25.0 (MLWS)	9 cranes up to 18 tonnes.	All cargo except containers and bulk.
Victoria Deep Water Terminal	3	1,200	22.0 (MLWS)	5×5 – 30 tonnes. 2×Paceco/Vickers portainer/transtainer container cranes.	Container unit loads and groupage.

The depths quoted are to be taken as approximate only. For detailed information contact the wharf operator or Thames Navigation Service.

TANKERS: There are about 40 berths for tankers in the Thames District, main terminals of which are listed below. Recommended that Masters cable terminal with discharge manifold size, enabling wharf have correct pipes ready. Slop tanks are available at most wharves.

Company	No. of Berths	Length *(ft.)*	Depth ***(ft.)*	Remarks
BP (Purfleet)	1	Max. LOA 183.0 m.	28.0 (LAT)	F.O., G.O., D.O., kero. Max. loading rate (2 pumps) 750 t.p.h.
BP (Northfleet)	1	170.0	—	Able to handle vessels 3,000 d.w.t. High and low flash point products. Storage capacity 20,000 tons.
BP (Fulham)	1	—	—	Lube oil, gas oil and spirits.
Esso (Purfleet) No. 1	1	Max. LOA 628	26.5 (LWS)	Max. size 28,000 d.w.t. Products handled: F.O., G.O., D.O., kero, gasoline.
Esso (Purfleet) No. 2	1	—	26.5 (LWS)	Max. size 18,000 d.w.t. Products handled: F.O., lube oil, G.O., kero. Total capacity (Berth Nos. 1-2): White oils 187,000 tons. Fuel oil 126,000 tons. Lube oil 39,000 tons.
Mobil* (Coryton) No. 1	1	Max. LOA 650	Max. draft 33 (MLW)	Max. displacement 40,000 tons. Products handled: L.P.G., gas oil, lube oil, fuel oil, gasoline.
Mobil* (Coryton) No. 2	1	—	Max. draft 18 (MLW)	Coaster berth, max. displacement 2,000 tons. Products handled: Same as No. 1 berth (excluding L.P.G.).
Mobil* (Coryton) No. 3	1	Max. LOA 900	Max. draft 44 (MLW)	Max. displacement 100,000 tons. Products handled: Crude and fuel oil (3,000 t.p.h.), gas oil (2,000 t.p.h.), gasoline (1,000 t.p.h.), products (350-500 t.p.h.). Other products handled: Diesel oil, naphtha and Av. Tur.
Mobil* (Coryton) No. 4	1	Max. LOA 1,200	Max. draft 45 (MLW)	Max. displacement 230,000 tons (320,000 d.w.t. with part load). Crude oil only handled. 4×16 in. steel arms. Rate 3,500 t.p.h. each arm.
Mobil* (Coryton) No. 5	1	Max. LOA 200 m.	Depth 43 (MLW)	Max. displacement 40,000 tons. Berth under construction, ready early 1981. 4×10 in. arms for loading/discharging fuel oil, gasoline and gas oil (rate 2,000 t.p.h.). 1×10 in. arm for receiving refrigerated butane.
*Bunkers available at all berths. Fresh water not available.				
Conoco Ltd.	1	256 Max. LOA 625 ft.	44.0 (MHWS)	White oils, capacity 70,000 tonnes.
F. T. Everard & Sons Kent Ltd.	Globe Wharf	450	14.0 (MHWS)	Vegetable and edible oils. White oils including motor spirit. Chemicals and other low flash liquids. Fuel oils.
	Deep Water Jetty	300	14.0 (MLWS)	Storage capacity: 40,735 water tons in 63 tanks.
London & Coastal Oil Wharves Ltd.	1	720	36.0 (average low water)	Hydrocarbon oils. Chemical and other low flash liquids. Vegetable and edible oils. Storage capacity: 303,600 cu.m. (45 cu.m. to 20,320 cu.m. capacity tanks).
Murco Petroleum Ltd.	2	730	37.0 (MLWS)	Motor spirit, distillates. Storage capacity: 52,000 tonnes motor spirit. 10,870 tonnes distillates. Shares Blue Circle Industries Ltd.'s Wouldham Jetties with Unitank Storage Company Ltd.
P.D. Oil & Chemical Storage Ltd.	7	840	34.0 (MLWS)	Hydrocarbon oils and all chemicals. Total storage capacity: 423,000 cu.m. Oil storage capacity: 365,000 cu.m. Chemical storage capacity: 58,000 cu.m. (50 cu.m. to 15,000 cu.m. capacity tanks).
Tate & Lyle Feeds Ltd.	1	100-200	25.0 (MHWS)	Hydrocarbon oils, some chemicals, molasses. Storage capacity: 21,000 water tons of bulk liquid storage tanks (260-3,700 tons water capacity).
Thames Matex	3	750	34.0 (MLWS)	Hydrocarbon oils, chemicals, vegetable oils. Storage capacity: 352,000 cu.m. (125 tanks-200 cu.m. to 10,000 cu.m. capacity).
Thames Terminal Ltd.	1 (ship) 2 (barge)	750	34.0 (MLWS)	High and low flash petro-chemicals, edible and mineral oils, fuel oils. Storage capacity: 160,000 cu.m. for fuel oil, gas oil, lubricating oil and kerosene. 40,000 cu.m. for chemicals, edible oils, etc.
Unitank Storage Co. Ltd.	2	750	34.0 (MLWS)	High and low flash petroleum, some chemicals. Storage capacity: 310,000 cu.m. in 52 mild steel tanks (1,700 cu.m.-20,800 cu.m. capacity). Shares Blue Circle Industries Ltd.'s Wouldham Jetties with Murco Petroleum Ltd.
Shell (Shell Haven) "A"	1	Max. LOA 259.1 m.	†12.5 m.	Deadweight unlimited. Size of vessel limited to 20,000 s.d.w.t. when height of HW exceeds 5.8 m. (due to strength of tide). When VLCC on "B" jetty, size of vessel not to exceed 40,000 s.d.w.t. When 100,000 d.w.t. vessel on "B" jetty, largest on "A" not to exceed 70,000 s.d.w.t. Berth to be vacant when VLCC berthing at "B". 4×8 in. and 4×10 in. (fuel oil). 1×6 in. (L.P.G.).
Shell (Shell Haven) "B"	1	Max. LOA 335.3 m.	†14.6 m.	Deadweight unlimited. VLCC's and other large crude carriers berth head down river at slack HW. Products handled: Crude oil, fuel oil, unleaded white oils, leaded white oils (discharge only), aviation spirit. 4×10 in. and 4×8 in. (white oils and fuel oil). 4×10 in. and 4×16 in. (crude).
Shell (Shell Haven) "C"	1	Max. LOA 237.7 m.	†10.4 m.	Max. displacement 27,000 tons. Import/export white and black oils. 4×10 in.
Shell (Shell Haven) "D"	1	No length restriction	†4.9 m.	Max. size 20,200 s.d.w.t. Coastal berth. Fuel oil export only. Due to close late 1980.
Shell (Shell Haven) "E"	1	Max. LOA 182.9 m.	†8.8 m.	Max. displacement 25,000 tons. Chemical import/export, lube oil import. 5×6 in.
Shell (Shell Haven) "G"	5	No LOA restriction	(outer) †8.0 m. (inner) †4.0 m.	(Outside) No. 1 and 2 berth. Max. size 3,000 s.d.w.t. (Inside) Nos. 3, 4 and 5 berths. Max. size 1,000 s.d.w.t. Coastal jetty for export of white and black oils. (Outer) 6×8 in. (Inner) 5×6 in.
Texaco (Canvey Island)	1	Max. LOA 580 ft.	Depth (subject to dredging) 40 ft. Max. draft 32 ft.	Products handled: Gasoline, gas oil, diesel, kerosine, jet fuel. Pumping rates into barges, 200-250 t.p.h. with max. pressure 100 p.s.i. Discharge rate 400-1,500 t.p.h.

**Unless otherwise stated

†Designed datum (All berths subject to siltation).

CARGO GEAR: To comply with U.K. Factory Acts, valid chain and Cargo Gear Register to be on board. Stevedores usually supply cargo slings, etc.
IDENTIFICATION CARDS: Seamen's identity book required to be retained on board in port.
CONSULS: All British Commonwealth countries are represented in London by a High Commissioner's Office.

Most foreign countries maintain embassies or a consular representative in London.
REPAIRS: All repairs, gas freeing possible; pre-advice recommended.
DRY DOCKS: Largest dry docks at Tilbury, 752 ft. length, 133 ft. breadth. There are smaller dry docks available.
REPATRIATIONS: All facilities exist for changing crews, repatriations.
AIRPORTS: All flights serve London Airport, about 18 miles from centre of London. Gatwick and Southend Airports serve local and Continental services also.
TIME: British Standard Time which is 1 hour in advance of GMT. GMT during Winter months.
HOLIDAYS: No work is available on official holidays usually. Official Days: 1st January; Good Friday; Easter Monday; Whit. Monday; August Monday; Christmas Day; Boxing Day. Some weekend work is possible at certain berths only, at overtime rates.
POLICE/AMBULANCE/FIRE: Contact by telephone; dial 999 and ask for service needed.
TELEPHONES: Ship to shore connections available at most berths.
SERVICES: All types of service for navigational aids, radar, compass adjusting, nautical instruments repaired, slop discharge barges available. Tank-cleaning, gas-freeing services available.
SHORE LEAVE: Crew members allowed ashore but must rejoin on sailing.
REGULATIONS: No livestock allowed ashore without permission Customs and Port Health Authorities.
AUTHORITY: Port of London Authority.

AGENT: Lambert Brothers Ship Agencies Limited, 193-207 High Road, Ilford, Essex. Telegrams: "Lambert Ilford" and "Lambert London EC3". Telex: 897147 and 897435. Tel.: 01 553-3311.

LONDONDERRY (incl. Moville): 54.59 N. 07.19 W.

(See Plan Book)

The main port of Londonderry is situated about 21 miles from the sea on the River Foyle.
PORT LIMITS: Extend from Lifford Bridge to a line drawn from Greencastle Fort in the County of Donegal to the Tower on Magilligan Point in the City and County of Londonderry.
DOCUMENTS: For Londonderry see "Belfast". For "Moville" see "Dublin".

Since the Port of Londonderry falls within the Republic of Ireland and the United Kingdom, both Governments are concerned in regard to Customs documents. Moville, which is situated down river from Londonderry, is located in the Republic of Ireland and is the anchorage where deep-sea vessels lie prior to proceeding to Londonderry. Should vessels discharge cargo or load cargo at this anchorage, Irish documents are required. The port is under the control of the Londonderry Port and Harbour Commissioners who are recognised by both Governments.
PILOTAGE: The Londonderry Port and Harbour Commissioners are the Pilotage Authority for the Londonderry Pilotage District. For information regarding pilotage application should be made to The Secretary, Harbour Office, Londonderry, Northern Ireland.

Pilotage is compulsory, vessels normally taking the Pilot at Carrickarory Pier, Moville. A Pilot may be taken at the Fairway buoy by special arrangement.

The Pilot station is located at Carrickarory Pier, Moville, 55° 10′ 57″ N.; 07° 03′ 27″ W.

Deep-sea vessels usually take Pilot 2 hours before HW time Londonderry, so as to arrive at Londonderry on the top of HW.

Pilotage service may be obtained in response to following signals:

Inward-bound vessels: By day. 1. The International Code Signal G; 2. The International Code Signal P.T.; 3. The Pilot Jack hoisted at the fore; 4. By daylight signalling lamp to the pilot station. If required after hours telephone Pilot Station direct. Tel. Moville 92.

By night. 1. The pyrotechnic light, commonly known as a blue light; 2. A bright white light flashed or shown at short or frequent intervals just above the bulwarks for about a minute at a time; 3. The International Code Signal P.T. by flashing; 4. By signalling lamp to the Pilot Station.

By day or night. 1. By VHF (FM) radiotelephony to the pilot station at Carrickarory Pier. 2. By VHF (FM) radiotelephony to the pilot launch "Foyle Leader."

In poor visibility. By sounding the letter G in Morse Code on the steam whistle or siren.

As visibility to seaward from Carrickarory Pier is restricted it is important that Owners, Masters or Agents notify the Harbour Master (tel. Londonderry 63680) or outside Office hours the Pilot station (tel. Moville 92) of the name of vessel; estimated time of arrival at the Fairway Buoy; draft of water of the vessel. It is also important that VHF (FM) communication be established with pilot station or pilot launch "Foyle Leader" as early as possible before arrival in Lough Foyle. Call signs, frequencies and procedure are as follows:

VHF (FM) Communications:

1. Pilot Station at Carrickarory Pier, Moville: Call sign "Foyle Pilots". Equipment VHF (FM) R/T single frequency working. A continuous listening watch is kept on Channel 16 (156.80 mc/s.) except when pilot launch is operating, when watch is transferred to the launch. When communication has been established on Channel 16 (calling and safety channel) operators should switch to Channel 12 (156.60 mc/s.)

2. Pilot launch: Name of vessel "Foyle leader". Call sign MIBC Equipment VHF (FM) R/T single frequency working. When launch is operating a listening watch is kept on Channel 16 (158.80 mc/s.). When communication has been established on Channel 16 (calling and safety channel) operators should switch to Channel 6 (156.30 mc/s.).

3. Harbour Office, Londonderry: Call sign "Harbour Office" Equipment VHF (FM) R/T single frequency working. All vessels fitted with VHF (FM) R/T while navigating in the river or at anchor in Moville Bay should keep a listening watch on Channel 16 (156.80 mc/s.). When communication has been established on Channel 16 (calling and safety channel) Operators should switch to Channel 12 (156.60 mc/s.).

Messages must be restricted to those related to the movement of vessels and safety of vessels and persons. Messages of any other nature and messages of a personal character cannot be accepted.

Outward-bound vessels and vessels shifting:

When the services of a Pilot are required for an outward-bound vessel or for shifting a vessel, 2 hours notification should be given to Harbour Master (tel. Londonderry 63680) during office hours, of name of vessel; time of departure; draft of water of vessel; where bound. Early notification should be given to enable Pilot to board vessel in good time.
ANCHORAGES: The only anchorage at Londonderry is located at Moville.
MAX. SIZE: For vessels using main port of Londonderry, overall length 500 ft., draft (salt water) 23 ft. 6 in., beam 60 ft.

For vessels using E.B.N.I. Oil Jetty, Coolkeeragh, Londonderry, overall length 600 ft., draft (salt water) 23 ft. 6in.

Maximum draft of ships is increased to 24 ft. on Spring tides at Coolkeeragh and Londonderry.
HEALTH: Pratique is automatic except in the case where the Master suspects one of the dangerous diseases on board when he should notify the Agent.

Also see "Health – All Ports" before first U.K. port.
RADIO: Malin Head Radio Station, Republic of Ireland, covers W/T transmissions and Portpatrick Radio Station, Scotland, covers R/T transmissions.
TUGS: One tug is available which is owned by the Londonderry Port and Harbour Commissioners.
BERTHING: Vessels of deep draft or large dimensions can only berth at Londonderry to arrive on top of high water. Decisions in this matter are taken by the Pilots in conjunction with the Harbour Master.

The reconstruction in ferro-concrete of 300 ft. of existing wharf at Coal Cranes Berth, Queen's Quay, made a total length of ferro-concrete wharves of approximately 2,000 ft. All berths have been dredged to give depth of 25 ft. at LWOST.

The Commissioners have also completed reconstruction in ferro-concrete of Berth 15 and are rebuilding in concrete Berth 16 (length 600 ft.).
CRANES: 2×5 tons (for discharging coal).
STEVEDORES: ETA advices should be given before 1600 hrs. on week-days to arrange work for the next morning and before 1100 hrs. on Saturday to arrange work for Monday morning.
MEDICAL: Doctors and hospital facilities available. Agents should be advised in advance of any medical attention required.
TANKERS: No slop facilities available. Deep-sea tankers discharge heavy fuel oil for electricity power station at E.B.N.I. Jetty, depth 8.8 m., Coolkeeragh, diameter of pipes 8 in. Crew are required to connect and disconnect hoses under port conditions.
DENSITY: Water at Londonderry is brackish and average density 1005 to 1018.
FRESH WATER: Available at all berths direct from shore lines.
FUEL: Gas-oil and light marine diesel available by road tankers and from Shell Jetty at Pennyburn. Shell Mex and B.P. can supply light, medium and heavy fuel oil by road tanker.
GANGWAY/DECK WATCHMEN: Can be covered by crew; shore watchmen available if required.
OPENING/CLOSING HATCHES: This is required to be carried out by ship's crew under local port labour conditions.
CARGO GEAR: Ship's winches and derricks should be in good working order and have BOT Certificates or equivalent. Winches are also required to plough grain on grain vessels. Cluster lighting is required for night work.
IDENTIFICATION CARDS: Not obligatory but should be carried.
CONSULS:

Portugal Vice-consul, Norway Vice-consul. Under the Nordic Treaty, Norway also acts for Denmark, Finland, Iceland and Sweden.
REPAIRS: Deck and engine repairs are carried out by a local engineering works. No major repairs available.
REPATRIATION: Can be arranged by ship's Agent on request.
AIRPORT: The nearest airport to Londonderry is Aldergrove (Belfast) Airport, which is 61 miles from Londonderry.
HOLIDAYS: Port Holidays at Londonderry are: St. Patricks Day (17th March); Easter Monday; 1st Monday and Tuesday in August; Christmas Day and Boxing Day.
POLICE/AMBULANCE/FIRE: Dial 999 and ask for service required, or Police 65161; Ambulance 65171; Fire 61815.
TELEPHONES: No telephones available for connecting on board.
SERVICES: No tank cleaning available or facilities for discharging of tank-washings. Compass adjusters available from Glasgow.
REGULATIONS: Copies of Port Bye-Laws may be obtained through Agent.
AUTHORITY: The Londonderry Port and Harbour Commissioners.

LOWESTOFT: 52.29 N. 01.45 E.

DOCUMENTS:

Crew List (at least 2 copies).
Passenger List (at least 2 copies).
Manifest (at least 3 copies).
Customs & Health Documents (normal U.K. regulations).
Ship's Papers (to be presented to Customs or Port Authorities).

PILOTAGE: Pilots on standby at all times. Pilot launch fitted with VHF and maintains listening watch on Channel 16. Pilots can also be ordered by RT via Humber and Northforeland Radio, hence by phone.

Pilot's private telephone No. Lowestoft 60277 or Lowestoft 61976, or at the Lowestoft Harbour Masters Office, tel. Lowestoft 2286 (this number manned 24 hours). Pilot boat, black hull, white upper work with "Pilot" painted on each side. Light and sound signals as laid down in the International Code of Signals.

Pilot boards vessel at West Holm Buoy or East Newcome Buoy. Vessel should not approach harbour closer than these limits when awaiting Pilot.

ANCHORAGES: Pilotage anchorage North of a line joining West Holm Buoy and Lowestoft Lighthouse.

RESTRICTIONS: No specific restrictions provided the height of tide is sufficient for draft of vessel. Large vessels normally enter on high water slack tide due to cross currents at entrance.

There are regulations governing the passage of vessels through the harbour entrance. Masters of vessels shall observe the Harbour Control Light which is a white flashing light situated below the fixed red light on the South Pier Lighthouse. This light is visible except between 232° to 286° true from the light. When this light is flashing vessels may proceed to sea, but no vessel shall enter the harbour. At all other times vessels may enter the harbour, but no vessel shall proceed to sea.

A green occulting light is shown on the North Pier Head and a red occulting light on the South Pier Head, from sunset to sunrise.

Two fixed vertical green lights are shown on the Inner North Pier Head. These Inner Pier lights will be clearly visible from a vessel upon entering the harbour but will also be visible from certain directions before entry.

A "horn" signal is fixed on the South Pier Head for use in foggy weather. 4 blasts of 2 seconds each will be given every minute.

MAX. SIZE: Max. length approx. 450 ft. Draft 17 ft. MHWS.

HEALTH: See "Health – All Ports" before first U.K. port.

TUGS: 3 tugs are available; tug's lines normally used.

BERTHING: *Outer Harbour* (comprising Hamilton and Waveney Docks and Trawl and Yacht Basins). Used largely for fish traffic:

Width at entrance	150 ft.
Depth at entrance	22 ft. MHWS
Water area	40 acres
Length of quays	4,500 ft.
Depth of water at quays	18 ft. MHWS 12 ft. MLWS

Inner Harbour. Used for general cargo and grain traffic.

Water area	70 acres
Length of quay	6,500 ft.
Depth of water at quays	20 ft. MHWS 14 ft. MLWS

STEVEDORES: Shipping Agent should be advised of ETA, etc., to enable gangs to be available.

MEDICAL: Advance notice desirable of medical attention required on arrival. Hospital facilities available in Lowestoft.

FRESH WATER: Can be supplied at various points on quays from hydrants with waterman in attendance. Normal hours 0800 to 1700 hrs. Monday to Friday, outside those hours overtime rates payable. Approx. flow 15 t.p.h.

FUEL: Marine diesel available from road tankers or fuelling points within the docks. 24 hours notice is normally required for supplying gas oil or boiler fuel; this comes from road tankers.

FIRE PRECAUTIONS: Local fire services available in an emergency. Special arrangements can be made for taking fire-fighting equipment to sea. Normal harbour fire-prevention regulations apply to all berths.

OPENING/CLOSING HATCHES: Carried out by crew.

CONSULS:

Belgium	tel. Lowestoft 2301
Denmark	" " "
France	" " "
Netherlands	" " "
Norway	" " "

REPAIRS: All types of deck and engine repairs are possible in the port.

DRY DOCKS: One dry dock. Length 248 ft. Width at entrance 48 ft. Depth of water on sill 14.5 ft. MHWS.

AIRPORTS: Nearest international airport served by regular airlines is London (Heathrow). Smaller airport at Norwich (27 miles) not served by regular airlines.

POLICE/AMBULANCE/FIRE: In an emergency dial 999 and ask for service required. For normal enquiries: Police Lowestoft 2121; Ambulance Lowestoft 2572; Fire Lowestoft 2227.

GENERAL:

Air/Sea Rescue Services at R.A.F. Cottishall (35 miles).

Royal National Lifeboat Institution, lifeboat berthed at Lowestoft.

200-ton crane available for heavy lifts. 35-ton Scotch Derrick on North Quay available for medium lifts and container handling.

Modern transit sheds.

SERVICES: Compass adjusting. VHF, Radar, radio repairs. All ships' provisions are available by arrangements with the shipping Agencies.

SHORE LEAVE: Leave is permitted.

AUTHORITY: British Transport Docks Board.

MANCHESTER: 53.29 N. 02.14 W. (See Plan Book)

GENERAL: The port of Manchester includes the whole of the Manchester Ship Canal and Queen Elizabeth II Dock. The Canal is approximately 36 miles long from its entrance at Eastham on River Mersey to the Manchester Docks.

DOCUMENTS:

1 Maritime Declaration of Health.
1 Crew Effects List.
2 Ship's Report by Master.
1 Home Office Form 1B6.
1 Stores List.
1 Certificate of Deck Cargo Tonnage.
1 Grain Certificate.
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List.
1 Landing Card for each Passenger.
Ship's Certificate of Registry.
Mercantile Marine Office Certificate – for British ships only.
Load-Line Certificate.
Safety Equipment Certificate.
Lloyds Certificate.
Derat Certificate.
Ship's Register.
Light Bills.
Safety Radio Certificate.

In addition, Manifests and Bills of Lading are usually sent to Agent direct from loading port.

PILOTAGE: Non-compulsory. Orders for Pilots may be lodged with the Pilotage Office at Eastham (Tel. 051-327 1233) or at Dock Office at Manchester (Tel. 061-872 2411, ext. 2174). As much notice as possible should be given, particularly in the case of inward-bound vessels due to arrive at Eastham. Helmsmen can be obtained in same manner.

RESTRICTIONS: Eastham Locks. The main entrance to the Canal is at Eastham where there are two locks side by side, one 600 ft. by 80 ft., and the other 350 ft. by 50 ft. The outer or lower sill of each lock is 11.36 ft. below Chart Datum (1975). The levels of upper sills of the 80 ft. and 50 ft. locks are 32 ft. and 29 ft. respectively below statutory water level in Canal.

Both locks are operated for incoming and outgoing vessels of suitable draft during a period of 8 hours on each tide, i.e. from 4 hours before high water to 4 hours after high water.

The Canal is constructed to give an available depth of water of 30 ft. from Eastham to Ince Oil Berth (5.375 miles) and of 28 ft. from Ince to Manchester Docks.

The size of vessel which can navigate the Canal is governed by the dimensions of locks, the height of fixed bridges and limitations for the draft of vessel.

Maximum length: The greatest length measured between perpendiculars drawn at the foreside of the foremost extremity and at the afterside of the aftermost extremity of the hull or any attachments to the hull shall not exceed 560 ft. The acceptance of ships proceeding above Ince with overall length greater than 530 ft. is subject to approval of the Harbour Master.

The length measured between perpendiculars drawn at the foreside of the stern and at the afterside of the rudder post, or through centre of the rudder stock if there is no rudder post, on the Summer load water-line shall not exceed 535 ft.

The length measured between perpendiculars drawn at the afterside of the rudder plate and at the foreside of the foremost extremity of any part of the hull which is below a horizontal line drawn through the top of the rudder plate shall not exceed 544 ft.

Maximum beam: Vessels not proceeding beyond Ince Oil Berth: 72 ft. overall. Vessels proceeding beyond Ince Oil Berth: 63 ft. 6 in. overall.

Provided the height of masts and/or funnels or other structures is not more than 70 ft. 9 in. from water-line, vessels can pass under all fixed bridges under normal conditions. As, however, the headroom is less during periods of high-water levels, a vessel, in order to avoid possible detention, should reduce masts and funnels or other structures to 70 ft. above the water-line. The restriction as regards height does not apply to vessels proceeding only as far as Runcorn Bridge.

Facilities are available at Eastham for removing and replacing tops of masts and funnels.

MAX. SIZE: When vessels are Loading inwards for the canal Masters should take these facts into their calculations and have regard to the following limitations, all of which are expressed as maximum draft in fresh water:

Vessels inward bound to a berth	*Arrival draft at Eastham not to be such as would exceed:*	
Between Eastham Locks and Ince Oil Berth	28 ft. 10 in.	in fresh water
Between Ince Oil Berth and Manchester Docks (other than Pomona Docks and Runcorn Docks)	26 ft. 06 in.	
To or from Pomona Docks (for coastwise shipping)	14 ft. 00 in.	

Vessels loading outwards at any point between Eastham Locks and Ince Oil Berth should not have a draft exceeding 28 ft. 6 in. upon completion of their loading in this section.

Vessels loading outwards at any point between Ince Oil Berth and Manchester Docks (other than Pomona Docks and Runcorn Docks) should not have a draft exceeding 26 ft. 6 in. upon completion of their loading in this section.

Large vessels can swing in the basins at Stanlow and Manchester Docks. Small vessels can swing at certain other points on the Canal.

HEALTH: Foreign arrivals to complete Maritime Declaration of Health. They are cleared immediately on arrival by either a port doctor or an officer of H.M. Customs depending on where ship comes from and whether there is sickness on board.

Vessels arriving from ports within accepted area (N. European ports) and coastal arrivals need not present Declaration in all cases; when there is sickness on board the Port Health Authority must be informed preferably not more than 12 hours and not less than 3 hours before arrival.

Also see "Health – All Ports" before first U.K. port.

RADIO: FM VHF R/T equipment is installed at Eastham, Stanlow, Latchford and Manchester Docks as an aid to navigation on the Canal.

Ships which are equipped with the appropriate R/T channels are requested to establish contact with the nearest shore station before leaving a berth or lock within the harbour and thereafter to maintain a continuous listening watch on Channel 14.

Station	*Call sign*	*Channel*	
Eastham Locks	Eastham Locks	7	Docking instructions when approaching Eastham Locks from seaward.
Eastham Locks	Eastham	14	Port operations
Stanlow Oil Docks	Stanlow	14 20	Vessels moving within the harbour should maintain a listening watch on channel 14. After contact has been established the shore station will request the ship to switch to the appropriate speech channel.
Latchford Locks	Latchford	14 20	
Manchester Dock Office	Dock Office	14 18	
Ship/tug Communications	Name of ship/tug	8	Inward bound
		10	Outward bound

TUGS: The Canal Company maintains a fleet of high-powered tugs which may be hired to assist vessels, 12 hours notice required.

CARGO HANDLING FACILITIES: Heavy duty floating cranes with capacity up to 120 tonnes. Roll-on/Roll-off berth with strengthening to take loads of 300 tonnes.

Grain elevators at private wharves. Transporter cranes for containers with capacity of 35 tonnes and 25 tonnes.

STEVEDORES: The stevedores require to sight a certificate covering inspection and S.W.L. of slings used in pre-slung cargoes.

TANKERS: *Queen Elizabeth II Dock.* This dock is adjacent to the locks at Eastham which give access to the Canal, and is approached from River Mersey through its own entrance lock. This lock is 807 ft. long by 100 ft. wide. The level of outer sill is 18.36 ft. below Chart Datum (1975). The dock covers an area of 19 acres in the form of a square and has four berths designed to accommodate large tankers, the dimensions of berths being as follows:

Berth No. 1 800 ft. Berth No. 3 900 ft.
Berth No. 2 725 ft. Berth No. 4 730 ft.

The dock is directly connected to oil installations by pipe-lines.

Stanlow Oil Docks. No. 1 & 2 (5 berths) 4.5 miles above Eastham Lock. Length 560 ft., draft 28 ft., beam 72 ft.

Ince Oil Berth. 5.5 miles above Eastham Lock. Length 560 ft., draft 28 ft., beam 72 ft.

Barton. 32 miles above Eastham Lock. Length 508 ft., draft 26 ft., beam 63 ft. 6 in. Max. height above water-line 70 ft.

DENSITY: The water in lower section of the Canal between Eastham Locks and Latchford Locks is brackish. In all sections above Latchford Locks the water is fresh.

MEDICAL: Doctors and hospital facilities available. Agent should be advised in advance of any medical attention required.

FRESH WATER: Available.

FUEL: At Partington, tips are available for the loading of cargo coal, soda ash, etc., and bunkers to vessels. Oil bunkers may be taken by arrangement with oil companies either from craft alongside or at various oil berths along the Canal.

CUSTOMS ALLOWANCE: At discretion of local Customs Inspector. Normal allowances are equivalent to 0.5 lb. tobacco per man and equivalent to 1 bottle of wine per man. Allowances may be halved for home trade vessels. Vessels in port for more than three or four days may receive extra allowances.

(A) MEDWAY (See Plan Book)

PILOTAGE: *Folkestone.* Vessels for River Medway that are approaching from the South obtain Inward Sea Pilot at Folkestone Pilot Station. Telex: 96381. Tel. Folkestone 56766. Telegraphic Address: "Pilots, Folkestone". Notice required: preferably 24 hours notice ETA, then confirmation 12 hours prior arrival with ETA, draft, gross tonnage and destination.

Pilot boards from launch 1 mile South of Folkestone Pier. Contact Pilots by VHF Channel 16, then 9, two hours before arrival (call sign "Folkestone Pilots Radio").

Deep drafted vessels can be provided with Pilots in deeper water by arranging to be met by the Sunk Pilot Vessel in a suitable position about 3 miles East of the Sunk Light Vessel.

North East Spit: Vessels approaching within the range Dieppe/Amsterdam obtain inward ISP between the "Elbow Buoy" and "East Margate Buoy". Telegraphic address: "Pilots, Folkestone". Telex: 96381. Tel. Folkestone 56766. Advance notice essential as Pilots not always on station. Notice required: preferably 6 hours giving ETA, draft, gross tonnage and destination, confirming 2 hours prior to arrival. Contact Pilots on VHF Channel 16, changing to Channel 9 for working (call sign "North East Spit Pilot Radio"). Light or sound signals as per international code. Pilot boards between the "Elbow Buoy" and the "East Margate Buoy", depending on weather, by fast launch which is stationed in Ramsgate Harbour. Contact Pilots on Channel 16, changing to Channel 9 for working.

Medway: Medway Pilots join ships at Little Nore Sheerness for all Medway ports, i.e. Isle of Grain, Sheerness, Bee Ness, Oakham Ness. Otterham, Rochester, Queenborough and Ridham. Telegraphic Address: "Pilot Sheerness". Tel. Sheerness 2276. Notice required, minimum 2 hours. Pilots may be contacted through Medway Radio on VHF Channel 14 or Pilot launch keeps watch on Channel 14 when in service. Lights and sound signals as per international code.

VHF/RADAR: Medway Port Operations and Information Service (Medway Ports Authority) is situated at Garrison Point, Sheerness. Tel. Sheerness 3025. Telex: 96435 (call sign "Medway Radio"). Fitted with VHF, Channels 16, 14, 9 and 22. The station has radar service surveillance of Inner Estuary, Sea Reach, Medway Approach Channel and Lower Reaches of River Medway. Patrol launch maintains watch on VHF Channel 11 (call sign "Medway Patrol") and is also fitted with radar.

REGULATIONS: All vessels required to proceed in accordance with instructions of Port Authority. Vessels are requested to advise Medway Ports Authority – Medway Port Operations Service (call sign "Medway Radio") VHF Channels 16, 14, 9 and 22 of ETA, shifting of sailing movements.

GENERAL:
Tidal Information:

Tidal streams in the River Medway vary between about 2.5 knots at Springs and 1.5 knots at Neap Tides, although velocities vary considerably from Reach to Reach, the areas of maximum encountered velocities are: off Garrison Point Sheerness and through Rochester Bridge.

Average Tidal Heights are as follows: (metres)

Sheerness	5.7 MHWS	4.8 MHWN
Chatham	6.0 MHWS	4.9 MHWN
Rochester	6.0 MHWS	4.9 MHWN

High Waters occur approximately:

Margate	45 minutes	before Sheerness
Herne Bay	20 minutes	before Sheerness
Whitstable	10 minutes	before Sheerness
Rochester	9 minutes	after Chatham
Wouldham	28 minutes	after Chatham
New Hythe	33 minutes	after Chatham
Allington Lock	41 minutes	after Chatham

Tide Tables may be obtained at the offices of the Medway Ports Authority.

(B) SHEERNESS: 51.27 N. 00.44 E. (See Plan Book)

Situated on Isle of Sheppey at junctions of Thames and Medway Rivers.
DOCUMENTS: See "London".
PILOTAGE: See "Medway".
ANCHORAGES: For vessels entering River Medway up to 107 m. length, Little Nore Anchorage, Sheerness. Over 107 m. length – as directed by Medway Port Authority (Medway Radio) or Thames Navigation to Great Nore, Sea Reach or Warps.
RESTRICTIONS: Subject to tidal conditions and under keel clearance appropriate size of vessel. Minimum depth of Medway Approach Channel 8.4 m. at MLWS (Chart Datum).

Entry as directed by Medway Port Operations (Medway Radio). Station keeps watch on VHF Channels 16, 14, 9 and 22.

Occasional restriction for entering approach channel when H.M. naval vessels claim priority.

Traffic Warning Lights are exhibited from Garrison Point.
MAX. SIZE: Five deep water terminals for vessels up to 230 m. in length and 11.5 m. in draft.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Portishead. Local Stations: From South – Lands End, Niton, Northforeland. From North, Cullercoats, Humber, Northforeland.
VHF/RADAR: See "Medway".
TUGS: River Medway – For Sheerness, Ridham Dock, Isle of Grain, Bee Ness, Oakham Ness – Tugs usually meet vessels at Garrison Point Sheerness – 5 tugs available which range from 900 to 3,000 BHP. Tug's lines used, no extra charge.
BERTHING: Sheerness, deep water berths and Ferry Terminal – no restriction.

Berths equipped for handling containers, forest products, motor vehicles and wine in bulk and for general cargo of all kinds, including fresh fruit and vegetables.

Storage facilities available for bulk wine, vehicles, forest products and the warehousing of general cargo.

Sheerness Deep Water Berths – No. 1 – suitable for vessels up to 230 m. length and 8.5 m. draft.

No. 2. Suitable for vessels up to 170 m. length and 11.5 m. draft.

No. 3. Suitable for vessels up to 230 m. length and 11.5 m. draft.

No. 4. Suitable for vessels up to 230 m. length and 8.0 m. draft.

Ferry Terminal – Berth 11. Suitable for either bow or stern door vessels of up to 150 m. in length and 6.5 m. in draft. Present service twice daily Sheerness/Flushing and vice versa.
STEVEDORES: All stevedoring at Sheerness is provided by the Port Authority.
CRANES:

Berth No.	*Remarks*
1	5 – 3 & 5 tonne Electric 1 – 40 tonne Container Gantry
2	4 – 3 & 5 tonne Electric
3	5 – 3 & 5 tonne Electric
4	None (Car Terminal)
5	Ro-Ro berth
11	Ro–Ro/Ferry Terminal
12	10 tonne static (Launches)
12A	Mobile (Marine Services)
14	Mobiles (Launches)
15	Mobiles (Ship Repairs)
16	Mobiles (Ship Repairs)

MEDICAL: 24 hours notice to Agents so that Port Medical Officer can be advised. Normal boarding point – Garrison Point Sheerness – smallpox vaccination certificate required for sighting. All usual hospital facilities available within 15 mile range of Sheerness.
DENSITY: Average density 1021/22.
FRESH WATER: Available alongside all berths at Sheerness.
FUEL: All grades available at BP Refinery Isle of Grain – or available by barge or lorry given 48 hours notice.
GANGWAY/DECK WATCHMEN: Gangway watchmen – services recommended as all berths at Sheerness are tidal with average rise and fall of 5 m.
OPENING/CLOSING HATCHES: Within Sheerness Docks rigging gangs are employed by the Authority for this purpose.
REPAIRS: All types of deck and engine repairs can be carried out either in berth, in dry dock or at river buoys.
DRY DOCKS: Sheerness: 2 dry docks available. Largest for vessels up to 86 m., otherwise only small slipways available.
REPATRIATION: Usual facilities available for crew changes – repatriation can be arranged by various air/sea routes.
TELEPHONES: Police: Sheerness 61451; Fire: Sheerness 2382 or dial 999 and ask for Fire Service; Ambulance: Sheerness 4079.
At Sheerness coin boxes are available for placing on board.
GENERAL: All shipping movements co-ordinated by Medway Port Control Authority, tel. Sheerness 3025, all arrangements being made after notification of arrival or departure by vessel's Agent.
REGULATIONS: See "Medway".
AUTHORITY: Medway Ports Authority.

(C) ISLE OF GRAIN: 51.26 N. 00.43 E. (See Plan Book)

OPERATOR: B.P. Oil Kent Refinery Limited.
DOCUMENTS:

1 Maritime Declaration of Health.
1 Crew's Effects List.
2 Ships Report by Master.
1 Home Office Form 1.B.6.
1 Stores List.
1 Port Dues Certificate.
Ship's Certificate of Registry.
Load-line Certificate.
Safety Equipment Certificate.
Lloyds Certificate.
De-rat Certificate.
Ship's Register.
Light Bills.
Safety Radio Certificate.
Safety Construction Certificate.

PILOTAGE: See "Medway".

VLCC vessels enter and leave by North Channel. Special pilotage and entry arrangements apply.
ANCHORAGES: *Estuary Passage and Anchorages:* Vessels proceeding to Isle of Grain will initially contact the Thames Navigation Service (Gravesend Radio Channels 16-12) and comply with the 'General Directions for Navigation in the Port of London 1975' until entering the Medway Area. Prior contact should be made with the Medway Ports Operations Centre (Medway Radio, Channels 16-14-9-22). Anchorages are allocated according to size and draft of vessel and if outside the Medway area are nominated by the T.N.S.
RESTRICTIONS: Tidal port. 24 hour movements, subject to tidal conditions and under-keel clearance appropriate to size of vessel. The declared depth in the Medway Approach Channel is 8.5 m. (27.9 ft.) at datum.
MAX. SIZE: Largest size of vessel accepted to date, 280,420 d.w.t. part loaded.
HEALTH: Under new procedures which apply from April 1st, 1978 a Health Clearance is only required if the vessel is "Suspect". In this case the Port Health Authority should be advised by radio message addressed to "Portelth London" not more than 12 hours and where practicable not less than 4 hours before arrival.

See "Health – All Ports" before first U.K. port.
RADIO:

Notice of 72 hours and over	– Portishead Radio.
Notice of 12-72 hours	– Landsend Radio.
Notice up to 12 hours	– from South, Northforeland Radio. from North, Humber Radio.

RADAR/VHF: See "Medway".
TUGS: 5 tugs available. 2 of them equipped for fire-fighting. Tugs join and leave vessels at Garrison Point, Sheerness. Normally use tug lines, cost included in tug hire.
BERTHING: There are 8 main jetties suitable for ocean-going vessels (Nos. 1 to 8 main) and 3 coaster berths viz.; No. 1 coaster, incorporating No. 1 barge and No. 9 jetty (No's 1, 4 and 6 jetties closed). All the main jetties are of "T" headed design. Jetties 1-7 can accommodate vessels of various sizes up to a max. of 70,000 tons s.d.w. Max. safe drafts for the Medway Approach Channel and in the berths for particular periods can be advised on request. No. 8 jetty can accommodate part laden VLCC's up to about 1,130 ft. in length and 179,000 tons arrival displacement. Such vessels are programmed to have not less than 1.22 m. (4 ft.) under-keel clearance on arrival at the Medway Buoy 40 minutes before HW Sheerness. They then berth starboard side to on the first of the ebb tide. The jetty is equipped with the IDASAT visual berthing aid.

Ballast water containing Petroleum may normally be discharged into the Company's oily ballast system by arrangement.
DENSITY: Approx. 1020.
FRESH WATER: Available all jetties by pipe-line.
FUEL: Most grades available on all jetties. Advance notice advisable.
MEDICAL: Advance notice of medical attention and inoculations required is advisable. Hospital facilities available in surrounding areas.
FIRE PRECAUTIONS: *Safety Regulations:* A copy of the BP Oil Kent Refinery Jetty Safety Regulations is put on board each vessel on arrival. The booklet additionally contains various tear-out check lists, forms for confirmation of bunker requirements and requests for immobilisation and permitted repairs. These must be completed by ship and shore representatives before operations commence.
GANGWAY/DECK WATCHMEN: *Gangways:* A tower-mounted gangway suitable for VLCC's is provided on No. 8 jetty. Vessels provide their own gangway at other jetties and are responsible for maintaining it as a safe means of access.
REPAIRS: Local marine repair company can undertake repairs of general nature. No drilling or hot-work permitted alongside jetties.
REPATRIATION: All facilities for repatriation by land, sea and air, through London and Dover. Attendance of British Ministry and Foreign Consulate Officials arranged through Agent.
POLICE/AMBULANCE/FIRE: The Refinery Fire Service (which also operates an ambulance) can be summoned by dialling 222 on the Refinery telephone system. This procedure should be followed in any emergency – e.g., a major accident or hose failure etc.

Refinery Security can be contacted by dialling 221. Any request for attendance by the County Police should be made through Refinery Security Dept.

TELEPHONES: Public telephone kiosks on the foreshore road.

GENERAL: Agents have difficulty in providing most services at weekends, therefore, requests for Bond, cash, Consular Officials, etc., should be radioed as soon as possible.

CUSTOMS ALLOWANCE: At the discretion of the local Customs Officer. Normal allowances are 0.25 lb. tobacco or equivalent and 1 bottle of spirits per man. Additionally 1.5 litres of wine per man per day. Separate arrangements apply when crew are leaving ship. Vessels in port more than 3 or 4 days may receive an additional allowance.

TIME: British Standard Time is GMT plus 1 hour. GMT in Winter months.

SHORE LEAVE: A Security Warden will board each vessel on arrival to collect from the Master a copy of the crew list. This should specify which crew members are leaving the vessel, the names of wives or other visitors expected and, if known, details of crew members joining. It should also note if any crew members are not permitted to go ashore.

The list will be retained at the Security Gate and passes will be issued when crew members pass out and collected from them on their return. Crew leaving should be issued with baggage passes by the ship.

(D) ROCHESTER: 51.23 N. 00.30 E. (including Chatham, Strood, Upnor, Gillingham, Snodland, Halling & New Hythe **(See Plan Book)**

DOCUMENTS: See "London".

PILOTAGE: See "Medway".

ANCHORAGES: See "Sheerness".

RESTRICTIONS: No entry restrictions only as to state of tide and draft and as directed by Medway Radio (Medway Port Operations and Information Service, Garrison Point). Station keeps watch on Channel 16, 14, 22 and 9. Channel 14 is allocated for port operations generally. For vessels exceeding 350 ft. in length, daylight navigation.

MAX. SIZE: For Rochester ship berths, maximum length 400 ft. and 25 ft. draft. River berths available, 160/500 ft. in length, with depths of water HWST 14/25 ft. and HWNT 9/20 ft.

HEALTH: Pratique obtained on arrival at Sheerness where Port Medical Officer is available if required.

Also see "Health – All Ports" before first U.K. port.

RADIO: From South: Lands End, Niton, Northforeland. From North: Cullercoats, Humber, Northforeland.

TUGS: J. P. Knight (Rochester) Ltd., 348 High Street, Rochester (Tel. Medway STD 0634 – 42408 and Sheerness STD 07956 – 2821), cover the whole of the Medway Ports Area.

The following companies operate within the Medway Ports Area on a smaller scale with towing and recovery services:

Medway Towing & Light Recovery – Medway STD 0634 – 54300
N.E. Murray (Marine Contractors) – Sheerness STD 07956 – 3701
P. E. Woodger (Craft Hire) Ltd. – Sittingbourne 23874
Mr. J. Oliver – Medway STD 0634 – 406525

BERTHING:

Rochester: There are 3 dredged ship berths operated by the Medway Ports Authority, 2 standby or lay-by berths and mooring buoy facilities to accommodate 118 lighters and 14 lash barges situated between Chatham Reach and Rochester Bridge.

Size restrictions vary from 46 m. to 140 m., the latest minimum depths can be obtained from the Medway Ports Operations and Information Service situated at Sheerness (Garrison Point).

The facilities or riverside berths are operated by commercial interests:

Medway Wharfinger Ltd. at Phoenix Wharf	Medway 79881
Transit Freights Ltd. at Crown Wharf	Medway 75686
Honigs (Rochester) Ltd. at Limehouse Wharf	Medway 46261
Wm. Cory & Sons Ltd. at Cory's Wharf	Medway 41022
Anglosped Ltd. at Stanley's Wharf	Medway 409365
Lynch and Sons Ltd. at Lynch's Wharves	Medway 77831
Crescent Shipping Ltd. at Barnetts Wharf	Medway 79541/8
John Howards Ltd. at Crown & Quarry Wharf and Howards Wharf	Medway 402040 (20 lines)
Flamecap Ltd. at Acorn and Blue Boar Wharf	Medway 44358/9

Details of alongside berths handling equipment, latest depths and relevant information can be obtained from the appropriate wharf concerned.

Current depths can be ascertained from Medway Port Operations Service.

Patmans Wharf: (Lat. 51° 25′ North; Long. 0° 32′ East)

Situated in Upnor Reach, owned and operated by the Medway Brick and Stone Works Ltd. (Telephone: STD 0634 – 78082). Length of wharf 61 m. with a depth of 4.7 m. at MHWS. 3 – 3 to 4 tonnes travelling cranes, mobiles and forklift trucks available.

Tylers Wharf: (Lat. 51° 24.6′ North; Long. 0° 34′ East)

Situated at West Hoo Creek owned and operated by the Lifeline Moulding Co. Ltd. Length of wharf 73 m. with a depth of 3 m. at MHWS. Large sheerlegs of 30 tons and mobiles available. Boat builders and outfitters.

Mooring Facilities: Buoys are provided at points within the River Medway and Swale. Arrangements to use these buoys and current charges can be made through the Medway Ports Authority.

Kethole Reach

Buoys

MEDICAL: Port Medical Officer available if necessary on arrival at Sheerness with 24 hours notice to Agents. Doctor and hospital facilities available at Rochester.

DENSITY: 1020 unless excessive land water coming down river.

FRESH WATER: Quantities up to 200 tons available for delivery by water barge.

FUEL: Oil bunkers may be obtained at the main installation at the Isle of Grain Oil Refinery, or by barge or by road tanker. The last 2 methods require minimum 48 hours notice, similarly with supplying lubricating oil which is not available at the Isle of Grain.

OPENING/CLOSING HATCHES: To be carried out by crew.

CARGO GEAR: Discharge by ship's gear at ship berth and by mobile cranes up to 10 tons at all river berths.

CONSULS:

Vice-Consul Netherlands, Tel. Medway 43256.
Consul Sweden, Tel. Medway 44632.
Vice-Consul Finland, Tel Medway 44632.

REPAIRS: The Medway Dry Dock Co. Ltd. (Tel: Sheerness STD 07956 – 2241/2461) provide 2 Dry Docks of 87.84 m. and 65.58 m. respectively. A smaller slipway is available and alongside berths also.

The Medway Slipway Yard at Rochester High Street of Doust and Company Limited (Tel: Medway STD 0634 – 43087) provide ship repair facilities and operate 2 slipways. The larger can accommodate up to 600 tonnes and 55 m. in length. Afloat repair facilities and riverside berths also available.

Acorn Shipyard (ex New Medway) Gas House Road, Rochester, Kent ME1 1PJ (Tel: Medway STD 0634 – 41355/6/7), provide ship repair facilities at the Isle of Grain; Sheerness and River Medway, and operate 1 patent slipway of 85.0 m. working length and 1 grid situated at Rochester.

DRY DOCKS: All repair facilities available on river berths for vessels up to 200 ft. in length; on a grid for up to 250 ft., and a slipway for up to 140 ft.

AIRPORT: London Airport (Heathrow), Southend Airport.

POLICE/AMBULANCE/FIRE: Dial 999 and state service required and where vessel berthed, also contact Medway Radio in cases of emergency.

SERVICES: Compass adjustors available.

REGULATIONS: See "Medway".

DEVELOPMENTS: Continued expansion and reclamation at Sheerness: Blue Boar Wharf (Rochester) under development. Development of Frindsbury Marshes (Rochester).

AUTHORITY: Medway Ports Authority.

(E) OTHER FACILITIES:

(1) BEE NESS JETTY: 51° 25′ 18″ N. 00° 39′ 00″ E.

Owned and operated by Berry Wiggins and Company Limited situated in Kethole Reach, a distance of 4.1 nautical miles from Sheerness (Garrison Point).

The jetty (not in use) is of timber construction and is 2,496 m. long (1.35 nautical miles). The jetty runs parallel to East Hoo Creek where an inner spur is situated 1,097 m. from the jetty head.

The jetty head is 14.1 m. long with dolphins upstream and downstream, also mooring buoys upstream and downstream of the dolphins for mooring. The maximum size of vessels permitted is 11,000 d.w.t. with a size restriction of 168 m.

The depth at MLWS is 7.3 m.
at MHWS is 13.0 m.

The inner spur (only used occasionally) has a size restriction for vessels of 61.0 m. and;

The depth at MLWS is 3.9 m.
at MHWS is 9.6 m.

The company has a storage capacity of 80,000 cu.m. and the jetty is unsuitable for vehicular traffic.

Address: Berry Wiggins (Kingsnorth) Ltd.,
Hoo, Rochester,
Kent ME3 9ND

Telephone: STD 0634-250722 (Medway) Telex: 965236

May 1978

Company renamed K.C.A. International (Kingsnorth). Address and telephone as before.

(2) BLOORS WHARF – RAINHAM CREEK: 51° 22′ 48″ N. 00° 36′ 42″ E.

Situated at the head of Rainham Creek a distance of 10.3 nautical miles from Rochester. Main wharf 183 m. long with 3.1 m. at MHWS. The Western arm is 61 m. long with a depth of 2.1 m. at MHWS.

The Wharf is owned and operated by Medway Secondary Metals Ltd. (A British Anzani Company). Telephone: STD 0634-34411. Mobile cranes, forklifts and crushing equipment available. Large storage capacity and warehouses also available. Shipbreaking and re-cycling of metals.

(3) FAVERSHAM: 51° 19′ N. 00° 54′ E.
DOCUMENTS: See "London".
PILOTAGE: Not compulsory. Advisable to engage local person by arrangement with Agent or contact Medway Port Operations and Information Service.
ANCHORAGE: The Swale (East) 1 mile (approx.) upstream of the Sand End buoy.
RESTRICTIONS: No night restrictions. Tidal creek – vessels enter from 1.5 hours before High Water according to draft.
MAX. SIZE: 140 ft. LOA, 25 ft. beam, 9 ft. draft, on Spring tides only.
RADIO: North Foreland.
VHF/RADAR: See "Medway".
TUGS: None available.
BRIDGES: Maximum size of vessels proceeding to basin above Faversham Swing Bridge – 140 ft. length, 23 ft. beam. Draft – the minimum clearance for vessels up to 110 ft. in length is 1.5 ft. over the sill, and for longer vessels 2 ft. over the sill.
MEDICAL: Notify Agent of any medical treatment required.
FRESH WATER: Available on some berths.
FUEL: No local installation. Bunkers may be obtained by road tanker – contact Agent.
REPAIRS: Minor repairs can be carried out locally. For nearest grid, slipway and dry dock facilities see "Rochester" and "Sheerness".

(4) KINGSNORTH: 51° 25′ N. 00° 36′ E.
DOCUMENTS: See "London".
PILOTAGE: See "Medway."
ANCHORAGES: Vessels proceeding to Kingsnorth must contact Medway Ports Operations Centre (VHF Channels 16 and 14) when a designated anchorage will be allocated appropriate to the size of the vessel.
RESTRICTIONS: Tidal port. 24 hour movements, subject to tidal conditions and underkeel clearance appropriate to size of vessel. Minimum depth of approach channel 28 ft. LW at present.
MAX. SIZE: Max. length: 750 ft. No breadth restriction. Draft: 38 ft. alongside jetty.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Notice of 72 hours and over, Portishead Radio. Notice of 12-72 hours. Landsend Radio. Notice of up to 12 hours, from South, Northforeland Radio, and from North, Humber Radio.
RADAR/VHF: See "Medway".
TUGS: 6 tugs available. 3 of them equipped for fire fighting. Tugs join and leave vessels at Garrison Point, Sheerness. Normally use tug lines, cost included in tug hire.
BERTHING: *Kingsnorth Jetty:*
51° 24′ 36″ Lat. North
0° 36′ 18″ Long. East

The jetty is owned and operated by C.E.G.B. (Kingsnorth) and is situated at the Western end of Long Reach a distance of 6.3 nautical miles from Sheerness and 5.85 nautical miles from Rochester.

The jetty is of concrete construction and is 580 m. long and "L" shaped with a 306.3 m. face, there is a single upstream connected dolphin making an overall face of 330.7 m.

The size of vessels using the jetty are governed by draft.
Depth at MLWS is 7.3 m.
MHWS is 13.2 m.

There is an inner spur situated on the approach arm 396 m. from the jetty face. It is primarily intended for stern Ro-Ro craft, and has 2 starboard berthing dolphins situated at 30.5 m. and 61.0 m. respectively.
Depth at MLWS is 0.6 m. above PLWD
MHWS is 5.3 m.

The jetty is used for the import of coal for Kingsnorth Power Station.

Address: Kingsnorth Power Station
(South Eastern Region)
Hoo, Rochester,
Kent ME3 9NQ
Telephone: STD 0634 – 250088 Telex 965015

MEDICAL: Advance notice of medical attention and inoculations required is advisable. Hospital facilities available in surrounding areas.
TANKERS: Advisable radio Agents connection sizes required. No slop tank available. 1 large tanker berth only.
DENSITY: Approx. 1018.
FRESH WATER: Available by pipe-line on jetty.
FUEL: Bunkers not usually available on jetty, but may be delivered by barge. Advance notice essential.
FIRE PRECAUTIONS: No immobilisation or repairs allowed without prior authorisation. No hot-work allowed alongside jetty.
GANGWAY/DECK WATCHMEN: Services of shore watchmen not necessary. Shore gangway may be used.
REPAIRS: Local marine repair company can undertake repairs of general nature. No drilling or hot-work permitted alongside jetty.
REPATRIATION: All facilities for repatriation by land, sea and air, through London and Dover. Attendance of British Ministry and Foreign Consulate officials arranged through Agent.
POLICE/AMBULANCE/FIRE: Dial 999 from public call box. Medway Ports Operations Centre can be alerted on Channel 16 and 14 to call these services.
TELEPHONES: No facilities exist for placing telephones onboard.
GENERAL: Agents have difficulty in providing most services at week-ends, therefore, requests for bond, cash, consular officials, etc., should be radioed as soon as possible.

(5) OAKHAM NESS JETTY: 51° 24′ 55″ N. 00° 38′ 45″ E.

The jetty is jointly owned and operated by C.E.G.B. and K.C.A. International Ltd. and is situated in Kethole Reach a distance of 4.5 nautical miles from Sheerness (Garrison Point). The jetty is of concrete construction and is 1,960 m. long. The jetty head is 27.5 m. long with upstream and downstream attached dolphins making a 85.0 m. face. There are 2 further berthing dolphins unattached, both upstream and downstream. The max. size of vessel permitted on the jetty is restricted to 55,000 d.w.t. with a max. length of 229 m.
The depth at MLWS is 11.0 m.
at MHWS is 16.7 m.

C.E.G.B. have a separate storage capacity of 300,000 tons for crude oil primarily for Kingsnorth Power Station.

(6) OTTERHAM QUAY – RAINHAM: 51° 22′ 30″ N. 00° 37′ 42″ E.

Situated at the head of Otterham Creek a distance of 2.75 nautical miles from the junction of Long Reach and Kethole Reach and 10.25 nautical miles from Rochester.

There is 192 m. of quay space with a max. length restriction imposed on loaded vessels of 73 m. There is 3.3 m. at HWNT and 4.6 m. at HWST.

Dockside and mobile cranes up to 9 tonnes are available, fleet of fork lift trucks with 3 tonne capacity.

There is 8,984 sq.m. of wharf stacking area together with 15,217 sq.m. of warehousing available. Cold storage facilities of 1,003 sq.m. are also available.

The Quay is owned and operated by Crescent Shipping (sole proprietors London and Rochester Trading Co.). Telephone STD 0634 – 35121 Telex: 96312.

(7) QUEENBOROUGH: 51° 26′ N., 00° 44′ E.

Area of harbour extends from Queenborough Spit to Long Point and is known as the West Swale. Queenborough Creek is landlocked and small commercial interests operate within the creek which is buoyed, all berths dry out but are safe berths.
MHWS 5.8 m. Weather – prev. S.W.

The ex-Coal Wharf known as the Washer Wharf, situated at Loden Hope is operated by Shipbreaking (Queenboro') Ltd. (Tel: Sheerness 3065) and is primarily used for loading scrap metals.

(8) RIDHAM DOCK: 51° 23′ N., 00° 46′ E.

Situated 900 m. (0.5 nautical mile) S.E. of Kingsferry Bridge in the Swale. Restrictions on vessels governed by London Pilotage Committee in the light of water available in the Swale, Kingsferry Bridge and restricted bends in the navigational channel. Max. LOA 102 m. Beam 16.8 m. and draft 6.7 m.

Ridham dock is owned and operated by Independent Sea Terminals (Tel: STD 0795 – 70881). The terminal has 4 berths, 2 of 244 m. and 2 of 213 m. approximately. These are serviced by 8 electric cranes 2 – 6 tonnes and 6 – 5 tonnes. A large 25 tonne lift crane is planned.

Vessels dock only on or near HW and take the ground at LW, the bottom being soft mud.

The terminal covers approximately 26.7 hectares and 13,000 sq.m. of warehousing are available.

MILFORD HAVEN: 51.42 N. 05.10 W. (See Plan Book)

DOCUMENTS:
Port Health Form.
Immigration Form.
Customs Forms (Crew Declaration, List of Stores.)
3 Crew Lists.

PILOTAGE: Pilots normally board incoming ships from a green-hulled pilot vessel, in a position S.W. of Mid-Channel Rock Light-tower, as close thereto, as weather, size of ship and circumstances permit. When the Western Channel is being used by very large ships other ships may be requested by the signal station, or by the pilot vessel to use the Eastern channel, if draft, and length of ship permit, in which case the Pilot will board close to Sheep Buoy. Deep-draft ships should not approach too close whilst awaiting the pilot vessel. They should remain at least two miles S.W. of Mid-Channel Rock Light-tower. It is important, when manoeuvring at slow speeds to embark a Pilot to make proper allowance for the set of the tidal stream, which sets across the entrance.

Accurate times of arrival are requested so that the pilot vessel may be on station at the correct time. ETAs should be given at least 12 hours before arrival and amendments should be made 2 hours before the latest ETA.

ETA's and subsequent amendments should be passed by radio telegram or radio telephone through any United Kingdom Coast Station (preferably Ilfracombe Radio) to Milford Haven Signal Station (Milford Haven 2343) or to the local Agent of the ship. Alternatively when within 20 to 30 miles of St. Ann's Head ETA's may be passed direct to Milford Haven Conservancy Board signal station calling on VHF Channel 16 then transferring to Channel 12 (the Port working frequency). In addition ships may call the pilot vessel on MF radio calling on 2,182 kHz and transfer to the working frequencies 2,241, 2,246 or 2,301 kHz.

RADAR: Harbour surveillance radar in operation.
VHF: It is important to maintain continuous radio telephone contact with Signal Station when within one hour's steaming of St. Ann's Head, and at all times when in Haven and not safely moored to and alongside berth, including times spent at anchor or at buoys.

All vessels equipped with F/M, VHF, R/T should adopt following procedures:

Entering the Harbour: Contact Signal Station on Channel 16 (156.8 mc/s) when within one hour's steaming of St. Ann's Head. After making contact ship will be requested to maintain watch on Channel 12 (156.6 mc/s) until vessel safely moored alongside or at anchor.

Going to anchor or to a buoy mooring: Report to Signal Station when secured and then maintain a continuous listening watch on Channel 16.

Berthing alongside: Report to Signal Station when safely moored and may then shut down.

Leaving the Haven: Maintain continuous listening watch on Channel 12 (156.6 mc/s) until Pilot has disembarked, when Signal Station should be informed and vessel should maintain a continuous watch on Channel 16 (156.8 mc/s) until one hour after passing St. Ann's Head.

Navigating within the Haven: Maintaining a continuous watch on Channel 12. When radio telephone is used between vessel and tugs during berthing operation Channel 6 or 8 will be used and Signal Station will be informed before vessel comes off Channel 12.

Signal Station will answer calls on Channel 16 for any ship in the port which has been instructed to move off international calling frequency.

ANCHORAGES: Anchorage normally available for vessels up to 40 ft. draft in Dale Roads. Anchorage for smaller vessels normally available in Dale Shelf. Signal Station will advise mariners on the availability of these anchorages.

RESTRICTIONS: The "West Channel" with min. depth of 55 ft. at the entrance and 54 ft. inside is the channel used by the largest tankers. The "East Channel" with min. depth of 32 ft. is available to all vessels of suitable size and vessels able to do so are requested to use it when the largest tankers are entering or leaving in the "West Channel".

MAX. SIZE: Vessels of 65 ft. draft can be handled on virtually all high waters, but draft restriction always dependent on tide, e.g. 63 ft. at worst HW neaps, or up to 67 ft. in favourable conditions. Contact Milford Haven Signal Station on VHF Channel 12 for latest information.

HEALTH: All vessels from endemic areas are boarded by Port Health Officials on arrival. Any suspected disease or fever on board radio Port Health, Milford Haven not more than 18 hours before arrival and not less than 4 hours before arrival.

Also See "Health – All Ports" before first U.K. port.

RADIO: Lands End Radio, Ilfracombe Radio.

TUGS: Tugs normally join vessels to Westward of Esso Jetty, but Master will be advised by Pilot. Tug's lines used, cost of lines inclusive of towage charge.

BERTHING: VLCC's enter at HW and berth heading East . Vessel will be required to swing after unloading and prior to departure.

The Milford Docks includes a wet dock with a water area of 23 acres over 30 ft. deep, 4,000 ft. of quay frontage including a 600 ft. cargo jetty, and 3 berths in the tidal harbour with a depth of 15 ft. of water at all states of the tide.

Celtic Sea Supply Base: 1 jetty at Pembroke Dock, can accommodate cargo ships or rig supply vessels up to 355 ft. in length, depth 20 ft. 1 fixed 10 ton electric crane. Mobile craneage available.

Pembroke Dock Ferry Terminal: 1 ro/ro berth at Pembroke Dock, can accommodate ferries up to 425 ft. in length, depth 23 ft.

CRANES: 1×10 tons, 2×6 tons, mobile cranes up to 15 tons.

STEVEDORES: Ordered prior to arrival with at least 3 days notice.

MEDICAL: Advance notice to Agent not necessary. Local hospital facilities available. Smallpox and yellow fever certificates required.

TANKER TERMINALS:

Esso

No. 1 Berth: depth 57 ft. five 12-in. cargo lines
No. 2 Berth: depth 65 ft. four 16-in. and one 10-in. cargo lines
No. 5 Berth: depth 20 ft. for small coastal vessels
Esso swinging ground dredged to 37 ft.

New Esso Berths

No. 3 Berth: Max. size 30,000 d.w.t. depth 38 ft. cargo lines; five 10-in. (one Black oil, four clean oil.) Three 12-in. (Black oil).
No. 4 Berth: Max. size 20,000 d.w.t. depth 37 ft.; cargo lines are the same as No. 3 berth.

B.P. Angle Bay

No. 1 Berth: depth 54 ft. five 10-in. cargo lines; one 8-in. fuel line
No. 2 Berth: depth 54 ft. five 10-in. cargo lines; one 8-in. fuel line
No. 3 Berth: depth 66 ft. five 16-in. cargo lines; one 10-in. fuel line
B.P. swinging ground dredged to 32 ft.

Texaco, Pembroke

No. 1 Berth: depth 68 ft. 4×16-in. crude lines
max. rate 100,000 bbls.p.h.
No. 2 Berth: depth 52 ft. 8-in. crude lines
No. 3 Berth: depth 36 ft. 8-in. product lines
No. 4 Berth: depth 18 ft. 6-in. product lines
No. 5 Berth: depth 21 ft. 6-in. product lines
Texaco swinging ground dredged to 32 ft.

Gulf Oil

No. 1 Berth: depth 42 ft. three 10-in. and two 12-in. cargo lines
No. 2 Berth: depth 55 ft. six 12-in. cargo lines
No. 3 Berth: depth 34 ft. six 8-in. and one 4-in. cargo lines
Gulf swinging ground dredged to 42 ft.

Amoco

No. 1 Berth: depth 68 ft. four 16-in. crude lines; two 12-in. and three 8-in. product lines.
No. 2 Berth: depth 38 ft. one 12-in., two 10-in., three 8-in. and one 6-in. product lines.
No. 3 Berth: depth 22 ft. two 8-in. and three 6-in. product lines.
Amoco swinging ground dredged to 32 ft.

DENSITY: 1025.

FUEL: All terminals, Amoco, Gulf, Texaco, B.P. and Esso supply all grades of bunkers.

FIRE PRECAUTIONS: Fire wires to be rigged fore and aft.

GANGWAY/DECK WATCHMEN: Supplied if necessary – very rarely.

CERTIFICATES:

Register.
Load Line.
Safety Radio.
Safety Equipment.
Light Dues, etc.

CUSTOMS ALLOWANCE: Tobacco, 0.5. oz. per man per day. Wine/Spirit, 0.25 pint per man per day.

IDENTIFICATION CARDS: Not necessary.

CONSULS:

Norway	tel.	Milford Haven 2313
Belgium	,,	Milford Haven 2313
Spain	,,	Pembroke Dock 2603
Italy	,,	Milford Haven 4371

REPAIRS: All types of deck and engine voyage repairs carried out.

DRY DOCKS: One dry dock at Milford, 600 ft. × 63 ft. × 18 ft.

REPATRIATION: Crew changes frequently carried out and repatriation arranged.

AIRPORT: Nearest airport at Rhoose (near Cardiff) distance approximately 100 miles. Flights to London, etc., for onward connections.

TIME: Local Time is BST (GMT plus 1 hour). GMT during Winter months.

HOLIDAYS: Standard U.K. Holidays. Cargo work can be arranged on these days.

POLICE/AMBULANCE/FIRE: Police Milford Haven 2351, Pembroke Dock 2121; Ambulance Haverfordwest 3347; Fire Haverfordwest 2131.

TELEPHONES: No telephones on board. Public call boxes exist on all jetties.

GENERAL: Anti-oil Pollution plan in force with facilities for dealing with any oil pollution.

SERVICES: Compass adjusting. D.F. calibration. A "Scamp" underwater hull cleaning service is available.

N.B. Crew directed by rail to vessels at Angle Bay (B.P.) or Pembroke (Texaco) should be directed to Pembroke Station. For vessels at Esso, Amoco and Gulf Terminals, crew should be directed to Milford Haven.

SHORE LEAVE: Shore leave allowed.

AUTHORITY: Milford Haven Conservancy Board.

AGENT: G. S. Kelway Ltd., Murray Crescent House, The Rath, Milford Haven SA73 3JR, Dyfed. Tel: Milford Haven 2313/4. After hours: Milford Haven (06462) 5587, 2615, 2364. Telex: 48213. Cables: "Kelway Milford Haven."

MONTROSE: 56.42 N. 02.17 W. **(See Plan Book)**

PORT LIMITS: The port is bounded by a line drawn in a NW'ly direction from Scurdie Ness lighthouse to the Annat Bank and thence by both banks of the river to the road bridge which completes the inner boundary.

DOCUMENTS:

1 Crew List,
1 Passenger List,
1 Store List,
1 Personal Effects List for baggage coming ashore,
1 Manifest or Bill of Lading.
Ships Register, Load Line Certificate, Radio Certificate and LSA and Safety Certificates to be sighted.

PILOTAGE: Pilotage is compulsory. Pilots are available throughout the 24 hours. International Code Flag "G" to be exhibited.

Vessels should approach the port to a position with Scurdie Ness lighthouse bearing 250° distance 0.5 mile where Pilot will normally board.

Pilot cutter *"Celurca"* has a dark blue hull with white upper works and "Pilots" painted in black on each side of the wheelhouse. The normal red and white pilot flag is flown during daylight and regulation lights exhibited at night. VHF Channel 16 for calling with a working frequency on Channel 12.

In bad weather it may be necessary for a ship to proceed inwards at the radioed directions of a Pilot to a position on the outer leading marks and inside the lighthouse where the Pilot may board safely. This will only apply during periods of strong Easterly gales and very heavy seas and may be applicable for only a few times in a year. Similarly the port may be closed under severe weather conditions on average 2.5 days per year.

ETA messages: Masters should cable Agent with 24 hours notice of arrival giving overall length and deepest draft and also call Montrose Harbour Radio within 2 hours of arrival at the pilot station.

ANCHORAGE: In position mentioned above with Scurdie Ness bearing 250° distance 0.5 mile, in about 13 m.

MAX. SIZE: Since the harbour was reconstructed and deepened ships of 385 ft. LOA and 5,500 tons have been handled on a draft of 18 ft. Proportionately smaller ships are handled in the wet dock, berthing about 2 hours before HW and unberthing on HW.

HEALTH: "Q" flag to be flown when coming from a foreign country until cleared inwards. In event of disease or fever warn Agents by radio. Strict attention paid to quarantine regulations regarding dogs which are not allowed ashore.

Also see "Health – all ports" before first UK port.

RADIO: Messages to Agents may be sent through Stonehaven Radio. Harbour service is on Channel 12. Call Montrose Harbour Radio on Channel 16.

RADAR/VHF: No port radar service. Harbour service and pilot vessel work on VHF Channels 16 and 12.

TUGS: Pilot vessel is equipped with towing hook and pusher bow to assist in berthing and unberthing if necessary. Vessels lines used. Small charge made for such work.

BERTHING: Dockside Quays No. 1 and 2, 127 m., No. 3, 88 m., No. 4 and 5, 137 m., No. 6, 63 m.

Wet dock berths retained at approximately 14 ft. of water.

North River Side Quays No. 7, 50 m., No. 8, 40 m., (Unused at present), No. 9, 75 m., No. 10/11, 140 m.

Depths vary from 10 ft. at No. 7 to 16 ft. at Nos. 10 and 11 at chart datum.

South River Side Quays. Berth Nos. 12, 13, 14, 15, 16, 17 and 18. These are extensively used by oil related vessels and this area of the harbour has been leased to Sea Oil Services Ltd.

Total wharf length available is 1,600 ft. with depth alongside 20 ft. at MLWS.

STEVEDORES: Provided by Agents J. M. Piggins & Co. Ltd., phone Montrose 2827 Telex 76251.

CARGO HANDLING FACILITIES: The stevedores are well equipped with mobile cranes, fork lifts, etc., and only rarely is ship's gear used unless it is of rapid, modern type. Grab discharge is used for bulk cargoes and conveyor belt systems for loading same.

Rates of loading or discharge:— Bagged cargoes 250 tons per gang per day; Bulk 400 tons; Bulk grain loading 700 tons; Unitised pulp 500 tons; Paper 500 ton; Timber 500 tons all per gang per day.

There is always available a large motor transport fleet at the port and the Agents also have their own road haulage company.

TANKERS: There is no oil berth in the harbour except the facilities offered by Sea Oil Services for the receipt into their 3,000 ton storage depot of gas oil.

MEDICAL: Small hospital in Montrose. Several major units within easy reach by road.

DENSITY: At high water average 1024 but can be as low as 1005 at low water during heavy river outflow.

FRESH WATER: Supplied from Quayside hydrants at all berths.

FUEL: Obtainable from road tanker, gas oil and H.S.D. from more prominent oil companies. Rix Oils can supply gas oil from local stocks. Contact J. Piggins.

FIRE PRECAUTIONS: Normal rules to be observed.

CONSULS: None in Montrose.

GANGWAY/DECK WATCHMEN: Can be arranged. Owing to range of tide on riverside berths mooring watch strongly recommended.

OPENING/CLOSING HATCHES: Normally done by ship's crew.

CERTIFICATES: On arrival ship's register may be asked for.

CUSTOMS ALLOWANCE: As arranged between Customs Officer and Master.

CARGO GEAR: The port is equipped with mobile cranes which can be used at any berth. These are of various capacities and the maximum lift is 25 tons for which prior notice is required.

IDENTIFICATION CARDS: Not required.

REPAIRS: Minor deck and engine repairs can be carried out.

DRY DOCKS: None.

SURVEYORS: Classification Society Surveyors can be called in at reasonable notice.

REPATRIATION: Facilities available with excellent railway connections. Air connections from Aberdeen.

AIRPORT: Aberdeen 36 miles. Montrose has facilities for light aircraft and helicopter landing.

TIME: GMT with 1 hour advance for British Summer Time, approximately March to October.

HOLIDAYS: *Port Holidays:* Christmas Day; Boxing Day; 1st and 2nd January; One day Spring, Mid-Summer and Autumn Trades Holidays.

POLICE/AMBULANCE/FIRE: Report to Dock Office immediately. Dial 999 and ask for whichever emergency service required.

TELEPHONES: Not possible to place phones aboard. Kiosk on Wharf near Agents office. Comprehensive connections to Continent and Telex services from Agents office.

SERVICES: Laundry, Ship Chandlers and Lloyds Agent immediate.

Compass Adjuster, Radio/Radar Mechanics can be called in from Aberdeen at short notice.

SHORE LEAVE: No restrictions on crew members after inward clearance.

AUTHORITY: Harbour Master, and General Manager, Montrose Harbour Board.

NEWHAVEN: 50.47 N. 00.04 E. (See Plan Book)

PORT LIMITS: A line drawn from a position 300 ft. South of breakwater in a 075° direction to Seaford Bay.

DOCUMENTS: See "London".

PILOTAGE: Trinity House Pilots, Newhaven District: VHF "Newhaven Radio" Channels 16 and 12. Pilot boats are small fast launches painted red and white. Light and sound signals for a Pilot is "G". Notice of ETA 12 hours before arrival, if possible. Anchorage for a vessel awaiting a Pilot is 0.5 to 1 mile S.W. of the breakwater, depending on weather conditions. Pilots normally board S. to S.W. of the breakwater, but in severe gale conditions they keep station 100 m. from breakwater end, and guide vessels in with VHF or lamp. Notice should also be given to the red and green signal lights at the West Pier end lighthouse, and on no account should vessels pass breakwater end if signal is at red. In normal weather, pilot ladder should be on lee side about 1 m. above water. In Southerly gales Pilots prefer a ladder on each side, if available.

RESTRICTIONS: 3 fathoms through entrance to port LWOST. Inner harbour then dredged depth of 13 ft. in accordance with chart datum 11.40 ft. above OD Newlyn.

MAX. SIZE: Max. LOA 520 ft. 25 ft. draft taking bottom on soft mud at low water. Vessels greater than 350 ft. LOA length must either be towed into or out of port. Vessels for North Quay must not exceed 250 ft. length, draft 17 ft.

HEALTH: See "Health-all ports" before first UK port.

RADIO: Radio Station Newhaven Radio, call sign Newhaven Radio.

RADAR/VHF: No radar service. Ship's may contact West Pier control point on Channel 16, working on Channel 12.

TUGS: One tug available upon request, owned by Sealink U.K. Ltd.

BERTHING: Vessels may be berthed at any time, with prior notice given.

BRIDGES: Vessels requiring to berth at North Quay must arrive within 2 hours either side of high water in order to pass through swing bridge which governs access to this quay.

STEVEDORES: ETA should be given as far in advance as possible and not less than 24 hours before ETA.

DENSITY: Salt water.

FRESH WATER: Available on request. Supplied by shore hosepipe.

FUEL: Available by previous arrangement.

FIRE PRECAUTIONS: Usual no-smoking precautions on quayside in port area.

GANGWAY/DECK WATCHMEN: Not provided by Port Authorities but recommended at discretion of Ship's Master.

CONSULS: Norwegian Vice-Consul and French Consular Agency.

REPAIRS: Repairs of a temporary nature only may be carried out by B.R. workshops, Ship & Industrial Repairs Ltd., Unit A3, Beach Road, Newhaven and C. R. Irving Ltd., Chapel Street, Newhaven.

AIRPORT: Nearest airport Gatwick, distance 30 miles. Served by regular airlines.

POLICE/AMBULANCE/FIRE: Police: Civil, Newhaven 5219; Port, Newhaven 4131 (extension: 229). Ambulance: 0830 – 1700 hrs., Lewes 5400; 1700 – 0830 hrs., Lewes 2819; Fire: 999.

SHORE LEAVE: Allowed.

AUTHORITY: Shipping and Port Manager, Sealink U.K. Ltd.

NEWPORT: 51.35 N. 02.59 W. (See Plan Book)

DOCUMENTS:

Crew List.
List of stores for individual crew members.
Cargo Manifest.
Cargo Plan.
Ship's Register.
Loading Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
United Kingdom Light Bills.

PILOTAGE: Telegraphic address – "Newpilots Barry". Advance notice required – 24 hours. VHF Channel – Channel 16 for contact, thence Channel 6 for conversation. Description of pilot boat – diesel launch, black hull, white superstructure, buff funnel and painted in white on bulwarks. Particular light or sound signals to be made by vessels requiring a Pilot – Code Signal 8, i.e. 3 longs 2 shorts. Pilot boat is located in vicinity of Breaksea Lightvessel, or in vicinity of Mercur Buoy, for small vessels. Maintain VHF contact (if possible) with pilot cutter and obey instructions with reference to positioning of vessel to facilitate boarding of Pilots.

ANCHORAGES: Large vessel should anchor in deep water to North of one Fathom banks. Deeper water anchorage (10 – 14 fathoms) in area between Breaksea Lightvessel and East 1 Fathom Bank Buoys to the South, and shallow water off Barry Roads to the North. Small vessels will find safe anchorage in Barry Roads in varying depth, depending on weather conditions and draft.

RESTRICTIONS: Entrance to Newport Docks is by means of a sea lock 1,000 ft. long, 100 ft. wide.

MAX. SIZE: Max. size of vessels accepted at Newport is 800 ft. long, 96 ft. beam, 33.5 ft. draft.

HEALTH: Port Health Authority board vessel at entrance lock and pratique is automatic.

See "Health – All Ports" before first U.K. port.

RADIO: At sea – Land's End radio station, call sign GIL. Within Bristol Channel radio station Portishead, call sign GK– last letter according to frequency).

VHF: Vessels requiring entry can contact port on VHF radio Channels 16, 9 and 11.

TUGS: Normally join at Newport Deeps. Ship's line used.

BERTHING: South Dock, normal depth of water 35 ft. North Dock, normal depth of water 27 ft. Junction passage connecting South and North Dock restricts vessels to a max. size of 56 ft. 6 in. beam and 25 ft. draft.

BULK HANDLING FACILITIES: East Lock equipped with derrick crane of 32 tons capacity.

STEVEDORES: Labour is allocated to vessels on arrival.

MEDICAL: No advance notice of medical attention for crew members is required and hospital facilities are available.

DENSITY: Average density of water in docks is 1016.

FRESH WATER: Available at all berths.

FUEL: All classes of fuel available.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCE: Tobacco, 0.5 lb. per Crew member, reduced by 50% on coastal trade. 1 pint of spirit and 1 pint wine per Crew member, reduced by 50% on coastal trade.

IDENTIFICATION CARDS: Not required.

REPAIRS: All wet dock and engine repairs possible.

DRY DOCK: 454 ft. × 64 ft.

REPATRIATION: All facilities for the changing of crew and repatriation are available.

AIRPORT: Glamorgan Rhoose Airport terminal 28 miles from Newport. Regular connection planes to London Airport.

TIME: BST, GMT plus 1 hour. GMT in Winter months.

HOLIDAYS: Work not undertaken on Christmas, Easter, Spring and Summer Bank holidays. With the exception of Christmas holiday (25th and 26th December) dates on other holidays vary.

POLICE/AMBULANCE/FIRE: Telephone number 999 stating which service is required.

TELEPHONES: Telephone facilities are available aboard vessels.

SERVICES: Tank cleaning equipment. Facilities for tank washing, compass adjusting are available.

SHORE LEAVE: No restrictions to crew members.

AUTHORITY: British Transport Docks Board.

AGENT: Lambert Brothers Ship Agencies Ltd., 34/38 Stow Hill, Newport, Gwent NPT 1JE. Telex: 49213. Cables: Lambert Newport. Telephone: 0633 62221.

PLYMOUTH: 50.22 N. 04.90 W. (See Plan Book)

DOCUMENTS: Importer to supply Agent with Customs documentation, e.g. original B/L with cheque to cover various details; plus copies of Invoice and Forms C.105 with packing lists. Derating or Exemption Certificate required.

PILOTAGE: Compulsory for merchant vessels. Call sign FSG, or 4 short blasts on whistle. Vessels not subject to compulsory pilotage may obtain docking Pilot in Plymouth Sound otherwise pilot station off Penlee Point.

Pilot boat is motor boat with white upperworks, black hull. "Pilot" in black on wheelhouse.

ANCHORAGES: In Plymouth Sound.

MAX. SIZE: Maximum depth of water 9.0 m. Vessel drawing 8.0 m. would leave anchorage 2 hours before High Water. Also see "Berthing".

HEALTH: Pratique. Apply to Customs Waterguard. Pratique issued when requirements satisfied.

See "Health – All Ports" before first U.K. port.

RADIO: *Pilots:* The calling and listening frequency is 2,182 kHz and the working frequencies are 2,246 or 2,301 kHz. A listening watch is kept on 2,182 kHz at every even hour to 15 minutes past, local time and for longer periods when a ship is expected.

VHF: The pilot vessel is equipped with VHF and should be called on Channel 16; the working Channels 6, 8 or 12 should be used for passing messages. Alternatively the shore-based Trinity House pilot station, Plymouth, call sign "Cattewater Harbour Radio", maintains a continuous watch on Channel 16 (calling Channel) and is fitted with Channel 12 (first choice Port Operations Channel).

"Millbay Radio" operates 24 hrs., on Channels 16, 14, 13, 12 and 9.

TUGS: Available in Sound.

BERTHING: The Outer Basin at Millbay Docks is tidal and enters directly from Plymouth Sound. West wharf, 230 m. length, depth 9.0 m. LWOST.

Trinity Pier, 150 m. length
Mill Bay Pier, 140 m. length.

The Inner Basin, general depth of water 6.0 m., with 8.0 m. depth alongside a 185 m. length of wharf quay.

CARGO HANDLING FACILITIES: Silo for grain imports owned by Spillers Ltd. Calor Gas plant on North Quay for imports of butane and propane gas.

A roll-on/roll-off terminal is in operation.

Fish is discharged at Trinity Pier and Millbay Pier.

Victoria Bulk Wharves: Pier No. 1. Length 475 ft. Depth 20 ft. LWOST. Pier No. 2. Length 350 ft. Depth 20 ft. LWOST. Max. beam 38 ft. (Larger with prior notice.) Max. d.w.t. 3,000 tons. Bulk products loaded by conveyor ex-railway trucks and lorry.

Cattedown Wharves: Length 712 ft. Depth 24 ft.–26 ft. LWOST. Max. LOA 560 ft. Max. draft 26 ft. Max. size 12,000 GRT. 1×5-ton and 2×3-ton cranes.

Cattedown Wharves Radio on Channel 12, 16 and 18.

STEVEDORES: British Transport Docks Board: Commodities regularly handled include fresh fruit and vegetables, timber, scrap metal and general cargoes.

Imports: Fertilizer, clinker, pumice and bulk cargoes.

MEDICAL: No advance notice required; hospital facilities in Plymouth.

TANKERS: Vessels of the Shell "H" class can be handled at Cattedown Wharves. Max. draft 26 ft. Five hose connections, diameter 10 in. Two for black oil and three for white oil.

FRESH WATER: Available from shore at all berths.

FUEL: All normal grades available at short notice.

OPENING/CLOSING HATCHES: Performed by ship's crew or by stevedores at request of ship.

CERTIFICATES: Tonnage registration.

CONSULS:

Norwegian	65154	Greece	60604
Swedish	65154	Italy	63445
Spanish	65154	Netherlands	64846
French	65154	German	66444
Belgian	65154	Dominican Rep.	63175

REPAIRS: Ship repairing facilities available.

HOLIDAYS: Cargo work can often be arranged on Public Holidays subject to prior notice.

POLICE/AMBULANCE/FIRE: Telephone 999.

TELEPHONES: By special arrangement with the GPO, can be placed on board.

AUTHORITY: British Transport Docks Board for Millbay Docks, Cattedown Wharves for Cattedown Wharves and Bethyl Gwynn for Victoria Wharves.

POOLE: 50.43 N. 01.59 W. (See Plan Book)

DOCUMENTS: As for other British ports.

PILOTAGE: Pilots board 0.5 mile South of Poole Bar Buoy from cutter. Prefer ladder 0.50 m. from water and a good lee. VHF watch kept on Channel 16 working Channel 9. As much notice as possible. Address: Pilots, Poole.

ANCHORAGE: Vessels can anchor anywhere in Poole Bay and Studland Bay. Good holding ground and protected in all but Easterly gale.

RESTRICTIONS: Vessels drawing up to 4.0 m. can enter at any state of tide. Drafts of 5.0 m. must wait to within 2 hours of high water.

MAX. SIZE: Max. length 350 ft., beam – no limit, draft 5.0 m.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Vessels using the Port may call the Harbour Master direct on VHF Channel 16 – working frequency Channel 14 call-sign "Poole Harbour Radio". Channels 11, 6 and 9 also available.

TUGS: Join at Stakes Buoy, by special application arrangements can be made to join at North Haven Point. Ship's lines. No difference in charges.

Pilots will advise whether a tug is necesary or not. Any vessel in excess of 1,000 d.w.t. or 300 ft. LOA due to pass through the Poole bridge is required to take a tug. The gap in the bridge is 60 ft.

BERTHING: Berthing time depends on draft at some private quays. No restriction at New Quay or Ro/Ro berths.

New Quay:
Length: 520 ft. (157 m.).
Depth alongside: 16 ft. (4.9 m.).
Equipment: 3 ton capacity level luffing rail-mounted crane; warehouse facilities; open storage area 3,500 sq.m.; mobile crane capacity 200 tonnes.

Yard Quay:
Length: 192 ft. (58 m.).
Depth alongside: 10 ft. to 12 ft. 9 in. (3.0 to 3.9 m.).
Equipment: Warehousing facilities; limited open storage.

Ballast Quay:
Length: 270 ft. (82 m.).
Depth alongside: 14.6 ft. (4.4 m.).
Equipment: 6.5 ton capacity level luffing crane fitted with grab/hook for bulk handling/general cargo duties.

Poole Town Quay:
Length: 1,300 ft. (640 m.).
Depth alongside: 14 ft. to 16 ft. (4.3 to 4.9 m.).
Equipment: Pneumatic grainhandling plant; average discharge rate of 54 t.p.h., with transit storage capacity of up to 200 tons; mobile crane capacity 40 tonnes.

Bulwark Quay:
Length: 382 ft. (116 m.).
Depth alongside: 14.6 ft. to 16 ft. (4.4 to 4.9 m.)
Equipment: 25 ton Scotch Derrick; warehousing facilities; limited open storage.

Private Quays:
J. T. Sydenham (Timber Wharf)
Length: 250 ft. (76 m.).
Depth alongside: 15.3 ft. (4.6 m.).
Equipment: Mobile crane capacity 45 tonnes.

Other Private Quays:
Corrals (Fuel)
J. Bolson & Son Ltd. (Marine Repair & Engineering).
South Coast Sand & Ballast (Sea Dredged Aggregates).
Southern Ocean Shipyard Ltd. (Yacht Builders).
Carters Pottery (Pottery Ware).
Central Electricity Generating Board.

Oil Jetty:
Length: 270 ft. (82 m.).
Depth alongside: 16 ft. (4.9 m.).

BRIDGES: Poole Bridge at West end of Poole Quay. Will open at any time on request by commercial vessel.

STEVEDORES: Normal notice for gangs. No Sunday work.

MEDICAL: Advance notice required for ambulance services. Normal medical and hospital services available.

TANKERS: 3 oil berths. Diameter of load/discharge lines 6 in.

DENSITY: 1021.

FRESH WATER: Delivery 25 t.p.h. by 2 in. hose.

FUEL: Gas oil only.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Work carried out by crew.

IDENTITY CARDS: Not required.

CONSULS: At Southampton.

Swedish

REPAIRS: All types deck and engine repairs can be carried out. Slipways (2) available for vessels up to 220 ft. LOA by 40 ft. beam and 120 ft. LOA by 30 ft. beam.

AIRPORT: Charter flights for crew changes can be carried out from Poole/Bournemouth Airport 7 miles away from port.

POLICE/AMBULANCE/FIRE: Call 999 and ask for service required.

AUTHORITY: Poole Harbour Commissioners.

AGENT: John Carter (Poole) Ltd., The Quay, Poole, Dorset. Tel. Poole 4102. Telex 41176. Cables: Maritime Poole.

PORTSMOUTH: 50.48 N. 01.07 W. (See Plan Book)

DOCUMENTS: (Those marked* to be produced to H.M. Customs Boarding Officer.)

*1 Maritime Declaration of Health.
*1 Crew's Effects List C142.
2 Ship's Reports by Master.
*1 Home Office Form 1B6.
*1 Stores List.
*1 Certificate of Deck Cargo Tonnage.
*1 Grain Certificate.
1 Light Dues Certificate.
1 Port Dues Certificate.
*1 Passenger List.
*1 Landing Card for each non-British passenger.
*Ship's Certificate of Registry.
Mercantile Marine Office Certificate (British ships only).
*Load Line Certificate.
*Safety Equipment Certificate.
Lloyds Certificate.
*Derat Certificate.

Ship's Register.
Light Bills.
Safety Radio Certificate.
*List C143 for packages not cargo or crew/passenger effects.
*Danish Tollpass for ships arriving from Denmark.

Form of Authority for Agent to make Report and clear vessel outwards for Master.

Note: Where cargo is to remain on board for unloading at another port after Portsmouth, 3 copies of Ship's Report are required by the Customs House.

PILOTAGE: Portsmouth is within the Southampton and Isle of Wight Trinity House Pilotage District (see "Southampton" entry for limits of District) and a vessel liable to compulsory pilotage must employ a Pilot from and to the limits of the District. Non-compulsory vessels may obtain a Pilot in the vicinity of the 'Outer Spit' buoy. (Note: All vessels carrying explosives or petroleum products are compulsory from the 'Outer Spit' buoy and within the Harbour area, by Order in Council. This also applies to regular Home Trade vessels.) Ministry of Defence Pilots must be employed in addition for vessels using Admiralty berths or being assisted by Admiralty-owned tugs.

In addition to 48 hours notice to local Agent, advise Nab, Needles or Portsmouth Pilot, as appropriate, ETA 48 hours and again 2 to 3 hours immediately prior to arrival. The Nab, Needles and Portsmouth pilot stations are maintained by fast launches under the control of the Duty Pilot at the Pilot Station, 37 Berth, Southampton Docks. The Duty Pilot keeps a continuous watch on VHF Channel 16; call sign 'Nabpilot', 'Needlespilot' or 'Portsmouthpilot' as appropriate. Working frequency, Channel 9 only, but can listen on Channels 14, 12 and 6. No medium frequency: M/F and R/T messages via NITONRADIO. Duty Pilot's telephone numbers: Southampton 32345 and 32346.

The launches only put to sea when required. Failure to send an accurate ETA 2 to 3 hours before arrival could cause delay to the offending vessel.

Strict compliance with the requirements of the Merchant Shipping (Pilot Ladders) Safety Rules is requested by the Pilots, who may refuse to board vessels with unsatisfactory and dangerous ladders. Manropes are not required. Ladders should reach to about 3 ft. from the water, each rung resting firmly against the ship's side; a good lee should be provided whilst making approximately 3 to 7 knots headway.

In most cases, vessels bound to and from the Westward will find it more convenient to use the Nab or Eastern approach to Portsmouth. For details of entrances and pilot launches, see Southampton entry.

ANCHORAGES: Small vessels may anchor close Westward of the 'Outer Spit' buoy, unless prohibition signal flying – see "Restrictions". Larger vessels will be allocated a numbered anchor berth in the Spithead Man-of-War anchorage.

Historic Wreck: The wreck of the Tudor warship "Mary Rose" lies in Spithead, in the position of Anchor Berth 3. It is marked by a light-buoy, and anchorage within the area designated on the chart is prohibited.

If anchorage is prohibited in Spithead, St. Helen's Roads, Ryde Roads or Cowes Roads are the nearest safe anchorages. Mooring buoys 1, 2 and 3 off North Corner in the Harbour are sometimes used. Pilots will be fully informed before the vessel's arrival.

RESTRICTIONS: The following traffic signals are exhibited and must be complied with by all vessels. Shown by Central Signal Station (C), Blockhouse (B), Gilkicker (G), Dolphin Pier (D) and H.M. ships concerned (S).

Day	*Night*	*Meaning*	*Shown by*
Red flag with white diagonal.	Red Green Green	No vessel to enter or leave harbour or enter approach channel North of Outer Spit Buoy.	C B G
Red flag with white diagonal over black ball.		No vessel to enter harbour or approach channel. Outward shipping may proceed.	C B G
Black ball over red flag with white diagonal.		No vessel to leave harbour. Inward-bound shipping may proceed.	C B G
Black pendant.	White Red Red	No merchant or private vessel to anchor in man-of-war anchorage in Spithead.	G
Answg. Pendant over Pt 0.		All vessels North of Outer Spit keep clear of warship flying this signal	S
Answg. Pendant over Pt. 9.	Green Green Green	All vessels and boats keep Clear of H.M. ships under way.	C B G
Answg. Pendant over flags N E.	Green Red	Proceed with great caution, ships leaving Camber (Not ferries).	B
Answg. Pendant over flag A.	Red Red	Divers down, keep clear.	Diving boat.
Flag E	Orange	Submarine entering or leaving Haslar Lake. At night, light flashes when sub. under way. All vessels keep clear of submarines.	B D

Speed limit of 7 knots in harbour and when within 1,000 yards of shore; 12 knots within 1,000 yards of any H.M. ships and anywhere within the Dockyard Port not covered by the 7 knots limit. Dockyard Port boundaries are shown on Admiralty charts.

Time of entry is restricted by the vessel's draft and state of tide. Enter Camber only at 4 hours before high water or at high water slack. Vessels do not berth at South Railway Jetty from 2 hours before high water until high water.

MAX. SIZE: Commercial berths: Camber – length 270 ft., draft 16 ft. Flathouse – length 310 ft., draft 18 ft. Albert Johnson Quay – length 350 ft. depth at MLWS, 12.5 ft. Continental Ferry Port Ro/Ro Link span, length of quay 240 ft. Depth 17 ft. LWS max. LOA: 330 ft.

Vessels at the Camber, Flathouse and Rudmore wharves must expect to take the bottom in soft mud at low water Springs.

HEALTH: Foreign arrivals to complete Maritime Declaration of Health. They are cleared immediately on arrival by either a Port Doctor or an officer of H.M. Customs, depending on where ship comes from and whether there is sickness on board.

Vessels arriving from ports within accepted area (North European ports) and coastal arrivals need not present Declaration in all cases; when there is sickness on board, Port Health Authority must be informed, preferably not more than 12 nor less than 3 hours before arrival.

See "Health – All Ports" before first U.K. port.

RADIO: See "Southampton" entry for pilotage communications. Harbour Control is exercised through "Portsmouth Harbour Radio" for commercial traffic on Channels 16 and 11 VHF. Continuous watch is kept during office hours and from 00 minutes until +15 minutes of every hour when office is closed. Gilkicker Radio on Channels 16 and 14 is also available for commercial vessels, and all vessels entering the area bounded by the "Warner" buoy in the East and the "Sturbridge" buoy in the West should contact Gilkicker, even if only passing through the District. Channel 13 is the working channel for H.M. ships and the Q.H.M.'s office; call sign "Q.H.M.". H.M. ships are required to keep a listening watch on Channel 16 when in the Portsmouth and Southampton control areas, and will 'shift' to working frequencies selected by mutual agreement. Gilkicker is also equipped for visual signalling. Medium frequency calls to Pilots and Port Authorities only available by link call through Nitonradio.

TUGS: 200 ton tug with bollard pull of 2 tons (must be ordered well in advance of arrival) and several tow-boat launches are available for commercial vessels at commercial berths. Two 1,600 h.p. diesel paddle tugs, 5 screw tugs and 3 Voith-Schneider water tractors are available for larger vessels at Admiralty berths.

STEVEDORES: Registered dock workers and cranes must be ordered by 1500 hrs. on the day previous to commencement of discharge or loading, depending upon receipt of exact ETA from Master.

MEDICAL: All medical facilities available. Agent should be advised in advance. (See "Southampton" entry if arrival is solely to land sick personnel.)

CUSTOMS ALLOWANCE: As for "Southampton".

DENSITY: 1025 salt water.

FRESH WATER: Available.

FUEL: Fuel and Diesel Oils available by road tanker or bunker barge from Fawley.

FIRE PRECAUTIONS: Notices will be delivered to Master if berthing at any jetty where special precautions apply.

OPENING/CLOSING HATCHES: By ship's crew.

CRANES: 3 mobile cranes of 15 tons, 4 mobile cranes of 5 tons and 1 mobile crane of 2 tons capacity are provided by the Port Authority.

CONSULS:

Belgium
Denmark
Finland
France
Netherlands
Norway
Sweden

REPAIRS: Minor deck and engine repairs can be carried out locally. Larger repairs and dry dock facilities at Southampton.

AIRPORT: Fast train service from Portsmouth to London Airport. Eastleigh airport local, but mainly short flights to Channel Islands and feeder services.

SERVICES: All marine, radio and radar services can be obtained from Southampton.

REPATRIATION: All facilities exist.

TELEPHONES: None on board.

DEVELOPMENTS: With the opening of the Portsmouth section of the M27 and M275, there is immediate access to the Flathouse and Albert Johnson quays at the Rudmore Roundabout. At present, Thoresen operate daily services to Cherbourg and Le Havre, Brittany Ferries twice daily to St. Malo and Sealink daily to the Channel Islands.

AUTHORITY: Port Manager and Harbour Master, City of Portsmouth for Commercial berths.

PORT TALBOT: 51.35 N. 03.49 W. (See Plan Book)

DOCUMENTS:

Ship's Register.
Test Certificate for ship's gear.
Manifest.
Master's Report to be completed on arrival.

Customs and Health documents as required by H.M. Customs and Port Health Authorities, to be completed on arrival.

PILOTAGE: Station – Swansea Bay. Usual International signals. VHF Channels 16 and 12.

ANCHORAGES: Swansea Bay.

RESTRICTIONS: *Ore terminal* in New Harbour, entrance channel 1.5 miles long, 550 ft. wide. Depth 60 ft. MHWS, 53 ft. MHWN.

MAX. SIZE: *Ore terminal* – 100,000 tons d.w.t. ore carriers – draft 49 ft.

HEALTH: See "Health – All Ports" before first U.K. port.

TUGS: Off Breakwater.

BERTHING:

New Harbour. British Steel Corporation provide 3 unloading appliances on the jetty and also a conveyor-belt system to carry the iron ore to the stocking ground close to harbour and steel works. Grabs on the unloading appliances weigh 22 tons each, and each have a pay-load of 22 tons. The 3 discharging appliances together have an unloading rate of 5,400 t.p.h. Average rate throughout discharge from start to finish of the 3 discharging appliances together is 2,700 t.p.h.

STEVEDORES: ETA advices sent by vessels to local Agent and then advised to British Steel Corp. as stevedores. Labour ordered by Agent from B.S.C.

DENSITY: Ore Terminal 1025.

FRESH WATER: By gravity 10 t.p.h. Harbour pumping 100 t.p.h.

UEL: By barge or road tanker. Any grade available.
ANGWAY/DECK WATCHMEN: None, but bye-laws state that vessel nust be manned.
PENING/CLOSING HATCHES: Performed by crew.
USTOMS ALLOWANCE: Tobacco, 1 oz. per day per man, max. 8 ays. Wine/Spirits, 0.25 pint per day per man, every 4 days.
DENTIFICATION CARDS: Docks Police would require identification to e available.
ONSULS: None at Port Talbot, contact Swansea.
EPAIRS: Facilities exist.
EPATRIATION: All facilities exist.
IRPORT: Rhoose Airport 25 miles away. Mainly short trips connecting ith main airports.
IME: GMT plus 1 hour. GMT in Winter months.
OLIDAYS: It is the custom, at the Tidal Harbour, to work on Bank olidays.
OLICE/AMBULANCE/FIRE: Dial 999 and ask for service required.
ELEPHONES: Can be connected on board.
UTHORITY: Docks Manager, British Transport Docks Board.

CALLOWAY: 60.08 N. 01.16 W. **(See Plan Book)**

calloway is a small port on the Atlantic side of the Mainland of hetland. It is only 7 miles by road from Lerwick and many of the ervices are provided by the local shipping Agent (tel. 304).
ILOTAGE: Application for Pilot through Scalloway Harbour Radio, hannel 16 VHF. 1 hour advance notice. No particular light or sound ignals required. Usual station off Fugla Ness lighthouse on the island of urra. Alternative station at entrance to North Channel. Vessels waiting Pilot lie or anchor off Fugla Ness lighthouse.
NCHORAGES: Good holding bottom in Scalloway Bay.
ESTRICTIONS: No night time or tidal restrictions. Detailed and up to ate charts essential.
AX. SIZE: Only restriction, draft limit of 23 ft.
EALTH: See "Health – All Ports" before first U.K. port.
ADIO: Wick radio.
HF: Vessels should switch to Channel 16 VHF when in vicinity of arbour.
RANES: Mobile cranes available. Ships usually employ their own ranes.
ULK CARGO FACILITIES: Deep water berth 200 ft. long able to ccommodate vessels up to 300 ft. long. Minimum depth varies from 0 ft. at point of pier to 19 ft. at inner end.
TEVEDORES: Should be arranged through Agents.
EDICAL: Doctor based at Scalloway. Hospital at Lerwick.
RESH WATER: Available from standpipe. 10 t.p.h.
UEL: Marine gas oil by pipe or from road tanker. 1 hour advance otice.
EPAIRS: Most types deck and engine repairs.
LIPWAYS: Slip accommodation for vessels up to 180 tons.
URVEYORS: Lloyds represented at Lerwick.
USTOMS ALLOWANCE: See "Lerwick".
EPATRIATION: Facilities for effecting crew changes.
IRPORT: Sumburgh Airport 25 miles. British Airways several times aily. Tingwall Airstrip 3 miles.
OLIDAYS: Cargo or shipping operations not affected by holidays.
OLICE/AMBULANCE/FIRE: Dial 999.
ELEPHONES: No arrangement for placing telephones on board.
ERVICES: Compass adjusting.
HORE LEAVE: Crew members allowed ashore.
ENERAL: Local shipping Agent Mr. A. S. Fraser, Blacksness Pier. el. Scy 304. Pier Master: Magnus Tulloch. Roselea, New Rd. calloway. Tel. Scy 324.
UTHORITY: Shetland Islands Council, Lerwick.

CAPA FLOW, Orkney Isles (Flotta Terminal):
8.53 N. 03.05 W. **(See Plan Book)**

PERATOR: Occidental of Britain Inc.
OCUMENTS:
Maritime Declaration of Health (Form supplied by Pilot or Agent).
Vaccination List.
Immigration Form H.O. Form IS6.
Crew Lists — 2 required.
Ship's Stores List.
Crew Personal Effects Declaration, Customs Form C.142.
Last Port Clearance.
Ship's Register.
Load Line Certificate.
Safety Construction Certificate.
Safety Radio and Safety Equipment Certificates.
Deratisation Certificate.
Previous British Light Dues Receipts.

ustoms and Health: Weather permitting, Customs, Immigration, Health nd Agent will embark with the Pilot.

ustoms House: Customs clearance inward and outward will be the esponsibility of ship's Agents.

Light dues will be paid by the vessel.

argo Documents: Bills of Lading; Cargo Manifest, Quantity and Quality eport; Tanker Time and Loading Report; Certificate of Origin; Ship's argo and Ullage Reports; Master's Receipt for Shipping Documents nd Documentation Transmittal Reports will be prepared by Company epresentative.

Ship's Agent: All ship's business other than Cargo and Customs documentation and the shipping documents under section above will be conducted by the ship's Agent.

EDP: Early departure procedures apply to most vessels. Blank Bills of Lading are signed by the Master on arrival, and the tonnages inserted on completion of loading.

PILOTAGE: Pilot vessels *Scapa Pilot* and *Scapa Patrol* watch VHF Channel 16.

Inside pilot station (58° 46′ N., 03° 07′ W.) located 2.0 miles 180° from Cantick Head Lighthouse.

Unfamiliar vessels, VLCC's, also any vessel without full information about the unusually strong currents in Pentland Firth is recommended to embark the Pilot at the appropriate outside position (Refer to Tidal Stream Atlas, Admiralty Publication H.O. Number NP 209).

Port restrictions which may cause delays: Weather preventing embarkation of Pilot at either inside or outside positions.

Local wind conditions in Scapa Flow preventing a safe approach to the berth.

Remarks: In Scapa Flow the weather conditions, in particular the wind, can change suddenly and quickly deteriorate, not only in Winter but at any time of the year.

Mooring Masters: A Company Mooring Master will board vessels to the Northward of the Calf of Flotta or at her designated anchorage within Scapa Flow prior to berthing at any Terminal Facility. A Company Mooring Master will be on board during the time that a vessel is moored and he will liaise between the Terminal and ship personnel throughout any deballasting, loading or discharging operation.

The Company Mooring Master may ensure that Masters of vessels are familiar with, and strictly observe, all local regulations concerning the safety of operations and pollution of the sea by oil whilst laid at the Company's facilities.

Vessels using the Company's facilities are required to provide the Mooring Master with accommodation and messing of a standard equivalent to that enjoyed by the vessel's officers.

ANCHORAGE: Inside Scapa Flow several anchorages are available depending upon prevailing winds. Sea anchorage outside, in the approaches to the Pentland Firth, is not possible.
APPROACHES: The approach to the Terminal is through the Pentland Firth from East or West, and then Northward through Hoxa Sound, the main entrance to Scapa Flow. Consult Admiralty Sailing Directions Vol. 1, and Admiralty Tidal Stream Atlas for Orkney and Shetland, Publication No. 209. Principal charts are as follows and Decca coverage is available: Admiralty Chart Nos. 2162, 2581, 35.
MAX. SIZE: See "Berthing".
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Arrival Notices.

Pilots: By coastal radio station 24 and 12 hours prior to arrival. VHF contact at least 3 hours prior to arrival at the pilot station.

Terminal: By coastal radio station 7 days, 72, 48 and 12 hours prior to arrival at the pilot station.

VHF contact should be established at least 3 hours prior to arrival at the pilot station.

The Terminal must be advised by VHF via the "Harbour Control", when the Pilot has boarded or when 6 miles from Stanger Head at the entrance to Hoxa Sound.

INFORMATION REQUIRED PRIOR TO ARRIVAL:

Radio advice prior to arrival: Terminal operated by Occidental of Britain, Flotta Terminal, telex 75212 (OXYOPS G), via Portishead Radio, of ETA with following details. Also advise Agent of ETA, drafts fore and aft for arrival, and any immediate requirements on arrival.

aaa – Arrival and sailing drafts.
bbb – Gross, net and Summer d.w.t.
ccc – Last port and destination.
ddd – Cargo requirements in metric tonnes.
eee – Maximum loading rate.
fff – Grade of previous cargo.
ggg – Quantity of slops, water content, where stowed, if detergents used during tank cleaning.
hhh – Quantity of clean cargo tank ballast and geographical position uplifted.
jjj – Quantity of permanent ballast and geographical position uplifted.
kkk – Total time for deballasting.
lll – Possibility to load and deballast simultaneously maintaining a 2 valve separation?
mmm – Number and size of cargo manifolds.
nnn – Availability of reducers to adapt manifolds to suit 16 in. (150 ASA) flanges (3 required)?
ooo – If bow mooring device fitted, diameter of pin and width jaw end link of mooring 80 mm. in diameter (2 mooring lines required forward).
ppp – Maximum 10 tons SWL derrick required on portside.
qqq – Accommodation ladder rigged on starboard.

Update ETA 48 hours and 24 hours prior arrival.

VHF: *Harbour Pilots and Harbour Control:*
VHF Listening: 16 Telex: 75412
Working: 9, 11 and 20

Mooring Masters/Terminal:

Mooring Masters	161.15	Private Frequencies Only
Terminal	161.30	
Loading Operations	161.15	Private Frequencies Only
,, ,,	161.30	

N.B. Launches are fitted with VHF Listening Channel 16
Working Channel 14, 12, 8, 6

TUGS: 3 tugs (2 × 37 ton bollard pull and 1 × 45 ton bollard pull) are available, and compulsory, for berthing. They are fire fighting tugs and equipped with Warren Springs pollution dispersent equipment.

Whenever a tanker is on a berth, 1 stand-by tug is anchored in the close vicinity for safety and pollution purposes. Fire wires must be rigged off-side forward and aft.

1 tug (standby tug) is towing aft whilst tanker is moored to SPM.

READINESS: *Notice of Readiness to load/discharge:*

Notice of Readiness will be accepted subject to the following conditions;—

a. The Terminal is open (this decision shall be communicated to the Master of the vessel by the Company).

b. i) The vessel has been boarded by the Company Mooring Master prior to her proceeding towards the berth *or*

ii) The vessel has anchored within the anchorage area awaiting a berth.

N.B. Although vessels will be loaded in order of Acceptance of Notice of Readiness, it should be borne in mind that Acceptance of Notice of Readiness is contingent upon complete compliance with all the requirements of Port Conditions.

c. Acceptance of Notice of Readiness may be withdrawn by the Company upon the occurrence of any of the following events:—

The decision by the Mooring Master that the vessel's drafts, equipment and/or appurtenances are not suitable for berthing at the Terminal. If this decision has not been taken, for reasons within the Mooring Master's control, within 24 hours from Acceptance of Notice of Readiness, the Company shall be deemed to have waived its right to withdraw acceptance under this sub-paragraph.

Any supervening decision of the Harbour Authority which prevents the vessel from berthing.

N.B. A derrick or crane with a safe working load of not less than 10 tons is required for handling hoses at the SPM berths.

BERTHING:

Position:

SPM 1: Lat. 58° 52′ 11.86″ N. Long. 3° 07′ 20.68″ W.
SPM 2: Lat. 58° 52′ 17.72″ N. Long. 3° 05′ 47.79″ W.

Main Control Building (Radio Mast): Lat. 58° 50′ 31.05″ N. Long. 3° 07′ 08.01″ W.

SPM Particulars:

Pillar Type Single Buoy Mooring – 2.
Tanker Size – 35,000 – 200,000 d.w.t.
Minimum Water Depth – 75 ft.
Max. Draft – 72 ft.
Mooring System – 10 m.×3 in. chain, 40 m.×21 in. rope grommet, 10 m.×3 in. chain and 6 m.×2⅝ in. chain.
Crude Manifolds – 2×16 in.
Ballast Manifolds – 1×16 in.
Maximum Loading Rate – 80,000 bbls.p.h.
Hose Weight – Minimum 7.5 tons
Ballast connection is positioned aft of the 2 crude connections.

A load monitoring system is fitted to each SPM giving constant strain readings to the Terminal Control Room and the Mooring Master on board the tanker. In adverse weather conditions strain gauge readings will indicate when vessel should prepare to vacate the berth.

LPG/Crude Oil Jetty:

Finger type jetty with breasting dolphins.
Tanker Size – 4,000 – 150,000 d.w.t.
Minimum Water Depth – 63 ft.
Maximum Draft – 62 ft.
LPG Manifolds – 1×10 in. loading plus 1×10 in. vapour return.
LPG Loading Rate – 10,000 bbls.p.h.
Crude Manifolds – 4×16 in.
Crude Loading Rate – 80,000 bbls.p.h. maximum.
Ballast Manifold – 1×16 in. (crude gantry only).
Maximum Deballasting Rate – 40,000 bbls.p.h.

Terminal Capacity:

1. Crude Oil:

There are 5 tanks, each of 500,000 bbls. nominal capacity for storage of stabilized crude oil, plus a further 2 of 1,000,000 bbls. each.

2. Liquid Petroleum Gas:

There are 2 tanks, each of 100,000 bbls. nominal capacity for storage of propane.

3. Ethane:

There are 5 ethane tanks, each of 500 cu.m. nominal capacity.

Remarks: In certain current and wind conditions on the SPMs, it may be desirable to keep the propeller turning very slowly astern to prevent overriding, or, possibly some revolutions ahead in an attempt to reduce the tension in the mooring chain during strong winds.

When ship's piping does not permit the pumping of permanent ballast through the manifold, the possibility to load some cargo prior to deballasting the cargo tanks' clean ballast may be granted by prior arrangement with the terminal. In all cases where ships intend to deballast and load simultaneously there must be at least a 2 valve separation.

DENSITY: 1025.

MOORING AND HOSE HANDLING:

On SPMs: Ship's derrick and manifold connections will require to be prepared on the port side. An accommodation ladder will be rigged to starboard with a pilot ladder ready to port.

Securing equipment for single chain mooring forward and hose connecting gear will be hoisted on board from Company work launch by ship's derrick. A good mooring line will be required from forecastle head as a messenger for the buoy mooring.

Tanker Loading Pier: The loading pier is equipped with rigid articulated pipe arms mounted on gantries for loading liquid petroleum gas and also for loading crude oil. The crude oil gantry is also fitted with a ballast discharge arm.

There is an access roadway between the Pier head and the shore. Mooring lines are run to dolphins by terminal mooring boats. Vessels with tension winches when moored at the pier must have winches on 'Manual brake'.

Arrival Draft: Vessels must arrive at the Company's facility in an adequate ballast condition compatible with safe manoeuvring during handling. Excessive trim or insufficient ballast could incur delay until such time as an acceptable condition is reached.

BALLAST: All berths are equipped with water ballast discharge lines. There is a water ballast tank of 500,000 bbls. capacity and a ballast treating facility capable of handling 40,000 bbls.p.h. It is prohibited to discharge water ballast into Scapa Flow.

Bilge Ballast Discharge: Vessels should arrive in Scapa Flow with clean ballast only.

The discharge of bilges and/or ballast by vessels into Scapa Flow is strictly prohibited.

N.B. All ballast water including permanent ballast must be discharged through the Terminal ballast reception and cleaning facility.

Discharge of ballast and simultaneously lifting of cargo is not permitted unless approval has been given by the Mooring Master.

The salvage in ballast shall become the property of the Company, in consideration of the Company's operation of the Terminal ballast reception and cleaning facility.

MEDICAL: Medical and dental services are available by arrangement. Hospital facilities are available at Balfour Hospital, Kirkwall.

FRESH WATER: Not available.

FUEL: Bunkers not available at present, but lubricants in small quantity available. Ships should cable requirements to Agent as soon as possible.

REPAIRS: There are no dry-docking facilities available, but local engineering firms undertake minor repairs to machinery and equipment.

Immobilisation of engines: Not allowed on any of the berths, and not recommended when at anchor. When at the anchorage, however, in special circumstances, and provided the Harbour Master's permission is first obtained, it may be possible.

TRAVEL: There are daily air services, during the week, to Aberdeen, Inverness, Glasgow and Edinburgh from Kirkwall Airport. There is no service on Sunday, There is a daily ferry service from Stromness to Scrabster to connect with British Rail. During the Winter months there is no service on Sunday.

CONSULS: Denmark, Netherlands, Norway and West Germany.

LAUNCH SERVICES: Launch services from Flotta and SPM berths are available by arrangement with local Agents to Kirkwall/Stromness.

SHORE LEAVE: There are no restrictions on shore leave for ships' personnel. For vessels moored at SPMs arrangements can be made with the Agent for a launch service to be operated to the shore. For safety reasons, the boat selected for this service must have good stability, to prevent accidents in cases of hazardous boarding due to weather conditions.

SAFETY: Should communications fail, the Mooring Master will authorise continuous soundings of the Ship's whistle or siren as a signal to stop loading (ships in the vicinity capable of so doing should inform the Terminal Control by VHF that this signal is being sounded in case it is inaudible ashore). Ships hearing the signal and unable to contact the Terminal should inform "Harbour Control".

SERVICES: Stores are of good quality, and the laundry facilities are good, but limited. Tank cleaning and dirty ballast facilities are not available.

GENERAL:

Accidental Spills and Leakage: All oil spills and leakages must be immediately reported to the Mooring Master, who will inform the Harbour Authority forthwith. All deballasting/loading/discharging operations will be immediately suspended until the cause of the spill/leakage has been determined, and rectified to the satisfaction of the Mooring Master, and the Harbour Authority.

Galley and Other Refuse: Dumping of all refuse into Scapa Flow and approaches is prohibited. Refuse must be retained on board in sealed containers. (Vessels in port over a long period may make arrangements with their local Agent for collection).

Lighting: Sufficient lighting must be provided in the way of all overboard discharge points to facilitate detection of leaks or spillage. Adequate lighting must also be provided at the loading manifold.

Lifting of Stores; When tankships are at SPM's, loading or off-loading of stores, provisions, drums or any other goods or articles on, to or from the main tank deck is prohibited while cargo is being lifted.

Under certain circumstances and with the approval of the Company's Mooring Master, stores may be worked on the poop during the cargo lifting.

When tankships are moored at the pier, vessels and boats are prohibited from coming alongside during cargo lifting, unless all cargo operations are shut down, all tank openings are closed and secured, and permission from the Mooring Master has been obtained.

Working of stores over the pier will not normally be allowed.

During Loading/Deballasting Operations at SPM's: Mooring Masters will carry Company communication equipment. Ship's VHF must also be available to the Mooring Master at all times. Ship's whistle must be available throughout the time a Mooring Master is on board.

Emergency signals in the event of complete communication failure will be as follows:—

By day: Continuous blasting of ship's whistle accompanied by the hoisting of 2 black balls in a position conspicuous to the Terminal Control Room.

By night: Continuous blasting of ship's whistle accompanied by continuous flashing on an Aldis type signal lamp aimed towards the Terminal Control Room.

In the event of such a communication failure all loading operations shall cease until an effective means of communications has been established.

AUTHORITY: Orkney Islands Council, Kirkwall, Orkney.

AGENT: John Jolly, 21 Bridge Street, Kirkwall, Orkney Isles. Telegraphic Address: "Jolly Kirkwall Telex", Telex 75253. Tel. Kirkwall 2268 (24 hrs. answering service) and 3462. VHF call sign (Private frequency 161.25 mHz): Jolly.

SHARPNESS and GLOUCESTER: 51.43 N. 02.29 W. (See Plan Book)

The Port of Gloucester comprises the wet docks at Sharpness and Gloucester which are connected by a ship canal named "The Gloucester and Sharpness Canal".

PORT LIMITS: Sharpness Dock entrance.

DOCUMENTS:

1 Maritime Declaration of Health.
1 Crew's Effects List.
2 Ship's Report by Master.
1 Home Office Form 1B.6.
1 Stores Lists.
1 Certificate of Deck Cargo Tonnage.
1 Grain Certificate.
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List.
1 Landing Card for each passenger.
Ship's Certificate of Registry.
Mercantile Marine Office Certificate (British ships only).

In addition Manifests and Bills of Lading are usually sent to Agent direct from loading port.

PILOTAGE: Pilotage is compulsory. Masters of vessels bound for the Ports of Gloucester, Sharpness, Chepstow and Lydney requiring the services of a Pilot at the Barry Roads Station must give at least 24 hours notice of their intended arrival at the Pilot Station. Failure to give this notice could lead to a vessel being delayed. Draft and g.r.t. are also required. Masters who expect their passage time to be less than 24 hours should send advice from their sailing port with gross tonnage, draft, speed and ETA. Masters of vessels bound for Chepstow should also state mast height above the appropriate water line and whether masts can be lowered. (Vertical clearance limited by Bridge to 52 ft. (15.8 m) above MHWS)

Vessels are boarded at Barry Roads by the Cardiff Pilot Cutter which is equipped with VHF. Radio contact with the Cardiff Pilot Cutter should be made not later than 1 hour before arrival at Breaksea L.V. In fog ships sound "9" (4 longs, 1 short). Pilot replies the same. Masters can send ETA's direct to the Pilotage Agent, Sharpness. Telephone Sharpness 323.

Dock Pilots: Dock Pilots are available, not compulsory but advisable for berthing in Sharpness Dock, transit of the Sharpness Canal and in Gloucester Dock.

ANCHORAGES: Barry Roads afford good anchorage in moderate weather for vessels awaiting a Pilot.

RESTRICTIONS: Three feet water clearance over outer sill for vessels of maximum draft 21 ft. 6 in. Neap tides impose certain restrictions.

Beam	*Clearance Required*
Less than 10.36 m.	0.61 m.
10.36 – 13.71 m.	0.76 m.
13.72 – 16.76 m.	0.91 m.

Note: The River Severn at Sharpness dries out at low water.

MAX. SIZE: Maximum Length – no restriction. Maximum beam – 55 ft. Maximum draft – 21 ft. 6 in.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Niton Radio, Lands End Radio, Ilfracombe Radio.

VHF: Sharpness Radio Channels 16, 14 and 9. Range normally within pilotage waters only.

TUGS: *(River):* Larger vessels normally pick up tugs off Avonmouth if required by Pilot. *(Dock Tugs):* Not suitable for river work. Two tugs available in Sharpness Dock and for use between Sharpness and Gloucester if required. All tugs take ships lines.

BERTHING: Max. draft 21 ft. 6 ins. Fresh Water. Range of dock level 9 in.

Available Berths: 10 to 14 berths depending on ship length. This includes a Container berth and a scrap berth. Available length of Quay – 12,000 ft.

Cargo Equipment and Methods: Cranes 8 × 3 tons, 6 × 6 tons all Portal and 2 Scotch Derricks of 32 tons. Grabs, Slings and Pallets, etc. Load/discharge by shore gear.

BULK CARGO FACILITIES: 2 grain silos, 1 fixed suction plant. Belt driven elevators provided as required.

BRIDGES: 16 swing bridges between Sharpness and Gloucester. No mast height restrictions.

STEVEDORES: British Waterways Board.

MEDICAL: Absolutely necessary for Agent to have as much notice as possible if any medical attention is required. All facilities available.

DENSITY: 1000/1003.

FRESH WATER: Available by stand pipe, 20 t.p.h.

FUEL: Through Agents, 12 hours notice, most grades available.

FIRE PRECAUTIONS: According to local laws available on request.

CONSULS: See "Bristol".

REPAIRS: All types of deck and engine repairs are possible.

DRY DOCK: 360 ft. by 47 ft. by 14 ft. over blocks.

SURVEYORS: Most Societies are available.

GANGWAY/DECK WATCHMEN: Ships personnel, but watchmen can be arranged if necessary.

HATCHES: Opened by ship's crew.

CUSTOMS ALLOWANCE: As for other U.K. ports.

REPATRIATION: All arrangements through Agents.

AIRPORT: London or Birmingham within 2 hours. Local taxi service available.

TIME: BST is GMT plus 1 hour. GMT in Winter months.

HOLIDAYS: Easter (varies). May Day. Spring Bank Holiday (last Monday in May). August Bank Holiday (varies, usually last Monday in August). Christmas Day (25th December), Boxing Day (26th December). Work can usually be arranged on these holidays although unusual to work 25th/26th December.

POLICE/AMBULANCE/FIRE: Telephone 999 ask for service required.

TELEPHONE: No ship to shore connection. Public telephone kiosks available.

SERVICES: Taxi. Laundry. Ship chandlery.

SHORE LEAVE: Possible.

IDENTIFICATION CARDS: Not necessary unless being repatriated.

REGULATIONS: British Waterways Board Byelaws 1962.

GENERAL:

Gloucester and Sharpness Canal and Gloucester Dock:

Maximum size of Vessel: Length 205 ft. (62.5 m.), beam 31 ft. (9.45 m.), draft 11 ft. 6 in. (3.5 m.). Vessels exceeding these dimensions may be considered subject to Harbour Master's approval.

AUTHORITY: British Waterways Board, Dock Office, Sharpness.

SHOREHAM: 50.50 N. 00.15 W. (See Plan Book)

DOCUMENTS and all general information, refer to "London". Distance from London, 50 miles.

PILOTAGE: Trinity House Pilotage Service. Pilot Cutter equipped with VHF.

ANCHORAGE: Off Harbour. Depths as per English Channel Charts.

RESTRICTIONS: No night restrictions. Locks manned 4 hours either side of high water. According to size and draft these times can be extended by prior arrangement.

Main entrance channel, 400 ft. wide, leads into a 300 ft. channel to the Eastern arm, and a 135 ft. channel for the Western arm.

Dimensions of Prince Philip Lock: 374 ft. length, 57 ft. width.

MAX. SIZE: Length 347 ft. 06 in. Draft 22 ft. subject tide.

HEALTH: See "Health – all ports" before first UK port.

RADIO: Niton Radio/Northforeland Radio. ETA to Shoreham Harbour Master 24 hours prior to arrival.

When within VHF range advise Harbour Master (via "Shoreham Harbour Radio"), ETA, draft, beam, LOA and of any circumstances which may affect seaworthiness or handling capacity of the vessel.

Port operation and information service manned continuously, contact by VHF calling Channel 16, working Channel 14. Station is situated on the middle pier.

TUGS: One tug, subject to availability. Tug lines used for which no extra charge. Communications between vessel and tug take place on VHF Channel 6.

BERTHING: See "Restrictions".

Heavy lift crane, 35 tons capacity for container handling.

A bulk wine terminal capable of handling 1,250,000 gallons of wine is available.

A Ro-Ro berth has been constructed at the East end of Aldrington Basin.

STEVEDORES: Reasonable ETA is sufficient for gangs to be called.

MEDICAL: All facilities available.

DENSITY: Approx. 1025.

FRESH WATER: Available at most berths.

CONSULS: Danish.

AUTHORITY: Shoreham Port Authority.

SOUTHAMPTON: 50.54 N. 01.24 W. (See Plan Book)

DOCUMENTS:

1 Maritime Declaration of Health.
1 Crew's Effects List.
2 Ship's Report by Master.
1 Home Office Form 1B6.
1 Stores List.
1 Certificate of Deck Cargo Tonnage.
1 Grain Certificate.
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List.
1 Landing Card for each Passenger.
Ship's Certificate of Registry.
Mercantile Marine Office Certificate – for British ships only.
Load-line Certificate.
Safety Equipment and Safety Construction Certificate.
Lloyds Certificate.
Derat Certificate.
Ship's Register.
Light Bills.
Safety Radio Certificate.

In addition, Manifests and Bills of Lading are usually sent to Agent direct from loading port.

PILOTAGE: Compulsory, with usual regular Home Trade and other small exemptions. In addition to 48 hours notice to local Agent, advise Nab or Needles Pilot as appropriate, ETA 48 hours and again 2 to 3 hours immediately prior to arrival. The Nab and Needles stations are maintained by fast launches under the control of the Duty Pilot at The Pilot Station, 37 berth, Southampton Docks. Duty Pilot keeps a continuous watch on VHF Channel 16; call sign NABPILOT or NEEDLESPILOT as appropriate. Working frequency; Channel 9 only, but can listen on Channels 6, 12 and 14. No medium frequency: M/F and R/T messages via NITONRADIO. Duty Pilot's telephone numbers: Southampton 32345 and 32346.

The launches only put to sea when required. *Failure to send an accurate ETA 2 to 3 hours before arrival could cause delay to the offending vessel.*

The Nab and Needles stations also provide Pilots for vessels bound for Portsmouth, Cowes or other small ports within the Trinity House Southampton and Isle of Wight Pilotage District. The limits of the District are defined by a line drawn from a point 180° – 1 mile from Selsey Bill to a position in 50° 40′ N., 0° 57′ W. (Nab Tower), thence to a point 180° – 1 mile from Culver Cliff, thence to a position 180° – 1 mile from St. Catherine's Lighthouse and thence direct to Peveril Point, but excluding the Poole Pilotage District (q.v.).

Strict compliance with the requirements of the Merchant Shipping (Pilot Ladders) Safety Rules is requested by the Pilots, who may refuse to board vessels with unsatisfactory and dangerous ladders. Manropes are not required. Ladders should reach to approximately 3 ft. from the water, each rung resting firmly against the ship's side; and a good lee provided whilst making approximately 5 to 7 knots headway.

Eastern Approaches or Nab Tower. The station is maintained by 40-ft. fast launches, black hulls, white wheelhouses, showing international signals. VHF Channels 6, 9, 12 and 16. Vessels under 40 ft. draft are normally boarded between the "New Grounds" and "Dean Tail" light buoys, approximately 2 miles N.N.W. of Nab Tower, although in bad weather, boarding at the "Warner" buoy or St. Helen's Roads might be advised by the Duty Pilot. Launches operate from Ryde pier or from Portsmouth Harbour.

Vessels over 35 ft. draft are restricted by tide for time of entry, and will be advised by the Duty Pilot. Vessels of 40 ft. draft and over use the Nab Channel and a message advising Tanker Master of transit times will be sent by "Essoship Fawley" and confirmed prior to arrival by Duty Pilot by VHF.

The Nab Channel has a limiting depth of 39.7 ft. (although 43 ft. can be carried to West of centre line (1976)) below Chart Datum (April 1976). Pilot will board all vessels of 40 ft. draft and over in a position 2 to 3 miles South of the Nab Tower. Masters of such vessels are strongly recommended not to approach closer than 2 miles to the Nab Tower without a Pilot, owing to strong tidal streams. It is advisable for a deep-drafted ship to anchor 3 miles South of the Nab Tower if waiting for the tide. Advice will always be given on request to the Duty Pilot by VHF.

Pilot *will not* board vessels under 40 ft. draft outside the defined pilotage district unless specifically requested by the Master to do so. The additional "Out of District" charge for boarding beyond the normal limits will be debited to Owners.

Western Approach – Needles: Vessels drawing more than 31 ft. are advised to enter via the Nab. Masters are strongly urged not to proceed beyond the Fairway Buoy without a Pilot, especially on the flood tide. Safe anchorage in vicinity of "Fairway" Buoy.

Station maintained by 40 ft. fast launch, black hull and white wheelhouse, showing international signals. Launch operates from Yarmouth Harbour or Lymington. Needles pilot launch is fitted with VHF Channel 6, 9, 12 and 16. No medium frequency.

When it is considered that the weather is deteriorating to the extent that the boarding and landing of Pilots could in the near future become dangerous, a message will be sent to all ships through Nitonradio, as follows:

> "Needles Pilot operating bad weather routine. Vessels should ascertain at least 3 hours before their ETA Needles whether a Pilot will be available. This information can be obtained either through Niton Radio or direct from Needles Pilot on VHF."

If it is not safe to ship or land the Pilot at the Needles, Masters will be advised to proceed to the Nab.

In poor visibility a vessel requiring Pilot at either Nab or Needles uses a distinguishing signal of "G" to which the pilot launch will reply with "H".

GENERAL NAVIGATION: A Duty Operations Officer, responsible to the Dock and Harbour Master Southampton maintains a continuous watch in the Port Signal and Radar Station (37 Berth): call sign "Southampton Port Radio". He is to be informed prior to any movement to, from or within the port area and will give information on the movement of other vessels.

Harbour Radar Information and guidance will be given on request. The Radar reference line shown on the Admiralty Charts is superimposed on the Harbour Radar displays.

Particular attention should be paid by Masters to the designated "Reporting Points" marked on the Admiralty Charts. Reports should be made on VHF to Southampton Port Radio, to enable the proper identification and co-ordination of the ship movement, to be made to the benefit of all mariners navigating within the Solent area. This applies equally to naval and to non-compulsory vessels.

The following VHF Channels are operated within the port.

Southampton Port Radio: Channels 16, 14, 12, 18, 20 and 22.

Harbour Patrol Launch (Call sign Southampton Patrol) Channels 16, 14, 12, 10, 8 and 6.

Nab and Needles Pilot Launches: Channels 16, 14, 12, 9, 6 and 0.

Nab and Needles Pilot Stations: Channels 16 and 9. (Duty Pilot).

Southampton Pilot Launch (call sign Southampton Pilot) Channels 16, 14, 12, 9, 6 and 19.

Southampton Pilot Station (call sign Southampton Pilot) Channels 16 and 9 (Duty Pilot).

Tugs: When berthing vessels: Channels 71 or 74.

Esso Petroleum Terminal, Fawley: Channels 16, 14 and 19.

B.P. Oil Ltd., Hamble. Channels 16 and 14.

A patrol launch (Harbour Master flag by day, all-round blue light by night) is controlled by the Duty Operations Officer Southampton for pollution detection and keeping channels clear of pleasure craft for the passage of large vessels.

Vessels *(a)* drawing more than 10.5 m. *(b)* more than 288 m. in length or *(c)* of more than 100,000 d.w.t. exhibit a large black cylinder by day and 3 vertical red lights by night. Vessels showing these signals are not to be passed or overtaken within channel limits between the "West Bramble" and "Hook" light buoys, these vessels are considered to be constrained by their draft or restricted in their ability to manoeuvre and may not be able to comply with the Collision Regulations at other times. Will indicate inability by 5 short blasts on the whistle. "Clear channel" control is exercised by the Duty Operations Officer at Port Signal and Radar Station, 37 berth, Southampton Docks. The Thorn Channel has a limiting depth of 12.6 m. (April 1976) at low water datum.

Up to 7 vessels of under 91.4 m. in length are permitted with prior permission to anchor out of the channel to the East of the "Hook" Buoy in the designated Small Ships Anchorage, the limits of which must be strictly observed. Three numbered anchorages are available in an emergency for vessels not exceeding 168 m. in length in Fawley Reach, where vessels must moor to 2 anchors. Permission to use the Small Ships and numbered Anchorages must be obtained from the Duty Operations Officer, Southampton Port Radio.

MAX. SIZE: The largest passenger and container vessels call regularly at Southampton. Tankers: Fawley can accept partly loaded VLCC's up to 14.9 m. draft.

HEALTH: See "Health-all ports" before first UK Port.

TUGS: 2 tugs are permanently stationed at Fawley; if more than 2 tugs are required it should be noted that week-end requirements have to be advised to the tug operators not later than 1800 hrs. on Friday of each week.

If a vessel required more than 2 tugs and is due to arrive at Fawley between 0001 hrs. Saturday and 0900 hrs. Monday, ETA's must be submitted well in advance of 1600 hrs. on the Friday prior to arrival. It is usual to use the wires provided by the tugs for towing.

BERTHING: The Pilot boarding the ship at the Sea Station or anchorage will also berth the ship. Non-compulsory vessels can obtain or disembark a Pilot in the vicinity of the "N.W. Netley" or "Hook" buoys by contacting "Southampton Pilot" on VHF.

Dock or Quay	*Berths Nos.*	*Nominal Dredged Depth * below Chart Datum †*		*Length of Quays*

	67	5.0	16.5	103	340
	68-69	5.3	17.5	213	700

Other berths are available. Lesser draft berths not shown. The depths of water are maintained as far as practicable, but are subject to variation and are not guaranteed.

* To find the depth of water in the berths add the tidal rise to the depths shown in the above table.

† Chart datum is approximately the lowest low water level.

CRANES:

Type	*No.*	*Capacity in tonnes*
Container cranes	8	Up to 40
Quayside cranes	60	Up to 10
Floating crane	1	152
Dry dock cranes	8	Up to 51
Mobile cranes	4	10
Overhead travelling cranes	4	1.5

TANKERS: Esso Marine Terminal, Fawley. There are 9 berths at Fawley, all running parallel to the main channel. The 5 berths on the outside of the jetty facing the main channel are for ocean-going vessels, No. 1 berth being the most Northerly. The 4 berths on inside of jetty are for small coastal craft. No. 6 berth being the most Northerly.

The following LWD depths are dredged and subject to alteration:

	Alongside	*Approaches*	*Distance between Centres*
Berth No. 1	33.5 ft.	33.5 ft.	800 ft.
,, No. 2	37.5 ft.	35.5 ft.	800 ft.
,, No. 3	41.5 ft.	45.0 ft.	800 ft.
,, No. 4	49.0 ft.	45.0 ft.	800 ft.
,, No. 5	49.0 ft.	45.0 ft.	1,000 ft.
,, Nos. 6-9	18.5 ft.	18.5 ft.	400 ft.

Emergency quick-release swivel mooring hooks are used on the outside berths, where vessels moor with 2 head-and-stern-ropes, 3 breast-ropes at each end and 2 springs at each end.

Dredged channel for Berths No. 6-9 is 375 ft. wide.

Shore gangways are available on Berths 4 and 5 for vessels of 47,000 d.w.t. and over.

Dirty Ballast Facilities: Dirty ballast facilities on all berths with maximum storage of 14,000 tons.

Crew members are not allowed to walk through the Refinery. Transport is provided to Fawley Village and to Southampton at intervals during the day. There are no shopping facilities at the Terminal, although cigarettes are available from slot machines at the Marine Terminal Building. G.P.O. call boxes (coin telephones) are placed on the jetty.

B.P. Terminal, Hamble. Situated immediately opposite Fawley; has two main berths on the outside faces and a small coastal berth (No. 3) on the inner face of No. 2 berth. Berth No. 1 is the Northerly berth, and is used for larger vessels, having a depth of 31 ft. 6 in. below PLWD alongside and in the approaches. The berth face is 250 ft. long, so head or stern moorings are taken to 2 mooring buoys at the N.W. end of No. 1 berth. They are hook buoys; no lashings or mooring shackles are needed. No. 2 berth is similar in dimensions to No. 1 berth, the distance between centres being 530 ft. No. 3 berth is 250 ft. long, with 16 ft. 6 in. alongside at PLWD and 13 ft. in the approaches.

Facilities and services as for Fawley with the exception of transport no transport being available within the depot. Ship's personnel are allowed to walk through the installation to Hamble Village where public transport to Southampton is frequent.

All grades of fuel and diesel bunkers and fresh water available on all berths.

BUNKERS AND WATER: All grades of fuel oil and diesel oil are available and water is piped on all berths. Bunkers and stores can also be obtained by barge in Cowes Roads anchorage, but water is not readily obtainable there.

CONSULS:

Spain	Consul-General	Richmond House, (First Floor) Terminus Terrace, College Street SO1 1EJ Tel: 29510
Sweden	Vice-Consul	c/o Thos. Meadows & Co. Ltd., Royal Mail House, Terminus Terrace, SO9 4RB Tel: 25033

REPAIRS: All ship repairs can be effected. Largest dry-dock is 1,200 ft. long overall, 135 ft. wide and has 34 ft. over the blocks. Two other dry docks are maintained within the Port.

OIL POLLUTION: Southampton Water is an international yachting centre and has many holiday beaches on its shores. Consequently, oil pollution is treated very severely and heavy fines are imposed on offenders.

The Esso Refinery operates a clean-up service, the full economic cost of which is billed to the offending ship.

MEDICAL: Doctors and hospital facilities available. Agent should be advised in advance of any medical attention required.

An organisation exists for hospitalisation of sick seamen from vessels off Cowes, Isle of Wight. Arrange through Nitronradio, Nab, Needles or Southampton pilot or through vessel's Agent. Minimum delay to vessel.

CUSTOMS ALLOWANCE: By statute, crews of vessels in port are allowed 25 cigarettes per day per man. 0.3 litres (0.5 pint) of spirits and 1 bottle of table wine per day per man.

TIME: British Standard Time is GMT plus 1 hour, reverting to GMT in Winter months.

HOLIDAYS: Good Friday (variable date); Easter Monday (variable date); May Day; Spring Bank Holiday (variable date); Autumn Bank Holiday (variable date); Christmas Day (25th December); Boxing Day (26th December); New Year's Day (1st January).

POLICE/AMBULANCE/FIRE: Dial 999 from any telephone and ask for service required.

AUTHORITY: British Transport Docks Board.

AGENT: Keller Bryant & Co., Ltd., Havelock Chambers, 21/22 Queen's Terrace, Southampton. Telephone: (0703) 28566/7/8/9. Telex: 47568. Cables: Keller Southampton. After hours telephones: (0703) 734055, (0703) 557037, (0703) 25585.

STORNOWAY: 58.12 N. 06.22 W. (See Plan Book)

PORT LIMITS: Now extended to a line from Southern end of Holm Island on the East to Rugh A'Bhaigh Vaine on the West – approximately 7.5 cables to seaward of Arnish Point Light.

PILOTAGE: Pilotage not compulsory. Vessels requesting Pilot request same with ETA. Boarding off Arnish Point lighthouse.

ANCHORAGES: Anchorage in harbour between Goat Island and mouth of Creed River, 8 fathoms.

RESTRICTIONS: Entry night or day and at any state of tide. No bar on entrance.

MAX. SIZE: 400 ft. by 60 ft. by 22 ft. draft to berth alongside, 600 ft. length by 35 ft. draft for anchorage in bay.

HEALTH: The customary flying of "Q" flag.

Also see "Health – All Ports" before first U.K. port.

RADIO: Wick Radio or alternatively Oban Radio.

RADAR/VHF: R/T-VHF established in harbour, Channels 16 and 12. Emergency messages may be passed through Stornoway Coastguard on 81.8 m.

TUGS: No tugs available at port. Fishing vessels have been used, when necessary, for this purpose.

BERTHING: Vessels can be berthed at any time, provided berth is free.

Roll-on/roll-off ferry terminal for Stornoway/Ullapool service in operation.

Depth of water at low water spring tides: West side No. 1 pier: 24.5 ft. shallowing to 12 ft. at junction of North Beach Quay. East side No.1 pier: 24.5 ft. shallowing to zero at inward end. West side No. 2 pier: 17.5 ft. shallowing to zero at inward end. East side No. 2 pier: 16.5 ft. shallowing to zero at inward end. Inner Harbour decreases from 12 ft. at junction of Esplanade Quay to 8 ft. at upper end of Cromwell Street Quay.

STEVEDORES: Arranged by Agents on receipt of ETA.

MEDICAL: Advance notice desirable, Hospital facilities available in the town.

TANKERS: Normal safety requirements. One tanker berth only 15 ft. mean draft, max. length 220 ft.

DENSITY: Pratically always dead salt; 1025 density.

FRESH WATER: Fresh water available by hose at 15 t.p.h.

FUEL: 24 hours notice required.

GANGWAY/DECK WATCHMEN: Service of watchmen not necessary. Watchmen from shore may be employed if required.

OPENING/CLOSING HATCHES: Normally crew.

IDENTIFICATION CARDS: Not required.

CONSULS: French, Swedish, Norwegian; tel. Stornoway 2012, 2054, 3173 respectively.

REPAIRS: Minor deck and engine repairs can be carried out locally.

DRY DOCKS: No dry dock but one slipway of 750 tons displacement.

REPATRIATION: Facilities exist for this service.

AIRPORT: 3 miles from port, served regularly by British Airways from Glasgow, Aberdeen and Inverness.

HOLIDAYS: New Year's Day, Christmas Day and all other local Bank Holidays. Cargo work can be arranged except New Year's Day. (No Sunday work.)

POLICE/AMBULANCE/FIRE: Police, Stornoway 2222 (can deal with all three).

TELEPHONES: Can be arranged by prior application through Aberdeen office.

GENERAL: ETA to be sent 24 hours beforehand so that necessary arrangements can be made.

AUTHORITY: Stornoway Pier and Harbour Commission.

STRANRAER: 54.55 N. 05.02 W. (See Plan Book)

DOCUMENTS: As for other British ports.

PILOTAGE: Not compulsory.

ANCHORAGE: Deep water anchorage at Lady Bay.

MAX. SIZE: Largest vessel handled 420 ft. long. Working draft 15 ft.

HEALTH: See "Health – all ports" before first UK port.

TUGS: Not available.

RADIO: VHF watch kept on Channel 16 at Sealink Scotland Ferry Terminal. Working Channel is 14.

BERTHING: *East Pier:* 3 berths dredged to 15 ft. at L.A.T. One with vehicular ramp.

Ross Pier: Length 500 ft. Dredged to 16 ft. at L.A.T. Double tier vehicular ramp at this berth.

CARGO GEAR: Portable crane of 10 tons capacity.

MEDICAL: Medical Centre and hospital in town.

FRESH WATER: Available at East Pier.

FUEL OIL: Limited quantities of oil can be supplied from road tankers.

REPAIRS: Small repairs can be carried out by local engineering firm.

GENERAL: Inshore lifeboat based at Stranraer.

AUTHORITY: Stranraer East Pier and Ross Pier are controlled by the Sealink Scotland Shipping and Port Manager.

Stranraer West Pier is controlled by the Regional Council Harbour Master.

SULLOM VOE: 60.27 N., 01.17 W. (See Plan Book)

GENERAL: The Port of Sullom Voe is a major deep water commercial harbour. It is owned and operated by the Shetland Islands Council as Harbour and Pilotage Authority.

The Port Administration Building, from which all marine operations are monitored and controlled, stands on Sella Ness in position 60° 26.8′ N., 01° 16.5′ W.

Services offered by the port and financed through conservancy charges, include port radar, navigational advice to Shipmasters, intensity controlled navigational lighting to assist berthings in poor visibility, meteorological advice, shore access gangways and speed of approach docking equipment. Services offered and financed through separate charging structures include pilotage and mooring boat services. Boat hire can be arranged for vessels anchored or standing off. The towage service is operated by a separate towage company and financed directly through towage charges.

The harbour is designed to accept tankers up to 365 m. long with a draft of up to 22.6 m. Berthing facilities for large L.P.G. carriers will become available early in 1981. In addition to liquid bulk, the port is designed to handle general, dry bulk, ro-ro and containerised cargo. Total throughput in 1980 is expected to exceed 50 million tons.

There are 2 entrances to Yell Sound. The primary Northern route, suitable for large and/or deep drafted vessels, lies on the Western side of Yell Sound, and is marked by leading lights situated on Gluss Isle. The South Eastern approach is considered suitable for small vessels including coastal traffic.

Both routes merge at the entrance to Sullom Voe; the lead into the Voe is indicated by a sectored light situated at Skaw Taing and leading markers located on Fugla Ness. In the case of vessels other than coastal vessels, all manoeuvres South of Lamba Island will be assisted by tugs.

Ships will generally be berthed starboard side alongside at the oil loading berths. This will involve a 180° swing within the Voe; in a turning area marked by sectored lights which are located on Sella Ness and Scatsta Ness. Vessels may berth port side alongside during adverse wind directions, when their departure draft permits.

The turning area has a diameter of 800 m., and depth of 15 m. at LAT. For the purpose of manoeuvring within the pilotage district a minimum under keel clearance of 2.0 m. is required.

Although current rates of up to 7 knots may be experienced in areas of Yell Sound, records indicate that the maximum current likely to be experienced within Sullom Voe, on the deep draft route, is unlikely to exceed 1 knot. The tidal range within the Harbour Area is 2.3 m. at Springs and 0.6 m. at Neaps. The main tidal current flows to the South on the flood and to the North on the ebb.

Strong winds are frequently experienced at Sullom Voe and may be accompanied by sudden gusts from any direction. The prevailing wind direction is S.W.

It is essential that whilst alongside the jetty, moorings are tended carefully and regularly and conform with the recommended mooring pattern. (See "Plan Book".)

The Sullom Voe Oil and Gas Complex is located within the port limits on Calback Ness in position 60° 27.5′ N., 01° 17.0′ W., and is operated by BP Petroleum Development Limited on behalf of several oil company participants.

The oil reaching Sullom Voe through the Brent and Ninian Pipe-lines is collected from a group of oilfields located in the East Shetland Basin.

ADVICE TO MASTERS OF LARGE VESSELS:

a) Masters of tankers and gas carriers entering the Port of Sullom Voe are advised to refer to Charts BA. 3298 and 3297.
b) Navigation within the Pilotage District is prohibited unless the vessel is mechanically and navigationally sound, anchors have been cleared away and there is on the bridge a responsible person who can speak and understand English.
c) The Port of Sullom Voe is closed to tankers and gas carriers when wind speeds are frequently gusting in excess of 30 knots. Masters will be advised by Port Control in the event of Port Closure.
d) Vessels should afford a safe lee for the pilot boat during boarding and landing operations at the Northern Station – Reporting Point A ('Alpha').
e) At Reporting Point B ('Bravo') the Master should order the crew to stations fore and aft in preparation for securing tugs.
f) The bow and stern tugs will be made fast in the area of Reporting Point C ('Charlie') and the vessel's speed reduced accordingly.
g) The alongside tugs shall be secured by bow lines as soon as possible thereafter.
h) The vessel's speed must not exceed five knots South of a line joining Skaw Taing and Trumba Point.
i) Standard practice requires vessels to be swung on arrival (except when weather conditions dictate otherwise) and berthed starboard side alongside the jetty designated (see plans for mooring guidelines).

Note: Tugs will use their own lines for securing.

MINIMUM REQUIREMENTS: In order to avoid delays, all vessels programmed for Sullom Voe should comply with the recommendations of the Council of the European Committee for Vessels Transiting Community Seaports, and be fitted with:

(i) Fully operational radar.
(ii) Fully operational VHF radio with Channels 16, 14, 20 12, 10, and 9.
(iii) Sufficient crew to handle tugs' lines and moorings efficiently.
(iv) Efficient propulsion and deck machinery.
(v) Efficient and adequate moorings to secure vessel's safety.
(vi) Efficient signalling equipment.
(vii) Fully operational tachometer, rudder and helm indicators.
(viii) Efficient mooring stations communications systems.
(ix) An efficient anchor windlass and anchors.
(x) A complete and valid set of Safety Certificates.
(xi) All officers to be properly qualified and carry recognised certificates of competency.

Note: If any vessel cannot comply with any of the above, Sullom Voe Port Control should be advised prior to arrival or departure.

DOCUMENTS:

General Declaration (C13). In duplicate.
Ship Stores Declaration (C14). In triplicate.
Crew Declaration (C142). In duplicate.
Small Parcels List (C143). Single copy (if appropriate).
Self-Declaration Deck Cargo (DC1). In duplicate (if appropriate).

When the vessel is not boarded on arrival the Master must arrange for 1 copy of each form to be lodged within 3 hours of arrival at the Custom Office, located in the Port Administration Building at Sella Ness.

PILOTAGE: Pilotage is compulsory within the Sullom Voe Shetland Pilotage District. Masters of British registered vessels of less than 1,600 g.r.t. will be eligible to sit an examination to gain a Pilotage Exemption Certificate.

Vessels of less than 300 g.r.t. are exempt from compulsory pilotage under the conditions laid down in Section 12 of the Sullom Voe Pilotage Byelaws.

The district takes in the waters of Yell Sound and Sullom Voe, including all creeks, voes and inlets bounded on the North by a line drawn from the Northern extremity of the Point of Fethaland to the Northwestern extremity of Fogla Lee and in the S.E. by a line drawn from the Northwestern extremity of the Ness of Sound to the Northern extremity of Ulynarey Island and thence to the Northern extremity of Mio Ness.

All vessels entering or leaving the Sullom Voe Pilotage District are requested to contact Sullom Voe Harbour Radio initially on VHF Channel 16, whereupon they will be asked to change to a working Channel.

The traffic situation will be broadcast daily at 4 hourly intervals, commencing at 0000 hrs. local time on VHF Channel 20. Any vessel may, however, receive the traffic situation at other times on request.

Brief local weather forecasts will be broadcast at 0800 hrs. and 2000 hrs. local time on VHF Channel 20. Gale warnings will be broadcast when received and in the traffic broadcasts.

Any vessel intending to use the deep water channels marked by the leading lights of Gluss Isle, the white sector of Queyfirth Light, the white sector of Skaw Taing Light, the Fugla Ness leading lights or the Sella Ness leading light, for the purpose of fishing must report such intentions to Sullom Voe Harbour Radio and report at intervals not exceeding 2 hours while fishing.

Sullom Voe Harbour Radio maintains a continuous listening watch on the following VHF Channels: 16, 9, 10, 12, 14 and 20. Vessels should, where possible, refrain from using Channel 16 except for initial calling and Channel 10, which is designated for emergency purposes.

Pilots are available on a 24-hour basis. A continuous VHF watch is maintained. Call sign "Sullom Voe Harbour Radio".

Pilot Boarding Areas: There are 2 pilot boarding areas located in Yell Sound. Large vessels in excess of 180 m. LOA should rendezvous with the Pilot at the Northern entrance in a position with Point of Fethaland light bearing 260° (T) distant 1.6 miles. Small vessels intending to use the S.E. Channel should rendezvous with the Pilot off the entrance to Tofts Voe.

Pilot Boats: The Authority has 2 boats stationed for use at the Port of Sullom Voe.

(i) "Sullom Mareel" LOA 53 ft., service speed 16 knots.
(ii) "Sullom Spindrift" LOA 65 ft., service speed 22 knots.

The main construction of both boats is of G.R.P. They are fully equipped with modern navigational aids.

The freeboard of each boat is approximately 5 ft.

Pilot Boarding Arrangements: Pilots will normally meet and embark incoming vessels at the pilot boarding areas.

Masters are reminded that high sea conditions are frequently encountered in these areas and they should make every reasonable effort to provide a safe lee.

Pilot Ladder Requirements: All vessels calling at the Port of Sullom Voe must comply with "The Merchant Shipping (Pilot Ladders) Rules 1965" (S.I. 1046) and "The Merchant Shipping (Pilot Ladders Amendment No. 2) Rules 1972 (S.I.531)".

The following points are stressed:

(i) The rigging of pilot ladders and the embarkation and disembarkation of Pilots thereby shall be supervised by a responsible officer of the ship.
(ii) Every pilot ladder shall be secured in a position clear of any possible discharges from the ship, and so that each step rests firmly against the ship's side.
(iii) Every pilot ladder shall be secured in a position where the Pilot can gain convenient access to the ship after climbing not less than 1.5 m. and not more than 9.0 m.
(iv) Whenever the distance from the water to the point of access to the ship exceeds 9.0 m., access from the pilot ladder to the ship shall be by means of an accommodation ladder or equally safe and convenient means.
(v) A light shall be provided at night so that the pilot ladder overside and also the position where the Pilot boards the ship shall be adequately lit.

Pilot Hoists: When a pilot hoist is provided as the method of access, it must be of an "approved" type.

An approved pilot hoist is considered to be one which complies with the recommendations of the "European Maritime Pilots Association" and shall be in accordance with the annex to M.S. Notice No. M898-Pilot Ladders and Mechanical Hoists.

A copy of these recommendations is available for inspection at the Port Administration Building.

APPROACHES: *Tanker routes in Shetland Waters.*

Shetland Islands Council, conscious of the dangers to navigation around the Shetland coast, due largely to outdated charts, offshore obstructions, strong tides, rapid weather changes and the presence of fishing vessels, vigorously discourages tanker navigation within 10 miles of the coastline.

An agreed procedure has been reached between the Oil Industry and Shetland Islands Council of which the following is an extract:

1. Masters are strongly recommended to keep at least 10 miles off the Shetland Islands when approaching or leaving Yell Sound. Since Fair Isle is part of Shetland Islands it is recommended that vessels navigate the Fair Isle channels approximately midway between Fair Isle and either Mainland Shetland or North Ronaldsay, Orkney.
2. It is further recommended that passage between off-lying islands/skerries etc., including Foula and Mainland Shetland should not be attempted.
3. For the final approach to/departure from Yell Sound, vessels are strongly recommended to navigate on the offshore side of the boundaries joining the following co-ordinates:

When approaching from/proceeding to the West:

A.	60° 42.5′ North	01° 42′ West
B.	60° 42.5′ North	01° 22′ West
C.	60° 40.0′ North	01° 17′ West

When approaching from/proceeding to the East:

D.	60° 40.0′ North	01° 14.0′ West
E.	60° 56.5′ North	01° 14.5′ West
F.	61° 01.5′ North	01° 59.5′ West
G.	61° 01.5′ North	01° 48.0′ West
H.	60° 56.5′ North	01° 27.0′ West

4. Where, for any reason of safety or emergency, it is not possible to comply with the foregoing, you are required to notify immediately your intentions with reasons, to Sullom Voe Port Control by VHF Channel 16 or via Agents. Charts should not be cleaned off until berthed at Sullom Voe to assist checking by Port Authority.

ANCHORAGE: There are no suitable anchorages available to vessels over 600 ft. in length in the port of Sullom Voe. Where Masters are advised that a berth will not be available on arrival it is recommended that after arriving at a position within a radius of 6 miles from Gruney Island (60° 39′ 00″ N., 01° 18′ 00″ W.) from which their notice of readiness should be tendered, they should then stand off the coastline at a distance compatible with prevailing weather conditions, but not less than 10 miles from the nearest point of land. A continuous listening watch on Channel 16 for further instructions from the port control.

When a berth is available, Pilots will board ships on arrival, subject to port operational requirements.

When underway within the Pilotage district, all vessels should have both anchors cleared and ready for letting go.

In the event of an extended berthing delay, Masters may be guided by Charts BA. 3059 and BA. 3293 in seeking a secure anchorage in Colgrave Sound (See North Coast of Scotland – Pilot – Page 99).

Masters are advised to beware of crude oil pipe-lines in the sea areas to the South of Fetlar and East of Mossbank.

MAX. SIZE: See "Berthing" and "Loading/Discharging Facilities".

HEALTH: The following Port Health procedure applies at the Sullom Voe Terminal.

The Master has no need to obtain health clearance unless:

(i) An authorised officer otherwise directs.
(ii) The occurrence on board of death or illness as laid down in the Public Health (Ships) (Scotland) Regulations.
(iii) An abnormal mortality among rats or mice on board has occurred.

A proportion of ships will be boarded and checked.

Where it is necessary to obtain "Free Pratique" for health purposes, the Master should provide the following documents:

(i) Maritime Declaration of Health.
(ii) A list of passengers and crew leaving the ship together with the addresses they are going to in the United Kingdom.

Deratting Exemption Certificates: The Sullom Voe Terminal is an "approved" Port and Deratting Exemption Certificates will be issued by the local health authority.

Also see "Health – All Ports" before first U.K. port.

RADIO:

ETA Requirements: Vessels bound for Sullom Voe are required to provide the Pilotage Authority with the following information.

(i) An ETA at least 24 hours prior to arrival or on leaving the last port, whichever is later.
(ii) Confirm the vessel's ETA at least 6 hours before arrival at the seaward limit of the Pilotage district and thereafter notify of any significant change in excess of 1 hour.
(iii) On coming within VHF range of "Sullom Voe Port Control" establish VHF contact for the purpose of updating the ETA.

Pre-Arrival Information: Prior to arrival, all vessels calling at Sullom Voe should provide "Sullom Voe Harbour Radio" with the following information:

(i) Name of vessel.
(ii) Port of Registry.
(iii) Name of Master.
(iv) Gross Registered Tonnage.
(v) LOA.
(vi) Draft Fore and Aft.
(vii) Whether to berth or transit.
(viii) Whether loaded or in ballast, if loaded, nature of cargo and quantity for discharge.
(ix) Whether vessel is carrying segregated ballast.
(x) Location where segregated ballast was loaded.
(xi) Segregated ballast quantity.
(xii) Dirty ballast quantity.
(xiii) Which pilot station on arrival.
(xiv) Pilot boarding arrangements.
(xv) Number of crew.
(xvi) Last Port of call.

VHF: All shipping movements within the district are monitored from a Port Control Room located in the Port Administration Building at Sella Ness.

The Port Control Room is manned on a 24-hour basis by Marine Officers who are licensed Pilots.

These Marine Officers, in their capacity as Port Control Officers, maintain a continuous VHF and radar watch. They provide advice to Masters and Pilots on all navigational aspects including weather forecasts within the area, direct shipping movements within the port and liaise with the Terminal facilities and emergency services.

The following VHF Channels are constantly monitored in the Port Control Room.

Channel 16	Calling, safety and distress.
Channel 9	Tanker pilotage and tugs.
Channel 10	Port emergency, fire or oil pollution.
Channel 12	Pilotage (port control general).
Channel 14	Pilotage (radar assistance).
Channel 20	Traffic and weather broadcasts.

The call-sign for Sullom Voe Pilots is "Sullom Voe Harbour Radio".

In addition *Sullom Voe Oil Terminal* constantly monitor Channels 19 and 46 over which pre-arrival information concerning loading procedures will be given.

Since the Terminal has no direct access to Channel 16, initial contact should be made on Channel 19 using call sign "Sullom Voe Terminal".

It is emphasised that Masters should try to contact the Terminal as soon as possible prior to arrival at the pilot boarding area so that loading information may be exchanged before commencing the inward passage through Yell Sound.

Control of Traffic: The Port Control Room directs the movements of all vessels within the pilotage district. Overtaking and passing is prohibited in the deep water channel within an area bounded by a line joining Queyfirth Light and the Northern extremity of Lamba Island and a line joining Skaw Taing Light and the front leading light on Gluss Isle.

Reporting Positions: During the transit of Yell Sound, all vessels are required to report to Port Control when passing the following positions:

"A"	122.5°×1.5′ from Gruney Island Lt.	(60° 38.6′ N., 1° 15.3′ W.)
"B"	274°×0.5′ from Muckle Holm Lt.	(60° 34.9′ N., 1° 16.9′ W.)
"C"	094°×0.4′ from Queyfirth Lt.	(60° 31.5′ N., 1° 18.7′ W.)
"D"	270°×0.5′ from Skaw Taing	(60° 29.3′ N., 1° 16.7′ W.)
"X"	355°×1.25′ from Mossbank	(60° 28.5′ N., 1° 10.7′ W.)

RADAR: Full radar coverage exists for Yell Sound and Sullom Voe.

The main scanner, located on the hill of Vats Houllands (60° 27′ 57″ N., 1° 17′ 28″ W.) is connected by microwave link to displays in the Port Control Room.

Port Control Officers maintain a continuous radar watch, and the transit of each vessel is monitored and recorded and advice is available to vessels on request.

TUGS: At present a fleet of harbour tugs provide a towing service for vessels at the Sullom Voe Terminal. These are stationed at the Sella Ness Tug Jetty adjacent to the Port Administration Building.

The fleet is operated by Shetland Towage Ltd.

Three tugs have been purpose-built for the Terminal:

"Stanechakker", "Swaabie", "Lyrie"

These twin-screw 3,800 h.p. vessels, named after Shetland seabirds, each having a bollard pull of 55 tons. They are also fully equipped as fire-fighting tugs and pollution control vessels.

Also seconded to this permanent fleet is a fourth tug:

"Flying Childers"

This is a single-screw tug of 2,904 h.p. with a bollard pull of 38 tons, but without fire-fighting capability. The use of tugs and their numbers will be at the discretion of the Pilot and Master. It should be noted that from the power of these tugs and the service for which they have been designed their towing equipment has been sized accordingly. Prior to arrival, vessels should therefore ensure that heaving lines to assist in securing the tugs are of adequate length and breaking strain, and are readily available.

Tugs will normally meet incoming vessels at a position North of Lamba Island. Officers and crew should be standing by to receive lines and all necessary tugs will be secured before the vessel's ability to manoeuvre becomes restricted.

Tugs may be positioned for use with towing lines or alongside with bow lines, their mode of operation and disposition will be fully explained by the Pilot on arrival. Tugs lines will normally be used throughout, either from towing hook or towing winch.

It is requested that wherever possible tug orders for movements before 0900 hrs. be placed before 1700 hrs. on the night before.

BERTHING: Attention is drawn to the minimum under keel clearance of 1 m. required alongside and the minimum under keel clearance of 2.0 m. in the channel.

Ore/Oil and Ore/bulk Oil vessels up to a maximum size of 300,000 tons Summer deadweight may berth at Sullom Voe. Oil tankers up to any extreme maximum of 350,000 tons Summer deadweight will be accepted.

Limiting Vessel Sizes:

No. 1 Jetty:	**Crude Oil Carriers**
LOA	170 m. to 280 m.
d.w.t.	18,000 tons to 120,000 tons
Berthing Displacement	100,000 tons (max.)
Depth alongside	16.9 m.(min.)
Max. allowed draft	15.9 m.
	LPG Carriers
LOA	140 m. to 260 m.
Capacity	10,000 cu.m. to 75,000 cu.m.

Berthing continued overleaf.

No. 2 Jetty:	**Crude Oil Carriers**
LOA	210 m. to 365 m.
d.w.t.	50,000 tons to 350,000 tons
Berthing Displacement	250,000 tons (max.)
Depth alongside	23.1m. (min.)
Max. allowed draft	22.1 m.

No. 3 Jetty:	**Crude Oil Carriers**
LOA	170 m. to 365 m.
d.w.t.	30,000 tons to 350,000 tons
Berthing Displacement	250,000 tons (max.)
Depth alongside	23.6 m. (min.)
Max. allowed draft	22.6 m.

No. 4 Jetty:	**Crude Oil Carriers**
LOA	170 m. to 365 m.
d.w.t.	30,000 tons to 350,000 tons
Berthing Displacement	250,000 tons (max.)
Depth alongside	23.6 m.
Max. allowed draft	22.6 m.

Note: (i) An increased loading draft of 1 m. max. may be allowed depending on height of tide, but ships must at all times allow for a minimum under keel clearance in the channel of 2.0 m.

(ii) All vessels arriving at Sullom Voe, for the purpose of loading, should ensure that their arrival draft does not exceed 13 m. (42 ft. 6 in.). This is the max. draft normally allowed in the South turning area.

Loading Systems:

No. 1	Crude	4×12 in.	Loading arms var. hydraulic connections.
	LPG	2×12 in. 1× 8 in.	Loading arms var. hydraulic connections.
No. 2	Crude	4×16 in.	Loading arms var. hydraulic connections.
No. 3	Crude	4×16 in.	Loading arms var. hydraulic connections.
		1×12 in.	Loading arm.
No. 4	Crude	4×16 in.	Loading arms var. hydraulic connections.

Manifold Heights:

	Heights above chart datum	
	Max.	*Min.*
No. 1 Crude	22.70 m.	1.80 m.
LPG	16.90 m.	3.50 m.
No. 2 Crude	31.30 m.	2.60 m.
No. 3 Crude (16 in. arms)	31.30 m.	4.23 m.
(12 in. arm)	19.90 m.	2.70 m.
No. 4 Crude	31.30 m.	4.23 m.

Maximum allowable pressure on lines and connections: 150 lbs/sq.in.

Jetty Orientation:

No. 1	280°/100°
No. 2	135°/315°
No. 3	135°/315°
No. 4	135°/315°

Gangway: Shore tower type gangways are provided at all times. If for any reason, a shore gangway will not be available, ships will be advised in good time.

Reducers: When required, reducers will be provided by the Terminal.

Maximum Loading Rate per Arm:

Crude: 12 in. loading arm	2,500 long t.p.h.
16 in. loading arm	5,200 long t.p.h.

LOADING/DISCHARGING FACILITIES:

Oil Loading Berths: Four loading berths Nos. 1, 2, 3 and 4.

The loading berths are located in deep water on the Northern shores of Sullom Voe, adjacent to the Terminal complex at Calback Ness.

The berths are numbered 1 to 4 in sequence from East to West. Number 1 jetty has facilities for crude and LPG carriers and can accommodate vessels up to 120,000 d.w.t. Numbers 2, 3 and 4 jetties have crude loading facilities only, catering for vessels up to 350,000 d.w.t. and bulk carriers (Obo's, Ore/Oil etc.) up to an absolute maximum of 300,000 d.w.t.

Each jetty is of conventional "T" shaped construction with 4 breasting dolphins in line with the jetty head. The mooring dolphins are offset from the line of breasting dolphins to provide an optimum lead for mooring lines. Vessels may land at a maximum angle of 8° to the jetty face. Quick release mooring hooks are fitted on all dolphins. For use with large vessels, quick release mooring pulleys have been fitted on No. 2, 3 and 4 berths. These pulleys, one at each end of the berth are designed to accept a ship's mooring wire in the form of a bight.

Large flexible rubber fenders are fitted to the outer faces of each breasting dolphin. Each has a generous energy absorbing capacity but the optimum speed of approach for the largest ship is indicated by a single green light on the speed approach indicator panel on the jetty head. This equipment shows by the following combination of coloured light signals the speed of approach of the ship toward the jetty measured separately at the two outer berthing dolphins:

GREEN
GREEN/ORANGE
ORANGE
ORANGE/RED
RED

Any colour combination except the red (i.e. any approach speed below 22 cm./sec.) is acceptable at berthing for vessels displacing up to 100,000 tons at jetty 1 and 250,000 tons at jetties 2 and 3.

The 2 lateral "distance off" indicators each comprise of 20 fibre optic bars. Each bar element is switched separately at specified distances, all bars being illuminated at 99 m. In addition to indicating distance off, this system provides an accurate indication of the vessel's angle of approach to the jetty face.

Each mooring operation will be assisted by two purpose-built mooring boats.

General Mooring Requirements:

(i) Masters should ensure that mooring lines are in good condition, winch brakes or securing devices should be in efficient operating order and should have a holding power of at least 60% of the breaking load of the vessel's mooring lines. (On vessels constructed before 1978 these conditions may be met by placing the winch in gear and applying power in addition to applying the brake).

(ii) Any known defects in the vessel's mooring system or limitation of mooring winch brakes should be reported to the Terminal on arrival in order that if necessary additional precautions may be agreed.

(iii) In order to avoid damage to loading arms and the serious consequences of oil pollution, the vessel should be kept close alongside at all times.

(iv) If the vessel is equipped with mixed moorings of wire and fibre ropes it is important that these should not be used together in the same direction and service. It is recommended that wires (or wires fitted with synthetic fibre rope tails of at least 25% greater breaking load to the wire), should be used for all spring mooring lines.

(v) Particular care should be taken to ensure sufficient transverse restraint from breast line moorings. When synthetic fibre mooring lines are used, pre-tensioning of these lines on making fast will help prevent drift of the vessel away from the berth in "off the berth" wind conditions.

(vi) As soon as the vessel is secured, brakes on all mooring winches should be firmly applied. Winches must not be left on automatic tensioning. Full steam pressure or power to all mooring winches should be maintained available at all times when alongside. On split drum mooring winches only one layer of rope shall be permitted on the working half of the drum.

(vii) An efficient watch must be maintained on the vessel's moorings at all times to ensure that all lines are properly tensioned and tended when required. The deck watch should include regular checks that mooring winch brakes are applied at the correct setting.

(viii) Masters should endeavour to ensure compliance with the mooring layout as advised by the Pilot and Mooring Master. Large vessels should also use the "pulley" mooring hooks in the manner advised.

Connection of Loading Arms: The connection of oil loading arms will be undertaken by shore personnel.

Masters should ensure that fire extinguishers are ready for use at the ship's manifold, in accordance with jetty regulations.

Crude Oil Storage: 15 conventional floating roof storage tanks are being constructed, each with a capacity of 600,000 barrels. These provide storage facilities in the event of port closures and ensure sufficient stocks to enable tankers to load without delay.

The storage tanks have been constructed with bases as much as 30 m. above sea level, initially, loading will be undertaken by gravity. But 5 oil loading pumps have been installed and will be operated as throughput increases.

Loading Rates: A maximum loading rate of 30,000 t.p.h. can be provided by the Terminal with a maximum of 20,000 t.p.h. to any one berth.

The LPG loading system will deliver up to 3,000 cu.m. per hour.

Cargo Measurement: Meters will be installed for cargo measurement.

Early Departure Procedure: An early departure procedure is operated at the Sullom Voe Terminal.

DRY CARGO FACILITIES:

Construction jetty: A concrete pier suitable for coastal traffic is located in Garths Voe, East of No. 1 jetty.

This pier, orientated on a 108°/288° axis is 100 m. long and can accept ships on both the inside and outside faces.

The North berth is equipped with a fixed ro/ro ramp. This ramp has a width of 10.7 m., a total length of 23.7 m. and a fixed gradient of 1:22. The height of the sill is 1.67 m. above MHWS.

The pier is well fendered with patent fenders and tyres. The depths off the pier range from 9.9 m. at the Eastern extremity, rising to 3.9 m. at the ro/ro ramp.

Bunkers can be supplied by road tankers to vessels using this jetty.

The dock labour force is operated by Wimpey Marine Ltd., who have offices adjacent to the pier. Normal working hours for the dock labour force are from 0800 hrs. to 2200 hrs. The stevedoring offices are manned on a 24-hour basis.

Graven Pier: A small concrete fishing pier is situated on the Southern shore of Garths Voe. This pier requires considerable repair and is unsafe for berthing any vessels. Craft using this pier do so entirely at their own risk. The approximate depth of water at the jetty is 2.0 m.

Tug jetty: Harbour tugs and pilot boats are stationed at an "L" shaped jetty located on the Southern shore of Garths Voe adjacent to Sella Ness. This jetty, of cellular design is constructed of concrete and steel.

Fendering arrangements consist of pneumatic fenders positioned at intervals along the jetty face. This pier is suitable for coastal traffic but is not used as such on a regular basis, except for discharge of fuel oils to the Graven storage facilities.

The present minimum depth off the North face of the jetty is approximately 6.9 m.

Duty paid gas oil available from bunkering points on this jetty.

POLLUTION:

Oil Pollution Surveillance: Only clean ballast contained in tanks completely segregated from main cargo tanks will be allowed to be discharged into the Harbour, but then only after inspection and approval by Port Authority.

Recent pollution of beaches and serious damage to wildlife around the shores of Orkney and Shetland suggests that certain vessels have disregarded the IMCO Conventions on Oil Pollution and discharging dirty ballast whilst approaching or immediately after sailing from Sullom Voe.

Such procedures cannot be condoned by the UK Department of Trade, Local Authorities or the Terminal Operator, and with the object of preventing this practice (which is contrary to internationally agreed rules) air surveillance of all shipping in waters around Orkney and Shetland has been introduced.

Vessels arriving from the South are requested to advise Sullom Voe Port Control (Telex SULVOE 75142) of the time of passing Lat. 58° 20′ N. indicating the exact positions, intended courses and speeds until arrival at the Pilot station. Ships approaching from any other direction are requested to provide similar information upon reaching a position 200 miles from the Pilot station. Prior to sailing from Sullom Voe, all vessels are requested by the Port Authority to indicate intended outward bound courses until South of Lat. 58° 20′ N. or 200 miles from the Pilot station as appropriate.

Any vessel sighted discharging dirty ballast will be immediately reported to the UK Government Authorities for appropriate action to be taken. In such circumstances, vessels may be liable to extensive delay until investigations have been completed.

Prior to arrival, vessels are requested to ensure all crew members are conversant with the anti-pollution regulations, which must be complied with at all times.

Principal causes of pollution are leaking ship side valves, cargo/bunker overflows and pumping engine room bilges. Therefore it is recommended that sea valves, overboard discharges (which should be shut) and ballast/cargo/bunker/bilge operations are checked by the Chief Officer and the Chief Engineer before arrival. Scuppers must be plugged on main and poop decks.

On arrival the terminal will give all assistance necessary but are empowered to take action in the event of contravention of pollution prevention requirements.

Masters must advise if their vessel has sustained any damage which could cause oil pollution and confirm any known oil losses from hull or sea valves.

Vessels are required to arrive at the Sullom Voe Terminal with a total deadweight of net less than 35% of summer d.w.t including bunkers, fresh water and stores.

Vessels should confirm in advance the amount of ballast, indicating the quantities of segregated ballast, and cargo tank ballast, separately. (See "Radio" – Pre-arrival information).

BALLAST:

Ballast Requirements: For the purpose of safe manoeuvring, the Pilots require all vessels to maintain a reasonable ballasted condition.

Vessels should carry sufficient ballast so that the propellor remains immersed whilst maintaining a reasonable stern trim.

Masters are advised that the Port Authority expects the propellor of ships loading to be immersed throughout loading operations. The proportion of cargo loaded to ballast remaining onboard must be such as to afford a propellor efficiency of not less than 85% in the event of a sudden departure from the berth being necessary. It must be understood that shifts of wind and changes of wind force in Sullom Voe are at times violent and the adoption of an adverse trim in relation to the ship's optimum manoeuvring characteristics will not be accepted.

Ballast Reception Facilities: It is prohibited to discharge any ballast other than segregated clean ballast into the waters of Sullom Voe.

All dirty ballast or non-segregated ballast will be discharged ashore for treatment.

The Terminal can accept ballast whilst providing the vessel with cargo. Ballast will initially be pumped into settling tanks where excess oil will be skimmed off into recovered oil tanks. The remaining ballast will undergo further treatment before being discharged into Yell Sound. The ballast water will be monitored throughout the cleaning process.

Discharge of Dirty Ballast Water: The discharge of ballast water from oil cargo tanks or any ballast water containing quantities of oil or high levels of mineral or chemical pollutant, into the waters of the harbour is prohibited.

The discharge of ballast water from segregated or permanent ballast tanks into the waters of the harbour will be permitted provided that:–

1. The Master of the vessel advises the Harbour Authority prior to arrival:
(a) The place at which the ballast was taken.
(b) The quantity and disposition of the ballast.
(c) That to his knowledge the ballast is free from oil contamination.
2. The Master of the vessel advises the Harbour Authority:
(a) On each occasion he intends to discharge the ballast and at least 30 minutes before commercial discharge
(i) The time at which he intends to commence deballasting, and
(ii) The time at which he expects to complete deballasting.

The Oil Pollution Control Officer of the Harbour Authority will on occasions board vessels carrying segregated ballast to obtain samples. Analysis will be made of these samples to ascertain the quantity of hydrocarbon, colliforms and heavy metal pollutants within the ballast. The Port Authority may, as a result of information so obtained, refuse permission for the discharge of segregated ballast water taken on board in certain locations. In any case, the discharge of ballast water is not to commence without the permission of the Harbour Master.

MEDICAL: Medical attention for ship's crews if required will normally be provided by the Port Medical Officer and arranged by the ship's Agent.

However, in the event of an emergency and the Port Medical Officer being detained elsewhere, medical attention will be available from the Terminal medical centre.

FUEL: At present there are no bunkering facilities available for vessels calling at the Port of Sullom Voe.

FRESH WATER: Potable water is only available to tankers on an emergency basis.

CUSTOMS: A selective system of boarding commercial vessels arriving from a non-U.K. port, will apply at the Sullom Voe Terminal.

CONSULS: In Lerwick.

Denmark	(C. W. L. Aitken)	106a Commercial St.	Lerwick 3057
Finland	(F. Garriock)	106a Commercial St.	Lerwick 3057
France	(W. H. Stubbings)	106a Commercial St.	Lerwick 3057
Germany	(M. M. Shearer)	Garthspool	Lerwick 2556
Netherlands	(A. G. Beattie)	106a Commercial St.	Lerwick 3057
Norway	(F. Garriock)	106a Commercial St.	Lerwick 3057
Sweden	(M. M. Shearer)	Garthspool	Lerwick 2556

REPAIRS: Engineering facilities are available to carry out repairs afloat to hull and machinery. Drydock facilities do not exist for vessels over 120 ft.

Electronic Navigational Aids and Radio: All major companies have agencies in Shetland. Repair facilities exist for all types of electronic equipment.

Engine Readiness: Main engines must be maintained in a state of readiness for vacating the Terminal at short notice at all times except in the cases of approved repair work as detailed in Regulation 14 of "Jetty Safety Regulations".

REPATRIATION: Crew changes will be arranged by Agents.

AIRPORT: Shetland's airport network is within easy reach of Sullom Voe and scheduled flights are available daily to all major UK cities, with connections to worldwide destinations.

GENERAL:

The following services can be provided for vessels by the Shipping Agencies. Masters are requested to provide notice of requirements prior to arrival.

Compass Adjusting: A service is available for large vessels. Ships' Agents should be advised well in advance.

Storing: A wide range of dry provisions is available locally and major storings can be competitively carried out provided good notice is given. Quality fish and shellfish products are available. Fresh and frozen meat is usually available with 'Shetland' lamb a speciality. Knitwear goods of good quality are available at reasonable prices. Other local products include sheepskins and traditional jewellery.

Bonded Stores: Bonded stores are available in any quantity.

Lubricating Oils: Most major oil companies have authorised dealers in Shetland. Lubricating oils of all grades are available at competitive prices.

Charts and Nautical Publications: Available on application to Ship's Agents. Advance notice is required for the supply of large sets.

Lloyds and Salvage Association: If service or survey is required, these may be obtained through Ships' Agents.

Sea Travel: P&O Ferries maintain a regular Ro-Ro and Passenger ferry service from Lerwick to Aberdeen.

Provisioning: Vehicles are prohibited access to the oil jetties. Trolleys are provided at each berth to assist with the transportation of ship's stores.

CHARTS AND PUBLICATIONS:

BA. 3298	Yell Sound
BA. 1118a	Shetland Isles (Sheet 1)
BA. 3059	Moul of Eswick to Fetlar (To be superceded by new Metric Chart)
BA. 3293	Colgrave Sound and approaches to Basta Voe

Pilot Books: North Coast of Scotland Pilot N.P. 52.

Tidal Stream Atlas: Orkney and Shetland Islands N.P. 209.

Approaches to Sullom Voe – Shetland Islands Council Publication.

Lights: Admiralty List of Lights, Volume A.

Additional Charts and Publications relevant to Sullom Voe may be published in the near future.

Publications – Navigational: Masters and/or Agents are requested to ensure that the following publications are available on board any vessel bound for Sullom Voe, which intends to navigate under Sections 11 and 12 of the Pilotage Byelaws:

a. Sullom Voe Harbour Authority – General Directions for Navigation.
b. Sullom Voe Harbour Byelaws.
c. Sullom Voe Pilotage Byelaws (1979).
d. Notices to Mariners in force for the area, issued by the Director of Ports and Harbours.
e. Charts BA. 3297 and BA. 3298.
f. Approaches to Sullom Voe – Tidal Stream Atlas.
g. Guidebook – Port of Sullom Voe, 1980, which includes tide tables.

Publications – Oil Pollution and Emergency: The following publications are for internal use:

a. Sullom Voe Harbour Authority – Emergency Plan.
b. Shetland Islands Council – Anti-Oil Pollution Scheme.
c. Sullom Voe Harbour – Oil Spill Plan.

Note: Vessels constrained by their draft.

A vessel constrained by her draft may, in addition to the lights prescribed for power-driven vessels in Rule 28 (General Directions), exhibit where they can best be seen three all-round red lights in a vertical line, or a cylinder.

DEVELOPMENTS: Extensive developments continue at Sullom Voe.

SAFETY: *Smoking:* Smoking is prohibited on vessels during loading operations. Except in 2 or at most 3 smoking rooms allocated by the Master and approved by the Terminal Representative.

Matches and lighters shall not be carried by personnel outside the approved smoking areas, or on the jetties.

Fire Precautions: Vessel's fire-fighting appliances, including main and emergency fire pumps must be kept ready for immediate use.

Before deballasting and loading/discharging operations commence and during periods when permitted repair work is being carried out, fire hoses shall be uncoiled and connected to the fire main with at least one fire pump maintaining pressure on the main.

Jetty Fire-Fighting Facilities: The oil loading jetties are each equipped with 2 independent hose supply systems, one for fire water alone and the second for either fire water or foam mixture.

These systems supply hydrants which are spaced out along the jetty access road and jetty head.

Monitors are installed to provide a water curtain in the area of the jetty head and between the access tower and manifold area. Elevated monitors are also positioned at the top of the access and monitor towers. A sprinkler system protects the access tower.

Hose couplings are 2.5 in. standard instantaneous female type and the fire main to the access tower has provision to accept international connections.

The working pressure of the fire system is 250-260 p.s.i. A fire hose connection is situated on the construction jetty to allow fire-fighting tugs to link into the system.

POLLUTION: It will be appreciated that oil spillages are seriously viewed by Government, Local Authorities, Port Authorities and Terminal Operators. Spillages will be investigated by the appropriate authorities and the Master and/or Owner may be liable to prosecution. Delay to the vessel could well arise.

Masters are therefore requested to ensure that every precaution is taken to prevent oil spillages at the Sullom Voe Terminal.

COASTGUARD SERVICES: H.M. Coastguard is the authority responsible for initiating and co-ordinating all sea and coastal search and rescue operations in the Shetland sea area.

Regular stations are maintained at Lerwick M.R.S.C. (Marine Rescue Sub Centre) and at Sullom Voe, with a sector office in the Port Administration Building at Sella Ness.

Rescue equipment is maintained and manned by auxiliary coastguards at Baltasound, Mid Yell, Fetlar, Out Skerries, Whalsay, Bressay, Noness, Sumburgh, Fair Isle, Burra Isle, Walls, Sandness, Hillswick and North Roe.

Safety and Weather Information is available through the remote controlled VHF radio sites at Saxavord (Unst), Collafirth, Lerwick and Sumburgh. A 24 hour radio watch is maintained by Lerwick M.R.S.C. (call sign SHETLAND COASTGUARD) on Channel 16 and 2182 kHz, and by Sullom Voe Coastguard (Channel 16) during normal office hours or as required. Other VHF Channels are 0, 6, 10, 67 (working) and 73.

Search and rescue helicopters are contracted from British Airways Helicopters, Sumburgh, on behalf of the Department of Trade (H.M. Coastguard) for long range search and rescue purposes. These machines are fitted for winching (cable 20.5 m.) with comprehensive rescue equipment including an inflatable dinghy capable of being dropped to vessels in distress.

The helicopters have a speed of 100 knots and a maximum range of 150 nautical miles from Sumburgh. Navigation instruments include V.O.R., L.L.F., Decca A and D/F Console. The following communications facilities are available:

MF – 2182, 3095 and 5693.5 kHz.
VHF AM – 118/135.95 mHz.
VHF AM – Channels 0, 6 and 16.

The rescue capability is 10 persons at 150 miles (maximum range) but this capability can be increased if the mission is closer to shore.

R.N.L.I. Stations: The following lifeboats are on station:

Lerwick: 52 ft. Arun Lifeboat 'Soldian'.
Details: Speed 18 knots, range – 220 nautical miles.
Navigation – Radar, Decca, D/F etc.
Communications M/F 2182 kHz, 1647.5 kHz, 162.5 kHz.
1827 kHz, 2226 kHz, 2241 kHz.
2306 kHz, 2381 kHz, 2548 kHz.
VHF Channels 0, 6, 8, 9, 10, 12, 14, 16, 27, 67.

Aith: 52 ft. Barnett Class Lifeboat 'John and Frances Macfarlane'.
Details: Speed 9.4 knots, range – 195 nautical miles.
Navigation – Radar, D/F.
Communications M/F 2182 kHz, 1647.5 kHz, 2381 kHz.
2527 kHz.
VHF Channels 0, 6, 12, 14, 16, 27, 67.

EMERGENCY SERVICES AND PROCEDURES:

Fire	Phone Sullom Voe 24 2797 VHF Channel 10
Oil Pollution	Phone Sullom Voe 24 2797 VHF Channel 10
Ambulance	Phone Sullom Voe 24 2797 VHF Channel 10
Security	Phone Sullom Voe 24 2797 VHF Channel 10

All emergency services within the port are co-ordinated by the "Emergency Services Control" situated at the Terminal fire station.

On vessels arrival at the Terminal, the responsible officer and the Loading Supervisor will discuss action to be taken in an emergency situation. The Master will receive a copy of the "Jetty Safety Regulations", these should be studied and adhered to.

Safety inspections will be undertaken by the Loading Supervisor, throughout the vessel's period alongside. Spot checks will also be made by the Terminal emergency services department.

In the event of an emergency, vessels should immediately contact Sullom Voe Port Control 24 2494/24 2495/24 2551 or VHF Channel 10.

AUTHORITY: The Director of Ports and Harbours, Shetland Islands Council.

SUNDERLAND: 54.55 N. 01.21 W. (See Plan Book)

DOCUMENTS:

Crew List. 1 form I.B.6A to be delivered to an Immigration Officer within 24 hours of arrival.

Passenger Lists. Form P.R.4. in duplicate and Form P.R.10 in duplicate.

Customs Documents. Crew Declaration Form C.142 in duplicate.

Cargo Manifests, triplicate.

Ship's Papers:
Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
De-ratisation Certificate.
Customs Light Bills.

PILOTAGE: Call Sunderland Harbour Radio, Channel 16, working Channel for port is 14. Pilotage not compulsory, but advisable for all but small vessels. Pilots maintaining continuous watch on VHF Sound signals for vessel requiring Pilot is Morse Code No. 6. Pilot boards 0.5 to 0.75 mile off piers. In bad weather pilot cutter leads vessel into inner harbour, and Pilot boards there.

ANCHORAGES: 0.5 to 0.75 miles N.E. of Roker Pier Lighthouse.

RESTRICTIONS: Vessels enter 2 hours before high-water for entry into South Dock. For Corporation Quay only restriction draft 8.38 m.

MAX. SIZE: South Dock – length 142 m. beam 18.9 m., draft 8.08 m. with Spring tides, 7.16 m. with neap tides.

River – length 183 m., beam – no restriction, draft 8.38 m. subject to siltage.

HEALTH: Pratique procedure: Pratique granted by Port Health Authority on arrival.

Suspected disease or fever: All ships from suspected areas must radio Port Health Authority 24 hours in advance of arrival, stating general condition of crew members. Pratique is automatic when ships arrive from other U.K. ports.

Also see "Health – All Ports" before first U.K. port.

RADIO: Cullercoats.

TUGS: Join vessel at or outside harbour entrance. Ship's ropes normally used.

BERTHING: In South Dock vessel must arrive from 2 hours before up to 30 minutes after high water. At Corporation Quay small vessels berth at any time. Large vessels usually berth at same time as mentioned for South Dock.

BRIDGES: In South Dock bridges operated at tide time 2 hours before to 30 minutes after high water. Railway Bridge clearance, 25.1 m. MHWS.

STEVEDORES: The Port of Sunderland Authority carry out all stevedoring. Agents should advise as early as possible in order to arrange berthing and gangs, 5 to 6 days notice if possible. ETA from ship 2-3 days in advance. Working rates of principal commodities are;

Bagged cargoes	15	t.p.h.	
Sisal	20/25	,,	
Scrap – heavy	25	,,	
Chrome and heavy ores	40	,,	
Wood Pulp	30	,,	(loose bale)
Wood Pulp	80/90	,,	(unitised)
Limestone	325	,,	

MEDICAL: Well served with General practitioners and hospital facilities, and attention can be arranged at very short notice. However, unless urgent, 24 hours notice desirable.
TANKERS: 4 installations (lines either 0.16 or 0.2 m.) 3 installations in South Dock and 2 berths, the S.E oil berth 98 m., the S.W. oil berth 89 m. 1 vessel of maximum length 142 m. can use this berth, draft 8.08 m. Spring tides; 7.16 m. Neap tides. At Corporation Quay vessel 183 m. long, draft 8.58 m.
DENSITY: Salt water density 1025.
FRESH WATER: Available. Arrangements can be made to supply water at any time.
FUEL: Bunkers supplied at Corporation Quay pipe-line from Petrofina Ltd. All grades available – Corporation Quay and Hendon Dock. Viscosities range from 32 secs. to 3,500 secs., and can be blended to any requirement in this range. 12 hours notice necessary. Rate 250 t.p.h.
GANGWAY/DECK WATCHMEN: Services of watchmen recommended.
OPENING/CLOSING/HATCHES: This work is normally carried out by ship's crew, otherwise shore riggers.
CERTIFICATES:
Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Deratisation Certificate.
CUSTOMS ALLOWANCE: As per H.M. Customs and Excise Regulations.
IDENTIFICATION CARDS: Not required. Must possess vaild Seaman's Book and/or Passport.

REPAIRS: All repairs possible.
DRY DOCKS: One dry dock in use, length 109 m., breadth 14.6 m.
REPATRIATION: Facilities available for effecting repatriations, with good rail, road and air communications.
AIRPORT: Approximately 20 miles. Newcastle Airport served by regular airlines, all the year round, to all parts of the world. Also chartered flights by Britannia.
HOLIDAYS: Official Holidays for General Cargo ships: New Year's Day (no work except by special agreement); Good Friday; Easter Monday; May Day; Spring Bank Holiday; Summer Bank Holiday; Christmas Day (no work except by special agreement); Boxing Day (no work except by special agreement).
POLICE/AMBULANCE/FIRE: Police Station Tel. Sunderland 76155; Ambulance Control Tel. Sunderland 72875; Fire Station Tel. Sunderland 56456. Or call 999 from any telephone and ask for service required.
TELEPHONES: Permanent arrangements do not exist, but a temporary arrangement can be made at any time.
AUTHORITY: Port of Sunderland Authority.

SWANSEA: 51.37 N. 03.56 W. (See Plan Book)

DOCUMENTS:
Light Bill receipt.
Crew List.
Manifests.
Bill of Lading copies.
Customs and Health.
PILOTAGE: (Pilotage likely to be compulsory for vessels of 1,500 g.r.t. and above in the near future). Request for Swansea Pilots by International Signal Code for Sea Pilots, by telephone call for Dock Pilots. Telegraphic address for Swansea Pilots is "Pilority, Swansea".

Advance notice of ETA required at least 12 hours. VHF Channels 16 and 6. Pilot boat has bright yellow hull with red boot-topping; superstructure painted white. Pilot cutter's sound signal is "SM", three shorts and two long blasts. The area of boarding is usually one mile S.E. of Mumbles Lighthouse in all weathers. Usual requirements for ladders are in force, and Pilots require ladder to be about four to five feet above water.
ANCHORAGE: About 1 mile S.E. of the Mumbles Lighthouse.
RESTRICTIONS: Berthing is in accordance with tide. King's Dock Lock operates for a min. of 8 hours each tide. River-side berths and Swansea Ferryport Terminal operate over a greater period.

No night-time restriction of entry.
MAX. SIZE: Max. size for entry is 655 ft. long, 86 ft. beam, 32 ft. 6 in. draft.

These vessels are docked over high water period. Any vessel whose dimensions are approaching maximum, or slightly in excess, for port should advise Docks Manager well in advance. A vessel with a beam of 87 ft. 04 in. has been accepted.
HEALTH: Usual international health regulations are to be observed. Any vessel which is suspect should inform Port Medical Officer of Health.
RADIO: All communications for ship movements through "Swansea Dock Radio" Channels 16 and 14 VHF. Agents, receivers, etc., can be called through usual coastal radio stations – this includes Ilfracombe Radio.
TUGS: Towage undertaken by private operators. The Alexandra Towing Co. Ltd., at present use a modern fleet of tugs at Swansea and Port Talbot. It is optional whose lines are used, but if tugs line is taken, an extra charge will be made.
BRIDGES: One in dock bridge is under direction of duty Assistant Dock Master. A vessel which has to pass will be informed by the Assistant Dock Master as to the availablity.
BERTHING: Normal depths of water:
Queen's Dock 35 ft.
King's Dock 33 ft.
Prince of Wales' Dock 24 ft. 6 in.
BULK HANDLING FACILITIES: *Petro Chemicals.* One jetty in Queen's Dock operated by BP Chemicals International Ltd.

Coal. Four coal hoists in the King's Dock, operated by the British Transport Docks Board.

Bulk Cargoes. (Sulphur, ores, etc.). Two berths in King's Dock equipped with five 7.5 ton and five 10-ton grabbing cranes. Operated by British Transport Docks Board.

Ferryport: On East bank of River Tawe.
CRANES: Two 25 ton and nine 11.5 ton electric cranes. Five 7.5 ton, seventeen 6 ton and thirteen 3 ton.
STEVEDORES: Stevedoring services are provided wholly by British Transport Docks Board. Advice of labour requirements must be received by the following times:

General Cargo: By 0700 hrs. to start work at 0700 hrs. By 1030 hrs. to start work at 1130, 1400 or 2200 hrs. same day.

Coal Shipping: By 1530 hrs. for work at 0600 hrs. next day. By 1030 hrs. for work at 1400 hrs. same day.
MEDICAL: Port Medical Officer of Health has an office on King's Dock Lock. Medical attention can be obtained at short notice. In emergencies, the duty Assistant Dock Master can be communicated with, to obtain medical help. Hospital facilities available, and there is a first-class medical centre on the Prince of Wales Dock. Vaccination and fever certificates will be examined when receiving pratique.
TANKERS: All tankers arriving, working cargo, and departing are required to observe port's Petroleum By-laws and Oil in Navigable Waters Act. British Petroleum Company has further private directives for oil tankers. Five main tanker berths, one petrochemical berth, two coastal tanker berths and two layby berths in Queen's Dock. One tanker/general cargo berth in King's Dock. Deepest draft permitted is 32 ft. 6 in. A special fire-float to deal with tanker casualties is maintained in the Queen's Dock by the B.P. Company Ltd.
DENSITY: King's Dock Lock density is 1025.
FRESH WATER: Fresh water supplied from hydrants on quays by watermen. Rate of delivery is 2,000 g.p.h., approx., depending on the demand.
FUEL: Various grades of gas oil and diesel can be supplied by barge or road vehicles, or it can be delivered ex-pipeline at Queen's Dock.
FIRE PRECAUTIONS: All matches and lighters must be declared at entrance to oil installation. There are arrangements at the Queen's Dock depot for shore cooking and eating. There is an oil boom between the King's Dock and Queen's Dock to serve as an oil fire break between two docks. A 24 hours observation is kept at Scherzer Bridge for oil pollution and fires.
GANGWAY/DECK WATCHMEN: Under Port Regulations, there shall always be on board sufficient men to move or take care of the vessel. Some vessels employ watchmen. Cost is a tariff charge.
OPENING/CLOSING HATCHES: Normally done by the ship's crew, but if riggers are employed by vessel for general duties they open up hatches.
CERTIFICATES:
Certificate of Freeboard.
Certificate of Registry.
Certificate of Pratique.
Light Bill.
Manifest.
Bill of Health.
Bills of Lading.
AA (1) Certificate.
CUSTOMS ALLOWANCE: At discretion of local H.M. Customs inspectors.
IDENTIFICATION CARDS: Not compulsory, but they are helpful if a crew member has to identify himself to Authorities.
CONSULS:

France	tel. Swansea	55274	Norway	tel. Swansea	50564
Vice-Consuls:					
Belgium	tel. Swansea	50021	Netherlands	tel. Swansea	53921
Finland	,, ,,	53921	Portugal	,, ,,	57757
Greece	,, ,,	50957	Spain	,, ,,	25121
Italy	,, ,,	55146	Sweden	,, ,,	55146

REPAIRS: All types of deck and engine-room repairs are possible.
DRY DOCK: Two dry docks in port are entered from King's Dock. Dry docks: "Duke of Edinburgh" 670 ft. × 92 ft.; "Palmers" 560 ft. × 75 ft.
REPATRIATION: Mercantile Marine Office in Swansea where ship's crews are paid-off before Superintendent of Shipping. Necessary arrangements can be made for repatriation through the Consular Channels.
AIRPORT: Nearest airport at Swansea, 8 miles from Docks. Next are Rhoose (Cardiff) and Bristol airports where regular scheduled flights are handled.
TIME: Local time is British Standard Time which is plus 1 hour to Greenwich Time. Reverting to GMT during Winter months.
HOLIDAYS: Christmas (25th December); Boxing Day (26th December); New Year's Day; Easter, Good Friday and Monday (movable dates); Spring Holiday, Summer Bank Holiday (both movable dates). No cargo is worked on these days.

POLICE/AMBULANCE/FIRE: Call 999 from any telephone, and ask for service required.

TELEPHONES: Arrangements at most berths for placing telephones on board ships in port.

GENERAL: Entrance lock is 875 ft. in length, 90 ft. across at cope level. The inner sill is 7 ft. higher than the outer sill. The outer sill is 2.8 m. below Admiralty Chart datum (Chart No. 1161).

Tugs are available at the port for in-dock as well as sea towage.

A diver can usually be obtained by enquiry to the British Transport Docks Engineer, Swansea.

Docks Manager: Tel. 50855/200. Dock Engineer: Tel. 50855/275. Dock Master and Fire Officer: Tel. 50855/260.

AUTHORITY: The British Transport Docks Board.

TEES RIVER: 54.39 N. 01.08 W. (See Plan Book)

AUTHORITY: Tees and Hartlepool Port Authority.

PORT LIMITS: The Port facilities extend from the river entrance to the I.C.I. Billingham Oil Jetty 16 km. up river.

Arrival in the port is accepted as time of passing South Gare lighthouse inward, or time of anchoring in the Tees Bay.

DOCUMENTS: Ship's official papers including:

- Register.
- Load-line Certificate.
- Deratisation Certificate.
- Safety Equipment Certificate.
- Radio Safety Certificate.
- Construction Safety Certificate.
- U.K. Light Dues.
- Oil Pollution Certificate. (Tankers).
- Crew List.
- C14 Ship's Stores List.
- C13 Arrival General Declaration.
- C142 Crew Declaration.

PILOTAGE: The Tees pilotage district extends from a radius of 5.6 km. seawards of the South Gare lighthouse, as far up river as Victoria Bridge, Stockton, including Seaton Channel and is under the control of the Tees Pilotage Authority.

Official Address: Tees Pilotage Authority, 13-14 Bridge Street East, Middlesbrough, Cleveland TS2 1NS. Telephone: Middlesbrough 242924/5 (during office hours), Middlesbrough 590747 (after hours). Telegraphic Address: "Tees Pilots, Middlesbrough".

Pilot station is situated at South Gare and pilot cutter on duty is moored there. Cutters are painted blue with white upper structure and fly the pilot flag by day when on duty and International Regulation lights by night. The duty cutter is equipped with VHF Radio, call sign "Tees Pilots" on Channel 16. Radar is also fitted.

As much advance notice of a vessel's arrival as possible should be given to Pilots: minimum requirement for vessel arriving is 1 hour and for vessel sailing 1 hour 15 minutes.

Pilot boards in vicinity of Tees Fairway Buoy although smaller vessels are occasionally boarded off the South Gare lighthouse. During severe weather the duty cutter may move to Tees Dock and the Pilot will board as far seaward as the conditions permit.

Pilotage is not compulsory.

APPROACHES: Vessels are prohibited from anchoring:—

(i) inside the dredged channel.
(ii) within a radius of 1,113 m. of the Tees Fairway Buoy.
(iii) within the limits of 2 divergent lines starting and extending from the dredged channel limits 244 m. apart at the South Gare light station, to 550 m. apart between their respective points of intersection with the circumference of the circle defined in (ii).

Small vessels can anchor close N.E. of No. 4 Light Buoy: larger vessels at Fairway Buoy and in all cases outside the 20 m. contour. Vessels waiting Pilots anchor in these areas.

Anchoring in the vicinity of the Ekofisk Pipe-line is to be avoided. See Notice to Mariners (Trinity House) No. 2724 of 1977.

RESTRICTIONS: *Traffic Control:* This is operated by the Harbour Master when vessels over 200 m. in length are moving within the river limits.The primary purpose is to allow the subject vessel to negotiate the channel without embarrassment from other traffic. Overtaking/passing is decided by the Harbour Master when circumstances favour such actions.

Restricted Transit Control: This is imposed by the Harbour Master upon vessels carrying certain hazardous cargoes. The subject vessel is intended to proceed from sea to berth or from berth to sea without meeting other traffic. As a consequence such vessel must be restrained from entering the main channel until an 'all clear' route is available. Some regulated passing.

Port Safety Control: Masters of ALL vessels before committing their ships to the River Tees Channel are required to satisfy the Harbour Master in respect of shipboard equipment by affirming to the following questionnaire:—

Question No. 1: Your vessel is in all respects seaworthy.
Question No. 2: All secondary power or mechanical systems are in operation and *immediately* available in the event of failure of any primary system.
Question No. 3: Steering is under direct manual control.
Question No. 4: Anchors are ready for use.

In view of the controls it is essential for contact to be made with the Harbour Master before considering entering the river, leaving the berth. VHF Radio use Channels 22, 16 or 14 to contact. Telephone Eston Grange 45 2541.

MAX. SIZE: This matter is constantly under review. At present the largest dimensions acceptable are quoted as: Length 305 m. (1,000 ft.); Beam 46 m. (150 ft.); Draft 17 m. (55 ft.). this depends on the berth nominated, tidal influence and prevailing weather.

A vessel with unusual dimensions e.g. oil rig, or any vessel with dimensions approaching the port maxima must be the subject of consultation with the Harbour Master.

HEALTH: New Regulations. The Public Health (Ships') Regulations in force from 1.4.78.

See "Health – All Ports" before first U.K. port.

RADIO: Ships approaching from the North or at anchor in Tees Bay use Cullercoats Radio. Ships approaching from Southward use Humber Radio or Whitby Radio which is a slave-station to Cullercoats.

VHF Station	*Call sign*	*Channel Fitted (min.)*

16	Calling and Safety	9	Pilot Port Operations
14	Port Operations	8	Intership
12	Port Operations		

RADAR: 3 scanner sites give full radar coverage from Smiths Dock to Fairway Buoy and up to 20 miles to seaward. Advice/information available to Masters/Pilots at any time. Advice in poor visibility in prescribed form. Call "Tees Harbour Radio". (See "VHF").

TUGS: Official Address: Tees Towing & Co. Ltd., Cleveland Buildings, Queen's Square, Middlesbrough, Cleveland TS2 1NX. Tel. Middlesbrough 247277 day and night.

Fleet of 9 tugs between 1,550 and 3,650 h.p. Tugs join vessel in Redcar Reach between No. 9 and No. 17 buoys depending on size, draft and destination. Tug's lines may be used at Master's discretion.

Tugs are on duty daily and only available on 6 hours notice for sailing and arriving after normal office hours.

BERTHING: Small vessels can usually berth at any stage of the tide. Deep drafted vessels enter in accordance with the tide.

T.H.P.A. General Cargo Facilities:

Tees Dock: No. 1 Quay. 3 conventional general cargo berths each of 183 m. length, 1 of 174 m. length and 1 of 213 m. length with flush faced quay. Road and rail access to all vessels. Ample cranage and spacious sheds/open ground. Nominal dredged depth 10.9 m. below LAT.

No. 2 quay: Two new berths each 183 m. in length have been built and equipped with electric luffing cranes up to 25 tonnes capacity. This quay is presently serving as the United Kingdom West African Lines terminal.

STEVEDORES: In order to prepare for loading/discharging, i.e. ordering of gangs, transport, etc., it is necessary to give ETA through their Agents not less than 24 hours before arrival.

In Tees berths, the port works 2 shifts daily, i.e. 0600 – 1400 hrs. and 1400 – 2200 hrs. Mondays to Fridays, with voluntary overtime at weekends.

BULK HANDLING FACILITIES: *Redcar Ore Terminal:* Handles iron ore imports for British Steel. Berth dredged to nominal 17.25 m. and able to accommodate vessels up to 335 m. in length, approx. 150,000 d.w.t. 3 ore dischargers capable of handling 2,000 t.p.h.

Potash Terminal: Built on the East side of Tees Dock, this terminal is for the export of Potash mined in North Yorkshire. Dredged to a nominal depth of 10.90 m., the quay is intended to accommodate vessels simultaneously. The main loader is capable of 2,000 t.p.h.: A silo on the site has a storage capacity for 56,900 tons.

ROLL-ON/ROLL-OFF FACILITIES: A link span Ro/Ro berth in Tees Dock can accommodate ships of up to 160 m. in length and 23.7 m. beam. Nominal dredged depth of 8.7 m.

Designed for loads up to 182 tonnes (when carried on 4 axles).

CONTAINER FACILITIES: A privately owned (Bell) purpose-built Container Berth utilising a 32 tonne gantry crane is established downstream of Tees Dock.

TANKER BERTHS:

Billingham/Clarence/Deep Water Wharves handle tankers also.

DENSITY: The density of the river water fluctuates with the seasons and rain amount, being between 1015 and 1025 mainly. Below Smith's Docks the fresh water influence is minimal.

FRESH WATER: Plentiful from wharf and small quantities available from tug in emergency, approx. 20 t.p.h.

FUEL: All grades available by road or river delivery. 48 hours notice of requirements is requested for barge delivery.

CRANES: Floating crane operators are established on the River Tees and have crane lifting in excess of 400 tons available.

MEDICAL: All medical facilities available. Vessels requiring doctor to board are advised to give maximum notice. Emergency medical attention can be arranged through VHF radio contact to Tees Harbour Radio on Channels 22, 16 or 14.

GANGWAY/DECK WATCHMEN: Recommended. Majority of berths are tidal with 5 m. range at Springs.

OPENING/CLOSING HATCHES: Always by crew. Riggers available.

CUSTOMS ALLOWANCE: 0.5 lb. tobacco or 200 cigarettes. (0.25 lb. tobacco for coasters). 1 spirit and 1 wine bottle (0.5 bottle spirit and 0.5 bottle wine for coasters).

IDENTIFICATION CARDS: Not used in Tees.

CONSULS: Sweden, Norway, Denmark, Netherlands, Portugal, Belgium, West Germany, Finland. Also French Consular Agency.

REPAIRS: Facilities available for all deck or engine repairs.

DRY DOCKS: 4 dry docks at South Bank (Smiths Dock), up to 175 m. × 22 m.

AIRPORT: Teesside Airport with regular flights to London, etc. is 12 miles from Middlesbrough Centre.

REPATRIATION: All facilities exist.

TIME: GMT in Winter months. BST (GMT plus 1 hour) operates between late March and mid-October as decided by government.

HOLIDAYS: Normal English Bank Holidays. On certain holidays work can be arranged if suitable notice is given.

POLICE/AMBULANCE/FIRE: Telephone 999 in emergency. If no phone available contact the Harbour Master on VHF Radio Channel 16 or 14.

TELEPHONES: Many berths can be connected to telephone system using coin boxes; a connection charge is made.

TETNEY MARINE TERMINAL: 53.32 N. 00.07 E.

DOCUMENTS: The following documents should be completed for arrival:

Crew Manifest, C142.
Health Declaration, PS1.
Crew List, IB6.
Stores on Board List.

These documents will be handed to the Master of the Conoco work boat who will take them to Immingham for perusal by H.M. Customs and Immigration. On the return trip of the work boat the Agent and Customs will board to clear the vessel and attend to ships business. Pratique is granted by H.M. Customs when they visit the vessel.

Stores can be taken at the berth provided the Agents are given the order at least 72 hours before arrival.

LOCATION: *Tetney Marine Terminal* is the deep water crude oil terminal of Crude Oil Terminals (Humber) Limited, operated by Conoco Limited.

The position of the mono-buoy is Lat. 53° 32′ 18″ N., Long. 00° 06′ 48″ E., lying in approx. 60 ft. of water at low water and about 2.5 miles offshore.

Tetney is an open roadstead in the entrance of the River Humber on the East coast of England. The tidal rates in the vicinity of the mono-buoy reach 3.5 knots during Spring tides and the direction of the ebb and flood tides is generally East and West respectively. The tidal range varies between 7 ft. and 22.5 ft.

PILOTAGE: Vessels are requested to send ETA and draft to Spurn Pilot 12 hours before arrival and any adjustment to that time at least 2 hours before arrival. Spurn Pilots listen continuously on VHF Channel 16 and use Channel 14 as a working frequency.

Additionally, Agents should be advised of ETA 72 hours before arrival and the following information should be included in the cable, arrival draft, size of forecastle centre mooring fairlead, bow to manifold distance and cargo manifold size.

Pilotage is by Humber Pilots who board in the vicinity of the Humber Light Vessel from a fast launch. Additional berthing information can be obtained from Tetney Base.

The Berthing Controller and his Assistant will board as the vessel approaches the mono-buoy and will assist the Pilot in the mooring operation. He will advise the ships Officers during the mooring operation, hose connection and disconnection, and will act as Company representative throughout the vessel's stay in the berth.

Vessels must provide a pilot ladder with spreaders and grab lines for the Pilot and Berthing Controllers to board and whilst in the berth a suitable gangway with a pilot ladder near the end in order to board from a small boat.

HEALTH: See "Health – All Ports" before first U.K. port.

VHF: There is a VHF station at Tetney which is manned 24 hours a day and has the call sign, 'Tetney Base'. A continuous watch is kept on VHF Channels 16, 19 (161.55/156.95), and 48 (163.00/158.40). Channel allocation is as follows, 16 calling, 19 ship to shore, and 48 port operations. UHF (467.725 mc/s.) is allocated for use by the Conoco Berthing Controller, Tetney Terminal and the Conoco owned work boats.

The Pilot and Berthing Controllers carry portable VHF hand sets for use during berthing for inter-ship and ship to tug communications, Channel 9 (156.45 mc/s.).

Portable radios can be provided for vessels not having a VHF set and the Agents should be so informed in order to allow time to dispatch a set to the ship on arrival. A vessel arriving without suitable means of communication and not having informed the Agent of the fact could incur delays.

BERTHING: The following equipment is required to moor and is placed aboard the vessel when the Berthing Controller boards from the Conoco service craft, Spurn Haven:—

2 each 50 ton S.W.L. alloy steel shackles.

2 each 44 mm. diameter wire securing strops with a 2 m. soft eye at each end, overall length 37 m.

In addition to this mooring gear hose hang-off chains and securing equipment is placed aboard at the same time.

The vessel approaches the mono-buoy on a Westerly heading. A messenger (min. 40 mm. diameter) should be lowered to the water and this will be picked up by the Conoco mooring launch "Monogirl" when approx. 150 m. from the mono-buoy. This messenger will be made fast to a 80 mm. × 92 m. polypropylene pick up rope which should be heaved up as the vessel makes the final approach to the buoy. When the chafing chain is in the fairlead the open links are shackled to the wire strops which are turned up on a suitably sited set of bitts.

HOSES: Hoses are taken on the port side and the port derrick (min. S.W.L. 10 tons) should be rigged and ready for use on arrival.

Two 16 in. hoses are taken aboard, manifolds should be 16 in. 150 A.S.A. and 10 in. and 12 in. 150 A.S.A. can be accommodated by the provision of reducers. Should a vessel have any other size of manifold or be unable to provide adaptors to suit one of the sizes, Tetney Terminal will need to be notified at least 72 hours before arrival.

Hose connection and disconnection is carried out by the ships crew under the supervision of the Berthing Controller. Upon completion of discharge the hoses will be filled with sea water by the ship after which disconnection can commence. When the hoses are blanked off they will be hung off until just before sailing when they will be lowered to the Spurn Haven for towing clear.

POLLUTION: It is the Master's responsiblity to see that no oil of any kind is pumped or spilled overboard from his vessel. This includes oil water from the bilges, crude residues from previous voyages or any other matter that may result in the pollution of the sea. Owners and Masters should comply with any international regulations and recommendations concerning the prevention of pollution of the sea, especially in regard to the river Humber.

SHORE LEAVE: None of the officers or crew shall be allowed shore leave and no boats of any kind, except in an emergency, shall be lowered during the vessel's stay in the berth.

TYNE DISTRICT: 55.01 N. 01.24 W. (See Plan Book)

(Including Newcastle, North and South Shields, Jarrow, Tynemouth, Wallsend and Gateshead).

AUTHORITY: Port of Tyne Authority.

PORT OPERATIONS AND INFORMATION SERVICE: VHF: Call sign "Tyne Harbour Radio" on Channel 16, frequency 156.80 mHz and on Channel 12, frequency 156.60 mHz. The control station is situated at the Harbour Master's Office, North Shields, and is manned on a 24 hour basis. Vessels must obtain permission by VHF from the control station before entering the port, similar permisson must be obtained before movement within, or before sailing from the port. A service is provided for the passing of information to shipowners and Agents.

DOCUMENTS:

1 Crew List for H.M. Immigration Office.
1 Form C.142 (Tobacco List) supplied by H.M. Customs.
1 List of Private Addressed Packages not manifested (C.143) supplied by H.M. Customs.
Details of Oil in double bottom tanks, also measurement in cu. ft. of cargo in non-registered spaces.

PILOTAGE: Pilots normally board outside Harbour entrance within 1 mile radius. In bad weather Pilots will advise concerning entering. 12 hours advance notice via Agent requested. Frequency medium wave 2182 kHz. Call "Tyne Pilots". VHF – Call on Channel 16, working Channel 6. Cutter – 55 ft. in length painted black with white lettering "Pilots" – displaying pilot's flag. Efficient pilot ladder required as per Board of Trade regulations.

ANCHORAGE: Off entrance River Tyne, recommended 1.5 mile N.E. of North Pier. Minimum 12 fathoms.

RESTRICTIONS: Depths below Chart Datum (L.A.T.) from piers to West end of Jarrow Oil Wharf: 8.61 m. thence to Newcastle Bridges (except in main channels of Swing Bridge and High Level Bridge): 6.0 m. thence to West end of Dunston Staith: 4.8 m.

MAX. SIZE: Harbour entrance, length and breadth: no limit. Draft 8.0 m. any state of tide: up to 11.0 m. at high water.

Riverside Quay, draft up to 10.00 m.
Esso Oil Terminal, draft up to 9.00 m.
Newcastle Quay, 25 – 26 berths – 8.0 m.
RHM Mill, Gateshead – draft up to 7.0 m.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Cullercoats Radio W/T "GCC." Cullercoats Radio On R/T.
TUGS: Normally join inside piers, tow ropes optional except manufactured of man-made fibres. Orders for week-end arrivals must be given before 1030 hrs. Saturday. Rates on application to Tyne Tugs Ltd. Tel: South Shields 553361.
BERTHING:

Albert Edward Dock:
Warehouse Quay: 356 m. long, depth of water 7.9 m.
East Dock Wall: 162 m. long, depth of water 7.9 m.
Ro-Ro Berth No. 1, East Dock Wall: depth of water 7.5 m.
Heavy Load Berth (Ro-Ro No. 2) for heavy unit loads on transporters up to 510 tonnes; depth of water 7.9 m.
Tyne Commission Quay: 335 m. long, depth of water 7.11 m.
Tyne Commission Quay Extension: 118 m. long, depth of water 6.21 m.

Car Ferry Terminal:
Ro-Ro No. 3: 180 m. long, depth of water 7.11 m.
Ro-Ro No. 4: 140 m. long, depth of water 7.5 m.

Tyne Dock:

Factory Quay: 196 m. long, depth of water 7.0 m.
Riverside Quay: 264 m. long, depth of water 10.5 m.
Sutherland Quay (Waiting Berth): 137 m. long, no authorised depth of water.

Newcastle Quay:
930 m. long, depth of water up to 8.61 m.
Spillers Tyne Mill: 173 m. long, depth of water 8.01 m., discharge rate 150 tonnes per hour. Silo capacity 34,000 tons.
RHM Mill: 198 m. long, depth of water 8.01 m., discharge rate 150 tonnes per hour. Silo capacity 22,000 tons.

Jarrow Staith: 2 berths, depth of water 7.11 m. Loading rates 1,000 tonnes per hour East berth, 500 tonnes per hour West berth.
Harton Staith: 1 berth, depth of water 6.4 m.

TANKERS:
Shell (UK) Limited, Jarrow. 189 m. long, depth of water 8.0 m.
Esso Petroleum Company Limited, Howdon:–
Ocean Jetty: 274 m. long, depth of water 9.51 m.
Coaster Jetty: 167 m. long, depth of water 6.0 m.
Velva Liquids Limited, South Shields: 170 m. long, depth of water 8.0 m.
Velva Liquids Limited, North Shields: 248 m. long, depth of water 7.11 m.
Tanker Cleaning Berth Howdon: 248 m. long, depth of water 7.11 m.

SERVICES: The tanker-cleaning berth at North Shields provides accommodation for vessels about 248 m. length, depth alongside 7.11 m. below Chart Datum. The shore installation, which is owned and operated by the Tyne Tanker Cleaning Co. Ltd., includes large reception capacity for tank washing and oily sludge, separators of the latest type which can deal with oily water at the rate of 1,000 t.p.h. and various treatment and storage tanks; together with boilers and steam pumping plant. Expert staff and modern equipment for carrying out tank washing, cleaning and gas-freeing of vessels at the berth, and for other essential duties are also available, making it possible for tanker crews to be paid off immediately on arrival. The whole installation is protected by a most complete system of fire precautions and fire-fighting equipment.
BRIDGES: At Newcastle 10 miles from entrance, Swing Bridge negotiated against tide; other bridges, max. mast height 24.7 m. above MHWS.
STEVEDORES: Principal Stevedores Port of Tyne Authority. All arrangements through Agent. Stowage plan required prior to arrival.
Plant pool as follows:–

Albert Edward Dock:
Warehouse Quay – 4 cranes, 5 – 6 tonnes.
East Dock Wall – 3 cranes, 5 tonnes.
Tyne Commission Quay – 7 cranes, 3 – 42 tonnes.
Tyne Commission Quay Extension – 2 cranes, 6 tonnes.
Ro-Ro Berths – 4 terminal tractors.

Tyne Dock:
Riverside Quay – 5 cranes, 12 tonnes.
North West Quay – 9 cranes, 3 – 10 tonnes.
Factory Quay – 2 cranes, 3 tonnes.

Newcastle Quay: – 13 cranes, 5 – 30 tonnes.
There is a pool of 58 fork lift trucks of 5,000 – 22,000 lbs. capacity available for any location. These trucks can be fitted with attachments for handling paper, pulp, etc.
MEDICAL: Hospitals available, Advise Agent in advance if medical attention required on arrival.
DENSITY: Entrance/Tyne Dock – 1025; Tyne Dock/Jarrow 1020; Newcastle Quay 1005/1010.
FRESH WATER: Available ex-Water Boat, rate of delivery up to 150 t.p.h.
FUEL: All grades ex-installation, or by barge, 24 hours notice required.
GANGWAY/DECK WATCHMEN: Available if required.
OPENING/CLOSING HATCHES: Crew allowed open and close.
CERTIFICATES:
Register.
Load-line.
Safety Construction.
Safety Equipment.
Safety Radio.
Trinity Light Bills.
CUSTOMS ALLOWANCE: At the discretion of Local Customs Inspector. Normal allowances are equivalent of 0.5 lb. tobacco per man and equivalent to 1 bottle wine per man. Allowances may be halved for home trade vessels. Vessels in port more than 3 or 4 days may receive extra allowances.
IDENTIFICATION CARDS: Not required.

SHORE LEAVE: Allowed.
AGENT: Lambert Brothers Ship Agencies Ltd., 'B' Floor, Milburn House, Dean Street, Newcastle-upon-Tyne, NE1 1LY. Tel. Newcastle (0632) 27314. Telex: 53405. Cable address: "Lambros."

WARRENPOINT: 54.06 N. 06.16 W. (See Plan Book)

PORT LIMITS: Seaward to a line from Ryland River (South Coast) to Ross Memorial (North Coast) approximately 3,000 m. from Warrenpoint.
DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
1 Store List.
Vessel's Papers and Certificates.
1 Manifest or Bill of Lading.
PILOTAGE: Not compulsory. Pilot station at Greencastle Pier at entrance (North side) to Carlingford Lough. VHF (Warrenpoint Pilot) radio, Channels 16 and 12. Notice to Agents of ETA at 48 hours and 24 hours.
ANCHORAGES: Safe anchorage at Fairmont Roads S.E. Greenore and also inside Carlingford Lough N.W. of No. 13 Buoy.
RESTRICTIONS: None except draft of vessel. Advise Agents.
HEALTH: No certificate necessary. In event of disease or fever contact Agent in advance. Hospitals available.
Also see "Health-all ports" before first UK port.

RADIO: All messages to Agents through Portpatrick Radio or Anglesea Radio.
VHF: Pilot station (Warrenpoint Pilot) and Port Radio (Warrenpoint Harbour) on Channels 16 and 12.
TUGS: None.
BERTHING: All berths except Town Dock have 17 ft. at LWOST.
STEVEDORES: Warrenpoint Harbour Authority. Telephone: Warrenpoint 3381. Telex: 74660
CARGO HANDLING FACILITIES:
2×35 tonne Liebherr Transporter Container Cranes;
1 Poclain HC300 Hydraulic Crane;
1 Jones 971 HLB Dockside Crane;
2 Babcock Wilcox Luffing Grabbing Cranes;
BULK CARGO FACILITIES: Coal – 2 Luffing Grabbing Cranes at 150 t.p.h.

Grain discharged at up to 250 t.p.h. to Grain Silo of 8 bins, total capacity about 4,800 tonnes. Flat grain store capacity 4,000 tonnes also available.
SPECIALISED CARGO HANDLING FACILITIES: Roll-on/Roll-off berth with 15 ft. at LWOST. Bridge has HA loading. Ramp 6 m. wide Marshalling area about 8 acres.
FUEL: Available by road tankers. 48 hours notice usually required.
FRESH WATER: Available from pipes on quay.
CONSULS: None.
REPAIRS: Small repairs can be undertaken.
DRY DOCKS: None.
SURVEYORS: Lloyds – Jos. Fisher & Sons, Ltd. Warrenpoint 3500.
GANGWAY/DECK WATCHMEN: Neither compulsory nor necessary.
HATCHES: Opening and closing by crew.
CUSTOMS ALLOWANCE: As permitted by UK Customs and Excise.
CARGO GEAR: Ship's gear only used if shore cranes not available.
REPATRIATION: Airports (Belfast and Dublin) 2 hours away. Transport available. By sea – Belfast 1 hour.
AIRPORTS: Belfast (Aldergrove) 60 miles. Dublin 75 miles. Schedule flights daily to London.
TIME: GMT.
HOLIDAYS: New Year's Day; St. Patrick's Day (17th March); Easter Monday and Easter Tuesday; 1st Monday in May; 12th July; 13th July; 15th August; Christmas Day and Boxing Day.
POLICE/AMBULANCE/FIRE: Dial 999 and ask for service required.
TELEPHONES: Not possible to place telephones on board.
SERVICES: Check with Agents. Most services can be supplied given 24 hours notice.
SHORE LEAVE: After clearance inwards, Crew members allowed ashore without restriction. No passes issued.
DELAYS: Delays in loading or discharging are minimal and infrequent.
AUTHORITY: Warrenpoint Harbour Authority.

WATCHET: 51.11 N. 03.20 W. (See Plan Book)

DOCUMENTS: Crew List, Store List, Ships Register, Manifest or Bills of Lading.
PILOTAGE: Trinity House Outport District, Compulsory, ETA 24 hrs. before arrival to Harbour Masters Office, Watchet 31264, after hours Minehead 3430.
ANCHORAGE: Safe anchorage Blue Anchor Road.
RESTRICTIONS: Accordance with state of tide and draft. Vessels enter 2 hours before HW.
MAX. SIZE: Max. permissible length 97 m., breadth 16 m., draft restrictions according the height of tides, max. draft Neap tides 12 ft. and Spring tides 14 – 16 ft.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: It is best for vessels to give ETA by RT to Lands End or Ilfracombe Radio.
VHF: Watchet Radio Channels 16, 12, 14 and 9.
TUGS: None.
BERTHING: 2 quays, 1 of 150 m., 1 of 120 m.
CRANES: 3 cranes, 2 of 5 tons, 1 of 10 tons.
BULK CARGO: Cranes with grabs.
STEVEDORES: Watchet Marine Ltd.
MEDICAL: Port Doctor in Watchet.
DENSITY: Salt 90%.
FRESH WATER: Available on the quay.
FUEL: All grades, advance notice required.
FIRE PRECAUTIONS: Normal port precautions.
CONSULS: At Bristol.
REPAIRS: Normal repairs to ships possible notice required.
SURVEYORS: Available from nearby ports.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Carried out by crew.
CUSTOMS ALLOWANCE: Decided by the Customs Officer in charge.
CARGO GEAR: Shore gear, cranes and forklifts.
REPATRIATION: Facilities exist for crew changes.
AIRPORT: Nearest airport at Bristol.
TIME: GMT and British Summertime.
HOLIDAYS: Cargo work can be arranged.
POLICE/AMBULANCE/FIRE: Phone 999 for all three services.
TELEPHONES: None on quay.
SERVICES: Chandler available.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: None required.
DEVELOPMENTS: New warehouse and lorry park.
AUTHORITY: West Somerset District Council.

WHITEHAVEN: 54.33 N. 03.36 W. (See Plan Book)

DOCUMENTS: Usual required for clearing a vessel from foreign port, i.e. Crew list, Passenger list, Customs Documents, Ships Register, Manifest and Bills of Lading.
PILOTAGE: Request for Pilot is made by International Code signal G, sound and visual. ETA should be sent 12 hours in advance either to ship's Agent or Harbour Master or both. Area for taking Pilot on board 4 to 5 cables West of Harbour. Pilot boat is a 36 ft. varnished boat, name "J. T. Pears". VHF is installed.
ANCHORAGE: Same area as for boarding Pilot according to draft.
RESTRICTIONS: Vessels may dock from 1.5 hours before high water till 1 hour after high water according to draft.
MAX. SIZE: 270 ft. length, 40 ft. beam and 17 ft. draft (deepest) on spring tides, 14 ft. draft (deepest) on neap tides.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Port Patrick and Anglesey Radio Stations.
TUGS: No tugs.
CRANES:
1×35 tonnes lifting capacity.
2×10 tonnes lifting capacity.
1×15 tonnes lifting capacity.
2×5 tonnes lifting capacity.
MEDICAL: Agent should receive notice in advance of any medical treatment required. Hospital services are readily available.
DENSITY: Any state of tide density is 1025.
FRESH WATER: Fresh water is available on all berths, any quantity on request to ship's Agent.
FUEL: Most grades and types available.
FIRE PRECAUTIONS: Usual precautions are taken when inflammable cargo is being loaded or discharged.
GANGWAY/DECK WATCHMEN: Advisable to have a watchman but not absolutely necessary.
OPENING/CLOSING HATCHES: Always opened and closed by crew.
CERTIFICATES: Derat certificate, Load Line certificate, Radio R/T certificate, etc.
CUSTOMS ALLOWANCE: 200 cigarettes, 1 bottle spirits.
IDENTIFICATION CARDS: None required.
CONSULS: Norway, Sweden, Denmark and the Netherlands.
REPAIRS: All types of deck and engine repairs carried out.
REPATRIATION: Facilities exist for effecting crew changes and arranging any necessary repatriations.
AIRPORTS: Nearest airports are at Manchester, Newcastle and Prestwick, all approx. 130 miles away.
HOLIDAYS: Cargo may be worked on following days: New Year's Day, Good Friday, Easter Monday, Whit Monday, August Monday, Christmas Day and Boxing Day.
POLICE/AMBULANCE/FIRE: Telephone numbers of these services in order are: Whitehaven 2616, 3181 and 2151.
TELEPHONES: No special arrangements exist for placing telephones on board vessels.
SHORE LEAVE: Crew members may come and go at all times.
DELAYS: There are very seldom any delays in berthing and none in loading, discharging or bunkering.
AUTHORITY: The Whitehaven Harbour Commissioners.

NOTES

Please also advise Shipping Guides Ltd.

United States of America

GENERAL

AGRICULTURE: All ports.

Arrival Notification: The vessels' Master or port Agent must notify the U.S. Department of Agriculture (USDA) Inspector at each port of arrival of expected time and location of arrival.

Documents: The cargo, stores, and crews' effects lists or manifests must be available for review by the boarding USDA Inspector.

Inspection: The USDA Inspector will examine the galleys, storerooms, lockers, mess areas, and crew quarters in some instances for prohibited plant materials (fruits, vegetables, and plants) and meat products. Some categories of food materials may require being placed under seal. Also, inspections may be made of onboard cargo and cargo holds.

Garbage: All food wastes aboard vessels arriving from foreign or offshore areas (except Canada) must be handled in accordance with USDA regulations. Garbage may be held aboard vessels in leakproof, covered containers for later disposal or, it may be removed with permission of a USDA Inspector for disposition in approved facilities. Dumping in territorial waters is unlawful.

Treatments: If quarantine-significant pests are found aboard a vessel, an Emergency Action Order may be issued to the Master. It will prescribe what treatments are required to the affected articles or area of the vessel and when this treatment must be accomplished.

Animals/birds: All live animals or birds aboard vessels must be reported to the USDA Inspector.

For additional information: Write to "Quarantines", U.S. Department of Agriculture, Federal Building, Hyattsville, MD 20782.

HEALTH: All ports.

The U.S. Public Health Service does not maintain Quarantine Stations at each port of entry. The smaller ports are under the jurisdiction of Quarantine Stations located at strategic ports of entry. Matters of public health significance occurring on vessels destined to ports not manned by Public Health Service personnel should be reported to the Quarantine Station having jurisdiction over that port.

Masters of Vessels arriving at United States ports

Effective July 1, 1973, radio pratique as a method of quarantine clearance will be discontinued at all ports under control of the United States. Changes in regulations, policies, and procedures concerning maritime public health clearance have been promulgated.

Vessels subject to routine inspection

Only vessels in the following categories will be subject to onboard public health inspection upon arrival at ports under control of the United States:

A. Crew or passengers having:

1. Temperature of 100° F (38° C) or greater (a) which persisted for 2 days or more; or (b) which was accompanied or followed by any one or all of the following: rash, jaundice, glandular swelling; or
2. Diarrhoea severe enough to interfere with work or normal activity; or
3. On board occurrence of death, regardless of the signs and symptoms above.

B. Vessels which have been in a plague infected Port in the 60 days prior to arrival in the United States.

Procedures. Vessels in any of the categories, A, or B above will be granted provisional pratique and boarded upon arrival for inspection. In addition, vessels boarded for quality control may be boarded upon or subsequent to arrival. In accordance with regulations you must inform the quarantine station, through your vessel Agent, at or nearest the intended port of your vessel's first arrival in the United States of the occurrence of illness as specified in A above. Based on information you provide your Agent, or information your Agent already possesses regarding your vessel's itinerary, your Agent will notify the quarantine station if your itinerary included a plague infected country. Arriving vessels no longer need to complete a Maritime Public Health Declaration unless boarded for inspections as described above. The boarding Inspector will provide the declaration.

These changes reflect our confidence that you will continue to report, in advance of arrival in the United States, the on-board occurrence of illness compatible with the signs and symptoms specified above.

PILOTAGE: North West Coast of U.S.A.
Columbia River Bar Pilots are "Sea Pilots" for all ports in Columbia and Willamette Rivers. Namely, Astoria and Portland (Oregon), Longview, Kalama and Vancouver (Washington) – when entering from sea and if providing above Astoria, Columbia River Pilots relieve Bar Pilots for balance of transit.

COLUMBIA RIVER BAR PILOTS
P.O. Box 81, Astoria, Oregon 97103
TWX 910-466-8014
Telephones (503) 325-2641 or 325-2642

RADIO FACILITIES

Pilot Boat Peacock	WS 7217
Pilot Boat Columbia	WYE 7344
Bar Pilots Office, Astoria (Ch. 16) (156.80)	KOK 360
Astoria Marinephone "KFX"	
Ships Call on	2206 kc/s.
KFX Answers on	2598 kc/s.

Or call on and receive KFX on Channel 26.

Pilot boat now equipped with single sideband radios.

Pilot boat guards 2182 kHz and will switch to working frequency after contact.

In order there be no delays, vessels due to arrive at the Columbia River and desiring a Bar Pilot, must cable or telephone the Columbia River Bar Pilots. (Pilot normally not on station unless cable or telephone message received.) USE RADIO STATION KLB, EVERETT, WASHINGTON at least 12 hours before arrival at the lightship. Code address, "BAR PILOTS, STATING THE TIME OF ARRIVAL". If transmitted by any other radio station, delay may occur. If vessel is equipped with VHF, use Channel 16 (156.80 mc/s.) to call the pilot boat or Bar Pilots Office, Astoria (KOK 360) and shift to Channel 13 (156.65 mc/s.)

PILOT LADDER INSTRUCTIONS

1. Please contact the pilot boat via voice radio (Channel 16 or frequency 2182) approximately 30 minutes prior to arrival for desired lee and boarding instructions.
2. The Columbia River Bar Pilots have 2 pilot vessels; the "Peacock" and the "Columbia". When the "Peacock" is on station, Masters will be instructed to rig their pilot ladder 4 ft. above the water's edge. When the Columbia is on station, the Master will be instructed to rig the ladder 10 – 12 ft. above the water's edge. The above-mentioned distances above the water are of the utmost importance, particularly in the case of the "Columbia", as the pilot boat can and has pulled the ladder down when it becomes pinched between the pilot boat and the side of the vessel. Pilot ladders and boat ropes shall not be permitted to drag in the water. No tag lines, pull ropes or trailing lines shall be attached to the bottom of the ladder.
3. Pilot ladders shall be rigged amidships, over "draft marks" clear of all obstructions, such as accommodation ladders, and clear of overside discharges from the engine room and deck scuppers.
4. The pilot ladder should be kept clean and used for embarking and disembarking Pilots only. The ladder shall be made in one continuous length, not 2 sections shackled or lashed together. The ladder shall be equipped with spreaders approximately 10 ft. apart in accordance with SOLAS regulations. The ladder must be in good condition, the treads horizontal and the upper surface of rough non-skid quality.
5. The ladder must be adequately lit at night by means of a light shining well over the ship's side in the vicinity of the ladder. The area of the deck where the Pilot boards and leaves should be free of debris and well lighted. Where portable stanchions and bulwark steps are used, they shall be rigidly attached to the ship's structure. A life ring with water light and lifeline attached should be ready at hand. Rigging of the ladder and embarking and disembarking of the Pilot must be under the supervision of a licensed officer.
6. Boat ropes are not to be used, all pilot boats are power propelled.
7. Manropes shall be of manila 3 in. circumference. The manropes shall be free of any knots including the lower end. The manropes should be rigged 1 – 2 ft. longer than the pilot ladder. Manropes are not to be rigged for boarding unless otherwise advised.
8. Should vessel be fitted with a mechanical ladder, the ladder should have a double fall. Also, a conventional ladder must be kept ready at hand, should it be required.
9. If vessel is to take a deck load of logs, please discuss with your Agent the building of a catwalk to provide safe passage to and from the pilot ladder.

SHIP'S OFFICER'S REPORT: The information given for the port of New Orleans (U.S.A.) applies to all the ports in the U.S.A. in the event of the vessel arriving from abroad or from a previous U.S. port. All the documents such as Crew List, Passenger List (Form I-418), Deck, Engine, Stewards & Bonded Stores Lists (Form 1303), Crew's Effects Declaration (Form 1304), are required in duplicate at each port for entry inward.

ALBANY, New York: 42.40 N. 73.45 W. **(See Plan Book)**

DOCUMENTS: If first port of call in U.S., 2 complete Custom's Manifests describing all cargo on board and ports of discharge. Also 1 Cargo List for Albany cargo; 3 Crew Lists; 3 Store Lists, 3 Curio Lists, the Ship's Register, Load Line Certificate and Tonnage Tax Certificate.

PILOTAGE: Hudson River Pilot boards vessel off Yonkers, N.Y. Cable address: "Hudpilots, Yonkers, N.Y."

ANCHORAGES: Several anchorage areas in Hudson River en route to Albany if required due to weather. Vessels cannot anchor at Port of Albany.

RESTRICTIONS: Hudson River Channel to Albany has controlling depth of 32 ft. MLW. Vessels with draft in excess of 28 ft. will be required to transit river on favourable tide as directed by Pilot.

MAX. SIZE: Max. permissible length 750 ft.; breadth 110 ft., draft 30 ft. Turning basin at Albany 1,100 ft. in width.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New York Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: One 2,500 h.p. tug stationed at port at all times; additional tugs available upon advance request. Normally 1 tug is sufficient for turning and docking. Tug's lines are used.

BERTHING: 4,000 linear ft. of marginal wharf available at APDC terminal for general cargo, grain, lumber, etc., 32 ft. alongside wharf. Various privately operated deep-water petroleum terminals in port area.

Facilities: 13.5 million bushel grain elevator. 17 million gallon molasses storage – 3 terminals. Scrap Iron Terminal, Banana Terminal.

Equipment: Available at the Port of Albany:
2 Diesel-operated wharf cranes, 5 ton capacity each
1 Gasoline crawler crane, 15 ton capacity
3 Fork-type telescopic lift trucks, 15,000 lb. each (height of lift 17 ft.)
12 Fork-type telescopic lift trucks, 5000 lb. to 7000 lb. each
2 Clamp equipped telescopic lift trucks, 7000 lb. capacity each
9 Gasoline operated lumber carriers
2 Front-end loaders, 1.25 cu. yd. capacity each
1 180 ton capacity bulk car unloader
21 5/8 cu. yd. clamshell buckets
Hoppers for shipside bulk materials handling
Complete bagging equipment for all bulk materials

BRIDGES: Minimum vertical clearance of bridges on Hudson River en route to Albany is 135 ft.

STEVEDORES: Rates and information can be obtained from John W. McGrath Corporation; 7 gangs available.

FRESH WATER: Supplied during regular working hours daily except Saturdays, Sundays, and holidays at $2.00 per 100 cu. ft. plus $15.00 service charge per daily delivery on straight time. Additional charge if supplied during other periods.

GANGWAY/DECK WATCHMEN: Available via ship chandler not required but recommended.

CONSULS: Italian Vice-Consulate located at Albany, other consulates available at New York City.

REPAIRS: Minor deck and engine repairs can be handled.

AIRPORT: 7 miles distant from port: served by Allegheny, America, Altair and Executive Airlines.

TIME: Eastern Standard and Eastern Daylight Saving, 5 hours minus GMT.

HOLIDAYS: Standard U.S. holidays; cargo work can be arranged on all holidays at overtime rates, except July 4th, Labour Day and Christmas Day.

SHORE LEAVE: Crew members allowed ashore unless restricted by Customs or Immigration requirements.

SHIPMASTER'S REPORT: February 1980.
Pilotage: Compulsory. Pilot boards at Ambrose Light vessel and Hudson River Pilot boards at Yonkers.
Restrictions: Vessels able to enter and leave during darkness at any stage of the tide.
Max. Size: LOA 600 ft. (Approx). *Max. Draft:* 31 ft. to 32 ft. depending on height of river.
Tugs: One tug stationed at Albany (approx. 1,800 h.p.). Additional tugs come from New York.
VHF: Tug only listens out on VHF before vessel arrives.
Services: Following services available: Fresh water, fresh provisions, small repairs, machine shop, airport, Lloyd's surveyor (from New York), Salvage surveyor (from New York), lubricating oil, groceries and meats.
Berthing: Pier No. 2 Albany: Berth located 3 miles from Albany and 145 miles from the entrance. Vessels size limited by draft and space available in swinging room in basin. Max. size approx. LOA 600 ft., draft 31 ft. Least depth of water in channel from sea to berth 33 ft. (approx). Vessels able to dock and undock at any stage of the tide, day or night.
Grain Loading Facilities: Available.
Ro/Ro Facilities: Available, port now being used to discharge cars from car carriers. No floating cranes available.

AUTHORITY: Albany Port District Commission.

ALEXANDRIA, Virginia: 38.48 N. 77.03 W.

(See Plan Book)

DOCUMENTS/PILOTAGE: Refer to "Hampton Roads".
RESTRICTIONS: Anchoring necessary between 2200 to 0600 hrs. Berthing daylight only.
MAX. SIZE: Governed by draft only – max. 22 ft. 6 in. all times.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Washington, D.C. Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: WMH Baltimore, Md.
TUGS: None required.
BERTHING: Berthing 0600 to 2200 hrs.
BRIDGES: 1 bridge, closed Monday through Friday 1600–1830 hrs. and 0630–0900 hrs.
STEVEDORES: Informally arranged through Receivers or Shipper's Agents.
MEDICAL: Hospital available.
FRESH WATER: Available at berth – 10 t.p.h.
FUEL: Not available.
GANGWAY/DECK WATCHMEN: Shore watchman provided.
OPENING/CLOSING HATCHES: Stevedores. Vessel – depending on understanding.
IDENTIFICATION CARDS: Required by Immigration.
REPAIRS: Minimal facilities.
REPATRIATION: Facilities exist.
AIRPORT: 3 miles. Washington National – multiple flights.
TIME: GMT minus 6 hours.
POLICE/AMBULANCE/FIRE: Agents arrange. Watchmen on duty.
SHORE LEAVE: Allowed.
DELAYS: No unusual delays.
AUTHORITY: Virginia Port Authority, Norfolk, Va.

ANACORTES, Washington: 48.31 N. 122.36 W.

(See Plan Book)

DOCUMENTS, PILOTAGE, etc: Refer to "Tacoma".
ANCHORAGES: East End Guemes Channel, 54 ft. min. depth.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Join vessel in Guemes Channel at Anacortes – lines optional.
BERTHING: Pier No. 1, depth 30 ft.; Pier No. 2, depth 35 ft.
STEVEDORES: Request 24 hours notice.
FRESH WATER: Available from city water system.
FUEL: Available from Shell and Texaco.
GANGWAY/DECK WATCHMEN: Not required by port.
OPENING/CLOSING HATCHES: Stevedores.
CUSTOMS ALLOWANCE: No definite quantities prescribed; reasonable allowance at discretion of Customs Inspector.
CARGO GEAR: ILWU requirements.
IDENTIFICATION CARDS: Required.
REPAIRS: Minor repairs only.
AIRPORT: 75 miles Seattle International.
TIME: GMT minus 8 hours. From end April to end October, Pacific Daylight Saving Time, GMT minus 7 hours.
HOLIDAYS: See "Tacoma".
POLICE/AMBULANCE/FIRE: Police, Ambulance and Fire dial 911.
TELEPHONES: Available at Pier 2 and at Pier 1 by Phone Co.
SHORE LEAVE: Allowed.
AUTHORITY: Port of Anacortes.

AGENT: See "Seattle".

ANCHORAGE, Alaska: 61.12 N. 150.00 W.

(See Plan Book)

DOCUMENTS:

- 3 copies Cargo Manifest (Forms 7527.A or 7527.B), the original showing all cargo on board, and 2 copies showing only cargo for this port.
- 2 copies Crew Manifest (curio list).
- 2 copies Stores List.
- 2 copies Passenger List (Form I.418).
- 2 copies Crew List (Form I.418).

Customs Boarding Officer will also examine Ship's Register and Load-line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:

- Master's Oath (Customs Form 3255).
- All foreign clearances.
- U.S. Certificates of payment of tonnage tax (Customs Form 1002).
- Certified Crew List.

PILOTAGE: The pilot station for Anchorage is at Homer, Alaska. Vessels may contact Pilot by radio telephone. Telegraphic address "Almarrpilot", ETA notice requested 24 hours. Listens VHF Channel 10. Pilot boat green and white. Pilot flag by day, pilot light at night. Pilot boat 1 mile South of Homer Spit (Coal Point) Homer Alaska. In bad weather, wait inside Homer Spit and advise via radio-telephone.
Also see "Homer".
ANCHORAGES: The best anchorage for deep-draft vessels is West of Anchorage in depth of 10 to 12 fathoms, silt bottom. Holding ground is good.
TIDE AND CURRENTS: The diurnal range of tide is 29.6 ft., currents from 1.7 to 6 knots or more in mid-channel.
RESTRICTIONS: Flow and pan ice is encountered in the Cook Inlet from approximately the end of November until the end of February. This ice does not freeze solid due to the tidal action. The port is in year-round use and expert information on Winter conditions may be obtained from any of the highly qualified licensed ship pilots available in the area.
MAX. SIZE: All berths 35 ft. MLLW.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Port of Anchorage "KBT-42" on HF-AM and SSB. "WHJ-82" on VHF-FM.
TUGS: Join vessel 1.5 miles S.W. of docks.
BERTHING: 600 ft. general cargo Terminal No. 1, apron width 47 ft., live road limit 600 lb. per sq. ft. General cargo Terminals No. 2 and 3, 610 ft. and 893 ft. respectively, apron width 69 ft. Depth alongside face at MLLW 35 ft.

Shore Cranes: Level luffing gantry and Paceco container cranes. Capacity: Level luffing gantry 7.5 tons and 40 tons (5 ton high-speed whip lines). Container cranes 27.5 tons.

Outreach from fender face is 70 ft. for the gantries and 81 ft. on the Paceco. Clear height above MLLW is 132 ft.

TANKERS: The Petroleum Terminal at the port of Anchorage is contiguous to the general cargo docks. The POL Dock is 612 ft., long and contains multiple petroleum manifolds in addition to those on Terminal No. 1. Depth 35 ft. alongside.
STEVEDORES: Working Hours: Stevedores do not work on January 1st, September 6th, November 25th and December 25th. The first 6 hours of any shift between 0800 hrs. and 1500 hrs. is at the straight time rate. Work performed on Saturdays, Sundays, holidays and between 1700 hrs. and midnight is at overtime rate. Meal breaks are 1145 hrs. to 0100 hrs. and 1645 hrs. to 1800 hrs. Stevedores do not normally work between midnight and 0700 hrs.
SPECIALISED CARGO HANDLING FACILITIES: Two 27.5 ton Paceco container cranes servicing general cargo Terminal 2 and 3; private bulk cement pipe-lines to shore silos. Ro/Ro service available.
DENSITY: From 1.0098 to 1.0102.
MEDICAL: All facilities available. 3 local hospitals.
FUEL: All grades available.
FRESH WATER: Public Health Service certified water station.
GANGWAY/DECK WATCHMEN: Required shipside.
OPENING/CLOSING HATCHES: By stevedores.
AIRPORT: 5 miles; served by regular foreign and domestic airlines.
CUSTOMS ALLOWANCES: At the discretion of customs officer. Normal allowance is 200 cigarettes or 2 lb. tobacco and 1 quart wine or spirits per man. Additional allowances may be given if considered necessary, due to length of vessel's stay in port.
IDENTIFICATION CARDS: Standard U.S. Immigration Forms I.–95 to be made up for each crew member on arrival. Not necessary for crew men already holding Form I.–95, issued for the same vessel.
HOLIDAYS: New Year's Day (January 1st); Lincoln's Birthday Washington's Birthday; Seward's Day (March 30th); Memorial Day; Independence Day (July 4th); Labour Day; Columbus Day; Alaska Day (October 19th); Veterans' Day; Thanksgiving Day; Christmas Day (December 25th).
POLICE/FIRE/AMBULANCE: Police 272–1414; Ambulance/Fire 272–1515.
TELEPHONES: Telephones available shipside.
AUTHORITY: Port Director, Port of Anchorage.

ASHTABULA, Ohio: 41.53 N. 80.48 W.

(See Plan Book)

Refer to "St. Lawrence Seaway" for important general information.
PILOTAGE: Nearest pilot station is the Welland Canal, Canada.
ANCHORAGES: No anchorage inside boundaries. Good anchorage outside to East of the entrance, depth approx. 20 fathoms.
MAX. SIZE: The Pinney Dock and Transport Company stevedoring dock handling overseas cargoes located just East of entrance to the port. Channel depth of 28 ft. 4 berths, 27 ft. alongside; length of facilities up to 700 ft. by 75 ft. beam. No facilities for oil carriers.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Chicago Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Contact Lorain, Ohio ship-to-shore station for local connections.
TUGS: Tugs normally join vessels just inside harbour entrance. Use ship's or tug's lines optional; if tug lines used an additional charge of 10% of the tonnage will be added. For tug service call ship-to-shore tug Idaho, FM Channel 51.
STEVEDORES: Work gangs for loading and unloading provided by the Pinney Dock and Transport Company.
MEDICAL: Vessels requiring medical attention call U.S. Coast Guard station located in the main river by calling AM Channel 20. Ambulance and hospital service available. No inoculation, vaccinations, or fever certificates required.
DENSITY: Fresh water.
FRESH WATER: Available at stevedoring dock.
FUEL: Available on 24-hour notice.
FIRE PRECAUTIONS: City fire department. Also water line on face of the dock available.
GANGWAY/DECK WATCHMEN: Overseas stevedoring dock enclosed wire fence, watchmen on dock at all times, guard at main gate.
OPENING/CLOSING HATCHES: Optional by crew or stevedores.
CUSTOMS ALLOWANCES: Only allotments per person consumed aboard allowed.
IDENTIFICATION CARDS: Required.
CONSULS: Nearest at Cleveland.

REPAIRS: All types of deck and engine repairs available; also topside shell repairs.
REPATRIATION: Can be arranged.
AIRPORT: Nearest airport approx. 10 miles South with commuter services to Cleveland Hopkins Airport. Cleveland Hopkins Airport approx. 70 miles West.
TIME: Local Eastern Standard Time except from May to October – Daylight Saving Time.
HOLIDAYS: Stevedoring docks double time on holidays and time plus one-half on Saturdays and Sundays.
POLICE/AMBULANCE/FIRE: Police, 993-8281; Ambulance, 964-3121; Fire, 964-7123.
TELEPHONES: No provisions for placing telephones aboard vessels.
SHORE LEAVE: Crew allowed ashore.
DEVELOPMENTS: Pinney Dock and Transport Co. are dredging a second slip (length 2,000 ft.) and constructing a third pier (length 2,000 ft., depth 28 ft.).
AUTHORITY: Ashtabula Port Authority.

ASTORIA, Oregon: 46.11 N. 123.50 W.

(See Plan Book)

PILOTAGE: Columbia River Bar Pilots, P.O. Box 81, Astoria, Oregon, 97103. Tel 503-325-4521. Also see "General – Pilotage" before first U.S.A. port (Albany).
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
GENERAL: The Port of Astoria Terminals are located 10 miles up-stream from the mouth of the river and 86 miles downstream from the City of Portland, Oregon.

The channel in the Columbia River, from the ocean to Astoria, has a width of 500 ft. and project depth at low water of 40 ft.

At Astoria, the mean range of tide is 7.5 ft. with extreme tidal range of about 12 ft. On a flood tide a velocity of 2 knots is seldom exceeded, but the velocity sometimes attains 5 knots during the ebb tide. This variation is due largely to the strength of the river discharge, with maximum velocity during the freshets which occur during the months of May, June and July. These freshets, however, do not effect the height of water at Astoria. The Columbia River is navigable throughout the year.

A total of 9 berths at the Port of Astoria Terminals are periodically dredged to 35 and 40 ft. at zero tide, but depths vary from time to time.

Pilotage at the entrance to and on the Columbia River is optional.
TUGS: Tugs are available for assisting ships at the option of the vessel.
BERTHING: The 3 piers, including Ro-Ro facilities and barge ramp, comprising the Port of Astoria Terminals are located in the Western part of the City of Astoria at the confluence of Youngs Bay and the Columbia River. Astoria is served by 1 railroad, 3 major highways and 6 barge lines. The piers extend to the main ship channel, allowing vessels to berth or sail at any time without the use of towboats. The terminals are operated by the Port of Astoria Commission as a public property open to all carriers and shippers.

Pier No. 1:
Location: Foot of Portway Street, adjacent to Pier No. 2, and separated therefrom by a water slip 400 ft. in width.
Warehouse Shed: Mill type hollow tile wall construction. 167,000 sq.ft. floor area. Floor load of 600 lbs. per sq.ft.
Shed width 92 ft., slip side and face or end.
Shed length 1,150 ft. on slip side; 520 ft. face or end. Blacktop floor. Complete automatic sprinkler system.
Principal Commodities: General commodities, break bulk, plywood, frozen tuna, grain, sacked goods.
Berths: 2 vessels. 650 ft., face or Northerly end; 1,000 ft., slip or Westerly side, depth 40 ft.
Pier Apron: Width 24 ft., slip side; 16 ft., face or end. Dock is 16.1 ft. above MLW.
Equipment: Dock tractors, fork lift trucks, trailer trucks, hand trucks and other necessary miscellaneous cargo handling equipment.
Bagging Facilities: Bagging facilities for dry bulk commodities such as urea, pulses and dry beans. Usage and rates will be negotiated. (Contact Traffic Department).
Water Services: Portable meters and hose connections for vessel service. Rates of delivery, 10,000 g.p.h. Water pressure about 110 p.s.i.
Fire Protection: Complete automatic dry pipe sprinkler system and hose stand pipes.
Electric Current: Lighting 110 volt, 2 phase, 60 cycle, 35 amperes, alternating current. Portable meter and plug-in service available at all berths.
Grain Elevator: 1,100,000 bushel capacity. Unloading capacity cars to elevator, 8,000 bushels bulk wheat per hour. 2 spouts at end of gallery from elevator for loading to vessels, capacity 20,000 bushels.

Pier No. 2:
Location: Between Pier No's. 1 and 3. Separated from Pier No. 1 by a water slip, 400 ft. wide, and from Pier No. 3 by a water slip, 350 ft. wide.
Principal Commodities: Lumber, logs, general cargo, break bulk, bulky cargo in open storage.
Berths: 5 vessels; 425 ft., face or Northerly end; 1,307 ft., slip, Easterly side, 40 ft. depth; 1,445 ft., slip, Westerly side, 35 ft. depth.
Open Dock: 600,000 sq.ft. Dock level 16.1 ft. above MLW.
Equipment: Modern lighting. Tractors, fork trucks, etc. as listed under Pier No. 1, when required. Portable metres and hose connections. Pipe lines on pier for bunkering.
Water Service: City service. Portable metres and hose connections for service to vessels. Rate of delivery, 10,000 g.p.h. Water pressure about 110 p.s.i.
Electric Current: Lighting 110 volt, single phase, 60 cycle, 35 amperes, alternating current. Power 220 volts, 3 phase, 60 cycle, 35 amperes, alternating current. Portable meters and plug-in service at all berths.

Pier No. 3:
Location: Foot of Hamburg Avenue, (adjacent to and separated from Pier No. 2 by water slip, 350 ft. wide).
Principal Commodities: Canned goods, wood pulp, paper products, general cargo, break bulk, dry bulk.
Berths: 2 vessels. 1,750 ft. slip on Easterly side; 35 ft. in depth.
Warehouse Transit Shed: Floor area 248,000 sq.ft. Floor load 600 lbs., East side; 1,000 lbs., West side, per sq.ft.
Shed width 160 ft.
Shed length 1,550 ft.
Mill type reinforced concrete walls and floor construction.
Concrete and blacktop floor.
Complete automatic sprinkler system.
Pier Apron: Width, slip side, 24 ft. Dock level, 61.1 ft. above MLW.
Equipment: Tractors, trailers, fork trucks, etc., as listed under Pier No. 1, when required.
Barge Ramp: A barge ramp capable of handling loads up to 50 tons is now in operation at the outer berth of Pier No. 3. The ramp is utilized for transfer of cargo from ship to barge or vice versa.
Water Supply: Portable meters and hose connections for service to vessels. Rate of delivery, 10,000 g.p.h. Water pressure about 110 p.s.i.
Fire Protection: Automatic dry sprinkler system. Hose stand pipes.
Electric Current: Lighting 110 volts, single phase, 60 cycle, 35 amperes, alternating current. Power 220 volts, 3 phase, 60 cycle, 35 amperes, alternating current. Portable meters and plug-in service available at all berths.
CONTAINER HANDLING: Container Yard (West of Pier No. 3) 11.5 acres paved, fenced and lighted.
CRANES: 30 ton crane on Pier No. 2.
STEVEDORES: Brady-Hamilton and Jones-Oregon.
FRESH WATER: Available delivery to vessel through portable hose.
FUEL: Bunkering oil facilities for ocean vessels are maintained at Pier No. 2. The rates of delivery for heavy fuel oil is 1,500 b.p.h., and for diesel oil, 800 b.p.h.
DEVELOPMENTS: Proposed coal transhipment facilities (East Skipanon River and Tongue Point Development), also proposed Land Bridge Terminal at Tongue Point.
AUTHORITY: Port of Astoria.
AGENT: See "Portland", Oregon.

ATRECO, Texas: 29.59 N. 93.53 W.

DOCUMENTS, PILOTAGE, RADIO, etc.: Refer to "Port Arthur".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

BALTIMORE, Maryland: 39.17 N. 76.35 W.

(See Plan Book)

DOCUMENTS:
3 Copies Cargo Manifest (Forms 7527-A or 7527-B), the original showing all cargo on board, and 2 copies showing only cargo for this port.
3 copies Crew Manifest (curio list).
3 copies Stores Lists.
3 copies Passenger List (Form 1.–418).
3 copies Crew List (Form 1.–418).
Customs boarding officer will also examine Ship's Register and Load-line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port.
Master's Oath (Customs Form 1300) 3 copies.
General Declaration (Customs Form 1301) 3 copies.
All foreign clearances.
U.S. Certificates of payment of tonnage tax (Customs Form 1002).
Certificate Crew List.
PILOTAGE: Each vessel entering the Chesapeake Capes under foreign flag or carrying foreign cargo is required to employ a Pilot of the Association of Maryland Pilots. The Association maintains a pilot boat which is anchored at the entrance of the Chesapeake Capes. Pilots will be furnished with a small transistorised portable radio unit, which provide ships bridge to bridge communication system to ensure navigational safety while traversing the waters of Chesapeake Bay. It is a positive means of communication to ensure ship's position reporting, the safety and movement of vessels, as well as messages related to the operational needs of vessels proceeding to the port, and provide the Pilots communications instructions expediting operations of vessels when they are aboard.

The pilot boat has a black hull and is located 2 miles North of Cape Henry Lighthouse.

The pilot ladder should be 2 ft. above the water – manropes not required.

Send ETA pilot station via WMH 48 hours before arrival and confirm 24 hours before arrival. Also advise if change in ETA is over 2 hours.

The ETA message should state whether arriving via Chesapeake and Delaware Ship Canal or Cape Henry, and deepest draft and speed of vessel.

Cable address of Pilot: "Marpilot, Baltimore", pilot vessel "Maryland" on VHF Channels 11, 13 and 16.
ANCHORAGE: Numerous anchorages located within harbour limits for ocean-going vessels. 7 such areas are available for vessels of light and

heavy draft. 4 of these anchorages are located on the East side of the main ship channel between the entrance channel to the Central Soya Company Grain Elevator and Fort Carroll. 2 are on the West side of the main ship channel, and 1 on the North side of Curtis Bay channel.

At Bloody Point, approximately 22 miles South of Baltimore, there is an emergency anchorage in natural deep water with depth of 50 ft. or more.

RESTRICTIONS: There are two different approaches and exits to the sea lanes. The principal route is by way of the Southerly course through the Chesapeake Bay and Cape Henry to the ocean. The distance by this route is approximately 150 nautical miles. There is a main ship channel 20 miles long from Baltimore to the Chesapeake Bay; this channel is 800 ft. wide and 42 ft. deep.

The other route to the sea lanes is via the Chesapeake and Delaware Ship Canal. This offers a short protected route between Baltimore and other leading North Atlantic ports by way of Delaware Bay and allows ships serving North Atlantic European ports to save about 115 miles sailing distance.

Entrance to the Chesapeake and Delaware Ship Canal is located about 50 miles North of Baltimore. The width of the channel is 450 ft. Max. draft 32 ft. The canal itself is 15 miles in length, and from the Delaware Bay side the distance to sea lanes is about 60 miles. Navigation lights are maintained so the canal is open to navigation day and night.

MAX. SIZE: Length 1,250 ft., draft 42 ft. at Canton Ore Pier.

HEALTH: See "Health; All Ports" before first U.S.A. port (Albany). Illness reports made to Washington, D.C.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: The port has an efficient fleet of tug-boats in operation. The tugs usually take vessel in tow at Francis Scott Key Bridge.

BERTHING:

There are approximately 45 important piers and terminals, some of which are listed below:

Marine Terminals

Name	*Berths*	*Max. draft*	*Cranes*	*Special features*
Canton	10 General 3 Bulk	42 ft.		
Clinton St.	4 General	32 ft.	1 at 15 t 1 at 18 t	
Dundalk	12	34 ft.	1 at 70 t 7 at 40 t 2 at 50 t 2 at 60 t	Berths 7–12 for containers 1 Ro-Ro berth
Hawkins Point	2	36 ft.		Length 720 ft.
Locust Point	16 General 3 Bulk	34 ft.	2 at 75 t	Whirley, Gantry mounted at Pier 4
			1 at 100 t	Whirley, Gantry at Locust Point South
			2 at 40 t	For Containers at Locust Point South
			1 at 350 t	Stiff-leg derrick at Locust Point South
Port Covington	10 General 7 Bulk	38 ft.	4 at 10 t 1 at 45 t	
Rukert Term Corp	6 General	35 ft.	6 at 15 t	
Sealand	1	32 ft.	1 at 27.5 t	Length 800 ft.
Terminal Corp	1	28 ft.		Length 419 ft.

Public Bulk Cargo Piers

Port Covington Pier 6	3	1,524 ft.	66 ft.	30 ft. to 25 ft. (NS) 38 ft. (SS)	1,600 t.p.h.

(NS) = North Side. (SS) = South Side. (ES) = East Side. (WS) = West Side.

BRIDGES: The Chesapeake Bay Bridge-Tunnel is located across the entrance to the Bay, between Cape Henry and Cape Charles. This vehicular crossing consists of fixed causeways and bridges, and 2 tunnels – one under the Chesapeake Channel and one under the Thimble Shoal Channel.

The Francis Scott Key Memorial Bridge crosses the main ship channel in Baltimore Harbour and is 8,640 ft. long, with main channel horizontal clearance of 800 ft. and vertical clearance of 187 ft. Vessels en route to the harbour from the ocean via the Chesapeake Bay pass under the Chesapeake Bay Bridge, about 151 statute miles above the ocean entrance to the bay. This bridge is 3.7 miles long from shore to shore; its Western end is 0.5 miles S.W. of Sandy Point and its Eastern end is on Kent Island, 4 miles S.W. of Love Point. The Curtis Creek and Middle Branch sections of harbour are each crossed by highway and railroad bridge.

DENSITY: The salinity of Baltimore harbour waters requires full fresh water draft allowance.

Slop disposal facilities at Humble Oil Terminal.

MEDICAL: All facilities available.

FRESH WATER: Can be supplied at all berths. Water barges available.

FUEL: All grades supplied by numerous oil companies by barge or ex-wharf at the oil berths.

REPAIRS: *Bethlehem Steel Corporation.* At the Sparrows Point Shipyard vessels up to 300,000 d.w.t. are constructed, and the facilities include all the necessary equipment for the construction of large and small vessels.

2 other marine yards, 1 of which is located at Key Highway, while the second is located on the Eastern end of Locust Point adjacent to Fort McHenry. The facilities of these plants include 3 dry docks, 2 graving docks and 9 outfitting piers. These facilities handle all types of dry docking and ship repairs.

Maryland Shipbuilding and Dry-dock Company. This large marine shipyard is located on the water front at Fairfield. Plant facilities include 4 dry docks, 5 outfitting piers and 1 side launch way. All types of ship repairs are handled in this yard.

In addition to the above mentioned facilities there are numerous companies specialising in minor ship's repairs.

CUSTOMS ALLOWANCES: At the discretion of customs officers. Normal allowance is 200 cigarettes or 2 lb. tobacco and 1 quart wine or spirits per man. Additional allowances may be given if considered necessary, due to length of vessel's stay in port.

IDENTIFICATION CARDS: Standard U.S. Immigration Forms I–95 to be made up for each Crew member on arrival. Not necessary for crew man already holding Form I–95, issued for the same vessel.

CONSULS:

Argentina
Belgium
Bolivia
Colombia
Denmark
Dominican Republic
Ecuador
El Salvador
Finland
France
Guatemala
Honduras
Italy
Netherlands
Nicaragua
Norway
Panama
Senegal
Sweden
Tunisia
Turkey
Venezuela

TIME: Eastern Standard Time, GMT minus 5 hours. Daylight saving time, GMT minus 4 hours from April to October.

AUTHORITY: Maryland Port Administration.

BANGOR (Including Brewer and Orrington) Maine: 44.49 N. 68.47 W. **(See Plan Book)**

LOCATION: Bangor is located on the West bank of the Penobscot River at the head of navigation. Brewer is on the East bank of the river opposite Bangor and Orrington is on the East bank of the river 2 miles below Brewer.

DOCUMENTS:

1 copy of Crew List.
1 copy of Passenger List.
2 copies of Stores Lists.
2 copies of Foreign Purchase Lists.
2 copies of Inward Foreign Manifest.
1 form 3251 (Master's Oath on entry of vessel).
2 forms 1374 outward foreign Manifest.

PILOTAGE: Pilotage is compulsory for all foreign vessels and U.S. vessels under register in the foreign trade, with a draft of 9 ft. or more, entering or departing from any port or harbour within the waters of Penobscot Bay and Penobscot River North of a line drawn from Marshall Point Livat Port Clyde, thence to Matinicus Rock Light, and thence to Western Head, Isle Au Haut. Pilotage is optional for vessels powered by sail.

Cable PENBAY via Chatham Radio. Ship's Agent usually notifies Pilot 48 hours and 24 hours before arrival at the pilot station. Pilot boat usually stands by on their radio 1 hour before ETA on RT 2182 and the VHF Channel 16 (156.8). Pilot boards at Monhegan Is., Lat. 43° 45′ N., Long. 69° 22′ 5″ W. Pilot uses a white boat 36 ft. long and displays "H" by day and the Pilot signals at night. Vessels awaiting Pilot in bad weather must heave-to outside.

ANCHORAGES: The usual anchorage for vessels waiting at the river entrance for a towboat or favourable wind and tide is Northward of Fort Point on the West side of the channel.

Vessels bound up the river anchor anywhere in the channel where soft bottom is found. Vessels towing to Bangor, if the tide does not serve, often anchor off Winterport. On account of the strong ebb current, it is better for vessels going to Bangor, particularly large vessels, to anchor off Fort Point and start up the river about 3 hours after LW.

RESTRICTIONS: CHANNEL:– The controlling depth in the marked channel in Penobscot River from Bucksport to Bangor is 19 ft. to Winterport, thence 13 ft. to Bangor. The channel is marked by buoys to a point about 1.5 miles below South Brewer.

Caution: Deep-draft vessels should exercise caution above Fort Point as depths of 31 to 32 ft. are in mid-channel, about 0.5 mile Eastward of Sandy Point, and rocky ledge, covered 34 ft., also in mid-channel, is reported about 0.2 miles S.W. of Odom Ledge Daybeacon.

The most difficult sections for vessels are off Lawrence and Luce Coves just North of Bucksport where it is difficult to mark the best water and off Frankfurt Flats where large vessels experience difficulty with the sharp turns.

The channel in Penobscot River is crooked and narrow in places, and frequent changes occur. Vessels should not attempt to carry drafts greater than 10 ft. to Bangor at LW. With a deeper draft a Pilot or towboat should be used; 14 or 15 ft. is carried to Bangor and Brewer at HW, and deeper drafts occasionally to the oil berth at South Brewer. The safest time is on a rising tide. Navigation of the river at night is extremely dangerous due to lack of lighted navigation aids. After unusually high tides many logs, dangerous to small craft, are in the river. At times of maximum ebb currents, buoys are occasionally pulled under.

Tides: The mean range of tide varies from 10.3 ft. at Fort Point to 13.1 ft. at Bangor. Currents of 3 knots are not unusual from Odom Ledge to Orrington, and during Spring runoff currents approaching 5 knots may be encountered. Because of these currents, larger vessels should use caution navigating the river. Passage up the river is more advisable during flood current.

Ice impedes but usually does not prevent navigation above Winterport for nearly 5 months each year, beginning about December. During extreme Winters the river is closed to the mouth. The most difficult place below Winterport is abreast Fort Knox, where ice jams occur. If vessels can pass this point, they usually can go to Winterport. The river is kept open by an icebreaker, which prevents much of the damage that might otherwise be caused by ice and freshets. However, in recent years, according to local information, there has been very little ice and the river has seldom frozen over below Bangor. The brackish water formed by tidal action and the river current no doubt have contributed to this.

Freshets occur in the river during March and April; at times they are dangerous to vessels.

MAX. SIZE: At present ships of 560 ft. are taken up the river 2 hours before HW during daylight. Size and draft of ship depend on the berth.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Boston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Vessels arriving Bangor use radio station at Chatham Mass., or call on the R/T through station WOU at Boston, Mass.

TUGS: 4 tugs available up to 1,200 h.p. Tugs join at Belfast to assist in turning and berthing.

BERTHING:

Texaco Oil Co. Terminal: A timber pile, timber-decked pier, approximately 5,250 sq.ft., used for landing oil tankers. There are 8 storage tanks and 1 warehouse/office building with 1,920 sq.ft. of floor space.

Mobil Oil Co.: A timber crib pier approximately 8,500 sq.ft., used for landing tankers. There are 10 storage tanks and a garage at this facility.

Webber Terminal Inc.: A timber crib pier, approximately 2,340 sq.ft. used for landing tankers. Adjacent to this pier, there is another timber crib pier, approximately 5,280 sq.ft., also used for landing tankers. There are 2 storage tanks and a storage building with 480 sq.ft. of floor space.

Astroline Petroleum Corp. of Maine: There is a log filled bulkhead used for landing tankers. This facility includes 5 storage tanks and 1 tool shed.

Bangor Municipal Dock: 2 wooden floats with 2 ramps, approximately 600 sq.ft., used as a small boat landing. There is also a launch ramp that can only be used at high tide.

Webber Tanks Inc. – Brewer: A rock and timber crib, timber decked pier, approximately 7,200 sq.ft., used for landing tankers. There are 5 storage tanks and a warehouse with approximately 3,850 sq.ft. of floor area.

C. H. Sprague – Brewer-Orrington: A timber pile wharf, approximately 1,600 sq.ft., used for landing tankers. The wharf is in Orrington and fuel is pumped to 3 storage tanks located in Brewer. There is one building, a pump house, approximately 600 sq.ft.

Town Launch Ramp: Orrington. This is a paved launch ramp; no docking facilities. There is a 40-space (30 car – 10 trailer) gravel parking area.

BRIDGES: 1 suspension bridge below Bucksport with a height of 135 ft. at high water. Horizontal clearance is 750 ft.

The overhead power cable that crosses the river just above Bucksport has a clearance of 145 ft.

MEDICAL: No advance notice required. There are 3 large hospitals. Seamen required to have certificate for smallpox vaccination during past 3 years.

TANKERS: 1 berth for ocean-going vessels. 1 × 8 in. hose with a 10 in. line. 22 ft. at low water. Also see "Berthing".

DENSITY: Nearly fresh water.

FRESH WATER: Supplied at ocean-going berth at the rate of 50 t.p.h.

FUEL: Only available at oil berth.

CERTIFICATES:

Load-line.
Foreign Clearance.
Safety Certificate.
Radio Operator's Licence.

CUSTOMS ALLOWANCES: 200 cigarettes per man, 1 bottle wine/spirits per man.

IDENTIFICATION CARDS: Form 1–95 must be filled out upon arriving unless seaman has made one out before on a previous trip.

CONSULS: None.

REPAIRS: Only machinery repairs.

REPATRIATION: Arrangements must be made ahead of time by telegram.

TIME: GMT minus 5 hours in the Winter and minus 4 hours in the Summer.

AIRPORT: Bangor International is 2 miles from the city.

POLICE/AMBULANCE/FIRE: Police 9427377; Ambulance 9893311; Fire 9422293.

TELEPHONES: None put aboard. 1 pay phone on ocean-going berth.

SHORE LEAVE: Allowed subject to Immigration approval.

AUTHORITY: City of Bangor, Dept. of Harbour and Wharves, Harbour Master.

BATON ROUGE, Louisiana: 30.28 N. 91.12 W.

DOCUMENTS:

Original and 3 Crew Lists.
Original and 3 Passenger Lists.
Clearance from last foreign port.
Original and 3 copies Inward Manifest.
Certified Derat Certificate.
Load-line Certificate.
Safety Certificate.
Ship's Register.
3 copies Curio List.

PILOTAGE: Advise Agents ETA sea-buoy 48 hours in advance. Agent then makes arrangements for Pilots. Seven 46 ft. Pilot boats – red hulls white cabins, flying white and blue Pilot flags. Suggest Pilot ladder 6 ft. above water level, no life-line. Call Channel 2738 or VHF Channel 9, 30 to 40 miles out. Safe anchorage within 2 miles Southpass or S.W. pass entrance.

ANCHORAGES: General anchorage Baton Rouge as directed by Pilots.

RESTRICTIONS: No night-time restriction for entry or clearance, docking or undocking.

MAX. SIZE: Humble Oil Docks can accommodate 1,000 ft. vessels – unlimited breadth; draft governed by S.W. pass – project depth 40 ft. usually restricted from 37 ft. to 30 ft. draft May through August, due to low water and silting.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: ETA cables can be routed through Tropical Radio WNU New Orleans.

TUGS: Available at Baton Rouge for docking and undocking. Ship's lines used.

BERTHING: No time restrictions on berthing. 2 general cargo docks with total 280,000 sq. ft. transit shed and 2,265 ft. long, 40 ft. wide apron with double marginal tracks; grain elevator and bulk terminal at Burnside, for handling ores, concentrates, etc.; container marshalling yard adjacent cargo docks; also 20-acre paved staging area for import automobiles. Dock equipped for roll-on/roll-off. 1 dock equipped to handle liquid chemicals.

BULK HANDLING FACILITIES:

Grain: Cargill Grain Elevator: Max. draft 38 ft. Loading rate 1,000 t.p.h. Silo storage 160,000 tons.

Aluminium: Conalco-Burnside Terminal: 2 unloading gantries for bauxite. Rate 2,000 t.p.h. Max. draft 39 ft. Kaiser-Burnside Terminal: Same specifications as Conalco.

BRIDGES: Sufficient clearance for all stages of river at all times; 2 bridges cross at New Orleans, 1 at Baton Rouge and 1 at Donaldsonville.

STEVEDORES: May be obtained by Agent with 4 hours notice.

MEDICAL: Agents should receive 24 hours notice when medical attention is required. 2 excellent hospitals at Baton Rouge, U.S. Public Health Hospital at New Orleans.

TANKERS: Oil tankers load various petroleum and chemical products at Humble Oil Docks with sufficient hose, reducers, etc., available. Oil residue slop facilities available.

DENSITY: No tide – fresh water at all times.

FRESH WATER: At public docks, At Humble Oil Terminal simultaneous with loading or discharging at no cost. Ship's crew to make water connections.

FUEL: All grades subject inquiry. Barging essential.

FIRE PRECAUTIONS: Usual fire lines and sprinkler systems.

GANGWAY/DECK WATCHMEN: Only if Master requires.

OPENING/CLOSING HATCHES: Depending on terms of charter, usually by ship's crew.

CUSTOMS ALLOWANCES: Tobacco, each crew member allowed 300 cigarettes. Master allowed reasonable quantity. Wine and/or Spirit, each crew member allowed 1 bottle each of wine and spirits. Master allowed reasonable quantity.

CARGO GEAR: Safety certificate required for ship's gear in handling. Pkg. cargo, etc.

IDENTIFICATION CARDS: Usual passports.

CONSULS: Norwegian only, all other consuls at New Orleans – 80 miles distant.

REPAIRS: All types of deck and engine repairs may be carried out.
REPATRIATION: Crew repatriation and crew changes may be made.
AIRPORT: 6 miles to Ryan Airport, served by regular airlines.
TIME: Local time is Central Standard Time – 6 hours later than GMT; from April through October local time is CS daylight saving time, 5 hours later than GMT.
POLICE/AMBULANCE/FIRE: Tel. Nos. Public Dock: Police 343 – 5525; Ambulance 344 – 0566; Fire 343 – 4140.
TELEPHONES: No arrangements for placing telephones aboard.
GENERAL: Tankers in ballast advised of drift wood conditions in river and ballast their vessels accordingly so as to avoid propeller damage.
SERVICES: Because of restricted river inadvisable adjust compasses. This is usually accomplished below New Orleans where river of sufficient width to permit large vessels to swing. 2 firms engaged in tank cleaning, namely, Two Twenty Eight Terminals Inc. and Port Allen Marine Cleaning Plant. Slop facilities available at the Humble Oil & Refining Co. dock.
SHORE LEAVE: Shore leave permitted except when detained aboard by U.S. immigration.
DELAYS: Normally no delays at Humble Oil docks in berthing except when vessel's tanks unsuitable for loading. Normal delay at city wharf is 1 day awaiting berth.
NOTICE: To all Masters from a Ships Agent:

Please be advised that the Agent will need a copy of the Notice of Readiness and Dry Tank Certificate. The Agent will pick these two certificates up from the Master on sailing of vessel. These are needed by the Agents to send out to the Owners and/or Charterers along with the other documents. We have been having problems receiving these documents from the terminal and/or Cargo Surveyor. The terminal will require on the vessel's arrival at the berth one copy of the Bill of Lading and/or Custom's Manifest. It would be appreciated if you could make an additional copy of these documents when they are prepared by your vessel.
AUTHORITY: Greater Baton Rouge Port Commission.

BAYTOWN: Texas: 29.44 N. 95.01 W.

DOCUMENTS, PILOTAGE, etc.: Refer to "Houston".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Available if required.
BERTHING: Humble Oil & Refinery Co. Terminal, depth alongside 35 ft.
MEDICAL: All medical assistance available.
DENSITY: Brackish.
FRESH WATER: Available ex wharf.
FUEL: All grades available ex wharf.
GANGWAY/DECK WATCHMEN: Required only if crew detained by Immigration.
CUSTOMS ALLOWANCES: Each man 300 cigarettes or 100 cigars of 1 lb. tobacco; 1 quart wine/spirits.
AUTHORITY: Port of Houston Authority.

BEAUMONT, Texas: 30.05 N. 94.05 W.

(See Plan Book)

LOCATION: On Neches River, above Sabine Lake.
DOCUMENTS, PILOTAGE, RADIO, etc., Refer to "Port Arthur".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Meet vessel in Neches River before arriving at berth. Normally 2 tugs used for docking, 1 for undocking.
BERTHING:

Wharf No. or Name	*Length (ft.)*	*Depth (ft.)*	*Remarks*
1	580	30	
2, 3 and 4	1,373	38	60 ton gantry crane
5, 6 and 7	1,483	36	
Harbour Island Marine Terminal	1,200	40	220 ton mobile crane
Carroll St. Wharf	765	40	
Grain Wharf	543	40	3.5 million bushel grain elevator

CARGO HANDLING FACILITIES: For container ships, conventional break-bulk ships, heavy lift ships or side-loading Ro-Ro ships, the Harbour Island Marine Terminal – 1,200 linear feet berthing space; 120,000 sq.ft. transit shed; 93 ft. wide apron facing transit shed; 240,000 sq.ft. open wharf space; 8 acres heavy duty hard stand adjacent to open wharf, backed up by 25 more acres for vehicle marshalling; twin marginal rail tracks for full length of wharf; 220 ton capacity truck-mounted mobile crane for containers and heavy lifts; 40 ton forklift machine with expandable spreaders for container handling and 3-high container stacking or blades for heavy cargo; 600 ft. undercover working track for all-weather rail car unloading inside transit shed; 200 linear feet of truck height unloading platform along rear of open wharf; 20 ft. high × 18 ft. wide shed doors for high wide loads and entry for all-weather truck unloading or container stuffing; 40 ft. of water alongside; 1,200 lbs. per sq. ft. deck load capacity.

For stern loading Ro-Ro vessels, wharves 2 and 3 – 758 ft. in length with 75 ft. wide Ro-Ro platform at one end of the wharf. Ro-Ro platform deck elevation +15.89 ft. above mean low Gulf. (12 ft. 7 in. above average tide) 36 ft. of water alongside wharf; convenient roadway access to Ro-Ro platform from 15 acre storage area adjacent to the wharf; double marginal rail tracks for full length of wharf; 60 ton capacity gantry crane travels 700 ft. along face of wharf; 120,000 sq. ft. open wharf space; wharves 2 and 3 may also be used as an alternate to Harbour Island Wharf for containers, conventional break bulk, heavy lift or side loading Ro-Ro vessels. Covered wharf 4 is adjacent, extending total wharf length to 1,300 ft. and offering 57,000 sq. ft. covered area.

For security of cargo, all Port of Beaumont wharves are entirely within a chain link, barbed wire topped security fence, and all vehicular access is through the port's main gate, guarded 24 hours a day. The port is an approved outport of the Military Traffic Management Command, Eastern Areas, U.S. Army, is heavily used for shipments of military material, equipment and supplies, and is subjected to regular security inspections by Army personnel who have given the port high ratings.

For security of small, high value items that are considered especially subject to possible pilferage, the port will permit fencing and shelving of a limited designated security area within a transit shed.

For heavy lift requirements beyond the capacity of the 60 ton gantry or the 220 ton mobile crane, a 500 ton capacity derrick barge is available.
STEVEDORES: *Public Wharves:* Normal working hours 0800/1200 and 1300/1700. Monday to Friday.
TANKERS: Mobil Oil Co., distance from sea 49 miles, depth alongside 36 ft. Pan American Pet. Co., distance from sea 45 miles, depth alongside 38 ft.
Sun Oil Terminal:
Report received 1975.
Operators: Sun Oil Co., Nederland, Texas.
Type of Terminal: Refinery. Handling Crude Oil & Lubes.
Density: Fresh water.
Distance from sea: 37.4 miles.
Controlling Depth: From channel to berth – 39 ft. – 40 ft. Actual depth alongside – 40 ft.
Vertical clearance at High Water: 136 ft.
Max. length of berth facility: 150 ft.
Max. length of vessel to be moored safely: 900 ft. but that is absolute max. and normally prefer not more than 850 ft.
Hoses: 4 × 12 in. (Crude). 6 × 6 in. (Lubes).
Usual Loading Pumping Capacity: 60,000 bbls per hour (Crude). 2,000 bbls per hour (Lubes).
Usual Discharge Pumping Capacity: To vessel's capacity.
Fresh Water: Available on 24 hour basis.
Fuel: None.
Tugs: Per Pilot's requirements.
Anchorage: Max. draft 29 ft. (i.e. no anchorage facililty for loaded ships).
MEDICAL: All facilities available.
DENSITY: Fresh water.
FRESH WATER: Available at berths, or by barge.
FUEL: Available ex-wharf at Mobil terminal. All grades available by barge to other locations.
GANGWAY/DECK WATCHMEN: Not required unless crewmen detained by Immigration.
CUSTOMS ALLOWANCES: 300 cigarettes and 1 quart wine/spirits for each man.
IDENTIFICATION CARDS: Foreign crew require only Immigration landing permit.
CONSULS: Nearest at Houston.
REPAIRS, DRY DOCKS: Beaumont's Bethlehem Shipyard offers all types ship repair or reconditioning – plus vessel conversion and jumboizing 2 side-launching ways over 800 ft. each. Floating dry dock with extreme length of 648 ft.; length on bottom 576 ft.; breadth at entrance, 87 ft.; and lifting capacity, 17,500 tons. Active in design and construction of mobile drilling platforms and oil and gas production and storage facilities for service off shore.
HOLIDAYS: Longshore holidays are: New Years Day: Martin Luther King's Birthday (January 15th); Lincoln's Birthday (February 12th); Washington's Birthday; Texas Independence Day (March 3rd); St. Patrick's Day (March 17th); Good Friday; Memorial Day (last Monday in May); Emancipation Day (June 19th); Fourth of July; Labour Day; Columbus Day; Veteran's Day (November 11th); Thanksgiving Day; Christmas Day.
AUTHORITY: Port Director, Port of Beaumont.

BELLINGHAM, Washington: 48.45 N. 122.31 W.

(See Plan Book)

DOCUMENTS, PILOTAGE, etc.: Refer to "Tacoma".
HEALTH: See "Health; All Ports" before first U.S.A. Port (Albany). Illness reports made to Seattle Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Available, join vessel in Bellingham Bay.
ANCHORAGE: Deep water available, but not good holding ground.
BERTHING: North Terminal, Berths Nos. 1 & 2 length 1,500 ft., depth alongside 34 ft. MLLW. Berth No. 3 length 400 ft., depth alongside 25 ft. MLLW. Georgia Pacific Dock, Berthing length 600 ft., depth alongside 28 ft. MLLW.
CRANES: 2 × 50-ton capacity rail-mounted gantry cranes at No. 2 berth and 1 barge mounted 60-ton crane.
STEVEDORES: 8 local gangs. Additional gangs imported if required.
HOLIDAYS: See "Tacoma".
MEDICAL: All medical facilities available. Local hospital.
DENSITY: Salt water.
FRESH WATER: Available at all wharves.
FUEL: Available. Barge delivery only.
GANGWAY/DECK WATCHMEN: Required only if detainees aboard.
CUSTOMS ALLOWANCES: No definite quantities prescribed; reasonable allowance at discretion of Customs Inspector.
AIRPORT: 3 miles from the city.
AUTHORITY: Port Manager, Port of Bellingham.
AGENT: See "Seattle".

BENICIA, California: 38.03 N. 122.10 W.

(See Plan Book)

DOCUMENTS: Health and all General Information: refer to "San Francisco".

PILOTAGE: Port located about 25 miles above Golden Gate Bridge. River Pilot joins at San Francisco, using VHF for traffic information. Passage includes passing under 2 bridges, Carquinez Strait Bridge having the least clearance, with 146 ft. (HW) and 151 ft. (LW) (using North Channel). River passage is timed to arrive at Benicia at the first of ebb tide; this is approximately 2.5 hours after HW at Fort Point (Golden Gate).

ANCHORAGE: At "San Francisco".

RESTRICTIONS: Tankers must lighten to 36 ft. fresh-water draft. This is done at No. 7 anchorage, 1.5 miles East of Alcatraz Island. This cargo will later be pumped back to the tanker as barges cannot overcome shore back pressure. Turning basin off the berths, radius 1,800 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to San Francisco Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: 1 small tug assists berthing. Only 1 normally required for unberthing.

BERTHING: Continuous wharf 2,404 ft. long with berth for 3 vessels. The West berth is used for the loading of petroleum products (Exxon), and the Centre and East berths are equipped for handling general and bulk cargoes. East of this facility is another berth that will accommodate one tanker for discharge of crude oil (Exxon) depth alongside – 38 ft.

MOORINGS: 2 head wires, 4 breasts and 2 springs forward. This is necessary because of current off the bank during ebb tide. 2 stern lines, 2 breast lines and 2 springs aft.

BULK HANDLING FACILITIES: Waterside silos capacity 26,000 tons. With loading conveyor belt capacity 1,000 t.p.h.

TANKERS: Crude oil discharge through 2 × 12-in. Chiksan arms and 36-in. shoreline, 2.5 miles long. Shore tanks are situated 164 ft. above sea level, initial back pressure 65/70 p.s.i.

FRESH WATER: Available from shore lines.

FUEL: Can only be delivered by barge. Averate rate 300 t.p.h.

DEVELOPMENTS: Current plans call for: (1) enlargement to 9 berths; (2) deepening of water alongside, including channels to 45 ft.; (3) installation of bulk handling equipment for wood chips; (4) for bulk iron ore and (5) development of a complete container terminal.

AUTHORITY: Benicia Port Terminal Company.

AGENT: See "San Francisco".

BOCA GRANDE, Florida: 26.43 N. 82.15 W.

SHIPMASTER'S REPORT: 1978.

LOCATION: On the Eastern side of the Southern end of Gasparilla Island, about 60 miles South of Tampa Bay.

DOCUMENTS: See "Tampa".

Government Officials must travel from Tampa to Boca Grande at vessel's expense.

PILOTAGE: Compulsory for all foreign-going merchant vessels. The Pilot boards vessel near the sea buoy. Pilotage available 24 hours a day.

Request should be made to ship's Agents via Tampa Marine Operator. VHF Channels 16, 12 and 13.

ANCHORAGE: Good holding ground near the sea buoy (26° 39.8′ N.,82° 19.6′ W.)

RESTRICTIONS: The channel is less than 300 ft. wide in some places. The traffic is one way and vessels enter only when the stream is half strength or less. Strong Westerly winds may cause a swell which prevents vessels using the channel.

MAX. SIZE: Beam: 80 ft. with 24 ft. max. distance from outside ship's hull to inside hatch coaming.

Draft: 31 ft. 6 in. (9.60 m.) recommended by Pilots. The channel is 32 ft. deep at MLW.

Length: 550 ft. should be a maximum because distance between end bollards is 475 ft.

HEALTH: Same procedure as for any other U.S. port.

A U.S. Public Health physician is located on the island.

RADIO: Tampa Radio – WPD.

TUGS: A small tug for light towing operations is available.

BERTHING: A "T" headed pier 325 ft. long; distance between end bollards: 475 ft. This pier is for loading phosphates in bulk. Max. draft: 32 ft. (SW). An oil handling berth with 33 ft. depth is located close Southward of the phosphate pier.

BULK CARGO: Material loaded: Phosphate Rock, Diammonium Phosphate, Triple Super Phosphate (granulated or run of pile) and Defluorinated Phosphate.

The shiploader travel is only 270 ft. so large vessels must shift alongside.

Maximum height of vessel: 34 ft. (10.36 m.) from the water line (MLW) to the rail or the hatch-coaming.

Trimming: Spout trimming is done free of charge. Mechanical trimming (levelling and/or filling) will be performed by the railroad at additional charge.

Loading Rates: Phosphate Rock: about 800 t.p.h spout trimmed.
Diammonium phos.: about 400 t.p.h. spout trimmed.
Triple S. Phos.: about 550 t.p.h. spout trimmed (granulated).
Triple S. Phos.: about 300 – 500 t.p.h. spout trimmed (run of pile).
Defluor. Phos.: about 400 t.p.h. spout trimmed.
When levelling and/or filling is required, loading rates are much lower and extremely variable depending on the construction of the ship.

Work Schedule: Only one work crew is available; therefore, only about 16 hours working time per day and about 8 hours rest period for crew. Work performed without overtime charge to the shipper 7 days a week except following, no work holidays: Jan. 1st, July 4th, Labour Day, Christmas Day.

TIDES: Approximately 2 ft. variation.

DENSITY: Salt water.

FRESH WATER: Available at phosphate loading berth.

FUEL: No local facilities. Prior arrangements with ample notice must be made via the ship's Agent at Tampa.

CONSULS: See "Tampa".

REPAIRS: No local facilities. To be arranged via Agents with ample notice.

SURVEYORS: The nearest Lloyds' office is at Jacksonville. American Bureau available from Tampa.

STORES AND PROVISIONS: No facilities available for normal ship chandlering. Prior arrangements should be made via Tampa.

GENERAL: Boca Grande is the older of "Seaboard Coast Line's" (SCL) two existing loading facilities, the new one being at Tampa. All Agents are based at Tampa, about 110 miles by road.

BOSTON, Massachusetts: 42.21 N. 71.05 W.

(See Plan Book)

DOCUMENTS:

3 copies Cargo Manifest (Forms 7527–A or 7527–B), 2 copies showing all cargo on board, and 1 copy showing only cargo for this port.
3 copies Crew Manifest (Form 1304).
3 copies Stores List (Form 1303).
3 copies Passenger List (Form I.–418).
3 copies Crew List (Form I.–418).

Customs boarding officer will also examine Ship's Register, Safety Equipment Certificate and Load-line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States Port:

General Declaration (Form 1301).
Health Pratique.
Master's Oath (Customs Form 1300).
All foreign clearances.
Certificate of Financial Responsibility (Oil Pollution).
U.S. Certificates of payment of tonnage tax (Customs Form 1002).
Certified Crew List.

PILOTAGE: Compulsory. Pilots cruise in boats which are designated by numbers painted in black figures 4 ft. high on deckhouse. The outer boat cruises outside the Graves.

ANCHORAGES:

ANCHORAGE No. 1. *Upper Harbour Anchorage:* Steam and motor vessels permitted to anchor in this basin anchor within the following area: S.E. of a line bearing 205° True from N.E. corner of Boston and Albany Pier No. 5, East Boston; N.E. of a line bearing 122° True from S.E. corner of Lewis Wharf, North Pier; S.W. of a line bearing 292° True from N.E. corner of Southernmost Airport Approach Pier; N.W. of a line bearing 025° True from Buoy No. 12, Fl.R.6 sec.

ANCHORAGE No. 2. *President Roads Anchorage* (40 ft. anchorage): All vessels anchoring in this basin anchor within an area beginning at a point bearing 237°, 522 yards from Deer Island Light; thence to a point bearing 254°, 2,280 yards from Deer Island Light; thence to a point bearing 261°, 2,290 yards from Deer Island Light; thence to a point bearing 279°, 2,438 yards from Deer Island Light; thence to a point bearing 319°, 933 yards from Deer Island Light; thence to a point bearing 319°, 666 yards from Deer Island Light; and thence to point of beginning.

President Roads Anchorage (35 ft. anchorage): All vessels anchoring in this basin anchor within an area beginning at a point bearing 256°, 2,603 yards from Deer Island Light; thence to a point bearing 258°, 3,315 yards from Deer Island Light; thence to a point bearing 264°, 3,967 yards from Deer Island Light; thence to a point bearing 261°, 2,290 yards from Deer Island Light; and thence to point of beginning.

ANCHORAGE No. 3. *Nantasket Roads Anchorage:* Vessels anchoring in this anchorage basin anchor within following area: Westerly of a line bearing 143° from wharf at Gallups Island to Bell Buoy No. 2, S.W. of Georges Island; Northerly of a line bearing 260° from Bell Buoy No. 2, Georges Island, to the Northerly end of Rainsford Island; Northerly of a line bearing 273° from the Northerly end of Rainsford Island to Bass Point, Long Island; Southerly of a line bearing 270° from the wharf at Gallups Island to Long Island.

ANCHORAGE No. 5. *Peddocks Island and Explosive Anchorage:* Vessels anchoring in this anchorage basin anchor within following area; S.W. of a line bearing 122° True from the Easterly end of Rainsford Island to the N.E. end of Rainsford Island to the N.E. end of Peddocks Island, N.E. of a line bearing 165° True from the Westerly end of Rainsford Island to the S.E. end of Peddocks Island.

RESTRICTIONS: There are 3 main channels of entrance from sea to President Roads.

Broad Sound North Channel from Broad Sound to President Roads from N.E. Dredged 35 ft.. deep and 1,500 ft. wide and is deepened to 40 ft. in a width of 900 ft. to 1,100 ft. This channel well marked by lighted buoys.

Broad Sound South Channel from Broad Sound S.W. and Westerly to President Roads. Dredged 30 ft. deep and 1,200 ft. wide. This channel is well marked by buoys and ranges but most aids to navigation are not lighted.

The Narrows is channel leading into Boston Harbour from S.E. between Boston Lighthouse and Lovells Island on the N.E. and Point Allerton, Georges Island and Gallups Island on S.W. Depth is 27 ft. Width is generally 1,000 ft. except in a section between Narrows Light and Georges Island where shoaling on N.E side limits it to 700 ft. Channel is well marked.

The Main Ship Channel of Boston Harbour extends from President Roads to the mouths of the Chelsea and Mystic Rivers and to Charlestown Bridge on the Charles River. Channel has been dredged 35 ft. deep and 1,200 ft. wide to the inner end where widths decrease near the river mouths. It has been deepened to 40 ft. for 600 ft. width from President Roads to the mouth of the Mystic River, with a widening to 1,200 ft. at the bend just Northerly of Commonwealth Pier No. 5, South Boston.

Charles River is the approach by water to Cambridge and Watertown. About 0.5 mile above the lower bridge there is a dam with a lock 45 ft. by 350 ft. with depth of 17 ft. over the lower sill. Depths above dam decrease gradually to 9 ft., basin level, at head of navigation. *Mystic River* is approach by water to Everett, Malden and Medford. Controlling depths are 35 ft., from Mystic River bridge to approximately 1 mile above, thence 20 ft. from the 35 ft. channel to 800 ft. above the Malden Bridge to a point abreast Monsanto Chemical Company plant. *Chelsea River* is approach to city of Revere. Channel from entrance to a point opposite the Tenneco Oil Co. terminal has a controlling depth of 35 ft. *Weymouth Fore River* is approach by water to Quincy and Weymouth. Controlling depth is 30 ft. to Fore River Bridge. Controlling depth for a distance of 2,800 ft. above Fore River Bridge is 30 ft. *Town River* extends N.W. from Weymouth Fore River at Quincy Point. River has a controlling depth of 27 ft. from deep water in Weymouth Fore River to a point opposite the Quincy Oil Co. terminal. Opposite Quincy Oil Co terminal there is a turning basin 18 ft. deep, 400 ft. wide and 1,000 ft. long.

MAX. SIZE: The primary entrance to Boston Harbour is via the North Channel and President Roads. Controlling depth is 35 ft. MLW. Average rise of the tide in Boston is 9.5. ft.

Generally speaking, vessels drawing 40 ft. are taken at the top of the tide to White Fuel and Exxon only. Vessels going to berths in the Mystic River above the Mystic River Bridge are limited by the bridge's vertical clearance of 135 ft. MHW.

Vessels consigned to berths in the Chelsea Creek are limited to a length of 669 ft., beam of 90 ft. and draft of 36 ft. high water docking. Furthermore, vessels which exceed 630 ft. going above the Chelsea Street Bridge are restricted to daylight docking. Daylight sailing is required from the berths above the McArdle Bridge if the vessel is over 585 ft. long.

As a rule, vessels are docked bow in at the Chelsea Creek berths. If docked between the bridges, departure is stern first through the McArdle Bridge. If docked above the Chelsea Street Bridge, then on sailing, the vessel is turned in the basin West of the Gibbs and Union terminals.

The controlling depth in the channel leading to Weymouth Fore River is 28 ft. MLW. Vessels with a max. draft of 33 ft. 6 in. will be taken at high water, but it should be noted that docking and undocking in Fore River are daylight operations – between sunrise and sunset – and no vessel longer than 628 ft. will be handled.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Boston Quarantine Station.

RADIO: *Advance Notice of Arrival:* 24 hours advance notice of arrival be given. This notice is made to the office of the Captain of the Port – 223-6979.

The information to be provided consists of: Vessel's Agent's name; Vessel's name, type, flag, and call sign; the ETA; Berth; Last port and next port; Dangerous cargo on board. In return the Captain of the Port will assign a consecutive log number to the vessel.

In event the vessel's ETA is changed by more than 24 hours from first notice, the Captain of the Port should be so notified, identifying the vessel by its assigned log number.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Steamers can proceed from the sea to Boston Upper Harbour under own power. They are usually met by tow-boats, for docking while in the stream. Barges usually left by the outside tow-boats at the anchorage grounds, to be docked later by harbour tugs.

BERTHING: There are 259 piers or wharves in the port of Boston providing 158,646 lineal ft. or 30 miles of berthing space measured along the sides and ends of piers and along bulkheads or shore wharves. Many of them have railroad connections. The depths of water available alongside these terminals range up to a maximum of 40 ft. at mean low water. Practically all terminals fronting on main ship channel are in close proximity to storage warehouses, both cold and dry which greatly facilitates transfer of cargo between vessel and warehouse.

Main Terminals:

Hoosac Pier, 3 berths	Depth alongside 35 ft.
Mystic Pier, 4 berths	Depth alongside 40 ft.
Commonwealth Pier, 5 berths	Depth alongside 40 ft.
South Boston, 10 berths	Depth alongside 35 ft.
Castle Island, 7 berths	Depth alongside 35 ft.
East Boston, 3 berths	Depth alongside 32 to 35 ft.
Public Container Terminal, 2 berths	Depth alongside 40 ft.

Sea-land Container Terminal, South Boston (Berth 17, Castle Island):
Operator – Sea-Land Service, Inc. Tel. 268-9720.
Type of Pier – Single face, 500 ft. long 1×27.5 ton container crane. 10 acre container storage area.
Depth alongside at MLW – 35 ft.
Normal ship side to dock – Starboard.
Line handling boat – not required.
Access to vessel (for stores and repairs) – trucks to ship's side.
Products handled – Containers.

Castle Island Terminal, South Boston:
Operator – Massachusetts Port Authority. Tel. 482-2930
Type of Pier – Single face. 6 berths No. 16 (610 ft.) adjacent to and extending N.W. of No. 17 (see above); No. 15 to No. 11 (2,995 ft.) adjacent to and extending Westward of No. 16. 294,000 sq.ft. covered storage, 4 million sq.ft. open storage (including 32 acres fenced in automobile storage and 20 acres lumber storage), 50 ton crane, rail service.
Depth Alongside at MLW – 35 ft.
Normal ship side to dock – Varies.
Line handling boat not required.
Access to vessel (for stores and repairs) – trucks to ship's side. Min. 40 ft. apron.
Products handled – General cargo, containers, lumber, bulk salt and cement, automobiles, petroleum products (at berth No. 11 for White Fuel).

White Fuel Company, South Boston:
Operator – Texaco, Inc. Tel. 269-2111.
Type of Pier – Single face.
Depth alongside at MLW – 40 ft.
Normal ship side to dock – Port (bow in).
Line handling boat – required.
Access to vessel (for stores and repairs) – limited, trucks can approach only to within 150 ft. of gangway or ship's side.
Products handled – Avjet, Heating Oil, No. 6 Oil, Molasses.
Size and number of pipe-lines – Numerous – 24 in., 20 in., 16 in., 12 in.
Bbls. per hour discharge capacity –12,000 to 18,000.
Average distance to storage tanks – 1,000 ft.
Pollution control equipment – 1,600 ft. boom, 16 ft. boat, 300 absorbent pillows, 2,000 gal. pumpout truck.

Eastern Minerals, South Boston:
Operator – Eastern Minerals, Inc. Tel. 269-5857
Type of Pier – Single face.
Depth alongside at MLW – 40 ft.
Normal ship side to dock – Starboard (bow out).
Line handling boat not required.
Access to vessel (for stores and repairs) – trucks to ship's side.
Products handled – bulk salt, pumice. Discharge rate 5,000 tons per day with fixed grab requiring vessel to be shifted in berth.

Boston Army Base, South Boston:
Operator – Port Terminals, Inc. Tel. 542-7100.
Type of Pier – Single face, three sides: South 3,705 ft., East 351 ft. North 964 ft., 950,000 sq.ft. covered storage, rail service, 2×27.5 ton rail mounted cranes.
Depth Alongside at MLW – 35 ft.
Normal ship side to dock – Varies.
Line handling boat not required.
Access to vessel (for stores and repairs) – trucks to ship's side. 50 ft. apron incorporates rail lines.
Products handled – General cargo, containers.

Commonwealth Pier, South Boston:
Operator – Massachusetts Port Authority. Tel. 482-2930.
Type of Pier – Single face, three sides: North and South 1,200 ft. East 400 ft. 500,000 sq.ft. covered storage, 1 million cu.ft. freezer, rail service, passenger lounge, upper level exhibition hall.
Depth Alongside at MLW – 40 ft.
Normal ship side to dock – Varies.
Line handling boat not required.
Access to vessel (for stores and repairs) – trucks to ship's side. 20 ft. apron incorporates rail lines.
Products handled – Passengers, general cargo, refrigerated cargo, bulk tallow.

Pier 1, East Boston:
Operator – Massachusetts Port Authority Tel. 482-2930.
Type of Pier – Single face, three sides: East and West 605 ft. South 390 ft. 196,0000 sq.ft. covered storage.
Depth Alongside at MLW – 35 ft.
Normal ship side to dock – Varies.
Line handling boat not required.
Access to vessel (for stores and repairs) – trucks to ship's side.
Products handled – General cargo, containers.

Metropolitan Petroleum Company, Chelsea:
Operator – Metropolitan Petroleum Company. Tel. 288-1111
Type of Pier – Timber pile, offshore.
Depth Alongside at MLW – 35 ft.
Normal ship side to dock – Starboard (bow in).
Line handling boat not required.
Access to vessel (for stores and repairs) – by hand cart only.
Products handled – Heating Oil, No. 6 Oil.
Size and number of pipe-lines – 2 × 8 in.
Bbls. per hour discharge capacity – 6,000 to 8,000.
Storage tanks adjacent to berth.
Pollution control equipment – 1,000 ft. boom, 18 ft. boat, 50 absorbent pillows, 150 gals. Aqua-clene.
Note:– Bow to manifold 370 ft. No wire ropes used to moor vessel.

Exxon Company U.S.A., Everett:
Operator – Exxon Company U.S.A. Tel. Marine Department 387-1733, Marketing Terminal 389-7400.
Type of Pier – Timber pile wharf with caissons.
Depth alongside at MLW – 40 ft.
Normal ship side to dock – Starboard.
Line handling boat not required.
Access to vessel (for stores and repairs) – by rail-mounted hand cart.
Products handled – Asphalt, Chemicals, Diesel Oil, Jet Fuel, L.P.G., Kerosene, Gasoline, No. 2 and No. 6 Oil.
Size and number of pipe-lines – numerous.
Bbls. per hour discharge capacity – Up to 35,000.
Average distance to storage tanks – 5,000 ft.
Pollution control equipment – 1,500 ft. boom, skiff.

Prolerized New England, Everett:
Operator – Prolerized New England Company. Tel. 389-8300.
Type of Pier – Straight face.
Depth alongside at MLW – 37 ft.
Normal ship side to dock – Port (bow out).
Access to vessel (for stores and repairs) – trucks to ship's side, but access may be limited due to vessel's position at conveyor.
Products handled – Ferrous scrap (including Prolerized shredded-scrap).
General notes: Pier is equipped with 2×40-ton cranes. Shredded scrap is loaded from fixed conveyor requiring vessel to be shifted as each hatch is served.
This berth is also used by Distrigas Corp. and Union Carbide Corp.

American (Domino) Sugar Refinery, Charlestown:
Operator – Amstar Corporation. Tel. 242-3670.
Type of Pier – Single face.
Depth Alongside at MLW – 33ft.
Normal ship side to dock – Port (bow in).
Line handling boat required.
Access to vessel (for stores and repairs) – trucks to ship's side, but may be limited depending on vessel's position at conveyor.
Products handled – raw sugar. Discharge facility consists of single grab with capacity of 200-250 t.p.h. Vessels limited to approximately 650 ft. overall length.

Revere Sugar Refinery, Charlestown:
Operator – Sucrest Corporation. Tel. 242-2750.
Type of Pier – Straight face.
Depth Alongside at MLW – 33 ft.
Normal ship side to dock – Port (bow in).
Line handling boat not required.
Access to vessel (for stores and repairs) – trucks to ship's side.
Products handled – raw sugar. Discharge facility consists of 23.5 ton grabs with total capacity of 350-400 t.p.h. Vessels limited to approximately 600 ft. overall length.

Mystic Scrap Terminal, Charlestown:
Operator – Schiavone Terminal, Inc. Tel. 242-5210.
Type of Pier – Single face.
Depth Alongside at MLW – 35 ft.
Normal ship side to dock – Owner's preference.
Line handling boat not required.
Access to vessel (for stores and repairs) – trucks to ship's side.
Products handled – Ferrous scrap.
General notes: Pier is equipped with 3×14-ton Clyde gantry cranes. Loading rate 2,500 tons per day. Rail service to pier.

J. F. Moran Container Terminal, Charlestown:
Operator – Massachusetts Port Authority. Tel. 482-2930.
Type of pier – Single face, 1,100 ft. long. 1×45-ton container crane, 1×70-ton container crane, 38,000 sq.ft. container stuffing shed, 30 acre container storage area, rail service.
Depth alongside at MLW – 40 ft. MLW.
Normal ship side to dock – Varies.
Line handling boat not required.
Access to vessel (for stores and repairs) – trucks to ship's side.
Products handled – Containers.

U.S. Gypsum, Charlestown:
Operator – U.S. Gypsum Co. Tel. 241-9100.
Type of Pier – Single face.
Depth alongside at MLW – 23 ft.
Normal ship side to dock – Port.
Line handling boat not required.
Access to vessel (for stores and repairs) Access to berth.
Products handled – Gypsum rock from Nova Scotia, carried in company's own vessels, specially fitted and adapted for discharge at this berth.

Mobil Oil, East Boston:
Operator – Mobil Oil Corporation. Tel. 567-9080.
Type of Pier – Straight face, with centre relieving platform.
Depth Alongside at MLW – 30 ft.
Normal ship side to dock – Starboard.
Line handling boat required.
Access to vessel (for stores and repairs) – trucks to ship's side.
Products handled – Gasoline, Heating Oil.
Size and number of pipe-line – Various.
Bbls. per hour discharge capacity – 8,000.
Average distance to storage tanks – tank farm adjacent to berth.
Pollution control equipment – 950 ft. boom.

Gibbs Oil Company, Revere:
Operator – Gibbs Oil Company. Tel. 289-7700.
Type of Pier – Timber pile, wooden deck.
Depth Alongside at MLW – 35 ft.
Normal ship side to dock – Starboard.
Line handling boat not required.
Access to vessel (for stores and repairs) – only by handcart.
Products handled – Heating Oil, Gasoline.
Size and number of pipe-lines – 3×10 in., 2×12 in.
Bbls. per hour discharge capacity – 8,000 per line.
Average distance to storage tanks – 2,500 ft.
Pollution control equipment – 1,750 ft. boom, 16 ft. boat. (shared with Union, Gulf, Northeast.)

Union Oil Company, Revere:
Operator – Union Oil Company. Tel. 284-4490.
Type of Pier – Timber pile, wooden deck.
Depth Alongside at MLW – 33 ft.
Normal ship side to dock – Port.
Line handling boat required.
Access to vessel (for stores and repairs) – only by handcart.
Products handled – Heating Oil, Mogas, No. 5 Oil, No. 6 Oil.
Size and number of pipe-lines – 5×12 in.
Bbls. per hour discharge capacity – 8,000 per line.
Average distance to storage tanks – 2,500 ft.
Pollution Control equipment – 1,750 ft. boom, 16 ft. boat. (shared with Gibbs, Gulf, Northeast).

Gulf Oil Company, Chelsea:
Operator – Gulf Oil Company. Tel. 884-5980.
Type of Pier – Single face.
Depth Alongside at MLW – 26 ft.
Normal ship side to dock – Port.
Line handling boat not required.
Access to vessel (for stores and repairs) – Trucks to ship's side.
Products handled – Heating Oil, Gasoline.
Size and number of pipe-lines – 5×12 in.
Bbls. per hour discharge capacity – 8,000 per line.
Average distance to storage tanks – 1,000 ft.
Pollution control equipment – 1,750 ft. boom, 16 ft. boat. (Shared with Gibbs, Northeast, Union.)

American Oil, Chelsea:
Operator – Northeast Petroleum Corp. Tel: Office – 884-7570; Terminal – 884-7577.
Type of Pier – Timber pile dolphins, wooden decked parallel to single face abutment.
Depth Alongside at MLW – 35 ft.
Normal ship side to dock – Port (bow upstream).
Line handling boat required.
Access to vessel (for stores and repairs) – Trucks to ship's side.
Products handled – Gasoline, Kerosene, Heating Oil, No. 6 Oil.
Size and number of pipe-lines – 8 in., 10 in., 14 in., depending on product.
Bbls. per hour discharge capacity – Up to 13,000 depending on product.
Average distance to storage tanks – 2,500 ft.
Pollution control equipment – 1,750 ft. boom, 16 ft. boat. (Shared with Union, Gibbs, Gulf.)

Texaco, Chelsea:
Operator – Texaco, Inc. Tel. Terminal 884-7000, Offices 269-2111.
Type of Pier – Single face.
Depth Alongside at MLW – For 575 ft. vessels: 31 ft. fwd., 34 ft. aft. For 624 ft. vessels: 21 ft. fwd., 34 ft. aft.
Normal ship side to dock – Port.
Line handling boat not required.
Access to vessel (for stores and repairs) – trucks to ship's side.
Products handled – Avjet, Diesel Oil, Gasoline.
Size and number of pipe-lines – 7×12 in.
Bbls. per hour discharge capacity – 5,000 to 10,000.
Average distance to storage tanks – Tank Farm adjacent to berth.
Pollution control equipment – Automatic boom being installed.

Quincy Oil, Quincy:
Operator – Quincy Oil Company. Tel. 773-2500.
Type of Pier – Timber pile, timber deck, offshore wharf.
Depth Alongside at MLW – 29ft.
Normal ship side to dock – Port.
Line handling boat not required.
Access to vessel (for stores and repairs) – by hand cart only.
Products handled – Gasoline, Heating Oil.
Size and number of pipe-lines – 2×8 in.
Bbls. per hour discharge capacity – 6,000.
Average distance to storage tanks – Tank Farm adjacent to berth.
Pollution control equipment – 800 ft. boom, workboat.

Mobil Oil, Quincy:
Operator – Mobil Oil Corporation. Tel. 773-7080.
Type of Pier – T-head with dolphins.
Depth Alongside at MLW – 30 ft.
Normal ship side to dock – Starboard.
Line handling boat not required.
Access to vessel (for stores and repairs) – trucks to ship's side.
Products handled – Gasoline, Heating Oil.
Size and number of pipe-lines – Various.
Bbls. per hour discharge capacity – 8,000.
Average distance to storage tanks – Tank Farm adjacent to berth.
Pollution control equipment – shared with Sprague.

C.H. Sprague & Son Co., North Weymouth:
Operator – C.H. Sprague & Son Co. Tel. Terminal 337-2040, Offices 542-7807.
Type of Pier – Timber pile, concrete deck.
Depth Alongside at MLW – 35 ft. 6 in.
Normal ship side to dock – Starboard.
Line handling boat not required.
Access to vessel (for stores and repairs) – trucks to ship's side.
Products handled – No. 6 Oil.
Size and number of pipe-lines – 2×12 in.
Bbls. per hour discharge capacity – 10,000 per line.
Average distance to storage tanks – 2,500 ft.
Pollution control equipment – 500 ft. boom, 16 ft. boat (shared with Mobil).

Cities Service Oil Company, Braintree:
Operator – Cities Service Oil Company. Tel. 848-1100.
Type of Pier – 4 cylindrical caissons.
Depth Alongside at MLW – 34 ft.
Normal ship side to dock – Starboard.
Line handling boat not required.
Access to vessel (for stores and repairs) – trucks to ship's side.
Products handled – Heating Oil, Gasoline.
Size and number of pipe-lines – 1×10 in., 4×12 in.
Bbls. per hour discharging capacity – 10,000.
Average distance to storage tanks – 2,500 ft.
Pollution Control Equipment – 1,500 ft. boom, work boat.

Bulk Cement Piers:
There are 2 berths in Boston used exclusively for the discharge of bulk cement from barges. Both are in the Mystic River.

No. 28: Allied Concrete Corp. Telephone. 389-2800. This berth is leased to: Marquette Cement Manufacturing Co. Telephone. 235-8006.

No. 33: Atlantic Cement Company, Inc. Telephone. 241-9090.

Meat Inspection Station: The Massachusetts Port Authority operates a meat inspection station on Mystic Pier (No. 38) adjacent to the Moran Container Terminal.

Random incoming meat samples are cut, defrosted, weighed, inspected, and re-frozen at this new facility, enabling inspectors to use one central location instead of the 5 other waterfront stations previously utilized.

The chief component of the building is the large, well-lighted, well-ventilated, and sanitary inspection room. Walls are ceramic tile, the floor has quarry tile, and the ceiling is of acoustical tile.

Up to 50 containers of meat a day will be inspected at this modern facility.

LNG/LPG: Presently there are 2 facilities in Boston Harbour which handle LNG (Liquid Natural Gas – methane). Boston Gas at Commercial Point, Dorchester, Mass., and Distrigas on the Mystic River, Everett, Mass., have storage capabilities for LNG.

The Exxon Everett facility receives and stores LPG (Liquefied Propane Gas).

The Captain of the Port (COPT) has issued very specific requirements for vessels transitting the harbour and transferring cryogenic cargoes. The Coast Guard team consisting of Port Safety Station, representing the Captain of the Port, and Marine Inspection Office boarding officers and the men assigned to the escort and monitoring details are charged with the responsibility for ensuring compliance with these regulations which are detailed in the 60-page LNG/LPG Contingency Plan issued by the Captain of the Port. Included in the plan are the following General Regulations:

The vessel must:

(1) Hold a current Letter of Compliance for the carriage of methane/propane issued by the Commandant and a Certificate of Financial Responsibility for Oil Pollution.

(2) Enter the harbour only during daylight hours. Additionally, vessels transitting Dorchester may only do so within 2 hours of high water. Weather permitting, the COTP may authorize night departures providing the vessel does not have a full or partial cargo.

(3) Enter the harbour only during periods of good visibility. If the visibility is less than 2 miles the vessel must:

(i) If at sea, not enter the port without the COTP's permission.

(ii) If in port, notify COTP of position and then proceed to berth or anchorage, whichever nearer.

(4) Maintain a radio watch on Channel 13 (156.65 mHz) while underway in the port area. Additionally, a watch should be maintained on Channel 16 (156.8 mHz).

(5) Not commence offloading cargo prior to the satisfactory completion of the arrival safety inspection by Coast Guard Marine Inspectors and the issuance of the Permit to Handle Explosives or Other Dangerous Cargo (CG Form 4260).

Additionally:

(1) The vessel must moor either bow to seaward and be prepared to get underway on short notice, should an emergency so require, or have a tug standing by during all cargo operations. A tug standby will be required on a vessel's first visit to this port.

(2) The vessel will normally be boarded while anchored in President Roads by COTP/OCMI Inspectors unless, prior to the vessel's arrival, the Master sends a message to COTP stating that:

"To the best of my knowledge and belief there are no known casualties to this vessel or its machinery which might affect the seaworthiness. I further state that all cryogenic handling and detection equipment is in proper operating condition."

If this message has been received, the inspection will be made at the dock unless it is the vessel's first visit to Boston. On a vessel's first visit to Boston the boarding will always be made in President Roads. If the vessel does not hold a Letter of Compliance the boarding will be made in Broadsound and the vessel will not be allowed to enter the port until a temporary Letter of Compliance is issued.

(3) Venting gas to the atmosphere is not permitted in port.

(4) All cargo operations must cease if electrical storms are present.

(5) If interpreters are not available, all ship's personnel directly involved in the transfer operation shall readily speak the English language.

(6) If the vessel is at anchorage a live bridge watch shall be maintained. A round of bearings fixing the vessel's position shall be taken hourly followed by a report, every 4 hours, to USCG Group Boston on Channel 16 FM reporting anchor holding and operations normal or any significant change in position or deviation from the norm.

Also, whenever an LNG/LPG vessel is transitting Boston Inner or Outer Harbour (to the seaward entrance of the Boston North Channel) no other vessel will be allowed to be underway in an area 2 nautical miles ahead and 1 nautical mile astern of the LNG/LPG vessel in transit. This concept can be thought of as a "moving restricted area" centred on the LNG/LPG vessel. For vessel movement in an area of the Port other than that described above, express permission from COTP Boston must be obtained.

Furthermore, the maximum allowable speed for any vessel movement during an LNG/LPG vessel transit, will be 6 knots. A Coast Guard escort craft will always be present during an LNG/LPG vessel transit and will vigorously enforce these vessel movement restrictions. The maximum penalty for violation of any of the rules established under the above authority is imprisonment for not more than 10 years and a fine of not more than $10,000.

It should be noted that these rules establishing a restricted envelope around the LNG/LPG vessel and the 6 knot speed limit apply not only to other vessels but to the LNG/LPG vessel itself. Therefore, the LNG/LPG vessel may not approach any closer than 2 nautical miles to another vessel underway, thus eliminating a possible collision should another vessel lose steerage or suffer a casualty. These rules prohibit crossing, meeting or overtaking situations from occuring in Boston Harbour out to the seaward entrance to the North Channel. However, other vessel movements during an LNG/LPG vessel transit may be allowed with permission of the Captain of the Port.

LNG/LPG Vessel Inspections: Before an LNG/LPG vessel is allowed to conduct cargo operations in the Port of Boston, the vessel must undergo a joint COTP/MIO Boston inspection to determine if all cargo handling and detection systems are in proper working order. One of the tests involves the introduction of a properly certificated amount of test gas (span gas) into the vessel's gas detection system. This allows the Inspector to determine if the gas detection system is functioning properly and is able to detect the presence of LNG or LPG should an actual leak occur somewhere on the vessel. Until recently, if a vessel did not have on board a cylinder of the properly certificated span gas, the Coast Guard Inspectors would provide this service. However, due to the increasing costs of the gas (LNG over $40.00 and LPG over $63.00), the vessel will be required to provide the span gas with a valid certificate attesting to its composition before the inspection can begin. Also, for the inspection to continue, shipboard or civilian technicians must be available to rectify any problem that may develop.

STEVEDORES: Available at various rates.

FRESH WATER: Plentiful supply of excellent water in Boston. It is supplied by terminal at prevailing rates.

FUEL: All grades available in various viscosities. Normally supplied by barge subject to advance notices.

CUSTOMS ALLOWANCE: At the discretion of Customs officers. Normal allowance is 200 cigarettes or 2 lb. of tobacco and 1 quart wine or spirits per man. Additional allowances may be given if considered necessary, due to length of vessel's stay in port.

IDENTIFICATION CARDS: Standard U.S. Immigration Forms I. – 95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I. – 95, issued for the same vessel.

GANGWAY/DECK WATCHMEN: Available at prevailing prices.

OPENING/CLOSING HATCHES: Performed by stevedores.

REPAIRS: Any type of repair undertaken.

DRY DOCKS:

Bethlehem Steel Co., Shipbuilding Division, East Boston, Massachusetts	*Length*	*Capacity*
Floating Dry Dock No. 1	622 ft.	18,000 tons
Floating Dry Dock No. 2	479 ft.	20,000 tons
Graving Dry Dock No. 4	256 ft.	

Modern facilities for repair, overhaul, and conversion of vessels of all sizes:

(*a*) a 10,000 ton capacity floating dry dock serviced by 2×150 ton overhead cranes with a yoked capacity of 350 tons. The 5-section dock is 415 ft. long, 120 ft. wide, and has an inside dimension of 85 ft. 7 in.

(*b*) 3 building basins (actually a 3-positioned graving dock). 2 are 132 ft. wide, 867 ft. long; 1 is 150 ft. wide, 938 ft. long. Each basin serviced by 2 whirley type cranes of 75 and 50 ton capacity.

(*c*) 4 outfitting piers capable of handling up to 10 ships simultaneously provide adequate space for dockside work and for mooring personnel or service barges.

(*d*) 3 conventional "sliding" ways capable of handling ships up to 1,000 ft. in length.

Major Shops: 2-bay fabricating shop served by 17 bridge cranes. Machine shop equipped with large vertical and horizontal mills planers, lathes and a complete small machine complement. Fully equipped sheet metal, joiner, boiler, blacksmith, pattern foundry, galvanizing, pipe and copper, and electrical shops. Complete facilities for inspection of all types including nondestructive testing such as radiography, magnetic particle, liquid penetrant and ultrasonic.

REPATRIATION: Good facilities exist.

HOLIDAYS: New Year's Day (1st January); Washington's Birthday (22nd February); Patriots' Day (19th April); Memorial Day (30th May); Bunker Hill Day (17th June); Independence Day (4th July); Labour Day (first Monday in September); Colombus Day (8th October); Veteran's Day (22nd November); Thanksgiving (fourth Thursday in November); Christmas Day (25th December).

Note: "Or any day celebrated in lieu thereof".

TIME: Eastern Standard Time, GMT minus 5 hours. Daylight saving time, GMT minus 4 hours from April to October.

AUTHORITY: Massachusetts Port Authority.

BRIDGEPORT, Connecticut: 41.07 N. 73.11 W.

(See Plan Book)

DOCUMENTS: Refer to "New York".

PILOTAGE: Vessel usually notifies Agent 48 hours before arrival, who will arrange Pilot boarding. Pilot boards either at Brenton Reef in position 41° 25′ N., 71° 23′ W. or Point Judith in position 41° 17′ N., 71° 29′ W.

ANCHORAGE: 2 miles South of the entrance with depths in excess of 50 ft.

RESTRICTIONS: Entrance channel has a project depth of 35 ft. at MLW, is 400 ft. wide and 3 miles in length.

Normal time allowed for transit from outside to off the dock is 30 – 45 mins. Docking time varies from 30 mins to 1 hour, dependent on which terminal is the destination, and weather conditions.

The New Haven – Bridgeport Pilots Association believe 4 ft. of water in excess of the ship's draft is needed. As a rule of thumb, 31 ft. at low to 37 ft. at high. Any variations from this, a Pilot should be directly consulted. The range of tide is 6.7 ft. Wind strongly effects the tide in the main entrance channel. Flood and ebb cross the channel at a right angle, and velocities depend on the rise of tide for the day.

Vessels up to 70,000 d.w.t. and LOA 825 ft. call at the port.

MAX. SIZE: See "Berthing and Restrictions".

HEALTH: Vessel to cable Agent 24 hours prior to arrival of any illness on board, otherwise radio pratique not necessary.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Vessels arriving from North use Chatham Radio. Vessels from South use Amagansett Radio on Long Island.

TUGS: Tugs available from Red Star. The Despatcher monitors VHF and is available 24 hours a day through Channel 24 at Bridgeport.

BERTHING: *Cilco Terminal:* Cilco is a bulkhead dock, length approximately 1,100 ft. Vessels dock port or starboard side to. Two ships can moor at the same time. This is a dry cargo facility. Ships load or discharge all kinds of products. Several mobile cranes are available. Depth 33 ft. at MLW. Bunkers are only available by truck. Fresh water is available.

TANKERS: *Bridgeport Shell – Buckley Bros.:* The Shell berth is located on the East side at right angles to the main entrance, and ships must be turned 90° to approach the dock. The dock is approximately 200 ft. long with 2 main resting dolphins and catwalks to shore. Head lines and stern lines are run ashore by a messenger. The size of vessels is governed by manifold distance. Light oil products 300 ft. and heavy oil 350 ft. Vessel of length 700 ft. have been moored, 38 ft. at MLW in ship berth. Ships dock port side to.

Bunkers and fresh water are available.

United Illuminating: Berth is 0.6 miles inside the breakwater on the West side of the channel. A turn to port of 120° must be made into a dredged cut 140 ft. wide. The dock is concrete caissons on pilings with catwalks and centre platform. Depth 32 ft. to 37 ft. at MLW. Vessels of 70,000 d.w.t. call, but bow to manifold distance governs size of vessel. (350 ft. – 375 ft.). Vessels dock starboard side to.

Fresh water is available, but bunkers are not. Every tanker, when moored here, has a slick boom placed around it.

FRESH WATER: Available at all berths.

FUEL: No fuel barge service available. In emergency tank truck delivery can be arranged.

MEDICAL: All facilities available.

AIRPORT: Bridgeport Airport about 3 miles away. New York airports about 50 miles distance.

CONSULS: All countries represented in New York.

HOLIDAYS: New Year's Day (1st January); Lincoln's Birthday (12th February); Washington's Birthday (18th February); Good Friday; Memorial Day; Independence Day (4th July); Labour Day; Columbus Day (14th October); Veterans' Day; Election Day (5th November); Thanksgiving Day (28th November); Christmas Day (25th December).

TIME: Daylight Saving Time, GMT minus 4 hours from April to October.

SERVICES: Ships stores and launch service available from New Haven. Vessels must provide their own gangway at all docks.

AUTHORITY: Office of the Harbour Master.

BROWNSVILLE, Texas: 25.54 N. 97.28 W.

(See Plan Book)

DOCUMENTS: See "Houston".

PILOTAGE: When a vessel is scheduled to arrive at the port of Brownsville the vessel's Agent notifies the Harbour Master's office of the approximate ETA. Later, when a firm ETA is received, the Harbour Master's office notifies the pilot office that the vessel is expected on the bar at a certain time and also gives the time which she would like to enter.

The telegraphic address of the pilot office is: Brazos-Santiago Pilots, 411 First National Bank Bldg., Brownsville, Texas.

If possible, it is desired that the Harbour Master's Office be notified 2 hours in advance of the ETA of any vessel.

The VHF Channel to be used when contacting the pilot boat and Harbour Master is 16. When contact is made, this will be switched to Channel 13.

The pilot boat is a steel hull length 43 ft. beam 16 ft. and draft 8 ft. 250 h.p. diesel. Gross tonnage 36 tons.

No light or sound signals are necessary from vessels requiring a Pilot, although light signals may sometimes be used at night – ordinarily a vessel is picked up by visual sighting.

The pilot boat is located on the South tip of Padre Island – the Pilot station is adjacent to the entrance to ship channel with a clear view of the approach to the jetties.

The Pilot is taken on board an incoming vessel at the sea buoy which is located 2 miles off shore.

The anchorage for a vessel awaiting Pilot is 1.5 miles North of sea buoy.

ANCHORAGES: Anchorages are marked on charts.

RESTRICTIONS: *Brazos Island Harbour:*

	Dredged Dimensions			*Minimum depths in channel entering from seaward*		
Name of Channel	*Feet Width*	*Miles Length*	*Feet Depth*	*Left Outside Quarter Feet*	*Middle Half of Channel Feet*	*Right Outside Quarter Feet*
Brazos Santiago Pass:						
Entrance Channel	300	1.9	38	40.0	39.0	37.0
Channel across Laguna Madre	200	2.9	36	38.0	38.0	38.0
Brownsville Channel:						
Junction Basin to Boca Chica Passing Basin	200	4.0	36	38.0	38.0	38.0
Boca Chica Passing Basin to Goose Island Passing Basin	200	5.4	36	38.0	38.0	38.0
Goose Island Passing Basin to Brownsville Turning Basin	200	2.8	36	37	38	37
Brownsville Turning Basin (extension)	500	1.4	36	37	38	37.5
Brownsville Turning Basin	500-1000	0.5	36	36	37	35

MAX. SIZE: The max. permissible: Length 850 – 900 ft., beam 160 ft., draft 34.5 ft.

RADIO: ETA cables to Agent, etc., should be addressed to the Agent via Mackay Radio at Galveston or RCA in Port Arthur. When within a 60 miles range of the port, calls may be made through the Harbour Master's office on VHF Channel 16 and the calls will then be transferred to land lines to any point. Also Brownsville Marine Operator, VHF Channel 26.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

VHF: A vessel approaching the port of Brownsville may contact the Harbour Master's office on VHF Channel 16.

TUGS: Tugs normally join an incoming vessel 1.25 miles before she enters the turning basin. The tug's lines are used for which there is no charge.

BERTHING: Cargo facilities include over 7,500 ft. of modern, marginal dry cargo wharves, 14 deepsea docks and 10 barge berths, together with over 583,000 sq.ft. of transit shed space. In addition there is 242,000 sq.ft. of open storage space at the deep-draft docks and 271,000 sq.ft. of open storage at the shallow draft docks.

BULK HANDLING FACILITIES:

Public Grain Elevator: Located at the approach to the Turning Basin, the port-owned and operated elevator has a capacity of over 3,800,000 bushels. An adjacent bulk plant provides flat storage for all types of dry bulk commodities.

Two large gantry cranes handle the loading of vessels. The maximum spout clearance for loading vessels is 45 ft. above the water.

Equipped with two truck dumps and two hopper car dumps, the elevator has the rated loading capacity of 1,200 short tons per hour (1,000 L/T per hour on bulk carriers without wing tanks and 600 L/T per hour on tween deckers.)

The 400 ft. wharf is 12 ft. above water and has an unlimited berth length. The draft at dockside is 34 ft. and the channel control depth is 36 ft.

The grain elevator also has the flexibility of unloading vessels (barge unloading capacity is 300 t.p.h.).

Liquid Bulk Handling: Liquid Terminals, Inc., is a new facility that was built to handle and store all types of liquid commodities in bulk. The large storage tanks vary from 5,000 to 20,000 barrels each, providing a total of more than 125,000 barrels capacity for the entire installation. The modern liquid dock adjacent to the facility accommodates vessels with a deep draft of up to 34 ft. Loading racks provide for the efficient transfer of liquids to either truck or rail.

Four oil and chemical docks are located on the North side of the ship channel and are utilised by companies such as Exxon, Texaco, Union Carbide, Petroleos Mexicanos, Line Service, Continental and Permian Oil to handle bulk petroleum and chemical products. Also see "Tankers".

CRANES: Two large floating cranes, rated at 150 metric tons each, are available for heavy lifts at any dockside location in the port area.

STEVEDORES: To arrange for gangs the vessel needs to notify the ship's Agent of ETA; the Agent will in turn notify the stevedores. It is necessary that the Agent be advised of an ETA before 1900 hrs. for an 0800 hrs. start.

Main commodities and average load discharge rates:

Grain	Bulk carrier 1,200 t.p.h.
Grain	between deck 600 t.p.h.
Cotton	100 bales per hour per gang
Lead and zinc pigs	40 tons per hour per gang
Citrus in boxes	22 tons per hour per gang
Onions and carrots in bags	22 tons per hour per gang
General cargo	25 tons per hour per gang

MEDICAL: When medical attention is required, advance notice should be given the Agent by ship's radio.

TANKERS: Ballast facilities are available up to 6,000 barrels per hour. The port loads refined petroleum products. The port has 4 tanker berths, with 34 ft. 7 in. max. draft.

DENSITY: The average density is 32 parts per 1,000.

FRESH WATER: Fresh water is available and can be delivered to a vessel through hose or pipe-line at 150 gallons per minute.

FUEL: No fuel is available locally. It must be barged in from Corpus Christi – advance arrangements are necessary.

FIRE PRECAUTIONS: Tankers are required to berth head out.

DEVELOPMENTS: The Federal Government has made an appropriation to initiate a study on deepening ship channel from 36 ft. to 42 ft. and to widen the channel from 200 ft. to 300 ft., bottom width. Plans are being made to build another grain elevator/bulk materials dock, and another chemicals dock in the future.

GANGWAY/DECK WATCHMEN: Such services are necessary only when detainees are held on board.

OPENING/CLOSING HATCHES: This work is done by the stevedores.

IDENTIFICATION CARDS: Immigration requires form No. 1-95 Landing permit.

CONSULS: Mexico: tel. 542-4431.

REPAIRS: Marathon, located at the port, is equipped to handle all normal temporary ship repairs.

DRY DOCKS: None available.

REPATRIATION: There are facilities for this service.

AIRPORT: The local airport is located 2 miles from the port. Braniff Airways operates 4 flights daily.

TIME: Local Time is 6 hours behind GMT.

HOLIDAYS: The following holidays are observed here: Veterans Day (4th Monday of October); Thanksgiving; Christmas; New Year; Washington's Birthday (Feb. 22nd); Texas Independence Day (March 2nd); Emancipation Day (June 19th); July 4th; Labour Day (1st Monday in September); Decoration Day (last Monday in May).

No work shall be performed on Labour Day or Christmas Day except in case of fire or where property is in danger. When holidays come on Sunday, the following day will be recognised as the holiday. Also, no work will be performed between 1600 and 1900 hrs. on election days.

POLICE/AMBULANCE/FIRE: Sherriff 546-2451; Brownsville Fire Dept. 542-4375; Ambulance Service 542-2121.

TELEPHONES: Telephones are not available for placing on ships.

SERVICES: Tank cleaning service is available at the port. Ballast facilities are available at oil docks 1, 2 and 3. P.I.B. can take care of compass adjusting, etc.

DELAYS: There are no delays unless an incoming ship has been assigned to a berth now occupied. Bunkers must be barged in; arrangements may be made ahead of time to avoid delay.

AUTHORITY: Port Director.

BRUNSWICK, Georgia: 31.09 N. 81.30 W.

DOCUMENTS:

Crew Lists: 1 certified copy for Immigration; 2 copies uncertified for Customs.

1 copy Pratique.

3 copies Inward Customs Manifests.

3 copies each Stores, Curio & Narcotics List.

PILOTAGE: Compulsory. 24-hour Pilot service arranged by Agent with 48-24 hour prior notice from ship. Pilot station at Buoy "St. S." Pilot reached through UHF Channels 12, 14, 16 on voice radio (R/T). Pilot boat is 25 ft. white hull. Marking is "Pilot" on hull.

ANCHORAGES: 3 miles S.E. of buoy "St. S." sand and mud bottom. In event deep draft (30 ft.) and high winds, anchorage near Ocean Buoy "2B" and inform Pilot as in "Pilotage". Vessels in need or for other good reason, may anchor in St. Simon's Sound, depth 10 fathoms.

APPROACHES: The harbour is located about midway between Savannah and Jacksonville. the harbour is reached by a channel from the Atlantic Ocean, running between St. Simons and Jekyll Island. The channel has a minimum width of 500 ft. and a depth of 32 ft. to St. Simons Sound, thence a width of 400 ft. and a depth of 30 ft. to Sidney Lanier Bridge, where the channel divides, 13 miles from sea. The Northern branch leads to Lanier Dock, State Dock and the city, 400 ft. wide and 30 ft. deep. The other branch leads N.W. to the pulp plant dock, chemical docks and electrical generating plant, 300 ft. wide and 30 ft. deep.

RESTRICTIONS: No restrictions unless vessel drawing 30 ft. or more, then must await high tide to cross bar.

MAX. SIZE: Max. permissible length 650 ft. Max. d.w.t. over 33,000 tons.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Prior arrival, use commercial Lantana, Chatham Radio for advices to Agent, 48-24 hours in advance.

TUGS: 3 Tugs, 500 h.p. each. Join vessel in St. Simon's Sound after passing lighthouse. Tug lines used.

BERTHING: 1,600 ft. continuous marginal wharf; steel and concrete construction, 57 ft. wide apron. Vessels normally turned to moor port side alongside unless deck cargo or other vessel obstruction means cargo may not be worked over port side. Gantry crane of 27 tons capacity available.

The Brunswick Port Authority operates a bulk commodity terminal at Lanier Dock. The facility is 500 ft. long and constructed of steel and concrete, with a project depth of 30 ft. MLW, equipped with a grab bucket, conveyors and marginal tracks for handling bulk cargoes at rates up to 600 t.p.h. It operates covered warehouses with a capacity of approx. 60,000 tons. A limited amount of open storage space is available equipped with a conveyor system and reclaim facilities. Lanier Dock lies directly adjacent to the Brunswick State Docks and warehouses. Both wharves have a turning basin of 1,000 ft. in length and 600 ft. wide with a project depth of 30 ft. MLW (mean low water) also Barge Dock facility 250 ft. long.

BRIDGES: 1: Lanier Bridge draw bridge; 250 ft. horizontal clearance, 139 ft. vertical clearance, up position, high water. Vessels under Pilot and tugs when passing through.

STEVEDORES: Wireless to Agent 48-24 hours prior arrival with number of gangs, working hatches and space in hatch, and special factors, e.g., pilferable cargo, autos, heavy-lifts, etc.

MEDICAL: Advance notice to Agent, or notify on arrival.

TANKERS: Liquid bulk cargo is pine oil distillates loading. Petroleum storage 310,000 barrels, Number 6.

DENSITY: Average 1.0166 (high) to 1.0141 (low). Water inside considered brackish.

FRESH WATER: From shore connections at 20 t.p.h.

FUEL: Bunker "C" available at piers. Distillate and blends by barge, if required. 72 hour advance notice to Agent, giving type and quantity.

GANGWAY/DECK WATCHMEN: Not required but available.

OPENING/CLOSING HATCHES: "McGregor" hatches must be opened by vessel prior working. All others may open at discretion to save turn-around time.
CERTIFICATES: Registry, U.S. tonnage tax. CFR Pollution, Load line, SOLAS, De-ratting.
CUSTOMS ALLOWANCES: Tobacco, 2 cartons. Customs will open bonded stores on request. Spirits, reasonable amount.
IDENTIFICATION CARDS: U.S. Immigration Landing Permits.
CONSULS: None, Consulates at Savannah, Ga., and Jacksonville, Fla., may be used as required by vessel.
REPAIRS: Limited to minor replacement parts to engine, radio, radar of standard makes. Major repairs may be arranged with shipyards of Savannah or Jacksonville.
DRY DOCKS: None.
REPATRIATION: Through Agent.
AIRPORT: 20 minutes drive from quays; 4 flights daily.
TIME: GMT minus 5 hours. Daylight Saving Time, 15th April through last Sunday October. April: advance; October: retard.
HOLIDAYS: 1st January, 15th January, 12th February, 22nd February, 30th May, 4th July, 1st Monday in September, 12th October, 11th November, 4th Thursday in November, 25th December.
POLICE/FIRE/AMBULANCE: Numbers given in Boarding Brochure.
TELEPHONES: None placed aboard. Public pay (coin) telephones on quay clearly marked.
GENERAL: Brunswick, Georgia, is a small port specialising in export of woodpulp in bales, pine-tree products in drums. Imports bulk salt, salt-cake, fertilizer materials and gypsum, some break-bulk general cargo. Vessel requirements handled by Agent in residence, communication by wireless or R/T essential in advance.
AUTHORITY: The Brunswick Port Authority and Georgia Port Authority.

BUFFALO, New York: 42.55 N. 78.55 W.

(See Plan Book)

DOCUMENTS: For vessels arriving from foreign ports:
3 Unfreighted copies of Complete Manifest covering all cargo to be discharged in the Great Lakes.
4 Personal Effects Lists.
4 Crew Lists.
4 Narcotics Lists.
Vessel's Registry and copies of Paid Tonnage Tax Certificates.
Health Pratique.
Clearance from previous port.
PILOTAGE: Not compulsory. Seaway Pilots will assist if required.
ANCHORAGE: Inside South Breakwater, depth 23 ft. – 27 ft.
MAX. SIZE: Limited by Seaway Locks. 730 ft. length and Seaway draft.
RESTRICTIONS: St. Lawrence Seaway navigation season. Approximately from 1st April to 15th December. Controlling depth 27 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New York Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Available, but not normally required.
RADIO: WBL – Buffalo.
BERTHING: Outer Harbour: Total berth space 2,400 ft.; depth alongside 27 ft. LWD. 2 transit sheds – total of 184,000 ft. dry dock space; sprinkler system equipped, seaway piers for bulk cargoes. South and North Piers 3,506 ft. of berth space, 200 acres open storage area. Depth alongside 27 ft.
SPECIALISED CARGO HANDLING FACILITIES: Niagara Frontier Transportation Authority. A mobile gantry crane capable of handling lifts of 55 tons at 40 ft. and portable bulk conveyors. Additional heavy lift equipment available from the Port of Buffalo and commercial sources.
STEVEDORES: Gangs to be ordered by 1700 hrs. for 0800 hrs. start following day, ample gangs available.
DENSITY: Fresh water.
MEDICAL: U.S. Public Health Outpatient Clinic as well as numerous hospital facilities.
FRESH WATER: Available at most berths.
FUEL: All grades available by tank truck delivery or by harbour tank barge.
CONSULS: Canada, Costa Rica, Ecuador, France, Germany, Italy, Mexico, Netherlands and Sweden.
REPAIRS: Machinery and above-water repairs available.
AIRPORT: 5 miles, served by four regular airlines.
SHORE LEAVE: No restrictions when cleared by US Immigration Officials.
GENERAL: Refer to "Great Lakes Pilot".
AUTHORITY: Niagara Frontier Transportation Authority.

BURNS HARBOUR: Indiana: 41.38 N. 87.11 W.

(See Plan Book)

The entrance to Burns Waterway Harbour is at 41° 38′ N. and 87° 11′ W. and is located on the South shore of Lake Michigan at Portage, Indiana, some 30 miles East of Chicago in an area known as the Indiana Dunes.
PILOTAGE: Available.
RESTRICTIONS: Average Navigation Season: Domestic cargo by lake freighters – March 15th to February 1st. Ocean going vessels via Seaway – April 1st to December 15th. Lake river barges – twelve months.
Approach to Harbour: Controlling depth of water at harbour entrance 30 ft., entry is from deeper water. Length and Beam Limitations – none. Approach open 24 hours per day.
Harbour: Controlling depth of water for outer harbour 28 ft.; East and West harbour arms 27 ft. Turning basin – 1,600 ft. radius with water depth of 28 ft. Accessible 24 hours a day. Length and beam limitations – none.
TUGS: Available if required.
BERTHING: The port provides 30 ft. depth at the entrance channel, 28 ft. at the inner harbour, and 27 ft. at berths. The harbour is protected by an all weather breakwater.
The port has 7 modern berths plus a mooring facilitiy specifically designed for self-unloader ships. Ultimately the Port will have 15 ship berths. Recently completed are 2 modern, heated, sprinkler-equipped transit sheds providing 146,000 sq. ft. of space for general cargo, which are being operated by competent stevedores.
A refrigerated storage building is in operation.
CRANES: 3 × 150 ton crawler cranes; 3 × 75 ton crawler cranes; 3 × 60 ton crawler cranes.
FRESH WATER: Available.
DEVELOPMENTS: New grain facility will be in operation mid-1981.
AUTHORITY: Indiana Port Commission, Port of Indiana – Burns Waterway Harbour, Portage, Indiana.

BURNSIDE, (Including St. James), Louisiana: 30.08 N. 90.55 W.

East bank of Mississippi River, about 200 miles from sea.
DOCUMENTS/PILOTAGE: For all general information refer to "New Orleans".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made out to New Orleans Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Not normally required.
BERTHING: Bulk Marine Terminal: berth 800 ft. long, 40 ft. depth; Ormet Corporation berth 825 ft. long, 50 ft. depth.
TANKERS: *St. James:* The facility is located on the West bank of the Mississippi River at Mile 180 above Head of Passes.
The operators are Shell Pipeline Corporation, Donaldsonville, Louisiana.
There are 2 berths, one of which is 800 ft. long and the other 1,100 ft. long. At the newer dock there are two 16 in. arms and the berth is capable of unloading 28,000 barrels per hour.
The depth alongside these berths is 55 to 60 ft. However, the draft of the vessel is limited to that available at Southwest Pass.
It is important to note that due to the design of this terminal it is impractical for vessels to receive stores at this location. Additionally there are no bunkers provided at this terminal nor is there any fresh water available from the terminal and there is no authorized anchorage in the immediate area of this facility. Vessels expecting less than 24 hours delay awaiting berth are generally anchored at New Orleans and then proceed to the terminal (which is a different port of entry for Customs) otherwise vessels would have to anchor at Burnside which is about 10 miles up river from St. James.
Because of an underwater pipe-line near the dock, the terminal management requires all vessels using their facility to have at least 1 tug of 1,800 h.p. to assist in docking and undocking. Note that the tugs emanate from New Orleans which means approximately 7 hours transit to St. James.
As a point of reference it generally takes approximately 15 or 16 hours transit from Southwest Pass to St. James Terminal for most vessels.
FRESH WATER: Available ex-berth.
FUEL: Not available.
DENSITY: Fresh water, 1000.

NOTICE:
Agent to Shipmaster:
Vessels over 100,000 Summer deadweight:
This is to advise you that the Pilots will not allow your vessel to transit outbound between Pilottown and Southwest Pass during darkness hours if your vessel is at a draft in excess of 35 ft. fresh water upon arrival at Pilottown outbound. The times involved are from 1600 hours until 0700 hours the next day.
We feel certain with various ballasting procedures you will be able to comply with this draft upon reaching Pilottown even though you may leave the *St. James berth* at a greater draft. If you cannot comply, please advise your Agent boarding with this letter in order that he may inform all parties interested.
By anchoring at Pilottown you will be costing yourself an additional $3500 minimum in tug and Pilot expense. Therefore, we sincerely require your utmost co-operation.

SHIPMASTER'S REPORT: February 1979.
Location: St. James – West Bank.
Documents: Ship's stamp on cash receipts.
Anchorage: Usually at Grandview in the Customs District of Gramercy, where launch service available and about 1 hour's drive to New Orleans.
From Capline (St. James) about 45 minutes drive to Baton Rouge.
VHF: All berthing and river pilotage on Channel 13.
Tugs: 3 tugs recommended.
Berthing: Always port side to. No shore gangway, moorings 4, 2, 2 each end for tankers of 100,000 d.w.t. and upwards.
Cranes: Not available.
Tankers: Require ship's gangway at No. 2 berth.
Consuls: Honorary British Consul at New Orleans. (321 St. Charles Avenue). Open 1000 – 1200 hrs and 1400 – 1600 hrs.

CAPE COD CANAL, Massachusetts **(See Plan Book)**

The Cape Cod Canal is a sea-level canal, extending from a point on Cape Cod Bay about 50 miles S.E. of Boston Harbour, Mass., to the head of Buzzards Bay, Mass. In general direction the Canal trends from Cape Cod Bay Westerly to Buzzards Bay.
PILOTAGE: The Corps of Engineers, Department of the Army , does not maintain pilot service but independent Pilots, licensed by the U.S. Coast Guard, are usually available at the canal. Messages will be transmitted to Pilots with the understanding that the Government will assume no responsibility in connection therewith.
RESTRICTIONS:

	Width bottom Feet	*Length Miles*
Easterly Entrance to Station 430	480*	8.4
Station 430 to Wings Neck (Hog Island Channel)	500	4.3
Wings Neck to Cleveland Ledge (Cleveland Ledge Channel)	700	4.7

*Except narrows to 450 ft. opposite State Pier.

The canal and approach channels have been dredged to the project depth of 32 ft. below mean low water.
RADIO: Direct communication with the Cape Cod Canal sub-office, New England Division, Corps of Engineers, is available at all hours by means of telegraph, telephone, or radio. The telephone number is 759-4431 or 789-4432.

The nearest ship to shore telephone stations are at Scituate call letters (WOU) and Chatham call letters (WCC). Bridge to bridge radio-telephone facilities are available on 156.65 mHz, 156.6 mHz, 156.7 mHz and 156.8 mHz. Vessels equipped for communications with the Cape Cod Canal are requested to keep their radio-telephone tuned to the above frequencies.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Boston Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Not available.
BERTHING: Mooring basins are located at the East and West ends of the canal. The East Mooring Basin, located on the North side of the canal is 2,500 ft. in length, 350 ft. in width and is maintained at a depth of 25 ft. at mean low water. The West Mooring Basin, located on the S.E. side of the Hog Island Channel is 3,300 ft. in length, 350 ft. in width and is maintained at a depth of 32 ft. at mean low water. Mooring dolphins are provided in both mooring basins.
BRIDGES: 2 fixed span high-level highway bridges and 1 vertical lift railroad bridge cross the canal.

The minimum bridge clearance for the available width of channels are as follows:

	Horizontal Clearance	*Vertical Clearance (mean high water)*
Highway Bridges	480 ft.	135 ft.
Railroad Bridge (vertical Lift)	466 ft.	135 ft. (open) 7 ft. (closed)

COASTGUARD STATION AND WEATHER SIGNALS: A U.S. Coastguard Station is located near the Eastern entrance.
TRAFFIC LIGHTS: Red, green and amber electric lights, visible for a distance of about 2 miles in clear weather, day or night, are located at the following points:

(a) Eastern or Cape Cod Bay entrance, on South side of entrance at an elevation of about 55 ft. above high water.

(b) Western or Buzzards Bay entrance, (1) Wings Neck, near Wings Neck Light at an elevation of about 48 ft. above high water.
AUTHORITY: Corps of Engineers, Dept. of the Army, Waltham, Massachusetts.

CASTLE ISLAND, Alaska

Located in Duncan Canal off Kupreanof Island between Wrangell and Petersburg. Open all year.
DOCUMENTS: See "Anchorage, Alaska".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
PILOTAGE: (From sea via Dixon Entrance up Clarence Strait to Guard Island.) Under pilotage from Guard Island.
MAX. SIZE: Harbour depth 45 ft.
TIDES: Diurnal range 16 ft. Also see "Berthing".
ANCHORAGE: Fair weather anchorage only.
CUSTOMS: Quarantine and Immigration available from Guard Island. Customs available from Petersburg or Guard Island.
BERTHING: Alaska Barite facility: Dolphins and 2 floats. Present facilities limited to about 22,000-ton ships. Loading equipment consists of 1 loading spout for bulk cargo. Production average of 1,000 t.p.h.
TUGS: From Wrangell 3 available 500 h.p. each.
STEVEDORES: Sufficient to work ore loading facility 24 hours a day when necessary.
REPAIRS/WATER/FUEL: None.
MEDICAL: Facilities available in Petersburg or Wrangell.
AIRPORT: Charter airplane only.

CHARLESTON, South Carolina: 32.47 N. 79.56 W. **(See Plan Book)**

DOCUMENTS:

3 Crew Lists.
3 Curio Lists.
3 Stores Lists.
3 Manifests.
At least 1 copy of Bill of Lading, if provided by shipper, and 1 copy of Parting Crew List.

PILOTAGE: Shipmasters to notify Agent 48, 24 and 12 hours prior arrival at C-2 Buoy. Pilot may be contacted by VHF Channels 16 and 18. Pilot boards on lee side from black-painted launch with "PILOT" painted in white letters on the side. Normally vessel is berthed by Docking Master from tug company.
ANCHORAGES: Rarely required.
RESTRICTIONS: Only restriction affecting operation relates to channel depth of 35 ft. at low tide.
MAX. SIZE: Can handle vessels 930 ft. long. Present private tanker facilities measure 475 ft. from centre of discharge pipe-line to end of dock.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Washington, D.C. Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Normal procedure. No special or unusual procedures required.
RADAR/VHF: Services required are handled through Agent.
TUGS: Tugs usually join tankers between Cooper River Bridge and Coal Pier, approximately 0.5 mile from dock. Tug lines used. No charge made for this service.

Tugs are required for any vessel docking at or sailing from any state port berth which has a crane.
BERTHING: *Union Pier:* State Pier No. 2: 3 berths. Break-bulk terminal, length 2,083 ft. Depth 35 ft. One 90 ton track crane and one 125 ton gantry crane. A 388 ft. berth extension is soon to be completed (October 1980) with LASH barge handling capabilities, and 87,453 sq. ft. of open storage area.

Columbus Street Terminal: State Pier No. 8. 6 berths. Length 3,875 ft. Depth 35 ft. Terminal handles break-bulk and containers. One 440 ft. banana berth. One 75 ton gantry crane, one 50 ton gantry crane and one 30 ton gantry crane serve 1,940 ft. of berthing space along the South end of the pier. One 400 ton capacity sheer-leg, one 90 ton truck crane and 2×40 long ton container cranes.

North Charleston Terminal: State Pier 15: Total length 2,500 ft. One general cargo berth length 600 ft., one grain berth, length 675 ft. 2 container berths each 930 ft. length. 3×50 ton container cranes, one grain elevator, capacity 1.5 million bushels. Also one gantry crane of 30 tons capacity.
STEVEDORES: *Working Hours:* Labour may be ordered for work to start at the following times: 0800, 1000, 1200 and 1900 hrs. Labour will usually work as long as necessary; shift system not used in this port.
MEDICAL: Advance notice when possible.
TANKERS: *Private facilities:* Discharge lines all 8 in. dia. and 1 solvent line 8 in. Adapter to conform to ship's discharge lines supplied. Draft not to exceed 35 ft. low tide. Tanker berths operated by Humble Oil, Shell Oil, Hess Oil, BPT, and Phillips Petroleum, all suitable for 35 ft. draft. Gulf Oil berth, max. draft 30 ft. Texaco berth, max. draft 32 ft.
FRESH WATER: Available via 2.5 in. hose at a rate of 500 bbls.p.h.
FUEL: Bunker "C" at API of 14.4 to 16.6 (approx.) and blended Bonded Intermediate grades from 1 to 30.
FIRE PRECAUTIONS: Normal precautions.
GANGWAY/DECK WATCHMEN: Supplied by Agent upon request from Shipmaster only.
CERTIFICATES: Normal International certificates.
CUSTOMS ALLOWANCE: Tobacco, Wine and/or Spirits, governed by length of time in port and existing Customs regulations.
CONSULS:

Chile: Dr. Carlos Salianis, 948 Equestrian Dr., Mount Pleasant, S.C. 29464, Tel: (803) 792 – 2489, (803) 884 – 6224.

Denmark: G. L. Buist Rivers, Jr., 28 Broad St., P.O. Box 993, 29402, Tel: (803) 577 – 4000.

France: Ms. Jacqueline Dietrich, 2 Sylvan Court, Spartanburg, S.C. 29302. Tel: (803) 583 – 5117.

Norway: James D. Lucas, III, 10 N. Adgers Wharf, Post Office Box 536, Charleston, S.C. 29401. Tel: (803) 577 – 5782.

Switzerland: Dr. Hans Kuhn, 176 West Park Drive, Spartanburg, S.C. 29301. Tel: (803) 585-3922.
REPAIRS: Available.
DRY DOCKS: 1×10,000-ton floating dock, 1×1,500-ton, and 2×1,000-ton floating docks.
REPATRIATION: Facilities available.
AIRPORT: 10 miles from Terminal, served by regular airlines.
HOLIDAYS: Work continues on holidays.
POLICE/AMBULANCE/FIRE: Contact dockmaster at any time.
TELEPHONES: No arrangements exist for placing phones aboard vessels. Phone facilities are situated within 100 ft. of vessel at dock.
SERVICES: No tank cleaning/washing facilities available at dock. Can be arranged and handled at local shipyard. Practically any other service available at dockside.
SHORE LEAVE: Subject to Shipmaster's permission and existing Immigration regulations.
DELAYS: Normally, no delays beyond normal time required to connect/disconnect hoses.
DEVELOPMENTS: *Wando River Terminal:* There is a US$56 million expansion programme underway to provide 3 container berths (2,400 ft.) with 4 container cranes. The first berth is expected to be completed in mid-1981.

The main navigation channel is to be deepened to 40 ft.
AUTHORITY: South Carolina State Ports Authority.

CHICAGO: Illinois: 41.50 N. 87.45 W. (See Plan Book)

DOCUMENTS:

For Agent in Montreal:
3 unfreighted copies of Complete Manifest for Seaway Toll purposes covering all cargo to be discharged in the Great Lakes.

In first U.S. port: a "Traveller" is made up by the Customs Inspector with the following documents:
2 complete sets of U.S. Cargo Manifests, plus 6 copies for Agents.
1 set Manifest of Cargo for first U.S. port.
4 Stores Lists.
4 Personal Effects Lists.
4 Firearms and Ammunition Lists.
4 Crew Lists, Form I418.
4 Narcotics Lists.
4 Vessel's Itinerary Lists.
Vessel's Registry and copies of Paid Tonnage Tax Certificates.
Health Pratique.
Clearance from previous port.
2 sets Bills of Lading.
3 copies Stowage Plan.

In subsequent U.S. ports the following are required:
5 sets Manifest of Cargo for that port.
The "Traveller" and Permit to Proceed issued in previous port.
2 Stores Lists.
2 Personal Effects Lists.
2 Firearms and Ammunition Lists.
2 Crew Lists.
2 Narcotics Lists.
2 sets Bills of Lading.
3 copies Stowage Plan.

PILOTAGE: Compulsory unless Master holds exemption "B" license. 24 hours notice of arrival required by Agents who arrange Pilot.

ANCHORAGE: In Chicago Harbour, anchorages A, B and F designated for merchant ships and marked on charts. In Calumet Harbour vessels should not anchor within 1,000 ft. of the breakwaters.

RESTRICTIONS: St. Lawrence Seaway navigation season approximately from April 15th to November 15th. Controlling depth 27 ft.

MAX. SIZE: Limited at Seaway Locks. 730 ft. length, 26 ft. draft. Depth alongside terminals 27 ft.

RADIO: Port can be contacted by Illinois telephone station WAY.

Notice of arrival; Master must give at least 24 hours notice to Commander 9th Coast Guard District, Cleveland, Ohio, of the vessel's ETA at Snell Lock. Also at least 24 hours notice of ETA at first U.S.A. discharge port is required.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Chicago Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Available, not compulsory but recommended.

BERTHING: Two 100,000 sq. ft. terminal warehouse facilities are under construction and due for completion about June, 1980. 90 acres of the 194 acre site has been set aside for maritime operations adjacent to the 3,000 ft. of berthing space alongside the Calumet River.

Calumet River Terminals: Iroquois Landing Lakefront Terminals. Operators: Ceres Marine Terminals and International Great Lakes Shipping. Facilities at the mouth of the Calumet River. Handles general cargoes, steel products and containers. The terminal has 3,000 ft. of berthing space. Heavy lift cranes run from 75 to 110 tons in capacity. Also numerous lift trucks, with capacities to 56,000 lb.

Federal Marine Terminals Inc. handles general cargo, steel products and containers. This facility has 730 ft. of berthing space, 34,000 sq. ft. of covered storage space and 11 acres of open storage space. Heavy lift cranes at Federal Marine range from 20 to 150 tons. Lift truck capacities range up to 52,000 lb.

The Rail to Water Transfer Corp. (RTW) on the Calumet River specialises in handling, storing and distributing raw materials or dry bulk commodities. RTW's twin bulk loading facilities offer 2 deep-water berths, each more than 700 ft. long. The facility has railroad yards that accommodate 2,200 rail cars adjacent to the dock. The twin loading towers provide fast handling at up to 2,500 t.p.h.

Lake Calumet Terminals: Bulk Terminals Co. in Lake Calumet transfers liquid bulk cargoes – animal fats, vegetable oils and chemicals. Bulk Terminals has 400 ft. of berthing space, with storage capacity of more than 550,000 barrels and 16,000 sq. ft. of drumming warehouse space. This facility has a transfer capacity of approximately 200 t.p.h. Bulk also has 5 miles of internal railroad trackage and a switch engine.

The International-Great Lakes Shipping Company (INGLA) terminal at Lake Calumet handles steel, ores, pig iron, scrap and containers. The terminal was designed for easy interchange of cargoes to and from deep sea vessels. Mississippi River barges, Great Lakes vessels, railroads and trucks – both local and interstate. Truck and railcar weighing services are available also. INGLA has 1,500 ft. of berthing space; 45,000 sq. ft. of covered storage and 27 acres of open storage. Heavy lift equipment includes 5 cranes ranging from 125 to 150 tons. Lift truck capacities range up to 50,000 lb. per unit.

Ceres Marine Terminals facilities on Lake Calumet have 176,000 sq. ft. of transit shed (60,000 heated); 100,000 sq. ft. of general storage, warehouse and distribution area (50,000 heated), and 50,000 sq. ft. of open storage. Refrigerated space is available in the transit warehouse. Equipment includes lift trucks with capacities up to 62,000 lb. North Pier services barge traffic to and from locations along the entire inland waterway system, and as far South as the Gulf, in addition to serving deep draft vessels.

EmEsCo warehousing and marine terminal facilities on Lake Calumet are designed for efficient handling of steel, machinery, containers, scrap, pig iron, ferro-alloys and other metallic bulk commodities. EmEsCo's 800 ft. of heavy duty bulkhead and 2×75-ton gantry mounted cranes operating over 3,700 ft. of tracks provide more than 1,000,000 sq. ft. of open storage under cranes. EmEsCo has 100,000 sq. ft. of heated warehouse, with plans to expand that to 425,000 sq. ft. Other features are 25 acres of open storage, miscellaneous auxiliary cranes, an electronic truck and rail scale, 25,000 ft. of railroad track, ship to barge transfer, 100 intra-plant flat and gondola cars.

Trade Zone Distribution, Inc.: Operates Free Trade Zone No. 22 for warehousing, storage and distribution.

Buffington Harbour: Private harbour owned by Universal Atlas Cement. Located about 9.5 miles S.E. of Calumet Harbour. A concrete dock 1,755 ft. long, enclosed by a breakwater with entrance 880 ft. wide. Exposed to heavy N.E. swell. Depth alongside from 25 to 31 ft.

BULK HANDLING FACILITIES: Continental Grain Company's Elevator "B" on the Calumet River has a storage capacity of 6,800,000 bushels. Elevator "B" has 5 loading spouts with a shipping capacity of 40,000 bushels per hour. Unloading capacity from barges is 15,000 bushels per hour. Receiving capacity from rail cars is 10,000 bushels per hour and from trucks 15,000 bushels per hour. The berthing space at elevator "B" is 1,025 ft.

The Cargill Inc. grain elevator on the Calumet River has a capacity of 23 million bushels. In addition to grain, this facility handles salt, molasses, and grain by-products. Cargill has 3,600 ft. of berthing space – 1,200 of this for elevator use, and 20 acres of open storage. Loading capacity is 60,000 bushels per hour, while unloading is 12,500 bushels per hour. Cargill has 3 marine legs, and 5 loading spouts.

The Gateway Elevator of the Indiana Grain Co-Operative at Lake Calumet offers storage capacity of 6,500,000 bushels for bulk grains. The 8 loading spouts have a capacity of 20,000 bushels each per hour. Unloading speed is 10,000 bushels per hour. Berthing space is 1,000 ft.

Continental Grain's Elevator "C" at Lake Calumet has a capacity of 6,500,000 bushels of bulk grain and grain products. The 8 loading spouts have a capacity of 20,000 bushels each per hour. Unloading capacity is 10,000 bushels per hour. This facility has 1,000 ft. of berthing space.

DENSITY: Fresh water.

MEDICAL: Doctors, hospital and all facilities available.

FRESH WATER: Available at most berths.

FUEL: All grades available, ex-wharf, or delivered by barge.

DOCUMENTS: *continued.*

on board. Visa waivers are applied for and granted fairly regularly but Immigration has the discretion to refuse these at will.

PILOTAGE: Compulsory, unless Master has a "B" Certificate on board. Vessels are not permitted to transit the lakes from Port Colborne to Cleveland without either a "B" Certificate on board or a special Waiver from the U.S. Coastguard.

ANCHORAGE: In the outer harbour, 28 ft. depth, mud and sand bottom.

RESTRICTIONS: St. Lawrence Seaway navigation season approximately from April 15th to December 15th. Controlling depth 25 to 27 ft. Access to berths in the River is limited by height restriction of 97 ft. above waterline.

MAX. SIZE: Limited at Seaway Locks, 730 ft. length, 26 ft. draft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Chicago Quarantine Station.

AGRICULTURE: See "Agriculture" first U.S.A. port (Albany).

TUGS: Available and use is compulsory in Cuyahoga River and Old River channel.

RADIO: U.S. Coast Guard can be contacted by R/T on 2182 kc/s.

Notice of arrival: Master must give at least 24 hours notice to Commander 9th Coast Guard District, Cleveland, Ohio, of the vessel's ETA at Snell Lock. Also at least 24 hours notice of ETA at first U.S. discharge port is required.

DENSITY: Fresh water.

MEDICAL: Doctors, hospital and all facilities available.

TANKERS: See Table.

FRESH WATER: Available at most berths.

FUEL: Marine gas oil and diesel oil readily available, ex-wharf or delivered by barge.

CONSULS:

Austria
Belgium
Canada
Colombia
Denmark
Finland
France
Germany (Federal Republic)
Italy
Japan
Korea
Norway
Sweden
Switzerland
United Kingdom
Yugoslavia

REPAIRS: All marine repairs can be effected. Dry dock 730 ft. length at Lorain, Ohio.

GENERAL: Refer to "St. Lawrence Seaway" for important general information.

AUTHORITY: Cleveland-Cuyahoga County Port Authority.

COOS BAY, Oregon: 43.22 N. 124.13 W.

DOCUMENTS: Local Port Authority does not require any documents from merchant vessels entering this harbour. This does not preclude United States Customs requirements for documents.

PILOTAGE: No specified amount of advanced notice of ETA required. Radio contact may be made on frequency 8182, also on frequency 2182. Most used frequency is VHF Channel 16. Pilot will be taken on board at entrance of Coos Bay channel. No designated anchorages for vessels awaiting a Pilot.

ANCHORAGES: Only anchorage in Coos Bay is South of buoy 23. Limiting draft 35 ft.

MAX. SIZE: Max. permissible length is 725 ft. Breadth 110 ft. A 2 ft. clearance under keel is considered necessary for safe navigation. Vessels entering Coos Bay from sea draw down about 0.166 in. per foot of draft because of difference of density.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Pilots, Agents and stevedores monitor VHF Channel 16.

TUGS: Pilot vessel acts as Tug. Emergency small harbour tugs available and ship's lines generally used.

BRIDGES: 2 bridges cross the main ship channel. The Southern Pacific railway drawbridge 9 miles from the entrance and the Coast highway bridge 9.6 miles from the entrance. Clearance height of the highway bridge is 149 ft. in the centre of the span at MLW. Clearance width of swinging railway bridge 194 ft.

BERTHING: *Note:* All berths with the exception of oil berths dredged to 35 ft. in 1979.

Cape Arago Dock: Length 504 ft. Depth alongside at MLW 22 ft. 6 in. (West end) and 25 ft. (East end). No dock cranes available. Fresh water available. Distance from entrance 5 miles.

Roseburg Lumber Co. Dock: Length, 635 ft. Depth alongside at MLW 35 ft. No fresh water available. Distance from entrance 8 miles.

Ocean Terminals Dock: Length, 400 ft. Depth alongside at MLW 35 ft. No dock cranes available. Fresh water available. Distance from entrance 11 miles.

Weyerhaeuser Dock: Length: (Lumber Dock) 1,433 ft. (Wood Chip Dock) 694 ft. Depth alongside at MLW 35 ft. No dock cranes available. Fresh water available. Distance from entrance 12 miles.

Fibrex and Shipping Co. Dock: Length of floating walkway 700 ft. Depth alongside at MLW 35 ft. Wood chip loaded by pneumatic pipe. Fresh water available. Distance from entrance 12.5 miles.

Bayshore Dock; Length 504 ft. Depth alongside at MLW 35 ft. No dock cranes available. Fresh water available. Distance from entrance 13 miles.

Dolphin Terminals: Vessels moor to dolphins adjacent to apron 60 ft. long and 26 ft. wide which is joined to the shore by a causeway length 190 ft. and width 12 ft. Depth alongside at MLW 35 ft. Fresh water available. Distance from entrance 13 miles.

Central Dock: Length 1,348 ft. Depth alongside at MLW 35 ft. No dock cranes available. Fresh water available. Distance from entrance 13.5 miles.

Portland Dock: Length 576 ft. Depth alongside at MLW 35 ft. No dock cranes available. Fresh water available. Distance from entrance 15 miles.

Coos Bay Dock: Length 1,326 ft. Depth alongside at MLW 35 ft. No dock cranes available. Fresh water available. Distance from entrance 15 miles.

STEVEDORES: Should have minimum of 48 hours to arrange gangs. Also see "Radio".

MEDICAL: Advance notice of required medical attention is desirable, in order to expedite use of ambulance, if necessary.

TANKERS: 2 tanker berths, Standard Oil and Union Oil Co., draft 30 ft. Tankers discharge into tank farms. Union Oil Co. is the bunkering Agent.

FRESH WATER: Available. Cost per ton is negotiable.

FUEL: 24 hours advance notice desirable, both bunker and diesel fuel available.

GANGWAY/DECK WATCHMEN: Service of watchman at discretion of ship's master.

OPENING/CLOSING HATCHES: Normally by stevedores.

IDENTIFICATION CARDS: Not required by local authorities.

CONSULS: None.

REPAIRS: Only minor deck and engine repairs possible.

DRY DOCKS: Largest dry dock handles vessels not exceeding 125 ft.

REPATRIATION: Repatriation through local Customs and Immigration office.

AIRPORT: All docks within 5 miles of airport. Airport served by regular airlines.

TIME: GMT minus 8 hours, clocks advanced 1 hour on 1st May, clocks retarded 1 hour, 1st November.

HOLIDAYS: All legal holidays observed, plus state-wide elections. Cargo work through negotiations with stevedore contractors.

POLICE/AMBULANCE/FIRE: Police: Coos Bay 269-1181, North Bend 756-3161; Ambulance 756-3234; Fire Coos Bay 267-4123, North Bend 756-6111.

SHORE LEAVE: Crew members allowed ashore except when Federal directives may be applied to a specific vessel.

DELAYS: No delays in berthing, loading or discharging, or bunkering can normally be expected.

DEVELOPMENTS: Depth of channel at entrance 45 ft. Inner channel, to head of channel 35 ft. An additional anchorage (Turning Basin) will be installed, directly East of beacon 17.

AUTHORITY: Administrator and Harbour Master, Port of Coos Bay.

AGENT: See "Portland", Oregon.

CORDOVA, Alaska: 60.33 N. 145.46 W.

Located at S.E. side of Prince William Sound at the head of Orca Inlet. Open harbour year round.

APPROACHES: Via Prince William Sound.

DOCUMENTS: See "Anchorage, Alaska".

PILOTAGE: Pick-up point is Sheep's Point. Prior arrangements required.

ANCHORAGE: Good holding ground. Mud bottom between Spike Island and Municipal dock.

MAX. SIZE: Recommend max. draft 25 ft. Tidal variation: 18 – 19 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Contact port on VHF Channels 19 and 26; Citizens band, Channel 5 or SSB 2509.

TUGS: Limited availability. Prior arrangements need to be made.

BERTHING: Berthing Permit required. Advance notice of 48 hours requested.

Municipal Dock: 18 ft. deep, 400 ft. long, 72 ft. wide. Open storage of 10 acres. One 140 ton P & H mobile crane.

Container and Ro-Ro facilities: Movable ramp, 4.57 m. wide, available for Ro-Ro operations. 4 ha. container staging area.

STEVEDORES: ILWU No. 66, Box 416, Cordova, Alaska, 99574. Telephone 907-424-7224.

Working hours – 24 hours.

REPAIRS: Radio, radar, welding, machining and light engine repairs can be effected.

FRESH WATER: Available at docks.

FUEL: No bunker "C" available. Fuel oil available.

MEDICAL: 22-bed hospital and a medical clinic, with 3 doctors, 1 dentist also public health nurse.

CUSTOMS: Quarantine – local. Immigration and Customs from Anchorage, Alaska.

AIRPORT: 13 miles from city centre. Small plane field near town, available for charter air service.

HOLIDAYS: None.

TIME: Alaska Standard time.

POLICE/FIRE/AMBULANCE: All available. Tel: (907) 424 7475.

AUTHORITY: Joseph W. Gunderson, Port Director.

CORPUS CHRISTI, Texas: 27.48 N. 97.23 W.

(See Plan Book)

PORT LIMITS: Corpus Christi's port limits include all of Nueces County, which has been officially designated as Nueces County Navigation District No. 1. The Corpus Christi turning basin, Avery Point turning basin, Chemical turning basin, Tule Lake turning basin and the Viola turning basin are interconnected by the Industrial Canal, the Tule Lake Channel and the Viola Channel and constitute the Corpus Christi Inner Harbour. Other Bay points included in the Port of Corpus Christi area are: Harbour Island, the North end of Mustang Island, near the inner end of the Aransas Pass entrance, and Port Ingleside and La Quinta along the route of dredged deep-water channels on North side of Corpus Christi Bay; and the Rincon Barge Canal System. All of the ship channel has now been deepened from 40 ft. to 45 ft. except the 10 mile Inner Harbour, which will be deepened from 40 ft. to 45 ft. in the next few years.

DOCUMENTS:

- 3 copies Cargo Manifest (Forms 7527 – A or 7527 – B), the original showing all cargo on board, and 2 copies showing only cargo for this port.
- 2 copies Crew Manifest (Form 1304).
- 2 copies Stores List (Form 1373).
- 2 copies Passenger List (Form I. – 418).
- 2 copies Crew List (Form I. – 418).

Customs Boarding Officer will also examine Ship's Register and Load-line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:

- Health Pratique.
- Master's Oath (Customs, 2 copies Form 1300).
- General Declaration (2 copies Form 1301).
- All Foreign clearances.
- U.S. Certificates of payment of tonnage tax (Customs Form 1002).
- Certified Crew List.

PILOTAGE: Pilot boards off Port Aransas.

RESTRICTIONS: No restrictions, 24 hour service. The Port of Corpus Christi is situated on the West side of Corpus Christi Bay, in South-Western Texas. Port facilities at Corpus Christi lie along a 9.5 miles stretch of dredged channels and basins about 18 miles from Aransas Pass entrance at the Gulf of Mexico, Channel depth 40 ft., width 400 ft.

Turning Basins: 5 turning basins in the Inner Harbour are each minimum 1,000 ft. wide and more than 1,000 ft. in length.

MAX. SIZE: Cargo vessels: 39 ft. draft. Tankers: 39 ft. draft. Harbour Island has tanker docks with 45 ft. draft. Also see "Berthing".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: KLC ITT-Radio-Arcadia, Texas. KLC RCA-Radio-Galveston, Texas.

VHF: KKQ 769 – Harbour Master – Channel 12 and 16. WR 8879 – Aransas-Corpus-Christi Pilots Channel 12 and 16. KBP 384 – Harbour Tugs – Channel 12. U.S. Coast Guard – Channel 16.

TUGS: Tug assistance available. Tugs join vessels berthing at Harbour Island in jetty channel. Tugs accompany vessels entering Inner Harbour outside Corpus Christi Harbour Bridge.

BERTHING: The Corpus Christi Turning basin is over a mile long and 1,000 ft. wide. There are 4 additional basins in the Main Harbour, which extends Westward from Corpus Christi Harbour Bridge for 9.5 miles. The water in all basins, channels and canals is 40 ft. deep.

Draft for public docks will be furnished upon request to the Harbour Master or steamship Agent. Draft for private docks will be furnished upon request to the dock owners or steamship Agents.

Inner Harbour – Public Docks: The length limit indicator is not of necessity the max. length for a vessel as larger vessels can berth if adjacent berth is not occupied.

Cargo Docks *No.*	*Length Limit* *ft.*
1 – 2	700
3 – 6	1,300
8	600
9	750
10 – 11	700
12	700
14 – 15	1,000
Bulk Materials Dock	835
Public Grain Elevator Dock	900

Inner Harbour – Private Docks: (Other than oil docks).

PPG Industries Inc., Cargo Dock: Length of pier 450 ft. Length of Head 100 ft.

Producers Grain Port Terminal Elevator Dock; Lone Star Cement Corp. Dock; Berry Contracting Company; Centex Cement Company.

TANKERS: Between Corpus Christi Turning Basin and Viola Basin are 11 public and 10 private Oil Docks, some capable of berthing tankers of 150,000 d.w.t. capacity. Also see "Berthing".

Inner Harbour – Public Docks:

Oil Dock	No. 1	Length Limit	800 ft.
	No. 2*	Length Limit	350 ft.
	No. 3**	Length Limit	430 ft.
	No. 4†	Length Limit	850 ft.
	No. 6*	—	—

La Quinta Channel	Reynolds Metals Co. Bauxite Unloading Pier
La Quinta Channel	Reynolds Metals Co. Alumina Loading Dock.

CARGO GEAR: *Heavy Lift Facilities:* Derrick at Cargo Dock 14 has 100 tons capacity at 53 ft. radius, it can handle containers, 40 ft. or larger of Locomotive cranes 4×30 tons capacity.

Facilities are available for all types of liquid cargo, dry bulk and general cargo, except cannot handle restricted cargo such as ammunition and explosives.

BRIDGES: Corpus Christi Harbour Bridge; vertical clearance at MHW is 138 ft.

Upper Harbour Lift Bridge: Vertical clearance at MHW when raised is 138 ft.

FRESH WATER: Available.

FUEL: 1,500 Redwood, 1,000 Redwood – 24 hour notice.

Bunker C, Marine diesel, Light diesel – Pipe-line or Barge, Truck.

FIRE PRECAUTIONS: No working barges alongside (except bunkering barges) and normal precautions as shut down cargo operations during lightening storm, etc.

SURVEYORS: American Bureau of Shipping; J. E. Orrell, Lloyds Sub-Agency and National Cargo Bureau.

GANGWAY/DECK WATCHMEN: Not necessary. If recommended $6.00 per hour.

HATCHES: Hatches may be opened by crew before entering harbour, after the ship has entered harbour it is carried out by stevedores.

CUSTOMS ALLOWANCE: 300 cigarettes per man. 1 quart liquor per man.

POLICE/AMBULANCE/FIRE: Police 882-1911, Ambulance 882-5571, City Fire 884-5563; Refinery Terminal Fire Co. 882-7801.

TELEPHONES: No arrangements exist.

SERVICES: Coastal Iron Works: ship repair, etc. International Marine Services: ship repairs, etc. No facilities for tank washings.

CONSULS: Mexican Consul, Guaranty Bank Plaza, Corpus Christi, Texas. Tel: 882-3375.

Norwegian Vice Consulate, Wilson Building, Corpus Christi, Texas. Tel: 883-0801.

AIRPORT: Approximately 7.75 miles from Port. Serviced by 5 regular airlines.

TIME: Daylight Savings Time from last Sunday in April to last Sunday in October (minus 5 hours GMT). Central time remainder of year (minus 6 hours GMT).

HOLIDAYS: New Year's Day (January 1st); Martin Luther King's Birthday (January 15th); Lincoln's Birthday (February 12th); Washington's Birthday (3rd Monday of February); Texas Independence Day (March 2nd); Good Friday (varies); Memorial Day (last Monday of May); Juneteenth Day (June 19th); July 4th; Labour Day (First Monday of September); Columbus Day (2nd Monday of October); Veterans Day (4th Monday of October); Theodore Gleason's Birthday (November 8th); Thanksgiving (4th Thursday of November); Christmas Day (December 25th).

Possible to work on any holiday except Labour Day or Christmas in case of fire or danger to property. If holiday falls on Sunday, Monday is observed.

SHORE LEAVE: Possible.

IDENTIFICATION CARDS: Standard Immigration Forms I. – 95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I. – 95, issued for same vessel.

DEVELOPMENTS: Latest port plans include an inshore multi-purpose facility at Harbour Island that will accommodate VLCC's up to 275,000 d.w.t.

SHIP'S OFFICER'S REPORT: 1979 (Tanker).

Pilots: The Aransas-Corpus Christi Pilots also monitor VHF Channels 16 and 12. The Pilots generally board vessels near Buoy No. 3, at the entrance to the dredged channel, rather than at the sea Buoy "AP", which lies about 3 miles further offshore.

Channel Depth: Project depths for channels in September 1978 were 45 ft. through Aransas Pass, then 40 ft. through Corpus Christi Bay and Corpus Christi Harbour proper.

Bridges: A fixed span highway bridge with a vertical clearance of 138 ft. crosses the channel at the entrance to Corpus Christi Harbour. A lift highway and railroad bridge crosses Tule Lake Channel with a raised vertical clearance of 138 ft. This bridge is only passed by vessels proceeding to Oil Docks Nos. 8 and 9.

Anchorage: The only anchorage available is near the sea buoy, adjacent to the safety fairway, in 8 to 13 fathoms. Limits for this fairway anchorage are shown on the approach charts. There are no anchorages for deep-draft vessels anywhere inside the Aransas Pass jetties or Corpus Christi Bay and Harbour.

Berths: In addition to the numbered oil docks listed in the "Guide", all of which are operated by Nueces County Navigation District No. 1, there are several privately-owned berths. Among these are the Southwestern Oil and Refinery Co. Docks, and the Champlin Refining Co. Dock, all with 40 ft. reported alongside and the Mobil Oil Corp. Dock, with 36 ft. reported alongside. At Port Ingleside, the Sun Pipeline Co. has a dock with 40 ft. reported alongside, and at Harbour Island, immediately inside Aransas Pass, the American Petrofina Corp., and Humble Pipeline Co. each have a dock with 40 ft. reported alongside. Most of the berths in Corpus Christi are marginal wharves with breasting platforms and dolphins, and line-handling boats run lines to the dolphins. Most berths use 8 in. hoses, and only a few provide their own gangways. At many berths, facilities for receipt of dirty ballast or slops are extremely limited.

Repairs: Corpus Christi has no shipyards or drydocks. The nearest facilities for major repairs are at Galveston. However, several companies can make in-water repairs.

Harbour Master: Nueces County Navigation District No. 1, which exercise control over the port, operates a Harbour Master's Office which assigns berths. The Harbour Master maintains a continuous watch on VHF Channels 16 and 12, and can provide information as to berth availability and vessel movements, and also order tugs, Pilots, and line-handling boats and make all arrangements. Call sign is KKQ-769.

AUTHORITY: Nueces County Navigation District No. 1, Port of Corpus Christi.

DEER PARK, Texas: 29.44 N. 95.08 W.

Refer to "Houston".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

DESTREHAN, Louisiana: 29.56 N. 90.21 W.

East bank of Mississippi River about 135 miles from sea.

DOCUMENTS/PILOTAGE: For all general information refer to "New Orleans."

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: At least 1 tug required for mooring/unmooring.

BERTHING: St. Charles Elevator, berth 800 ft. length, 45 ft. depth. Loading rate, 70,000 bushels per hour; 2 loading belts. Bunge Grain Elevator, berth 600 ft. length, 41 ft. depth. Loading rate, 50,000 bushels per hour; 2 loading belts.

FRESH WATER: Available ex-berth.

FUEL: Not available. Barge not permitted alongside at Bunge Elevator.

DENSITY: Fresh (1000).

DETROIT, Michigan: 42.19 N. 83.05 W. (See Plan Book)

Refer to "St. Lawrence Seaway" for important general information.
PILOTAGE: Compulsory unless Master holds exemption "B" licence. 24 hours notice of arrival required by Agents who arrange Pilot.
ANCHORAGE: In depths from 29 ft. – 51 ft. in the Detroit River off the marine terminals and away from main channel.
RESTRICTIONS: St. Lawrence Seaway navigation season approximately from April 15th to December 15th. Controlling depth 27 ft. Minimum depth of 25 ft. in the Detroit River. The Amherstburg Channel has a depth of 27 ft. 6 in. for up bound traffic.
MAX. SIZE: Limited at Seaway Locks. 730 ft. length, 26 ft. draft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Chicago Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Available, not compulsory but recommended for some terminals.
BERTHING: See table below.
DENSITY: Fresh water.
MEDICAL: Doctors, hospital and all facilities available.
FRESH WATER: Available at most berths.
FUEL: All grades available, ex-wharf, or delivered by barge.

AUTHORITY: Detroit-Wayne County Port Commission.

BERTHING:

Terminal	Length of dock	Depth of water	Equipment
Detroit Marine Terminals, Inc. No. 2	2,325 ft.	27 ft. LWD	200-ton diesel mobile cranes Two 150-ton diesel mobile cranes One 45-ton diesel mobile crane One 50-ton diesel electric travelling gantry crane One 85-ton diesel electric travelling gantry crane One 15-ton diesel electric gantry crane Three 10-ton diesel locomotive cranes One 150-ton rail scale Three Straddle carriers with capacity to handle 20 ft. – 40 ft. containers
Detroit Marine Terminals, Inc. No. 1	1,400 ft.	27 ft. LWD	Four 140-ton caterpillar cranes One 50-ton gantry crane Two 40-ton railroad cranes One 25-ton gantry crane One 600 h.p. switch engine One rail scale, 212,000 lb. capacity One truck scale, 212,000 lb. capacity Six magnets Five clam buckets Twenty yard and warehouse lift trucks up to 56,000 lb. capacity
Nicholson Terminal & Dock Company	3,400 ft.	27 ft. LWD	Two cranes; 70-ton capacity at 40 ft. radius and 50-ton capacity at 60 ft. radius Four 12-ton gantry cranes Six 30-ton diesel locomotive cranes One 85-ton mobile crane One 200 ton crawler Two 1,000 h.p. diesel yard engines One 290 h.p. diesel yard engine One 150-ton railroad scale One 72 ft. combination rail and truck scale, 400,000 lb. Two 87-in. magnets Eleven 65-in. magnets Five 55-in. magnets Twelve buckets 1.5 yards to 7 yards capacity One fork lift truck, 40,000 lb. capacity One fork lift truck, 50,000 lb. capacity Twenty-five fork lift trucks, various capacities One 80,000 lb. capacity container handler Two 6.5 yard bucket front end loaders
Container Marine Terminal	600 ft.	27 ft. LWD	Four 110-ton mobile cranes.
Nicholson Terminal & Dock Co. Summit Street Dock	1,530 ft.	28 ft.	Two crawler cranes 200 ton capacity 12 Fork lift trucks 12,000 – 45,000 lb. capacity

DONALDSONVILLE, Louisiana: 30.05 N. 91.00 W. (See Plan Book)

SHIPMASTER'S REPORT: September 1980.

The report was compiled over 4 visits between August 1979 and August 1980.
APPROACHES: The coastline is low at the mouth of the river and consequently does not give a good radar return. The Racon on East jetty shows up between 12 to 17 miles. Fog and mist is a complication as it is very prevalent with the added problem of the oil rigs. These are located mainly on the East side of the safety fairway but in August 1980 construction was proceeding on a structure right on the Western boundary of the safety fairway about 4 miles S.W. of the East pier.

The sea buoy is difficult to locate, vessel should approach as per the leading line indicated.

A strong West flowing current across the entrance can be encountered.

Draft restriction varies throughout the year and should be ascertained in good time. August 1980 at 40 ft.(FW) but patches of 39 ft. 6 in. in places. (Mud, so no difficulty.)

Officially the Bar at the S.W. Pass is the limiting factor but in practice other areas of the river up to New Orleans are as much of draft restriction factor.

Above New Orleans to Baton Rouge a battle is being fought against silting up and a large dredging programme will have to be commenced soon otherwise the draft will be severely limited – still at 40 ft. officially.

A new road bridge about 15 miles above New Orleans is under construction called 'Ascension', clearance is likely to be 150 ft., the lowest on the river, at zero gauge or about 130 ft. at High River.
PILOTAGE: Pilot boards at Sea buoy from a fast cutter. Ladder/gangway arrangements 6 ft. from water, normal port gangway at S.W. Pass.

Change at Pilot Town about 1 hour 45 minutes above S.W. Pass and New Orleans about 6 hours above Pilot Town.

If at anchor and requiring a Pilot a minimum of 3 hours notice is required. Normally order Pilot through Agent. The Baton Rouge-New Orleans Pilots may only berth ships at Donaldsonville about 3 times per year.
ANCHORAGE:

Belle Chase	Mile post 75	1 hour below New Orleans
12 Mile Pt.	Mile post 81	30 minutes below New Orleans
Bonte Carre	Mile post 128	2 hours above New Orleans
Burnside	Mile post 169	4 hours above New Orleans

All anchorages are standing moor operations, if proceeding down river 2 tugs will be required to swing vessel into current, this is *essential* in High River season.

In all, the bank is steep and mud, as long as vessel lies quietly onto bank little damage can result. In fact this is preferable to hanging out in midstream and getting hit by passing barge strings and shipping.
VHF: Public correspondence as per ALRS. Moving upriver-Venice, New Orleans, Convent (New – Channel 25) and Baton Rouge. Just about in coverage all the way up from Pilot Town to berthing, all stations very busy in working hours.

Pilot ordered through Agent and on Channel 16.

USCG: Follow VTS booklet.

Boat service: At 12 Mile Point anchorage a launch service operates on Channel 20.
Pilots and Agent board by this service.

TUGS: Normally too low powered 'Watson' tugs of 1,200 h.p. (approximately). 1 forward (tug's line) and the other pushing.

'Crescent' tugs of around 2,000 h.p. are stationed at Burnside which are available if not handling larger vessels.

BERTHING: *Berth approach and depths:* This is the cause of most concern at Donaldsonville. The channel is at its narrowest off Triad Berth. (The downstream berth 0.5 miles below C.F. Industries at mile post 173.5), having a minimum depth of 30 ft. (Zero Gauge at Donaldsonville) over a width of 140 ft. and is steep too, falling to 20 ft. over 180 ft. in width.

Gauge reading can vary from about + 5 ft. after a dry Summer to + 14 ft. or more at the end of the Winter season when the snows to the North are melting.

There is a set onto the Triad Berth varying with the main current. Again as the river height, the current varies from 0.5 knots in late Summer to upwards of 5 knots or more in late Winter. Effect is increased by a Northerly wind.

Berth Approach: Head upriver on berthing, unberth stern first until clear of shoal, approximately when bow is 50 ft. downriver of lower Dolphin on Triad Berth, then swing with aid of tugs. Actual depth alongside (Zero Gauge) C.F.I. Berth = 44 ft. (minimum) Triad Berth = 41 ft. (minimum).

Guidelines for berthing as follows:

C.F.I. Berth: No berthing or unberthing at night. No vessels to be on Triad berthing or unberthing.

Triad Berth: Night movements dependent on wind, tug power, etc.

The question of taking bunkers thereby increasing the draft arises. If berthing at Triad only, can take before berthing. If also berthing at C.F.I. it is best left until clear of C.F.I. berth.

Berths: C.F.I. Berth: Reasonable condition. Short steel jetty with 2 dophins plus mooring buoy at either end, the nearest dolphins either side of the jetty are interconnected by a catwalk.

At 26 ft. the maindeck is level with dolphins so gangway must be turned in. B.O.T. type gangway by pilot ladder position to after dolphin. Port side alongside.

Berth also used for loading bulk fertilizer. Watch the bulk boom as it is left unsecured and can be fouled.

Triad: 0.5 miles downstream from C.F.I. (plants back onto each other).

Basically the same as C.F.I. but dolphins not connected to jetty. No mooring buoys, all dolphins, not as good condition as C.F.I. Bulk fertilizer also loaded. Port side alongside, "B.O.T." type gangway amidships.

Moorings: Basically 3, 2, 2, crossed after springs each berth. Mooring boat which moors forward first then aft. Lets go aft first – very handy as propeller is clear quickly. (See Plan) – have ready before arrival.

CARGO: Ammonia only at both berths plus bulk fertilizer. Labour on both berths assists in connecting up.

C.F.I.: Ships 12 in. to 8 in. reducer plus shore 150 – 300 ASA spool piece.

No vapour return line, no venting. Loading at 450 t.p.h. but depends on pumps available, normally two. Emergency stop for ship operation.

Triad: Ships 12 in. to 8 in. reducer. No VRL, no venting. Loading at 350 t.p.h. but again depends on available pumps. Shore tanks are set back further than C.F. Industries and line heating is apparent.

FRESH WATER: Not available at Triad berth. Available at C.F.I. Berth (Rate 1 t.p.h.). Barge from New Orleans cost about $1,500.

TELEPHONE: On both berths through the terminal operator. Local calls free, long distance calls collect.

GENERAL: Do not go ashore for draft readings as it involves going along river bank, plenty of snakes and alligators.

Donaldsonville Town nearby, about $5.00 in a taxi. Baton Rouge about 45 minutes away. The International Airport at New Orleans is about 1.5 hours away.

Stores: Lorries can back down jetty roadway to within a few feet of manifold area. A permit has to be obtained at both berths.

USCG: Usual pre-arrival hazardous ship reports to Coast Guard Captain, New Orleans.

Necessary to have a Coast Guard escort through New Orleans. Check must be made that the Pilot is advising the USCG of the vessel's position and that she requires an escort. Escort with blue flashing light (fast patrol launch) joins off Algies Point and goes through to Huey P. Long Bridge, and vice versa.

THE FOLLOWING REPORT (Dated November 1980) IS TO BE READ IN CONJUNCTION WITH THE REPORT ABOVE.

SW Pass: The West flowing current is very strong, about 5 knots across entrance and in region of Fairway Buoy. Steer well to the East.

9 Mile Anchorage: Boat charges $35.00 per boat, any number persons, 24 hour basis. Runs on hour every hour for shore leave purposes by arrangement. Call 'Port Ship Services Poydras' on Channel 20. Minibus to New Orleans at $5.00 per person can be arranged.

Tugs/Pilot: Minimum 2 hours notice, order through Agent.

VHF: Agent: On Channel 16 and 73, Tricon (Trammo Agent) on Channel 16 and 73. Chandler: Sarussen Marine, on Channel 16 and 9.

Films: Sea View Films: Best to cable direct as per Walport Instructions. Also change Vidpack. Change from launch if required when passing New Orleans.

Burnside Anchorage: Boat Charges: $20 per boat plus $5 per person. Call "Webber Marine" Burnside on Channel 16 and 18A.

Agents: Call Tricon Burnside on Channel 16 and 73 (Trammo Agents).

Donaldsonville: Depths – See latest chart, shoaling alongside CF Industries and off Triad.

Berthing/Leaving scraped alongside Triad berth, maximum 30 ft. off. Turn when one ship's length below "Triad" lower dolphin.

Three "Parish" tugs used in and out.

To line up manifold at C.F.I., pilot ladder gate should be in line with gangway on lower dolphin.

Water rate is 5 t.p.h. from fire hydrant stand pipe, not hose.

Water by barge from Baton Rouge at $4.00 per tonne. Minimum 100 tonnes plus $85.00 per hour for tug. Minimum 4 hours = $740.00.

No bunkers officially allowed alongside, but can probably take diesel at night.

Agents: Tricon in Burnside are now Trammo Agents.

DULUTH-SUPERIOR, Minnesota: 46.49 N. 92.09 W.

Refer to "St. Lawrence Seaway" for important general information.

PILOTAGE: U.S. or Canadian Pilot compulsory except when Master or officer specially qualified to navigate waters concerned. Pilots obtained from Upper Great Lakes Pilots Inc., 802 Garfield Avenue, Duluth. Duluth entry – Pilots picked up at point 2 miles due East of pierhead lights. Superior entry – pick up Pilot 2 miles N.N.E. of lighthouse. Advise Agents 24 hours in advance of ETA for scheduling Pilot, Customs, Immigration, and Agricultural Inspection. Masters should hold to the South of convergence of shipping lanes at the Duluth Entry and to North of this convergence at Superior Entry when approaching to embark a Pilot.

ANCHORAGES: Anchorage areas near Duluth and Superior entries are South and Eastward and North and Eastward respectively of main channel through harbour. Marked by anchorage buoys. Vessels must only anchor clear of channels at all times.

RESTRICTIONS: Because of varying conditions of wind and current, no restriction placed on speed passing through entry piers at either Duluth or Superior entry. Speed throughout harbour limited to 7 knots. Speed through bridges other than the Aerial Bridge at Duluth entry limited under normal conditions to 6 miles per hour. Because of current conditions at inner end of Duluth entry, both inbound and outbound vessels must leave vertical black/white striped mid-channel or traffic buoy on starboard hand. This gives outbound ships maximum straight run.

MAX. SIZE: Draft 26 ft. Duluth Harbour Entry: Duluth ship's canal, min. width 300 ft. Superior Entry: Min. width 500 ft. min. depth at inner end of 27 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Chicago Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Prior to entering harbour vessels must make "Security Call" on Channel 51 (2185 kc/s) from 10 to 20 minutes in advance advising intended movement. All vessels should monitor Channel 51 all times when under way to determine position and intent of other vessels moving in constricted areas within harbour and approaches.

TUGS: Available, not compulsory.

BRIDGES: Aerial Bridge spanning Duluth entry vertical clearance of 138 ft. Signal for opening bridge shall be given by vessels approaching from lakes, in all circumstances, when not less than 1 mile from bridge. A flashing amber light on harbour side of Aerial Bridge warns outbound vessel of approach of inbound vessel in lake.

BERTHING: *Clure Marine Terminal.* Also see "Developments".

Length of dock: 6,600 lineal ft., 9 ship berths, 5 for unloading/loading, 4 for fitting, cleaning, standby, etc. Water depth: 30 ft. 2×90-ton Clyde gantry cranes for container handling. 1×35-ton mobile crane.

13 grain loading berths.

Duluth Iron & Metal	– length of berth 1,586 ft.	– water depth 26 ft.
Great Lakes Storage & Contracting	– length of berth 1,059 ft.	– water depth 22 ft.
Hallet 3	– length of berth 2,080 ft.	– water depth 23 ft.
Hallet 5	– length of berth 2,373 ft.	– water depth 23 ft.
Hallet 6	– length of berth 2,060 ft.	– water depth 23 ft.
Northern Pacific No. 2	– length of berth 2,415 ft.	– water depth 22 ft.
Paper Calmenson-Duluth	– length of berth 853 ft.	– water depth 21 ft.
Paper Calmenson-Superior	– length of berth 700 ft.	– water depth 20 ft.

MEDICAL: All medical assistance available.

DENSITY: Fresh water.

FRESH WATER: Available at most docks in both ports.

FUEL: Available from dock or by barge.

FIRE PRECAUTIONS: No open fire permitted on deck of any vessel while in harbour. This restriction does not apply to a vessel at a shipyard which will be governed by this shipyard's local rules, nor to vessels in lay-up or fit-out status at ore docks.

Ocean vessels, upon docking, shall put on off-shore side of vessel, wire rope lines fore and aft as tow lines for use in pulling ship off dock face in case of fire. Such tow line shall be securely made fast to bitts with eye about 1 ft. above the water.

CERTIFICATES: Masters are required to present Safety Inspection Certificate of cargo handling equipment and gangways to stevedoring companies and other employers of harbour labour upon request.

IDENTIFICATION CARDS: Required by Immigration.

REPAIRS: All ship repairs can be effected.

DRY DOCKS: At Superior, one 831 ft. by 95 ft. and one 628 ft. by 76 ft.

SHORE LEAVE: Allowed.

DEVELOPMENTS: A grain terminal, meal-handling facility and coal-handling facility under construction.

A container terminal, together with all the back-up facilities located near the S.W. corner of Clure Terminal is now available. The container crane will be a Paceco Economy Portainer with a capacity of 30 tons, outreach 84 ft., back reach 22 ft. The Portainer will be equipped to handle 20 ft., 35 ft., and 40 ft. containers.

AUTHORITY: Seaway Port Authority of Duluth, Superior Board of Harbour Commissioners.

EL SEGUNDO, California: 33.54 N. 118.27 W.

SHIPMASTER'S REPORT:

LOCATION: The terminal Sea Buoy is located approximately 600 yards W.S.W of Berth No. 3 in 102 ft. of water at Latitude 33° 54′ 28″ N., Longitude 118° 27′ 29″ W. This lighted bell buoy is painted red with 6 in. high white letters reading, "2 ES". It exhibits a white flashing light every 4 seconds (flash 0.4 secs., eclipse 3.6 secs.). The lantern is 11 ft. above water.

In addition to the many tanks of the El Segundo Refinery, the chimneys of power plants adjacent to the Marine Terminal form prominent landmarks. Two 334 ft. chimneys painted with alternating red and white horizontal stripes mark the Los Angeles Department of Water and Power Scattergood Steam Plant located just North of the Terminal. Directly South of the Terminal is a set of 4 shorter chimneys at the Southern California Edison Co. Power Plant.

DOCUMENTS: Five copies each of the following documents are required for entry and clearance:

Crew List (I-418)

Crew's effects Declaration (1304)

Ship's Stores Declaration (1303)

Inward Foreign Manifest (7527-B: If vessel is to discharge at more than one port, each port, with its cargo, must be listed on a separate manifest).

MAX. SIZE:

Berth No.	*Maximum Draft (ft.)*	*Maximum Length (ft.)*	*Vessel Tonnage (d.w.t.)*	*Water Depth at MLW (ft.)*
1	28	550	Up to 30,000	38
2	42	650	Up to 50,000	50
3	51	1,000	Up to 150,000	63
4	56	1,000	Up to 150,000	65

RADIO: *Pre-arrival radio message to ship:*

The vessel's Agent will normally advise the vessel by radio of the following general information when the vessel is approximately 3 days out:

Mooring Master boards 2 miles S.W. sea buoy 33° 54.5′ N., 118° 27.5′ W.

Have starboard hose boom derrick rigged (if so equipped) and 7 good strong mooring lines ready – 2 forward, 2 midship, and 3 aft.

Radio Pratique requested; all items negative.

Sumatran Crude average cargo temperature must be 125°F on arrival.

Anchor in anchorage "A" or "B" as directed by message from shore.

Have pilot ladder rigged on starboard side.

Assure 125 p.s.i. pressure on riser during discharge.

Any customs, quarantine, etc., special information.

Advise if all cargo pumps are in good operating condition, and best average discharge rate.

Radio communication prior to arrival:

Estimated time of arrival (ETA) and requirements for services should be directed to the ship's Agent. ETA's should be sent 7 days, and continued 3 days and 24 hours, prior to arrival.

Within 2 hours of arrival, communications may be established with the mooring launch via VHF radio Channels 16, 6 and 10.

Radio and telephone ship to shore communications:

UHF Radio. The Mooring Master is equipped with a UHF radio for direct communications with the Terminal Control room at all times from the start of mooring until the vessel has cleared the mooring on departure.

BERTHING: It is expected that the vessel will provide berthing and messing facilities for the 3-man launch crew as well as for the Mooring Master.

Mooring Gear: Each anchor shall be equipped with no less than 10 shots of chain. Vessels over 50,000 d.w.t. shall have at least 12 shots on each anchor. Wires on mooring winches should be at least 1,000 ft. (preferably 1,200 ft.) and should be 1.25 in. to 1.625 in. in diameter, depending upon the size of the vessel. Constant tension winches must be braked by means of manual brake.

Synthetic fibre lines of dacron or polypropylene must be at least 9 ins. in circumference and 120 fathoms in length.

NOTE: Nylon lines are not acceptable.

Mooring lines should be located as follows:

1. At least three lines on the forecastle head
2. At least three lines on the main deck aft
3. At least four lines on the poop deck.

If vessel over 100,000 d.w.t. fittings must permit doubling of all lines. Each synthetic line requires a separate bitt.

Mooring facilities: Berth No. 1 is a 6-point mooring and is used for transfer of refined stock, primarily lube oils and chemical. The unlighted spare buoys mark the offshore end of the pipe-lines, which carry the telephone line, and is located approximately 1 mile East of the sea buoy and 1,100 yards offshore. There are also 3 hose marker buoys, one for the end of the chemical hose string and one for the end of each lube oil strings. The chemical hose string consists of seven 8 in. diameter × 25 ft. lengths. The lube oil strings are a parallel set of seven 8 in. diameter × 25 ft. lengths which are connected at the ship-end by a piping manifold which the ship provides.

Berth No. 2 is a 6-point mooring and is used for transfer, of light oils (primarily gasoline and jet fuel). It is located approximately 700 yards N.W. of Berth No. 1 and 1,600 yards offshore.

Berth No. 3 is a 7-point mooring used for the transfer of fuel and crude products. It is located approximately 750 yards West of Berth No. 2, and 2,400 yards offshore.

Berths Nos. 2 and 3 are each equipped with 2 unlighted spar buoys and a can buoy. The spar buoy closer to land is the pipe-line spar to which is fixed a land-line telephone cable providing communication between the vessel's deck to the land. The seaward spar buoy marks the location of the offshore end of the submarine hose when the hose is on the bottom. A can buoy, or hose marker buoy, is connected to the end of the submarine hose by a chain. The submarine hose string in Berth No. 2 consists of nine 12 in. diameter×25 ft. lengths of which one is over-the-rail, connected to the seaward end of a 16 in. submarine pipe-line leading to the shore facility. The submarine hose string in Berth No. 3 is connected to the seaward end of a 26 in. submarine pipe-line and a 12 in. line for circulation, by seven 16 in. diameter × 25 ft. lengths of hose followed by one 12 in.×25 ft. length hose and one 12 in. diameter × 30 ft. long over-the-rail hose.

Berth No. 4 is equipped with 2 unlighted spar buoys and 2 unlighted can buoys. The inshore spar buoy marks the end of the 36 in. submarine line and 14 in. circulation line. One hose string comes off the main 36 in. submarine line. The hose string consists of 5×35 ft. long lengths of 20 in. hose, followed by a reducer and then 2×25 ft. long lengths and 1×30 ft. long over-the-rail length of 16 in. hose. The end of the hose string is connected to a can buoy by a chain. Berth No. 4 is equipped with cable phone service but also relies on radio-telephone on occasions.

Hose Handling: The vessel will be expected to have suitable equipment on deck and ready for making the connection to the submarine hose.

Berths No. 1 and 2 require lifting capacity of at least 5 long tons.

Berth No. 3 requires a lifting capacity of at least 7 long tons for vessels up to 30,000 d.w.t. and at least 8 long tons for vessels over 30,000 d.w.t.

Berth No. 4 requires a lifting capacity (calculated load) of 10 long tons.

Procedure for discharging; At the completion of most cargo discharges the vessel will be required to receive a 150 bbl. hose wash displacement of cutter stock or gas oil. This is to prevent the hose from plugging while not in use.

Product transfer rates, Pressure and temperature: Lubricants and chemicals are transferred at Berth No. 1 at varying rates depending on the particular product, the maximum rate being approximately 2,100 bbls.p.h. Hoses are rated to 275 p.s.i.

Gasoline and jet fuel loaded at Berth No. 2 are usually transferred at 7,000–12,000 bbls.p.h. with a pressure at the ship's rail not to exceed 50 p.s.i. Gasoline and jet fuel are discharged at Berth No. 2 with a pressure not to exceed 125 p.s.i. at the ship's rail. Hoses are rated to 150 p.s.i.

Fuels and crude are loaded at Berth No. 3 at rates to 20,000 bbls.p.h. No. 3 Berth hoses are heavy duty 275 p.s.i. rated. Vessels are expected to maintain discharge pressure of at least 125 p.s.i. at the ship's rail and/or a flow rate of 20,000–25,000 bbls.p.h.

No. 4 Berth hoses are heavy duty 275 p.s.i. rated, and the system has a normal working pressure of 180 p.s.i. On this 2 hose system, vessels are expected to maintain flow rates of 25,000–40,000 bbls.p.h. Because of high velocity hose damage, the maximum flow through a single 16 in. hose will be limited to 40,000 bbls.p.h.

Sumatran crude cargo will not be accepted by the facility unless the ship's average tank temperature is at least 125°F. However, the average temperature for Sumatran crude should not exceed 130°F. in order to avoid excessive vaporization of the light fractions in the crude. Heavy viscous residue fuel cargo will not be accepted from a ship unless the ship's average tank temperature is at least 130°F.

MEDICAL: Several hospitals are available in the area. US Coast Guard or local ambulance service may be expected to know what hospital is best suited to handle a particular emergency.

FRESH WATER: Potable water is not available at this mooring. Water barge service is not available in the area. Closest supply is the harbour at San Pedro.

FUEL: Bunker fuel for ship's use is not available in the moorings of the El Segundo Marine Terminal, but may be arranged through Chevron Shipping, San Pedro.

BALLAST: No ballast can be accommodated at the Terminal.

CONSULS: Consulates of most of the maritime Nations are maintained in both the cities of Los Angeles and Long Beach.

AIRPORT: The Terminal is located approximately two miles South of Los Angeles International Airport.

TIME: Standard Time along the entire West Coast of the United States is GMT – 8 hours. Daylight Saving Time is used all along the coast. Clocks are advanced 1 hour in Summer.

WINDS/TIDES/CURRENTS: *Winds:* Westerly, onshore winds usually prevail. Gales are very rare in Santa Monica Bay, but the local thermal winds blowing from a Northerly direction sometimes necessitate interruption of transfer operations and require moving a ship from the mooring to anchor.

Northerly winds occur during the period from October through May.

In the Autumn and Spring, duration averages 4 to 6 hours

In November, December and January, duration averages 10 hours.

Velocities up to 52 knots have been recorded.

Tides and currents: Normal tides of approximately 6 ft. pose no significant problems in this open roadstead.

Currents run unpredictably North or South along the coast in the vicinity of the Terminal. The current is most commonly from North to South and is stronger in Summer than in Winter.

TELEPHONE: Each berth is equipped with telephone service. For all berths cable connects direct to the refinery system and then terminates at the inshore spar buoy at each of the respective moorings. In the case of berth No. 4 it is sometimes by radio-telephone which goes directly into the refinery PBX system. The telephone instrument is delivered to the ship by the mooring launch at the same time as the hose connecting equipment is delivered.

To call El Segundo Terminal, dial 2233.

To call local outside numbers within the Los Angeles area, dial 9 followed by the 7-digit number.

To call long distance, dial 0 between 0700 hrs. and 1800 hrs. or dial 2505 between 1730 hrs. and 0630 hrs.

The vessel may be reached from outside by calling the El Segundo Refinery at (213) 322–3450 and requesting extension 2831, 2832, 2834, or 2888 for Berths 1, 2, 3 or 4 respectively.

GENERAL: *Supplies:* Modest quantities of supplies may be taken aboard while at the moorings if absolutely necessary, provided the Mooring Master gives prior approval. This practice is discouraged in view of the sea swell and wind conditions that can develop in the open roadstead of the moorings, as well as the long distances to normal marine supply facilities.
Launch service: A company operated launch may be chartered for vessel's use through the vessel's Agent at the option of the owner's representative. This launch operates between the moorings and the Port-O-Fino Dock in King Harbour, Redondo Beach, on a published 4 hours schedule which may be obtained from the Mooring Master. A one-way trip takes approximately 40 minutes. There is a waiting room for use by all tanker personnel awaiting the launch. The waiting room is in the second building facing the yacht moorings. Blue arrows are painted on the side walk between this waiting room and the launch ramp, to assist in identifying the waiting room.
Pilot Ladder: The vessel shall rig a safe and secure Pilot ladder for the Mooring Master and Government officials to use in boarding and leaving the vessel.
Air Pollution: Any vessel showing visible smoke in excess of 3 minutes is in violation and may expect to be cited and required to pay substantial fines.
Dumping of garbage: Dumping of rubbish or garbage overboard within 50 miles of the coastline is prohibited.

ERIE, Pennsylvania: 42.10 N. 80.05 W. (See Plan Book)

Refer to "St. Lawrence Seaway" for important general information.
PILOTAGE: Not compulsory. Seaway Pilots will assist if required.
RESTRICTIONS: Navigation season from 14th April to 26th December approx. The port is connected to Lake Erie by an entrance channel, depth 28 ft. Vessels size restricted by Seaway locks.
MAX. SIZE: 730 ft. length; 26 ft. draft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Quarantine Station. Quarantine procedure undertaken at Quebec City for incoming vessels from foreign ports.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Master must give at least 24 hours notice to Commander 9th Coast Guard District, Cleveland, Ohio, of the vessel's ETA at Snell Lock. Also, at least 24 hours notice of ETA at first U.S. discharge port is required.
TUGS: Available. Not compulsory, but sometimes necessary in bad weather.
BERTHING:

City of Erie Grain Elevator: Owned by the Port Authority, leased by the Port Authority, berthing length 980 ft., depth of water alongside 24 ft., 2.5 million bushel capacity.

Erie Marine Inc. (subsidiary of Litton): New ship assembly yard with graving dock (largest on Great Lakes), available for dry dock repairs.

Ore Dock: 1,000 ft. long, 26 – 27 ft. of water alongside. The ore dock has 400,000 ton storage pad available for lease.

Port Authority East Bay Industrial Site: 75 acres available for sale or lease.

Erie International Marine Terminal: Leased to Codan Corporation, stevedores for the Port of Erie; 1,400 ft. long, with 28 ft. of water. Terminal used for bulk and general cargo; 23 acres; 750,000 sq. ft. of warehousing and transit sheds with truck and rail loading facilities; 200, 140 and 125 ton mobile cranes equipped with magnets, buckets and gear for heavy lifts, also 300 ton stiff leg crane. Terminal served by ConRail with reciprocal switching for N&W and B&LE railroads. A total of more than 100 acres of waterfront property is available where an industrial complex may be constructed.
DENSITY: Fresh water.
MEDICAL: All facilities available.
FRESH WATER: Obtainable by pipe-line at all docks.
FUEL: All grades available by pipe-line at all docks.
REPAIRS: Local shipbuilding company can handle most repairs. Dry dock available.
AUTHORITY: Erie-Western Pennsylvania Port Authority.

EUREKA, California: 40.48 N. 124.10 W. (See Plan Book)

DOCUMENTS: In addition to the documents detailed below, Agent will present to Master normal Customs forms to be signed, such as Master's Oath, Permit to Lade, Inward & Outward Manifest, etc. These forms will be filled out by local Agent and Customs Broker and presented to local Customs house when entering and clearing vessel:
Foreign Flag Vessels: I. Entering from another U.S. port:

- 3 Crew Lists.
- 3 Passenger Lists (only if passengers on board).
- 3 Curio Lists.
- 3 Store Lists.
- Permit to Proceed (issued at last U.S. port).
- Travelling Manifest (only if there is foreign cargo on board).
- Ship's Register.

II. Entering from a foreign port:

- 3 Crew Lists.
- 3 Passenger Lists (only if passengers are on board).
- 3 Curio Lists.
- 3 Store Lists.
- Travelling Manifest.
- Permit to Proceed.
- Ship's Register.
- Ship's tonnage tax Certificate.
- Clearance from a foreign port.

PILOTAGE: Telegraphic address of Pilot station "Humbar". 24 hours advance notice of ETA; in case of change in ETA give minimum 4 hour notice. Contact pilot boat on VHF 156.8 (Channel 16) or radio watch on 2182. Radio watch is maintained 2 hours prior to arrival at sea buoy on Channel 16. Working Channels are 6, 13 and 18A.

No Pilot boat on station. Local Pilots use tug "Thor" length 65 ft. 800 h.p. Tug colours: black funnel, red and white superstructure and black hull. As no Pilot boat on station, sound signals not required. Visual international flag and light signals observed. Pilot will board vessel within 1 mile radius North, South and West of sea buoy. Sea-buoy located 1.4 miles from end of North jetty lined up with range lights bearing 105 degrees true.

Specific requirements: *(a)* Pilot ladder with spreaders in accordance with Solas regulations, and 9 ft. above water. *(b)* At night – brilliant light to illuminate ladder. *(c)* Recommended anchorage outside Humboldt Bay located 1 mile South of sea-buoy in 15 fathoms of water.
ANCHORAGES: Inside harbour, weather permitting. Light draft vessel (22 ft. or less) South of Fairhaven Dock (Crown Simpson) and West of Standard Oil Dock. Deep draft vessels (22 ft. to 32 ft.) will anchor North of Union Oil Terminal and South of Samoa Channel entrance buoys.
RESTRICTIONS: Humboldt Bay is a 24 hour port; restrictions if any would depend upon manoeuvrability and horsepower of vessel during peak tide. Range of tide normally 8 ft. extreme cases 10 ft.
MAX. SIZE: Max. LOA 740 ft. max. beam 115 ft. Max. draft 35 ft.
HEALTH: See "Health: All ports" before first U.S.A. port (Albany). Illness reports made to Chicago Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Send cables through one of the following stations:

ITT World Communications, Inc. – San Francisco Marine Radio Station KFS.

RCA Global Communications – San Francisco Marine Radio Station KPH.
TUGS: 3×800 h.p. tugs available, 1 tug acts as pilot boat, other tug joins vessel when in harbour. Tug lines are normally used, occasionally a ship's line is used. No extra charge assessed for use of tug's line. Depending upon size of vessel and weather conditions, Pilots will use 1 or 2 tugs.
BERTHING: No specific requirements relating to berthing; normal procedures prevail. Vessel normally docks stemming the tide.

Berths presently available at Eureka as follows:

- Crown-Simpson Pulp Co.
- Eureka Forest Products
- Louisiana-Pacific Corporation.
- Humboldt Dock & Shipping Co.
- Kramer Lumber Sales
- Olson Terminal
- Standard Oil of California
- Union Oil of California
- North Coast Exporting Co.

Harbour channels maintained to 35 ft. zero tide. Most of berths at above-mentioned docks also maintained at 35 ft. zero tide; however, some occasionally fill in and recommended check with Agent as to depth available at specific dock which vessel intends moor and load.
STEVEDORES: 8 local gangs available. Groups ordered at 0630 hrs. in the morning for both day and night gangs. Therefore essential that local Agent or stevedore company receives accurate ETA by 0600 hrs. in the morning. Normally, vessel will advise arrival sea-buoy with a 24-hour ETA and correct ETA at a later time if necessary. The basic commodities exported from Eureka are woodpulp, logs and lumber.

Westfall Stevedore Co. Cable Address: Westfall, Eureka. Tel. (707) 443-5688.
MEDICAL: Not necessary for Agent to receive advance notice of required medical attention unless ambulance and doctor are required on arrival. 3 hospitals in immediate area. Inoculation and vaccination certificates should be up-dated.
TANKERS: 2 tanker berths available: Standard Oil of California – deepest draft 35 ft. at zero tide. Union Oil – deepest draft 35 ft. at zero tide. Normally only Company tankers use own facilities. Facilities privately owned and are not available for bunkering other vessels.
DENSITY: Pure salt water. No fresh water allowance on any tide.
FRESH WATER: Available all berths. Delivery by hose. Rate of delivery: 10 t.p.h.
FUEL: If bunkers required, Agent must go through major contractors, who in turn will inform their local supplier of requirements. Generally speaking bunkers are only supplied to vessels on an emergency basis in limited quantities. The bunkers usually diesel grade and delivered by truck on a prearranged schedule.
GANGWAY/DECK WATCHMEN: Services of gangway guards available if required by ship.
OPENING/CLOSING HATCHES: Normally stevedores' work unless done prior to docking. Vessel's crew may assist in opening and closing hatches, if hatches require special attention.
CERTIFICATES:

- Ship's register.
- Load-line Certificate.
- *valid* Derat Certificate.
- Cargo Gear Certificate.
- Tonnage Tax Certificate and all other usual certificates required.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes and 1 lb. of tobacco. Wine and/or Spirit, 1 bottle (approx. 1 quart).
CARGO GEAR: Must be in good order and safe operating condition and all cargo gear certificates must be valid.
IDENTIFICATION CARDS: Alien seamen require Crewman Landing Pass (U.S. Form I-95).
CONSULS: None. Nearest consuls at San Francisco.
REPAIRS: Small welding jobs, and minor machine work only. Major repairs normally carried out in San Francisco.
DRY DOCKS: None.

REPATRIATION: Normally done in conjunction with San Francisco, Portland, Los Angeles or Seattle Agent.
AIRPORT: Airport located approximately 20 miles North of Eureka. Limousine service available. Major airline, Air West. At present 3 flights per day to San Francisco and 1 flight per day to Portland.
TIME: Eureka local time is Pacific Standard Time and is GMT minus 8 hours. However, from the last Sunday in April to the last Sunday in October, Eureka is on Daylight Saving Time.
HOLIDAYS: No work performed on following holidays: New Year's Day (January 1st); Thanksgiving Day; Christmas Day (December 25th).
POLICE/AMBULANCE/FIRE: Eureka City Police 442-4545; Eureka City Ambulance 442-4551; Eureka Fire Department 443-5656; Humboldt County Sheriff Department 443-5671; Arcata Fire District 822-2424; Humboldt Fire District No. 1 442-1212.
TELEPHONES: No arrangements for placing telephones on board; however, there are pay phones nearby at each dock as well as phones in nearby offices.
SERVICES: Specific services such as tank cleaning, compass adjusting, tank washing,etc., are not normally performed in the port of Eureka and are usually performed in one of the close major ports such as San Francisco; however, there are facilities available for minor repair.
SHORE LEAVE: Crew members allowed ashore unless restricted for Customs or Immigration reasons.
DELAYS: Berthing delays seldom incurred primarily due to the fact that the prime Agents are always in contact with the local Agent at Eureka informing them of vessel's ETA and prime Agent is always advised with regard to all arrivals and possible berth conflicts at this port.
DEVELOPMENTS: Deepen North Bay Channel to 35 ft. and widen bends in channel at channel miles 0.74 and 2.6. Deepen Samoa Channel and outer reach of the Eureka channel to 35 ft. Provide an anchorage area in North Bay, at a suitable location between jettied entrance channel and Gunther Island, 35 ft. deep, 1,200 ft. wide and 1,200 ft. long. (The developments were completed 1978).
AUTHORITY: State of California, Board of Harbor Commissioners for Humboldt Bay.
AGENT: See "San Francisco".

EVERETT, Washington: 47.59 N. 122.13 W.

(See Plan Book)

DOCUMENTS, PILOTAGE, etc.: Refer to "Tacoma".
PILOTAGE: Pilot boards off Port Angeles Pilot Station.
ANCHORAGE: Unlimited deep water anchorage in Possession Sound.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Available, join vessel off berth. 17 tugs, 150 to 900 h.p.
BERTHING:

Pier No. 1 South: Usable berth length 520 ft.; Approach water depth 90 ft.; Water depth at pier 35 ft. MLLW; Plank and piling; 20 ft. Apron; Transit shed with 57,960 sq. ft. on pier; Access by road, barge and rail.

Pier No. 1 North: Usable berth length 600 ft.; Approach water depth 90 ft.; Water depth at pier 40 ft. MLLW; Multi-purpose 35-ton bridge crane (Containers – convertible for bulk cargo handling); Rail spur on dock; Plank and piling; 40 ft. Apron; Transit shed with 36,000 sq. ft. adjacent to pier; Access by road, barge and rail.

Pier "B": Usable length 450 ft.; Approach water depth 32 ft.; Water depth at pier 40 ft.; Plank and piling; 50 ft. Apron; Access by road and barge.

Pier "D": Usable length 500 ft.; Approach Water depth 32 ft.; Water depth at pier 40 ft.; Two 35-ton Whirley cranes; Plank and piling construction; 45 ft. Apron; Access by road and barge.

Pier "E": Usable length 450 ft.; Approach water depth 32 ft.; Water depth at pier 40 ft.; Plank and piling construction; 45 ft. Apron; Access by road and barge.

Norton Terminal: Usable length 703 ft.; Approach water depth 90 ft. Channel and berth depth 37 ft. 20 acres terminal (max. terminal development – 80 acres). Container cranes in 1981. 36,000 sq. ft. warehouse. Rail spur on terminal.

STEVEDORES: 11 local gangs, additional gangs may be imported if required.
HOLIDAYS: See "Tacoma".
MEDICAL: Doctors and local hospital available.
DENSITY: Changes daily as port is at the mouth of a fresh water river.
FRESH WATER: Available at wharves.
FUEL: Available by barge from Seattle.
GANGWAY/DECK WATCHMEN: Required only if detainees aboard.
CUSTOMS ALLOWANCE: No definite quantities prescribed; reasonable allowance at discretion of Customs Inspector.
AIRPORT: Seattle – Tacoma International Airport is 45 miles South of city of Everett on excellent highway. Driving time is approx. 45 minutes.
POLICE/AMBULANCE/FIRE: Port of Everett Security: 259 – 3164; Everett City Police: 259 – 8711; Everett City Fire Dept.: 252 – 1111; Ambulance Service: 252 – 1234.
TELEPHONES: Will be placed on board vessel on request. Charges are made only for calls made. Arrangements should be made through ships Agent.
SHORE LEAVE: Crew members are able to visit Everett at all times.
AUTHORITY: Port of Everett.
AGENT: See "Seattle".

FALL RIVER, Mass.: 41.42 N. 71.10 W.

DOCUMENTS: If first port of call in U.S., 2 complete Custom's Manifests describing all cargo on board and ports of discharge. Also 1 Cargo List for Fall River cargo; 3 Crew's Lists; 3 Stores Lists; 3 Curios Lists; the Ship's Register, Load-line Certificate and Tonnage Tax Certificate.
PILOTAGE: Vessel first contact ship's Agent for Pilot and tug arrangements. R.I. State Pilots Association radio call letters KDF-375 on frequency 156.9 kc/s., Channel 18. Usual Pilot pick-up is at Brenton Reef Light Tower off Newport, R.I.
RADIO: Chatham Radio or Amagansett Radio.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Boston Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Tugs for N.E. Power Station met at Buoy 6; all other berths North, meet tugs at Buoy 10. Tugs provide own lines at no extra charge.

Providence Steamboat Company serving Ports of Providence, Narragansett Bay, Fall River and New England Electric at Brayton Point.

Four tug boats – 24 hour dispatching service. 2×3,000 h.p. boats.

BERTHING: *State Pier:* Principal maritime cargo terminal at State Pier. Berth 600 ft. long with depth of 35 ft. MLW alongside.

New Ro-Ro facility 80 ft.-wide beam by 42 ft.-inboard depth completed in 1979. (8° incline at water's edge – concrete deck on wood piling).

All utility services available. Further information telephone 617-674-5707 or ship Agents.

BRIDGES: All bridges have 135-ft. clearance with exception of Brightman Steel Bridge at approach to Montaup Electric Co. and Shell Oil docks. This bridge has a draw clearance of 97.5 ft. and passage allowed for vessels with less than 75 ft. beam. No unusual requirements. Practice is to depart on flood tide. (See "Developments".)
TANKERS: Berth at Shell Oil Docks, Depth alongside 35 ft.
FRESH WATER: Available at most berths. State Pier delivery is at 125-pounds pressure.
OPENING/CLOSING HATCHES: Usually performed by stevedores.
CERTIFICATES: All certification of vessel, safety conditions and radio facilities should be available for U.S. Coast Guard.
CARGO GEAR: No additional safety requirements.
TELEPHONES: Available at most berths. Contact Agents.
IDENTIFICATION CARDS: Standard U.S. Immigration Forms I.95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I.95. issued for the same vessel.
TIME: Eastern Standard Time, GMT minus 5 hours. Daylight Saving Time, GMT minus 4 hours from April to October.
HOLIDAYS: New Year's Day (January 1st): Washington's Birthday (February 22nd); Patriots' Day (April 19th); Memorial Day (May 30th); Independence Day (July 4th); Labour Day (1st Monday in September); Columbus Day (October 12th); Veterans' Day (November 11th); Thanksgiving Day (last Thursday in November); Christmas Day (December 25th); or any day celebrated in lieu thereof.
SHORE LEAVE: Permitted, but consult Agents.
DEVELOPMENTS: Plans for construction of a new 300-ft. wide draw bridge to replace the existing Brightman Street Bridge. This will mean unobstructed use of the entire port area.
AUTHORITY: Fall River Port Authority.

FERNDALE, Washington: 48.49 N. 122.43 W.

Mobil Oil Tanker Terminal
DOCUMENTS/HEALTH/etc.: Refer to "Seattle".
PILOTAGE: Compulsory. Pilot boards at Port Angeles.
TUGS: Tug escort required if vessel is loaded and is larger than 40,000 d.w.t. Tug horsepower must be 5% of d.w.t. Available up to 3,000 h.p. Additional tugs ordered from Seattle if required.
RESTRICTIONS: Vessels enter any hour day or night.
MAX. SIZE: Length 1,000 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
BERTHING: Terminal used for crude and product discharging. Vessels berth alongside finger pier, lines to quick release hooks. Inner berth for barges only. Outer berth 900 ft. long, depth alongside 40 ft. at MLW. Dirty ballast water 3,000 long tons with prior notification.
AGENT: See "Seattle".

FORT PIERCE, Florida 27.27 N., 80.19 W.

SHIPMASTER'S REPORT: January 1979.

PILOTAGE: Compulsory. Pilot boards at sea buoy. Send vessel's ETA to Agents 72 hours, 48 hours and 24 hours prior to arrival. (The Master undertook berthing operations).
ANCHORAGE: Vessel anchors and awaits Pilot 0.5 mile seaward of sea buoy.
RESTRICTIONS: Vessel is able to berth and unberth during hours of darkness if the weather is clear. The leading lights are good but the channel is narrow and marked by unlit buoys. This vessel being the largest vessel to berth waited for daylight to turn and sail. Diameter of turning basin 1,000 ft. Least depth of water in the channel from sea to berth 26 ft. (dredging in progress).
MAX. SIZE: Max. draft 25 ft. (1 ft. keel clearance in the turning basin required). Range of tide 1 ft. 3 in.
TUGS: One 500 h.p. tug available. Not advisable to manoeuvre without use of tug.
RADIO: Lantana Radio.
VHF: Channels 16 and 13. Watch only maintained when vessel expected.

BERTHING: The berth is located in Fort Pierce inlet. Length of jetty 411 ft. At present only 1 berth available on the North side of the jetty. Dredging is under way on the South side. Distance from entrance to berth 3 miles.

This vessel overhung the jetty by 100 ft., all moorings were placed on the jetty and vessel lay quietly alongside. However, with a South-easterly wind it may be difficult to keep the after end of the vessel alongside. Vessels are able to dock and undock at any stage of the tide, however, if vessel's draft is over 24 ft. suggest vessel waits for high water.

CARGO HANDLING FACILITIES: There are no facilities for bulk cargoes. No quay cranes and no Ro/Ro facilities. There is sufficient mechanical equipment for handling palletised cargoes. There is no equipment or storage space for containers. An insulated storage shed is presently being built at the jetty.

FRESH WATER: Available.

FUEL: Not available in the port but could be supplied by barge from Fort Lauderdale.

MEDICAL: Doctor and hospital available.

AIRPORT: Local airport 15 miles from port, nearest international airport is at Miami.

SERVICES: Fresh provisions, laundry services, groceries and meats available.

REPAIRS: No facilities available.

GENERAL: Fort Pierce harbour is at present in the early stage of development. For many years the port has been used only for barge traffic and small craft and the inlet allowed to silt up. Over the last year a company, DNE Sales International, headed by Mr. Eagan has bought the jetty and the adjacent land for the initial purpose of exporting Florida citrus, many local plantations of which are owned by Mr. Eagan.

The jetty has been completely rebuilt, and is 411 ft. long, of solid construction with good fendering. An insulated holding shed is in the process of being built which should be completed shortly. Only the North side of the jetty has been dredged, the South side being dredged at the present.

The Stevedoring company packing sheds are all owned by DNE Sales International who also plan entrance into ship chandlery.

At present depths in the turning basin which is approximately 1,000 ft. are no more than 26 ft. and the basin is not marked at its extremities so care should be taken to swing as near as possible on the leading lights. Alongside the wharf depths are 27 ft. with soft sand bottom and in the channel the least depth is 26 ft. but there are no official surveys yet in print. The latest information on U.S. chart 11475 gives depths of 25.7 ft. in entrance range and 20.5 ft. to 22.3 ft. for Inner range, latest information in British Notices to Mariners gives 20 ft. depth, however prior to arrival I received by telex from the Agents advice that least depth was 26 ft. which was confirmed by Pilot and our echo sounder.

The buoys marking the edge of channel are unlit, although U.S. chart shows lighted buoys. When I enquired via Agents from U.S. Coastguards they *stated* they would report same and agreed with me that on a dark night they were a hazard for a large vessel, but would not commit themselves.

The tug is very low-powered but is necessary to swing the vessel, we also used the pilot launch to assist. With little water under the ship the vessel was very slow when turning, in strong winds this manoeuvre could be difficult.

One is aware that it is early days for this port, dredging is in progress and if all the projected improvements are carried through, including the deepening of the channel Fort Pierce will be a safe and efficient port. The controlling factor for "fruit vessels" is the length of the jetty, however if exports increase as anticipated there is a proposal to lengthen the jetty by 100 ft.

The vessel entered Fort Pierce at 0615 hrs., transitting the channel in semi-daylight. For departure the Master considered the same daylight conditions essential for safety reasons having assessed the weather and all other factors as stated.

Stevedores are good but at present lack expertise of citrus loading.

All Agency and stevedoring personnel are keen, helpful and anxious to co-operate fully to promote good relations.

FREEPORT, Texas: 28.57 N. 95.21 W. (See Plan Book)

DOCUMENTS: Handled at Freeport.

PILOTAGE: VHF Channels 6, 8, 12, 13, 14, 16 – at sea buoy – Pilot Office (tel. 233-1120) – 200 West 2nd, Freeport, Texas; – Pilot boards 0.25 mile North of sea buoy. Anchor 1 mile from end of sea buoy if awaiting Pilot.

ANCHORAGES: 1 to 2 miles from end of sea buoy.

RESTRICTIONS: Depth 36 ft. at bar.

MAX. SIZE: Length 670 ft., draft 36 ft. for ships from bar to within upper turning basin, 30 ft. from upper turning basin to Public Facilities. Tide governing these dimensions – plus or minus 3 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Galveston Marine Operator.

TUGS: Join vessel at shore line. Tug's lines to be used, and no charge for use.

BERTHING: 1 hour to reach berth. Deep water terminals at Public Facilities consist of 1,250 linear ft. of deep water bulkhead wharf with 2 modern transit sheds each 400 ft. long, 150 ft. wide, and 1 berth of 250 linear ft. of deep water bulkhead wharf with transit shed of 204 ft. long and 180 ft. wide. In addition a back-up warehouse is available consisting of 60,000 sq. ft. The 2 large transit sheds and back-up warehouse have railroad tracks under cover, permitting all-weather work and preventing cargo damage.

The Navigation District owns a total of 1,106 acres of land for future Port and industrial development, 2,400 ft. of this land is situated on the Brazos River.

CRANES: Vessel is required to use own gear, shore-cranes are available in area for hire.

STEVEDORES: Obtained through Agent.

MEDICAL: Obtained through Agent and advance notice required. Doctors, hospital available.

DENSITY: 1020.

FRESH WATER: Available ex wharf at Brazos Harbor.

FUEL: All grades available by barge from Houston.

GANGWAY/DECK WATCHMEN: None required but available through Agent.

OPENING/CLOSING HATCHES: Stevedore contract.

CUSTOMS ALLOWANCE: Local Customs Agent control.

IDENTIFICATION CARDS: None needed.

CONSULS: None. Nearest at Port Arthur or Houston.

REPAIRS: Available.

DRY DOCKS: None.

REPATRIATION: Possible, through Agent.

AIRPORT: Houston Intercontinental Airport – Houston, Texas (80 road miles to Brazos Harbor; Metro Airlines – Shuttle to Lake Jackson, Texas (8 miles from Brazos Harbor).

TIME: GMT minus 6 hours. Daylight saving time starts last Sunday in April and ends the last Sunday in October – GMT minus 5 hours.

HOLIDAYS: New Year's Day (January 1st); Martin Luther King's Birthday (January 15th); Lincoln's Birthday (February 12th); Washington's Birthday (Third Monday in February); Good Friday; Texas Independence Day (March 2nd); St. Patrick's Day (March 17th); Decoration Day (Last Monday in May); Emancipation Day (June 19th); Independence Day (July 4th); Labour Day (First Monday in September); Columbus Day (Second Monday in October); Veteran's Day (Fourth Monday in October); Thanksgiving Day (Fourth Thursday in November); Christmas Day (December 25th). No work on Christmas Day or Labour Day.

If any of the above holidays fall on Saturday or Sunday the following Monday will be recognized as the holiday.

POLICE/AMBULANCE/FIRE: Police 233-5434; Fire 233-2651; Ambulance Service 233-4700.

TELEPHONES: No arrangements exist for placing telephones on board.

SERVICES: Tank-cleaning facilities available locally. Compass adjusting available from Houston, Texas.

SHORE LEAVE: Crew members allowed ashore.

AUTHORITY: Brazos River Harbor Navigation District.

GALENA PARK, Texas: 29.44 N. 95.14 W.

Refer to "Houston".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

GALVESTON, Texas: 29.17 N. 94.50 W.

(See Plan Book)

DOCUMENTS:

1 visaed Crew List.
3 Passenger Lists.
3 or more copies of complete Manifests of Cargo for discharge at all United States ports.
2 or more copies of Manifest of Cargo for each United States port.
1 Souvenir List.
1 Stores List.
Ship's Register.
Tonnage Tax.
Load Line Certificate.
Nationality Certificate.
No health document required.

PILOTAGE: Radio to local Agent who arranges Pilot and specifies boarding time. United States Coast Guard require 24 hours notice of arrival at Galveston Bar. Contact pilot boats and pilot station on VHF Channel 12. Pilot boats marked "HP No. 1", 53 ft. long; "HP No. 2", 61 ft. long; "HP No. 3", 106 ft. long. Pilot boats can be signalled by light in international code. Pilot taken on board at sea buoy No. 1 located 6.7 miles from Galveston.

ANCHORAGE: In Bolivar Roads, 6.7 miles inwards from sea buoy No. 1. Depths 32-34 ft.

RESTRICTIONS: Prolonged North winds can reduce water level as much as 4 ft. in Winter. Channel depth 40 ft.

MAX. SIZE: No length restrictions. Draft according to berth depth.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: International Telephone and Telegraph station Galveston, call sign KLC.

TUGS: Available if required.

BERTHING:

Grain elevators	Port Richmond El. Co.	Depth alongside 40 ft.
Bulk loading	Pier 14 East	,, ,, 36 ft.
	Duval Sulphur Terminal	,, ,, 40 ft.
	Imperial Sugar Dock	,, ,, 36 ft.

Container terminal, wharf 1,000 ft. length, equipped with container crane handling 40 tons under the spreader or 60 tons with cargo hooks at 100 ft. outreach – depth alongside 40 ft.

Note: Water depths are based on MLW. Depths may be less due to siltation.

STEVEDORES: Order before 1700 for 0700 or 0800 hrs. following day. During day can be ordered at 2 hours notice. Gangs must be ordered before 1900 hrs. on Saturday for Sunday or holiday.

MEDICAL: All medical assistance available.

FRESH WATER: At all wharves.

FUEL: All grades available. Delivery only by barge from Houston.

GANGWAY/DECK WATCHMEN: Required only if crewmen detained by Immigration.

OPENING/CLOSING HATCHES: By stevedores only.

CUSTOMS ALLOWANCE: Each man 300 cigarettes, or 100 cigars or 1 lb. tobacco; 1 quart wine/spirits.

IDENTIFICATION CARDS: Immigration form 1-95 required.

CONSULS:

Chile
Dominican Rep.
Finland
Guatemala
Haiti
Iceland
Italy
Mexico
Netherlands
Norway
Sweden
Venezuela

TIME: Central Standard Time. Daylight Saving Time effective from April to October.

HOLIDAYS: January 1st; January 15th; February 12th; February 22nd; March 2nd; March 17th, Good Friday; May 30th; June 19th; July 4th; First Monday in September; Second Monday in October; November 11th; Fourth Thursday in November; December 25th; No work on Labour Day or Christmas Day.

POLICE/AMBULANCE/FIRE: All services provided.

SHORE LEAVE: No restrictions unless detained by Immigration.

AUTHORITY: Galveston Wharves (The Port of Galveston).

GEISMAR, Louisiana: 30.13 N. 91.01 W.

East bank of Mississippi River, about 187 miles from sea.

DOCUMENTS/PILOTAGE: For all general information, refer to "New Orleans".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Available if required; normally not used.

BERTHING: Wyandotte Chemical Co: berth 620 ft. long, 32 ft. depth.

FRESH WATER: Available ex-wharf.

FUEL: Not available.

DENSITY: Fresh water (1000).

GOOD HOPE, Louisiana: 29.59 N. 90.24 W.

East bank of Mississippi River, about 126 miles from sea.

DOCUMENTS: For all general information, refer to "New Orleans".

ANCHORAGE: South of berth in river for unlimited number of ships.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: 1 tug used for mooring/unmooring.

BERTHING: General American Tank storage terminal; 4 tanker berths, 40 ft. depth alongside. 2 × 12 in. arms or 8 in. hose. Loading 20,000 bbls.p.h. No ballast facilities.

Norco: Shell Oil Co. 2 tanker berths 45 ft. alongside. 2 × 8-in. hoses, loading 10,000 bbls.p.h. Ballast line 12-in., max. capacity 20,000 barrels.

FRESH WATER: Available ex-wharf.

FUEL: Bunker "C" available ex-wharf.

DENSITY: Fresh water, 1000.

SHIPMASTER'S REPORT: February 1979.

Restrictions: Not allowed to take bunkers, lube oils or stores from dock while alongside. Large tankers often require 2 tugs pushing all the time to keep them alongside, especially when river is in flood. This at GATX No. 4.

VHF: Standby on Channel 13 during pilotage and when anchored. Agents normally place walkie-talkie aboard for their direct communication.

Berthing: Always starboard side to. Forward will have 2 backsprings to jetty, 4 headropes, 2 breasts to buoys, lashings not required, same aft. Only one boat used and secures the bow first.

Telephones: Not available at GATX No. 4 but there is one on next jetty upriver.

AUTHORITY: General American Tank and Shell Oil.

GRAMERCY (Including Pauline), Louisiana: 30.03 N. 90.41 W.

East bank of Mississippi, about 144 miles from sea.

DOCUMENTS/PILOTAGE: For all general information, refer to "New Orleans."

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Available if required; normally not used.

BERTHING: Colonial Sugar Refinery: Berth 600 ft. long, 40 ft. depth. Kaiser Aluminium and Chemical Corp: Berth, 40 ft. depth.

FRESH WATER: Available ex-wharf.

FUEL: Not available.

DENSITY: Fresh water, 1000.

SHIPMASTER'S REPORT: December 1979

Port: Pauline.

Location: 3 miles up river from Gramercy at St. Elmo Point.

Anchorage: A waiting anchorage is situated 2 miles down river from the elevator at Grand View Reach.

Tugs: Available from Gramercy.

Berth: Peavey Grain Elevator. Depth of water alongside is 60 ft. Loading rate with one spout is 1,000 t.p.h.

The berth is a concrete pier on steel girders with 4 weak fenders. Spring lines are run to the pier, and head and stern lines to dolphins.

Fresh Water: Available from pier, rate 6 t.p.h. (approx.).

Fuel: Not available from quay.

Services: Provisions available from New Orleans, will be delivered by launch from Gramercy as pier can only be reached on foot over a catwalk 700 ft. long including stairs.

Authority: Gramercy Port Authority.

GRAYS HARBOR, Washington: 46.55 N. 124.08 W.

(See Plan Book)

DOCUMENTS, etc.: Refer to "Tacoma".

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

PILOTAGE: A vessel approaching requested to give 24 hours advance notice of arrival to Grays and Willapa Pilots through Everett Radio, KLB which runs on a calling frequency of 500 kc/s. and VHF Channels 6, 8, 12 and 16. Pilot boat, "Mercury", 65 ft. long, with an 18 ft. beam, powered by a 330 h.p. GM diesel engine. "Mercury" moored at Westport Fishing Basin, and delivers Pilots to vessels outside Grays Harbor Bar.

ARRIVED VESSEL: Vessels must be inside Grays Harbor Bar to be considered an "arrived vessel".

ANCHORAGE: No specific areas in Grays Harbor have been designated as anchorage grounds. The best area is Southward of Sand Island Shoal in depths of 35 to 40 ft.; the holding ground is good.

RESTRICTIONS: Bar Channel and Approach Channel, depth 30 ft. MLLW. Mean tidal range, about 10 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.

BERTHING: 6 wharves in port dock. Depths alongside from 15 – 35 ft.

BULK CARGO FACILITIES: 1 bulk cargo berth, 1 roll-on/roll-off berth. No liquid chemical or LPG berths. One berth with container capability.

STEVEDORES: 20 local gangs. Additional gangs imported if required.

HOLIDAYS: See "Tacoma".

MEDICAL: All medical facilities available. Local hospital.

DENSITY: Salt water.

FRESH WATER: Available at all wharves.

GANGWAY/DECK WATCHMEN: Required only if detainees aboard.

CUSTOMS ALLOWANCE: No definite quantities prescribed; reasonable allowance at discretion of Customs Inspector.

AUTHORITY: Port of Grays Harbor.

AGENT: See "Seattle".

GREEN BAY, Wisconsin 44.32 N. 88.02 W.

(See Plan Book)

For important general information refer to St. Lawrence Seaway.

DOCUMENTS: No special documents required. All necessary Customs and St. Lawrence Seaway documentation should be accomplished prior arrival.

PILOTAGE: Pilot not compulsory although some Masters prefer Pilot aboard. Pilot boards prior to arrival.

CHANNEL: From Grassy Island, outside mouth of Fox River, to C&NW Railway bridge, channel is maintained 24 ft. below low-water-datum (576.8 ft. above Father Point, Quebec) and 300 ft. width except through bridges. Above C&NW Railway bridge channel and turning basin is maintained at 20 ft. below low-water-datum. From Grassy Island lakeward channel maintained at 26 ft. below low-water-datum varying in width from 300 to 500 ft. for approximately 8 miles. 24 ft. deep turning basin maintained at confluence of Fox River and East River opposite Leicht's North Dock. Currents will flow up and down river and will influence channel depths at times. Present high-water will add 2-4 ft. to channel depths.

RESTRICTIONS: Entry may be made at any time of day or night subject to Master's discretion.

MAX. SIZE: Subject water depths and width of bridge openings.

HEALTH: See "Health: all Ports" before first U.S.A. port (Albany). Illness reports made to Chicago Quarantine Station.

Pratique may be obtained prior to entry of St. Lawrence Seaway. Suspected disease should be reported locally. Rat guards required on all lines.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Ships' Agents located at Milwaukee and Chicago, ETA should be directed accordingly.
TUGS: Join vessel at any designated point. Charges should be obtained from tug operators. Use ship's lines.
BERTHING: General cargo at Leicht's North Dock, 1,500 ft. length, full channel depth. Discharge by ship's gear and shore based equipment. Bulk cargo handled at several docks.
CRANES: Shore based lifting devices to 20 tons. 100 ton stiff-legged derrick available for heavy cargo.
BULK CARGO FACILITIES: Available at several places for coal, salt, fertilizer, chemicals, liquid cargo, stone, pig-iron, etc.
BRIDGES: No bridge opening restrictions for railroad bridges. Highway bridges permit vessels of 300 tons or over to transit at any time. However, heavy land traffic occurs about 0730 – 0830 hrs., 1145 – 1315 hrs. and 1630 – 1730 hrs., and co-operation of Masters is urged during these times so that city bridges may remain closed.
STEVEDORES: Services performed by Leicht Transfer and Storage Co. and arrangements should be handled by ship's Agent or directly with Leicht's.
MEDICAL: Subject to regulations of U.S. Customs and Immigration and St. Lawrence Seaway Authorities. 3 excellent hospitals.
TANKERS: Limited only by harbour dimensions.
DENSITY: Fresh water harbour.
FRESH WATER: Available through ship's Agent and water company.
FUEL: Fuel oil available in any quantity. Normal fire precautions.
SURVEYORS: Available through ship's Agent.
GANGWAY/DECK WATCHMEN: Available at ship's option.
OPENING/CLOSING HATCHES: By stevedores.
REPATRIATION: Available through local immigration officials.
CONSULS: No consuls. Nearest are at Milwaukee, Chicago, Minneapolis.
REPAIRS: Topside and engine repairs available. Complete repair service available at Sturgeon Bay, 45 miles North.
DRY DOCKS: No local facilities. Available at Sturgeon Bay, Wisconsin.
AIRPORT: 8 miles from port. Served by regular airlines with over 30 flights daily.
TIME: Central standard time. Central daylight saving time in effect from the last Sunday in April to the last Sunday in October.
HOLIDAYS: January 1st (New Year's Day), May 31st (Memorial Day), July 4th (Independence Day), 1st Monday in September (Labor Day), Last Thursday in November (Thanksgiving Day), December 25th (Christmas).
POLICE/AMBULANCE/FIRE: Police: Green Bay – Administrative calls 497-3800 Emergency 497-3811 Sheriff: 497-3300 Ambulance: 432-8621 Fire Dept. Rescue – 497-3222 Fire: 497-3222
TELEPHONES: On board service. Contact Wisconsin Telephone Co.
SERVICES: Tank cleaning, fumigation, waste disposal, chandler.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Proper identification should be carried.
DELAYS: Expect no delays for berthing or harbour movement.
AUTHORITY: Brown County Board of Harbor Commissioners, Office of the Port Director.

GULFPORT, Mississippi: 30.21 N. 89.05 W. (See Plan Book)

DOCUMENTS: See "New Orleans".
PILOTAGE: Compulsory from Outer Sea Buoy to docks, provided by Gulfport Pilots Association, arranged through Agent. Pilot boards at Sea Buoy.

Pilot boat has red hull, white superstructure with "PILOT" in black lettering. When pilot boat is underway, contact can be made by VHF Channel 16.
RESTRICTIONS: The Gulfport Channel is 12 miles long running between Ship Island and Cat Island. Channel is 225 ft. wide and has a minimum depth throughout of 30 ft. at MLW. Harbour is dredged rectangular basin about a 0.25 mile wide and 0.5 mile long, this area being protected by piers. Depth in harbour and along wharves is 30 ft. with a 2.5 ft. tide variation. No entry restrictions as to time.
MAX. SIZE: Length of vessel is restricted to approximately 900 ft. by turning basin, no breadth restrictions.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Gulfport Radio KKM 650 – VHF Channel 16 (26 safety only). Continuous service.
TUGS: 2 tugs available but not required unless requested to assist in berthing.
CARGO HANDLING: 4 gantry banana terminal capable of unloading 16,000 boxes per hour. 50,000 sq.ft. transit shed refrigerated facility.

Multi-purpose 35 tonne container crane in operation. Ship's gear usually used but mobile cranes available with 48 hours notice.
STEVEDORES: Must have 12 hours' notice to arrange stevedore gangs. Normal work day 0800 – 1200 hrs., and then 1300 – 1700 hrs. Monday through Friday.
MEDICAL: No advance notice required for medical attention, doctor and hospital care readily available.
FRESH WATER: Fresh water is available. Rate 10 t.p.h.
FUEL: Bunker service available.
DENSITY: Brackish.
GANGWAY/DECK WATCHMEN: Port guards or Dubuisson Detective Agency.
CONSULS: Many countries have consuls within a 100 mile radius of Gulfport.
REPAIRS: Most deck and engine repairs could be arranged within port facilities.
AIRPORT: Gulfport Municipal Airport is approximately 4 miles from the port and served by regularly scheduled airlines.
REPATRIATION: Can be arranged.
TIME: The Port of Gulfport is on Central Standard Time, GMT minus 6 hours; clocks are moved ahead 1 hour during Summer months.
HOLIDAYS: United States national holidays are observed, cargo work can be arranged on these days at a penalty time.
POLICE/FIRE/AMBULANCE: Telephone numbers for emergency services are; Fire 863-1212; Police 863-4211; Ambulance 863-1441.
TELEPHONE: Can be placed aboard only by special arrangement; not normally available.
AUTHORITY: Mississippi State Port Authority at Gulfport.

HAINES, Alaska: 59.15 N. 135.25 W. (See Plan Book)

(Lutak Inlet) Located 5 miles N.W. of Haines. Open all year.
APPROACHES: Lynn Canal to Lutak Inlet.
DOCUMENTS: See "Anchorage, Alaska".
PILOTAGE: Pilot pick-up point located in vicinity of Point Retreat.
ANCHORAGE: Lutak Inlet.
MAX. SIZE: Harbour depth 36 ft. at zerotide. Tides: Diurnal range 16 ft. Also see "Berthing".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
CUSTOMS: Quarantine, Immigration and Customs, local.
TUGS: 3 available.
BERTHING:

1. Haines dry cargo dock can be secured by request through City of Haines (Telephone: Area code 907 number 766-2231). Berthing length – 967 ft. and a clear surface of over 300 ft. in depth. Depth at face of dock – 36 ft. MLLW. No covered sheds, 6 acre open staging area. Crane may be available. Continuous to 300 ft. Alaska State Ferry facility which is equipped to handle roll-on/roll-off cargo.

2. Schnabel Lumber Co. Dock: Berthing length – 520 ft. long and 80 ft. wide. Depth at face of dock – 45 ft. No covered storage. Open storage. 30,000-ton capacity for bulk cargo storage. No crane. Chip loader with 350 t.p.h. capacity. Crane available.

STEVEDORES: 4 gangs.
REPAIRS: None.
FRESH WATER: Available in small quantities in temperate seasons only.
FUEL: None.
MEDICAL: Doctor/dentist available.
TRANSPORTATION: Air, ferry. Haines Highway principal route connecting Southeast Alaska with the Alcan Highway leading to the interior of Alaska and Canada.

HAMPTON ROADS DISTRICT, Virginia: (See Plan Book)

NORFOLK, 36.51 N. 76.19 W.
NEWPORT NEWS, 36.59 N. 76.26 W.
PORTSMOUTH, 36.50 N. 76.17 W.

DOCUMENTS:

3 copies Cargo Manifest (Forms 7527 – A or 7527 – B), the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (curio list).
2 copies Stores List.
2 copies Passenger List (Form I – 418).
2 copies Crew List.

Customs boarding officer will also examine ship's register and load line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours of arrival from a United States port:

Health Pratique.
Master's Oath (Customs Form 3255).
All foreign clearances.
U.S. Certificates of payment of Tonnage Tax (Customs Form 1002).
Certified Crew List.
F.M.C. Certificate of Financial Responsibility.

PILOTAGE: Compulsory; is generally arranged through port Agent. Vessels approaching port may use VHF telephone, Channel No. 16, radio telephone 2738 kHz. Advance notice of 24 hours is required of ETA. Pilot boat is 165 ft. long, black steel hull, with "VA Pilot" painted on hull, white superstructure, and buff funnel. Long and short light or sound signals are used by vessels requiring a Pilot. Location of pilot boat is 1 mile North of Cape Henry Lighthouse. Pilot boat will issue instructions in event of bad weather or when pilot boat is off station and information on anchorage for vessel awaiting a Pilot.
ANCHORAGE: In Hampton Roads, depth 45 ft.
RESTRICTIONS: Channels to Norfolk and Newport News – 45 ft. depth. Elizabeth River Channel – 40 ft. depth to Norfolk and Western Railway Bridge, then 35 ft. to Chesapeake.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Washington, D.C. Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Radio-telephone communications in the Hampton Roads area are furnished by the Chesapeake and Potomac Telephone Company of Virginia. A regular ship-to-shore channel transmits to ship on 2538 kHz and the ship returns the call on 2142 kHz. A "day-time" ship-to-shore channel transmits to ship on 2450 kHz and the ship returns the call on 2366 kHz. In the very high frequency band, "XY" ship-to-shore is available which transmits to the ship on 161.9 mHz and the ship returns the call on 157.3 mHz.
TUGS: Compulsory, normally join the vessel in Elizabeth River.
BRIDGES: Sufficient clearance at all times.

Sealand handles container cargo at Portsmouth with 2×30 ton Paceco cranes. Facility has private cargo facilities: 1 berth, 600 ft. long, 38 ft. depth.

Port area: Elizabeth River Terminal, berth 1,900 ft. long, 35 ft. depth; Metro Machine Works Nos. 2 and 3, 27 ft. depth; Former U.S. Coast Guard Base, 1 berth 500 ft. long, 25 ft. depth; N.B. & C Line Piers, 4 berths, 880 ft. long, 20 ft. depth; Koch Industries, 3 berths, 372 ft. long, 35 ft. depth.

Grain: Cargill Grain elevator: 1 berth 40 ft. depth, loading rate 60,000 bushels per hour. Continental grain elevator: 1 berth 35 ft. depth, loading rate 45,000 bushels per hour.

Newport News: Coal: Pier No. 14, 2 berths, 1,090 ft. long, 38 ft. and 41 ft. depth; Pier No. 15, 2 berths, 1,000 ft. long and 38 ft. depth.

Norfolk: Coal: Pier No. 5, 1 berth, 980 ft. long, 38 ft. depth; Pier No. 6, 2 berths, 1,800 ft. long, 46 ft. depth.

TANKERS: Sewells Point: Exxon Co., 2 berths, 38 ft. depth.

Elizabeth River: American Oil Company, 1 berth, 28 ft. depth; Atlantic Energy Inc., 1 berth, 32 ft. depth; Gulf Oil 2 berths, 32 ft. depth; Mobil Oil, 1 berth, 36 ft. depth; Swann Oil Co., 1 berth, 35 ft. depth; Union Oil Company, 1 berth, 15 – 20 ft. depth; Shell Oil Company, 1 berth, 38 ft. depth; Union Oil Co. of California, 1 berth, 20 ft. depth; Tenneco/Cities Service, 1 berth, 27 ft. depth; Texaco Inc.,1 berth, 32ft. depth.

Newport News: Exxon Co., 1 berth, 35 ft.; 2 berths 19-27 ft. depth.

Portsmouth River: B.P. Oil Corp., 2 berths, 30 ft. depth.

STEVEDORES: Labour arranged through International Longshoremen's Association.

1. Straight Time – work between the hours of 0800 and 1200 and between the hours of 1300 and 1700 daily except Saturdays, Sundays and holidays.
2. Double Time – hours daily between 0600 to 0700 and 1200 to 1300, 1800 to 1900, 2400 to 0100 hrs. and all Sundays.
3. Time and one-half – shall be all those hours not included above, except holidays.

DENSITY: Average 40% fresh.

FRESH WATER: Available at all berths, Barge service available if required.

FUEL: All grades available at oil company berths. Delivery by barge to all other locations.

GANGWAY/DECK WATCHMEN: Not required unless crew members detained by Immigration.

CERTIFICATES: Cargo Gear Certificate, Derat, Radio, Safety Equipment, and Ship's Register.

CUSTOMS ALLOWANCE: At the discretion of Customs Officers. Normal allowance is 200 cigarettes or 2 lb. tobacco and 1qt. wine/spirits per man. Additional allowances may be given if considered necessary, due to length of vessel's stay in port.

IDENTIFICATION CARDS: Identification required by Immigration for shore passes.

CONSULS: The following countries are represented at Norfolk:

Belgium
Brazil
Costa Rica
Denmark
Dominican Republic
El Salvador
Finland
France
Germany
Great Britain
Haiti
Iceland
Italy
Mexico
Netherlands
Norway
Panama
Senegal
Sweden
Thailand

REPAIRS: Newport News Ship Building and Dry Dock Company in James River; 8 outfitting piers up to 1,050 ft. length. Floating cranes up to 75 tons capacity. Gantry crane to 310 tons capacity. Other cranes also available.

Norfolk Ship Building and Dry Dock Corporation, situated on East Branch of Elizabeth River. Channel depth 25 ft.; 7 piers equipped for ship's repairs. 4×30 ton diesel locomotive cranes. Other repair companies in addition.

DRY DOCKS: Norfolk: 1 dry dock 450 ft. long, 57 ft. beam; floating dock 360 ft. long, 64 ft. beam. Berkley plant features the Titan Steel floating dock 950 ft. long, with lifting capacity of 54,250 long tons.

Newport News: Dry docks:

	Length inside gate	*Width of entrance*	*Depth of water over sill MHW*
No. 1	649 ft.	92 ft.	33 ft.
No. 2	862 ft.	118 ft.	32 ft. 3 in.
No. 3	536 ft.	72 ft.	33 ft.

Slipways: The shipyard has 3 inclining slipways with lengths up to 715 ft. and capacities up to 15,000 tons.

AIRPORT: Norfolk Airport, and Patrick Henry Airport at Newport News, over 100 flights daily.

TIME: Eastern standard time, GMT minus 5 hours. Daylight saving time, GMT minus 4 hours, from April to October.

HOLIDAYS: New Year's Day; Lee's Birthday (January 19th); Washington's Birthday (February 22nd); Good Friday; Memorial Day (May 30th); Jefferson Davis Day (June 3rd); Independence Day (July 4th); Labour Day; Election Day (1st Tuesday after 1st Monday in November); Armistice Day (November 11th); Thanksgiving Day; Christmas Day. No work can be arranged on New Year's Day, Labour Day or Christmas Day.

TELEPHONES: Onboard telephones only available at shipyards.

DEVELOPMENTS: *Newport News Marine Terminal:* A new container crane with heavy lift capacity of 200 tons will be erected on berth No. 1 of "C" Pier. Project will be completed by mid-1981. An additional 19 acres of land is being cleared and paved for container and vehicle storage.

AUTHORITY: Virginia Port Authority, Norfolk.

HILO: Hawaii 19.46 N. 155.06 W.
(Including Kawaihae 20.02 N. 155.50 W.)

(See Plan Book)

DOCUMENTS:
4 Crew Lists.
4 Passenger Lists.
Customs Documents.
Clearance, Travelling Manifest.
Local Manifests.
Health Documents.
Bill of Health and Vaccination Certificates.
4 Manifests.
4 Bills of Lading.
Ship's Papers.
Certificate of Registration or Enrolment.
Annual Inspection Certificate.
Load-line Certificate.
Derat Certificate.
Drinking Water Certificate.
Radio Certificate and Licence.
4 Store Lists.

PILOTAGE: Pilots boats have VHF. Contact is made on VHF Channel 16, then switch to Channel 12. Pilot service is provided on a 24-hour basis upon suitable advance notice.

At Hilo, Pilot boards on starboard side in position 0.75 mile due East of Paukaa Light. In picking up Pilot, vessels should be on Southerly course with enough speed for steerageway. Special instructions will be given by radio telephone.

At Kawaihae Pilot station in position 1 mile 287° true from No. 2 Buoy. Pilot usually boards on port side with vessel on course for the entrance at dead slow speed.

ANCHORAGE: No safe anchorages either Hilo or Kawaihae for vessels awaiting Pilot. In this situation, a vessel should heave to or steam. Under good weather conditions, safe anchorage can be had in Hilo Bay. Anchorage is inside pilotage waters and requires local knowledge for safety; vessels should not anchor without Pilot.

RESTRICTIONS: At Hilo, under good weather conditions, vessels with draft up to 32 ft. 6 in. can be handled at any time.

At Kawaihae, vessels with draft up to 33 ft. handled anytime.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Honolulu Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Communicate through RCA or ITT stations in Honolulu.
TUGS: Tugs join vessels at entrance at Kawaihae and at Coconut Island at Hilo. Tugs lines are usually used at no extra charge.
BERTHING: There are many factors which affect berthing at Hawaii Island ports, the most important of which are surge and wind. Vessels should be well equipped with long mooring lines and sufficient additional line to make up 2×900 ft. buoy lines. In all instances, berthing instructions will be given after details concerning vessel and her cargo are received.

Pier No. 1 in Hilo handles bulk sugar vessels and container vessels, 1,220 ft. of berthing space.

Pier No. 3 in Hilo handles tankers, 575 ft. of berthing space.

Kawaihae has one overseas berth which handles both bulk sugar vessels and tankers, 605 ft. of berthing space.
CRANES: Shore cranes available, max. capacity 90 tons.
STEVEDORES: Hilo Transportation and Terminals Co. (Hilo) and Kawaihae Terminals Inc. (Kawaihae).
MEDICAL: All facilities available.
DENSITY: Variable in Hawaii area due to fresh water run-off.
FRESH WATER: Available from county of Hawaii by pipe-line.
FUEL: Can be supplied subject advance notice.
GANGWAY/DECK WATCHMEN: Required for tankers. Other ships as may be necessary due to special circumstances.
OPENING/CLOSING HATCHES: Normally carried out by stevedores.
CUSTOMS ALLOWANCE: 200 cigarettes, 50 cigars per man, and one bottle U.S. quart, wine or spirit.
IDENTIFICATION CARDS: Seamen's passports only required.
REPAIRS: Limited repair service available; almost any type of machine work, welding and ordinary electrical repairs can be handled.
REPATRIATION: Direct air service to Continental United States and to Honolulu International Airport.
AIRPORT: About 1 mile from Port of Hilo and is served by regular airlines.
POLICE/AMBULANCE/FIRE: *Hilo:* Police 9353311; Ambulance and Fire 961-6022.

Kawaihae: Police 8857334; Ambulance 885-7334; Fire 961-6022.
TIME: GMT minus 10 hours all year round.
TELEPHONES: Special arrangements may be made with Hawaiian Telephone Co.
SHORE LEAVE: Allowed.
AUTHORITY: State of Hawaii, Department of Transportation, Harbours Division, Port of Hilo.

HOMER, Alaska: 59.36 N. 151.25 W. (See Plan Book)

APPROACHES: Via Cook Inlet. Port located at mouth of Kachemak Bay on Kenai Peninsula.
DOCUMENTS: See "Anchorage – Alaska".
PILOTAGE:

(1) Homer Pilots Association, Radio KTE 21, tel. 235-8526.

Pilot boards 1 mile South of Homer Spit Light on Coal Point.

(2) The Southwest Alaska Pilots Association serves all ports in Cook Inlet, Prince William Sound, Resurrection Bay, Kodiak Island, the Aleutian Islands, Bristol Bay and Bering Sea. The pilot station for vessels entering Cook Inlet waters is Lat. 59° 36.2′N. Long. 151° 24.5′ W., approximately 1 mile South of Homer Spit Light on Coal Point. The pilot station cable address is "Homerpilot". The pilot station stands by on VHF Channels 10 and 16, 24 hours a day; call sign "WAB-917 Southwest Pilots". The pilot station also stands by on single side band radio as follows:

8284.4 mHz between 0800 and 1200 hrs. Alaska time, weekdays.
4136.3 mHz between 1300 and 1700 hrs. Alaska time, weekdays.
Call sign "WAB-917 Southwest Pilots".

MAX. SIZE: Harbour depth 40 ft. MLLW. Tidal range 28 ft. (−6ft. to +22 ft.) Max. draft for berthing 30 ft. at MLLW.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
ANCHORAGE: Kachemak Bay is excellent anchorage for vessels of any size. Foreign vessels may enter bay to anchor, but must have a Pilot aboard to come to dock.
RADIO: Homer Port Radio monitor C.B. Channel 17. Callsign "KCN 7188 Port of Homer".
VHF: Homer Port Radio monitor Channel 16. Call sign "WAB 935".
TUGS: 1 tug available.
BERTHING: Homer City Dock, 410 ft. long and 50 ft. wide. Limited to draft of 30 ft. 3 privately owned mobile cranes available. Capacity 15, 35 and 70 tons.

410 ft. face sloping bottom suitable for vessels with 20 ft. draft or less at chine. Inside and outside storage is available for holding and staging. Water, gasoline and diesel are available on dock.
FRESH WATER: Available from the berth.
FUEL: Available for small craft only.
REPAIRS: No facilities for repairs.
MEDICAL: Homer Hospital is a 17-bed hospital with 5 full-time doctors.
EMERGENCIES: Police department and a volunteer fire department are available plus a rescue truck.
AIRPORT: Daily air service.
AUTHORITY: City of Homer Harbour Master.

HONOLULU, Hawaii (including Barbers Point and Pearl Harbour): 21.19 N. 157.52 W. (See Plan Book)

DOCUMENTS:

4 Crew Lists.
4 Passenger Lists.
Customs Documents.
Clearance, Travelling Manifest.
Local Manifests.
Health Documents.
Bill of Health and Vaccination Certificates.
4 Manifests.
4 Bills of Lading.
Ship's Papers.
Certificate of Registry.
Annual Inspection Certificate.
Load-line Certificate.
Derat Certificate.
Radio Certificate and Licence.
4 Stores Lists.

Vessels scheduled to call at Pearl Harbour are required to furnish 6 copies of crew lists and passenger lists, if applicable, at least 1 working day prior to arrival, for Naval security requirement.

The United States Immigration Service requires that the Master of vessels manned by alien crew members arriving from a foreign port present the United States Immigration and Naturalisation Service's Officer with a current crew list (Form I. 418) properly visaed in their possession. An I.94 should be prepared for each passenger prior to vessel's arrival.

U.S. Immigration Department representatives are not stationed at any Hawaiian outports. Customs Officials, however, are stationed at all entry ports and accomplish both Customs examination and Immigration.

The United States Agriculture Service examines and seals ship's stores from restricted ports. Special arrangements for garbage disposal may also be required by this agency, if for example meat aboard has been purchased in a port where there is a high incidence of "hoof and mouth" disease. All garbage should be disposed of prior to arrival in port.

All regulatory bodies assess overtime charges for services of their personnel if rendered on Saturdays, Sundays, holidays or after hours on week-days.
PILOTAGE: Pilot requested by Agent. Pilot station telegraphic address on VHF Channel 9 (only) Channel 16, call WXZ 456. Pilot boat, 37 ft. cabin cruiser, yellow with black striping. Only "H" flag necessary for vessel requiring Pilot. Pilot station, Lat. 21° 16′ 12″ N., Long. 157° 53′ 24″ W., no alternative.
RESTRICTIONS: Entry at any time subject to harbour control signals. 24 hours notice of arrival is obligatory.
MAX. SIZE: *Entrance Channel:* Depth 40 ft. *Harbour:* Depth 35 ft. Some piers accept no draft greater than 33 ft.

Dredging operations in progress to deepen harbour to 40 ft. and channel to 45 ft. Completion expected late 1980.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Honolulu Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Call KHK, HF — 8 mc/s., 12 mc/s., 16 mc/s.; LF-500. VHF Channel 16, call KFQ907, Aloha Tower Harbour Control Station.
TUGS: Tugs normally join vessel within harbour limits. Both ship's lines and tug's lines used depending on conditions.
BERTHING: Berthing given on a "first-come-first-served basis" according to type of vessel and particular requirements as to cargo bunkering, etc. Must be arranged through a local shipping Agent.
STEVEDORES: Gangs must be ordered 24 hours in advance. General cargo, average load per hour: 15 L/tons; average discharge per hour: 15 L/tons.
MEDICAL: Agents would like as much advance notice as possible. Complete medical facilities available. Vaccinations in accordance with U.S. Public Health requirements.
TANKERS: 4 tankers berths, max. draft 35 ft. No slop discharge facilities.

Barber's Point: Tanker berths, tugs not normally required. Mooring Master attends berthing procedure. Fresh water not available. Fuel available ex pipe-line. See "Shipmaster's Reports".

Pearl Harbour: U.S. Navy Terminal. Max. LOA 800 ft. Max. draft 38 ft. 6 in.
DENSITY: Pure salt water, no fresh water allowance.
FRESH WATER: Delivered via 2.5 in. fire hose with meter on pier. Rate of delivery between 30 t.p.h. and 60 t.p.h., depending on the berth.
FUEL: All U.S. grades available, no advance notice other than establishment of credit.
FIRE PRECAUTIONS: Fire wires required by tankers berthed alongside.
GANGWAY/DECK WATCHMEN: Services of watchman recommended, usually arranged by Agent.
OPENING/CLOSING HATCHES: Normally carried out by stevedores.
CUSTOMS ALLOWANCE: 200 cigarettes, 50 cigars per man, and 1 bottle, U.S. quart, wine or spirits.
IDENTIFICATION CARDS: Seamen's passports needed.
CONSULS: The following countries are represented in Honolulu:

American Samoa
Australia
Austria
Denmark
Finland
France
Germany
Great Britain
Guatemala
India
Indonesia
Italy
Japan
Korea
Mexico
Monaco
Nauru
Netherlands
New Zealand
Norway
Panama
Philippines
Portugal
Samoa
Sweden
Switzerland
Thailand

REPAIRS: All types of deck and engine repairs possible. Hull repairs below water-line in accordance with dry dock capacities.

DRY DOCKS: Commercial within Honolulu Harbour. Dry dock: 2,800 L/Ton lifting capacity, 385 ft. long, 56 ft. wide. Marine railway: 1,400 L/Ton lifting capacity, 223 ft. long, 65 ft. wide.
REPATRIATION: All facilities, crews generally leave State within 24 hour period.
AIRPORT: International airport, served by all major airlines, 5 miles from harbour.
HOLIDAYS:

New Year's Day	First or following Monday
President's Day	Third Monday in February
Kuhio Day	Third Monday in March
Good Friday	Friday before Easter
Memorial Day	May 30th or nearest Monday or Friday
Kamehameha Day	June 11th or nearest Monday or Friday
Admission Day	Third Friday in August
Labour Day	First Monday in September
Discoverer's Day	Second Monday in October
General Election Day	First Tuesday after First Monday in November (election year)
Veteran's Day	November 11th
Thanksgiving Day	Last Thursday in November
Christmas Day	December 25th

POLICE/FIRE/AMBULANCE: Police, Ambulance, Fire dial 911.
TIME: G.M.T. minus 10 hours all year round.
TELEPHONES: Telephones can be placed on board at any dock.
SERVICES: All services found in major U.S. ports are available.
SHORE LEAVE: No restrictions if papers are in order.
DEVELOPMENTS: *Sand Island:* Piers 51B and 52 to be joined by August 1982 by using infill from dredging. The area will also be paved (completion late 1982).

New container yard under construction at Pier 52. Completion scheduled for June 1981. Approximate area of 36 acres.

Piers 52 and 53 will consist of 1,400 linear ft., currently under construction with scheduled completion in June 1981.

Also see "Max. Size".

SHIPMASTER'S REPORT No. 1: August 1978. **(See Plan Book).**
Hiri Seaberth, Barber's Point: Position 21° 16′ 22″ N., 158° 05′ 27″ W.
Operators: Pacific Resources Inc., Honolulu.
Documents:

- 3 Crew lists
- 3 Store Declarations
- 3 Cargo Declarations
- 3 General Declarations
- 3 Crew's Effects Declarations
- 3 Master's Oath of Entry

Pilotage: In case vessel has received order to berth on arrival, H.I.R.I. Mooring Master boards vessel in a position 3 miles due South of Barber's Point Lighthouse. In case vessel will not be berthed on arrival vessel is to proceed towards Honolulu. This will be advised by Agent in due time. When approaching Honolulu, vessel must remain South of a line Barber's Point Light/Diamond Head Light and await Pilot from Hawaii Port Pilots Association. Pilot will then bring vessel to outside anchorage.
Restrictions: Vessels will be berthed during daytime only and at slack water only. Unberthing day and night and at any stage of tide. Vessels up to 100,000 d.w.t. and 830 ft. LOA have been handled at H.I.R.I. Seaberth.
Radio Pratique: Not required.
Advance Notice: Refer to Charterer's/Owner's instructions. ETA cables to be sent via San Francisco Radio KFS or KPH since Honolulu Radio Station has closed down.
Communication: H.I.R.I. controller is listening VHF Channel 16, working Channel is 9. Call sign is "KTD 466".

Aloha Tower, call sign "KFQ 907" is listening Channel 16, working Channel is 12.
Tugs: Tugs of various sizes up to 2,250 h.p. and work boats available from Honolulu. While vessel in berth a workboat is continuously standing by.
Hiri Seaberth/Mooring: Seaberth consists of 8 mooring buoys equipped with quick releasing hooks. Mean depth in the berth is about 40 m. The mooring is approached from the West. A tug from Honolulu is made fast with ship's line through centre lead. Two mooring boats are on hand, a second, smaller tug is used for pushing on the port quarter. Anchors are not used for mooring. The first line to be made fast is line No. 5, thereafter lines No. 2, 6, 1, 4, 3, 7, 8 in that order. Lines 1 and 2, 5 and 6 will be doubled, finally vessel is moored with 12 lines.

Nylon lines are preferred, but wires may be used. Lines and wires must be long enough to reach buoys 600 ft. from vessel.

It is important that all nylon lines go through roller fairleads in order to avoid chafing and eventually breaking. Refer to mooring layout.
Hose Connection: A 30 in. crude line combined with a 16 in. line for black oil is used for receiving crude or loading black products. A 20 in. line is used for loading clean products.

The crude/black oil system is connected by a 12 in. hose with ASA 150 flange. Clean products system is connected by a 10 in. hose.

Vessel's port derrick to be rigged before arrival with *single* whip able to reach hose 120 ft. down on sea bottom. A travelling block is not acceptable as diver connects hook directly to hose on sea bottom. Lift required is 8 tons. Hoses are connected/disconnected by ship's personnel. Shore personnel can be arranged, charges being billed to vessel. Normal discharge rate for crude oil is about 30,000 b.p.h. with maximum 125 lbs. pressure at rail.
Repairs: Minor repairs are possible through workshops in Honolulu.
Supplies/Services: Provisions, stores, laundry available. Stores, etc. cannot be loaded on the ship while in the berth, vessels usually receive same off Honolulu.

Fuel and marine diesel oil available and can be loaded in mooring berth after discharge operations are completed.

In this vessel's case, however, vessel was berthed in Honolulu at Piers 30/31 for the purpose of bunkering and storing. Fresh water is available alongside piers. Crew changes are possible, shore leave is possible. The launch from Barber's Point to Honolulu Pier 10 takes about 2.5 hours.
Weather/Wind: The Hawaiian Islands are dominated in all seasons by the N.E. Trade Winds, which are present about 75% of the time. The average velocity is 12.5 m.p.h. They rarely exceed 20 m.p.h., however, gusts of 100 m.p.h. are possible. October to April is the "Kona" season which refers to occasional storms from the South. During these storms heavy rainfall and cloudiness can be expected. The average temperature is between 24° – 28° Celsius.
Tides/Current: The predicted times and heights of high and low water are published for Honolulu. The rise of tide is only 1 – 2 ft. Strong winds may effect the tides. Velocity of current is 1 – 2 knots, mostly setting in Westerly direction, however, counter-currents have been observed.
References: B.A. Chart Nos. 1308, 1378. List of Lights Vol. G; Coast Pilot No. 62 Vol. 3.

SHIPMASTER'S REPORT No. 2: August 1977. **(See Plan Book).**
Barber's Point Sea Berths: There are 2 buoyed berths situated near the above, of which the larger is that owned by Hawaiian Independent Refinery Inc. (H.I.R.I.), 1.9 miles × 148° from the Barber's Point Lighthouse. The other, some 2 miles N.E. of H.I.R.I. moorings, is owned by Standard Oil of California (S.O.C.A.L.) and is used for the importation of crude fuel stock to their own refinery. H.I.R.I. Berth, however, is used for both crude imports (via 1×12 in. submarine manifold) and export/bunkering of products (via 1×10 in. submarine manifold).

The H.I.R.I. Berth is based on a spread of mooring buoys to the hooks of which a ship's rope(s) are attached. It should be noted that these are NOT quick release hooks so that the weather conditions during operations are of paramount concern to all. Failure to leave the berth in sufficient time will preclude any help in unmooring by the tug boat in attendance, for letting go lines and will result in broken lines and/or buoy moorings. The 4 mooring tugs leave as soon as vessel is made fast.

The operation of mooring is governed by the wind and tidal stream. Most of the time the former is the N.E. Trade, while the tide *has* to be setting to the West for the vessel enters the berth on a course of 095° with Diamond Head Lighthouse ahead. The fact that there are some 17 to 18 fathoms in this berth, does not rule out the action of counter currents upon a deep draft vessel such as to make a mooring operation more difficult, if not impossible. Again, a Southerly wind will force the vessel down onto the lee buoys, and over the manifold hence a *minimum* working length of 100 fathoms per rope is necessary. The action of the Southerly wind is also to build up a considerable swell, making it necessary to begin ballast as soon as practical and *no later* than when *65%* of the cargo has been discharged and so arranged to allow sufficient empty and dry tanks to maintain the vessel's safe mooring at 25 ft. draft.

The berth was laid out for vessels up to some 65,000 tons, hence the position of the single 12 in. crude oil manifold is difficult for larger vessels, while the 10 in. bunker/product hose is even further aft from the cargo discharge point. With an overall length of 885 ft., and the manifold 425 ft. from the bow, it will be seen from the plan that the stern of the vessel will make No. 5 and 6 Buoys into breast lines, so that stern lines as such, have to be run from the after deck and any additional ropes to No. 4 and 7 Buoys will be breast lines.

These facts limited the vessel to 100,000 metric tonnes of cargo, as the Marine Adviser to the Receivers, Pacific Resources Ltd., (operators of H.I.R.I.) was convinced that a 140,000 tonne vessel at her draft of some 54 ft., would be too difficult to manage, whereas at 44 ft. the rudder would be of maximum value, the propeller fully immersed, but the slab-sided stern at its minimum resistance value. This was justified in that the scheduled berthing was delayed for 3 hours, due to a leaking fuel valve, resulting in a minimal West-going tidal stream, and a fresh Southerly wind with swell. Full use had to be made of all tugs, and double moorings run to windward buoys, before vessel could be placed in the correct position. It is not envisaged by Receivers that similar sized vessels will be regularly accepted in future.

The instructions call for an initial discharge rate of some 12,000 b.p.h., until pumphouse radios (VHF Channel 9) advise that the system is full, after which the rate can be increased to 125 lbs. per square inch on *their* gauge at ship's manifold, about 28,000 b.p.h. maximum. Connecting of hose is achieved by ship's staff, but the hose is surveyed by diver before vessel enters berth, a small buoy being attached as an aid for the Pilot. The vessels runner and hook are lowered *to the bottom* where the diver attaches same to the hose sling, the operators having found that this method ensures a longer life for their hoses, and connections on the hard bottom of coral, overlaid with sand. The same procedure in reverse is carried out after discharge, using a tug to clear hose.
Entering Inwards: Hawaii being a full State, the entering documentation and procedures are as for any mainland USA port. It is important to note however, that under normal circumstances the vessel proceeds to a point 3 miles South of Barber's Point Lighthouse, where the Mooring Master and his Assistants join and tugs attend. The official boarding party will not, therefore, board until *AFTER* vessel is securely moored. This does not apply to a Coastguard Officer who comes with Mooring Master (or Pilot, off Honolulu) and who *MUST* be satisfied that his requirements have been met, before vessel is allowed to anchor, berth, enter port etc. (see Coastguard Regulations).

In the event that the vessel is unable to berth for a few hours due to the tidal stream, wind, etc., an anchorage can be obtained to the Eastward of the H.I.R.I. Berth and Southwest of S.O.C.A.L. Berth. If, however, there is to be a delay of some 24/48 hours, the vessel has to be anchored in the appropriate *recognised explosives anchorage* off Pearl Harbour. This will require the services of a Honolulu Pilot and possession of US Charts (B.A. Charts are small scale and do not show the anchorage areas with sufficient detail). This berth is but 7 cables from the surf line, though the new airport runway embankment acts as a perfect Radar distance guide at all times. It is preferred for inward clearance, being but 3.5 miles from the Customs Pier, whereas H.I.R.I. Berth is 13.5 miles along the coast and takes 1 hour in a normal launch. In view of the problem of Southerly winds (a 16,000 ton T.2 tanker grounded recently, while trying to enter Honolulu Harbour), it is important that any vessel at anchor is kept ready to weigh anchor and sail to seaward, to avoid any danger of dragging ashore.

Note: Vessels must *not* cross the limits of Honolulu Harbour while awaiting the Pilot and are further delayed when the Coastguard boards to inspect vessel's emergency steering and power systems, log book entries and other items as required.

Communications: Honolulu has an excellent network of public and private radio communication stations. The US Coastguard (Channel 16, 14 and 12) have an excellent range, while the various Agent offices have their own units for direct contact, in normal hours. On Channel 27 there is the Marine Operator which is a local private organisation that can connect a vessel via satellite telephone to any part of the world, as well as to Agents out of hours. However, they will require the Agent's "BAKER NUMBER" i.e. the coded number that will settle accounts locally, hence it is best to obtain this first from Agent.

N.B. The misuse of Channel 16 will bring Coastguard Authority down on any vessel breaking the code of conduct.

Bunkers and Fresh Water: No fresh water is available at Barber's Point nor are there any barges for either water or bunkers at Honolulu. A tug boat can be chartered at $5,000 per day to bring 50 tons of diesel/gas oil to the Honolulu Anchorage, but it is not allowed to deliver while vessel is in H.I.R.I. moorings. The question of using the H.I.R.I. 10 in. product line for bunkers is dependant on the position of the vessel's connection and the type of product already in the line when the request is made, as any different grade is cleared and requires re-refining.

The alternative to the above is to request permission to bunker at one of the several deep water berths inside Honolulu Harbour, but apart from high cost, the attitude of the Harbour Master is negative to any entry by large tankers, inerted or not, hence delays can be anticipated even in an emergency.

Stores: A full range of provisions and dry stock is available and most deck or engineer's stores can be obtained from either the ship chandler or Dillingham Dockyard (which owns the tugs and is part of Oahu Railway & Land Co., Dillingham Corporation were Agents for the vessel).

When launches have to be used stevedores are employed to load the wire baskets at the pier and at least 2 to hook same to vessel's runner.

Repairs and Reconditioning: There would appear to be very little that cannot be handled or promoted in the mechanical, electrical and electronic fields and agencies exist for most major manufacturers, both U.S. and foreign.

Consuls: There is no longer a British Consul in Honolulu.

Launch service: This can be arranged through the Agents, the usual vessel being licensed for 28 persons only, while a substitute tug was allowed only 12 persons per trip. The cost is $130 per round trip, straight time to the Honolulu Anchorage (+$11.00 Port Fee minimum) and $263 per 2.5 hour round trip straight time to H.I.R.I. Berth at Barber's Point. If there are vessels at both S.O.C.A.L. & H.I.R.I. Berths, the schedule and costs are supposed to be shared and thus the number who can be ashore at any one time is even more limited. All costs are increased on overtime. While on mooring run, time in excess of 2.5 hours is charged out at $120 per hour in increments of 0.5 hour.

Medical Service: In common with most US ports no doctor will attend aboard unless under special circumstances, hence the medical list has to be divided to ensure sufficient fit men are at all times aboard the vessel in case of weather problems, which would cause the launch service to be suspended, or prevent men re-boarding the ship in swell.

Coastguard Regulations: Since the 17 tanker disasters of 1976 in US waters, the Coastguard have been empowered to conduct an off-limits inspection of all laden tankers requiring to enter a US anchorage or port area. This initial survey is to ensure that all the vessels' emergency gear has been tested within 12 hours of arrival and a log entry made of same. This includes steering, lighting, inert gas plant and any safety gear of electrical nature while radar, gyro compass and any such navigational gear must be working and in use together with up to date large scale charts and both International and US Inland Rules 1977 Edition.

He will also require to see the ships manoeuvring data, squat and trim table and all information regarding draft together with engine movements in answer to telegraph plus internal communication systems. (A proposal is before Congress that all vessels be fitted with US made LORAN C equipment). Until he is satisfied the Pilot is not allowed to take the vessel inside official Port Limits.

After agreeing to allow vessel to enter, the Coastguard Officer remains on bridge to monitor all movements, responses, etc., and will thereafter conduct the anti-pollution survey as laid down in Federal Register Vol. 37 Number 246 Part II of December 21st, 1972. If, however, he is of the opinion that the standard of navigation in response to the Pilot's instructions are such as to constitute a potential hazard to navigation and therefore, to become a pollution risk, he has the authority to prevent the vessel from proceeding inwards and can cause the Pilot to take the vessel to sea or to an anchorage until the defects or bridge organisation plan or engine room responses are satisfactory to again proceed.

(*N.B.* The IYCS Bridge Procedures Guide is an invaluable help with the above in conjunction with the Trials Data).

NOTICE: Issued by Hawaiian Independent Refinery Inc., and dated May 1979.

Subject: General Instructions and Discharging Orders

1. A Mooring Master has been assigned to assist in the mooring of your vessel, the connecting of cargo hoses, discharge of cargo, disconnecting cargo hoses, unmooring and departing from the sea berth, and other activities for which his services may be required. His presence on board does not relieve you of your legal responsibilities. FINAL DECISIONS REMAIN YOUR PREROGATIVE. Charges for the service of the Mooring Master will be for the account of your vessel and/or Owners.

2. After your vessel is properly moored and secured in the sea berth, one cargo hose will be connected to the ship's manifold. The ship's crew will be required to perform this function, supervised by a qualified Deck Officer. When the vessel is ready in all respects to commence cargo operations, and the Hawaiian Independent Refinery, Inc. personnel have indicated their readiness to receive cargo, commence the discharge of cargo at the rate of approximately 12,000 U.S. b.p.h. This is for the purpose of displacing the pipeline. Upon receipt of instructions from the Mooring Master, increase to maximum pumping rate using *all main cargo pumps,* but do not exceed 150 p.s.i at the vessel's rail.

3. For the safety of your vessel and at your discretion based upon weather conditions, etc., the discharge of cargo should be arranged so that when approximately 65% of the total cargo has been discharged there will be sufficient empty and dry tanks to accommodate ballast as required to produce a mean draft of approximately 25 ft. and in a trim condition not to exceed 6 ft. by the stern upon the completion of discharging operations. The Mooring Master is responsible for the inspection of the tanks prior to the loading of ballast and again upon the completion of discharge of all cargo; however, normally this will be done by a third-party petroleum inspector.

4. It is unlawful to pollute the waters adjacent to the State of Hawaii. It is the responsibility of the vessel to assure that no oil (crude oil, bunker fuel, diesel, bilge oils, etc.) is spilled or pumped overboard. Drip pans must be provided at the flange connections. In the event of an oil spill, or any other occurrence which results in pollution of the sea, the U.S. Coastguard, the Mooring Master, and the vessel's "Agent" must be notified immediately. The Mooring Master will notify the U.S. Coastguard immediately if the ship's Master fails to do so. By Federal Order CFR 153.305, no dispersants will be applied to an oil spill without U.S. Coastguard approval.

Failure to report pollution, regardless of the extent thereof, will result in severe penalties being imposed by the State of Hawaii and the U.S. Coastguard.

5. A sufficient number of officers and crew members must be on board at all times to disconnect the hoses, unmoor, and vacate the berth should such action become necessary, or deemed advisable. The main engine must be kept ready for use at all times. Under no circumstances are repairs to be undertaken while the vessel is moored in the sea berth.

6. It is hoped that the discharge of cargo will be expedient and successful, and that your stay in Hawaii will be pleasant. To this end, please do not hesitate to call upon us for any assistance we may be able to render.

7. You are requested to sign and return the attached copy of these instructions in acknowledgement of receipt thereof.

Shipmasters Note: Berth is now fitted with 16 in. hoses for discharging crude.

AUTHORITY: State of Hawaii, Department of Transportation, Harbours Division.

HOUSTON, Texas: 29.45 N. 95.20 W. **(See Plan Book)**

DOCUMENTS:

1 Visaed Crew List.
3 Passenger Lists.
3 or more copies of complete Manifests of Cargo for discharge at all U.S. ports.
2 or more copies of Manifest of Cargo for each individual U.S. port.
1 Souvenir List.
1 Stores List.
Ship's Register.
Tonnage Tax.
Load-line Certificate.
Nationality Certificate.
No health document required.

PILOTAGE: Compulsory. Radio to local Agent who arranges Pilot and specifies boarding time. U.S. Coast Guard requires 24 hours notice in advance of arrival Galveston Bar. Pilot boats and station on VHF Channel 12, Bridge to Bridge is Channel 13 and tugs for docking and off-docking on Channel 14. 3 Pilot boats marked "HP No. 1" – 53 ft., "HP No. 2" – 61 ft. and "HP No. 3" – 106 ft. in length. Pilot boats contacted by light in International Morse code; no sound signal. Pilot taken on board at Sea Buoy No. 1, located 6.7 miles from Galveston. Seldom, if ever, is water too rough for boarding at above location. Anchorage located in Bolivar Roads, 6.7 miles inward from Sea Buoy No. 1.

ANCHORAGES: Anchorage for Houston is only in Bolivar Roads in Galveston, Texas, which has ample space and depth for all Houston bound vessels.

RESTRICTIONS: None with respect to time of day or night, or with state of tide.

Houston Ship Channel Dimensions:

Section of Channel	*Miles*	*Width (ft.)*	*Depth (ft.)*
Bolivar Roads to Morgan Point	25.6	400	40
Morgan Point to Exxon Co. Slip	4.8	400	40
Exxon Co. Slip to Shell Oil Co. Slip	8.8	400	40
Shell Oil Slip to Hunting Bayou	4.6	300	40
Turning Point at Hunting Bayou	0.2	600	40
Hunting Bayou to Clinton Island Turning Basin	2.8	300	40
Clinton Island Turning Basin	0.2	1,000	40
Clinton Island Turning Basin to Wharf No. 15	3.6	300	36
Turning Basin	0.8	250 to 970	36
Total miles	51.4		

MAX. SIZE: Max. 850 ft. long, 115 ft. breadth and 39 ft. draft. Tide minimal, effected primarily by wind only. Should a vessel's draft exceed 39 ft., permission to enter must be obtained from the U.S. Coast Guard.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: International Telephone and Telegraph – ITT – Galveston call letters KLC.

TUGS: Tugs come alongside just off dock or immediately prior to entering turning basin if vessel is to turn, or at Pilot's discretion.

BERTHING: No special requirements other than authority from terminal operator local Agent.

Public Wharves – Port of Houston Authority Facilities:

Petty Terminal Corporation (PETCO) Dock:

Deepwater shipside terminal located on South side of channel. One ship berth 720 ft. long with water depth of 40 ft. One covered warehouse 100,000 sq. ft. with rail track inside warehouse and on outside concrete apron. Complete services available for discharging and shipping general cargo. Owned by Intercontinental Terminals Company and operated by Petty Terminal Corporation.

Manchester Terminal Company:

3 ship berths – 1,650 ft. in length (including 1 piling cluster).

Served by 1 marginal track and 2 outside tracks behind docks plus loading tracks to all other facilities. Special loading-unloading docks for motor trucks available.

Equipment: 62 Lift Machines; 7 Tractors; 1 Towmotor, 30,000 lbs. capacity; 4 Sweepers, 3 Scrubbing Machines.

Manchester Terminal Company also has 18,000 cargo pallets.

New Terminal Warehouse Corporation:

Capacity 3 ship berths. Wharf 1,400 ft. long. Open storage areas of 50,000 sq. ft. Covered storage areas of 200,000 sq. ft.

Other Wharf Facilities:

In addition to the for-hire terminals. Port of Houston has some 43 ship berths plus various barge facilities on the Ship Channel maintained and used exclusively by industries. Most of these facilities are tanker ship berths at the refineries. There are also 4 liquid-bulk terminals for hire: Amerada Hess Terminal and General American Tank Storage Terminals, the latter having 2 separate locations; South Coast Terminals; Robertson Terminals, Inc.

Barbours Cut Terminal: The Port of Houston Authority continues works on a $70 million container, Ro-Ro (Roll-on/Roll-off), and ship/barge (Lighter Aboard Ship – LASH) facility 25 miles downstream at Barbours Cut where the Ship Channel enters Galveston Bay. A "U" head pier and mooring dolphins provide for berthing LASH ships during loading of barges onto the ships and for off-loading containers (by ship's cranes) from LASH ships to truck trailers on the pier. A barge fleeting area and barge mooring dolphins are provided in the LASH ship facilities now in use. A Ro-Ro dock provides for ships equipped with ramps to load and unload wheeled vehicles. A Ro-Ro transit shed with 100,000 sq. ft. of covered storage is nearing completion. An eleven acre paved open storage area is under construction: There are three 1,000 ft. container wharves; 42 ft. alongside; 33 acres open storage back-up area at each wharf. The 3 wharves are in use and improvements are presently being completed behind the third wharf. There is a container freight station with 55,000 sq. ft. of covered storage and rail service available. A railroad yard or ramp point with 1 lead track, 1 storage track and 2 working tracks provides a facility to load and unload containers and trailers to and from flat cars. The car capacity on the working and storage tracks is approximately 138×55 ft. long cars. A new lead track is under construction.

Bayport Division: A 300 ft. wide by 42 ft. deep Bayport Ship Channel and its 1,600 ft. diameter turning basin connects with the Houston Ship Channel in Galveston Bay and extends approximately 2 miles inland to provide berths for deep-draft tankers and bulk freighters. Petro United Inc., Celanese Corporation, American-Hoechst Corporation and Hudson Oil Company have docks and facilities on the Bayport Ship Channel.

BULK HANDLING FACILITIES:

Public Grain Elevators: Back of Wharves 14 and 15. Capacity 6,000,000 bushels.

Equipped to unload from 110 to 120 cars in 10 hours, or deliver a combined total of 80,000 bushels per hour to 2 ships. 12 mechanical grain trimmers are in use at the Elevator as well as other major equipment including 2 car dumpers and 7 hopper scales of 150,000 lbs. capacity. 2 modern grain truck dumpers can unload up to 30 trucks per hour.

Public Bulk Materials Handling Plant: At Greens Bayou.

Loading/unloading capacity is 1,000 long. t.p.h. free digging rate. Fully automatic plant handles dry bulk commodities rapidly to and from ships and barges through the loading and unloading towers, conveyor systems, hoppers, pits, surge bins and scales; with rail and truck facilities and ample ground storage. Rail cars are rapidly moved with large rubber-tyre tractors. These tractors are equipped with two-way radios for instant communication with unloaders. Boom of unloading tower reaches 76 ft. from face of dock, bucket capacity is 10 tons; loading tower boom reaches out 61 ft. from dock face and is equipped with automatic trimmer. Both towers can travel the full length of the dock. Mooring facilities for a waiting vessel have been installed next to existing dock. Also available: a boxcar unloading system (Augermobile), 2 heavy-duty front-end loaders and 4 heavy-duty car shakers.

Elco Shipside Elevator Company:

Two million bushel capacity elevator which loads up to 25,000 bushels per hour to vessels berthing at Dock 2 of the Port Authority's Manchester Wharves.

Goodpasture, Inc. and Continental Grain Company:

Grain elevator with 12 million bushel capacity – 4 ship berths. Also general cargo handling. Max. draft 38 ft. Loading rate 1,000 t.p.h.

Union Equity Co-Operative Exchange:

Grain elevator with 6 million bushel capacity, 1 grain berth, 1 lay berth, each 980 ft. long, water depth of 40 ft. for all berths. Loading rate 1,200 t.p.h.

Adams Terminal: Phillips Terminal Company.

2,700 linear ft. capacity 5 vessels. Bulk cargo loading conveyor system rated at 400 t.p.h.; horizontal boom, hammerhead-type clamshell unloader equipped with five-yard ore bucket, rated at 150 to 250 t.p.h.; 2 gantry cranes, capacity 40 tons at 30 ft. radius; Robbins heavy-duty car shakeout; 20-ton truck mounted crane. One D & H gantry crane modified to handle five-yard bucket for bulk ore discharge. 100 t.p.h. Specialists in import and export bulk cargo. Covered storage – 73,000 sq. ft.

Jacintoport Terminal:

Deepwater shipside terminal located on the North side of the Ship channel some 15 miles downstream from the Turning Basin.

Three ship berths with water depth alongside the wharf at 32 ft. 24,000 sq. ft. of transit sheds; 60,000 sq. ft. of back covered storage warehouse space, and 300 acres available for open storage. Rail service by the PTRA and Missouri Pacific. 200 igloos provide storage with less than 4° change in temperature year around. 500 cargo pallets. Slip is 4,200 ft. long and 400 ft. wide. 3,600 ft. marginal trackage. Owned and operated by Bethlehem Steel Corporation.

Cargill, Inc.

Grain elevator with a capacity of 3.5 million bushels. Two ship berths. Max. draft 38 ft. Loading rate 1,500 t.p.h.

CRANES: (Capacities 1 ton=2,000 lbs.)

Locomotive Cranes: Crane No. 15 – American, Diesel Electric: Capacity at 45 ft. radius – 17 tons.

Other Cranes:

Mobile No. 1 Crane – Diesel:	Capacity	7.5 tons
Mobile No. 2 Crane – Diesel:	Capacity	20 tons
Mobile No. 3 Crane – Diesel:	Capacity	20 tons
Mobile No. 4 Crane – Diesel:	Capacity	50 tons
Mobile No. 5 Crane – Diesel:	Capacity	50 tons
Mobile No. 6 Crane – Diesel:	Capacity	80 tons
Mobile No. 7 Crane – Diesel:	Capacity	80 tons
Mobile No. 8 Crane – Diesel:	Capacity	150 tons
Mobile No. 9 Crane – Diesel:	Capacity	80 tons
Mobile No. 10 Crane – Diesel:	Capacity	80 tons

Gantry, American Revolver R-25 Electric: Capacity at 65 ft. radius – 50 tons

Gantry, Clyde Whirley, Diesel Electric: Capacity at 45 ft. radius – 30 tons

Gantry, Portainer, Electric: Capacity at 81 ft. reach – 27.5 tons

Gantry, Portainer, Diesel Electric: Capacity at 113 ft. reach – 44 tons

Gantry, Portainer, Electric: Capacity at 140 ft. reach – 30 tons

Stiff Leg Derrick, Electric: Capacity at 50 ft. reach – 75 tons

BRIDGES: One bridge crosses channel immediately East of Public Wharf 31, clearance of 135 ft.

STEVEDORES: Stevedore, on advice from representative of local Agent, must order labour prior to 1700 for 0700 or 0800 hrs. start the following day. Can order at 0800 for 1000, 1100 for 1300 and 1700 for 1900 hrs. start. Gangs must be ordered prior to 1700 hrs. on Saturday for Sunday or holiday.

MEDICAL: Give sufficient notice to order doctor or ambulance. Numerous hospitals available. Seaman's health certificate required.

TANKERS: No specific requirements for oil carriers with respect to load/discharge lines. Tankers must be gas free to enter turning basin area. Approximately 12 tanker berths, excluding Humble Oil & Refining Co. in Baytown, Texas.

DENSITY: Classed as full fresh but varies with rainfall and tide, usually 4 to 5 in. allowance on full draft.

FRESH WATER: Available at all terminals through pipe and hose.

FUEL: All grades and viscosities available.

FIRE PRECAUTIONS: All standard precautions per code of Federal Regulations plus local ordinances. Tankers, unless gas free, not permitted at wharves in the immediate turning basin area.

GANGWAY/DECK WATCHMEN: Not required, but are available and can be arranged by local Agent at Master's request.

OPENING/CLOSING HATCHES: By stevedores only – vessel will be charged for this work if done by crew.

CUSTOMS ALLOWANCE: Tobacco, 300 cigarettes, 100 cigars, 1 lb. of tobacco or combination for each man. Wine and/or Spirit, 1 quart bottle for each crew member.

CARGO GEAR: Cargo gear safety certificate required.

IDENTIFICATION CARDS: Immigration Form I-95 card required.

REPAIRS: All types available.

DRY DOCKS: Todd Shipyard, 12,000 ton drydock at Greens Bayou.

REPATRIATION: Danner Guard Service can handle all phases.

AIRPORT: Approximately 0.5 hour by car; served by regular airlines.

TIME: Central Standard with daylight saving time effective from April to October.

HOLIDAYS: January 1st; February 22nd; March 2nd; May 30th; July 4th; First Monday in September; November 11th; December 25th. No work performed on first Monday in September and December 25th except in emergency.

POLICE/FIRE/AMBULANCE: All services provided or available.

TELEPHONES: Currently no arrangements for placing telephones aboard but easily accessible on wharves.

SERVICES: All services available.

SHORE LEAVE: Shore leave granted except when individual not qualified.

DEVELOPMENTS: Channel depths to be maintained at 40 ft. Bayport development East and South of Morgans Point to have deep draft berths for liquid bulk and general cargo.

SHIPMASTER'S REPORT: 1975.

Customs:

Bond remained sealed.
2 Copies of Curio Lists.
2 Copies Store Lists.
1 Crew List.

Immigration:

No visit. 1 Crew List.

Agents:

Given Travelling copies of Clearance last port, Tax Tonnage receipt last port plus cargo manifests.

Agricultral Dept. Re-sealed Meat and vegetable rooms. Inspected Galley Messrooms, etc. Garbage cans to be covered.

Provisions and Stores. Satisfactory. Select own ship chandler.

Laundry. Facilities available but not used.

Coast Guard. No visit.

National Cargo Bureau: Same as New Orleans.

Watchmen: None placed on board. Security at gate strict.

Telephone: None placed on board. Use dock office.

Fresh Water: Available.

Fuel: Available by barge if required. Do not over stem.

Engineering and Repairs: Efficient and satisfactory. Price high compared to N.Z.

Radio Messages: Send ETA after departure New Orleans to Agents and Houston Pilots with draft. Notify Agents of any explosives.

Stevedores: Hours of work. 0800 to 1200 hrs., 1300 to 1800 hrs., 1900 to 2300 hrs. Weekday gangs will work through meal hours to finish. At weekend, day labour works right through to midnight if necessary on time and a half then double time for meal hours.

Crew must not clean hatches. Labour has claim on cleaning and has to be paid in addition to crew. Crew open and close hatches, but not until hatch foreman present. Not before labour working hours.

Working heavy lifts with ship's gear loading rate very slow, especially at end of shift. Due to nature of deck cargo; 11 ton lifts 52 ft. long.

Constant supervision needed for deck cargo.

Head stevedore checks Factory Act Book before starting.

No plan makers. Details sent back to New Orleans for redistribution to discharge ports.

General: Pilot boards from large grey metal cutter off fairway buoy. Flash every 2.5 seconds. Give good lee and have ladder 8/10 ft. above water with usual manropes, heaving line, etc.

If you have to anchor, most vessels use the Eastern anchorage about 1.5 miles East of fairway buoy and clear of fairway marked channel. Soft mud bottom. Use plenty of cable.

Berth: Ships spaced very close to each other. Rise and fall of tide about 1 ft.

Moorings: at least 4 head lines and stern lines plus 2 springs each end. Ships frequently passing and channel narrow consequently a good deal of surge. Lines to be frequently looked at and kept tight. Parted 3 springs in as many days!!! Gangway also to be watched. General rule is to use ship's gangway. Wide apron in front of sheds with rail lines but fork-lifts used most.

Agents have office on wharf with direct line to city office and outside lines.

Wooden piling which acts as fenders. Bollards of the large cleat type. Sufficient but not plentiful. Two linesmen each end when arriving and departing. No permanent cranes but mobile ones can be hired. Quay about 25 ft. above water.

Recommended not to walk about or up to bus especially at night. Better for 2 or more to get a taxi. Fairly good 3–4 dollars to Houston.

Seamans Mission near by. Very good, new and modern.

Tugs: Used for berthing and unberthing. Had 2 on arrival due to strong wind and close proximity of mast top to bridge.

Sailing had 1 tug lashed up alongside forward shoulder.

Tugs use own lines.

Bridge: There is a bridge above Upper Clinton Bend from Manchester on the South to Clinton Park on the North. This is a relatively new bridge to be passed under with a clearance of only 135 ft. Check the rise of tide on way up.

SHIPMASTER'S REPORT: August 1980.

Tenneco Terminal – Vessel discharged ammonia.

Approaches: BA. Chart 975.

The safety fairway is usually very busy and it is advisable to ensure that you are in fact keeping to the starboard side.

At the entrance to the fairways there are many oil rigs. With the predominately low lying coast, radar positions are extremely difficult. Satellite navigator is highly useful in this respect. The first good check is off the buoys in the final safety fairway. These showed on radar at about 7 miles.

Some radar echoes are received from Galveston itself.

The charted rigs in anchorage 'A' are in fact in those positions.

Pilotage: If anchored, the pilot boat will call vessel into the "Whistle Buoy" for boarding.

The cutter is a large, fast launch and usually lies inside until working a vessel.

Pilot ladder about 8 ft. from the water to clear the boarding platform.

Contact can be made via Galveston Pilots initially on Channel 16 who will relay the messages. Houston Pilots themselves work on Channel 14.

One Pilot, the length of pilotage is about four hours to the first line ashore. Two tugs used.

No night time pilotage for a vessel of this size (32,000 g.r.t.) and type. There is a TV video surveillance system operating throughout the length of the channel.

Berth: About 4 miles below Warren Terminal.

Plant and terminal now owned by Occidental (Oxy) but Tenneco rent the berth.

Berth is far too small for this vessel, at least as far as the moorings are concerned. Typical American 'T' barge jetty, the head of which is only about 25 m. long, with walkways leading to 3 dolphins at each end. The bow and stern overlap these mooring dolphins and head and stern lines are taken to posts on the river bank. These are only breast lines and it is advisable to make advance preparations to put out as many as 4 springs at each end. There is a great deal of traffic passing continuously.

Gangway: The gangway should remain stowed until in position. Whether vessel can use the accommodation ladder will depend on draft. If vessel deeper than 26 ft. there will not be sufficient clearance from the fender so a "B.O.T." type gangway resting on accommodation turntable will have to be used.

When the accommodation ladder is used it has to be turned through 120° and landed on the aft dolphin immediately adjacent to the jetty head.

Discharge: 12 in. flexible hose 150 ASA used. 'T' piece, two shore hoses.

Max. back pressure allowed is 50 p.s.i. Vapour return line is 4 in.

The plant ashore is only equipped to export cargo and its re-liquefaction plant is small.

A shore walkie-talkie is placed with the officer of the deck.

Discharge rate can vary (October 1979 – 260 t.p.h., August 1980 – 550 t.p.h.)

Shore surveyors figure taken for bill of lading. Density 1001.

USCG: No inspection prior to commencement, apparently this is normal. The port is far too busy for them to visit every ship. But be prepared, they are very particular on navigation equipment and Officers Certificates and experience.

General: It is possible to load bunkers by barge alongside the terminal if prior arrangements and permission are obtained but it depends on Agent and Authorities.

Fresh water is available from the jetty, at a very low rate.

Storing can present difficulties as the after crane does not plumb the dolphin. By arrangement, vessel can use shore crane when the operation is not too difficult.

Public telephone on dock – minimum charge 25c.

Liferaft service available, 24 hours service.

A considerable distance from the city, which rather complicates services and communications.

Agents leave a radio onboard for contact with Agent and office, but often outside range, office on maximum range.

No private transport (taxis) allowed into refinery area. Transport to the gate by their own minibus and then telephone for taxi. Crew transport service allowed into berth area with pass from Agent.

AUTHORITY: Port of Houston Authority.

HUENEME, California: 34.09 N. 119.12 W.

(See Plan Book)

DOCUMENTS: See "San Francisco".

PILOTAGE: It is requested that ships entering port stand by 1 mile off harbour entrance and await port Pilot who will board from a tug. The U.S. Coast Guard Station at the Channel Islands Marina maintains a radio beacon.

All vessels 300 gross registered tons and over entering, leaving and shifting within the Port of Hueneme, including area of the Oxnard Harbour District, must be piloted by a port Pilot duly licensed to perform the services of piloting vessels within the Port of Hueneme. The Oxnard Harbour District does not maintain Pilots; licensed Pilots are available on a 24-hour-a-day basis from the Commanding Officer, Naval Construction Battalion Center. As a service to all vessels, requests for Pilots may be made by Agent or ship to General Manager of Oxnard Harbour District, who will act for ship in obtaining necessary Pilots. They can also be obtained by an electronic message request addressed to "CO, CBCEN, PORHUE" or by direct request to the Port Services Officer, U.S. Naval Construction Battalion Center. It is not necessary to change Pilots at this port.

ANCHORAGE: If there is a wait for Pilot caused by weather, visibility, congestion in harbour, or any other reason, the best anchorage area is W.S.W. of the harbour entrance where there are no hazards and there is some protection afforded by the natural curve of the coastline.

RESTRICTIONS: The length of entrance channel is 2,300 ft. The narrowest width of harbour entrance channel is 330 ft. However, because of prevailing fresh winds, this is a one-way channel; thus, deep-draft ships not able to manoeuvre easily in a restricted channel have precedence over smaller craft.

RADIO: The U.S. Coast Guard Station, Channel Islands Marine, located at the entrance to harbour, guards the following frequencies: 2182 kc/s., 156.8 mc/s., and VHF Channels 12, 16, 21, 22, 23 and 83. After initial call up the Coast Guard can shift to 2670 kc/s., 2694 kc/s., 5080 kc/s. The Naval Construction Battalion Center (Port Hueneme Control) guards Channel 16. The harbour tugs guard Channel 16 continuously. The harbour Pilots, when expecting a commercial merchant vessel guard Channel 16 voice circuit and voice call "Port Hueneme Pilot".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Los Angeles Quarantine Station.

Ships required to pass quarantine may enter port and moor. "Q" Flag is to be flown. Upon mooring, ship must post gangway watch until ship has passed quarantine. When Port of Hueneme is its port of first arrival in the United States from foreign ports or from States other than California, a ship must be inspected by the Department of Agriculture. There is a local representative in Oxnard. The Oxnard Harbour District will order officials if requested by ship or Agent.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Tug services for Port of Hueneme are furnished by the Commanding Officer, Naval Construction Battalion Center, Port Hueneme, California. Requests for tug services may be made to the General Manager of the Oxnard Harbour District, who will act as Agent for ship in forwarding them. 2 tugs are available on a 24 hour basis. They are Class YTB, with 2,000 shaft horsepower. The number of tugs to be used on any movement is determined by port Pilot in charge of the movement. Tugs are not available for deep-sea towing, except in case of emergency to save life or property. As a service to all vessels, the Oxnard Harbour District, acting as Agent for vessel, will pay all necessary tug fees to United States Government, subject to reimbursement conditions as arranged between the vessel, her owners, or Agents, and the General Manager, Oxnard Harbour District. Seldom are tug charges more than the minimum due to the short transit time to berths.

BERTHING: Berthing arrangements should be made with the General Manager by Agent as far in advance of arrival date as possible, specifying dates of arrival and sailing, and nature and quantity of cargo to be handled. The Oxnard Harbour District also has a licence agreement with the U.S. Naval Construction Battalion Center, Port Hueneme, for the use of additional berths and terminal facilities on an "as available" basis. Prior arrangements must be made, should use of these additional facilities be desired or necessary. The Port of Hueneme has three 600 ft. berths with depth 35 ft. MLW and appropriate terminal facilities. At the present time there are 10 deep-draft berths within the entire port area.

Bottom is sand and mud. Mean low water is + 1.5 ft. Height of wharf above the MLLW is 13 ft.

STEVEDORES: All stevedore work is presently performed by resident stevedores, the Marine Terminals Corporation, who also have offices in San Francisco, Long Beach, etc. They maintain an office at 111 Ponoma Street, Port Hueneme. They provide modern handling equipment to suit cargo's need. There is no special fixed bulk handling equipment available as yet. Longshoremen are members of the International Longshoremen's and Warehousemen's Union and conform to the Pacific Coast Longshore Agreement. Hours of work are as outlined in this agreement. Longshoremen at this port do all covering and uncovering of hatches and rig the gear. There are 8 gangs available in the port. Day and night gangs for Tuesday through Saturday (except Monday through Saturday, 1900 hrs. initial start) must be ordered by 1500 hrs. the previous day. Night gangs required Monday for a 1900 hrs. initial start, and Sunday and Monday gangs must be ordered by 1100 hrs. Saturday. Cancellation time is same as ordering time, if gangs which have been ordered are cancelled after the aforementioned deadlines, the agreement's 4 hour minimum applies. Normal day shifts begin at 0800 hrs. and normal night shifts at 1800 hrs. Each shift consists of 8 hours and on sailing day 10 hours may be worked by the final shift. There are no obstructions on the wharf to keep all hatches from being worked concurrently.

MEDICAL: Patients are provided with medical attention at the Medical Center, Port Hueneme, or St. John's Hospital, Oxnard California. Temporary visa must be obtained from Department of Immigration and Transportation if a crew man or passenger must remain after the ship sails.

FRESH WATER: Fresh water is available. There are hydrants along the wharf and delivery to ship is effected by hose. Water is good to taste but is hard. It is suitable for boilers. Contact wharfinger on duty for delivery of water.

FUEL: Diesel oil and bunker fuel is available by pipe-line at Wharf No. 1.

REPAIRS: Minor repairs may be made in port. Machine shops in Ventura and Oxnard are qualified for normal voyage repair work.

GANGWAY/DECK WATCHMEN: Gangway or special wharf watchmen are available upon request.

TELEPHONES: 2 pay-telephone booths are located at the East end of Wharf 1 adjacent to the wharfingers office and one at the West end of warehouse No. 2 and maintained for the convenience of ships berthed at Wharf 1. The wharfinger's office has a telephone which may be used by people calling in to contact the ship. This phone is manned 24 hours a day for convenience. Its number is (805) 488-4615. The Port of Hueneme office telephones are available to ship's officers and Agents for local calls or collect long distance calls. Wharf lines permit a telephone to be installed at a nominal charge if desired by Agent.

HOLIDAYS: U.S. Federal and State holidays are observed by the Port and Terminal management. If stevedoring is required on holiday it is performed in accordance with the International Longshoremen's and Warehousemen's Union-Pacific Coast Longshore Agreement.

AUTHORITY: The U.S. Navy (Commanding Officer, U.S. Naval Construction Battalion Center) exercises overall Port Control Authority; the Oxnard Harbour District is solely responsible for its commercial operations.

Oxnard Harbour District Board of Harbour Commissioners, Port Hueneme.

AGENT: See "Los Angeles".

HURON, Ohio: 41.24 N. 82.35 W.

Refer to "St Lawrence Seaway" for important general information.

PILOTAGE: None required other than what is required for Great Lakes.

ANCHORAGE: Depth 3 to 10 fathoms.

MAX. SIZE: Length 716 ft., breadth 75 ft., draft 26 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Chicago Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: WMI Lorain.

TUGS: Meet vessel at the Pier Head. Use ship's lines.

BERTHING: Norfolk and Western Ore Dock, operated by the Lake Erie Dock Co., can handle 15,000 tons of ore in 8 hours. Ore slip is 1,400 ft. long with 26 ft. of water.

Limestone Dock, 700 ft. length with 26 ft. of water.

Grain loading facilities operated by the Pillsbury Company. Load speed, 20,000 bushels; unload speed, 15,000 bushels; berthing space, 832 ft.; max. length, 610 ft.

STEVEDORES: None available.

FRESH WATER: Available.

FUEL: None available.

IDENTIFICATION CARDS: Required by Immigration.

CONSULS: Nearest at Cleveland.

REPAIRS: No facilities.

REPATRIATION: No facilities.

AIRPORT: 50 miles from port (Cleveland International Airport).

POLICE/AMBULANCE/FIRE: 433-4114.

SHORE LEAVE: Allowed.

AUTHORITY: The Huron Joint Port Authority.

JACKSONVILLE, Florida: 30.20 N. 81.40 W.

(See Plan Book)

DOCUMENTS:

Public Health:

Maritime Quarantine Declaration Form HSM 13.19.

Customs:

3 U.S. Customs Manifests for cargo to be discharged at first port of entry.

2 U.S. Customs Manifests covering all other cargo on board vessel for discharge at other than first port of entry.

3 Stores Lists.

3 Crew Lists.

3 Passenger Lists.

3 Curio and Crew Personal Items Lists.

Vessel's Clearance from last port.

Vessel's Register and Load Line Certificate.

Vessel Utilization and Performance Report.

Form MA.578 for dry cargo vessels.

Immigration:

1 Certified Crew List and Landing Permit form I – 95A for each crew member.

Valid passport for each crew member.

PILOTAGE: Vessels approach Pilot Entrance Buoy STJ No. 2 (Red) approximately 6 miles at sea off jetty entrance to St. John's River. Pilot station located just inside jetty on river channel at Mayport Naval Station. Pilot station operates both VHF and UHF frequencies, VHF Channels 16 and 18 A. UHF Frequencies 2738 and 2182. Pilot cable address "Jaxpilot". Pilot boards from Pilot boat "Jaxpilot" just East of sea buoy STJ No. 2. Pilot boat does not maintain station at sea but answers call or is dispatched on information by vessels' Agents. Vessels anchoring awaiting Pilot should anchor as near entrance buoy as safely possible.

ANCHORAGES: 2 anchorages located inside harbour near dock sites with depth of about 31 ft.
RESTRICTIONS: For vessel drawing not more than 38 ft. water no restrictions and vessel can enter and clear harbour on 24 hour basis. Pilots and tug assistance available all hours day or night. Vessels drawing more than 38 ft. required to await tide.
MAX. SIZE: Draft should not exceed 38 ft. for dry cargo vessels and tankers.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Tropical Radio, Miami, Fla. Call letters WAX. Lantana Radio, Boynton Beach, Fla. Call letters WOE.
TUGS: Under normal conditions with vessels able to proceed under own power, tugs approach vessel in vicinity of pier at which vessel is to dock. Tugs use own lines but no charge made.
BERTHING: Vessels can dock day or night. Transit time from pilot station to berths about 2 hours.
Blount Island Terminal: Operator: Jacksonville Port Authority. Length of berth, 3,550 ft. Depth alongside at MLW 38 ft. (11.5 m.). Containers and general cargo are handled. One 45 gross ton Alliance container crane, 1×45 gross ton IHI container crane, 1×100-ton Clyde revolving gantry crane and 1×50-ton Clyde revolving gantry crane are available. 1 bridge crane with a span of 600 ft. and lifting capacity of 900 m. tons is available over the graving dock of Offshore Power Systems at Blount Island.

2 roll-on/roll-off ramps are available. 1 measures 234 ft.×18 ft. and the other 212 ft.×18 ft. These ramps are designed for use with vessels having side ports. Concrete roll-on/roll-of "T" platform 166 ft. long with 153 ft. swing area at West end of marginal wharf.

Also see "Developments".
Tallyrand Docks and Terminals: Operator: Jacksonville Port Authority. Length of berth 2,400 ft. Depth alongside at MLW 38 ft. Cargo handled – General, Cars, Lumber and Petroleum.

Also see "Developments".
Sealand Terminal: Operator: Sea-Land Service, Inc. Adjacent to Tallyrand Docks and Terminals (See Plan). Length 1,200 ft. Depth alongside at MLW 34 ft. 2 container cranes, capacity 27.5 tons and 30 tons.
8th Street Terminal: Operator Joyserv Ltd. Adjacent to Sealand Terminal (See Plan). Length of berth 707 ft. Depth alongside at MLW 34 ft. Cars are handled.
Commodores Point Terminal: Length of wharf 2,750 ft. Depth alongside 34 ft. Cargo handled: Oil, cement, general cargo and chemicals. Storage facilities: Charter Oil; 340,000 barrels. Glidden – Durkee: 60,171 barrels for chemical storage. Atlantic Cement; 6 silos capacity 40,000 tons. Universal Atlas Cement; 6 silos capacity 32,000 tons.
Jacksonville Bulk Terminals: A subsidiary of Occidental Petroleum. Length of loading berth 1,000 ft. Depth at MLW maintained at 36 – 38 ft. 2 fixed loading towers capable of loading vessel at a rate of 2,850 long tons of phosphate per hour. Maximum outreach 81 ft., clearance above MLW of 40 ft. Terminal also capable of loading superphosphoric acid, phosphate rock, zircon sand (of sufficiently low moisture), granular fertilizers, tachonite, ilmenitite and mullite. Storage facilities: 6 concrete silos, each with a designed capacity of 5,000 tons of phosphate rock. Six tanks with capacities of 15,000 tonnes of superphosphoric acid each.

Dunns Terminal: Length of wharf 1,000 ft. Depth 38 ft.

Celotex Corp: Tel. (904) 751-4800. Berth: 635 ft. (205 m.) with dolphins. Depth: 32 ft. (9.8 m.). Terminal for receipt of gypsum rock by self-unloading vessels.
BRIDGES: Only 1 bridge that vessel would have to negotiate and that only if docking at Commodore Point terminal.
STEVEDORES: Master should keep Agents closely advised by radio of ETA and any amendments to first ETA given. Recommended that Master give ETA 72 – 48 – 24 hours in advance to arrival. Enables ordering gangs or cancelling gangs ordered in event of delayed ETA.
MEDICAL: Hospital facilities available. International Vaccination Certificates required by all crew members.
TANKERS: All petroleum terminals provide own hose ranging from 8 in. to 12 in. Prior to arrival, Master should request information from Terminal Company size of connection required.

Private Terminals:

Amerada Hess: Tel. (904) 765-4427. Berth: 200 ft. (60.1 m.) with dolphins. Depth: 30 ft. (9.2 m.). Tank storage capacity: 460,000 barrels. Receipt of petroleum products.

Alton Box Board Company: Tel. (904) 353-3611. Berth: 750 ft. (230 m.) with dolphins. Depth: 24 ft. (7.2 m.). Receipt of residual fuel oil.

American Petrofina: Tel. (904) 355-3151. Berth: 262 ft. (80 m.). Depth: 35 ft. (10.1 m.). Tank storage capacity: 350,000 barrels. Receipt of petroleum products.

Eastern Seaboard Petroleum Company: Tel. (904) 355-9676. Berths 250 ft. (80 m.) with dolphins (1); 160 ft. (48 m.) with dolphins (2). Depth: 18 ft. (5.5 m.). Tank storage capacity: 1,266,000 barrels.

Shipping of petroleum products by barge; loading of barges for bunkering vessels at berth in the harbour; fueling of tugs and small vessels.

Gulf Oil & American Oil: Berth: 200 ft. (60.1 m.) with dolphins. Depth: 33 ft. (11.5 m.). Tank storage capacity: 900,000 barrels.

Gulf: Tel. (904) 765-5541.

American: Tel. (904) 768-2583.

Receipt of petroleum products and loading of barges.

Phillips Petroleum Company: Tel. (904) 353-6740. Berth: 205 ft. (60.2 m.) with breasting dolphins. Depth: 34 ft. (10.5 m.). Tank storage capacity: 243,000 barrels. Receipt of petroleum products.

Shell Oil Company Wharf: Tel. (904) 355-5521. Berth: 230 ft. (98 m.) with dolphins. Depth: 33 ft. (10 m.). Tank storage capacity: 448,500 barrels. Receipt of petroleum products; occasionally fuels towboats and loads barges for bunkering vessels at berth in the harbour. Light marine diesel fuel only.

Standard Oil Company Terminal: Tel. (904) 353-1094. Berths: Barge – 300 ft. (92 m.) with dolphins; Tanker – 760 ft. (230 m.) with dolphins. Depth: Barge – 10 ft. (3.1 m.); Tanker – 32 ft. (9.8 m.). Tank storage capacity: 595,000 barrels. Receipt and shipment of petroleum products. No bunkering of vessels.

Texaco Pier: Tel. (904) 356-6344. Berth: 550 ft. (167 m.) with dolphins. Depth: 32 ft. (9.8 m.). Tank storage capacity: 320,000 barrels. Receipt and shipment of petroleum products; fuels towboats.
DENSITY: Varies from fresh water 1.000 density to mixed salt water 1.0075 density. St. Johns River is fed from fresh water sources and for most practical purposes may be considered fresh.
FRESH WATER: Potable water is available through hose connections at all berths operated by the Port Authority. No water barges.
FUEL: Most grades marine fuels available ranging from bunker "C" to light marine diesels with intermediate blends in between. Most major oil companies have bunkering facilities.
FIRE PRECAUTIONS: No smoking except in officers' lounge and crew's lounge. No open flames. No sparking from funnel.
GANGWAY/DECK WATCHMEN: Watchmen services available but not necessary.
OPENING/CLOSING HATCHES: Crew may open hatches prior to vessel's arrival at dock. After arrival at dockside this work reserved for longshoremen. Vessels equipped with McGregor type or other automatic opening devices, crew may open hatches at any time. Longshoremen do not open and close these type hatches.
CERTIFICATES: Vessel Register, Load Line, Gear Certificate, Derat.
CUSTOMS ALLOWANCE: Tobacco: 200 cigarettes per man. If vessel remains in port over extended period of time, sea stores can be opened under Customs supervision and additional allowances made. Wine/Spirits: No specific limits as to quantity allowed per man; Customs accept Masters' recommendations for allowances so long as they are reasonable. This applies to beers, wines and spirits.
IDENTIFICATION CARDS: Form I – 95A only.
CONSULS: Norway, Denmark, Sweden, Finland, Italy, France, Guatemala, Uruguay, Dominican Republic, Germany.
REPAIRS: All types engine and deck repairs possible. 2 well-equipped shipyards.
DRY DOCKS: 3 large dry docks of 18,000 to 33,000 tons capacity and 6 smaller with capacity of 1,000 to 12,000 tons.
REPATRIATION: Facilities available to effect crew changes and repatriation.
AIRPORT: Airport 20 miles. Daily flights to all major U.S. cities.
TIME: Eastern Standard Time and Daylight Saving Time during Summer months late April through October.
HOLIDAYS: Holidays observed by Stevedores: New Year's Day (Jan. 1st); Martin Luther King's Birthday (Jan. 15th); Lincoln's Birthday (Feb. 12th); Geo. Washington's Birthday (Feb. 22nd); Good Friday; Memorial Day (May 30th); Independence Day (July 4th); National Election Day; Labor Day (First Monday September); Columbus Day (October 12th); Armistice Day (Nov. 11th); Thanksgiving (Fourth Thursday November); Christmas Eve, Christmas Day; New Years Eve.

When holidays fall on Sunday, the following Monday observed to the extent of paying overtime and 8 hour minimum pay period shall apply. No work performed on the following holidays: New Year's Day, Independence Day, Labor Day, Christmas Day.
POLICE/AMBULANCE/FIRE: Police 633 – 4111; Ambulance 633 – 2211; Fire 633 – 2211.
TELEPHONES: No facilities available for placing phones on board vessels except in shipyards.
SERVICES: Compass-Adjusting, radar, navigational equipment. No tank-washing or tank-cleaning services available.
SHORE LEAVE: No restriction on shore leave if not detained by Immigration.
REGULATIONS: No garbage to be disposed overside, no pumping of dirty ballast into river. Smoke emissions must be controlled to minimum.
DEVELOPMENTS: The entire river channel from the jetties on the Atlantic Ocean to Mile 20 has been dredged to a minimum depth of 38 ft. MLW.

At Blount Island Terminal an additional 1,200 ft. of berthing space is under construction.

A 50 ton revolving gantry crane is operational at Tallyrand Docks and Terminals.
AUTHORITY: Jacksonville Port Authority.

JUNEAU, Alaska: 58.18 N. 134.24 W.

Located at N.E. side of Gastineau Channel, 8 miles from Stephens Passage. Juneau is the capital of Alaska. Open all year.
APPROACHES: Via Chatham Straits, Lynn Canal and Stephens Passage.
DOCUMENTS: See "Anchorage, Alaska".
PILOTAGE: Pick-up point is Guard Island.
ANCHORAGE: 16 fathoms in centre of Juneau Harbour.
MAX. SIZE: Harbour depth 15/19 fathoms. Tides: diurnal range 16.4 ft. Also see "Berthing".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
CUSTOMS: Quarantine, Immigration and Customs, local.
BERTHING:

1. Foss Alaska Line Dock: berthing length 550 ft. 36 ft. LW. No cranes.
2. Juneau Cold storage (capacity 8,000,000 lb.): berthing length 250 ft., 36 ft. LW. Cranes, 2 electric hoists, 3 lift trucks, 40,000 sq. ft. covered shed space. Fresh water.
3. Juneau Ferry Terminal: berthing length 350 ft. 32 ft. LW. No cranes. This is a roll-on, roll-off facility for wheeled vehicles and self-propelled or towed. 35 tons capacity. No covered shed space. Fresh water.
4. Coast Guard Dock: 750 ft. long, 31 ft. deep at face. No storage.

5. Trucano Construction Co. Dock: Length 500 ft. Crane with 90 ft. boom available, capacity 50 tons.
STEVEDORES: 1 gang.
REPAIRS: Engine repairs possible.
WATER: Available.
FUEL: Available.
MEDICAL: Hospital available.
TRANSPORTATION: Air and ferry.
DEVELOPMENTS: Berner's Bay under construction 40 miles North, will produce pulp and lumber for export.

KAHULUI, Hawaii: 20.53 N. 156.28 W. (See Plan Book)

DOCUMENTS:
4 Crew Lists.
4 Passenger Lists.
Customs Documents.
Clearance, Travelling Manifest.
Local Manifests.
Health Documents.
Bill of Health and Vaccination Certificates.
4 Manifests.
4 Bills of Lading.
Certificate of Registry.
Annual Inspection Certificate.
Load-line Certificate.
Derat Certificate.
Radio Certificate and Licence.
4 Store Lists.
PILOTAGE: Request for Pilot normally made through Agent or through Captain K. Bohlin, Tel: 572-7343. Contact Pilot on VHF Channel 12 or 16. 25 ft. pilot boat, yellow hull. Pilot boards 0.25 mile East of Waihee Reef lighted buoy No. 2. Anchorage 0.5 mile East of buoy.
ANCHORAGE: No anchorage inside breakwaters. Only anchorage 0.5 mile East of Waihee Reef lighted buoy No. 2 in 9 to 12 fathoms.
RESTRICTIONS: 24 hours notice of arrival is obligatory. No tide restrictions.
MAX. SIZE: Max. length 700 ft. Max. draft 32 ft. 6 in.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Honolulu Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Communicate through RCA or ITT stations in Honolulu.
TUGS: 1 × 1,500 h.p. tug stationed at Kahului. Additional tugs dispatched from Honolulu if necessary. Tug joins vessel between breakwater and Waihee Reef lighted buoy No. 2 Tug's lines normally used. No extra charge.
CARGO HANDLING: Kahului has 1 berth specially equipped to load bulk sugar. Matson Navigation Company operates a straddler to move Matson containers. Ramps are in place at Pier No. 1 for Matson roll-on/roll-off vessels.
STEVEDORES: To be ordered by 1500 hrs. of day prior to operations.
MEDICAL: Hospital facilities available.
TANKERS: Discharge only. 8 in. line for heavy fuel oil, 6 in. lines for light fuel oils. No slop discharge facilities. 2 berths available for tankers, max. draft 32 ft. 6 in.
FRESH WATER: Available from water line at each berth. Rate of delivery about 150 gallons per minute.
FUEL: Small amount of diesel fuel and heavy fuel available in an emergency only.
GANGWAY/DECK WATCHMEN: Services of watchman recommended, usually arranged by Agent.
OPENING/CLOSING HATCHES: Normally carried out by stevedores.
CUSTOMS ALLOWANCE: 200 cigarettes, 50 cigars per man, and 1 bottle wine or spirits.
REPAIRS: Minor deck and engine repairs only.
AIRPORT: Distance to airport 1 mile. Served by regular airlines.
TELEPHONES: Arrangements made with Hawaiian Telephone Co., to install on board.
DELAYS: Occasional delays due to limited berthing space and shortage of stevedore gangs.
POLICE/FIRE/AMBULANCE: Police 911; Ambulance 911; Fire 911.
TIME: GMT minus 10 hours all year round.
AUTHORITY: State of Hawaii, Dept. of Transportation, Harbors Division, Kahului.

KETCHIKAN, Alaska: 55.20 N. 131.38 W.

DOCUMENTS: See "Anchorage, Alaska."
APPROACHES: Port located on Revillagigedo Island. Open all year round. Ships coming from Hecate Straits or outside Graham Island proceed into Dixon Entrance to vicinity of Guard Island where the Pilot will meet them.

Vessels coming up the inside passage from Vancouver, B.C., are met at Lucy Island pilot station.

PILOTAGE: South Eastern Alaska Pilots Association, Box 1539, Ketchikan, Alaska 99901. Telegraphic address; Alaska Pilots Ketchikan.

The Alaska Pilot Service required 5 days, 48 hours, and 12 hours advance notice of ETA and can be contacted on Channel 16 VHF or 2182 kHz.

The pilot boat "Magdalene" (WA 7513) normally rendezvous with the vessel 0.75 miles from Guard Islands.

ANCHORAGE: Safe anchorage can be obtained in the area for deep-draft vessels; however there are no specified anchorage areas.
MAX. SIZE: The largest vessel to be berthed to date is a 26,000 ton freighter; however larger vessels could be accommodated.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Cables to Agent, Receivers, and Pilots can best be routed through AKM Juneau.
TUGS: Tugs can be arranged through the ship's Agent. Lines from tug are normally used with no additional charge.
BERTHING: Alaska Line Dock: berthing length 400 ft., depth 26 ft. at North end, 39 ft. at South end at low water, no cranes.

Talbots' Inc: private berth length 300 ft., depth 35 ft. low water.

Ketchikan Spruce Mill: berthing length 450 ft., depth 33 ft. low water. Height of pier at low water 22 ft.

Ketchikan Pulp Company (at Wards Cove, 6 miles North of Ketchikan): private dock, berthing length 800 ft., depth 33 ft. at low water. 50 ton crane on rails, also mobile units and fork lifts.

City Dock: Length 550 ft., depth 36 ft.

STEVEDORES: Stevedores obtained through shipping Agent. 24 hours notice normally required.

4 or possibly 5 gangs available dependent on obtaining casual labour.

MEDICAL: Medical matters may be referred to shipping Agent. Excellent hospital and out-patient treatment facilities are available.
FRESH WATER: Ample fresh water available at no cost.
FUEL: Fuel available for deep-draft vessels: No. 2 Diesel and gasoline.
TANKERS: Tow-away lines (fire wires) required fore and aft.
GANGWAY/DECK WATCHMEN: Recommend security watch for passenger vessels. Watchmen can be arranged through the shipping Agent.
OPENING/CLOSING HATCHES: Done by longshoremen.
IDENTIFICATION CARDS: Crew identification cards are required by Immigration officials.
CONSULS: The nearest Consul is in Anchorage, Alaska.
REPAIRS: Repair facilities are limited. Excellent welding and machine-shop services are available, however.
REPATRIATION: Repatriation matters can be handled through the shipping Agent and Immigration officials.
AIRPORT: Daily flights to and from Seattle as well as points North may be obtained.
TIME: Ketchikan is on GMT minus 8 hours during the Winter and GMT minus 7 during the Summer. Time changes the third Sunday in April through the third Sunday in October.
AUTHORITY: Supervisor, U.S. Coast Guard, Marine Safety Detachment, c/o U.S. Coast Guard Base, Ketchikan, Alaska.

KINGS BAY, Georgia: 30.49 N. 81.31 W.

NO LONGER A PUBLIC PORT FACILITY.
DOCUMENTS:
Crew List, from foreign movements, 1 Crew List visaed by American Consul in or near foreign port of departure; Coastwise, U.S.A., 3 copies, 1 for Customs, 1 for Immigration and 1 for the Agents' office.
Curio List, 3 copies, both from foreign and coastwise movements.
Stores List, 3 copies, both from foreign and coastwise movements.
5 copies of Foreign Manifest.
Permit to sail from foreign.
International Vaccination Certificates and/or other health certificates.
PILOTAGE: Channel entrance is between Cumberland and Amelia Islands, and is approximately 11 miles in length, 200 ft. wide and 32 ft. deep at MLW. Kings Bay Pilot usually boards vessels at the St. Mary's Entrance Sea Buoy No. 1 or 1 mile East of St. Mary's Entrance Buoy No. 2. Pilot may be reached by marine phone (ship-to-shore), Fernandina Beach, Florida, tel. 261-3824 or 261-3495. There are 2 turning basins, one 2,400 ft. long by 800 ft. wide with project depth of 32 ft. at MLW, and the other is 1,996 ft. long by 800 ft. wide with project depth of 32 ft. at MLW.
ANCHORAGE: 2, capable of handling deep draft vessels. Pilot handles this phase.
MAX. SIZE: 650 ft. in length, project depth 32 ft. at MLW.
HEALTH: See "Health: All Ports" before first U.S. port Albany). Illness reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Kings Bay has only marine ship-to-shore telephone facilities. Cables arrive through R.C.A. Communications via Lantana, Fla., Radio, and Chatham, Mass., Radio via Western Union.
TUGS: Available from Brunswick.
BERTHING: Daylight berthing and sailing only.
STEVEDORES: All stevedoring performed by St. Mary's Stevedoring Company, St. Mary's, Ga., on high explosives. General cargo outside stevedores permitted.
FRESH WATER: Plenty of fresh water available, pumped into ship's tanks via hose.
FIRE PRECAUTIONS: Smoking in the warehouses, on wharf or on any vessel while unloading or discharging any inflammable or explosive cargo is strictly prohibited. In the event of a fire occurring on board any vessel berthed at the Kings Bay Marine Terminal, except vessels under way, such vessel may sound 5 prolonged blasts of the whistle or siren as an alarm indicating fire on board or at the dock to which the vessel is moored. Fire hose on dock and water running therefrom when loading plus fire extinguishers placed at various intervals.
GANGWAY/DECK WATCHMEN: Not required.
OPENING/CLOSING HATCHES: Crew open, stevedores close.
CUSTOMS ALLOWANCES: Tobacco and wine/spirits – reasonable quantities for personal use.
IDENTIFICATION CARDS: Immigration issues landing permit.
REPATRIATION: Via airlines at Jacksonville, Florida, 41 miles away.
TIME: Eastern Standard Time.
HOLIDAYS: New Year's Day (1st January); Lincoln's Birthday (12th February); Washington's Birthday (22nd February); National Memorial Day (30th May); Independence Day (4th July); Labor Day (1st Monday in September); Colombus Day (12th October); Thanksgiving Day (4th Thursday in November); Armistice Day (11th November); Christmas

Day (25th December). In the event of one of the above holidays falling on a Sunday, the following Monday will be observed.
POLICE/AMBULANCE/FIRE: Police Departments St. Mary's and Kingsland, Ga., plus County Sheriffs. Ambulance, Kingsland. Fire, both Kings Bay and St. Mary's Ga.
TELEPHONES: Only 3 lines and all in office of Blue Star Shipping Co. No telephone service to be placed on board vessel.
SHORE LEAVE: Only via Immigration landing permit. No taxi service, no bus lines operate from Kings Bay, Ga. Since nearest town is 11 miles away, crew as a rule remain aboard vessel.

KODIAK, Alaska: 57.47 N. 152.24 W.

Located near the N.E. tip of Kodiak Island in the Gulf of Alaska, South of Anchorage and East of the Alaska Peninsula.
APPROACHES: South of Trinity Islands then N.W. to Cape Chiniak and meet Pilot.
DOCUMENTS: Also see "Anchorage, Alaska".
PILOTAGE: Pick-up point in the vicinity of Cape Chiniak.
ANCHORAGE: Fair weather anchorage only.
MAX. SIZE: Harbour depth in excess of 30 ft. Tides; diurnal range approximately 10 ft. Also see "Berthing".
HEALTH: See "Health: All Ports" before first U.S.A. ports (Albany). Illness reports made to Anchorage Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
CUSTOMS: Quarantine, Immigration and Customs, local.
TUGS: From Anchorage.
BERTHING:

1. Kodiak City Dock: made of timber, pile and steel deck. 1 berth only. 350 ft. by 50 ft. Covered warehouse on half of pier 200 ft. by 150 ft. 35 ft. MLLW. Heated space available.
2. Woman's Bay Naval Base: Finger Pier 600 ft. operated by U.S. Navy. Depth of water in excess 40 ft. U.S. Navy permission required for commercial use.

STEVEDORES: 2 gangs.
REPAIRS: Limited. Divers available.
WATER: Available.
FUEL: Light fuels only.
MEDICAL: 26-bed hospital, 3 doctors, 2 dentists, 1 optometrist.
TRANSPORTATION: Air and ferry.

LAKE CHARLES, Louisiana: 30.13 N. 93.15 W.

(See Plan Book)

PORT LIMITS: Buoy No. 26, In Calcasieu Ship Channel, 3 miles off Cameron, Louisiana.
DOCUMENTS:
U.S. Customs: If foreign cargo on board for discharge at any port:

3 copies of Cargo Manifest of all Cargo.
3 copies of Crew List.
3 copies of Store List.
3 copies of Curio List (crew personal effects).
3 copies of Passenger List if carrying passengers.

If vessel in ballast, only 2 copies of above documents required.

If vessel in ballast and carrying passengers, 3 copies of above documents required.

1 copy of Clearance from last port.
2 copies of Customs Form 1300 (Master's Oath).
2 copies of Customs Form 1301 (General Declaration).

U.S. Customs Boarding Officer must examine Load Line Certificate. Safety Equipment Certificate, Tonnage Tax Receipt, Certificate of Financial Responsibility (Oil Pollution), Ship's Register, an Ship's Certificate of Nationality (if any).

2 copies of Customs Form 721 (Inbound Utilization Report).
1 copy of Certified Crew List (If American Ship).

Bonded lockers will be sealed by Customs.

U.S. Immigration:

1 copy of Visaed Crew List from Ameican Consul at foreign port of clearance (if any).
1 I-95 (Identification Card) for each crew member on board.

All passports must be validated for each crew member.

U.S. Bureau of Etomolgy:

All meat lockers and freezers with restricted meat will be sealed. All fruit from prohibited countries will be confiscated. All animals or birds from foreign countries must remain on board.
PILOTAGE: Radio Agent ETA, who will arrange Pilot board at Calcasieu Bar.
ANCHORAGE: At Calcasieu Bar only.
RESTRICTIONS: Entrance channel 40 ft. depth. Distance 40 miles.
MAX. SIZE: 1,000 ft. length, 38 ft. draft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.
AGRICULTURE: See "Agriculture" before first USA port (Albany).
RADIO: Tropical – New Orleans, WNU.
VHF: Pilots may be contacted on Channel 12, 13, 65 and 66.
TUGS: Meet vessel 30 minutes away from berth. Use tugs' own lines. 2 for berthing, 2 for unberthing.
BERTHING: General Cargo Berths: 10 with total length: 5,675 ft. All have draft of 36 ft. (fresh water).
CRANES: Mobile pneumatic and track cranes available with lifts up to 50 tons.
BULK HANDLING FACILITIES: 3 bulk-loading berths: No. 1, West bank of Calcasieu River, 8 miles below main port facilities, 960 ft. length, 35 ft. depth, loading rate 1,250 t.p.h.

No. 2, Contraband Bayou Section, main port, 920 ft. length, 35 ft. depth, loading 480 t.p.h. 1,600 tons storage facilities.

No. 3, Contraband Bayou Section, main port, 320 ft. length, 35 ft. depth, loading rate (bulk rice) 180 t.p.h. from stationary tower. Twin 1,250 tons storage tanks adjacent.

No. 4, Bulk unloading facility, length 850 ft., depth 30 ft. Barite and petroleum coke unloaded, rate 250 t.p.h.
SPECIALIZED CARGO HANDLING FACILITIES: 1 berth suitable for Roll-on/Roll-off traffic. 2 berths at main port for liquid chemicals, No. 5 for creosote oil import and No. 6 for import/export. Private berth to be constructed for private firm for receiving LNG.
BRIDGES: 1 with vertical clearance of 135 ft.
STEVEDORES: Notice of firm ETA and request for gangs must be received prior to 1600 hrs. CST for work following day.
TANKERS: Cities Service Oil Co. B-Dock, 673 ft. length, 36 ft. depth; C-Dock, 660 ft. length, 34 ft. depth; D-Dock 665 ft. length, 36 ft. depth. Also see "Shipmasters Report No. 1".

Continental Oil Co. Berth 1, 1,000 ft. length, 40 ft. depth; Berth 3, 1,000 ft. length, 40 ft. depth.

Columbia Southern Dock, 700 ft. length, 40 ft. depth.

Olin Mathieson Dock, 400 ft. length, 28 ft. depth. Also see "Shipmaster's Report No. 2".
MEDICAL: Hospital facilities available.
DENSITY: Saltwater in Summer, fresh water in Winter. Allow density 1000 for drafts.
FRESH WATER: Available at all berths.
FUEL: Bunker "C" and diesel available at Cities Service berths; other berths served with bunkers by barge.
FIRE PRECAUTIONS: Usual.
DRY DOCKS: None.
SURVEYORS: National Cargo Bureau.
GANGWAY/DECK WATCHMEN: Not required.
HATCHES: Rigging performed by stevedores. McGregor-type hatches opened by crew, others by stevedores.
CARGO GEAR: Shore cranes available at ship's request.
CUSTOMS ALLOWANCE: At the discretion of Customs officers. Normal allowance is 200 cigarettes or 2 lb. tobacco and 1 quart wine or spirits per man. Additional allowances may be given if considered necessary, due to length of vessel's stay in port.
REPAIRS: Small repairs carried out only; very limited facilities.
REPATRIATION: Facilities exist. Arrange through Agent.
AIRPORT: 7 miles from port. 2 lines (TI, OQ) 15 flights per day.
TIME: CST, that is GMT minus 6 hours.
HOLIDAYS: Only 2 days affected on which no work carried out – Labor Day and Christmas Day.
POLICE/AMBULANCE/FIRE: Police, 439-4511; Ambulance, 477-5530; Fire, 433-4633.
TELEPHONES: None on board ship.
SHORE LEAVE: Allowed if not detained by Immigration.
IDENTIFICATION CARDS: Standard U.S. Immigration Forms I-95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I-95, issued for the same vessel.
DELAYS: Very few delays encountered at any berth.
DEVELOPMENTS: High speed facility for loading wood chips and Grain elevator in operation.
SHIPMASTER'S REPORT No. 1: 1977.

Cities Services Oil Co., Clifton Ridge:
Location: 30° 09′ 32″ N., 93° 19′ 30″ W.
Max. Size: Length 805 ft., beam 115 ft., draft 39 ft. (FW).
Density: 1005.
Restrictions: Vesels may berth and unberth at any stage of the tide day or night.
Anchorage: At Bar: 2 miles East of seabuoy in depth of 42 ft. For Bunkering: South of Clooney Island in Old Calsasieu River Channel in midstream.
Distance to Berth: Seabuoy to berth 45 miles.
Terminal Information: 2 × 10 in. Chiksan arms. Max. discharge pressure 150 p.s.i. Derricks not required. Accommodation ladder not required.
Services: Fresh water, provisions, fuel oil, diesel and lube, doctor, hospital, airport and laundry.

The following services are not available: Repairs, drydocks, Lloyd's Surveyor and slop tanks.
Telephone Numbers: Dock 318-583-2432. Terminal Supervisor 318-491-6121, 491-6437.
SHIPMASTER'S REPORT No. 2: 1979. Olin Chemical Berth.
Approach: If without Loran "C" or satellite navigator the approach at night can be awkward, best made in daylight.

Due to flat coastline, lack of European navigation aids (Decca and Racon) plus numerous oil rigs the entrance to Calcasieu River (like Sabine) is difficult to make.

Calcasieu and Sabine D/F good.

Numerous oil rigs South of buoyed channel which are either side of safety fairway. This corridor can be clearly seen on radar and provides a good longitude.

The soundings, in particular the 100 fathom line, give a good latitude.

The wreck buoy on chart 975 – Approach to Calcasieu River at 29° 19.5′ N., 93° 12′ W. has been removed.

'CC' buoy was picked up at 6 miles.

Pilot/Channel: (B.A. chart 975). The channel is easy to follow as long as US system of buoyage is remembered. Vessels under 30 ft. can go out of the channel on their starboard side leaving starboard hand buoys to port. This is quite in order up to Pilot Area No. 1. Do not go on port side or West as this is spoil ground.

A Westerly current sets across channel 90% of the time and up to 1 knot. The boarding area is as Vol. No. 6 ALRS. If vessel takes a Pilot at Area No. 3 it costs $300 more than No. 1 (not necessary unless vessel restricted by draft – 24 hour service).

Pilot boat is an ex-fishing cutter. White, very fast and strong. Minimum notice for Pilots: Boarding at Area No. 1 four hours, Area No. 3 six hours. For sailing from Lake Charles 2 hours. From Area No. 1, one Pilot to Lake Charles, from Area No. 3, two Pilots. Pilot will *not* use hoist.

VHF: Calcasieu Pilots Channels 12, 13 and 16. Difficult to contact pilot station until well into channel North of 'CC' buoy.

Public Correspondence: Several stations in area – Port Arthur, Cameron, Erath, Lake Charles, a number, notably Erath and Lake Charles have the 80 Channels which they use in preference to 20 Channels. Very busy, but if you search around you can get through fairly quickly. As with all U.S. Marine Operators, overseas ships have difficulty if not calling 'Collect'.

Calcasieu Channel: About 35 miles to Lake Charles from breakwaters. 5 hours from Pilot Area No. 1 to 'Olin' Chemical Dock.

With Northerly wind and heavy rain on ebb, a current of up to 5 knots at Cameron at entrance just North of breakwater.

Bridge: Highway 102 gives 135 ft. clearance HW. 3.75 hours North of breakwater.

Draft: Max. transit draft of 38 ft. 6 in. (FW) from No. 30 buoy to Lake Charles Docks. We consistently had 39 ft. on echo sounder.

Tugs: 2 tugs of 2,500 h.p. and 3,200 h.p. secure in American style, port side, at bridge 102 and leave in same area.

Berthing: OLIN Chemical.

Dock: At head of seagoing navigation at bridge interstate 10. In cut, so no traffic passing. New concrete pier upgraded from barge dock. Min. depth 30 ft. Head in, starboard side to. Vessel left at 0200 hrs. without difficulty.

Moorings: 3 headlines, 2 breast lines and 2 springs each end. Springs go on to bollards on the jetty and breast lines and stern lines on to hooks on the bank.

Cargo Hoses: 8 in. × 300 ASA and spool piece to 12 in. × 150 ASA. 3 lengths, ship connects. Takes about 1 hour to connect and disconnect.

VRL: No.

Venting: No, on shore there are detectors on the tanks for ammonia. Generally the wind is onto the works which makes the detection of venting immediate. Vessel has to wait for a change of wind from the North.

Samples: Taken by chemist of tank atmosphere before loading. Must have min. 97% NH_3 by volume before loading.

Rate: Max. 330 t.p.h. (15 minutes of notice if possible, to stop).

Nitrogen: Available but not for hose purge.

Fresh Water: Water on berth very acid. Difficult to get hold of fresh water barge.

Stores: Ship's crane can reach end of jetty. Also small crane on hose platform on jetty which can be used for stores. Lorry cannot get to ship's side.

Gangway: No difficulties. Some ships have to use pilot ladder.

Developments: A new LPG dock at Beacon 85/86 about half way up the canal owned by Cities Service Oil Co. To be commissioned early 1980. Good mooring facilities. 1 Chicksan. Dredged area 1,000 ft. long, 45 ft. deep.

AUTHORITY: Lake Charles Harbour and Terminal District, Director of Port.

LONG BEACH, California: 33.45 N. 118.13 W.

(See Plan Book)

DOCUMENTS:

Certificate of Registry.

International Load Line Certificate – Tonnage Certificate (Admeasurement).

Inspection Certificate.

Derat certificate.

Radio Safety Certificate.

Inbound cargo for discharge – United States must have a Travellers' Manifest (Form 7527), original manifest, and dock inspection copy covering cargo to be discharged at first U.S. port of entry, Custom's Utilization Form 1302 (Inbound), Form 1302A (Outbound) must be filed within 10 working days after vessel's entry at first U.S. port. Landing permits must be made out prior to arrival (Form 5129) for each crewman of alien origin for the U.S. Department of Immigration (and Form I-418 for each passenger of alien origin). 3 sets of crew lists (Form I-418) must be presented to U.S. Customs, plus 2 sets to the Immigration Inspector, and 1 for the U.S. Public Health Service (Quarantine), and 3 sets stores lists plus 3 sets curio purchases list for U.S. Customs.

American Ships from Foreign:

Safety Equipment Certificate.

Cargo Ship Safety Construction Certificate.

Customs Form CF 226 Affidavit of Repairs Abroad.

Certified Crew List.

Foreign Ships:

1 copy of Visaed Crew List for Immigration (Form I-418 & 5 copies). Other forms may be necessary under certain circumstances, but normally can be taken care of after the vessel's arrival.

If a foreign vessel from a foreign port departs for a foreign port, 2 copies of (Form I-418) covering crew changes in the United States must be submitted to the Department of Immigration upon sailing of the vessel.

- *(a)* Number of copies required: all single except as noted.
- *(b)* The reports mentioned above are all government laws, requested by U.S. Customs, U.S. Immigration, Department of Agriculture, Public Health Service, and B.I.A.
- *(c)* Purpose of documents: to record all vessel movements such as cargo, crew changes, health standards, etc.
- *(d)* Procedure of presenting documents: documents must be presented to Quarantine Boarding Officer and Customs Broker and/or Agent, during or immediately after Quarantine.

PILOTAGE: Pilots ordered by local Agents. Order placed by telephone to 435-6354. Local tariff requires 1 to 2 hours notice prior to arrival. Pilot station contacted on VHF radio Channel 12 (156.6 mHz) or Channel 16 (156.8 mHz). Call sign KMA – 372 Long Beach Pilots. Pilot boats motor cruisers, light grey, fly International Flag "H". Local whistle signal for a Pilot on ship's whistle, 1 short and 1 long blast. Pilot boat normally meets vessels in vicinity Long Beach Sea Buoy or approximately 1 mile South of breakwater entrance. Vessels should have a Pilot ladder on starboard side, weather permitting. In bad weather vessels may be required to proceed inside breakwater entrance prior to Pilot boarding.

ANCHORAGE: Preferably outside anchorage approximately 0.5 mile S.E. of Long Beach Sea Buoy in 66 ft. of water. Inside anchorage available N.E of channel in outer harbour at approximately 8 fathoms of water depth. Special explosive anchorages available by request, on both sides of entrance channel in 48 ft. of water.

RESTRICTIONS: Vessels with dangerous cargoes aboard or loading or discharging such cargo within port district shall obtain permit from U.S. Coast Guard, countersigned by Long Beach Fire Prevention Bureau and Long Beach Port Authority, subject to safety inspection prior entry to assigned anchorage or berth. (Application for entry or handling dangerous cargoes must be requested by Steamship Company or authorised Agent and approved prior entry.)

Also see "Tankers" last paragraph.

MAX. SIZE: (1) Designed depth of water at general cargo berths is 30 – 36 ft. at MLLW.

The Entrance Channel is maintained at 60 ft. MLLW.

(2) No restriction as to length or breadth of vessel at general cargo berths.

(3) Dry bulk facility berths designed depth at MLLW is 42 ft. No restriction on length. However, ships with over 130 ft. beam might experience some difficulty in loading without turning ship.

There are 5 bulk oil facilities, 2 with 55 ft. of water at MLLW and 3 with 49 to 37 ft. of water at MLLW alongside berths. It is feasible that vessels over 1,000 ft. in length could use the deep-water oil facilities. There are no restrictions as to beam.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Los Angeles Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Station KOU Marine Operator, San Pedro.

Channel 1 — ship transmit on 2009 kHz
ship receive on 2566 kHz

Channel 4 — ship transmit on 2126 kHz
ship receive on 2522 kHz

Station KOU also monitors Channel 16 (156.8 mHz) and Channel 26 (157.3 mHz) for distress, safety and calling.

RADAR/VHF: Radar service provided to vessels only if Pilot aboard, in which case radar advisory information will be fed from shore-based radar at Pilot station.

Station	*Channel*	*Frequency (mHz)*
Distress, Safety and Calling	16	156.8
Marine Exchange	12	156.6
	14	156.7
Long Beach Pilots	12	156.6
Los Angeles Pilots	14	156.7
Harbour Tugs	65	156.275
	77	156.875
Crowley Towing & Transportation "Red Stack Tugs" Company Office	10	156.5
Universal Marine	18A	156.9
Wilmington Transportation Co. Company Office	7A	156.35
H-10 Water Taxi	7A	156.35
San Pedro Telephone	26	157.3
Marine Operator Station KOU	24	157.2
Mandatory Bridge to Bridge	13	156.65

TUGS: Tugs will meet vessel inside breakwater prior reaching inner harbour area. Pilot and tugs are in communication.

BRIDGES: No restrictions into port of Long Beach. The Gerald Desmond Bridge over Back Channel has vertical clearance of 155 ft. Cerritos Channel which connects Long Beach through back channel to Port of Los Angeles has 2 bridges which must be opened for passage of vessels.

Signal for Opening: 3 long blasts on horn or whistle. During inclement weather, call through a megaphone or loud and distinct stroke of bell.

BERTHING: No requirements as to time of entry providing berthing arrangements have been made with Port Authority. Assignments classified as follows:

Preferential Assignments. Secondary Assignments, Subordinate Right granted for use of Preferential Assigned Berth. Temporary Assignment – temporary permission granted to use certain berth.

Note: All berth assignments shall be held by Assignee subject provisions of Port of Long Beach Tariff as to charges, rates, rules and regulations applicable thereto, and to all of terms, conditions and provisions contained in such assignment.

General Cargo:

	No of berths	*Total length (ft.)*	*Depth (ft.)*
Pier A	10	6,312	30 – 36
Piers B, C	10	6,582	32 – 33
Pier D	2	1,229	36
Pier F	4	2,467	32 – 36
Piers 1 and 2	6	3,000	36

BULK HANDLING FACILITIES: *Berth 28 – 29:* Length 993 ft., depth alongside 43 ft. 1 fixed bulk loading tower with hinged cantilevered boom with 31 ft. 6 in. outreach. Max. loading rate 800 t.p.h. Cargo handled: Borax, coke, pitch, potash, soda ash and zinc ash.

Berths 30 – 31: Length 992 ft., depth alongside 43 ft. 3 electric, travelling, revolving, high-tower, full-portal gantry cranes, each with lifting capacity of 30 tons. Cranes can be equipped with buckets and hooks, or electric magnets. Loading rate 200 t.p.h. each crane. Types of cargo handled: steel and iron scrap, pig iron, steel slabs, ore, urea, bauxite, rutile sand.

Berths 210 – 211 (Grain Terminal); Length 1,100 ft., depth alongside 40 ft. Travelling Gantry ship loader having a loading capacity of 65,000 b.p.h. connected to an overhead shipping gallery and belt conveyor system. This belt conveyor system connects to another transfer gallery extending from the grain elevator and silos (2,225,000 bushel storage capacity).

The grain terminal is equipped with the latest state-of-the-art dust collection system. There is an aerveyor system for ship discharging.

Berths 212 – 215 (Bulkloader); Length 2,110 ft., depth alongside 34 ft. Depth 9 ft. off the berth is 40 ft. Breasting camels 20 ft. wide available. Stockpile area 85,682 sq. ft. (7,960 sq. m.). 1 electric, travelling, bulk shiploader with retractable, straight-line bridge boom having 58-ft. outboard reach-height of 60 ft. above MLLW. Boom equipped with 48-in. electric belt conveyor and a telescopic loading spout with mechanical trimming head. Loading rate 4,000 long tons per hour. Shiploader travels along rear of face for distance of 1,485 ft. Bulk materials are handled by 48-in. and 54-in., electric belt conveyor system extending to shiploader through tunnel reclaim from car unloading sheds and storage areas. Types of cargo handled: iron ore, coke, coal.

Open storage: 225,000 tons.

Covered storage: 270,000 tons.

CONTAINER HANDLING FACILITIES: *Berths 227 – 228:* Length 1,100 ft., depth alongside 42 ft. Pier G expansion: New land has been created on the East side of Pier G to provide for a 36.5-acre (26.3 hectares) container terminal which is leased to Sea-Land Service Inc. This terminal is complemented by an adjacent 16.3 acre, (6.6 hectares) container freight station, also leased to Sea-Land. The project includes a reinforced concrete wharf, 4 travelling 30 long ton container cranes with 100 ft. span and 115 ft. outreach, surfaced storage area. There is space for storing 3,670 TEU containers, including 242 spaces for refrigerated containers.

Berth 229: Length 750 ft., depth alongside 42 ft. 28.5 acre container terminal leased to Maersk Line. The project includes 2 travelling 30 long ton container cranes, plus surfaced area and space for storing 2870 TEU containers including space for refrigerated units.

Berth 230: Length 750 ft., depth alongside 42 ft. 2×30 long ton, travelling container cranes with 100 ft. span and 115 ft. outreach. Has space for storing 1,784 TEU containers, including 50 spaces for refrigerated containers.

Berths 232 – 233 – 234: Length 2,300 ft., depth alongside 36, 36, 42 ft. respectively. 4×30 long ton electric, travelling Paceco container cranes, each with hinged cantilevered boom with 113 ft. outboard reach. 8 Paceco 40 ton capacity transtainers. Has space for storing 7,323 TEU containers on chassis, plus 200 empty chassis and 140 spaces for refrigerated containers.

Berths 245 – 246 – 247: Length 2,100 ft., depth alongside 36 ft. 3 travelling shore container cranes of 45-ton and 40-ton capacity and four 40-ton transtainers. The only public container terminal in Southern California. Expansion of container freight station provides 88,600 sq.ft. inside storage area. Has space for storing 7,435 containers TEU.

SPECIALISED CARGO HANDLING FACILITIES: *Berths 32 – 33 (Tallow, Coconut Oil):* Length 824 ft., depth alongside 36 ft. 2×6-in. pipe-lines extend from Berth 32 to 9 coconut oil storage tanks, total capacity 7,750,000 lb.; 12 tallow storage tanks, total capacity 48,211,300 lbs. (24,105 short tons).

Berth 83 (Gypsum, Lumber, Oil, Gasoline): Length 600 ft., depth alongside 38 ft. Vessels unload gypsum rock into an adjustable, elevated, receiving hopper at pier face, served by an elevated 36-in., electric belt-conveyor system extending to a 60,000-ton capacity dome-roof storage building in rear. Open storage: 335,075 sq.ft.

Berth 122 (Auto or Multi-purpose); Length 765 ft., depth alongside 40 ft. Multi-purpose open berth capable of handling vessels with self-contained or mobile cranes, lumber, steel and other general and special cargoes. Also ideally suited for automobiles. An adjacent 12.4 acre storage area is available for autos and other commodities. Dolphin and cat walk design to accommodate large vessels.

Berths 243 – 244: Length 1,200 ft., depth alongside 42 ft. These berths are shared by Port Auto Terminal No. 1, operated by Toyota Motor Sales and covering 35 acres, and Port Auto Terminal No. 2, operated by the Pasha Group and covering 40 acres. Toyota's facility provides for offices, warehousing, dewaxing, painting, repairing and accessory installation, with 28,000 sq.ft. under roof and storage for 6,000 automobiles. Pasha's facility furnishes an automobile preparation centre, offices and dewaxing operation, with 41,000 sq.ft. under roof, plus storage area for up to 21,250 automobiles.

Berth 208 (Bananas); Length 550 ft., depth alongside 40 ft. 4 electric, travelling banana unloaders, total capacity 3,000 banana boxes per hour. Electric, belt-conveyor system transfers banana boxes from unloaders to 2 rail car and truck loading platforms and to interior of harbour banana warehouse. Banana warehouse is divided into cold storage and ripening areas. Truck loading platform along West side.

Berth 209 (Salt): Length 550 ft., depth alongside 40 ft. Vessels unload bulk salt into a receiving hopper at outer end of a movable, inclined, 48-in., electric belt conveyor. This conveyor serves an adjustable elevated receiving hopper at outer end of an elevated, 48-in., electric belt-conveyor system extending to a large open storage area in rear. Unloading rate: 800 t.p.h.

Berth 242 (Liquid Bulk): Length 700 ft., depth alongside 36 ft. Storage capacity: 12,920,800 gallons in tanks ranging in size from 6,000 to 3,000,000 gallons. Product handling equipment: the pumping and pipe-line system is designed to load and unload products to and from barges, ships, rail cars and trucks. Large, heavy-duty pumps efficiently handle a variety of bulk liquids. Molasses is the principal cargo handled.

CRANES: Barge cranes available capacity 45 – 275 tons. A U.S. Navy floating crane capacity 385 tons available for hire.

MEDICAL: Advance notice preferable. Adequate hospital and medical facilities available for providing necessary or emergency care. From information available, Public Health Department may, if required, request certain information prior to granting free pratique for inoculations, Vaccination/Fever Certificates.

TANKERS: There are 4 tanker berths available, operated by private companies, in addition to the 7 municipal tanker berths now in operation and 1 in planning stage. Berths have 55 ft. to 37 ft. of water alongside at MLLW. The range between MLLW and MHW is about 3.7 ft. Extreme range of about 10 ft. may occur at times of maximum tide. Chiksan loading and discharge arms are used and adapters available for various size fittings. Tanks available for discharge of ship's residue and SG and API local type oil (loading or discharging).

Petroleum Handling Facilities; Berths 84 – 87. Length 1,970 ft. Depth alongside 52 ft. Mechanical equipment discharge capacity 32,000 bbls/hour. 24 in. pipe-line to storage and tank farm.

Berths 118 – 119: Length 1,210 ft. Depth alongside 55 ft. Discharge capacity 50,000 bbls./hour. 14 in. – 24 in. pipe-line to storage and tank farm.

The following is part of a letter sent by the Captain of the Port to a tanker operator:

The safety of the port and the VLCC tankers using the harbour for bunkering and provisioning is of paramount concern to the Coastguard. Consequently the following guidelines have been established for all such vessels 200,000 d.w.t. and larger when utilising the Outer Harbour (inside of the breakwater) of the ports of Los Angeles/Long Beach:

a. Vessels may enter or depart the harbour areas inside of the breakwater only during daylight.
b. Minimum visibility of 1 mile is established for vessel movement.
c. Adequate tugboat assistance shall be provided when passing through the breakwater entrances upon entering or departure, and when navigating inside of the breakwater to and from anchorages.
d. A qualified Pilot must be onboard when entering or departing the harbour. One way traffic is to be maintained during the VLCC's transit through the breakwater entrance.
e. Vessel must have a 10% draft clearance under the keel when crossing either the Los Angeles or Long Beach entrance.
f. No "dead ship" status will be permitted without prior approval of the Captain of the Port.
g. No vessel with a beam in excess of 200 ft. shall enter either harbour without the permission of the Captain of the Port.

DENSITY: Local water density 1.025 grams per millilitre or pure sea water at all stages of tide.

FRESH WATER: Potable fresh water available all Municipals berths through 2 in. lines. Rental charge for use of each 50 ft. length water hose when furnished.

FUEL: All grades (viscosities) of bunker fuels available in any amount through pipe-lines at most Municipal berths, and by barge at anchor or at berths if desired. Notify quantity and type desired to local Steamship Company or Agent.

FIRE PRECAUTIONS: 2 fire boats and 1 fire station; in addition City fire service available.

Special fire precautions required at all berths handling petroleum products or dangerous cargoes. In addition to all applicable provisions of Long Beach Municipal Code, flammable and combustible liquids and flammable gases shall be handled and stored at Marine Petroleum Terminals in accordance with minimum fire safety requirements promulgated by Chief, Department of Fire, City of Long Beach.

GANGWAY/DECK WATCHMEN: Normally used, but only compulsory when detainees aboard.

OPENING/CLOSING HATCHES: Crew can open or close hatches at sea or at anchor. If closed or opened at dockside, the use of longshoremen compulsory.

IDENTIFICATION CARDS: U.S. Department of Justice Immigration and Naturalization Service Form I-95-A (Form I-94 for passengers) must be completed.

CONSULS: In Los Angeles. (Area code 213)

CUSTOMS ALLOWANCE: Tobacco, each crew member entitled to 300 cigarettes, 50 cigars and 3 lb. of tobacco or combination of above. If the stay in port is such that additional tobacco is required, Customs will so issue. Wine and/or Spirit, not to exceed 1 quart of alcoholic beverage each adult non-resident. This exemption for alcoholic beverages may be applied to more than one kind but not to an aggregate volume of more than 1 quart for each adult crew member.

Note: Upon arrival of vessel from foreign port, or vessel engaged in foreign trade from a domestic port, sea stores and ship's stores not required for immediate use or consumption on board while vessel in port, and articles acquired abroad by officers and members of crew, for which no permit to land has been issued, shall be placed under seal, unless Customs Officer is of the opinion that circumstances do not require such action.

CARGO GEAR: Employer shall not use ship's cargo handling gear until he has ascertained that vessel has a current and valid Cargo Gear Register and Certificate indicating that cargo gear has been tested, examined and annealed in accordance with requirements of International Labor Organization Convention No. 32.

REPAIRS: Within greater port area facilities to accomplish all types of deck and engine repairs.

DRY DOCKS: Within greater port area 3 large private commercial dock yards, Bethlehem Shipbuilding and Repair, and Todd Shipyard Corporation, and California Shipbuilding and Drydock Co. with large floating dry docks and repair facilities. Also, 3 large capacity graving docks located at Naval Shipyard available for emergency use by merchant vessels when not occupied by naval vessels.

REPATRIATION: Through U.S. Department of Justice, Immigration and Naturalization Service, and clearance of personal effects by U.S. Customs.

AIRPORT: Los Angeles International Airport approximately 18 miles from port, and provides regular scheduled and international airline service.

TIME: GMT minus 8 hours. United States observes Daylight Saving Time, begins at 0200 hrs. on last Sunday of April each year and ends at 0200 hrs. on last Sunday of October of each year.

HOLIDAYS: The subject Legal holidays are defined as follows: New Year's Day (1st January); Lincoln's Birthday (12th February); Washington's Birthday (3rd Monday February); Memorial Day (Last Monday May); Independence Day (4th July); Labor Day (1st Monday September); Admission Day (9th September); Columbus Day (2nd Monday October); Veterans' Day (11th November); Thanksgiving Day (4th Thursday November); Christmas Day (25th December).

Notes: (1) Also, every Statewide Election is a holiday.
(2) Also, any other legal holiday that may be proclaimed by State or National authority is a holiday.
(3) When one of the above days falls on Sunday, the following Monday shall be observed as a holiday.

POLICE/AMBULANCE/FIRE: Port of Long Beach – Police 436-9811; Ambulance 436-9811 or 436-8211. Fire 436-8211; Harbour Security Officer 437-0041; U.S. Customs 590-2457.

In an emergency and unable to dial direct – dial operator giving telephone number and exact location where emergency exists.

TELEPHONE: Installation of telephone aboard ship at Municipal berths.

GENERAL: For information regarding various social organisations, call 436-9041. Long Beach Recreation Department, for information.

SERVICES: All services from tank cleaning to compass and instrument repair available at various locations within greater port area.

SHORE LEAVE: Crewmen allowed shore-leave providing necessary application presented to U.S. Immigration Officer is approved and crewmen's Landing Permit issued (Form 5129). Customs declaration required for articles to be landed by crew members (1 quart of alcoholic beverage with seal broken is allowed).

DELAYS: Arrival at berths are normally on time as scheduled. However, there are times of inclement weather or lack of cargo at a berth which create a short delay. Shortage of longshoremen can also cause a delay in discharging or loading cargo. No delay experienced in bunkering.

DEVELOPMENTS:

(1) The complete containerisation complex consists of 15 cranes, 13 berths and 320 acres.

(2) An Omni terminal – an ultra modern multi-purpose cargo facility handling containers, roll-on/roll-off and break bulk cargoes to be constructed at Piers B and C.

AUTHORITY: Board of Harbor Commissioners, Port of Long Beach.

AGENT: See "Los Angeles".

LONGVIEW, Washington: 46.10 N. 122.55 W.

(See Plan Book)

DOCUMENTS:

3 Complete Cargo Manifests.
3 Stores Lists.
3 Possessions Lists.
3 Crew Lists on Immigration forms.
Vessel's Documents.
Tonnage Tax Statement.
Quarantine Form completed.

At first port of arrival, ship is boarded and inspected by Customs, Immigration, Public Health and Agriculture officials. At each subsequent port only Customs Agent will board prior to docking.

PILOTAGE: See "Portland, Oregon".

ANCHORAGE: Safe anchorages indicated by Columbia River Pilots.

RESTRICTIONS: None in regard to arrival time or state of tide. Channel depth 40 ft. at mean low water and tidal range varies between 2.5 and 4 ft.

MAX. SIZE: No limitation on length or breadth. Draft limited to 40 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Columbia River Pilots have knowledge of tug positions and other knowledge pertaining to tugs aiding a vessel.

BRIDGES: One bridge crossing Columbia River at Longview has sufficient clearance so as not to present a problem. Clearance 169 ft. – 185 ft. depending on season.

BERTHING: 7 berthing facilities are operated by the Port of Longview starting immediately adjacent to the Longview Bridge and running upstream for a distance of 0.91 miles.

Berths 1 through 4 form one continuous wharf 2,155 ft. long. Berths 1, 2 and 3 are equipped to handle general cargo, logs, petroleum products and a limited number of containers. 2 multi-purpose travelling gantry cranes serve Berths 1 and 2 and a 600-ton capacity twin-boom derrick for heavy equipment lifts is located at Berth 3. The 3 berths are served by a system of pipe-lines through which petroleum can either be received from tankers and barges or pumped to vessels for bunkering purposes. 3 transit sheds with a total capacity of 95,833 sq. ft. are located along the 3 berths, and railway trackage consists of 1,500 ft. of surface track on the wharf apron plus 2 spur tracks under the gantry cranes.

Berth 4 is used primarily for the receiving and shipping of grain and serves a 5,165,000 bushel capacity grain elevator leased to the Continental Grain Company. The 655 ft. berth is equipped with an overhead grain gallery extending along the wharf with 5 loading spouts. A marine leg at the rear of the wharf is used for unloading grain from barges.

Berth 5, located upstream from Berth 4, is a 515 ft. wharf which extends to 691 ft. with mooring dolphins fore and aft. It was constructed primarily for receiving alumina by self-unloading vessels, but can be adapted to handle most types of bulk ores, minerals or chemicals with modifications. The berth is also used for loading logs from the river with ship's gear and for handling barge traffic. 2 storage tanks are located near the berth with a total capacity of 25,000 tons of alumina.

Berths 6 and 7 form a continuous wharf 1,500 ft. long, with the last 96 ft. upstream portion at an 8 ft. lower level. The berths are equipped to handle general cargo, logs, LASH barges, containerized cargo and roll-on/roll-off vessels. Adjacent to the cargo handling area is an open storage site of approximately 14 acres and 2 transit sheds with a total capacity of 120,604 sq. ft. A gantry crane serves both berths and 3 rail tracks are located along the length of the wharf apron.

A new edition to berth 7 is a 30 long ton Krupp container crane with an outreach of 104 ft. from the dockside, the electrically operated rail-mounted crane can handle a minimum of 20 containers per hour.

The Port operates its own facilities and performs all terminal services between ship's tackle and consignees or inland carriers. The only exception is the operation of the grain elevator facility, which is leased to the Continental Grain Company.

In addition to these facilities operated by the Port, there are 9 other berths operated privately in the Longview Port District. Weyerhaeuser Company owns 6 berths and Reynolds Metals Company, International Paper Company and Longview Fibre Company each operate 1 berth apiece. 6 of the 9 berths are used primarily for export while the other 3 are used mainly for receiving raw materials used by the mills.

BULK HANDLING FACILITIES:

Containers: The Berth 6 – 7 area serves as a multiple use facility, handling both break-bulk and containerized cargo. This complex includes a berthing facility 1,500 ft. long, incorporating a ro-ro dock at the extreme upstream end, an open storage and marshalling site capable of accommodating all sizes of containers, and 2 storage sheds with 120,000 sq. ft. of covered space. The dock and cargo handling area is a 120 ft. wide concrete surfaced area equipped with 3 rail tracks and a crane track.

In addition to the Berth 6 – 7 area, containers are being handled at Berths 1 – 2 where there is also considerable back-up storage area available for the storage of containers.

Grain: The Continental Grain Company operates the 5,165,000 bushel capacity grain elevator at the Port of Longview Terminal.

An overhead gallery equipped with 2 × 36 in. electric belt conveyors extends from the elevator to the grain berth and then for 255 ft. along the length of the wharf where it serves 5 vessel-loading spouts. Vessels can be loaded with grain through any 2 spouts at a combined rate of 29,000 bushels per hour.

Incoming waterborne grain is unloaded from barges moored alongside the rear of the wharf by a bucket-type marine leg at a rate of 12,500 bushels per hour. The marine leg feeds grain onto a conveyor system located beneath the dock which then carries back into the elevator.

The elevator has a rail car tipper for unloading grain from box cars at a rate of 9 cars per hour; facilities for emptying hopper-type rail cars; a hydraulic truck dumper; a portable-type marine leg for unloading grain from vessels to trucks at a rate of 5,000 bushels per hour; and a spout for loading rail cars.

Other equipment includes a fumigation system, washer, separators, scourer, dryer and scales.

Ore: A facility for unloading aluminium ore is located at Berth 5. The discharge equipment consists of 2 travelling hoppers with boom conveyors which extend over the face of the wharf to the side of self-unloading vessels. The hoppers feed ore onto a 60 in. electric belt conveyor located along the rear of the wharf. This conveyor feeds onto another conveyor which travels from the berth to 2 storage tanks which have a total capacity of 25,000 tons. A metering system located at the storage tanks fills hopper-type rail cars for outbound movement of the ore.

Roll-on/Roll-off: A 240 ft. extension to the upstream end of Berth 7 to accommodate Roll-on/roll-off vessels is available at the Port of Longview. 96 ft. of the extension are constructed at a level 8 ft. lower than the remainder of the dock and will serve as the loading/unloading area to accommodate a ro/ro vessel's stern ramp. This section will have a width of 50 ft. from the wharf face to the access ramp leading to the upper level of the dock. The entire extension is constructed of concrete and steel on timber piling.

CRANES: 2 electric-powered gantry cranes serve Berths 1 and 2 on 550 ft. of track. They are readily adaptable for handling various types of bulk cargoes, containers, logs, machinery and large equipment. 1 crane is equipped with a 130 ft. boom and has a capacity of 60 tons at a 45 ft. radius. The other crane has a 120 ft. boom with a 50 ton capacity at a 45 ft. radius. Both cranes are served by two 400 ft. railroad tracks permitting direct handling between rail cars and vessels.

A third gantry crane serves Berth 6 on 500 ft. of track. This crane has a 165 ft. boom with a capacity of 50 tons at a 45 ft. radius. 2 × 1,000 ft. rail tracks are located between the crane tracks for handling rail cars at shipside.

The 600 ton capacity 'Columbia Giant', a fixed twin-boom derrick is located at Berth 3.

Also see "Berthing" – Berths Nos. 6 & 7.

STEVEDORES: At least 24 hours notice necessary to arrange gangs before ETA. Arrange through port Office via Ship's Agent.

MEDICAL: Hospital facilities available.

TANKERS: Petroleum discharge lines consist of 1 × 12-in. and 3 × 8-in. pipelines. 1 tanker berth available.

DENSITY: Columbia River is fresh water at Longview.

FRESH WATER: Available through 8-in. line with 2.5 in. connections. Rate of delivery approx. 14.5 t.p.h.

FUEL: Bunker C fuel available through 12-in. line at 850 b.p.h., and light diesel fuel through 8-in. line at 1,200 b.p.h.

GANGWAY/DECK WATCHMEN: Not needed, but arrangements can be made if necessary.

OPENING/CLOSING HATCHES: Work carried out normally by stevedores.

CUSTOMS ALLOWANCE: See "Portland, Oregon".

IDENTIFICATION CARDS: Advisable but not necessary.

CONSULS: At Portland, Oregon.

REPAIRS: Some deck and minor engine repairs are possible at Longview.

REPATRIATION: No facilities for effecting crew changes or repatriations.

AIRPORT: Nearest airport served by regular airlines is in Portland. Charter flights may be arranged from a small local airport.

TIME: GMT minus 8 hours. In addition, clocks are moved ahead 1 hour on the last Sunday in April and returned back 1 hour on the last Sunday in October, at 0200 hrs. local time on those 2 days.

HOLIDAYS: New Year's Day (January 1st); Washington's Birthday (February 22nd); Memorial Day (May 30th); Independence Day (July 4th); Labour Day (first Monday in September); Veteran's Day (November 11th); Thanksgiving Day (fourth Thursday in November); Christmas Day (December 25th). Cargo work can be arranged on most of these holidays.

POLICE/FIRE/AMBULANCE: Police 911; Fire 911; Ambulance 636-3120.

TELEPHONES: Available at dockside.

SHORE LEAVE: Crews allowed ashore if papers are in order.

AUTHORITY: Port of Longview.

AGENT: See "Portland, Oregon".

L.O.O.P. TERMINAL (Louisiana Offshore Oil Port), Louisiana: 28.53 N. 90.00 W. (See Plan Book)

TERMINAL UNDER CONSTRUCTION

PORT LIMITS: See Plan Book. Pages P.737 – P.738.

DOCUMENTS: See "New Orleans".

PILOTAGE: Two Mooring Masters will board each vessel on arrival. They have responsibility for berthing, cargo transfer, and unberthing and remain on board throughout the vessel's stay. During the berthing operation, one Mooring Master will control the vessel from the bridge and the other will be stationed forward. Mooring Masters board 5 miles from the facility.

ANCHORAGE: To the East of the single point moorings and South of a line joining buoys "L – A" and "L – B".

TUGS: No tugs are used at the facility.

BERTHING: Three SPM berths accommodate tankers. (SPM 102, SPM 103 and SPM 104 – See Plan Book). Vessels of up to 700,000 d.w.t. can be handled in water depths of approximately 110 ft. The pumping platform is located 8,000 ft. inshore of the SPM's. A 56 in. submarine line connects each SPM with the pumping station, and discharge rates of 100,000 bbls.p.h. can be received. Two strings of floating hose are used at each SPM, each of 24 in. diameter.

CUSTOMS/IMMIGRATION: Will not board vessels, but all personnel embarking and disembarking must clear onshore.

MEDICAL: Agents can arrange medical and dental treatment at short notice. Specialist consultation and hospitalisation can be arranged at short notice.

FIRE PRECAUTIONS: As per the "International Safety Guide for Tankers and Terminals".

FRESH WATER: Available in small quantities at present.

FUEL: Bunker services will be set up in the future.

Lube Oils: Available in quantity.

PROVISIONS: All deck and engine room stores available in quantity. High quality fresh and frozen provisions readily available.

REPAIRS: Skilled craftsmen are available for all on-board repairs.

SURVEYORS: Salvage Association and all major classification society surveyors available from New Orleans.

AIRPORT: New Orleans International Airport is serviced by major airlines with world wide connections. The airport is located 90 miles from the port and access is by good class highway.

REPATRIATION: Crew changes and repatriation of crew members can be arranged at short notice.

HOLIDAYS: See "New Orleans".

GENERAL: As this is a new facility, delays can be expected in the initial stages of operation.

Mooring systems are designed to accommodate vessels in up to 15 ft. seas. In adverse weather conditions vessels will be removed from berths.

AUTHORITY: L.O.O.P. Inc., Harvey, Louisiana.

AGENT: (For vessels calling at L.O.O.P.). Marine Agents of Galliano Inc., (M.A.G.I.), P.O. Box 2038, Galliano La. 70354. Tel: 504-632-6411. TWX, R/T and VHF communications. Full Agency Services.

LOS ANGELES, California: 33.43 N. 118.17 W. (See Plan Book)

PORT LIMITS: The seaward boundary of the port of Los Angeles is, for most purposes, the breakwater through which arriving vessels pass at Angeles Gate Light.

DOCUMENTS: First Port of Arrival.

1 Complete Manifest deposited with Customs, original and traveller.
1 Complete Manifest returned to vessel.
1 Manifest of first port cargo deposited with customs broker.
2 Quarantine Declarations (Form PHS 43).
2 Agriculture Declarations (Form AIQ 43).
1 Visaed Crew List (Form I-418) 5 additional copies.
1 Crewman's Landing Permit (Form 1-95A) for each crew member and (Form I-94) for each passenger.
1 Dangerous Cargo Manifest deposited with Captain of the port. 1 copy in hands of Chief Officer for review by the Fire Department.

The Coast Guard Captain of the Port must be informed of vessel's ETA 24 hours prior to vessel's arrival.

Second and each subsequent Port of call in U.S.

2 Manifests of Cargo for second U.S. port left with customs.
1 Travelling Manifest returned to Master.

(*Note:* Travelling Manifest is carried and deposited with customs at final port of discharge in U.S. – in addition to above required documents 4 additional copies should be available.)

PILOTAGE: Request made through Agent. Contact can be made through VHF Channels 14 (156.7 mHz) or 16 (156.8 mHz). Not less than 1 hour notice of arrival or departure. 1 long and 1 short blast on ship's whistle or siren, or international signal. Pilot will board in vicinity of sea-buoy ("LA" entrance buoy, lighted bell buoy "L.A." black and white vertical stripes. Radar reflector).

ANCHORAGES: Anchorages defined on charts. No permit required to anchor less than 10 days. Permit for over 10 days obtained from Captain of the Port, USCG and Harbour Department Port Warden. Permit is required for Explosives anchorage.

MAX. SIZE: Restrictions on draft only. Main channel and inner harbour 35 ft. Supertanker terminal in outer harbour has fairway of 51 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Los Angeles Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: International Telephone and Telegraph, call letters "KOK" Los Angeles radio.

RADAR/VHF: The Los Angeles Harbour Pilot's station equipped with radar for use of Pilot. The Pilots also monitor VHF Channels 14 (156.7 mHz) and 16 (156.8 mHz).

TUGS: On stand-by 24 hours a day. However, should be ordered prior arrival. Tugs join vessel in main channel, tug lines used, except when towing astern.

BERTHING: Generally arranged through Agent. Berthing under control of Port of Los Angeles' Chief Wharfinger. There are 32 general cargo berths with depth alongside 35 ft.

BRIDGES: Highway suspension bridge (Vincent Thomas) crosses main channel between berth 95 and berth 225; overhead clearance of 185 ft. in centre. 2 bridges on Cerritos channel separating Los Angeles and Long Beach harbours, 1 a double leaf-bascule (Badger Avenue Bridge) the other is a lift bridge (Schuyler F. Heim), as these bridges are less than 50 ft. apart they will be treated as one, overhead clearance 155 ft. at centre of Heim Bridge.

CONTAINER HANDLING FACILITIES:

See table overleaf.

SPECIALISED CARGO-HANDLING: There are at least 7 terminals capable of handling the port's roll-on/roll-off traffic.

The bulk loading facility, especially designed to handle iron ore and iron ore pellets, also handles other commodities such as coal and other dry bulk materials. Wharf length 800 ft. Depth alongside 51 ft. Loading rates up to 3,000 t.p.h., and unloading 500 t.p.h.

The grain and tallow terminals at berth 174 have 13 silos that hold 410,000 bushels. Vessels can be loaded at a rate of up to 400 t.p.h. Accommodating vessels up to 35 ft. draft, any length.

Other specialised facilities include the GATX Petro Chemical Terminal, designed especially to receive petro chemicals; the Hugo Neu Corporation installation, where old automobiles are reduced to scrap metal for export; Coos Head and Sun Lumber Terminals; Cargill and National Molasses Terminals; United Fruit Company's Banana Terminals; and the processing and shipping plant of the U.S. Boron Company.

STEVEDORES: Agents make necessary arrangements.

MEDICAL: Necessary to notify Agents of required medical attention: this can be done when final ETA is determined. Hospital facilities available (private).

Vaccinations/fever certificates, etc., shall conform with rules and models prescribed by the International Sanitary Regulations.

TANKERS: Load and discharge lines have 6 in. and 8 in. standard flanges (super-tanker terminal has 12-in. lines with standard flanges). If not so equipped ship must furnish its own "C" clamps. Recommend ship have reducers on board to handle 6 in. and 8 in. flanges. Residue discharge facilities available for limited quantities. All types and grades of petroleum available. 20 tanker berths available in inner harbour, 35-ft. draft at MLLW, 2 are available outer harbour 51 ft. draft at MLLW. Also see Long Beach – "Tankers".

DENSITY: Average density 1026 (exception during or after heavy rain).

FRESH WATER: Availability unlimited, delivery universal, rate of delivery 100 t.p.h.

FUEL: Unlimited fuel, all grades at attractive rates. 48 hours advance notice generally required.

FIRE PRECAUTIONS: Whenever vessel bunkering, sufficient serviceable fire hose with suitable nozzles attached to reach all parts of vessel shall be connected to fire main on vessel and made ready for instant use at all times during bunkering operations. If no adequate water pressure available on board, connections shall be made to shore lines to obtain adequate pressure. All Tank Ships shall be moored bow seaward and have wire towing pendants rigged fore and aft readily available for emergency use, fire hoses shall be connected as above at all times while vessel in port.

International fire signals will be used in case of fire (5 prolonged blasts of ship's whistle or siren of 4 to 6 seconds duration).

GANGWAY/DECK WATCHMEN: Gangway watch recommended. Tankships and vessels handling dangerous cargo required to have gangway and deck watch.

OPENING/CLOSING HATCHES: Automatic hatches may be opened and closed by crew, manual hatches opened and closed by stevedores.

CERTIFICATES: *Passenger Vessels:*

Safety Certificate, with 50 or more passengers must comply with 1966 amendment (fire safety amendment) to Solas 60.
Load-line Certificate.
Radio Certificate.
Radio Telephone Certificate, if aboard.

Cargo Vessels:

Safety Equipment Certificate.
Load-line Certificate.
Certificate of Inspection/home Certificate.
Trading Certificate.
Cargo Gear Certificate.
Radio Certificate, Radio Telephone Certificate, if aboard.
If carrying passengers from U.S. ports, vessels must have PAC (Persons in Addition to Crew) Certificate issued by USCG.

Tanker Vessels:

Same as cargo. Exception: if carrying exotic cargo, required to have cargo facilities plan, reviewed and approved by USCG, Washington, D.C. On vessel's first visit it will be inspected and receive a letter of compliance.

CUSTOMS ALLOWANCES: Tobacco, either 300 cigarettes, 50 cigars, or 3 lb. of smoking tobacco, for the personal use of crew member. Wine and/or Spirit, 1 quart for personal use of crew member.

CARGO GEAR: Gangway net attached between ship and dock; extending 5 ft. beyond turntable in one direction and 5 ft. beyond point of intersection of gangway and stringpiece in the other direction. Preventer guy must be rigged separately to head of boom from working guy. Exception if cast head of boom is capable of withstanding the stress of all the lines attached thereto. (This is a West-Coast requirement.)

IDENTIFICATION CARDS: 1 crewman's landing permit (Form I-95A) or immigration card (Form D-1).

REPAIRS: All types of deck and engine repairs possible.
DRY DOCKS: Largest dry dock 659 ft. by 97 ft., 22,000 displacement tons. 3 smaller dry docks (17,500, 15,000, 10,000 tons).
REPATRIATION: Arrangements can be made through immigration on request of Agent to have crewman change ship or return to home port.
AIRPORT: Approximately 20 miles to International Airport which serves all major airlines.
TIME: Standard Time, GMT minus 8 hours. Daylight saving time GMT minus 7 hours (April through October).
HOLIDAYS: Cargo may be worked on holidays with holiday pay scale. Exception: the first Thursday in July, at which time it is almost impossible to find working crews, although there are now exceptions to this practice.
POLICE/AMBULANCE/FIRE: The telephone numbers are all the same (area code 213) 831–9211, simply ask for Police, Ambulance or Fire. Fire Alarm boxes adjacent to all cargo sheds.
TELEPHONES: Connections for passenger vessels at passenger terminals only.
SERVICES: A ship-reporting service "The Marine Exchange" located at entrance to main channel, Los Angeles harbour. They monitor Channels 14 (156.7 mHz) and 16 (156.8 mHz) VHF and have Channel 9 (156.45 mHz) VHF as their own. Primary duties are reporting arrivals, departures and locations of vessels.
SHORE LEAVE: Crew members are allowed ashore.
REGULATIONS: Permits required for hot work (welding, cutting etc.). Permit required for any dangerous cargo. Permit to discharge ballast (clean water) required. Restrictions on bunkering operations (scuppers plugged, valves closed).
DELAYS: No delays in berthing, load or discharge or bunkering can be expected.
DEVELOPMENTS: Depths at Los Angeles will be increased in the Inner Harbour from 35 ft. to 45 ft. by 1981, and from 50 ft. to 80 ft. in the Outer Harbour at a later date.
AUTHORITY: Port of Los Angeles.

AGENT: Cascade Shipping Co., Berth 219 Indies Terminal, P.O. Box 3404, Terminal Island, California 90731. Tel: 213-547-2445. Telex: TWX 910-345-6623. Cables: "Caship".

MAGPETCO, Texas: 30.02 N. 93.59 W.

DOCUMENTS, PILOTAGE, RADIO, etc.: Refer to "Port Arthur". Also see "Port Neches".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

METLAKATLA, Alaska: 55.08 N. 131.35 W.

Located on Annette Island. Open all year.

DOCUMENTS: See "Anchorage, Alaska".
PILOTAGE: Ships coming up from the Hecate Straits or outside of Graham Island proceed into Dixon Entrance to the vicinity of Point McCartey where the Pilot will meet them. Vessels coming up the inside passage from Vancouver, B.C. are met at Lucy Island Pilot Station.
ANCHORAGE: Good anchorage in gravel and mud.
MAX. SIZE: Depths in harbour 120 ft. Tides: diurnal range – 14.7 ft. Also see "Berthing".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
CUSTOMS: Quarantine, Immigration and Customs, from Ketchikan.
TUGS: Available in Ketchikan.
BERTHING: 2 berths: 1. City Dock: 400 ft. long and 60 ft. wide. More than 35 ft. deep. Due to shallow water at East end, a starboard landing is usually made. No covered storage, temporary open storage. 4 fork-lifts, 2 of 20,000 lb. capacity.
2. Annette Island Canning Co.; 200 ft. long and 23 ft. deep. 15 ton crane and 2 fork-lifts. 1 25-ton fork lift.
STEVEDORES: 4 gangs available.
REPAIRS: Facilities at Ketchikan.
SUPPLIES: Bonded and unbonded stores from Ketchikan.
WATER: Available.
FUEL: Not available.
MEDICAL: Hospital available in Ketchikan; small clinic in Metlakatla.
AIRPORT: Small charter plane only. Jet to Juneau and Seattle from nearby Annette. (Water transportation to Ketchikan.)
DEVELOPMENTS: Large breakwater under construction
AUTHORITY: Freeman McGilton, Harbour Master/Port Captain, Port of Metlakatla.

MIAMI, Florida: 25.46 N. 80.10 W. (See Plan Book)

DOCUMENTS:
Customs: All foreign and "in bond" goods entering the Port/Country are subject to Customs examination and duty. Manifest of foreign cargo inbound must be presented to the customs boarding officer prior to commencing discharge.

Ship's Agent must notify Customs 48 hrs. prior to the ship's arrival. Regular working hours, Monday through Friday 0800 – 1700, telephone 350 – 5261. Outside normal working hours, telephone contact 526 – 2875; overtime is charged.

Forms required:

2 Master's Oath on Entry of Vessel in Foreign Trade	Form 1300
2 General Declaration	Form 1301
2 Ships Manifests	Form 1302
2 Ship's Store Declaration	Form 1303
2 Crews' Effects Declaration	Form 1304
Crew Members' Declaration (1 Declaration for each Crew member)	Form 5129
1 Application – Permit – Special License (Unloading, loading, overtime services)	Form 3171
2 Passenger Lists	I – 418
2 Crew Lists	I – 48
Customs Declaration (Passengers) (1 Declaration for each family)	6059 – B
2 Declarations of foreign repair to vessels (U.S. flag vessels only)	3415

Immigration: An Immigration Inspector will meet all ships entering port. Valid travel documents/passport/visa/entry permit are required in some cases.

Ship's Agent must notify Immigration at least 1 hour prior to ship's arrival. Regular working hours, Monday through Friday 0800 – 1630, telephone 350 – 5739. Outside normal working hours, telephone contact 526 – 2626; overtime is charged.

Forms required:

Crewmen's Landing Permit	Form I – 95
Alien Passengers' Landing Permit	Form I – 94
Passenger List	I – 418
Crew List	I – 418

PILOTAGE: All foreign vessels are required to take a Pilot who boards near the outer sea buoy, 2.5 miles offshore.

Request Pilot through Biscayne Bay Pilots Association, 24 hours in advance, call sign KGW 303, VHF Channel 16, direct from ship or through vessel's steamship Agent accompanied by particulars of draft and berthing assignment. Ship to confirm on VHF Channel 16 one hour prior to arrival. Channel 16 is monitored 24 hours and station can monitor VHF Channels 10, 12 and 14. Ship may cable Pilot station direct through RCA radio Lantana, Florida, call sign, MIAMI PILOTS. Estimated time of departure should be made when ship docks and must be confirmed by phone (672 – 7643 or 672 – 7644) 1 hour prior to the Pilot boarding.
ANCHORAGE: The prescribed anchorage area for vessels anchoring outside the harbour is located Eastward of a line about 1.5 nautical miles offshore and Northward of a line about 0.2 miles nautical miles North of the sea buoy at the entrance to the ship channel. The entire anchorage area lies North of the entrance channel to Miami. The Northern and Southern extremities of this area are marked by spar buoys. Vessels desiring to anchor off the entrance to the Harbour of Miami are required to do so within this area, to avoid possible damage to cables laid on the ocean bottom in the vicinity. Refer to anchorage area 202.188 on United States Department of Commerce, National Oceanic and Atmospheric Administration (NOAA), National Ocean Survey, Chart No. 11468.
RESTRICTIONS: The entrance to the main channel is directly East of the City of Miami, approximately 4.5 miles. The sea buoy marking the channel entrance through the reef is about 2 miles offshore. The entrance is an artificial cut 305 m. wide, known as Government Cut, dredged across the Southern end of Miami Beach. It is protected by jetties and is well marked. A channel has been dredged to a control depth of 11.3 m., and 135 m. wide on the sea end and 135 m. wide through the Cut to Biscayne Bay. The channel, 122 m. wide with an 11-m. control depth continues Westward across Biscayne Bay to the Miami Harbour Turning Basin. For the full length of the Port of Miami on the North (channel) side of the Dodge Island site, there is additional channel improvement 135 m. wide and 11 m. deep, forming a berthsite turning basin immediately North of the Port and extending to the MacArthur Causeway 2,040 m. in length and 274 m. in width.
MAX. SIZE: Present recommended draft restriction of 33 ft. (10.06 m.) at MLW, is based upon size of turning basin of 1,700 ft. (518 m.) North and South; 1,650 ft. (503 m.) East and West, with a 3 ft. (1 m.) safety factor under hull of ship. Port has plans to widen this in conjunction with large expansion programme. Vessels more than 1,000 ft. (305 m.) in length and with a draft of over 33 ft. (10 m.) should contact Port Director, Port of Miami, and Biscayne Bay Pilots for latest data. No limit to length at port complex which has 23,300 ft. (7,100 m.) at 36 ft. (10.97 m.) MLW including new South Channel, and 6,800 ft. (2,073 m.) at 25 ft. (7.62 m) MLW.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.

Ship's Agent must request quick clearance, "pratique", from United States Public Health Department.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

An Agriculture inspector will board all foreign, coastwise and domestic ships on arrival.

Ship's Agent must notify Agriculture at least 1 hour prior to ship's arrival. Regular working hours, Monday through Friday 0800 – 1630, telephone contact 350 – 4758. Outside normal working hours, telephone contact 526 – 2821; overtime is charged.

Forms required:
1 Copy of Cargo Manifest.
1 Report of Ship's Stores and Port of Origin.

Forms provided by and filled out by the inspector:
Cargo Form 210
Boarding Report 288

RADIO/VHF: The coastguard and pilot station can be raised on VHF Channel 16. Telephone contact to Agents, receivers, etc., can be made via Miami Marine Operator.

Port of Miami maintains a guard on VHF Channel 16, call letters "KCE 254".

TUGS: Large tugs up to 2,000 h.p. available 24 hours per day. Request tug service via pilot station. Big tugs privately owned by Belcher Towing Company who work closely with Pilots. Smaller tugs available on Miami River and operated by Backus Towing Inc.

BERTHING: Berths are all marginal berths, no piers, 2,042 lineal m. of berthing at 11 m. depth, also 1,524 lineal m. at 7.6 m. depth. Dock aprons are 21 m. wide. Large ships can turn at berthsite in the 270-m. wide approach channel or may continue into the turning basin, 500 m. by 518 m. There are 10 berths for bow-load and stern-load trailer ships.

Gear and Heavy Lift Equipment: 20 shipside cranes, all truck-mounted, rubber-tyred with outriggers, capacity 40 to 90 tons; 4 to 140 tons; 1 on-call, to 300 tons. 5 container movers "port packer" to 40 tons. 100 forklifts, some 5 to 8 tons capacity; some at 9 and 10 tons capacity; some 30 and 40 tons capacity.

Cruise Ship Piers: Marginal berthing for 9 cruise ships, each with modern air-conditioned passenger lounge and Custom Inspection areas.

Container Handling: New 40-long ton (45 metric ton) gantry crane which will service 787 lineal ft. (240 m.) of marginal wharving along main "North" channel, scheduled to be in operation in October, 1980. Container crane to have duty cycle of 20 load-on, 20 load-off cycles per hour. Crane will have an outreach from the face of bulkhead to centre line of load of 108 ft. (32.9 m.) and a back reach of 204 ft. (62.2 m.). Containers will clear 80 ft. (24.4 m.) above MLW and place containers inside ship to 30 ft. (9.15 m.) MLW. Plans call for up to 3 more such cranes on new extension of port (East end); in addition, 20 mobile cranes up to 300 ton capacity, and lateral "on port" packers.

Cold Storage Cargo: Not on port but ample on the mainland by commercial companies.

Commercial Warehouses: Ample on the mainland. On Port, 76,702 sq.m. in 7 modern transit cargo buildings.

STEVEDORES: All receiving, recording, moving, loading and discharge of cargo is performed by the stevedoring companies. They employ longshoremen members of the International Longshoremen's Association (I.L.A.). Normal working hours 0800 – 1700. Overtime is charged for Saturdays, Sundays, and holidays. Port open 24 hours per day.

BRIDGES: There are no bridges between the open sea and the port. To enter Miami River requires passage through a highway and railroad bridge. This bridge manned 24 hours per day. The bridge maintains a guard on VHF Channel 16, call letters "KCE 254". Only smaller ships enter Miami River which is dredged to 15 ft. at high water and is 150 ft. wide for a distance of 3 miles above entrance. A bridge about half a mile from entrance is closed from 0700 to 0900 hrs. and 1600 to 1800 hrs.

MEDICAL: Clinic available.

TANKERS: No slop (residue) discharge facilities in the Port.

Private facility: Belcher Oil Company, Fisher Island – No slop (residue) discharge facilities. One tanker berth available, 760 ft. Max. draft of 34 ft. at MLW. No special fittings required. Telephone contact 672 1065.

FRESH WATER: Available every 240 ft. at Port of Miami, Dodge Island. Delivered via hose.

FUEL: All grades; bunker, intermediate and marine gas oil, Diesel, bunker C. Ships fuelled at dockside from Belcher Oil Co. barges.

FIRE PRECAUTIONS: Usual safety precautions on smoking, flying "B", mooring pendant available, ample persons aboard to fight fires, fire hose led out, etc.

Belcher Oil Company tugs equipped with fire fighting equipment.

GANGWAY/DECK WATCHMEN: Usual shipboard watches to tend lines. Special guards (security) through Wackenhut, Burns Security, etc.

OPENING/CLOSING HATCHES: Work normally done by long-shoremen.

CUSTOMS ALLOWANCES: See "Jacksonville".

IDENTIFICATION CARDS: Definitely needed in order to return to ship at night. A security guard at Port of Miami will check.

REPAIRS: All deck and engine dockside repairs available.

DRY DOCKS: 2 small drydocks, max. size 600 tons.

SURVEYORS: Several, including Lloyds.

AIRPORT: 8 miles or 15 minutes from airport by expressway. Serviced by 24 foreign and 10 United States scheduled air carriers.

TIME: Eastern Standard Time, GMT minus 4 hours. Daylight Saving Time in effect from last Sunday in April to last Sunday in October and adds 1 hour to Eastern Standard Time.

HOLIDAYS: Cargo can be worked on holidays by advance arrangement and payment of double time. The following holidays are observed by the I.L.A.: New Year's Day, Martin Luther King's Birthday, Lincoln's Birthday, Washington's Birthday, Good Friday, May 4th, National Memorial Day, Independence Day, Labor Day, Columbus Day, Armistice Day, Thanksgiving Day, Christmas Eve, Christmas Day and New Year's Eve.

*Strachan Shipping Company is Honorary Consul.

POLICE/AMBULANCE/FIRE: Emergency only "911", City of Miami Police 579 – 6640, Dade County Police 547 – 7911. City of Miami Fire Department 579 – 6300.

TELEPHONES: Telephone available by order to telephone company.

SERVICES: All types of special services such as tank cleaning, compass adjusting, admeasurement, radar/radio repairs, rathometer repairs, etc., available.

SHORE LEAVE: Crew members are allowed ashore after clearance by customs, immigration and quarantine.

AUTHORITY: Port of Miami, a Metropolitan Dade County Operation.

MILWAUKEE, Wisconsin: 43.01 N. 87.53 W.

(See Plan Book)

PORT LIMITS: The Port of Milwaukee limits are generally considered to be the harbour breakwall housing the harbour entrance lighthouse. However, unless specifically declared to the contrary in the covering charter party, a vessel will be considered an "arrived ship" upon anchoring outside the harbour breakwall, in the event that a proper berth and/or anchoring space inside the harbour breakwall is not available.

DOCUMENTS:

Vessels from Canadian ports:
Dominion clearance and Public Health Pratique (both issued at Montreal).

Vessels from all other nations:
Inward Foreign Manifest(s)
Stores Lists, over Master's oath.
Curio Lists, over Master's oath.
Permit to Lade and Unlade.
Discharge Manifest.
Inspection by U.S. Dept. of Immigration (Crew List).
Inspection by U.S. Dept of Agriculture.
Receipt of Entrance fee.
Receipt of Tonnage Tax.

Additional documents may be required, dependent on commodity involved in the carriage, point of origin, flag or any unusual circumstances existing.

PILOTAGE: Pilot boards at Montreal and at several other stations along St. Lawrence Seaway route.

ANCHORAGES: The chart does delineate anchorage area for large vessels and shows the 28 ft. depth just East of South Piers 1, 2, and Liquid Cargo Pier. This deep area, about 2,400 ft. × 5,400 ft., used by large vessels for anchorage.

MAX. SIZE: 739 ft. × 75 ft. with 26 ft. draft. No tidal effect, although lake levels vary seasonally. Minimum depth above low water level 27 ft.

HEALTH: See "Health: All Ports" before first U.S. port (Albany). Illness reports made to Chicago Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Radio station at City Heavy Lift Dock. Harbour Master and Dock Superintendent can be reached at this facility Monday through Friday between 0800 and 1630 hrs; 156.8, 156.6 and 156.5 m/cs.

TUGS: Normally pick up vessel inside breakwater. Tugs optional at discretion of ship's Master. Fee for use of tug's lines.

BERTHING: The time of passing harbour entrance lighthouse establishes order of berthing, provided vessel is ready to work.

BRIDGES: Bridges closed between 0730 and 0830 hrs.and 1630 and 1730 hrs. except on Sundays and 8 legal holidays. In addition, 2 hours' notice required for opening bridges across Milwaukee River North of and including Buffalo Street.

SPECIALISED CARGO HANDLING FACILITIES: In addition to the 3 general cargo terminals of approx. 340,000 sq. ft. covered area (9 berths), and dry bulk terminal of 60,000 sq. ft. covered area (2 berths), the port is served by a refrigerated warehouse of 10,000 sq. ft.; 1 open dock area (2 berths) for handling bulk commodities such as pig iron; 1 open dock (3 berths) for heavy lifts and equipped with a 200-ton stiff leg crane and 2 gantry cranes of 70 and 50 tons; 1 liquid cargo pier for edible and inedible fats, greases and tallow; 2 grain elevators of 3.5 million and 2.5 million bushel capacity and 2 scrap iron loading facilities. The port is also equipped with 2 mobile heavy lift/container cranes capable of serving all berths.

STEVEDORES: Vessel should provide a stowage plan, manifest of inbound cargo and exceptions list (unusual vessel or cargo characteristics affecting facilitation of cargoes). Vessel should comply with the U.S. Dept. of Labor's safety regulations.

MEDICAL: Advance notice desirable. Hospitalisation available.

TANKERS: Diameter of load lines and discharge lines 8 in. and 10 in. No slop residue facilities. 4 berths available, with draft to seaway depth.
FRESH WATER: Potable water available at most berthing areas.
FUEL: All grades of fuel oil available by truck delivery at shipside.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: At the option of ship, if terminal stevedores perform operation, it is based on cost plus 20%.
CERTIFICATES:
Registry of Ship.
Master's Licence.
1st, 2nd and 3rd Officer's Licences.
Radio Licence.
Wireless Operator's Licence.
Ratification Certificate (done each year).
(Additional certificates may be required, dependent upon Registry, cargo, trade route engaged in, nationality of crew, etc.).
CUSTOMS ALLOWANCES: Tobacco, 10 packages or 200 cigarettes in possession at any time. Wine and/or Spirits, 1 bottle per officer.
IDENTIFICATION CARDS: U.S. Immigration rules.
CONSULS: The following countries are represented:
Costa Rica
Ecuador
Nicaragua
Norway
Sweden
REPAIRS: Limited to above water line, and boiler repairs.
REPATRIATION: Local Agents effect repatriation.
AIRPORT: 5 miles distant.
TIME: U.S.A. Central Time. Central Daylight Time from late April to late October – 5 hours behind GMT. Central Standard Time from late October to late April – 6 hours behind GMT.
HOLIDAYS: Easter Sunday; May 30th (if on a Saturday, previous day is a holiday); July 4th (if on a Sunday, Monday is a holiday); First Monday in September; Fourth Thursday in November and following day; Christmas Day; New Year's Day. Cargo can be worked on these days at holiday pay.
POLICE/AMBULANCE/FIRE: Police — non-emergencies 273-8660; Emergency, including emergency ambulance service 765-2323; Fire, including rescue squad service 347-2323.
TELEPHONES: Can be arranged, but unnecessary because sufficient phones available in dockside offices.
GENERAL: Chandlery services for foodstuffs, ship complements and laundry services available. Garbage and waste disposal are available through private operators, chandler usually making the arrangements.

The Liquid Cargo Pier is also available for non-petroleum liquid cargoes.
SHORE LEAVE: Crew allowed ashore.
DELAYS: Little or no delay.
DEVELOPMENTS: A new grain elevator is contemplated for the near future.
AUTHORITY: Board of Harbor Commissioners, City of Milwaukee.

MOBILE, Alabama: 30.40 N. 88.02 W. (See Plan Book)

DOCUMENTS:
3 copies Cargo Manifest (Forms 7527-A or 7527-B), the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (curio list).
2 copies Stores List.
2 copies Passenger List (Form I.418).
2 copies Crew List (Form I.418).
Customs boarding Officer will also examine Ship's Register and Load-line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:
Health Pratique.
Master's Oath (Customs Form 3255).
All foreign clearances.
U.S. Certificates of payment of tonnage tax (Customs Form 1002).
Certified Crew List.
PILOTAGE: Pilotage is compulsory.
ANCHORAGE: If berth is congested, vessel may anchor at the bar (35 miles from harbour).
RESTRICTIONS: Controlling depth: 40 ft. for entrance, channel and anchorages. Mean tidal range 1.5 ft. Nature of bottom: soft mud. Vessel can dock and sail at any hour at any stage of the tide.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: There are 7 tugs, available 24 hours, with max. 2,600 h.p.
CRANES: 75 ton stationary crane, 50 ton mobile crane, 80 ton floating crane and 45 ton container crane available.
TANKERS: Max. length 950 ft. restricted by turning basin. American Bituminals & Asphalt Co. – Jetty berth dredged to 38 ft.

Magazine Point: Hess Terminal: Jetty berth dredged to 43 ft.
BERTHING: There are 34 berths at most of which, direct loading or unloading can be effected from quayside tracks.

Public Grain Elevator: Depth alongside 42 ft. 2 berths, each with 5 loading spouts. Unloading rate for grain 40,000 bushels/hour at each berth. Loading rate 115,00 bushels/hour for grain.

McDuffie Terminals: Bulk coal handling plant, depth alongside the berth is 40 ft. Shiploader can load over 4,000 t.p.h. The stacker/reclaimer can handle 4,000 t.p.h., a rail car tipple rated at 4,000 t.p.h. and a barge unloader that works 3,500 t.p.h. A conveyor belt system connects the entire complex.

Bulk Handling Plant: 3 berths, depth alongside 40 ft. Total quay length 1,600 ft. 2 unloading towers which can unload 3,000 t.p.h. and 2 loading conveyors, rate 2,000 t.p.h.

Depth alongside other public berths as follows:

Pier 2	38 ft. MLW	Pier River End B	38 ft. MLW
Pier 3	38 ft. MLW	North Pier B 1	40 ft. MLW
Pier 4	38 ft. MLW	Pier North B 2	40 ft. MLW
Pier 5	38 ft. MLW	Pier North B 3	40 ft. MLW
Pier 6	38 ft. MLW	Pier South C1	41 ft. MLW
Pier 7	38 ft. MLW	Pier South C 2	41 ft. MLW
Pier 8	38 ft. MLW	Pier South C 3	41 ft. MLW
Pier South A	37 ft. MLW	Pier River End C	38 ft. MLW
Pier River End A	30 ft. MLW	Pier North C 1	39 ft. MLW
Pier North A 1	38 ft. MLW	Pier North C 2	37 ft. MLW
Pier North A 2	38 ft. MLW	Pier D Cold Storage	37 ft. MLW
Pier North A 33	38 ft. MLW	Berth 1 tipple	Under repair
Pier South B 1	41 ft. MLW		
Pier South B 2	41 ft. MLW	Berth 2 tipple	44 ft. MLW
Pier South B 3	41 ft. MLW	Berth 3 tipple	40 ft. MLW

FRESH WATER: Available ex wharf at all berths.
FUEL: Most grades fuel/diesel available via pipe-line, barge or truck.
STEVEDORES: Normal working hours for the port are 0800/1700 hrs. Monday through Friday.
DENSITY: 1,000 (Fresh Water).
REPAIRS: *Alabama Dry Dock & Shipbuilding Company* – Dry Docks ranging from 5,000 to 18,000 tons displacement all serviced by 51-ton gantries. Dock length range from 380 ft. to 620 ft. Also available is a 70-ton floating crane. Any type of repair can be effected.

Bender Ship Repair. 1 dry dock of 2,500 tons displacement. Majority of repair work is top-side. 100-ton floating crane available.
CUSTOMS ALLOWANCES: At the discretion of customs officers. Normal allowance is 200 cigarettes or 2 lb. tobacco and 1 quart wine or spirits per man. Additional allowances may be given if considered necessary, due to length of vessel's stay in port.
IDENTIFICATION CARDS: Standard U.S. Immigration Forms I.95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I.95, issued for the same vessel.
HOLIDAYS: Absolutely no work is performed on New Year's Day, Easter, July 4th, Labour Day and Christmas Day. Working holidays are Mardi Gras Day, Veteran's Day and Thanksgiving Day.
DEVELOPMENTS: A 15 million dollar expansion programme, improving the present bulk materials handling plant, construction of the container facility, widening the turning basin and various updating projects. Also a 20 million dollar expansion of the export coal facilities at McDuffie Island.
AUTHORITY: Port of Mobile, Alabama State Docks Dept.

MOREHEAD CITY, N. Carolina: 34.43 N. 76.42 W. (See Plan Book)

DOCUMENTS:
3 copies Cargo Manifest (Form 7527-A or 7527-B), the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (curio list).
2 copies Passenger List (Form 1418).
2 copies Crew List (Form 1418).
Customs Boarding Officer will also examine Ship's Register and Load-line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:
Health Pratique.
Master's Oath (Customs Form 3255).
All Foreign Clearances.
U.S. Certificates of Payment of Tonnage Tax (Customs Form 1022).
Certified Crew List.
PILOTAGE: Pilots obtained from Morehead City Pilots' Association, Morehead City, North Carolina 28557. Tel. 726-6134.

The Port Terminal at Morehead City is 3.5 miles from the sea buoy. The port is located on the Intracoastal Waterway and is situated 75 miles S.W. of Cape Hatteras and 14 miles W. of Cape Lookout.

Pilots should be given 24 hours notice and then contacted by VHF Channel 16 about 2 hours before arrival at sea buoy R "2BI".

Pilot boat is about 40 ft. long, with white hull and superstructure; the hull is marked with "PILOT" in black letters on both sides.
RESTRICTIONS: The channel and basin at Morehead City are maintained at a controlled depth of 40 ft. – mean low water.

The wharf is constructed of concrete and steel and has marginal tracks and crossovers for full length. Truck ramps are located at various points for easy roll-on/roll-off access.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Washington, D.C. Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Available. Service provided by Carteret Towing Co. Inc., Radio Island, Morehead City, North Carolina 28557. Tel. 919-726-5440.
BERTHING: The wharf is 5,300 ft. long. This length enables the port to provide berths for 10 × 500 ft. general cargo ships and 1 petroleum tanker at any given time.

Adjacent to the general cargo dock area is a 1,000 ft. deep water berth for out-loading through the bulk handling facility.

Morehead City also provides a barge terminal with 1,200 ft. of modern berths. This terminal was developed as a part of the bulk handling facilities, but is also used for the loading or off-loading of a variety of cargoes.

The bulk handling facilities of the port terminal at Morehead City are designed to out-load bulk and aggregate cargoes at a rate of 3,000 t.p.h.

The out-loader is served by a 1,200 ft. gallery which feeds from a 106,000 ton storage warehouse, and in turn is fed by a portable conveyor system from the barge terminal. The entire system is automated.

Wharf: 5,300 ft. of continuous concrete wharf. 1,000 ft. deep-water berth for bulk-handling facility. Additional 2,000 ft. projected.

Barge Terminal: 1,200 ft. of dock space providing 4 × 300 ft. berths.

Bulk Handling Facilities: 3,000,000 ton annual capacity bulk facility for receipt, conveyance, storage and shipment of bulk cargoes. Loading capacity 3,000 t.p.h., storage capacity 105,000 tons.

CRANES: 2×115-ton capacity gantry cranes.

FUEL: Available from Colonial Oil and Texaco Inc.

CONSULS: Finnish Vice-Consul, Wilmington, N. Carolina 28401. Tel, 763-5451.

Royal Norwegian Consulate, Wilmington, North Carolina 28401. Tel. 763-8271

IDENTIFICATION CARDS: Standard U.S. Immigration Forms 195 to be made up for each crew member on arrival. Not necessary for crew man already holding Form 195, issued for the same vessel.

SERVICES: There are no shipyards in the port. Service on any kind of electronic equipment is not available.

REPATRIATION: This is possible but should be avoided as there is no Immigration Office. Closest airport is about 1 hour's drive from the town.

TIME: Eastern Standard Time, GMT minus 5 hours. Daylight Saving Time, GMT minus 4 hours from April to October.

AUTHORITY: North Carolina State Ports Authority.

MYRTLE GROVE, Louisiana: 29.38 N. 89.57 W.

West Bank of Mississippi River, about 82 miles (via Southwest Pass) from sea.

DOCUMENTS/PILOTAGE: For all general information refer to "New Orleans".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Minimum of 2 tugs required for berthing and unberthing. Additional tugs at Elevator Management's discretion.

BERTHING: Mississippi River Grain Elevator, Inc. berths: distance between buoys 900 ft., alongside 400 ft. dock, depth 40 ft. Loading rates, 80,000 to 120,000 bushels per hour.

Loading Spouts: 3 spouts in use with 2 additional planned for 1981. Total distance between 5 spouts after completion (pivot to pivot) 500 ft.

FRESH WATER: Not available.

FUEL: Not available.

DENSITY: Fresh Water (1000).

AUTHORITY: Mississippi River Grain Elevator, Inc.

NAWILIWILI, Hawaii (including Port Allen): 21.57 N. 159.21 W. **(See Plan Book)**

DOCUMENTS:

4 Crew Lists.
4 Passenger Lists.
Customs Documents.
Clearance, Travelling Manifest.
Local Manifests.
Health Documents.
Bill of Health and Vaccination Certificates.
4 Manifests.
4 Bills of Lading.
Ship's Papers.
Certificate of Registration or Enrolment.
Annual Inspection Certificate.
Load-line Certificate.
Derat Certificate.
Drinking Water Certificate.
Radio Certificate and Licence.
4 Store Lists.

PILOTAGE: Vessel's Agent orders Pilot 48 hours in advance by telephone, correcting ETA as necessary with 4 hours final notice if a last minute change occurs. Tug-boat *"H. A. Walker"* serves as pilot boat for Nawiliwili and Port Allen, 75 ft. long, black hull, white house, topsides red. Radio telephone within 1 hour of arrival and while tug is working. Channels 12, 16 and 18. "WYB 8343". Pilot boards 1 mile East of Nawiliwili and 0.5 miles South of Port Allen. Signals in accordance with International Code.

ANCHORAGES: Nawiliwili: between Nawiliwili Light and Carters Point in 5 – 9 fathoms. Not good in strong trade-wind weather. Fair holding ground. Not recommended.

Port Allen: 0.5 mile South of Port Allen breakwater light in 5 – 10 fathoms. Fair holding ground. Untenable in Kona or S.W. storms which occur from November to March.

RESTRICTIONS: 24 hours notice of arrival is obligatory. Nawiliwili; arrivals sunrise, departures sunset time. From October 21 to March 21 Pilot boards at 0630 hrs. Balance of year 0600 hrs. Port Allen: no time restrictions.

MAX. SIZE: Nawiliwili: Length 650 ft., beam 90 ft., draft 32 ft. 6 in.

Port Allen: Length 650 ft., beam 90 ft., draft 32 ft. on North side and 28 ft. on South side. Pier is 600 ft. long, so larger vessels overhang.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Honolulu Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Communicate through RCA or ITT stations in Honolulu. Also KQM marine operator for radio telephone and telephone to Kauai.

TUGS: One 1,500 h.p. tug meets vessels off port and in outer harbour. Both ship's lines and/or tug's line may be used. Has radio telephone, "WBY 8343" and Channel 12 is usually used. Extra tugs available from Honolulu.

BERTHING: Limited to 2 large vessels at Nawiliwili and 2 at Port Allen. Considerable barge traffic. Prior reservations by Agent necessary with District Manager. Berth conflicts usually solved in Honolulu by rerouting of Island ports.

New Ro/Ro barge facility at Pier 1.

CARGO HANDLING FACILITIES: Nawiliwili has 2 sugar loading gantries on Pier 2; no equipment or storage to handle grain, ore, coal, sulphur. Fertiliser is discharged by self-unloading barge, and the bulk hauled away via truck. There is a container yard but no facilities to off-load containers. Weekly service is by a self-unloader. Roll-on/roll-off cargo is moved on ramps furnished by barges. LPG and petroleum product lines are privately owned.

STEVEDORES: All stevedoring by McCabe Hamilton and Renny Co. Ltd., with headquarters in Honolulu and branches in outports. 48 hours notice by Agent for labour and equipment. Inward cargo is containers, general, bulk fertiliser, petroleum products, and building and construction materials. Outward is raw sugar, general and molasses. Foreign vessels are subject to heavy fines for carrying stevedore gear inter-island without Customs clearance.

MEDICAL: 2 hospitals on Kauai with 2 doctors under contract to United States Public Health Service. Standard international inoculations and vaccination required. Advance notice by Agent desirable but not necessary.

TANKERS: All piers have pipe-line connections for incoming cargo and outgoing molasses. Fuel oil 10 in., molasses 10 in., water line 6 in., gasoline, kerosene and diesel 8 in. These are the main lines under the wharves. Hose connections to ships vary with the type of riser and hose so size of fittings should be checked with Agent. No slop discharge facilities available. 4 tanker berths available.

DENSITY: Varies from full salt to brackish in periods of heavy rainfall with freshets in the streams. No specifics available.

FRESH WATER: Available from 2 in. dock hydrants via ship's hose. About 100 gallons per minute.

FUEL: Bunker C not available for large vessels. Diesel fuel available via tank truck with 6 hours notice. Weekend and holidays order previous day.

GANGWAY/DECK WATCHMEN: Tankers discharging gasoline required to have uniformed dock watchman. Usually off duty policeman. All ships provide own gangway and deck watch.

OPENING/CLOSING HATCHES: Normally done by stevedores. A few foreign ships prefer doing it with own crew.

CUSTOMS ALLOWANCES: 200 cigarettes, 50 cigars per man, and one bottle, U.S. quart, wine or spirits.

IDENTIFICATION CARDS: Desirable but not required by law.

CONSULS: All in Honolulu.

REPAIRS: Light machine shop, welding and burning and pipe work available. Plantations may do some heavy repairs if part can be sent to their shop. Their engineers are helpful in emergencies. Heavy or technical repairs must be done in Honolulu.

REPATRIATION: Agent can arrange by air via Honolulu. Immigration clearance necessary.

AIRPORT: Lihue is 3 miles from Nawiliwili and 20 miles from Port Allen; served by inter-island regular carriers. Numerous lines, and charter flights available.

TIME: GMT minus 10 hours, all year round.

HOLIDAYS: National: New Year's Day (January 1st); President's Day (February 22nd); Memorial Day (May 30th); July 4th; Labour Day (first Monday in September); Election Day (first Tuesday in November); Veteran's Day (November 11th); Thanksgiving Day and Christmas Day (December 25th). Cargo can be worked but at penalty rates.

POLICE/AMBULANCE/FIRE: Nawiliwili: Police 245 – 6721; Ambulance 2721; Fire 245 – 2222. Port Allen: Police 382 – 311; Ambulance 338 – 8311; Fire 335 – 5444, or call "O" for operator.

TELEPHONES: Arrangements by Agent.

SHORE LEAVE: Permitted after Immigration check. Iron Curtain or Communist visitors may be restricted.

DEVELOPMENTS: Turning basin may be enlarged to handle liners and large bulkers. Project depth 35 ft.

AUTHORITY: Department of Transportation, Harbors Division, administered by the District Manager.

NEW BEDFORD, Massachusetts: 41.38 N. 70.55 W.

DOCUMENTS: See "Boston".

PILOTAGE: 3 Massachusetts State Pilots available, ordered through Agent. VHF Channel 16 monitored. Pilot on station only after 12 hours notice. Small pilot vessel with basic communication equipment. Pilots board all vessels at Buzzards Bay Buoy at the entrance to New Bedford Outer Harbour situated at Lat. 41° 30′ 42″ N., Long. 70° 50′ 07″ W.

ANCHORAGE: It is recommended that vessels delayed due to weather, etc., anchor 0.5 mile South of Buzzard's Bay Bell Buoy.

RESTRICTIONS: A modern harbour approach begins at Buzzard's Bay Buoy and runs a straight course of 7.5 miles direct to the pier facilities. The channel is 350 ft. wide and has a depth of 30 ft. MLW. The channel leads into a moderate size (1,000 yd.) turning basin.

MAX. SIZE: 700 ft. length. Vessels over 30 ft. draft restricted by tides.

HEALTH: See "Health: All Ports" before first U.S. port (Albany). Illness reports made to Boston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: RCA Chatham Radio, New Bedford Marine Operator for VHF, and Boston Marine Operator for ship to shore frequencies.

TUGS: Tugs join vessel in inner harbour. Tug lines used. 2 tugs available. Tugs are not normally used at the State Pier in docking and undocking of deep-water vessels. The large turning harbour basin, the wind-sheltered position of the pier and lack of tidal current minimise use of tugs. In extreme weather conditions tugs are used.

BERTHING: At State Pier, berthing space for 3 ships:
North side 600 ft. length, South side 775 ft. length, East side 450 ft. length.
Depth of water at all berths is 30 ft. MLW.
Maritime Terminal, depth 27 ft.
BRIDGES: Passage to upper reaches of harbour to Maritime Terminal requires navigation through the New Bedford and Fairhaven Bridge only in daylight for larger vessels over 250 ft. length.
STEVEDORES: 24 hour notice required for New Bedford Stevedoring Corporation to prepare gear. 25 tons discharged or loaded per hour as average production per gang. Nearly all cargoes handled.
MEDICAL: 24 hours notice required. Excellent hospital facilities available.
TANKERS: Hurricane dyke barrier gate 150 ft. wide with depth of 30 ft. MLW.
DENSITY: Static, since tidal variations light. Density same as ocean water.
FRESH WATER: Fresh water available.
FUEL: All types available, to be ordered in advance.
GANGWAY/DECK WATCHMEN: Watchmen available. Non police or police.
OPENING/CLOSING HATCHES: Depends on negotiated contract and cargo handled.
CUSTOMS ALLOWANCE: Designated by U.S. Customs with regard to particular circumstances.
CONSULS: Most Consuls available in Boston, 50 miles or 1 hour away.
REPAIRS: All types of minor ship repairs available.
REPATRIATION: Agent can handle formalities.
AIRPORT: 3 airports within 1 hour's drive. All international services.
TIME: Shift from Standard to Eastern Daylight Saving Time. Local time GMT minus 6 hours.
HOLIDAYS: New Year's Day (January 1st); Washington's Birthday (February 22nd); Patriot's Day (April 19th); Memorial Day (May 30th); Independence Day (July 4th); Labor Day (first Monday in September); Columbus Day (October 12th); Veterans' Day (November 11th); Thanksgiving Day (last Thursday in November); Christmas Day (December 25th).
TELEPHONES: No telephones on board, but exist adjacent to pier.
SERVICES: All services can be obtained if required.
SHORE LEAVE: If U.S. Immigration has cleared crew member, he is allowed ashore.
AUTHORITY: Harbor Development Commission.

NEW HAVEN, Connecticut: 41.14 N. 72.55 W.

(See Plan Book)

DOCUMENTS: Refer to "New York".
PILOTAGE: Compulsory. State Pilots are available on a 24-hour basis and are usually arranged through the ship's Agent or directly by shipping companies. Pilot will board vessel in vicinity of New Haven Sea Buoy, marked "N.H." – short and long flash; black and white vertical stripes. Boarding will be from a 34-ft. steel launch named *New Haven Pilot* – black hull with "Pilot" marked on both sides in white letters, or from a tug-boat. Contact can be made via VHF telephone, Channel 13 (156.65 mHz), Channel 16 (156.80 mHz), or Channel 24 (157.20 mHz).
Pilotage Association Report: The New Haven – Bridgeport Pilots maintain a tide gauge at the T.A.D. Jones Dock, from where they depart to meet vessels. The normal tidal range is 6 ft. They believe that 4 ft. of water in excess of the ship's deep draft is necessary for a safe transit. A rule of thumb, used by them, is 31 ft. on LW, and 37 ft. on HW. (For any variation of this, a Pilot should be consulted.) A normal transit time from the entrance buoy to any of the berths in the inner harbour is 45 minutes to 1 hour. Docking time of 30 minutes to 1 hour should be added to this average, dependent on where the ship is berthing, as well as possible weather conditions.

There was a maintenance dredging of New Haven Harbour, completed in the Spring of 1974. The after-dredging survey submitted to them by the US Army Corps of Engineers shows a controlling depth, with rock bottom of 35 ft. at MLW. This rock is located at South West Ledge Light at a point where a 35° turn is executed by the ship.

Prevailing winds are Westerly, and have a decided effect on the rise of tide. The tide gauge is the determining factor as to the time of entry when wind conditions do exist.
ANCHORAGE: Vessels awaiting berth, and or tides, will find good anchorage up to 40 ft. draft within 1 mile S.S.E. of the "N.H." buoy.
RESTRICTIONS: Vessels can proceed to and from berths in New Haven Harbour at any hour during the day or night, weather and tide permitting. Entrance channel dredged to 34 ft. MLW and width 400 ft.
MAX. SIZE: Draft up to 35 ft. subject weather and tides. Vessels of 50,000 d.w.t. with part cargo, do call occasionally, but should consult with the Pilot and terminal concerned.
HEALTH: See "Health: All Ports; before first U.S.A. port (Albany). Illness reports made to Boston Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Vessels arriving from North use Chatham Radio. Vessels from South use Amagansett Radio on Long Island.
TUGS: Red Star Towing Company operates 3 tugs in New Haven. Two are single screw of 1,800 s.h.p. and 1,600 s.h.p., and 1 twin screw tug of 1,800 s.h.p. Weekdays from 0900 to 1700 hrs. the office is on Channel 19A. Tugs, when manned, monitor 19A-16 and 13. Dispatchers can be reached 24 hours a day through the Bridgeport Marine Operator. The number for Red Star is area code 203 – 865-1104.
BERTHING:
Wyatt Inc: Ships are not docked on the West side at ebb tide, though ships in ballast can sail whenever ready, regardless of flood or ebb tide. The East berth docking is done on flood or ebb, with draft to be considered. In the Spring of 1974, this terminal was dredged to 37 ft. on the West side, and 32 ft. on the East side. Fresh water and bunkers are available, with steam on the East side available through a 2 in. line, with 125 lb. pressure.

Ships of 715 ft. are regularly docked here. Vessels are docked port side to on the West side, and would be delayed if the East berth is occupied by a ship.

Gulf Terminal: The Gulf Dock is located parallel to the channel on the East side of the inner harbour, and ships of 35,000 d.w.t. with draft of 33 ft. 6 in. and LOA of 675 ft. are considered to be maximum size. (350 ft. from bow to manifold.)

The dock parallels the channel and consists of 2 main caissons, a centre platform and dolphins connected by a catwalk. Fresh water and bunkers are available. Ships consigned for T.A.D. Jones Terminal use this facility.

T.A.D. Jones: This dock is on the East side of the harbour, a 500 ft. finger pier at a 90° angle to the channel. The North side has 27 ft. of water and the South side is used for barges. Tankers, or dry cargo ships no longer call at this pier.

Red Star Towing Company have their office, and moor tugs on the North side of this dock.

Arco Terminal: Arco Dock parallels the main channel, and is 750 ft. long, with 2 main caissons, dolphins, and platform, connected by catwalks. Ships up to 50,000 d.w.t., and 35 ft. draft use this berth arriving on the rising tide, and 32 ft. on LW in berth. Ships are docked starboard side to.

Bunkers are not available, though fresh water is, but only in mild weather.

New Haven Terminal, Inc.: This facility has 3 ship berths on a 90° heading from the channel, dredged in 1974. The Scrap Dock, as it is called, is a continuous pier, with a wearing strip cushioned by a rubber backing. The pier is 650 ft. long, with 35 ft. at MLW. Scrap is loaded from here and all types of dry cargo handled. Two gantry cranes are on the dock and additional mobile cranes are available. Railroad cars can be brought on to the dock. Ships berth port side to.

The Finger Pier on the North side is a continuous pier, 650 ft. long, and is mainly used as a tanker berth. Bow to manifold is 350 ft. (additional hoses can be added to increase this distance.) The slip is 196 ft. in width, and 2 ships may be accommodated at the same time, as long as 25 ft. is allowed for a tug boat between the ships. Depth 35 ft. at MLW.

The South side is a tanker or general cargo berth, with 40 ft. at MLW. Bow to manifold is 350 ft. and additional hoses may be used. Ships of 700 ft. may be secured at all 3 of these berths.

Bunkers can be trucked in, and fresh water is available at all berths.

Exxon Terminal: Exxon Dock parallels the main channel. The dock is 750 ft. long with 2 main caissons, dolphins, and platform connected by a catwalk.

Ships of 50,000 d.w.t. call at this dock, with a draft of 34 ft., docking on the rising tide. Ships are docked starboard side to. Bunkers are not available, though fresh water is.
BALLAST: There are no slop lines available.
FUEL: Available from oil terminals or delivered by barge.
FRESH WATER: Available at all terminals.
MEDICAL: All facilities available.
CUSTOMS ALLOWANCES: At the discretion of Customs Officers. Normal allowance is 200 cigarettes or 2 lb. of tobacco and 1 quart wine/spirits per man. Additional allowances may be given if considered necessary, due length of vessel's stay in port.
AIRPORT: New Haven Airport 1 mile distant. New York International Airport 70 miles distant.
CONSULS: All countries represented in New York.
HOLIDAYS: New Year's Day (1st January); Washington's Birthday (22nd February); Memorial Day (30th May); Independence Day (4th July); Labor Day (first Monday in September); Columbus Day (12th October); Veteran's Day (11th November); Thanksgiving (fourth Thursday in November); Christmas Day (25th December).
TIME: Eastern Standard Time, GMT minus 5 hours. Daylight Saving Time, GMT minus 4 hours from April to October.
SERVICES: Total Marine Services of New Haven offers launch service to ships at anchor, movement of stores, and skin divers.
GENERAL: Through a co-operative agreement, all the terminals have a slick boom, skimmers and absorbent available at all times. A fireboat, owned by the city of New Haven, is located within 0.5 miles of any terminal, and is equipped to handle any type of fire.

There are no slop tanks available in this port for pumping ballast.

None of the terminals supply gangways; ships must use their own.
AUTHORITY: State of Connecticut, Department of Transportation, Bureau of Waterways, State Pier, New London.

NEW LONDON: Connecticut: 41.21 N. 72.06 W.

(See Plan Book)

DOCUMENTS: Refer to "New York".
PILOTAGE: Vessel usually notifies Agent 48 hours before arrival, who will arrange Pilot boarding. Pilot boards at Sarah's Ledge, which is close to anchorage at harbour entrance.
ANCHORAGE: In Thames River, and in Long Island Sound, approx. 2 miles W.S.W. of New London Ledge Light bounded by lines connecting points which are following bearings and distances from New London Ledge Light: 246°, 2.6 miles; 247°, 2.1 miles; 233°, 2.1 miles; and 235°, 2.6 miles.
RESTRICTIONS: Pilots recommend daylight docking but can dock at night if necessary. Entrance channel 33 ft. deep.
MAX. SIZE: Dry cargo vessels and tankers 700 ft. long are using the harbour. Facilities for larger vessels will be available when proposed dredging to 36 ft. is completed.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Boston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Vessels arriving from North use Chatham Radio on Cape Cod. Vessels from South use Amagansett Radio on Long Island. However, either one may serve the purpose.
TUGS: Usually join vessel at Ledge Light if a dry cargo vessel, and off Sarah's Ledge if a tanker. Tugs use ship's lines; if tug's lines are used this is part of charge.
BERTHING: Advance ETA must be made for berthing, and it is suggested to dock during daylight hours when possible.

State Pier No. 1: depth, 28 to 36 ft. MLW.
Dow Chemical Co. Wharf: depth, 22 ft. MLW.
City Wharf Ferry Terminal: depth, 22 ft. MLW.

BRIDGES: There are no bridges across Main Ship Channel. However, at New London, at the head of the Main Harbour, the Thames River is crossed by 1 drawbridge and a twin fixed bridge: the New York, New Haven and Hartford Railroad bascule bridge with a horizontal clearance of 151.5 ft. and a vertical clearance of 30.9 ft. at high water and a fixed highway bridge with a horizontal clearance of 200 ft. and a vertical clearance of 135 ft. at high water.
STEVEDORES: ETA of 72, 48 and 24 hours is required, as gangs must be requested by 1500 hrs. on weekdays. Average discharge, about 20 tons per gang per hour.
TANKERS: Discharge at Hess Oil Co. berth, 12 in. and 10 in. lines.

Hess Oil Dock: depth alongside 36 ft.
Texaco Wharf: depth alongside 18 ft.
Pfizer Wharf: depth alongside 18 ft.

MEDICAL: All facilities available.
FRESH WATER: Available at pier side through 2.5-in. and 1.5-in. hoses.
FUEL: Available at tanker berths or by barge.
GANGWAY/DECK WATCHMEN: Not required and not recommended.
OPENING/CLOSING HATCHES: Performed by stevedores.
IDENTIFICATION CARDS: Not required.
CONSULS: Nearest at New York.
REPAIRS: 3 waterfront marine repair plants are equipped to repair vessels at the port. The Nelseco Navigation Co. and Thames Shipyard Inc. each owns and operates a plant at New London on the right bank of the Thames River; the General Dynamics Corp., Electric Boat Division owns and operates a shipyard and marine repair plant at Groton on the left bank of the river.
DRY DOCKS: 1 floating dry dock, 1 graving dock and 3 marine railways are available to the public at 2 of the marine repair plants.

1 floating dry dock, steel construction, with a lifting capacity of 6,500 tons, located on the West side of the pier E, has an overall length of 448 ft. length of 435 ft. 6in. on the keel blocks, overall width of 97 ft. inside clear width of 70 ft. and depth of 26 ft. of water over the keel block when submerged.

1 graving dock, located South of Piers A, B, C, and E, has length of 515 ft., width of 70 ft., and 35.5 ft. depth of water over the sill and 34.5 ft. over the keel blocks at MHW.

REPATRIATION: Facilities exist.
AIRPORT: Nearest airport is Trumbull Airport, situated about 3 miles East of Groton, Connecticut. There are scheduled commercial airlines serving this field. Allegheny Airlines and Pilgrim Airlines run frequent connecting flights to Bradley and Kennedy International Airports.
TIME: Eastern Standard Time, GMT minus 5 hours. Daylight Saving Time, GMT minus 4 hours, from April to October.
HOLIDAYS: New Year's Day (1st January); Lincoln's Birthday (12th February); Washington's Birthday (22nd February); Good Friday; Memorial Day (30th May); Independence Day (4th July); Labour Day; Columbus Day (12th October); Veteran's Day; Thanksgiving Day; Christmas Day (25th December). Cargo work can be arranged on holidays.
POLICE/AMBULANCE/FIRE: Police, 443 – 4315; Ambulance, 443 – 4388; Fire, 443 – 4381.
TELEPHONES: Available if required.
SHORE LEAVE: Allowed.
DELAYS: Availability of berthing might cause some delay.
AUTHORITY: State of Connecticut, Dept. of Transportation, Bureau of Waterways, Office of the Deputy Commissioner, State Pier, New London.

NEW ORLEANS, Louisiana: 29.56 N. 90.04 W.

(See Plan Book)

DOCUMENTS:

- 3 copies Cargo Manifest (Forms 7527 – A or 7527 – B), the original showing all cargo on board, and 2 copies showing only cargo for this port.
- 2 copies Crew Manifest (curio list).
- 2 copies Stores List.
- 2 copies Passenger List (Form I – 418).
- 2 copies Crew List (Form I – 418).

Customs boarding officer will also examine Ship's Register and Load Line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States Port:

Health Pratique.
Master's Oath (Customs Form 3255).
All foreign clearances.
U.S. Certificates of payment of Tonnage Tax (Customs Form 1022).
Certified Crew List.

The Bureau of Customs at New Orleans, Louisiana, will not, regardless of the circumstances, accept Customs Entry Papers from vessels unless they are on the proper U.S. Custom Forms and properly prepared.

Specially referred to are Customs Forms 1303 (Ship's Stores Declaration), 1304 (Crew Effects Declaration) and 7527 (Inward Foreign Manifest).

U.S. Customs at New Orleans require that the 1303 be completed, that is all stores (deck, engine, etc.) be listed on the form; it must also include firearms and medicines. They will not accept "as per attached list".

Form 1304, Crew Effects List, must likewise be properly completed. All effects and curios will have to be listed on the form. The term "souvenirs" is not sufficient and may not be used. All values have to be listed. Attachments to the 1304 are not permitted. (This does not apply to American Flag vessels using the Form I – 418 Crew List with Crew Declaration numbers listed for their souvenir list.)

The Inward Foreign Manifest must be Customs Forms 7527 – A, 7527 – B, or a manifest form approved by the Bureau of Customs, Washington D.C. Should the latter be used it must have the Bureau's approval number printed on the form.

PILOTAGE: Advise Agents ETA at sea buoy 48 hours in advance. Agent will arrange for Pilot. Pilot boat 46 ft. long, red hull, white cabin, flying blue and white Pilot flag. Pilot boards at sea buoy, requires Pilot ladder 6 ft. above water level. Pilot boats can be contacted by VHF, Channel 9 when 30 to 40 miles off, or ship-to-ship Channel 2738. Bar Pilot is exchanged for river Pilot at Pilot town, Head of Passes.

Following advice received from Crescent River Port Pilots Association:

Cable: Crespilots, New Orleans.

Vessels bound to any destination on the Mississippi River and Mississippi River Gulf Outlet are requested to supply the following information via Coastal Radio Telegraph addressed to Crespilots, New Orleans:

(1) ETA – twenty four (24) hours before expected arrival at Pilot station (Sea Buoys), and any change of ETA in excess of two (2) hours.
(2) Indicate if vessel is arriving Mississippi River or Mississippi River Gulf Outlet.
(3) Deepest fresh water draft and speed of vessel.
(4) Please contact Pilot station at entrances via VHF Radio Phone on Channel 16 (156.80 mHz), Channel 9 (156.45 mHz), or, Channel 13 (156.65 mHz) at least two (2) hours prior to arrival for boarding instructions.

Your co-operation will greatly assist in expediting the dispatching of Pilots and avoid costly delays to your vessels.

ANCHORAGE: Safe anchorage within 2 miles South pass or S.W. pass entrance. At the Point, below New Orleans, vessels may anchor without tug assistance.
RESTRICTIONS: Draft governed by S.W. pass, project depth 40 ft. Entrance day and night. New Orleans is 115 miles upriver.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Available, and join vessel off berth if required. One tug normally used for berthing/unberthing at New Orleans.
BRIDGES: 4 bridges. 2 bridges cross river at New Orleans, 1 at Baton Rouge and 1 at Donaldsonville. Sufficient clearance at all times.
BERTHING: *Public Grain Elevator.* No. 2 berth, 670 ft. long, 40 ft. depth; No. 3 berth, 650 ft. long, 40 ft. depth; No. 4 berth, 635 ft. long, 40 ft. depth.

Loading Rates 20,000 bushels per hour per belt, in berths 2 and 3; up to 40,000 bushels per hour per belt, in berth 4. Each berth has 2 loading belts.

Southern Scrap Material Co: Berth 550 ft. long, 32 ft. depth. Loading 200 t.p.h. with cranes.

Chalmette: Humble Oil Terminal: tanker berth 30 ft. depth; Tenneco Oil Terminal: tanker berth 35 ft. depth.

Kaiser: Chalmette Wharf: Aluminium discharge facilities, max. draft 38 ft.

Terminals on West Bank of Mississippi:

Amesville: Texaco tanker loading berth, 34 ft. alongside. 2×8-in. hoses loading up to 12,000 b.p.h. No ballast facilities.

Avondale: American Liberty Tank Terminals berth, 60 ft. alongside. 4 × 6-in. hoses loading up to 18,000 b.p.h. No ballast facilities. International Tank Terminals berth, 45 ft. alongside. 12-in. hoses loading 150 t.p.h.

Gretna: Publicker Chemical Corp.: berth 30 ft. alongside. Southern Pacific Company: berth 600 ft. long, 35 ft. depth; dry cargo discharging only. Industrial Molasses Corp: berth 27 ft. depth; 2 × 10-in. pipe-lines, loading 200 t.p.h.

Marrero: Hess Terminal Corp: tanker berth 38 ft. depth; 6 × 12-in. hoses loading 500 t.p.h. Texaco: tanker berth 35 ft. depth; 6 × 16-in. lines loading 250 t.p.h. No ballast facilities.

St. Rose: Cities Service: tanker berth 35 ft. depth; International Tank Terminals: berth 35 ft. depth; no fresh water available.

Westwego: Continental Grain Elevator: berth 600 ft. long, 40 ft. depth; loading 1,000 t.p.h., 2 loading belts. Louisiana Dock: 28 ft. alongside, bulk oil products loaded 200 t.p.h. Pacific Molasses Co: berth 35 ft. alongside.

CONTAINER HANDLING FACILITIES: Handled at most docks. Full container facilities at Morrison Yard wharf, length 430 ft. France Road berth No. 1 with 830 ft. leased to Sea-Land. Napoleon Avenue wharf 1,520 ft. Nashville/Henry Clay wharf 2,820 ft.

France Road berth No. 4, wharf 700 ft. France Road berth No. 5, wharf 900 ft. Berth No. 4 leased to Navieras de Puerto Rico and berth No. 5 leased to New Orleans Marine Contractors, Inc.

STEVEDORES: Working hours 0800 – 1200 and 1300 – 1700, Monday to Friday.
MEDICAL: All facilities available.
DENSITY: Fresh water (1000).
FRESH WATER: Available ex-wharf.
FUEL: Only available by barge. Oil companies can supply Bunker "C" ex-terminals at Amesville and Marrero.

GANGWAY/DECK WATCHMEN: Recommended if any crew detained by Immigration.
CUSTOMS ALLOWANCE: At the discretion of Customs officers. Normal allowance is 200 cigarettes or 2 lb. tobacco and 1 quart wine or spirits per man. Additional allowances may be given if considered necessary, due to length of vessel's stay in port.
IDENTIFICATION CARDS: Standard U.S. Immigration Forms I – 95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I – 95, issued for the same vessel.
AIRPORT: New Orleans International Airport, served by most airlines.
TIME: Central Standard Time. Daylight Saving Time from May to October.
HOLIDAYS: New Year's Day (1st January); Martin L. King's Birthday (15th January); Good Friday; Memorial Day (30th May); Independence Day (4th July); First Monday in September (Labor Day); Veteran's Day (Last Monday in October); Fourth Thursday in November (Thanksgiving); Christmas Day (25th December). No work on New Year's Day, Independence Day, Labor Day and Christmas Day.
SHORE LEAVE: Allowed for any crew member not detained by Immigration.
DEVELOPMENTS: A fourth full-container berth with double ro/ro pad, class A & B, and marshalling area under construction at the France Road Container Terminal on the Industrial Canal, length of berth 800 ft., equipped with 40 ton crane. Also available will be 8 acres of back-up marshalling and refrigerated warehouse and stuffing area.

A new roll-on/roll-off cargo-handling facility on the Industrial Canal adjacent to the Florida Avenue wharf, and new ship-repair facilities at the Alabo Street wharf on the Mississippi below the Industrial Canal.

SHIPMASTER'S REPORT: 1975.
Documents:
1 Crew List on Form I – 418 to be visaed by U.S. Consul at last port prior to arrival at a U.S. port.
4 Crew Lists on Form I – 418 (Another 2 copies if coastwise).
4 Store Lists on Form 1303 (Another 2 copies if coastwise).
4 Crew Effects Declaration 1304 (Another 2 copies if coastwise).
4 Ship Stores Declaration. 1303 (Shop List).
1 Crew Landing Permit Form I – 95A is required by every crew member not having a plastic Permit Form I – 184. also Seaman's Red I.D. Card or Passport (Discharge Book does Not repeat Not qualify as a travelling document).
Master's Oath and General Declaration are normally completed by Agent.
Radio Pratique. No Form required.
Clearance from last port.
Ships Register with all certificates up to date.
2 Copies of Manifests covering cargo in transit.
Customs: Stores List. Curio List. 1 Crew List. Sealed High Duty Bond, Unchecked.
Immigration: Visaed Crew List. Seamans Red I.D. Card or Passport along with American Crew Pass. Typed. Question asked by Officials "How long at sea?" I.D. Card handed back to seaman with American Pass stamped. Department very thorough and efficient.

No mail or money to be distributed until Immigration completed, also no persons permitted ashore or onboard until formalities completed except for Agents and Officials.

If no visaed crew list Master signs official form. Cost US$10.0 for whole ship's company.
Port Health: Radio pratique not granted as seamens' cards not completed. No representative visited vessel. Report any death through Agents.
Agriculture Dept.: Inspected vessel. Galley, Messrooms, Store-rooms, etc. Meat and Vegetable rooms sealed.

Garbage bins to be covered (Collection expensive, retain on board until sail if possible).

Rat guards to be used.
Provisions and Stores: Select own supplier. Prices comparable U.K. with good quality expensive. Stores and Medicines ordered through providor.
Laundry: Satisfactory. Billed by weight. 24 hour service.
Watchmen: None placed on board but security police at section openings.
Telephone: None placed on board. Use office on quay side.
Water: Plenty available. Shore connections used. Cost, 23 cents per 1,000 gallons.
Bunkers: Delivered by barge. Charged for what is ordered. Do not over stem. Barge hired from private firm. Any bunkers not taken paid for and revert to barge owners.
Walport Films: Exchanged.
Coast Guard: Require number of Oil Pollution Certificate (Certificate of Financial Responsibility). Whether AMVER participant. Require ship's particulars including horsepower. Displacement tonnage on sailing. Name of Master and Chief Officer. Dangerous cargo particulars and stowage.
National Cargo Bureau: Representative from National Cargo Bureau comes onboard and requests ship's particulars also ports of call to and from. Inspector looked at hatches where cargo to be loaded. He then issues a Certificate of Readiness. Loading can then commence.
Code of Federal Regulations: Each ship should have a copy. Difficult to come by. Acquired 1970 copy from Agents. Equivalent to our 'Blue Book'.
Repairs: Select own firm. Anxious to please. Unable to judge as little work contracted out.
Money: Delivered by separate security firm. Satisfactory.
Radio Messages: Send ETA at least 48 hours before arrival to Agents and Branch Pilots with draft. Notify Captain of the Port of any explosives for discharge or in transit. If all healthy and documentation correct ask for radio pratique. Confirm ETA at 24 and 10 hours. Inwards send ETA to Agents after passing Pilot Town. Agent will notify if radio pratique granted. Not necessary to fly "Q" flag going up river.
Stevedores: Hours of work 0800 to 1200 hrs., 1300 to 1700 hrs. Straight time. Weekday gangs will work until 1800 or 1900 hrs. to finish. Night: 1800 hrs. to midnight, 0100 to 0600 hrs. Head Stevedore checks Factory Act Book. Gangs will work continuously except for 3 hours in any 24 hours. 4 different Union Contracts. Plan maker makes own plan then airmails same to ports of discharge. Crew open hatches also close same. Crew not to do any cleaning.
General: Use S.W. Pass at all times. South Pass has only 18 ft. of water and shoaling all the time.

Pilot boards on lee side at Sea Buoy – Flash "A" (· –) from fast launch painted black. Ladder about 6 ft. from water level. Branch Pilot takes vessel to Pilot Town where River Pilot takes over. Ladder usually starboard side inward and port side outward 8 ft. above water. First come first served at sea buoy. About 1.5 to 2 hours from Sea Buoy to Pilot Town and about another 6 hours to berth. Proceed up river at harbour full speed. Reduce speed occasionally for long tows, dredgers and ships on loading berths.

River Pilot docks vessel.

Signals by day "H" flag. By night nothing.

Inland waterways rule of road applies.

We had clear daylight run up river and down at night. Mid December. Start of fog. Low fog experienced on water also some patches, fairly thick. If fog does develop it is worth remembering that once past Pilot Town Southbound, few if any places to anchor and one has to continue on.

Racon at entrance useful. Anchorages as per charts. When arriving contact Pilot on VHF Channels 9, 12, 13.
Berth: Satisfactory. 24/29 Market Street. Just past bridge. Quite a long walk to open section to get out of docks. Recommend at night get taxi back and if walking into town by day at least 2 persons.

Sufficient bollards. No cranes. Berth head up. Usually starboard side to.

Moorings. 4 headlines, 4 stern lines plus 2 springs each end. Passing traffic fairly heavy with considerable wash. Rat guards a requirement.

Ship's gangway. Quay about 25 ft. above water level. Wooden pile fenders very effective.
Tugs: Used for berthing and unberthing. 1 only alongside port forward shoulder. 2 tugs lines. When making fast tug passes portable Walkie Talkie on board to send up to Pilot on bridge. Pilot left by tug which used own ladder.
Radar: Satisfactory repairs carried out.

SHIPMASTER'S REPORT: 1979.
South West Passage:

Pilotage: Pilots prefer accommodation ladder together with pilot ladder but will sometimes use pilot hoists, on larger vessels.

Restrictions: For 100,000 d.w.t. vessel max. draft for S.W. passage is 35 ft., (fresh water) to sail out at any time.

SHIPMASTER'S REPORT: 1979.
Mississippi Lightening Area:
Port Limits: Centred at 28° 00′ N., 89° 30′ W. and within 15 nautical miles radius.
Documents: Officials take photostat copies of Bill of Lading and give receipt for cargo, and take one copy of Notice of Readiness.
Pilotage: They are equipped with Loran "C".
Anchorages: Very deep. Vessel drifted 7 nautical miles N.N.E. in 11 hours (February) with wind N.E. – 3. Checked with satellite navigator.
Health: No Formalities.
Radio: Initial contact on W/T via "WLO" Mobile then by R/T 12427.5 kHz A3J. When close enough Channel 16 VHF; then Channel 11 for all operations. If vessel fitted with bridge wing VHF extension then best to give all engine room orders over Channel 11 so that lightening vessel can also hear.
Berthing: As per OCIMF/ICS SSTG (P). Require 2 headlines and 1 stern line from STBL after putting aboard their lines which are all polypropylene except springs which are wires with nylon tails. Steamed at about 3.5 knots. They throw across heaving lines and carry all necessary equipment. Do not require derrick, they have gangway and 4 'Yokohama' fenders.
Tankers: STBL can load at up to 10,000 t.p.h. They prefer to use 2 centre manifolds with reducers down to 16 in.
Identification Cards: Required.

AUTHORITY: Port of New Orleans, Board of Commissioners.

NEW YORK, New York and New Jersey: 40.43 N. 74.00 W. **(See Plan Book)**

DOCUMENTS:

3 copies Cargo Manifest (Forms 7527 – A or 7527 – B), the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (Curio List).
2 copies Stores List.
2 copies Passenger List (Form I – 418).
2 copies Crew List (Form I – 418).

Customs boarding officer will also examine Ship's Register and Load Line Certificate.

In addition the following documents will be required for formal entry, to be made within 48 hours of arrival from abroad:
Health Pratique.
Master's Oath (Customs Form 3255).
All Foreign Clearances.
U.S. Certificates of payment of Tonnage Tax (Customs Form 1002).
Certified Crew List.

PILOTAGE: Compulsory for foreign flag ships, and U.S. ships bound to and from foreign ports.

24 hours notice of ETA required. Pilot boat should be contacted on VHF Channel 16, or ship-to-ship Channel 2638 or 2738. Vessels requiring Pilot should hoist signal letter "G" in daytime. In foggy weather the letter "X" should be sounded on whistle.

Pilot boat is generally found about 1.5 miles West of Ambrose Light Tower. In bad weather Pilot tries to stay windward of normal Pilot station.

In poor visibility an inbound ship should make Ambrose Tower and then proceed at slow speed to the Ambrose Channel sea buoy while blowing the letter "X" on her whistle. If no Pilot is obtained by the time she is in the vicinity of the sea buoy she should then anchor about 0.5 mile to 1 mile North of the line from Ambrose Tower to the sea buoy and await Pilot.

ANCHORAGES: For ships entering from Sandy Hook there are anchorages in lower New York Bay, Gravesend Bay, Raritan Bay, and Arthur Kill off Perth Amboy. In the Upper Bay, anchorages available off Bay Ridge for 30 days, off Jersey City for 72 hours, and off Stapleton for 48 hours. For vessels entering via Long Island Sound there are anchorages in the Western end of the Sound and in the East River.

Vessels entering New York harbour are required to have 2 working anchors, by U.S.C.G. regulations.

RESTRICTIONS: Ambrose Channel, 10 miles long, maintained to a width of 2,000 ft. and a depth of 45 ft. MLW. The Northern approach to the harbour is through Long Island Sound into the East River. Main channels in the port are maintained to a depth of 45 ft. MLW.

MAX. SIZE: Restricted only by berth depth and location.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New York Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

VHF: All vessels over 100 tons gross are required to keep continuous watch on VHF Channel 13 when in areas where U.S. Inland Water Regulations apply.

TUGS: Over 50 private towing and transportation companies registered in the port.

BERTHING:

Staten Island: Howland Hook Container Terminal, 5 berths (32 ft. alongside).

Brooklyn: 53 general cargo berths, including 2 container berths at Northeast Terminals, and 27 Modern breakbulk berths at the Brooklyn Port Authority Piers (depth alongside range 30-34 ft.).

East River: 3 berths general cargo piers on Manhattan shore.

Hudson River: New Passenger Ship Terminal on Manhattan Shore between 48th and 52nd Streets provide 6 ship berths. 3 berth passenger ship faciliity at Houston St.

Hoboken Port Authority Marine Terminal: 3 piers, 6 general cargo berths.

Weehawken: 2 berth container facility at Port Seatrain.

Jersey City: 2 berth container facility at Port Jersey (Global Terminal).

Newark, N.J.: Port Newark (22 general cargo, 5 specialized, and 4 container berths). Depth range alongside 30-34 ft.

Elizabeth, N.J.: Elizabeth Port Authority Marine Terminal, 22 full container berths, channel depth 35 ft.

CONTAINER FACILITIES: *Newark and Elizabeth, N.J.:* Port Newark and Elizabeth Marine Terminal on the Western shore of Newark Bay, most intensively developed container terminal area in the world with almost 4 miles of berthing space, over 1,265 acres of container marshalling area, 28 berths, 23 container gantry cranes with capacity range of 30 – 70 tons. An international railroad container transfer yard serves both terminals.

Jersey City: A 2 berth, 84 acre container facility (Global Marine Terminal, Port Jersey) with 1,800 ft. of berthing space and 3 container cranes of 40 ton capacity.

Staten Island: A 5 berth container terminal at Howland Hook at the Northwest corner of Staten Island of 187 acres with 2,500 ft. of berthing space, 4×40-ton and 1×50-ton gantry cranes.

Weehawken: A 2 berth container facility at Port Seatrain of 87 acres and 1,885 ft. of berthing space equipped with 3 × 45-ton gantry cranes.

Brooklyn North East Marine Terminal: 2 container berths of 87 acres with 2 gantry cranes of 50 and 70 tons capacity located between 29th and 39th Streets.

Also see "Developments".

CRANES: Mobile floating cranes with capacity up to 500 tons available.

STEVEDORES: 13 stevedoring firms are active in the port, many of whom are also terminal operators. Normal working hours 0800 – 1700. Bulk Cargo work usually continues through 24 hours.

TANKERS: *Brooklyn:* Paragon Oil Terminal, 2 berths, depth 37 ft.; Patchoque Oil Terminal, 2 berths, depth 29 ft. and 35 ft.; Whale Oil Terminal, 1 berth, depth 36 ft.

Hudson River: Tappan Oil Co., 1 berth, 35 ft. depth.

Bayonne, N.J.: Public Oil Terminal, 3 berths, 32 ft. depth; Humble Oil Terminal, Constable Hook, up to 38 ft. depth; Ross Oil Co., 3 tanker berths up to 38 ft. depth; Texas Oil Co., 4 tanker berths, up to 32 ft. depth; Texaco, 4 berths up to 32 ft. depth.

Kill Van Kull: Lehigh Tanker Terminal, chemicals, 35 ft. depth; Humble Oil Co., 3 tanker berths, up to 38 ft. depth; Texas Oil Co., 4 tanker berths up to 32 ft. depth; Ross Oil Co., 1 berth up to 32 ft. depth.

Newark, N.J.: 4 berths, 31 and 32 ft. depth.

Elizabeth N.J.: Chevron Oil Company, 1 tanker berth, 26 ft. depth; Crown Central, 1 tanker berth, 30 ft. depth.

Arthur Kill: **Perth Amboy:** Chevron Oil Co. (tanker berth, 26 ft. depth); Hess Oil Co. (tanker berth 30 ft. depth); Cities Service (tanker berth, 34 ft. depth); **Sewaren,** Royal Petroleum Co. (tanker berth, 32 ft. depth); Public Service Co. (tanker berth, 35 ft. depth); Shell Oil Co. (tanker berth, 35 ft. depth). **Port Socony,** Mobil Oil Co. (2 tanker berths, 27 and 30 ft. depths). **Carteret,** American Oil Co. (tanker berth M, 25 ft. depth); General American (2 tanker berths, 25 and 35 ft. depth). **Linden,** Cities Service (tanker berth, 32 ft. depth); Humble Oil Co. (tanker berth, 35 ft. depth); Sinclair Oil Co. (tanker berth 31 ft. depth). **Gulfport,** Gulf Oil Co. (tanker berth, 32 ft. depth).

Shipmaster's Report: 1976.
Greater New York Terminal, Astoria, Long Island:
Location of Berth: 40° 47′ N., 73° 53.7′ W.
Distance from Entrance to Berth: 28 miles.
Max. Size at Berth: LOA, 900 ft. Draft, Pilot stated 34 ft.
Restrictions: Vessel should be ballasted sufficiently to pass under Brooklyn Bridge, clearance 127 ft.

Vessels may berth and unberth day and night but only at certain stages of the tide.

Anchorage: At Stapleton as designated by USCG.

Terminal Information: Starboard side manifold to barge at Stapleton Anchorage, use 6 in. hoses. Port side manifold use at the berth, ships hoses not required. The connection is 12 in. running into 18 in. Nearest shore tank 1,000 ft. from berth. Line fitted with steam jacket but not efficient. Max. pressure allowed 125 p.s.i. Shore gantry used at berth. Derrick used at anchorage for discharging into barge. Product handled: Fuel Oil (Heating Oil). No slop tanks available.

General: Pilotage compulsory. Ambrose Pilot requires 24 hours notice of arrival. Radio station handling traffic is Chatham. Most services are available at the berth, however it is advisable to take stores and send laundry from Stapleton Anchorage as there is no means of delivery at the berth other than carrying by hand. Stapleton Launch Service, tel. 981-8333/8384. Fresh water may have to be taken by barge in very severe weather as shore lines become frozen.

Approaching: From a Line from Rockaway Inlet to Ambrose thence Highlands Light, vessel must remain on VHF Channel 13 for ship-to-ship communication. When Pilot on board he maintains this Channel and ship can use own VHF other Channels. Marine operator on VHF 26 (call). For the passage of East River (Remember Brooklyn Bridge Clearance 127 ft.). One tug each bow alongside. After Hell's Gate and passing Port Morris to port, vessel cants to starboard to pass between North and South Brothers to starboard and Rikers Island to port through 500 ft. wide buoyed channel (some unlit) South to berth (inwards). It is preferable to come through Hell's Gate at HW or LW slack, thus avoiding cross currents between Brothers at other times.

FRESH WATER: Available at most piers in the port district at a nominal rate. Water barge available to serve vessels at anchor in emergency but this is expensive.

FUEL: All grades of fuel readily available. Except for tankers loading or discharging, bunkers are normally delivered by barge. It may be economical to shift vessel to refuelling berth.

GANGWAY/DECK WATCHMEN: Available and recommended if any crew detained by Immigration.

CUSTOMS ALLOWANCE: 200 cigarettes or 2 lb. tobacco, 1 quart wine/spirits per man.

IDENTIFICATION CARDS: Standard U.S. Immigration Forms I – 95 to be made up for each crew member on arrival.

REPAIRS: All facilities available for any size vessels.

DRY DOCKS: 4 docks with lifting capacities up to 25,000 tons (Bethlehem) and 1 dry dock capable of handling vessels of up to 1,100 ft. LOA, 140 ft. beam and 120,000 d.w.t.

TIME: Eastern Standard Time, GMT minus 5 hours. Daylight Saving Time, GMT minus 4 hours from April to October.

AIRPORT: Kennedy International Airport, Newark International Airport, La Guardia Airport.

HOLIDAYS: New Year's Day (January 1st); Lincoln's Birthday (February 12th); Washington's Birthday (February 22nd); Good Friday; Memorial Day (May 30th); Independence Day (July 4th); Labour Day (first Monday in September); Columbus Day (October 12th); Armistice day (November 11th); Thanksgiving (fourth Thursday in November); Christmas Day (December 25th). No work on New Year's Day, Independence Day, Labour Day and Christmas Day.

SHORE LEAVE: Allowed except for crew members detained by Immigration.
DEVELOPMENTS: *Red Hook Container Terminal – Brooklyn, N.Y.* (Under construction).

A new container/breakbulk facility of some 30 acres in the Red Hook section of Brooklyn is expected to be operational in early 1981.

The project, a joint venture of The Port Authority of New York and New Jersey, and the State and City of New York, is to be located in the Atlantic Basin area of the Brooklyn-Port Authority Marine Terminal. Construction started during September 1978.

Construction will be in two phases: first, existing Piers 10 and 11 will be combined into a 30-acre site offering a new 1,000-ft.-long container berth as well as two breakbulk berths at Pier 11; second, an additional 10 acres at the foot of Hamilton Avenue will be integrated to complete the site. Completion of the second phase is set for the Autumn of 1981. Construction will include an office building, entry complex, crane rails and foundations, and whatever else that may be required by the ultimate leasee of the terminal to create a model container/breakbulk facility. The Red Hook facility will have a throughput capacity of 25,000 containers per year on completion of the second phase.

Long range plans call for expanding the facility by incorporating Piers 9A and 9B, Brooklyn-Port Authority Marine Terminal along with a section of upland fronting them. When this expansion is realised, it will double the facility's annual capacity to 50,000 containers.
AUTHORITY: Port Authority of New York and New Jersey.

NIKISKI, Alaska: 60.41 N. 151.24 W.

Located on West side of Kenai Peninsula between Homer and Anchorage. Pan and brash ice in Inlet from November to March. Never freezes solid. Open all year.
APPROACHES: Via Cook Inlet.
DOCUMENTS: See "Anchorage, Alaska".
PILOTAGE: Pilot pick-up point 1 mile South of Homer Split light. Also see "Homer" Pilotage.
ANCHORAGE: Good anchorage.
MAX. SIZE: Harbour depth in excess 40 ft. Max. size 80,000 d.w.t. Tides diurnal range 28 ft. Also "Berthing".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
CUSTOMS: Quarantine, local. Immigration and Customs from Anchorage, Alaska.
TUGS: From Anchorage.
BERTHING:

1. Port Nikiski Dock: 3 sided, 550 ft. long, 200 ft. on each side, 1,000 ft. wide, 12 feet at MLLW. 400 ft. by 75 ft. covered storage.
2. Three finger piers for tankers and bulk carriers. All exceed 40 ft. depth.

All 3 berths are dolphin berths ideal for rapid bulk loading. Main products:
- *(a)* Collier Chemical Dock: Bulk area and ammonia gas.
- *(b)* Phillips Petroleum Dock: Petroleum products and liquid natural gas.
- *(c)* Kenai Pipe-line Dock: Refined and crude Petroleum products.

STEVEDORES: Two gangs.
REPAIRS: Some at Kenai.
FRESH WATER: Limited.
FUEL: Not available.
MEDICAL: Health Centre, 3 doctors, 3 dentists.
TRANSPORTATION: Highway to Anchorage and Homer. Air transport available.

OAKLAND, California: 37.50 N. 122.18 W.

(See Plan Book)

Also See "San Francisco" *for Documents, Pilotage, etc.*
HEALTH: See "Health: all Ports" before first U.S.A. port (Albany). Illness reports made to San Francisco Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
BERTHING: *Public Container Terminal:* Berths 5 and 6. Operator: Crescent Wharf and Warehouse, 1195 Maritime Street, Oakland, Ca. 94607. Tel. (415) 763-7470.

Berths: 2, length 1,989 ft. (1 berth completed by mid 1980), water depth 42 ft. MLLW (in 1980).

Container handling facilities: 1 Paceco 30-ton container crane (2 additional cranes available by August/September 1980); 6 Raygo Wagner Port Packers; 2 rubber tyred transtainers; 72 refrigerated container outlets; 4 truck scales; additional equipment as required. Combination, port packer/transtainer operation.

Berths 10, 11, 12: Operator: Maritime Services International, 1625 Maritime Street, Oakland, Ca. 94607. Tel. (415) 456-5669.

Berths: 3, length 3,039 ft., water depth 31 ft. (plan to increase to 35 ft.). Multi-purpose cargo terminal designed to handle break bulk, heavy lift cargoes, containers, automobiles, and roll-on/roll-off operations. 1 250-ton mobile truck crane and additional equipment as required.

Sea-land Container Terminal: Operator: Sea-land services, Inc., 1425 Maritime Street, Oakland, Ca. 94607. Tel. (415) 271-1000.

Berths: 2, Length 1,355 ft., water depth 40 ft. MLLW.

Container handling facilities: 3 Paceco, 30-ton cranes; 3 truck scales; 250 refrigerated container outlets. Chassis operation.

Matson Container Terminal: Operator: Matson Terminals, Inc., 3050 7th Street, Oakland, Ca. 94607. Tel. (415) 893-2456.

Berths: 3, including 1 for roll-on/roll-off operations. Length 2,220 ft., depth 35 ft. MLLW.

Container-handling facilities: 3 container cranes – 27.5 ton Star; 30-ton Paceco; 33-ton Star. 1 truck scale; 200 refrigerated container outlets. Container yard is straddle carrier-type operation (containers stored 2 or more high).

Oakland Container Terminal: Operator: Oakland Container Terminal Co., 707 Ferry Street, Oakland, Ca. 94607. Tel. (415) 834-5822.

Berths: 2, length 309 m. depth 10.7 m. MLLW.

Container handling facilities: 1 Modified "A" frame Paceco 40-ton container crane; 1 truck scale; 150 refrigerated container outlets. Container yard utilises a wheeled Paceco transtainer. Containers are stored 5 abreast and 2 or more high.

7th Street Public Container Terminal: Operator: Marine Terminals Corporation, 5190 7th Street, Oakland, Ca. 94607. Tel. (415) 839-6490.

Berths: Five. 3 container, 2 roll-on/roll-off and/or Combination break-bulk/container. Length 2,963 ft., water depth 35 ft. MLLW.

Container handling facilities: 3 Paceco low-profile, 40-ton container cranes; 4 truck scales; 96 refrigerated container outlets.

United States Lines Container Terminal: Operator: United States Lines, 1579 Middle Harbor Road, Oakland, Ca. 94607. Tel. (415) 465-4010.

Berths: 2, Length 1,443 ft., water depth 35 ft. MLLW.

Container-handling facilities: 2 Alliance low-profile, 51-ton container cranes, 1 crane modified for 125ft. outreach at 39 tons; 7 truck scales and outlets for 100 refrigerated containers. Container yard is chassis-type operation.

Outer Harbour Public Container Terminal: Berth 4: Operator: Marine Terminals Corporation, 909 Ferry Street, Oakland, Ca. 94607. Tel. (415) 763-4289.

Berths: 1. Length 750 ft., water depth 35 ft. MLLW. 50 Refrigerated container outlets, 2 truck scales, 140-ton Paceco container crane.

American President Lines/Seatrain Container Terminal: Operator: American President Lines, Inc., 1395 Middle Harbor Road, Oakland, Ca. 94607. tel. (415) 271-8000.

Berths: 2. Length 1,300 ft., water depth 35 ft. MLLW.

Container handling facilities: 2 Alliance low-profile, 55 ton container cranes, 1 crane modified for 125 ft. outreach at 47 tons.; 3 truck scales; 108 refrigerated container outlets. Container yard is chassis-type operation.

Grove Street Terminal: Operator: Unassigned: Contact Port of Oakland for information. Construction now underway to convert this facility to a modern 43 ft. container terminal served by 2 container cranes and 3 berths. Fully operational by February 1982.

9th Avenue Terminal: Operator; Marine Terminals Corporation, foot of 9th Avenue, Oakland, Ca. 94606. Tel. (415) 452-3742.

Berths: 3. Length 2,052 ft., depth 35 ft. at MLLW.

Facilities: Import steel and bulk cargo-handling centre. 4 Manitowac crawler truck cranes (capacity 100 tons). Bulk-loading facilites with 10 steel storage silos capable of holding 9,750 cu.ft. each. Rail track alongside berth.
AUTHORITY: Port of Oakland.
AGENT: See "San Francisco".

OGDENSBURG, New York: 44.42 N. 75.30 W.

(See Plan Book)

Refer to "St. Lawrence Seaway" for important general information.
PILOTAGE: Seaway Pilot boards at Cape Vincent or Snell Lock and acts as docking Pilot.
ANCHORAGE: Anchorage area West of city at open roadstead area.
RESTRICTIONS: No tide. No restrictions other than Pilots' discretion as to wind and visibility.
MAX. SIZE: Largest vessel to enter 600 ft. long. Draft 27 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany), Illness reports made to New York Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Western Union to OCN Corp. VHF Seaway Channel via Maria Radio Cardinal.
TUGS: No tugs necessary.
BRIDGES: Ogdensburg/Prescott International Bridge – 126 ft. clearance MWD.
BERTHING: By prior notice only. Port Authority Terminal, length 600 ft., depth 27 ft. One Grain Elevator capacity 500,000 bushels.
CRANES: Available, up to 82 tons capacity.
STEVEDORES: Order by 1800 hrs. day preceding arrival. Advise any change of ETA.
MEDICAL: Excellent medical service and availability of doctors. No vaccination necessary.
DENSITY: Fresh water.
FRESH WATER: Available by pipeline at Port Authority Terminal.
FUEL: One day's notice, all grades. Diesel, bunker "C", Kerosene.
GANGWAY/DECK WATCHMEN: Normally not used.
OPENING/CLOSING HATCHES: By stevedores.
CUSTOMS ALLOWANCE: Tobacco, wine/spirits, normal Customs allowance U.S. Ports.
CARGO GEAR: 25 ton mobile crane, fork trucks to 13 tons capacity. Ship's gear to be in good working order.
IDENTIFICATION CARDS: Needed as per Immigration Department requirements.
REPAIRS: Limited dockside repairs available.
REPATRIATION: Can be arranged.
AIRPORT: (0.5 mile from city). Allegheny Airline – 3 flights daily to Syracuse, New York, etc.

TIME: 5 hours difference Eastern Standard Time. Daylight Saving time in Summer.
HOLIDAYS: New Year; Washington and Lincoln's Birthdays; Memorial Day; 4th July. Labour Day, Veteran's Day.
POLICE/AMBULANCE/FIRE: Police, 393-1551; Ambulance, 393-1221; Fire, 393-1010.
TELEPHONES: Available at Pierside (315) 393-7580.
SHORE LEAVE: Crew members allowed ashore.
AUTHORITY: Ogdensburg Bridge and Port Authority.

OLYMPIA, Washington: 47.00 N. 122.53 W. (See Plan Book)

PORT LIMITS: Vessel is to be considered an "arrived ship" at the Port of Olympia, Washington, when anchor is dropped in Budd Inlet or when the vessel is all fast at the dockside.
DOCUMENTS: See "Tacoma".
PILOTAGE: The vessel picks up Puget Sound Pilot at the Port Angeles pilot station located at the entrance to Puget Sound on the Straits of Juan de Fuca, and it is normal for the vessel's Agent to provide the pilot station with a 48-hour, 24-hour, 12-hour and 8-hour ETA. The pilot station monitors VHF Channel 13.
ANCHORAGE: Safe anchorage is located North of Olympia Shoal in 24 – 30 fathoms of water. The bottom is sandy and area is a sheltered inlet.
RESTRICTIONS: Channel depth 30 ft. MLW with a high tidal range of 14.4 ft. Also restricted turning basin of 800 ft. Vessels max. size would be governed by the turning basin of 800 ft. and draft of 30 ft. at MLW.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: "KPH" San Francisco or Mackay Radio, Everett "KLB".
VHF: No VHF other than Pilot to tug or ship to tug available at Olympia.
TUGS: Tugs are dispatched from Tacoma, Washington, 30 miles to the North, and generally join the vessel at the outer channel limits. They use ship's lines to assist the vessel in turning at the turning basin and to moor.
BERTHING: Olympia has 4 deepwater berths, numbered 1 to 4 proceeding from South to North. Berth No. 1 has a maintained depth of 40 ft. and will be under construction until January 1981. Berth No. 2 is a concrete dock with 40 ft. depth MLW. Berth No. 3, 40 ft. MLW and supported by 2×50-ton gantry-type cranes. Berth No. 4, 35 ft., primarily used as lay-by berth or loading waterborne cargoes.
CRANES: 2 Washington whirley-type cranes available at Berth No. 3 with max. capacity of 50 tons. Presently rigged for 12 tons and primarily used in bulk unloading with clams.
BULK CARGO FACILITIES: Presently discharged with ship's gear at Berth No. 2 or shore cranes and clams at Berth No. 3. Primary backup cargo yard of approximately 12 acres handling coke, coal, pig iron and other bulk-type cargoes.
SPECIALIZED CARGO-HANDLING FACILITIES: Olympia is generally an open cargo yard; however, it can be adapted for ro-ro traffic and is presently engaged in handling bulk cargoes such as coal, coke, etc.
BRIDGES: None pertinent to this area.
STEVEDORES: 3 stevedoring companies available in the Olympia area. 8 local gangs available for loading or discharging.
MEDICAL: Medical and hospital facilities are available without prior notification for emergencies; otherwise all medical and dental requirements can be taken care of by appointment.
TANKERS: No shore facilities for loading or unloading of tankers.
DENSITY: Salinity is on an average 29 parts per thousand.
FRESH WATER: Delivered to vessel by shoreside hose.
FUEL: Most grades available by barge from Seattle for fueling at dockside.
FIRE PRECAUTIONS: Standard for U.S. ports.
CONSULS: Most located at Seattle 60 miles to the North.
REPAIRS: All types of repairs possible.
DRY DOCKS: None available in Olympia. Nearest 60 miles to North at Seattle.
SURVEYORS: Lloyds, A.B.S., N.V. available out of Seattle area.
GANGWAY/DECK WATCHMEN: Not required at Olympia under most circumstances unless crew members detained.
CUSTOMS ALLOWANCES: Sufficient quantities of tobacco, wine and spirits are permitted out of bond for each crew member sufficient to cover length of stay anticipated at the time of arrival. Actual quantities are at the discretion of the boarding customs officer.
CARGO GEAR: Generally vessels are loaded and/or discharged using ship's gear. However, 2 max. 50-ton capacity whirley cranes are available for use for specific commodities and in the event of gear failure.
REPATRIATION: Facilities exist for repatriation of crew members.
AIRPORT: Local airport service by commuter airlines only and major international airport located 40 miles to the North.
TIME: GMT minus 8 hours. Daylight saving time in effect during Summer months, hours from 0001 27th April to 0001 26th October.
HOLIDAYS: Official holidays observed by the State of Washington for 1980 were: January 1st, February 12th, February 18th, May 26th, July 4th, September 1st, November 11th, November 27th, November 28th and December 25th.

Work is available on an overtime basis on all days except Christmas, December 25th; January 1st, New Years Day; and July 4th and 5th.
POLICE/AMBULANCE/FIRE: Telephone dispatch for emergency services, the numbers 911 dialled on any public telephone.
TELEPHONES: Public telephones are located within 100 ft. of any berth and are not provided on board the vessel.
SERVICES: Tank-cleaning, tank-washings, compass adjusting, etc., are all available from the Seattle area, located 60 miles to the North, and most services provide travelling repairs.
SHORE LEAVE: Crew are allowed shore leave by U.S. Immigration, depending on individual case.
IDENTIFICATION CARDS: Not issued by the Port of Olympia, and seaman's book is generally sufficient to allow Immigration, to determine whether shore leave should be granted.
REGULATIONS: Similar to all North American ports; no special rules or regulations applied to vessels by the Port of Olympia. Rules are set forth in Tariff No. 6.
DELAYS: Only delays that should be encountered at the Port of Olympia would be in the event of berth congestion.
DEVELOPMENTS: Berth No. 1 is under reconstruction at present and is expected to be completed with a longer concrete quay-type facility by January 1981.
AUTHORITY: Port of Olympia.
AGENT: See "Seattle".

ORANGE, Texas: 30.06 N. 93.44 W. (See Plan Book)

DOCUMENTS: Crew Lists, Passenger List and Customs Documents.
PILOTAGE: Radio to Agent, 12 hours and Pilots 2.5 hours in advance of ETA. Pilots contacted by VHF Channel 12 and 13. Pilots board at Sabine Pass, Sea Buoy position 29° 36′ N., 93° 48′ W. or upon request board at 29° 25′ N., 93° 40′ W. Pilot boats FM (VHF) Channel 65 – 156.275 mc/s.
ANCHORAGE: Off Sabine Bar – 40 ft.
RESTRICTIONS: Sabine River Channel: Project depth 30 ft.; bottom width 200 ft., including slip at port; marked and lighted for 24-hour navigation. Turning basin, 1,000 ft.×3,000 ft.
MAX. SIZE: Length – no limit, breadth – no limit, draft – 30 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: RCA – Global Communications.
TUGS: Join vessel in port turning basin. Tug's line used, no charge.
BERTHING: 2,308 ft. mooring space to accommodate 4 deep-sea vessels; all concrete docks; additional berthing space in slip for laying-up 4 vessels. Layberth facilities also available. 9 finger piers ranging in length from 480 ft. to 900 ft., depth 20 ft.
STEVEDORES: 5 stevedore companies – handled through Agent.
MEDICAL: Local facilities – complete.
TANKERS: Limited to 30 ft. draft.
DENSITY: Brackish.
FRESH WATER: Ample fresh water, through 2.5 in. connection, rate of delivery about 500 gallons per minute.
FUEL: All grades available; 8 hours advance notice required.
FIRE PRECAUTIONS: No welding or burning without U.S. Coastguard welding permit; also special authority required for ships loading explosives.
CONSULS: None available locally.
REPAIRS: Facilities available.
DRY DOCKS:
Levingston Shipyard – Orange.
400 ft.×126 ft. 11,000 tons, 17 ft. draft over blocks.
350 ft.×60 ft. 3,000 tons, 15 ft. draft over blocks.
250 ft.×72 ft. 3,000 tons, 11 ft. draft over blocks.
REPATRIATION: Can be arranged through area Immigration.
AIRPORT: Local, no scheduled airlines. Mid County Airport with scheduled airline service – 30 miles.
HOLIDAYS: New Year's Day; Martin Luther King's Birthday; Lincoln's Birthday; Washington's Birthday; Texas Independence Day; St. Patrick's Day; Good Friday; Memorial Day; Emancipation Day; Independence Day; Labour Day; Columbus Day; Veterans Day; Thanksgiving Day; Christmas Day; Any holiday which falls on Saturday or Sunday will be recognized on the following Monday. No work performed on Labour Day or Christmas Day.
POLICE/AMBULANCE/FIRE: Police 883-5654; Ambulance 883-4333; Fire 886-7431.
TELEPHONE: Can be connected on board.
GENERAL: No strong tidal currents at the berths, excellent shelter during tropical storms.
DEVELOPMENTS: Additional 37 acre tract on Sabine River for future development.
AUTHORITY: Orange County Navigation and Port District.

OSTRICA, Louisiana: 29.22 N. 89.32 W.

East Bank of Mississippi river about 42 miles above S.W. Pass entrance.
DOCUMENTS/PILOTAGE: For all general information refer to "New Orleans".
ANCHORAGE: Available in river downstream of docks.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Not normally required.
BERTHING: Gulf Refining Co. Terminal, tanker berth 45 ft. depth. 2×8-in. hoses loading 34,000 bbls.p.h. Ballast line 18 in. for slop discharge.
FRESH WATER: Not available.
FUEL: Bunker "C" available ex-wharf.
DENSITY: Fresh water (1000).

OSWEGO, New York: 43.28 N. 76.30 W.

(See Plan Book)

Oswego harbour is located on the South shore of Lake Ontario about 15 miles from its East end at the outlet to the Oswego River. It is the first major port on the Great Lakes off the seaway. It is also the Great Lakes entrance to the Great Lakes – Hudson River Waterway which connects with the Hudson River at Troy.

PILOTAGE: No requirements.

RESTRICTIONS: Average navigation season – April 1st to December 15th.

Approaches: Through entrance between the Arrowhead Breakwater pier heads and detached breakwater.

Entrance is 750 ft. wide with a depth of 25 ft. at LW datum.

Controlling depth of water 25 ft. at datum.

No Vessel length and beam limitations.

Approach open 24 hours a day.

Navigation lights available

Harbour: Controlling depth – front of each terminal open for public use. 21 ft. on West side. 28 ft. on East side.

Turning Basin – 115 acres.

Accessible 24 hours per day.

No Vessel length and beam limitations.

HEALTH/AGRICULTURE: See "Health" and "Agriculture" before first U.S.A. port (Albany).

TUGS: Towage facilities available on request.

BERTHING: The general cargo facilities are operated by the Port of Oswego Authority. The West Side Facility is a finger pier 1,000 ft. long providing 4 berths and has 21 ft. of water alongside at LW datum. 28,000 sq. ft. of covered storage is available with limited open storage. A million bushel grain elevator is situated on this pier. The East Side Facility is a marginal wharf 1,900 ft. long, providing 3 berths and has 27 ft. of water alongside at LW datum. 134,000 sq.ft. of covered storage is available with unlimited open storage.

Oswego exports general cargo. It imports grain, cement, wood pulp, petroleum and general cargo.

New Marginal Wharf: Length of berth 1,750 ft. Depth 25 ft. at LW datum.

BRIDGES: None.

CRANES: Mobile heavy lift equipment available.

BULK HANDLING FACILITIES: One 1,000,000 bushel capacity elevator equipped with 3 loading spouts, 2 Marine legs and 2 car pits.

FRESH WATER: Available at all general cargo docks.

FUEL: Seaway Terminal of Metropolitan Petroleum Corporation, 4 tanks – Capacity 327,000 barrels of No. 2 and No. 6 oil. Coal bunkerage available by truck delivery.

CONSULS: None.

REPAIRS: Above waterline repairs available.

AUTHORITY: Port of Oswego Authority.

PALM BEACH, Florida: 26.46 N. 80.03 W.

(See Plan Book)

LOCATION: Port is located on a salt water sound known as Lake Worth and lies 1.3 miles from the 37 ft. contour of the Atlantic Ocean to which it is connected by an artificial cut at the North end of Lake Worth known as Lake Worth Inlet. The Inlet is located within the boundaries of the City of Riviera Beach, Florida.

PORT LIMITS: Sea buoy at channel entrance. Dockage charges commence when vessel is made fast to wharf, and are on a 24 hour basis or fraction thereof.

DOCUMENTS: See "Jacksonville". All vessels shall, upon arrival, report to Port Director all cargo to be discharged. Such report shall be in form of copies of Ship's Manifest, or certified statements, and shall show number of units, commodity, weight, destination, consignee, and all other information which port of Palm Beach deems necessary for compilation of commercial statistics, for reserving of necessary warehouse or wharf space, or other purposes.

All vessels shall, before sailing, report to the Port Director all cargo loaded into such vessels. Such reports shall be in the form of copies of the ship's manifest, or certified statements, and shall show numbers of units, commodities, and all other information which the Port of Palm Beach deems necessary for compilation of commercial statistics, or other purposes.

PILOTAGE: Compulsory. Provided by Pilots' Association of the Port of Palm Beach, 130 East Port Road, Riviera Beach, Florida, 33404.

CHANNEL: Entrance to the harbour is by a dog-leg channel running due West through the jetties and then turning South-westerly to the terminals. The channel is 400 ft. wide, narrowing to 300 ft. in width as it continues across the lake another 3,000 ft., leading into a trapezoidal turning basin, 1,400 ft. by 1,310 ft. adjacent to the port terminals on the West shore, with an extension of 672 ft. at 25 ft. depth to the New North Wharf and Loading Ramps. Present depth of entrance channel is 35 ft. at MLW.

ANCHORAGE: Anchorage is designated by the Bar Pilots, which in most instances is at sea. Port has no established anchorage.

MAX. SIZE: Vessels up to 620 ft. in length with draft of 34 ft. have used facilities.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Port has no communication equipment. U.S. Coast Guard Station, Peanut Island, Riviera Beach, Florida, can be reached on 2182 kHz – 2678 kHz – 156.8 mHz. Pilots VHF Channel 16.

TUGS: Available to assist berthing. Service is provided by the Port Towing Corporation, P.O. Box 12425, Lake Park, Florida 33403. Office Tel. 622-6422 and 622-8688, nights and holidays 844-4244.

BERTHING: 2 slips and 4 marginal wharves with 6 ramps including a 14 acre container facility.

Supplementing the berths are 157,400 sq.ft. of warehousing space. Open storage area is within easy reach of all berths.

All vessels, their Owners or Agents, desiring a berth at wharves, shall, as far in advance of date of docking as possible, make application to port specifying date of docking, sailing, nature and quantity of cargo to be handled, and name of the vessel.

SPECIALISED CARGO HANDLING FACILITIES: Ramps for roll-on/roll-off cargo and wharfside accommodation for equipment to handle containerised cargo only.

STEVEDORES: The recognised working hours of port shall be from 0800 until 1200 hrs. and from 1300 until 1700 hrs., Monday through Friday, holidays excepted. During the recognised working hours services will be charged for on a straight time basis.

When vessels are loading or discharging cargo the port may furnish checker-foremen to supervise release of cargo being loaded and/or check cargo being discharged. The charge for each man furnished will be based on labour-furnished rates for foremen, with the Port reserving right to furnish as many men as they deem necessary to protect their interests. Charges for this service will be rendered against the vessels, their Owners, or Agents.

TANKERS: The port receives tankers each month in the 15 to 18 thousand gross ton limit.

FRESH WATER: Fresh water delivered to vessels at wharves or docks.

FIRE PRECAUTIONS: Smoking is strictly prohibited in transit sheds, warehouses, or on apron of wharves and on vessels, handling dangerous, hazardous, or inflammable cargo. Smoking is also strictly prohibited in any areas where gasoline or like materials are being handled or serviced to equipment.

Explosives and hazardous or highly inflammable commodities or materials may be handled over, or received on, the wharves or other facilities of port of Palm Beach by special arrangements with and at the option of the Port Director, and the receiving, handling, or storage of such commodities shall be subject to Federal and State laws, rules and regulations.

In all cases where explosives and hazardous or highly inflammable commodities or materials are to be handled, prior consent by the U.S. Coast Guard must be received and a copy of the consent filed with the Port Director. Responsibility for safeguarding of life and property will be the duty of the shipper. Proof of sufficient liability insurance must be presented to Port Director prior to arrival of such materials.

CONSULS: Barbados and Monaco.

CARGO GEAR: Crane capacity can accommodate single lifts up to 300 tons. Also available are 2×150-ton cranes, 1×200-ton crane, 1×65-ton crane and 1×40-ton crane also 1×23-ton fork lift.

HOLIDAYS: New Year's Day; Washington's Birthday; Columbus Day; Decoration (Memorial) Day; Independence Day; Labour Day; Veteran's (Armistice) Day; Thanksgiving Day; Christmas Day. When any one of these falls on Sunday, the following Monday is observed as a holiday. When any one of these falls on Saturday, the preceding Friday is observed.

GENERAL: Marine terminal 1.3 miles from the open sea, served by U.S. Highway 1 and is directly connected by port-owned belt-line railroad to the Florida Coast Railway.

Broad aprons (80 ft.) with ship-side rail, and warehouses backed by open storage areas. The slips and wharves are located on a salt water sound, fully protected from the sea by barrier islands; departures from the slips average only 15 minutes through inlet to open sea.

DEVELOPMENTS: New 14 acre container marshalling area has been recently completed. New raw sugar storage facility at Slip 2.

AUTHORITY: Port of Palm Beach.

PANAMA CITY, Florida: 30.10 N. 85.40 W.

(See Plan Book)

DOCUMENTS:
3 Passenger Lists.
3 Crew Lists.
3 Curio Lists.
3 Stores Lists.
Register.
Load-line Certificate.
Tonnage Tax Certificate.
Certificate of Financial Responsibility (Oil Pollution).

PILOTAGE: Compulsory. Pilots board at sea-buoy. Guard Channel 16 VHF. Safe anchorage at sea-buoy if waiting for Pilot. Pilot boat black hull with white lettering.

ANCHORAGE: Several safe anchorages inside bay with 32 ft. or more depth.

RESTRICTIONS: Maximum safe draft over bar is 32 ft. No other restrictions except in case of bad weather.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Preferably WLO Radio, Mobile, Alabama, U.S.A. Also good service from RCA. Vessel should radio ETA and cash requirements.

TUGS: 2 tugs available. Tug is used only to assist in berthing. Always uses ship's lines.

BERTHING: Any time, except for unusual weather. Good safe port. Berths are about 1 hour from Pilot station.

West Berth: Length 631 ft. Depth 32 ft.
South Wharf: Length 1,075 ft. Depth 32 ft.
Barge Terminal: Length 600 ft. Depth 12 ft.

STEVEDORES: Must have ETA by 1500 hrs. local time in order commence loading 0800 hrs. next day. Normal work day 0800 – 1200 hrs., then from 1300 – 1700 hrs., Monday through Friday.

MEDICAL: Medical and hospital service available.

TANKERS: No slop discharge facilities. 1 tanker berth – 29 ft. max. draft.

DENSITY: Salt water. 1.5 ft. tide range.

FRESH WATER: Available all berths but ships must supply hose.

FUEL: Limited amount of diesel oil available. No heavy fuel.

GANGWAY/DECK WATCHMEN: Only if required by ship's Owners or Master.

OPENING/CLOSING HATCHES: Only McGregor hatches may be opened by the crew.

CUSTOMS ALLOWANCES: Tobacco, 1 carton 200 cigarettes. Wine/Spirits, reasonable quantity – 1 or 2 bottles.

CARGO GEAR: Must show safety inspection if requested.

IDENTIFICATION CARDS: All crew must have U.S. Immigration Landing Permit.

CONSULS: None.

REPAIRS: Limited deck and engine repairs can be effected.

REPATRIATION: Available.

AIRPORT: Approximately 4 miles from port. Served by 2 scheduled air lines.

TIME: Central Standard Time (GMT minus 6 hours or 90° Meridian). Central Daylight time in Summer (minus 5 hours or 75° Meridian time).

HOLIDAYS: *No work holidays:* New Year's Day; Easter; 4th July; Labour Day; Christmas Day.

Working holidays: Lincoln's Birthday (February 12); George Washington's Birthday (Third Monday in February); Memorial Day (Last Monday in May); Veterans Day (Fourth Monday in October); Fall Festival Day, Thanksgiving Day (Fourth Thursday in November).

POLICE/AMBULANCE/FIRE: Dial operator, or 785-6161.

TELEPHONES: Placed aboard only by very special arrangement – not normally available.

SERVICES: Most repairs to radio, radar and other such equipment. Advance notice required.

SHORE LEAVE: Any time – any berth.

DELAYS: Normally, delays infrequent and for short durations.

DEVELOPMENTS: The West Wharf is to be extended by 350 ft.

AUTHORITY: Panama City Port Authority.

PASADENA, Texas: 29.43 N. 95.13 W.

Refer to "Houston" for all general information.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

PASCAGOULA, Mississippi: 30.21 N. 88.34 W.

(See Plan Book)

PORT LIMITS: Subject to Charter-Party Terms, an "arrived ship", subject to jurisdiction of the Port Authority, occurs when a ship arrives at Horn Island Sea Buoy.

DOCUMENTS: See "New Orleans".

PILOTAGE: Compulsory. Pascagoula Bar Pilots' Association ((601) –762 – 1151). Pilot boat to be contacted on VHF Channel 16, pilot boat has black hull with white house, International light and sound signals to be made by vessel requiring a Pilot. Pilot to be taken aboard vessel in vicinity of Horn Island sea buoy. Usual safety measures are required, with respect to boarding. Vessels may anchor in this area while awaiting Pilot, there is a 35 ft. to 50 ft. depth with good holding bottom.

ANCHORAGES: Only anchorages permitted are in vicinity of Horn Island Sea Buoy or seaward.

RESTRICTIONS: Under normal conditions there are no entry restrictions as to time or state of tide.

From Horn Island Sea Buoy to Horn Island Pass the channel is 350 ft. wide by 40 ft. deep; from Horn Island Pass to Pascagoula River Turning Basin the channel is 350 ft. wide and 38 ft. deep; the Pascagoula River Turning Basin is 950 ft. wide and 38 ft. deep.

Channel into Bayou Casotte (East Harbour) from Junction Buoy to mouth of Bayou Casotte Harbour is 225 ft. by 38 ft. deep; thence at inner harbour channel is 300 ft. wide and 38 ft. deep into the Bayou Casotte Turning Basin; the Bayou Casotte Turning Basin is 940 ft. wide and 38 ft. deep. All dimensions listed are project dimensions; depths refer to MLW datum.

No vessel or tow shall enter Bayou Casotte Channel outbound after a seagoing vessel or tow has passed Buoy 30 inbound, and; no vessel or tow shall enter Bayou Casotte Channel inbound after a seagoing vessel or tow has passed Buoy 11 outbound. Vessels or tows which are at a dock should remain at the dock until the inbound seagoing vessel or tow has passed, or until it has reached its berth, whichever occurs first.

MAX. SIZE: Length of vessel is restricted to approx. 900 ft. by turning basin, no breadth restriction, draft 38 ft. at MLW. Normal tidal range 1.6 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Use of Pascagoula Marine Radio (KLU-775) is advisable for ETA cables to Agent. Stands by on VHF Channel 16 and operates on Channel 27 throughout 24 hours.

RADAR/VHF: Radar and VHF radio on pilot boat, Channel 16.

Every vessel shall, when entering the Horn Island Pass Channel, and the Bayou Casotte Channel, or when getting underway from a berth, or when approaching the Pascagoula Channel while transitting the Intracoastal Waterway:

(a) Maintain a radio watch on VHF – FM Channels 13 and 16 in accordance with Vessel Bridge to Bridge Telephone Regulations of January 1st, 1973.

(b) Check on other traffic operating in the area by transmitting on Channel 16:

"SECURITY, SECURITY, SECURITY
THIS IS...
(Vessel Calling)
ENTERING ....
CHANNEL PROCEEDING FROM
......................TO...
CHECKING FOR TRAFFIC, STANDING
BY ON CHANNELS 13 and 16, ...
(Vessel Calling)
....OUT"

If other traffic replies, utilize Channel 13 for exchange of information relative to safe navigation.

TUGS: Tugs will join vessels in harbour or off docks. No escort required. Tugs lines normally are used.

BRIDGES: None affecting 38 ft. channels.

Two bridges across the Pascagoula River above the turning basin, not passed through between channel and harbour.

BERTHING: Private and public berths are available, by prior arrangement, in both the Pascagoula River Harbour (West Harbour) and the Bayou Casotte Harbour (East Harbour).

West Harbour – Public: Grain Elevator, 3,100,000 bushel capacity, 900 ft. berth at 780 ft. wharf and 38 ft. deep.

Terminal 'A' with transit shed, 500 ft. wharf and 38 ft. deep.
Terminal 'B' with transit shed, 544 ft. wharf and 38 ft. deep.
South Clusters, 1 ship berth approximately 600 ft. by 24 ft. deep.

West Harbour – Private – Ingalls Shipbuilding: Note. These berths are normally occupied with ships being fitted out and are not normally available.

West Bank Shipyard, 4,410 ft. bulkhead, 5 berths by 38 ft. deep.
East Bank Shipyard, three 600 ft. piers, one 800 ft. pier, each 32 ft. deep.

East Harbour – Public:
Terminal 'E' with transit shed, 517 ft. wharf by 38 ft. deep;
Terminal 'F' with transit shed, 737 ft. wharf by 38 ft. deep;
Terminal 'G' with transit shed, 516 ft. wharf by 38 ft. deep;
Terminal 'H' with transit shed, 556 ft. wharf by 38 ft. deep.

East Harbour – Private: Corchem/Corhart, 550 ft. wharf by 24 ft. deep;
Chevron U.S.A. Inc., Wharf No. 1, 5 berths by 38 ft. deep;
Chevron U.S.A. Inc., Wharf No. 2, 1 berth by 38 ft. deep;
Mississippi Chemical Company, 2 loading docks each 475 ft. by 34 ft. depth;
Chicago Bridge & Iron Company, slip 900 ft. by 16 ft. deep.

SPECIALISED CARGO HANDLING: Chevron U.S.A. Inc., Wharf No. 1 has facilities for handling acid, caustic, ammonia, and LPG, in addition to petroleum products.

Mississippi Chemical Company loading docks are equipped for handling phosphate rock and other bulk materials, liquid and dry.

Terminals E & F are equipped for exporting bulk ores.

CRANES: The Port has a heavy lift capability of 400 tons by an arrangement with Ingalls West Bank Facility. Truck cranes with capacity up to 110 tons also available in the port area.

STEVEDORES: 12 hours notice requested to arrange stevedore gangs. *Straight Time:* 0800 hrs. – 1200 hrs. and 1300 hrs. – 1700 hrs. Mondays through Fridays except Holidays. All other hours and days are overtime.

MEDICAL: Agents to be advised if immediate medical attention is required. Free pratique granted except in case of communicable diseases aboard, inoculations required by Public Health Service, etc. Doctors and hospital services readily available.

TANKERS: Chevron U.S.A. Inc. owns and operates 3 wharves on East side of Bayou Cosotte harbour. Facilities have 6 in., 8 in. and 12 in. lines with adaptors, discharge tanks with a capacity of 60,000 tons, 3 tanker berths with a 38 ft. draft. Wharf No. 2 for receiving crude oil from large tankers. Wharf designed and built for 50 ft. draft, but presently limited to 38 ft. draft on account of channel and seaward.

Also see "Shipmaster's Report".

DENSITY: Density varies with the state of tide and wind, from fresh to salt water.

FRESH WATER: Potable water is available at most berths. Water at public terminals can be delivered at flow rate of 50 g.p.m.

FUEL: Large vessels are bunkered at berth in the harbour by 2 tank barges, operated by Fuel Services, Inc. All grades of fuel are available.

FIRE PRECAUTIONS: Usual safety precautions required. Verify unusual procedures for approval of U.S. Coast Guard.

GANGWAY/DECK WATCHMEN: Port guards are furnished for the general cargo terminals at the port's expense. At least 1 person must be on duty aboard vessel.

HATCHES: Opening/closing hatches by the crew is at the discretion of the ship.

CUSTOMS ALLOWANCE: Each crew member is allowed either 300 cigarettes or 50 cigars or 3 lbs. of tobacco. In addition, each member is allowed 1 quart of alcoholic spirits as regulated by provisions of the Mississippi Alcoholic Beverage Commission rules.

CARGO GEAR: No requirements for cargo gear other than it be certified by a recognised International organisation.

CONSULS: Many countries have consuls within a 100 mile radius of Pascagoula. (Mobile and New Orleans).

REPAIRS: Most deck and engine repairs could be arranged within port facilities.

DRY DOCKS: Ingalls Shipbuilding Corporation, West Bank Shipyard, has 1 launch pontoon (dry dock) with 38,000 ton capacity.

Ingalls Shipbuilding Corporation, East Bank Shipyard, has 1 graving dock, 485 ft. inside length, 75 ft. wide gate, 34 ft. deep, with loading capacity of 1 ton per sq. ft.

Walker Shipyard has one 800 ton dry dock.

Flechas Shipyard has one 600 ton dry dock.

There are several marineways in vicinity, capacities 50 – 100 tons.

SURVEYORS: Licensed Marine Surveyors are available in Port.

REPATRIATION: The City of Pascagoula is served by regularly scheduled transportation. Vessel's Agent to arrange clearance with Customs and Immigration officials.

AIRPORT: An airport is available approx. 35 miles from the city and is served by regularly scheduled airlines.

TIME: The port of Pascagoula is on Central Standard Time, GMT minus 6 hours; clocks are moved ahead 1 hour during Summer months. (Last Sunday in April to last Sunday in October).

HOLIDAYS: New Year's Day (January 1st); King's Birthday (January 15th); Washington's Birthday (3rd Monday in February); Mardi Gras (41 days before Easter – Tuesday); *Easter Sunday/Easter Monday (1st Sunday after 1st full moon after March 21st); King's Memorial Day (April 4th); Memorial Day (Last Monday in May); *Independence Day (July 4th); *Labor Day (1st Monday in September); Veterans' Day (November 11th); Thanksgiving Day (Last Thursday in November); *Christmas Eve (December 24th); *Christmas Day (December 25th); *New Year's Eve (December 31st).

(*Non-working). Non-working holidays are observed from midnight of the holiday through to 0700 hrs. of the following day with the exception of Christmas Eve and New Year's Eve when the non-working portion of the holiday commences at noon.

Should any of the above holidays except Easter, Christmas Eve, and New Year's Eve fall on a Sunday the following Monday will be observed.

Elevator employees observe Martin Luther King's Memorial Day instead of Birthday.

Saturday shall not be considered as a layday in determining time ships are in berth in this harbour.

POLICE/FIRE/AMBULANCE: Telephone numbers for emergency services are: Fire 762-1133; Police 762-2211; Ambulance 762-6332. Universal emergency No. 911.

TELEPHONES: Telephones can be installed aboard vessels at a nominal charge.

SERVICES: Facilities are available for compass adjusting. Tank cleaning and receipt of tank washings can be arranged by contract services available in the area.

SHORE LEAVE: Allowed for any crew member not detained by Immigration Office.

IDENTIFICATION CARDS: Standard Immigration Form 1-95 to be made up for each crew member on arrival. Not necessary for crewmen already holding Form 1-95 issued for the same vessel.

DELAYS: Berths at Public Terminals and the South Clusters are assigned by the Harbour Master of the Jackson County Port Authority. Berths at private docks are assigned by the respective owners. No exceptions to this are allowed. Berth at grain elevator is assigned by the Lessee-Operator, the Louis Dreyfus Corporation. No delays are encountered by following this procedure, emergencies excepted.

GENERAL: Some difficulty encountered by unscheduled tows who use harbour for shelter in inclement weather. Pilot Association aware of current situations. Study of traffic control system is being undertaken by the Port Authority, particularly considering hazards of tankers in Bayou Casotte 225 ft. wide channel. Ample barge storage is available in Barge Fleeting Area South of Ingalls Westbank Shipyard – capacity is 96 barges, operated by Colle Towing Company who may be contacted on VHF Channel 16 (KKV-933).

SHIPMASTER'S REPORT: June 1980.

Vessel: 32,000 g.r.t., loading ammonia at Chevron Refinery.

Approaches: Charts BA. 3981 and 3380.

Approach made from the South East along the Safety Fairway using "Satnav" positions for the approach to the fairway entrance. Failing this the echo sounder may be used to good effect in conjunction with sights.

Two large oil rigs were sighted at the South East entrance to the fairway, but their positions were not plotted.

On the final approach visibility is often reduced due to industrial smog and the outlying islands are low and give no reliable positions until about 8 miles off. There are 4 conspicuous flares beside the Chevron Refinery which will give a good lead to the "HIP" buoy. These flares are not marked on either chart, but their approximate position is 30° 20.2′ N., 88° 29.3′ W.

Petit Bois Island is the first to show but with no distinguishing features until close to it. "HIP" buoy is easily identified at least 8 miles away and shortly afterwards the channel buoys may be identified on radar. These buoys are not marked on BA. 3380, but help indentify "HIP" buoys should there be fishing boats in the vicinity. There are numerous fishing vessels in the approaches but they do seem to keep the fairway clear. Many tugs and tows also in the area.

Pilotage: There is no berthing at night for vessels of this size (32,000 g.r.t.) due to having to turn in the turning area above the berth. Vessels may sail at night but careful consideration should be given to weather conditions before agreeing to do so.

Contacted Pilot Office on VHF Channel 16, thereafter working on Channel 13.

Pilot boards from a fast, black hulled launch off "HIP" buoy, ladder on lee side about 2 m. above water.

> *CAUTION:* The outer channel is well marked with conspicuous buoys but the configuration of the channel is liable to change. The approach may be swept with strong conflicting cross currents and, since the widest section is only 350 ft., very careful attention must be paid to steering.

Once inside Petit Bois Island the channel narrows to 225 ft. in places; the Pilots do have an unofficial 'one way traffic scheme' in progress but this is not always adhered to by tows and fishing vessels.

Proceeding inwards, the vessel is turned at the very head of the harbour with the assistance of 2 tugs; vessel is turned to starboard and the head tug then shifts from the port bow to the starboard bow for berthing. Berthing is always port side alongside.

There is not a great deal of room in the turning basin, although the Pilots say that vessels over 800 ft. are turned there regularly.

On sailing, with a deep draft (32 ft. maximum) special care must be paid to steering within the channel. With a width of just over 200 ft. there is no room for error. I would advise that the watchkeeping officer be in attendance on the helmsman throughout the passage.

Time from Pilot aboard to 1st line ashore is about 2 hours.

Berth: Chevron Refinery: Least depth sounded 12.2 m. Very good, with a substantial chicksan area and fairly good mooring arrangements.

Once made fast and loading a very careful watch must be kept on the moorings since large tankers pass up and down the harbour to the tanker berth close ahead; the shore personnel will not hesitate to stop loading if they think the moorings will allow the vessel to surge.

No motor access to the gate some 200 m. distant.

Telephone on the quay.

Loading: No difficulties were experienced. The facility is very keen on pollution and will watch the discharge of ballast very closely.

The refinery do require ballast to be discharged ashore but that is out of the question. A disclaimer will be presented for the ship to sign.

Since the upreach of the chicksan is not sufficient, the low extension or flexible hoses will have to be rigged prior to arrival. Shore connection is 8 in. 150 ASA and was done on this occasion by ship's personnel.

No vapour return line.

There is a recirculating system and there was no need to blow through lines on completion.

Product was cold at this call but 'warm' product has been experienced here in the past. Overall load rate was 343 t.p.h. which the shore personnel were extremely happy with. Hourly rates frequently over 500 t.p.h.

Shore Surveyor attended and all figures were based on ship's gauges.

Personnel generally helpful.

General: Fresh water available on the quay but reported as *not potable.*

Bunkers available.

Stores have to be manhandled along the jetty but there are small trolleys available.

Gangway: Best left turned in until in position thence no problem, being clear of obstructions.

No objection made to ship's crew "touching up" ship's side from quay.

U.S.C.G.: No inspection this call but they are known to carry out both cargo and navigational inspections.

Films: Exchanged by ship chandler: Bow and Stern Marine.

Consul: The nearest British Consul is at Houston or Atlanta, should any surveys be required.

AUTHORITY: Jackson County Port Authority.

PENSACOLA, Florida: 30.25 N. 87.13 W.

(See Plan Book)

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

BERTHING:

Berth Number	*Length (ft.)*	*Depth at MLW (ft.)*	*Use*
No. 2	400	35	General Cargo
No. 3	425	35	General Cargo and Lumber
No. 5	425	35	General Cargo
No. 6	580	35	General Cargo

BULK HANDLING FACILITIES: No. 1 Berth. Length 600 ft. Depth at MLW 35 ft. Discharge of bulk materials by conveyor, rate 400 t.p.h.

No. 1 Berth is also used for the discharge of oil, creosote oil and liquid chemicals into private facilities.

Dry bulk handling: Conveyor system with 5 shipside hoppers capable of handling nitrate, fertilizer and other dry bulk cargoes. Bulk warehousing capacity is 108,000 sq. ft. in 2 buildings. Each building with rail and truck loading capability. Bagging services provided on the port premises through arrangements with private stevedoring companies.

Liquid bulk storage: 6 storage tanks publicly operated with a total capacity in excess of 47,500 barrels. Private liquid bulk storage capacity exceeds 720,000 barrels.

CRANES: Mobile cranes up to 85 tons.

FRESH WATER: Available.

AIRPORT: Pensacola Regional Airport is served by both domestic and international air carriers in addition to intrastate airline service.

DEVELOPMENTS: *Port improvements:* New construction items for 1980 include an additional transit shed, dolphin mooring pier and an additional Ro-Ro ramp. Acquisition of additional waterfront land for port expansion and strengthening of a section of an existing bulkhead are other projects to be undertaken.

AUTHORITY: Port of Pensacola, Department of Transportation.

PETERSBURG, Alaska: 56.49 N. 132.57 W.

Located on Mitkof Island, Northern end of Wrangell Narrows. Open all year.

DOCUMENTS: See "Anchorage, Alaska".

PILOTAGE: (From sea via Dixon Entrance up Clarence Strait to Guard Island.) Under pilotage from Guard Island.

ANCHORAGE: Good anchorage in Scow Bay, mud bottom.

MAX. SIZE: Harbour depth 24 ft. MLLW. Tides: Diurnal range 15.7 ft. Also see "Berthing".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

CUSTOMS: Immigration, Guard Island. Quarantine and Customs, local.

TUGS: One × 320 h.p.

BERTHING: Pacific American Fisheries Inc.: 75 ft. long, 65 ft. wide. Should dock at slack water. Strong current.

STEVEDORES: 1 gang.

REPAIRS: Marine Ways to 35 tons.

WATER: State approved water available.

FUEL: Diesel and gasoline available.

MEDICAL: 21 bed hospital.

TRANSPORTATION: Scheduled and charter airlines and ferry.

AUTHORITY: City of Petersburg.

PHILADELPHIA, Pa.: 39.57 N. 75.10 W.

(See Plan Book)

DOCUMENTS:

3 Crew Lists Form I.418 (suggest 6 be made).
3 Passenger Lists Form I.418 (suggest 6 be made).
3 Customs Stores Lists (suggest 6 be made).
3 Curio Lists (own ship Form) (suggest 6 be made).
3 Narcotics Lists (own ship Form) (suggest 6 be made).
Manifest (Ship Cargo List). If Philadelphia first port of call, require 1 copy for Customs and 1 copy to be used as "traveller" surrendered last port of call. If Philadelphia not first port of call, required 2 copies, all cargo to be discharged at Philadelphia.

For Immigration Service:

Visaed Crew List.
Valid passport or Seaman's Book for each person on board.
Crewman's landing card (Form I.95) for each crew member.

PILOTAGE: Pilotage is provided by members of the Pilots' Association for the Bay and River Delaware who maintain a shore station and operations tower at Cape Henlopen. The Pilot Station is in operation on a 24 hour basis and guards VHF Channels 16 and 14. Telegraphic address is: DELPILOTS, 214 S. Eleventh Street, Philadelphia, Pa. 19107. Arrangements for Pilot may be made by the local Agent although an ETA and draft either by cable or VHF radio will be greatly appreciated and will facilitate prompt boarding on arrival. The Pilot boarding area is inside a line between Entrance Buoys No. 5 and 6, or approximately 2 to 2.5 miles S.E. of Harbour of Refuge Lighthouse. Pilots may board further off-shore upon special request.

ANCHORAGE: Large and deep draft vessels awaiting berth are encouraged to avail themselves of the deep water anchorage adjacent to the Breakwater near the Pilot Station. There are 13 anchorage areas available along the Delaware for moderate size vessels of lesser draft.

Shipmaster's Report: Good holding ground at Bigstone Anchorage. There is a launch service from Bigstone Anchorage to the shore, call VHF Channel 14.

RESTRICTIONS: There are no restrictions imposed upon entry except those dictated by vessel draft. Throughout most of its length, the Delaware river is dredged to 40 ft. at MLW. In addition there is a mean tidal range of about 5.7 ft. Vessels of 39 ft. salt water draft can safely transit the river on a rising tide.

MAX. SIZE: Deep-draft oil carriers are lightered in a special anchorage approximately 10 miles N.W. of the Pilot Station. Vessels are restricted to a max. draft of 55 ft. by Federal Law.

Chesapeake/Delaware Canal: See "Wilmington" – Delaware.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New York Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: A port radio service operated by The Philadelphia Maritime Exchange on a 24-hour basis is also available to all vessels while transiting the Delaware River. VHF Channels 16 and 14 guarded for purposes of this service.

TUGS: Tugs normally join vessels adjacent to berth. Ship's lines are used.

BERTHING:

Northern Metal Co. Terminal	9 berths, depth 25 ft. to 32 ft.
Tioga Terminal	7 ,, ,, 40 ft.
Delaware River Terminal	4 ,, ,, 29 ft. to 32 ft.
Port Richmond	10 piers, depth alongside 26 ft. to 36 ft.
Delaware River	21 ,, ,, ,, 26 ft. to 35 ft.
Greenwich Point Tidewater Ore Terminal	2 berths 850 ft. length, depth 37 ft. to 42 ft.
Girard Point	3 piers, depth alongside 28 ft. to 36 ft.
Camden	3 ,, ,, ,, 30 ft. to 40 ft.
Gloucester	Ore Pier, depth alongside 25 ft. and 31 ft.
Packer Avenue Terminal,	5 berths, depth alongside 35 ft.
Port of Wilmington,	5 berths, depth alongside 35 ft.

CONTAINER HANDLING FACILITIES: *Tioga Marine Terminal:* Handles containerised and roll-on/roll-off cargoes. The terminal is equipped with 2 container cranes and a 300-ton mobile crane. Length of the marginal wharf is 3,300 ft., upper slip berth 725 ft. and lower slip berth 625 ft.

Packer Avenue Marine Terminal: Handles containerised and roll-on/roll-off cargoes. The terminal is equipped with 3 container cranes, one has a heavy lift capacity of up to 375 tons. The marginal wharf is 3,200 ft. in length and the roll-on/roll-off slip berth is 825 ft. in length.

STEVEDORES: Ship's Agents make arrangements for stevedore gangs. Agents should be kept advised of any change in ETA.

MEDICAL: Advance notice of requirements desirable to the extent possible. Hospital facilities are available. Smallpox vaccination certificate required (see "Quarantine Declaration Form").

TANKERS: There are 83 petroleum handling berths along the Delaware River. All terminals are equipped with reducers. There are slop (residue) facilities at most terminals. Some main terminals listed below:

Fort Mifflin	Arco Marine, Inc.	40 ft. depth
Point Breeze	Arco Marine, Inc.	32 ,, ,,
	Ballast Wharf	32 ,, ,,
Hog Island	Gulf Oil Terminal	40 ,, ,,
Paulsboro	Mobil Oil Terminal	30 ft. and 40 ft. depth
	Patterson Oil Terminal	36 ft. depth
Marcus Hook	B.P. Oil Corp.	35 ,, ,,
	Sun Oil Co.	33 ,, ,,
Westville (Eagle Point)	Texaco Inc.	40 ,, ,,
Pennsauken	Greater Valley Oil Co.	34 ,, ,,
Girard Point	Gulf Oil Co.	33 ,, ,,
Delair	Hess Oil Co.	31 ,, ,,
Delaware City	Getty Refinery	37 ,, ,,

DENSITY: Philadelphia ports are fresh-water ports.

FRESH WATER: Fresh water normally not available directly at berth. Fresh water available by tank truck or through fire department. Water by barge available.

FUEL: Bunker C and diesel fuel available most oil terminals. Vessel's Agent should confirm berthing space at least 24 hours in advance.

GANGWAY/DECK WATCHMEN: These services are left to the discretion of the Master. It is often recommended by ship's P & I club that watchmen be engaged when seamen are detained by U.S. Immigration. Ship is subject to fines by U.S. Government if any detained seaman deserts vessel.

OPENING/CLOSING HATCHES: Normally opened/closed by stevedores.

CERTIFICATES: Ship's Register and Load-line Certificate are mandatory. If vessel is carrying passengers from the U.S. they will require a U.S. Coast Guard Certificate. This can easily be obtained in about 1 or 2 days subject to meeting the requirement for life-saving equipment.

CUSTOMS ALLOWANCES: No set rule. Reasonable amount allowed for personal use.

CARGO GEAR: For exceptionally heavy lifts, Sun Shipbuilding and Dry Dock Co. has a floating derrick with 800 tons lifting capacity.

CONSULS: The following countries are represented in Philadelphia:

Austria
Belgium
Canada
Colombia
Costa Rica
Denmark
Dominican Republic
Ecuador
El Salvador
Finland
France
Germany
Guatemala
Haiti
Honduras
Iceland
Israel
Italy
Japan
Mexico
Monaco
Netherlands
Nicaragua
Norway
Panama
Portugal
Spain
Sweden
Switzerland
Thailand
Venezuela

REPAIRS: All types of ship repairs can be effected.

AIRPORT: Philadelphia International Airport is located approximately 6 miles from central harbour area.

TIME: Standard time GMT minus 5. Daylight Saving Time (minus 4) is usually implemented about the last week-end in April.

HOLIDAYS: New Year's Day (1st January); Lincoln's Birthday (12th February); Washington's Birthday (22nd February); Good Friday; Decoration Day (May 30th); Flag Day (14th June); Independence Day (4th July); Labour Day (1st Monday in September); Colombus Day (12th October); November Election Day (1st Tuesday in November); Armistice or Veteran's Day (11th November); Thanksgiving Day; Christmas Day; and any other national holiday as may be provided by executive authority.

POLICE/FIRE/AMBULANCE: Fire LO 3-6700; Police 231-3131; Port Disaster 609-WO 3-6420, WA 5-8780.

GENERAL: If garbage removal is required while in port, it must be done under supervision of the plant quarantine service.

AUTHORITY: Delaware River Port Authority.

PINEY POINT, Maryland: 38.08 N. 76.32 W.

(See Plan Book)

Steuart Petroleum Company Terminal on East bank of Potomac River, 82 miles from sea.
DOCUMENTS/PILOTAGE: Refer to "Baltimore".
ANCHORAGE: Unlimited, available in Chesapeake Bay.
RESTRICTIONS: Berthing 24 hours a day with max. draft of 38 ft. Vessels exceeding 725 ft. or 37 ft. draft, 2 tugs required docking – 1 sailing. Vessels under, 1 tug docking, none sailing.
MAX. SIZE: Limited by depth at berth, 38 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Washington, D.C. Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: WMH Baltimore Radio. VHF channel 26.
TUGS: 2 tugs available for berthing, join vessel off berth.
BERTHING: 1 tanker berth only. Long lines required for first ashore.
FRESH WATER: Available at berth.
FUEL: Bunker "C" only, available ex-berth.
AIRPORT: Washington National or Baltimore-Washington.
TIME: GMT minus 6 hours.
SHORE LEAVE: Allowed.
GENERAL: Nearest city with full services is Washington, 65 miles distance.
AUTHORITY: Maryland Ports Administration.

PORT ADAMS, Texas: 29.45 N. 95.11 W.

Refer to "Houston" for all general information.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

PORT ANGELES, Washington: 48.08 N. 123.25 W.

(See Plan Book)

DOCUMENTS, etc.: Refer to "Tacoma".
PILOTAGE: Compulsory for all vessels except those in coasting trade. Pilot station at Ediz Hook serves all vessels bound for Puget Sound ports. Pilot boards off Port Angeles.
APPROACHES: Depth at entrance 100 ft. – 160 ft. No bar.
ANCHORAGE: In harbour, depth at least 42 ft. MLLW.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Available from Foss Launch and Tug Co.
BERTHING: 3 pier berths and 2 dolphin berths, depth up to 45 ft. MLLW. One electric gantry crane, capacity 5 tons. Forklifts with capacity to 10 tons.
STEVEDORES: 8 local gangs, additional gangs may be imported if required.
HOLIDAYS: See "Tacoma".
MEDICAL: All medical facilities available. Local hospital.
DENSITY: Salt water.
FRESH WATER: Available at all wharves.
FUEL: Barge delivery only.
REPAIRS: Minor repairs only.
GANGWAY/DECK WATCHMEN: Required only if detainees aboard.
CUSTOMS ALLOWANCE: No definite quantities specified; reasonable allowance at discretion of Custom's Inspector.
AIRPORT: William R. Fairchild International Airport 3.5 miles from the harbour.
AGENT: See "Seattle".

PORT ARTHUR, Texas: 29.53 N. 93.57 W.

(See Plan Book)

DOCUMENTS:
Entrance Direct from a Foreign Port:
Master's Oath on entry on vessel in Foreign trade, Customs Form 1300 (2 copies).
General Declaration, Customs Form 1301 (2 copies).
Ship's Stores Declaration, Customs Form 1303 (2 copies).
Crew Effects Declaration, Customs Form 1304 (2 copies).
Clearance from last Port.
Inward Foreign Manifest, Customs Form 7527-B (2 copies)
Passenger/Crew List. Form 418 (3 copies).
In event import cargo is onboard, an additional copy of each of the above Forms is required for travelling Manifest. A copy of the Manifest for each port is also required.
Entrance from Domestic Port:
Clearance from Last Port.
Crew Effect Declaration, Customs Form 1304 (2 copies).
Stores List, Customs Form 1303 (2 copies).
Crew List, Customs Form 418 (2 copies).
Master's Oath, Customs Form 1300 (2 copies).
General Declaration, Customs Form 1301 (2 copies).
PILOTAGE: Come up in vicinity of the sea buoy. 24 hours notice of ETA should be given and revised if ship is delayed 1 hour or more. Telegraphic address is "Sabine Pilots, Port Arthur, Texas". Pilot station keeps 24 hour continuous watch on VHF Channel 12 – 156.6 mc/s. and on 2738 kc/s. Pilot boat is motor vessel with black hull, white housing flying Pilot insignia by day and Pilot light by night. Location of Pilot boat is in general vicinity of Sabine Pass sea buoy. Pilot ladder only on lee side of vessel.

Pilot will, upon request and at extra cost, board incoming vessels at buoy marked "SB" in position 29° 25′ N. 93° 40′ W.
RESTRICTIONS: The Port Arthur ship channel is in operation 24 hours per day. The only restrictions that might hamper vessel traffic would be the draft of the vessel (Port will be able to handle vessels taking up to 40 ft. of water) or extremely bad weather conditions such as fog or high winds. Also, vessels of the 85,000 ton or more class can only be moved during daylight hours.
MAX. SIZE: Port Arthur ship channel will be authorised to 40 ft. in depth and will vary from 400 to 800 ft. in width. Turning basin, which is located at mile 19 (only about 0.5 miles upstream from existing port facility) is 900 ft. in width. Bulk carriers going to grain elevator at Port Arthur or to one of the oil refineries would only be restricted by draft which would vary from 30 ft. to 40 ft. depending on load/discharge berth the vessel is en route to. See "Berthing".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: For a vessel in the Gulf of Mexico, and en route to Port Arthur, the best way to route an ETA message is to radio "Port Arthur Radio" (Radio Marine Corporation of America) whose call sign is WPA. Port Arthur Radio will then either send the message through Western Union via its telefax machine or via telex if the receiver of the message has a telex machine. There are also radio stations located in Galveston, Texas (Mackay Radio, call sign KLC) and in Mobile, Alabama (call sign WLO).
TUGS: The exact position that the tug meets the vessel varies with each vessel but usually they meet just below Texaco Island. In some cases they meet as far up as Great Lakes Carbon (usually when vessel is in ballast and going to Gulf Oil Docks). Whether or not the tug uses the vessel's lines or its own lines depends entirely on the circumstances involved but the tugs usually use the ships lines. Port Arthur is served by 2 towing companies, (1) Moran Towing of Texas and (2) Sabine Towing & Transportation Company, Inc.
BERTHING: The first procedure for obtaining a berth at Port Arthur is to submit a Berth Request Form. The Berth Request will contain the following information and will be submitted, in duplicate, to P.O. Box 1428, Port Arthur, Texas: Date of request; type and name of vessel; loading ports; registry or flag; where vessel is to arrive from; ETA; where vessel is to sail for; estimated date of departure; what inbound cargo, if any, consists of; what outbound cargo, if any, consists of; date you expect to begin receiving outbound cargo. The Form must be signed by the Agent or Owner of the vessel. (Berth Request Form will be made available by the Port.) Upon receipt of a Berth Request from the Agent or Owner, the Port will then, upon determining availability of berth, return 1 copy of the initial Berth Request to the Owner or Agent as an assignment of berth. Berths are assigned on a first come first served basis at all times. All changes in vessel's ETA must be given to the Terminal Office immediately. All mooring and unmooring will be done by the Port. Procedure may differ at the various private terminals which are not under the jurisdiction of the Port Arthur Navigation District.

Also see "Developments".
BRIDGES: There are no bridges that would require a vessel to arrive at any certain time at Port Arthur, however, the first bridge approached involves a vertical clearance of 136 ft. MHW.
STEVEDORES: Advance order for longshore gangs varies as to contract held by ILA (International Longshoremen's Association). In Port Arthur, gangs have to be ordered as follows: Order by 1900 hrs. for the next morning (either 0700 or 0800 hrs.); order by 1100 hrs. for 1300 hrs.; order by 1600 hrs. for 1900 hrs. Must order by 1900 hrs. day before for any starting time Sunday or Holiday.
MEDICAL: It is not usually required that the Agent be given advanced notice of required medical attention but in some instances it is helpful in arranging transportation to a hospital and in obtaining a bed in the event the hospitals are near full. Port Arthur is served by 2 hospitals; (1) St. Mary's Hospital and (2) Park Place Hospital, both of which are very well staffed and have adequate facilities for almost any emergency. Also, advance notice is helpful when vessel is scheduled to dock late in evening or during night, as doctors are not in their offices and have to be located.

Particular inoculations required by the Public Health Department vary as to the vessel's last foreign port of call. The only inoculation required of all vessels is smallpox. Any crew members who have not had the required inoculations can usually be given these inoculations on board either by the Public Health Officer or a Physician. This is usually arranged by the Agent or Owner.
TANKERS: There are 3 major Oil Companies: Gulf Oil Corporation; Texaco Oil Company, Inc.; and Petrofina Company. Gulf Oil Corporation and Texaco Oil Co., Inc. are 2 of the largest oil refineries in the country. The diameter of load/discharge lines range anywhere from 4 in. to 12 in. depending on the grade of the petroleum product being loaded. As far as slop discharge facilities are concerned, ballast tanks at all major oil companies. Gulf Oil has 3,400 linear feet of berth accommodations and Texaco Oil Co. has 5,299 linear feet of berth accommodations together enough to accommodate 11 supertankers plus barges. Petrofina Co., being the smaller of the 3 oil companies, has berth accommodations for 3 vessels.
BULK HANDLING FACILITIES: Texas Oklahoma Port Company's Bulk Marine Terminal in the Port's deepwater industrial park is located at Mile 26, handles dry bulk commodities from rail cars to storage to vessels at rates up to 3,000 t.p.h. and has space available for shipper storage tanks on pads, with open storage for 300,000 tons. The terminal also includes a 750 ft. wharf and is located directly on the Sabine-Neches Waterway which presently offers an authorized channel depth of 40 ft. All terminals described above are served by subject waterway and limitations of depth will vary at the face of dock at individual terminals. The Texas-Oklahoma Bulk Terminal maintains 40 ft. depth at the face of their facility.

DENSITY: Varies from fresh water (1000) to pure salt water (1025) depending on amount of rainfall and tide variations. According to figures obtained from the National Cargo Bureau, average density is 50% salt water or (1012.5).

FRESH WATER: The Port has 4 ships service outlets for fresh water, each of which is served by a 4 in. water line. Watering barges are available in the area for facilities which are not equipped to provide watering services.

FUEL: Almost any grade of fuel or marine diesel is available. In some instances there are fuel lines running directly to docks, but if not, bunkering barge is available. An advance notice is usually required by bunkering barge depending on number of vessels awaiting bunkering.

FIRE PRECAUTIONS: The Port has, in each of 4 equally spaced indentations along the front of its transit shed, a fire hose outlet fed by an 8 in. water line and there are numerous fire hose boxes throughout the transit shed. In addition to this a 24 hour guard service is constantly on the watch and is in direct communication with the Port Arthur Fire Department which is only seconds away. Authorized on-dock smoking areas are clearly defined for proper safety controls.

GANGWAY/DECK WATCHMEN: Under normal conditions a watchman is not necessary on most vessels. Under certain conditions such as a communicable disease or a malafide crewman a watchman would be feasible but the decision is left up to Master or owner of the vessel. There is a $1,000 fine if a malafide crewman disembarks from the vessel.

OPENING/CLOSING HATCHES: Paragraph 2, Rule No. 1 of the Deep Sea Longshore and Cotton Agreement for Texas ports and Port of Lake Charles, Louisiana, states as follows: "When vessel is in loading or unloading berth, loading and laying of dunnage and the opening and closing of hatches, when in connection with the handling of general cargo and/or cotton, is longshore work and will not be done by ship's crew." This agreement, however expired in 1978.

CUSTOMS ALLOWANCE: Tobacco: Each crewman is allowed to keep 300 cigarettes out of bond while in port. Wine and/or Spirits; Each crewman is allowed to keep 1 quart of spirits out of bond while in port.

CARGO GEAR: A current certified Gear Certificate is required to be on board at all times and is to be kept up to date.

IDENTIFICATION CARDS: American crewman do not need any identification card. Foreign crewman need only the landing permit from Immigration Department in order to go ashore.

CONSULS: The nearest Consul-Generals are in Houston, Texas. Port Arthur has only 2 honorary Vice-Consuls, which are: Norwegian and Spanish. Houston is approximately 90 miles from Port Arthur.

REPAIRS: All types of deck and engine repairs can be accomplished. Main ship repairers are: Gulfport Shipbuilding Corp., Burton Ship Yards, Inc., Sabine Propeller Company and Sabine Neches Shipbuilding Corporation, Coastal Marine Service, all of which are located in Port Arthur.

SURVEYORS: American Bureau of Shipping, Goodhue Building, Beaumont, Texas; Captain Van & Co., 1341 Procter Street, Port Arthur, Texas; Robert K. Hansen, 295 Rosine, Beaumont, Texas; National Cargo Bureau, Inc., World Trade Building, Port Arthur, Texas.

DRY DOCKS: 2 dry docks, largest being Gulfport Shipbuilding Co., which occupies 50 acres with 3,300 ft. of frontage on The Port Arthur Ship Channel. Yard designs, constructs and repairs barges, tugs and other vessels. It has fully equipped shops and 4 floating dry docks with lifting capacities of 500, 1,800, 4,000 and 4,200 tons. The smaller dry dock is Burton Shipyards, Inc., which occupies 60 acres with 3,200 linear ft. of frontage on Port Arthur Ship Channel. This yard also designs, constructs and repairs barges, tugs and other vessels. It has fully equipped shops, 2 marine railways with haul-out capacities of 1,000 and 1,500 tons and 1 floating dry dock of 3,000 ton capacity.

REPATRIATION: There are facilities for effecting crew changes and repatriation.

AIRPORT: Port Arthur is served by Mid-Jefferson County Airport which is located approximately 10 miles North of Port Arthur on Highway 69. The Mid-Jefferson County Airport is served by TIA (Texas International Airlines) and Delta Airlines.

TIME: Central Standard Time during Winter. Beginning April 28th until October 27th Central Daylight Time (clocks are moved ahead 1 hour). Central Standard Time is GMT minus 6 hours.

HOLIDAYS: Longshore Holidays are: Columbus Day (Second Monday in Oct.), Veterans Day (Nov. 13th), Thanksgiving Day (Fourth Thursday in Nov.), Christmas Day (Dec. 25th), New Year's Day (Jan. 1st), Martin Luther King's Birthday (Jan. 15th), Lincoln's Birthday (Feb. 12th), Washington's Birthday (Third Monday in Feb.), Texas Independence Day (March 2nd), Good Friday, Memorial Day (Last Monday in May), June 19th, July 4th, Labour Day (First Monday in September). At Lake Charles, LA., Mardi Gras Day to be substituted for Texas Independence Day. No work shall be performed on Labour Day or Christmas Day, except in case of fire or where property is in danger.

When holidays come on Saturday or Sunday, the following Monday to be recognized as the holiday. No work to be performed between 1600 hrs. and 1900 hrs. on election days. When Christmas falls on Saturday or Sunday, Monday will be an overtime day and gangs will work as ordered.

POLICE/AMBULANCE/FIRE: Police Department 983 – 5101; Fire Department 985 – 5511; Ambulance Service 985 – 5504 or 983 – 5666.

TELEPHONES: Facilities for placing a telephone on a vessel by request. There is a coin-operated telephone on the dock for anyone's use.

SERVICES: Tank cleaning done in port must be done by longshore labour. All major oil companies have facilities for removing tank washings.

SHORE LEAVE: The question of whether shore leave is allowed is entirely up to the ship's Master. The only requirements being; each crewman on shore leave must have a landing permit issued by the Immigration Department and no malafide crewman may be granted shore leave. Port Arthur has no restrictions pertaining to shore leave.

DELAYS: Delays in berthing usually arise from vessels ETA being delayed and thereby causing a berth conflict. The port is on a first come, first serve basis.

GENERAL: On vessels arriving directly from a foreign port there are 3 Government Agency Representatives that must board. Already mentioned and explained are Customs and Immigrations. The remaining one, Animal and Plant Inspection Services. The Meat Quarantine representative boards the vessel to seal up all meat with the exception of what will be needed while in port. In the event a vessel is detained in port for some reason and more meat is needed the Meat Quarantine Rep. must return to the vessel and personally break the seal and then re-seal the remaining meats. This representative boards all vessels entering the port whether from foreign or coastwise.

The Plant Quarantine Rep. boards all vessels entering from a foreign port to check all fresh fruits and vegetables for any foreign insects such as the Khapra Beetle.

DEVELOPMENTS: Located only 19 miles from sea, the new Public Ocean Terminal of the Port is located on the Sabine-Neches Waterway, presently 40 ft. deep with a minimum bottom width of 400 ft. The initial facility encompasses 360,000 sq.ft. including 1 transit shed 180 ft. × 600 ft. or 108,000 sq.ft. Rail trackage totals 120 car-spots at dockside with a 150-car storage yard behind the wharves. The facility includes a Gantry Crane (handling dry bulk, magnet, container and heavy lift cargoes) which straddles 2 of the 3 marginal tracks, travelling the entire 1,200 ft. length of dock. Crane will lift 75 tons a distance of 75 ft. off the face of docks, with all areas brilliantly lighted for 24 hour cargo operations. In addition to the 25 acre facilities described above, the District owns a total of 73 acres or 1 mile of frontage for future development. The master plan calls for a total of 4 Transit Sheds, additional open-dock wharves and roll-on/roll-off facilities.

AUTHORITY: Port of Port Arthur Navigation District of Jefferson County.

PORT CANAVERAL, Florida: 28.25 N. 80.35 W.

(See Plan Book)

DOCUMENTS: Vessels arriving in the Customs Territory of the United States, Bureau of Customs Documentary Requirements:

1. The vessel's Register, Load-line International Certificate, Tonnage Tax Certificates, Clearance from last Foreign Port, and Certificate of Financial Responsibility (Oil Pollution).

2. Additional Documents required:

(a) Original Manifest (lists) of:
All Cargo on Board – Customs Form 1302.
All Passengers on Board.
Stores List.
Crew Purchase List.
Crew List.
Narcotic List.

(b) All items listed in Nos. 1 and 2 *(a)* must be presented to the boarding Customs Inspector and later at the Customhouse for entry. In addition a Customs Form 1300 (Master's Oath) and Customs Form 1301 (General Declaration) must be presented at the Customhouse.

(c) Duplicate Manifest (lists) of:
1. All Cargo for discharge at this port.
2. All Passengers for discharge at this port.
3. Stores List.
4. Crew Purchase List.
5. Crew List.
6. Narcotic List.
7. CF3171 – Permit to Lade or Unlade (this will usually be furnished by the vessel's Agent prior to the arrival of the vessel).

(d) If vessel is proceeding coastwise from Port Canaveral with residue foreign cargo on board, prepare a Traveling Manifest which is a true copy of everything listed in the Original Manifest (2*(a)*). This must be presented to the boarding Customs Inspector and later at the Customhouse.

3. Other Documentary requirements: The Immigration Officer will require the original certificate crew list on form I-418. The same for passengers. He will also require the presentation of all passports and documents of seamen and passengers as to their immigration status for entry into the United States. A supply of Seaman's Landing Permit Form No. I-95A and passenger Permit No. I-94 should be maintained and they should be typed and ready for landing.

The Immigration Officer will want to inspect the entire crew. The Customs and Agriculture Officers will want to inspect the food storage areas and the quarters of the crew. The Agriculture Officer will also require a stores list. The Customs Officer will place a seal on the Bonded Stores Locker.

PILOTAGE: Pilotage is compulsory for all foreign vessels and for United States vessels under register in the foreign trade. Pilotage is optional for United States coastwise vessels who have on board a Pilot licensed by the Federal Government. Vessel applies for Pilot through Agent or Port Authority. May also call Pilot Office direct, 305 – 783 – 4645. Pilot will board at buoys 7 and 8 (28° 23.8′ N. 80° 33.4′ W.). Pilot boat is 37 ft. long with black hull, white house and buff deck, has "Pilot" painted on sides. Standard day/night pilot signals are displayed. Pilot boat stations itself 1 mile S.E. of buoys 7 and 8, 0.5 hour before ETA of vessel. Vessels may anchor anywhere in area. Pilot boat is equipped with VHF Channels 12 (156.60 mHz) and 16 (156.80 mHz), but no continuous radio watch is maintained. Advance notice of at least 24 hours should be given.

ANCHORAGES: Within the harbour itself, none. Vessels may anchor anywhere in the area of the Pilot station, buoys 7 and 8.
RESTRICTIONS: Docking and undocking carried on day and night. Draft restrictions – if draft exceeds 33.6 ft. vessel must await rising tide to enter port.
MAX. SIZE: Length and draft at Tanker Berth No. 1 and No. 2, 600 ft., with 32 ft. draft. Tanker berth No. 3. Unlimited length with 41 ft. draft. Cargo dock, length unlimited – 30 ft. draft.
HEALTH: See "Health: All Ports" before first U.S.A. ports (Albany). Illness reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Pilot boat is equipped with VHF Channels 12 (156.60 mHz) and 16 (156.80 mHz) but no continuous radio watch is maintained. Advance notice of at least 24 hours should be given. Best to route ETA cables through Western Union Telegraph. Port Canaveral is equipped with VHF Port Operations frequency 156.6
TUGS: There are 2×1,800 h.p. tugs at Port Canaveral; most ships use the tugs for docking and undocking. Tugs normally join vessel inside jetties and tugs lines are used.
BERTHING: All vessels unless prevented by conditions will be turned around upon entering turning basin and will be berthed headed seaward. No berthing permitted without Port Pilot aboard.
STEVEDORES: Important vessel gives accurate ETA at least 24 hours in advance to enable Agent to order gangs.
MEDICAL: Advance notice for Agents not required, but if available is appreciated. No Public Health Clinic in area, but there are good hospital facilities available. A contract physician's office of the U.S. Public Health Service is in Cocoa Beach, just South of the port.
TANKERS: Tanker Berth Nos. 1 and 2 available at present for discharge operations, with 32 ft. draft limit. Tanker Berth No. 3 pipe-line will be completed in 1981, with 41 ft. draft limit. No oil to be pumped overboard. Heavy fines imposed for oil pollution, however slight. The ship or ship's Agent will immediately report any spillage of oil on the wharf or on the water and the extent of the spill to the Port Manager and the Harbour Master. If spillage is considerable all cargo operations must stop and vessel prepare to undock.
FRESH WATER: All wharves have facilities for supplying fresh water, delivered by 4 in. water line.
FUEL: The general cargo wharf, and Tanker Berth No. 1 has facilities for supplying fuel. 24 hours notice requested.
FIRE: Ships discovering fire on board or close by on shore will sound repeated long whistle blast signals and use every other available means to report the fire.

Gasoline Tankers: All deck scuppers must be plugged before starting to discharge cargo. Supply of sand or sawdust must be on hand near the discharge headers. Static cable must be connected to wharf. Minimum 100 lb. pressure must be on water main and fire hose connected. Discharging must be stopped during severe lightning. Deck Officers must keep close check on hose connections for gasket leaks. Emergency Ship Movement Policy of Port Canaveral must be observed.
GANGWAY/DECK WATCHMEN: Not usually employed, this service left to discretion of Master.
OPENING/CLOSING HATCHES: Usually done by stevedores.
CERTIFICATES:
Ship's Register.
Load Line Certificate.
Tonnage Tax certificate.
Derating Certificate or Derating Exemption Certificate.
CUSTOMS ALLOWANCE: 300 cigarettes per crew member. Wine and/or spirits: 1 quart per crew member.
IDENTIFICATION CARDS: Required.
CONSULS: None.
REPAIRS: None – nearest port would be Jacksonville.
REPATRIATION: All facilities available for effecting crew changes and arranging any necessary repatriations.
AIRPORT: Two airports available, serviced by regular airlines, Orlando International Airport, Orlando, Florida, approximately 50 miles from the Port, Melbourne Regional Airport at Melbourne, Florida, approximately 35 miles from Port. Also Ti-Co Airport approximately 25 miles from the Port, but this airport has only limited service.
TIME: GMT minus 5 hours normal, GMT minus 4 hours Daylight Saving Time.
HOLIDAYS: Numerous holidays do not effect operation of port, which operates 24 hours a day, 7 days a week.
POLICE/AMBULANCE/FIRE: Police/Fire, Tel. 783 – 7800; Ambulance, Tel. 452 – 1444.
TELEPHONES: Arrangements are not available for placing on board.
GENERAL: All vessels, civilian and military, will provide wire ropes from the bow and stern with eyes that can be reached by tugs coming alongside. Pilots will make sure wires are in proper position before leaving vessel. All vessels will undock and proceed to outer anchorage when so ordered by Port Manager and/or Harbour Master in the event of: *(a)* a severe oil spillage; *(b)* fire is discovered on board a vessel laden with petroleum, explosives or a quantity of dangerous cargo; *(c)* vessel is in jeopardy due to conditions on shore. Emergency movement of ships will be made with an able sea watch without awaiting for return of other ships personnel.
SHORE LEAVE: Crew allowed ashore.
REGULATIONS: All radio frequency radiations from ships in Port Canaveral must be scheduled to prevent any possible interference to missile tests conducted on the Cape Canaveral Missile test Annex. The only exception is standard ship/shore HF harbour control frequencies. Vessels desiring to radiate will request permission from the Port Manager and/or Harbour Master.
AUTHORITY: Canaveral Port Authority.

PORT EVERGLADES (including Fort Lauderdale), Florida: 26.05 N. 80.05 W. **(See Plan Book)**

DOCUMENTS:
3 copies Cargo Manifest (Forms 7527-A or 7527-B), the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (Curio list).
2 copies Stores List.
2 copies Passenger List (Form I.418).
2 copies Crew List (Form I.418).
Customs Boarding Officer will also examine Ship's Register and Load-line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:
Health Pratique.
Master's Oath (Customs Form 3255).
All foreign clearances.
U.S. Certificates of payment of tonnage tax (Customs Form 1002).
Certified Crew List.
PILOTAGE: Pilot boards at Port Everglades sea buoy, located 26° 05′ 30″ N. Lat., 80° 04′ 45″ W. Long.
ANCHORAGE: The prescribed anchorage area at Port Everglades is outside the harbour and North of the channel. Vessels desiring to anchor off harbour of Port Everglades are required to do so in this area to avoid possible damage to cables laid on ocean floor South of the channel.

South of the channel, immediately offshore, there is a Government Restricted Area.

North of the channel, immediately offshore, there is a spoil bank visible at low water.
RESTRICTIONS: Entrance to Port Everglades is by a straight channel running in a due Westerly direction for a distance of 1.7 miles from the 50 ft. contour of the ocean to the turning basin. The channel is 500 ft. wide at its seaward end, narrowing to 450 ft. wide from jetty entrance to turning basin. The water depth is 39 ft. including the turning basin. All depths are at Mean Low Water.
MAX. SIZE: Max. draft 37 ft. MLWS.
BASIN: The main turning basin is 1,200 ft. East and West and 2,450 ft. North and South with a depth of 39 ft. The North extension of turning basin is 620 ft. wide East and West on the North limits and 900 ft. wide East and West on the South limits and 1,150 ft. North and South, with a depth of 33 ft. The South extension of turning basin is 1,300 ft. wide East and West by 1,300 ft. North and South, with a depth of 34 ft., except Berths 17 and 18, which have a depth of 37 ft. in the Westerly 400 ft. and 34 ft. in the Easterly 900 ft. All depths are at Mean Low Water.

A harbour deepening project commenced in May 1980. Dredging will be to a depth of 42 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: The following radio channels are available to communicate with facilities at Port Everglades:
Ship calling and safety: Channel 16, 156.8 mc/s.
Harbour Master and operations: Channel 14, 156.7 mc/s.; 7A, 156.35 mc/s.; 18A; 156.9 mc/s.
Port Everglades Bar Pilot: Channels 16, 13, 14, 18A, 19A, 77.
Port Everglades Towing Co.: Channels 16, 13, 77.
TUGS: 3 tugs available to assist berthing with up to 4,200 h.p. Available 24 hours a day.
BERTHING: Port Everglades has 16,200 linear ft. of berthing facilities, as follows:

Berth	*Length in feet*	*31 ft. depth*	*34 ft. depth*	*37 ft. depth*	*38 ft. depth*
1 – 2 – 3	1,601	1,300		301	
4	700			700	
5	700			700	
6	378			378	
7 – 8	1,200			1,200	
8A	300			300	
9 – 10	1,200			1,200	
11	500			500	
12 – 13	1,201			1,201	
14 – 15	1,201			1,201	
16* – 17 – 18	1,648			1,648	
19 – 20	1,300		900	400	
21 – 22	1,325		1,325		
23	240				240
24 – 25	1,369				1,369
26 – 27	1,337				1,337
Total	16,200	1,300	2,225	9,729	2,946

*Berth 16 has a depth of 39 ft.

CRANES: Paceco, modified A, 30 long ton container crane located at berths 16, 17 and 18 adjacent to marshalling facility. Up to 300 ton mobile cranes available for hire.
STEVEDORES: These services are provided by licensed stevedoring firms. Arranged by Agent.
FRESH WATER: Available.
FUEL: Fuel oil available.
REPAIRS: Shipyard equipped with a 350 ft. Syncrolift dry dock with a capacity of 4,200 tons, 1×1,000-ton floating dry dock, complete machine-shop and all supporting facilities.
IDENTIFICATION CARDS: Standard U.S. Immigration Form I.95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I.95 if issued for the same vessel.
CUSTOMS ALLOWANCE: At the discretion of Customs officers. Normal allowance is 200 cigarettes or 2 lb. tobacco and 1 quart wine or spirits per man. Additional allowances may be given if considered necessary, due to length of vessel's stay in port.

HOLIDAYS: New Year's Day (January 1st); Martin Luther King's Birthday (January 15th); Lincoln's Birthday (February 12th); Washington's Birthday (February 22nd); Good Friday; Memorial Day (May 30th); Independence Day (July 4th); Labour Day; Columbus Day (October 12th); Veteran's Day (November 11th); Thanksgiving Day; Christmas Day (December 25th).

When any of the above holidays fall on a Sunday, they will be observed on the Monday following. Work on these holidays is by special arrangement only.

TIME: Eastern Standard Time, GMT minus 5 hours. Daylight saving time, GMT minus 4 hours, from April to October.

DEVELOPMENTS: See "Basin".

AUTHORITY: Port Everglades Authority.

PORT HURON, Michigan: 42.59 N. 82.26 W.

Refer to St. Lawrence for important general information.

PILOTAGE: Compulsory, by Seaway Pilots.

ANCHORAGES: Near head of St. Clair River at Sarnia. Vessels should anchor as close to shore as safely possible to keep channel clear for passing vessels.

RESTRICTIONS: Navigation season from mid-March to end-December approx. Dock channel depth – 25 ft. Vessel's size restricted by Seaway locks.

MAX. SIZE: 730 ft. length; 26 ft. draft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Chicago Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Master must give at least 24 hours notice to Commander 9th Coast Guard District, Cleveland, Ohio, of the vessel's ETA at Snell Lock. Also, at least 24 hours notice of ETA at first U.S. discharge port is required. Port can be contacted through Marine Operator, Sarnia.

TUGS: Available. Not compulsory, but sometimes necessary in bad weather.

BERTHING: Port Terminal Co. Dock: 700 ft. long 26 ft. – 31 ft. depth.

DENSITY: Fresh water.

MEDICAL: All facilities available.

FRESH WATER: Obtainable by pipe-line at all docks.

FUEL: All grades available by pipe-line at all docks.

REPAIRS: Machine shops available for limited deck and machinery repairs.

AUTHORITY: Port Huron Maritime Commission.

PORTLAND, Maine: 43.39 N. 70.14 W.

DOCUMENTS:

1 Crew List.
1 Passenger List.
2 Stores Lists.
2 Foreign Purchases Lists.
2 Inward Foreign Manifests uniform cargo.
Original Bill of Lading.
1 Form 3251 Master's Oath on entry of vessel.
2 Form 1374 Outward Foreign Manifest.

PILOTAGE: Ship's Agents usually notify Pilot approximately 48 hours in advance of arrival then changes are made at 24 and 12 hours. Pilot boat usually called on Channel 16 and then switched to Channel 11 to continue conversation. Pilot goes aboard ship in vicinity of lightship using ladder on lee side. When weather bad, suggest vessel anchors approximately 1 mile North of lightship.

ANCHORAGES:

Anchorage A (General)

Beginning at Eastern corner of Grand Trunk Railway Company Pier No. 3; thence approximately 90°, 1,700 yd. to Brooklyn Ledge Buoy 16; thence 330°, 350 yd.; thence 25°, 780 yd.; thence 303°, 750 yd.; thence 254°, 560 yd.; thence 186°, 750 yd.; and thence to the point of beginning.

Anchorage B (General and Quarantine)

Beginning at Brooklyn Ledge Buoy 16, thence 58° to Little Diamond Island thence along the S.W. shore to the pier on the Southern end of Little Diamond Island; thence 143°, 1,200 yd.; thence 270.25° to House Island Light; thence along the Western shore of House Island to Fort Scammel Point Light; and thence 329°, 1,620 yd. to the point of beginning. Anchorage B is intended for general purposes, but especially for use by oil tankers and other deep-draft ships entering the harbour at night and intending to proceed to the dock allotted at daylight the following morning, or as soon as practicable. This area also is to be used for quarantine anchorage. Any vessel anchored in this area shall be ready to move on short notice.

Anchorage C

Bounded on the N.W. by House Island; on the North by a line running 90° from House Island Light to Peaks Island; on the East by the Western shore of Peaks Island, by a line running 198° from the Westernmost point on Peaks Island to Cushing Island, and by the shore of Cushing Island to its Westernmost point; and on the Southwest by a line running from the Westernmost point on Cushing Island to Fort Scammel Point Light. Anchorage C is intended for use only by small vessels and for temporary anchorage.

Anchorage D

Southerly and Westerly of a line beginning at Lighthouse Channel Buoy 1; thence 35° to Anchorage Buoy E; and thence 145° to the mainland. Anchorage D is for use only by small yachts and pleasure craft, and small, light draft coastwise freighters.

RESTRICTIONS: No entry restrictions at night. Deep draft vessels brought in on high water only.

MAX. SIZE: Size of vessel restricted to 45 ft. draft in harbour area. No outside installations at port at present.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Boston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Tugs in Portland Harbour use Channel 07. Vessels arriving at Portland go through radio station in Chatham, Mass., RCA installations, or call station WOU via radio-telephone. VHF Harbour Control at Portland.

TUGS: Tugs join vessel at Spring Point in Portland Harbour. Tugs use own lines at no additional charge. Docking Pilots not supplied by Company but are available.

BERTHING: Tidal conditions govern arrivals and departures.

BRIDGES: No undocking on ebb tide through bridge.

STEVEDORES: 4 hours notice on ordering gangs.

MEDICAL: No advance notice required by Agent. 2 hospitals, Maine Medical Center and Mercy Hospital, who take bed patients. All seamen require certificate showing they have had a smallpox vaccination during last 3 years.

TANKERS: Tankers arriving at Portland Pipe Line, Pier 2, make preparations for 2×10 in. and 12 in. hoses.

Berth	*Depth Alongside*
American Oil Terminal	30 ft. MLW
Chevron Terminal	32 ft. MLW
Portland Pipe-line Pier No. 1	35 ft. MLW
Portland Pipe-line Pier No. 2	48 ft. MLW
Texaco Terminal	30 ft. MLW

DENSITY: Average density 1024.

FRESH WATER: Available by tug for boilers only at rate of tug hire. Drinking water available at piers.

FUEL: No. 6 diesel oil and blended intermediate fuel oils. Delivery is via barge only and 24 hours notice required.

FIRE PRECAUTIONS: None – except at certain oil piers where information given to Shipmaster upon arrival at pier. Ample fire protection, salt water lines, sprinkler system on pier, local fire department.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Ship's crew open hatches.

CERTIFICATES:

Load-line certificate.
Certificate of Foreign Clearance.
Ship's Safety Certificate.
U.S. tonnage tax certificate of previous trip if available
Radio Operator Licence.

CUSTOMS ALLOWANCE: Tobacco, 200 cigarettes per man. Wine and/or Spirits, 1 bottle per person.

CARGO GEAR: No additional cargo gear necessary.

IDENTIFICATION CARDS: Form I-95 must be filled-out on arriving unless seaman has had a prior one made out for a previous arrival on same ship.

CONSULS:

Norwegian: Allan Kjos-Hanse, 30 Mayer Road, Portland, Maine, Vice-Consul.
French: Dr. Paul O. Proudian, 776 Main Street, Westbrook, Maine.
Finnish: Frank W. Bjorklund, 163 Main Street, Norway, Maine.
Italian: Dr. Domenico A. Santoro, 43 Deering Street, Portland, Maine.
Panamanian: Mary Navarro de Cerrillo, Lafayette Town House, Portland.
Swedish: Martin Johnson, Vice Consul, 443 Congress Street, Portland.

REPAIRS: Repair facilities for all types of machinery available.

DRY DOCKS: 3 basins divided into 7 berths which can handle a vessel up to 455 ft. long and 62 ft. wide (not currently activated). Also 3 other smaller marine slipways.

REPATRIATION: Arrangements must be made with Agent in advance by telegram.

AIRPORT: Portland Municipal Airport 3.5 to 4 miles distant. Served by Northeast Airlines and Executive Airlines.

HOLIDAYS: New Year's Day; Washington's Birthday; Patriots Day; Memorial Day; Independence Day; Labour Day; Thanksgiving Day; Christmas and Veterans' Day. Possible to get gangs to work all days except Labour Day and Christmas.

POLICE/AMBULANCE/FIRE: Police 773 – 5651; Ambulance 772 – 5463; Fire 772 – 6531.

TELEPHONE: Arrangements can be made to have phone put on ship, but most docks have pay phones.

GENERAL: Discussions underway with Coast Guard and other officials to install fixed lighthouse stations to replace lightships at entrance.

DEVELOPMENTS: Plans under way for redevelopment of waterfront. Plans call for deepening Fore River from 35 ft. to 45 ft. and studies also under-way to provide offshore unloading of giant super-tankers. Plans to construct a $140 million oil transfer facility. In order to complete project, existing 40 ft. ledge will be removed to 90 ft. and dredging in the inner harbour of Hussey Sound will be done. No date set for final completion.

AUTHORITY: Maine Dept. of Transportation Bureau of Waterwways.

PORTLAND, Oregon: 45.30 N. 122.40 W.

PORT LIMITS: The seaward boundary of the Port of Portland is Astoria, 96 miles N.W. of Portland.

DOCUMENTS:

3 Cargo Manifests.
3 Store Lists.
3 Crew Curio Lists.
3 Crew Lists.
1 Clearance from Last Port.
1 Tonnage Tax Certificate.
1 Copy of Vessel's Register.
1 Itinerary of Vessel, port by port.

PILOTAGE: Bar and River – Compulsory. Vessels Masters or their Agents to give notice of arrival or departure between 0800 and 1600 hrs. ETA Bar Pilot Astoria at least 12 hours before arrival giving deepest draft. Pilot station Astoria keeps 24 hour VHF watch on Channel 16, also pilot cutters when on station watch VHF Channel 16 (156.8 mc/s) and MF 2182 and 2738 kc/s.

On approaching Bar Pilot station Masters to contact Pilot cutter for boarding instructions. Bar pilotage covers from sea to the Port of Astoria, river pilotage covers from Astoria to Portland. They change from launch while steaming in channel off Astoria buoy No. 37.

Warning: Due to heavy swells on bar during stormy Winter conditions, crossings may be temporarily suspended, therefore, Masters should attempt earliest VHF radio contact on Channel 16 with Pilots or coastguard station "Cape Disappointment" for latest bar conditions.

During Summer months Masters should use extreme caution in poor visibility as many small fishing craft will be encountered near mouth of Columbia River. Also see "General – Pilotage" before first U.S.A. port (Albany).

ANCHORAGES: Vessels may anchor to await berths at various locations on the Columbia River. Usual spots are at Tongue Point Astoria, Longview and at Vancouver, Washington.

RESTRICTIONS: All vessels Masters or their Agents to obtain Coast Guard clearance at least 24 hours before arrival. Captain of Port may impose movement restrictions if any hazardous cargo. Under 36 ft. draft no movement restrictions, 36 ft. and over up to maximum permissible draft of 38 ft. on Pilot's recommendations.

No size restrictions length and beam, however, Corps of Engineers maintain only 600 ft. wide channel, therefore, deep laden vessels over 600 ft. in length to use extreme caution when turning.

Columbia River Navigation Advisory: (Dated September 1980).

Dredging activity at the Mt. St. Helens Shoal Area of the Columbia River is progressing on schedule.

Phase 4: The dredging of the North half of the channel to 300 ft. wide by 40 ft. deep at the mouth of the Cowlitz River will be completed by 30th September, 1980.

Phase 5: The completion of the dredging of the South Channel to at least 40 ft. by 300 ft. will then get underway. This removal of the last 2 ft. of shoaling (from 38 ft. to 40 ft.) to the dimensions of at least 40 ft. by 300 ft. will be completed by at least 30th November, 1980.

Thus by 30th November the river in that area will be 600 ft. wide with a minimum depth of 40 ft.

Necessary maintenance dredging in other parts of the river between Portland and the sea is being performed by the Corps of Engineers Hopper Dredge Fleet and will continue on an as needed basis, to maintain the published 40 ft. channel.

Dredging projects in the Cowlitz and Toutle river areas are underway as safeguards to prevent future impact of any Winter run off on the Columbia River Channel. This will be intensified on completion of Phase 4 as dredge equipment is released from Columbia River work. Starting immediately night navigation for inbound vessels will be automatically sanctioned by U.S. Coast Guard, subject only to vessel peculiarities as determined by the River Pilots. Outbound vessels will continue to be restricted to daylight (1 hour before sunrise to 1 hour after sunset) navigation. Requests for a variance will be handled on a case by case basis by Columbia River Pilots.

Agents Note:

(Columbia River Navigation Advisory). The above is the latest information put out by the Corps of Engineers & Coast Guard. They are constantly monitoring situation so things change from day to day. We have been notifying vessel's Masters to arrive at pilot station at given time so that they can come right on through. Some waiting will be encountered in case of deep draft ships so it is best to adjust speed and conserve fuel.

MAX. SIZE: No restrictions length and breadth. Depth at Columbia River entry 48 ft. River channel to Portland/Vancouver maintained at 40 ft. by 600 ft. Seasonal tidal effect up to 3 ft. at Portland.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.

Master to radio with ETA state of crew health noting any sickness. Agent will report sickness to Seattle Quarantine Station for clearance instructions.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Route ETA cables through KLBITT Seattle, Washington.

Marine Exchange of the Columbia River District (Merchants Exchange): 24 hour marine reporting. Call sign "KDO 759". Call on Channel 16 VHF. Working (Astoria – Longview and 50 miles out to sea) on Channel 9 and (Longview – Portland) on Channel 11 and 18A.

Marine Exchange (Tel: 503 – 228 – 4361) pass messages to vessels from Agents and vice-versa. Coverage is good in river and 50 miles to seaward.

TUGS: Tugs normally join vessel at designated berth. Tugs' lines used at no charge.

BERTHING: The port operates 5 public ocean cargo terminals containing 28 deepwater berths, including 5 container berths with 6 high-speed container cranes. Present depths alongside berths is 40 ft. min. at MLLW.

There are general cargo berths and berths for commodities which require special handling. Port facilities include 21 transit sheds, and 5 warehouses with 2.2 million sq.ft. of sprinkler protected storage area.

BRIDGES: No arrival times designated if coming from sea and in excess of 750 tons gross. Departures regulated, with bridge closures during peak traffic flow (0700 to 0900 hrs. and 1615 to 1815 hrs.) unless permission granted by Harbour Master.

SPECIALISED CARGO HANDLING FACILITIES: As well as the 6 container cranes, there are 6 whirley cranes, a 150-ton shear leg crane and a 175-ton mobile crane, largest of its kind on the Pacific Coast.

At Terminal Two is a 1,341 ft. container/general cargo pier with a 40 ton and a 50 ton straight line crane and 2×65-ton gantry cranes. Terminal Two contains a Roll-on/Roll-off berth. Pier has a 25-acre open storage yard with rail and truck service. 4 straddle carriers, capable of stacking 20 ft. containers 3 high, or 40 ft. 2 high, serve the yard. Pierside warehouse and container freight station 90,000 sq.ft.

At Terminal Four there is an 8.1 million bushel capacity grain elevator, with box car tipper, truck dumper and barge unloading facility. Log dock is equipped with 2 whirley cranes. There is a Dravo bulk unloader with digging capacity of 900 t.p.h. Tanks are available for special cargoes such as petroleum, molassses, tallow and ore concentrates. Also available is a 120 acre open storage area and floating dock for import of automobiles.

The Terminal 5 elevator is the most modern grain outloading facility in the lower Columbia River and is operated under sub-lease by Columbia Grain Inc.

The elevator has a storage capacity of 1.5 million bushels and is the fastest on the river, with an outloading capability of 2,100 metric t.p.h. The facility can receive grain by rail, truck and barge. The barge leg operates at 1,000 t.p.h., trucks are unloaded at 225 t.p.h. and about 65 railcars can be unloaded in an 8-hour shift.

Terminal Six has a container pier, length 1,800 ft., with 3×50-ton straight line cranes and a 60,000 sq.ft. container freight station. Also a 60 acre open storage area and floating dock for import of automobiles.

STEVEDORES: Allocation for gangs Monday to Saturday must be confirmed at 1100 hrs. to longshore hiring hall. Allocation for gangs Sunday and Monday made at 1100 hrs. Saturday for both day and night gangs. Same procedure applies to allocation of night gangs, but night gangs may be cancelled by 1400 hrs. in afternoon if night gangs are to work.

MEDICAL: Any type medical treatment provided and hospital facilities available. Only inoculation requirement for entry to U.S. is smallpox, except when vessels have called at an area infected by another disease.

TANKERS:

Berth	*Max. Size Vessel* *Length*	*Draft*
Shell Oil Company	575 ft.	32 ft.
Standard Oil	660 ft. – 700 ft.	35 ft.
Texaco Inc.	650 ft.	30 ft.
Phillips Petroleum Co.	No maximum	30 ft.
Time Oil Co.	600 ft.	38 ft.
Mobil Oil Corp.	550 ft.	31 ft.
Richfield	600 ft.	30 ft.
Union Oil Co.	550 ft.	30 ft.

DENSITY: Fresh water at all times.

FRESH WATER: Available at all berths delivered through pier-side connections.

FUEL: Viscosity grades of B and lower. No advance notice required. Barging essential. Also see "Notice" No. 2.

FIRE PRECAUTIONS: Fire precautions respecting tankers administered by U.S. Coast Guard, which enforces shipboard regulations under the Code of Federal Regulations, Part 46, Sub-Part D, Sections 20 to 40; the Police Harbour Patrol, which controls port movements, boards vessels to warn Master regarding harbour regulations, including spilling of oil, etc.; Fire Marshal exercises jurisdiction regarding fire regulations at shoreside facilities serving tankers.

All vessels to have towing cables rigged fore and aft on the offshore side. Cables to be made fast with the eye 1 m. above the water.

GANGWAY/DECK WATCHMEN: Option of vessel Owner/Agent and available through private firms.

OPENING/CLOSING HATCHES: While ship at dock, opening and closing is work of longshoremen. Ship may open or close own hatches while underway.

CERTIFICATES: Registered tonnage certificates. Certificate of Financial Responsibility (all details must agree with vessel's register).

CARGO GEAR: Valid cargo gear certificate required, acceptable to U.S. Bureau of Labor Standards.

IDENTIFICATION CARDS: Immigration Dept. requires form No. 1-95A and No. 31 (Repatriation). Changes can be effected at any U.S. Immigration Office.

CONSULS: The following countries are represented in Portland:

Austria
Belgium
Costa Rica
Denmark
El Salvador
Finland
France
Germany
Ghana
Great Britain
Iceland
Italy
Japan
Korea
Lebanon
Mexico
Netherlands
Nicaragua
Norway
Panama
Peru
Senegal
Sweden
Venezuela

REPAIRS: All types of deck and engine repairs possible.

DRY DOCKS: 4 floating docks, largest 982 ft.×188 ft. clear width, with lift capacity of 81,000 long tons.

REPATRIATION: Arrangements possible for crew changes or other repatriation.

AIRPORT: Airport 10 miles distant, served by 8 regularly scheduled airlines with direct service and/or connections domestically and world wide.

TIME: GMT minus eight hours. Daylight Saving Time becomes effective annually on the last Sunday in April through the last Saturday in October.

HOLIDAYS: *New Year's Day; President's Day (Feb. 21st); Memorial Day (May 30th); *Independence Day (July 4th); *Labor Day (first Monday in September); Veterans' Day (Nov. 11th); Thanksgiving Day, *Christmas Day (Dec. 25th), State-wide Election Days. Other legal holidays may be proclaimed by state or national authority. When holiday falls on Sunday, the following Monday is observed as holiday. Longshore work performed on any of above listed days is overtime, which is one and a half time rate. Days marked (*) are stop-work days, i.e. no ships will be worked. This also applies to July 5th, which observed locally on unilateral basis.

POLICE/AMBULANCE/FIRE: Police 226–7551; Fire 232–2111; Ambulance: provided by several private firms, but can be obtained through police or fire number.
TELEPHONES: Available by order from terminal superintendents at $5.00 connection charge.
SERVICES: All services available such as compass adjusting, major or minor repairs either with work barges or at ship repair berths; lay berths available; charts available from private companies; all chandlery supplies available.
SHORE LEAVE: Crew members permitted ashore except where vessel has made first arrival from Communist-controlled port.
NOTICE No. 1:
Custom of the Port Rules and Regulations:

Pertaining to bulk grain and other bulk commodities customarily handled through regular grain elevators, recognised as the practice in the Columbia River District by the Merchants Exchange. It is not the intent of the Rules and Regulations to supersede the contractural relationship between vessel and shipper or charterers, but rather state customary trade practices for the purpose of facilitating commerce under conditions where the contractural arrangements do not cover specific local conditions, in which case these "Custom of the Port" rules and regulations will apply. These rules are applicable to vessels loading in the Columbia River District, which shall be considered as one port and includes grain berths from Astoria, Oregon, to Portland, Oregon, including Longview, Kalama and Vancouver, Washington. Loading berth(s) to be declared during regular business hours at least 24 hours before arrival at the Columbia River.

Rule 1: Subject to the exceptions enumerated below, vessels shall be assigned to a berth(s) in the order in which they file with the elevator(s) as ready to load. A vessel shall be considered ready when it has obtained Certificate of Readiness issued by the National Cargo Bureau, Inc., and an official certificate of stowage examination from the U.S. Department of Agriculture, Federal Grain Inspection Service, Inspection Division, stating the vessel is completely fit in all compartments in which it is intended to receive cargo.

EXCEPTIONS:

(a) In assigning berth to vessels at any elevator, liners shall be given preference over other vessels, except that any tramp vessel whose allowed loading laytime has expired shall assume the status of a liner vessel for purposes of berth assignment. (For the purpose of these rules, the term "Liner" is defined as a vessel sailing under an advertised Pacific Coast schedule and operated by a line maintaining regular sailings from any Pacific Coast port to named ports, and on which the total quantity of all grain to be loaded shall not exceed one-half of the total deadweight tonnage of the vessel.) A vessel which arrives and presents Notice of Readiness to load in accordance with this rule, but which cannot attain "Liner" status because the allowed loading laytime is not defined in the contract of affreightment, will not lose its berthing priority to a tramp vessel with later Notice of Readiness, that has gone on demurrage.

(b) The elevator may alter the turn of the vessels whenever confronted with the urgent necessity of receiving or loading any particular grade of grain, or to facilitate conditions at the elevator. When requested, elevator operator to supply written confirmation of such loading alteration as authorised under this rule and/or applicable tariff to owner's or charterer's representative.

Rule 2

Normal working days are Monday through Saturday from 0800 hrs. to 1700 hrs. (exceptions are Sundays, legal holidays, and July 5th). Refer to notes below.

(a) July 5th – while not a legal or longshore holiday, has not been worked by Pacific Coast Longshoremen since 1935, and is considered a holiday.
(b) Overtime – is all work over 6 hours in one day, and work between 1700 hrs. and 0800 hrs., Monday through Friday, and all work on Saturdays, Sundays, legal holidays, and overtime days as defined in the Pacific Coast Longshore Contract.
(c) Awaiting vessel – where the same holiday is observed on different days in adjoining states, a waiting vessel not knowing where it could work will observe (for laytime purposes) the holiday in the state that it first works.

Rule 3

Should the vessel refuse to work during a normal working day, or beyond a normal working day when so required in writing by the elevator in accordance with its published tariff, it shall lose its turn and vacate the berth in favour of the next vessel that is willing to work overtime. The vessel so losing its turn shall be entitled to berth as soon as the berth is next available thereafter. Should any vessel refuse to vacate its berth when ordered to do so under the above circumstances, the elevator may effect the removal of such vessel at the vessel's risk and expense.

Rule 4

The Board of Directors of the Merchants Exchange will, on an annual basis, select an abitrator for the purpose of arbitration or interpretation of the Rules and Regulations set forth herein.

Requests for arbitration or interpretation of these rules shall be submitted in writing stating the parties involved and outlining the facts in brief detail to the Manager of the Merchants Exchange. The Manager of the Merchants Exchange and the arbitrator will select the time and place for the arbitration. Failure of the parties named in the abitration to respond or acknowledge the request for arbitration will require the arbitrator to rule on the facts as presented by the requesting party.

Any requests for revisions of these rules must be submitted in writing to the Chairman of the Custom of the Port Rules and Regulations Committee with a copy to the Manager of the Merchants Exchange.

Arbitration fees payable to the Merchants Exchange shall be $50 plus any extra ordinary charges in connection therewith. The above fee shall be paid by the party requesting the arbitration or interpretation.

NOTICE No.2: Issued by the Harbour Master in August, 1980.
SUBJECT: Discontinuing Ship Repairs at Grain and Oil Docks, and Refueling at Grain Docks.

We feel after considerable deliberation that ship repair at Oil and Grain Docks is an unnecessary hazard and should be discontinued at once.

The practice of refueling ships at Grain Docks also would be considered taking an unnecessary risk, and as such, will be stopped.

After surveying numerous longshoremen and Grain Operators who reaffirmed this position, we are hereby notifying the concerned contractors that this will be our policy from now on.
AUTHORITY: Port of Portland.
AGENT: Cascade Shipping Co., 520 S.W. 6th Avenue, Portland, Oregon 97204. Tel: 503-226-4018. Telex: TWX 910-464-1573. Cable: "Caship".

PORT LAVACA/POINT COMFORT, Texas: 28.40 N. 96.35 W. **(See Plan Book)**

DOCUMENTS:
2 Cargo Manifests.
2 Stores Lists, Form CF1303.
2 Crew's Effects Declaration, Form CF1304.
1 Clearance from last Port.
Vessel's Register, tonnage, tax receipts, etc.
2 Copies Crew List.
2 Copies Passenger List.
PILOTAGE: Ship's Agents usually notify Matagorda Bay Pilots as to vessel's ETA. Pilot boat can be contacted on VHF Channel 16, then switch to Channel 26 to continue conversation. Pilot boards at buoy 1-A at position 28° 23′ N. 96° 17′ W.
ANCHORAGES: Marked on chart of Matagorda Bay and approaches.
RESTRICTIONS: Vessels may enter any time day or night. Entrance channel depth 38 ft. Bay Channel depth 36 ft.
MAX. SIZE: Public Dock – max. length approximately 750 ft. Draft controlled by channel depth of 38 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Galveston Radio (ITT Mackay Marine) and Port Lavaca Marine operator can be contacted on VHF Channel 16, then switch to Channel 26 for continued conversation.
TUGS: 1 tug available joining vessel shortly before arriving at berth.
BERTHING: Vessels berth at Public Dock.
STEVEDORES: Richard Bugg & Co. Inc.; Boyd-Campbell & Co. and Dix Shipping Company of Corpus Christi, Texas. At Alcoa's Dock all plant labour is used.
MEDICAL: No advance notice required. Several clinics and 1 hospital available in Port Lavaca.
DENSITY: Average density is 1010/1012.
FRESH WATER: Fresh water available alongside berth.
FUEL: Fuel is available from VAL-CAP located in Port Lavaca. Can be delivered by barge or truck.
OPENING/CLOSING HATCHES: At Public Dock this is done by stevedores. At Alcoa Dock this is done by ship's crew.
CERTIFICATES: Load line, foreign clearance, safety equipment, financial responsibility (oil pollution), tonnage tax receipts, will be required.
IDENTIFICATION CARDS: Immigration Crew Landing Permit I – 95 required for each man.
CONSULS: Only Norwegian Vice-Consul Tel. 512 – 987 – 2311.
REPAIRS: Only minor repairs possible. No dry docks.
REPATRIATION: Arrangements are possible but preferably should be accomplished in larger ports.
AIRPORT: Nearest airport 20 miles at Victoria, Texas, served by Texas International only, Corpus Christi Airport about 90 miles; Houston Airport about 150 miles.
TIME: Central Standard Time during Winter. Beginning last Sunday in April until last Sunday in October, Daylight Saving time (clocks are moved ahead 1 hour).
HOLIDAYS: All holidays observed by contract with ILA. See "Houston".
POLICE/AMBULANCE/FIRE: Police Department, 552 – 6767; Fire Department, 552 – 2222; Ambulance Service, 552 – 2988.
TELEPHONES: Telephones are available ashore only. Telephone booth on Public Dock.
DEVELOPMENTS: Plans for lengthening dock and another warehouse are now being considered.
AUTHORITY: The Calhoun County Navigation District, Port Lavaca.

Private Dock owned by Aluminium Company of America with its Agent being Alcoa Steamship Company Inc., Point Comfort.

PORT NECHES, Texas: 30.00 N. 93.57 W.

DOCUMENTS, PILOTAGE, RADIO, etc.: Refer to "Port Arthur".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Meet vessel in Neches River before arriving at berth. Normally 2 tugs used for docking, 1 for undocking.
BERTHING: Jefferson Chemical Co.: Distance from sea 30 miles, depth at berth 36 ft.

Texaco terminal: Distance from sea 34 miles, depth at berth 32 ft.
MEDICAL: All facilities available.
DENSITY: Fresh water.

FRESH WATER: Available by barge.
FUEL: Bunker C not available ex wharf at Texaco terminal, only by barge from Port Arthur or Beaumont.
GANGWAY/DECK WATCHMEN: Not required unless crewmen detained by Immigration.
CUSTOMS ALLOWANCE: 300 cigarettes and 1 quart wine or spirits for each man.
IDENTIFICATION CARDS: Foreign crew only require Immigration Landing Permit.
CONSULS: Nearest at Houston.
REPAIRS, DRY DOCKS: See "Port Arthur".

PORT ST. JOE, Florida: 29.49 N. 85.19 W.

DOCUMENTS:
All documentation must be on United States forms.
At least: 3 Passenger Lists.
3 Crew Lists (1 for visa crew list).
3 Curio Lists.
3 Stores Lists.
2 Complete Manifests.
Clearance Papers from last port.
PILOTAGE: Apply for Pilot through ship's Agent – address is "Port St. Joe, Pilots" and advance ETA 18 hours. "VHF – Channel 16". Pilot boat station is at Sea Buoy, Port St. Joe only and location of anchorage for vessel awaiting a Pilot is 1 mile West of Sea Buoy.
ANCHORAGES: Local harbour charts indicate safe anchorage.
MAX. SIZE: Draft 32 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Call sign WLO, Mobile, Alabama.
TUGS: None presently available.
STEVEDORES: ETA must be received by 1800 hrs. in order to have gangs at 0800 hrs. following day.
MEDICAL: No notice required. Hospital facilities available. Inoculations required same as public health U.S. Government requirements.
TANKERS: Discharge lines 8 in. No residue discharge allowed. 2 tanker berths 32 ft. draft.
DENSITY: Salt water – heavy concentration.
FRESH WATER: Available in unlimited quantities by hose connection from dock to ship, 1.5 in. to 2.5 in. size at 60 p.s.i.
GANGWAY/DECK WATCHMEN: Only when requested by ship.
OPENING/CLOSING HATCHES: Work can be performed by either stevedores or crew.
CUSTOMS ALLOWANCE: 1 carton of cigarettes per week per crew member permitted. Further allowances would depend on circumstances. Wine and/or Spirits 1 bottle per crew member as allocated by Customs.
CARGO GEAR: Must be in compliance with "U.S. Government Longshoremen Safety Codes".
CONSULS: None.
REPAIRS: None.
DRY DOCKS: None.
REPATRIATION: Can be accomplished by Agent and Immigration but should be accomplished in larger ports if possible.
AIRPORT: Served by regular airlines. (Southern Airways, National Airways). 6 combined flights a day. Distance 40 miles.
TIME: Saving time from first Sunday in May to last Sunday in October. GMT minus 5 hours Standard Time. GMT minus 4 hours daylight saving time.
HOLIDAYS: *No Work Holidays:* No work performed New Year's Day, Fourth of July, Labour Day, Christmas Day, or December 24th & December 26th, and Easter Sunday, except handling of mail, baggage and perishables (except bananas) or unless a ship is in distress, such as fire or leaking bottom, or, other causes that would damage cargo or vessel. In event work done on New Year's Day, Fourth of July, Labour Day, Christmas Day, December 24th & December 26th, or Easter Sunday, rate of pay for such ship work shall be double the normal time rate. Should above holidays fall on Sunday, double time will be paid. Following Monday will be paid at time and one-half.

Working Holidays: Armistice Day, Thanksgiving Day and Memorial Day are to be paid for at overtime rate – one and one-half times straight-time rate. Should any of above holidays, except Sunday fall on Sunday, the following Monday will be observed.
POLICE/AMBULANCE/FIRE: Police 229-8265; 227-4526; Ambulance 227-1115 (Comforter), 277-1818 (St. Clair), 229-8111; Fire 227-1115.
TELEPHONES: None available for placing aboard.
GENERAL: In sending ETA when ship is going to arrive over weekends (Saturday and Sunday), a notice wire should be placed and notice ETA should arrive prior to 1700 hrs. Friday.
SHORE LEAVE: Shore leave allowed when cleared by Immigration.
REGULATIONS: Normal working hours of longshoremen from 0800 to 2230 hrs. only 7 days a week.
DELAYS: Only when due to port congestion.
AUTHORITY: Port St. Joe Port Authority.

PORT SAN LUIS, California: 35.10 N. 120.45 W.

MAX. SIZE: Tankers up to 750 ft. length and 26 ft. draft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Los Angeles Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Vessels should contact Union Oil Company through Marine Operator. "Walkie-talkie" sets used for communication with terminal. VHF station KTD 411, Channels 10 and 16.
VHF: Harbour Office, call sign "KYZ 664", on VHF Channel 16 throughout 24 hours, working Channels 6 and 12.
TANKERS: Tanker berths only at Union Oil Company Pier. Vessels tie off pier at berth No. 4. Depth alongside 32 ft. MLW.

1×12-in. and 1×16-in. load/discharge lines. No ballast discharge allowed.
DENSITY: Salt water, 1025.
MEDICAL: Services available.
FRESH WATER: Available.
FUEL: The Harbour District maintains and operates a diesel fuel facility, capacity 12,000 gallons. The facility is at the end of the District's 1,400 ft. pier.
CONSULS: Nearest consuls situated at Los Angeles and San Francisco.
REPAIRS: Facilities available.
AIRPORT: County Airport, San Luis Obispo, situated 12 miles distant. 6 flights daily to Los Angeles and to San Francisco.
HOLIDAYS: Christmas and New Year.
GENERAL: Port San Luis is an official Port of Entry with U.S. Customs. The Port Director is on duty Monday to Friday from 0900 hrs. to 1600 hrs.
Tide Range – 6 ft. to 8 ft.
There is a boat yard with a 50 ton mobile hoist.
Prevailing wind – N.W. 15 – 25 knots.
AUTHORITY: Port San Luis Harbor District.

PORT SULPHUR, Louisiana: 29.28 N. 89.41 W.

(See Plan Book)

DOCUMENTS, etc: Refer to "New Orleans".
PILOTAGE: A vessel coming into port from sea can arrange to pick up a Bar Pilot (Associated Branch Pilots) by furnishing ETA to the ship's Agents, radio contact by VHF Channel 9 and AM Channels 2738 and 2182. Bar Pilot is exchanged for river Pilot at Head of Passes, Pilot town, Louisiana. River Pilot (Crescent River Port Pilot's Association) can be arranged through ship's Agent in New Orleans and radio contact as above. Vessel awaiting Pilot for departure may remain at dock until Pilot arrives. Advance notice of 3 hours is required for departing Pilots. This can be arranged by the ship's Master with the shipping foreman.
ANCHORAGES: Anchorage is available on East bank of river opposite to Freeport Sulphur Company dock. Depth of water at anchorage is 40 ft., the controlling depth in the river.
RESTRICTIONS: No restrictions for entry because of time of day, nor conditions of tide or draft except the controlling depth of Mississippi River to Port Sulphur (35 – 40 ft. as published in reports by U.S. Army Corps of Engineers).
MAX. SIZE: Max. permissible length – 560 ft., breadth not limited, draft equal to controlling depth of river.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New Orleans Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Tropical Radio WNU New Orleans.
TUGS: Tugs not normally required. Shore crews usually handle ship's lines. Tug may join the vessel opposite the dock. Charges for handling ship's lines.
STEVEDORES: Not normally required. When requested, stevedoring services can be obtained from Port of New Orleans; contact ship's Agents for particulars.
MEDICAL: Advance notice for personnel requiring medical service is required through ship's Agents. Hospital facilities are available.
TANKERS: 1 tanker berth, permitted draft equal to or greater than controlling depth of Mississippi River. Diameter of loading/discharge lines is 12 in. and 16 in. respectively.
DENSITY: Density in port not affected by tide. Fresh water.
FRESH WATER: Fresh water is available, can be loaded with 1.5 in. fire line.
FUEL: Fuel may be loaded by barge with vessel at anchor. Fuel transfer is not permitted at dock.
FIRE PRECAUTIONS: No welding repair permitted at dockside. Fuel transfer is not permitted. No other specific precautions observed except for "no smoking" precautions, etc.
GANGWAY/DECK WATCHMEN: Services of watchmen desirable but not required. Port does not furnish this service.
CERTIFICATES: Certificate of condition of cargo handling gear required when use of gear is necessary.
IDENTIFICATION CARDS: Immigration Form I – 95.
CONSULS: Consuls offices are located in New Orleans, Louisiana.
REPAIRS: Engine and deck repairs are possible when the dock is not otherwise occupied.
AIRPORT: New Orleans International Airport, served by most major airlines. 55 miles from Port Sulphur.
TIME: Local time is Central Standard Time, except from May/October, Daylight Saving Time is in effect.
HOLIDAYS: Vessels are loaded on all holidays except Christmas Day.
POLICE/AMBULANCE/FIRE: Port Sulphur, Louisiana, 564 – 2525; 564 – 2525; 564 – 3231, respectively.
TELEPHONES: Jacks for telephones are provided at no additional cost to tankers loading at port.
SHORE LEAVE: Crew members are allowed ashore.
DELAYS: Loading will not commence until all holds are clean of scale and other foreign matter.
AUTHORITY: Private port, Freeport Sulphur Company, Port Sulphur.

PORT WENTWORTH, Georgia: 32.09 N. 81.08 W.

SHIPMASTER'S REPORT: November 1979

PILOTAGE: Compulsory. Pilot boards at Savannah Sea Buoy. 48, 24 and 12 hours notice required through Agent.
RESTRICTIONS: Vessels can enter and leave port during hours of darkness and at any stage of the tide, however, depth of water at River Bends controls draft.
MAX. SIZE: See "Berthing".
VHF: Pilot on Channels 16, 14 and 13.
TUGS: Tugs from Savannah assist with berthing and unberthing.
BERTHING: *Continental Can & Paper Co.:* Port Wentworth is the most inland berth up the Savannah River and is 29 miles from the entrance. Max. size of vessel so far to berth was LOA 628 ft. Pilots would accept vessels of 700 ft. LOA but would be unable to swing with this length. The berth is dredged to approximately 40 ft. for a length of 700 ft. Least depth of water in channel from sea to berth 28 ft.

Mean tidal range at berth 8 ft. to 9 ft. Nature of bottom – mud.

Vessel is able to dock at any stage of the tide, however, vessels undock on the flood to swing off berth. (Approximately one hour's flood tide required). The berth is a timber faced concrete wharf of length 240 ft.
Facilities: There are no bulk handling facilities or quay cranes. Three mobile cranes used. There are no Ro-Ro facilities or floating cranes available. Fork lifts are available for handling reels of linerboard. There are no facilities for handling containers as berth is only used by Paper Mill.
DENSITY: 1001.
STEVEDORES: Savannah labour used (Experts on loading paper reels).
FRESH WATER: Not available.
FUEL: Bunker fuel oil available by barge. Diesel oil and lubricating oils also available.
MEDICAL: Doctor and hospital available.
SERVICES: (Available locally or from Savannah). Fresh provisions, repairs, dry dock, airport, surveyors and laundry service.

PROVIDENCE, Rhode Island: 41.48 N. 71.23 W.

SHIPMASTER'S REPORT: May 1980.

PILOTAGE: Compulsory. Pilot boards one mile South of Brenton Reef Light Tower (Position 41° 25′ N. 71° 23′ W.). Send ETA to Agent 24 hours prior to arrival. Pilots (call sign "Rhode Island Pilots") on Channels 16, 12 and 18A.
ANCHORAGE: There is no port anchorage for dry cargo vessels. It was reported that tankers can discharge into barges off Newport.
RESTRICTIONS: Vessels can enter and leave at any stage of the tide, day or night.
MAX. SIZE: Pilot advised max. draft is 38 ft., however Agent recommends 35 ft. No keel clearance was stated.
TUGS: Nine available. 1,600 h.p. – 3,200 h.p. Vessels may dock and undock without tugs, however, they are required for turning in the harbour.

Providence Steamboat Company serving Ports of Providence, Narragansett Bay, Fall River and New England Electric at Brayton Point. Four tugboats – 24 hour dispatching service. Two 3,000 h.p. tugboats.
RADIO: Station WCC.
VHF: Port Authority on Channels 16 and 18A. Agent on 16, 18A, 13 and 9. Also see "Pilotage".
BERTHING: *No. 6 Municipal Pier:* The berth is the first port hand berth when entering Providence. Distance from entrance to berth 25 miles. Length and beam no limit. Max. draft 35 ft. Least depth of water in channel from sea to berth reported to be 40 ft. Mean tidal range at berth 4.5 ft. Also see "General".
Cargo Handling Facilities: Mobile cranes only available for handling bulk steel and scrap cargoes. Six mobile cranes, capacity 100 tons to 250 tons. No Ro-Ro facilities. No floating cranes. There are facilities for handling 20 ft. and 40 ft. containers, also sufficient storage space. There is also adequate storage space for breakbulk and palletised cargoes.
DENSITY: 1016.
FRESH WATER: Available, rate 15 t.p.h.
FUEL: Bunker fuel oil available if vessel has contract. Diesel oil not available. Lubricating oils available.
MEDICAL: Doctor and hospital available.
REPAIRS: Minor repairs possible, machine shop available.
AIRPORT: At Boston.
SURVEYORS: At Boston.
GENERAL: *Quay:* Granite slab construction with a wooden pile facing. A large number of the piles are missing but there are still sufficient to land on. Surface of quay looks very rough and covered in sand and earth but it is metaled under this and will take heavy mobile crawler cranes.
Ship Chandler: Satisfactory, prices reasonable.
Laundry: Satisfactory and prices reasonable. Laundry collected Saturday 1430 hrs. and returned Sunday morning.

REDWOOD CITY, California: 37.50 N. 122.28 W.

(See Plan Book)

DOCUMENTS, PILOTAGE and all general information refer to "San Francisco".
RESTRICTIONS: Though a natural deep water channel extends down the bay to Redwood City there is controlled depth channel 500 ft. wide and 30 ft. deep across San Bruno Shoal. The entrance channel to the port is 2 miles long and 30 ft. deep (all depths are at MLLW) and 300 ft. to 350 ft. wide. There are 2 large turning basins at either end of the port harbour channel.
HEALTH: See "Health: All ports" before first U.S.A. port (Albany). Illness reports made to San Francisco Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
BRIDGES: The San Mateo Hayward Highway Bridge with a vertical clearance of 138.5 ft. and horizontal of 500 ft. crosses the ship channel.
BERTHING:
Port of Redwood City:

Berth	*Length* (ft.)	*Depth* (ft.)	*Remarks*
No. 1	500	35	General cargo and bulk cement through pneumatic pipelines.
No. 2	355	35	
No. 3	450	35	General cargo, heavy lifts and scrap metal.
No. 4 (Oil Dock)	20	22	Equipped with pipelines to liquid storage areas.
No. 5	500	30	Designed to accommodate large tankers, general cargo and heavy lift cargoes. The berth will be dredged to 36 ft. in 1980.
Private Facilities:			
Ideal Cement Co.	649	12	Barge unloading dock. Used for storage.
Lone Star Industries	496	18	Barge dock for loading cement.
Lone Star Industries	20	16	Oil berth. Not in use.
Leslie Salt Co.	200	33	Elevator berth used for loading crude bulk salt.

Capabilities include complete facilities to handle LASH (Lighter Aboard Ship) system.
AUTHORITY: Port of Redwood City.
AGENT: See "San Francisco".

RICHMOND, California: 37.56 N. 122.25 W.

(See Plan Book)

(A) STANDARD OIL COMPANY OF CALIFORNIA TERMINAL.
(B) OTHER TERMINALS AT RICHMOND.

(A) STANDARD OIL COMPANY OF CALIFORNIA TERMINAL.
DOCUMENTS and all general information, refer to "San Francisco".
LOCATION: Richmond Long Wharf and Point Orient Wharf are situated on N.E. side of San Francisco Bay, a protected harbour. The refinery and storage tanks are near the wharves.

The exact position of the Long Wharf is Lat. 37° 55′ 20″ N. Long. 122° 24′ 35″ W. Wharf heading is 324° to 144°.

The exact position of the Point Orient Wharf is Lat. 37° 57′ 20″ N. Long. 122° 25′ 39″ W. Wharf heading is 356° to 176°.

There is adequate anchorage and room for manoeuvring in the bay.
DOCUMENTS: To clear vessel for entry, the Custom House requires the following documents:

Last Foreign Port Clearance.
Vessel's Register.
Vessel's Tonnage Tax Receipts.
Master's Oath of Entry.
Certificate of Financial Responsibility.
General Declaration.

If vessel is arriving from (or departing for) a foreign port, Master must also furnish:

6 Copies Crew List.
3 Copies Store List.
3 Copies Passenger List.
3 Copies Curio List.
4 Copies Cargo Manifest.

The Boarding Inspectors may require additional information.
PILOTAGE: Federal and/or State Regulations require licensed pilotage in and out of San Francisco Bay. Make arrangements for this ahead of time with the Ship's Agent.

Pilots may be picked up near the Light Buoy, 9 miles W.S.W. of the entrance to San Francisco Bay: Lat. 37° 45.0′ N., Long. 122° 41.5′ W.

To signal for Pilots:

In Fog – Approach, San Francisco approach Lighted Horn Buoy "SF", lay to, and blow four long blasts.
When Clear – By day, hoist International Code Flag "G".
By night, make four long flashes on signal light.

When necessary, Pilots may be contacted on 2182 kHz or VHF Channels 10 (156.5 mHz) and 16 (156.8 mHz). The Pilot boats may also be contacted by radio telephone.

The Pilot will serve as the Mooring Master until the ship is berthed.

If vessel goes to anchorage, a licensed Bay Pilot will be required before vessel can proceed to berths.
MAX. SIZE: The main ship channel into San Francisco has a project depth of 50 ft. However, the 35 ft. depth of the Southampton Shoal channel restricts the size of ships to wharves.
LIGHTENING: When a lightening operation is necessary the terminal management will direct the ship to Anchorage No. 9. The ship to be lightened will install fenders before the lighter ties alongside. The terminal will provide the fenders. The lightening Supervisor and ship's officer will hold a meeting to discuss the cargo transfer. During transfer, follow the same precautions and safety regulations that apply to cargo transfer at the wharf. The transfer rate will be regulated by the lightening vessel. The lightening Supervisor will observe all the lightening operations. The terminal will provide oil spill recovery equipment during lightening.
HEALTH: See "Health: All Ports" before first U.S.A port (Albany). Illness reports made to San Francisco Quarantine Station.
Quarantine and Pratique: Vessels are not required to pass a quarantine

inspection. It is necessary that vessels notify their Agents at least two days in advance of arrival in San Francisco Bay if sickness or disease is on board. The Agent shall notify Public Health for further action if necessary.

All vessels arriving from foreign ports will require clearance by the following U.S. Government Agencies: Customs House, Immigration Service, Department of Agriculture.

The vessel's Agent should make arrangements for the inspectors to board dockside or at anchorage.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO/VHF: The official language of the terminal is English. Therefore, vessel must have personnel on duty at all times who can communicate in English with the wharf personnel.

San Francisco Harbour Advisory Radar System, designated bridge-to-bridge frequency: VHF Channel 13 (156.65 mHz).

Federal communication regulations require that at any time VHF radio is in operation, Channel 16 must be monitored (156.8 mHz distress and calling frequency).

The U.S. Coast Guard requires all vessels anchored in San Francisco Bay to maintain a radio listening watch on VHF-FM Channel 13 (156.65 mHz) when the wind is 20 knots or greater. Any ship not equipped with Channel 13 shall maintain the listening watch on Channel 16 (156.8 mHz).

The 2-3 mcs. radio telephone call letters for the San Francisco Bay area are KLH.

Richmond Long Wharf (radio call KCE 373 – Chevron Shipping) is equipped with VHF radio, manned 24 hours per day. Channel 10 (156.5 mHz) is the operating frequency. While at anchor, in San Francisco Bay, vessels should maintain normal listening watches on VHF Channel 10.

ETA Requirements:

The Master of a vessel bound for San Francisco Bay is requested to advise Chevron Shipping (Cables address: Chevronship Richmond Sanfrancisco) of ETA, 7 days, 3 days and again 1 day (24 hours) before arrival at the wharf. First ETA message should include:

Estimated time of arrival at the wharf (local time).
Last port of call.
Estimated deep draft on arrival.
Quantity of ballast to be discharged.
Quantity and grade of cargo to be transferred.
Distance from bow to cargo and bunker manifolds.
Size and type of cargo and bunker connections.
Quantity and grade of bunkers and lubes required.
Quantity of fresh water required.
Number of crew replacements expected.
Amount of provisions and stores to be loaded.
Repair work anticipated.
Make 24-hour ETA as accurate as possible and whenever arrival time changes, by 1 hour or more, send a correcting message promptly.

BERTHING: At least 1 hour before docking contact Chevron Shipping, in Richmond, by VHF radio (Channel 10, 156.5 mHz) and request a berth assignment. They will try to berth vessel as soon as it arrives. However, if no berth is available, anchor in the prescribed anchorage (as directed by the Captain of the Port) and maintain radio contact with Chevron Shipping, Richmond.

Recommended Docking Practices: The terminal require the use of adequately powered tugboats when docking at the wharves. Chevron Shipping Company has two tugs that can be hired, provided arrangements are made prior to vessel's arrival.

(a) In order to ensure maximum safety while berthing and unberthing ships at Long Wharf and Point Orient Wharf, the following minimum tug assistance is required:

			Minimum Total Horsepower Required	
Vessel Size		*No. of Tugs*	*Mooring*	*Unmooring*
Up to	20,000 d.w.t.	1 or more	1,000 h.p.	1,000 h.p.
20,001 to	50,000 d.w.t.	2 or more	2,000 h.p.	1,500 h.p.
50,001 to	80,000 d.w.t.	2 or more	3,000 h.p.	2,000 h.p.
80,001 to	100,000 d.w.t.	2 or more	3,500 h.p.	2,500 h.p.
Over	100,000 d.w.t.	2 or more	4,000 h.p.	3,000 h.p.

(b) Bow thrusters are acceptable provided the horse power rating equals or exceeds the minimum requirements.

(c) Always stem the tide when docking.

(d) If possible, avoid steep-angle approaches.

(e) In view of the strong tidal currents at both wharves, make sure vessel is moored securely. Check on the number of lines and their strength. Pay special attention to the fore and aft leads.

Gangway: Rig gangway properly and safely, with handrails and adequate illumination, suspend a safety net under gangway. If vessel does not have a gangway, the pier has some available in limited sizes. However, the Company cannot be liable for the manner in which the ship's crew rigs the gangway. Berths 1 and 4 have permanent gangways installed.

There are 2 piers that accommodate oil transfers. They are referred to as Richmond Long Wharf and Point Orient Wharf.

Long Wharf: Richmond Long Wharf, a "T"-head pier, has an overall length of 3,396 ft. It consists of concrete and wooden piles and a concrete superstructure connected to the shore, 4,200 ft. away by a piled causeway. The fender-to-fender width is 132.5 ft.

Berths 1, 2 and 3 deck level is 15.5 ft. above MLLW. Berth No. 4 deck level is 25 ft. above MLLW.

There are four deep water berths on the West side. Berth No. 1 is 950 ft. long, Berth No. 2 is 650 ft. long, Berth No. 3 is 700 ft. long and Berth No. 4 is 1,050 ft. long. They are numbered 1 through 4 from South to North. Water depth is maintained at 38 ft. at MLLW. There are two inner Berths No. 9 and No. 11 that are used primarily for barge loading or discharging. Water depth is maintained at 18 ft. at MLLW.

Point Orient: The Point Orient Wharf, an "L"-head pier, is 2.25 miles North of the Long Wharf. It is 504 ft. long and 60 ft. wide. It is supported on wooden piles and has a causeway that extends 1,200 ft. to the shore.

There is one ship berth, No. 1 where the water depth is 32 ft. at MLLW. There is also one barge berth No.2. Deck level is 14.5 ft. above MLLW.

LOADING AND UNLOADING: Berth No. 2 is fitted with 4 in., 6 in, and 8 in. hoses for cargo transfer. Berth No. 1 has two 12 in. and two 16 in. Chicksan loading arms. Berths No. 3 has two 8 in. and four 12 in. Berth No. 4 has two 12 in. and four 16 in. arms.

NOTE: All terminal flange facings are carbon steel ANSI 150 lbs. rating.

No cast iron is allowed outside of (and including) the first valve on the vessel's cargo or bunker system.

Berth vessel so that its manifold is positioned within the horizontal and vertical limits of the hoses or Chicksan arms.

Cargo Transfer:

(a) Pre-Transfer Declaration of Inspection – Before cargo transfer begins, the Wharfmaster and Shore Captain will board vessel. They will discuss the safe transferral of your cargo. They will also review the Declaration of Inspection and sign it with you when all items are understood and agreed upon.

(b) Inspection During Cargo Transfer – These representatives will also visit the ship during cargo transfer. With the approval of Deck Watch, they will check to ensure that safe working practices are being observed by both ship and wharf.

(c) Minimum Cargo-Handling Crew – When transferring cargo or ballast, the officer in charge of cargo transfer must have at least two assistants: one to maintain watch on the open-deck cargo transfer manifolds; the other to assist in handling valves, tank gauging, or shutdowns of transfer pumps in case of emergency. Other crew members may be needed depending on the size and complexity of ship transfer system. These requirements will be developed at the pre-cargo-transfer conference. When loading ship's bunkers and lubes, the Master and Chief Engineer will assure the terminal that this transfer will be handled in a similar manner.

Loading Rates: Several products can be loaded at each berth. Loading rates depend on a multitude of situations. These will be discussed at the pre-cargo-transfer conference.

Unloading Rates: Unloading rates also depend on many things – vessel's pumps, the size and availability of terminal lines and tanks, refinery operations, etc. The pre-cargo-transfer conference will develop the estimated unloading and deballasting rates and procedures.

To expedite cargo transfer, it may be necessary to use booster pumps. To eliminate hazards to this equipment, notify the Berth Operator 15 minutes ahead of time whenever you are going to: Stop or change any cargo transfer rate, strip any tanks, switch tanks.

Maximum Temperature and Pressure Limits: The terminal cargo-handling system is designed to comply with the 150 lbs. ANSI flange rating. For example: 275 psig at 100°F, 240 psig at 200°F, etc. Special restrictions apply for aromatic and other hazardous stocks. These will be explained during the pre-cargo-transfer conference.

Tank Gauges: To ensure proper handling of each cargo, the terminal requires U.S. flag company vessels to be gauged every *two* hours and matched with shore-tank gauges. Non-company vessels are not required to gauge, but may wish to compare their gauges against the shore gauges. Transfer operations will shut down immediately if:

— the transfer rate is over 1,000 b.p.h. and there is a discrepancy in the tank's gauges that amounts to mgre than 20% of that transfer rate.
OR
— the transfer rate is under 1,000 b.p.h. and there is a discrepancy in the tank's gauges that amounts to more than 30% of that transfer rate.

For example: Vessel arrived with 120,000 bbls. of crude. First 2 hour gauge at 1000 hrs. Estimated rate 7,000 b.p.h.

	Ship	*Shore*	*Difference*
1000 hrs.	14,241	13,996	245
1200 hrs.	28,435	25,643	2,792

As the estimated transfer rate is 7,000 b.p.h., the allowable difference would be 1,400 bbls. The 245 bbls. difference at 1000 hrs. is OK and transfer should continue. The 1200 hrs. gauge of 2,792 bbls. difference is out of tolerance and the transfer should be discontinued until discrepancy can be resolved.

BALLAST: Ballast facilities at Richmond Long Wharf only (max. capacity 25,000 bbls. – normal capacity 15,000 bbls.). None available at Point Orient. However, arrangements for this to be made through Agent before arriving at the wharf. All ballast to be discharged must be pumped to shore while berthed at wharves.

POLLUTION: The Federal Water Pollution Control Act prohibits the discharge of oil or oily waste in the waters of San Francisco Bay which causes a film or sheen on the water or discolours it or causes a sludge or emulsion beneath the surface of the water.

Regulations enforced by the Bay Area Pollution Control District also prohibit the emission of smoke and soot. Vessel can be fined if it emits visible smoke (Ringelmann 1) for more than 3 minutes in one hour, or blows its boiler tubes enough to create a soot nuisance on shore.

In addition, the terminal has certain regulations designed to eliminate obnoxious odours. Vessel may, therefore, be required to follow special procedures before tank cleaning, loading or ballasting. If, in spite of precautions, vessel does cause such odours, loading or unloading operations may be stopped.

OIL INSPECTIONS: To control product quality, the terminal has several requirements for sampling and gauging the oil as it is being transferred. These requirements will be explained during pre-cargo transfer conferences. Outside inspection service is provided by the following independent companies:

Charles Martin & Company, 488 Wright Avenue, Richmond, California 94802. Tel. (415) 232-5270.

E. W. Saybolt Company, 889 Ensenada Avenue, Berkeley, California 94710. Tel. (415) 525-0417.

Arrangements to be made via the Agent.

MEDICAL: No facilities at wharves. Local ambulance may be reached at: Cadillac Ambulance Service (415) 234-3242; Alhambra Air-ground Ambulance Service (air) (415) 228-1096; California Aviation Service Inc. (air) (415) 569-3855.

FRESH WATER: Potable water provided. Make arrangements through Agent.

FUEL: Many grades of bunkers, diesel and lubricating oils are available in bulk or drum quantities. Agents order them from Supply and Distribution or Chevron International at least 48 hours before vessel arrives, otherwise, vessel may be delayed.

To take on bunkers and diesel, vessels must be able to connect to terminal's 4 in., 6 in. and 8 in. hoses in Berth 2, connect to 8 in. Chiksan in Berth 3, to 12 in. Chiksans in Berths 1 and 4.

PROVISIONS: Provisions and stores are available through ship's Agent. However, they will be loaded only at the Richmond Long Wharf, and only when the loading does not interfere with cargo or ballast transfer. No hydrocarbons, paints, detergents or other polluting materials will be allowed to go aboard the vessel by means of slings or cargo nets. If the vessel is large and is not equipped with booms, the Agent may need to supply a spark-proof crane for the loading. Stores will not be handled by wharf personnel.

REPAIRS: There are many major repair facilities located in the San Francisco Bay Area. The Agent can probably make arrangements for use of their services.

Repairs at the terminals are not normally permitted on non-company vessels, unless it is absolutely necessary in order to move the vessel. Any repair work that would necessitate hot work must have approval from refinery management. No repairs will be allowed that would delay cargo transfer or lengthen the transfer time.

TIME: Local time: Pacific Standard Time GMT minus 8 hours or Zone plus 8 hours.

(Note: From the last Sunday in April to the last Sunday in October, this is modified by use of Daylight Time to GMT minus 7 hours or Zone plus 7 hours)

All communications should refer to local time.

REPATRIATION: Facilities exist for repatriating of crew by sea or air. Make the arrangements through ship's Agent, and notify the terminal management.

SHORE LEAVE: Chevron Shipping Co. provides bus service from the Long Wharf to shore and from there ship's personnel can connect with local taxi or bus service nearby. For transit – system information, call (415) 232-5665.

No ship's commercial passengers are ever allowed to board or leave a ship at the wharves.

GENERAL:

Tides and Currents: The maximum tidal range is approximately 9 ft. and the mean range is 4.2 ft.

Tidal currents in the wharf area can be very strong. They generally run in a North'ly and South'ly direction.

Winds: Winds of varying strength may come from any quarter. The normal wind, however, is from the N.W. in Summer, and S.W. in Winter.

Visibility: The visibility in this area of San Francisco Bay is generally fair to excellent, with occasional late evening fog in the Summer lasting until noon the following day. In the Winter, morning or tule fogs frequently occur. The Winter fogs are generally more dense than those of Summer.

Weather: The local weather is usually moderate, with average temperatures ranging between 40°F and 85°F.

The U.S. Coast Guard radio stations make scheduled weather broadcasts (preceded by a preliminary call on 500 kHz and 2182 kHz) at the times and on frequencies shown below:

Radio Telegraph – NMC San Francisco, Calif. 420 kHz, 2000 hrs. and 0900 hrs. PST.

Radio Telephone – NMC San Francisco, Calif. 2670 kHz, 1800 hrs. and 0600 hrs. PST.

VHF Radio – KHB 49 San Francisco, California 162.55 mHz.

Navigation: Master is required to notify the U.S. Coast Guard Captain of the Port at least 24 hours before arriving in the Bay. Master will satisfy this requirement automatically if he reports in accordance with the U.S. Coast Guard's voluntary Automated Merchant Vessel Report (AMVER) System.

On entering the Bay, follow the traffic-separation scheme shown on United States Coast and Geodetic Survey Chart 5072.

Charts and Publications: The following official charts and publications are recommended for use when entering San Francisco Bay:

United States Coast & Geodetic Survey Charts:
- No. 5002 – San Diego to Point St. George.
- No. 5072 – Gulf of the Farallones.
- No. 5532 – San Francisco Entrance.

West Coast of North and South America Tide Tables, published by U.S. Coast and Geodetic Survey.

Tidal Current Charts – San Francisco Bay, published by U.S. Coast and Geodetic Survey.

Coastal Pilot No. 7 for West Coast of United States, published by U.S. Coastal and Geodetic Survey.

U.S. Coast Guard Regulations 33 CFR 154, 155 and 156, published by U.S. Coast Guard.

Current Edition of Operating Manual, S.F. Harbor Advisory Radar, published by U.S. Coast Guard.

Light Lists for United States and Possessions, published by U.S. Coast Guard.

Radio Navigational Aid, Pacific and Indian Oceans (Publication No. 117113), published by U.S. Hydrographic Office.

Wharf Communication: The Richmond Wharves are equipped with a positive and dedicated ship-to-terminal radio communication system. On arrival, vessel will be provided with one radio (walkie-talkie). It must be with an English-speaking person on duty at all times. Vessel will be instructed in the proper use of this radio during the pre-cargo transfer conference. If the radio is not returned, a charge of $2,500 will be levied.

Telephone: A telephone will be placed on the open deck of the ship near the gangway. It is to be used for the local calls only. the following is a partial list of commonly used numbers:

Wharfmaster	4388
Shore Captain	4620
Head Operator (PAD) Long Wharf	4494
Terminal Superintendent	2314

There are two public telephones on the Long Wharf for outside calls, one between Berths 1 and 2 and one at Berth 3. There is also a public telephone at Point Orient Wharf.

SAFETY REGULATIONS:

A. General – Observe the following regulations AT ALL TIMES while berthed at the wharves:

1. Boiler-Tube Blowing – Do not blow boiler tubes and take every precaution to prevent sparks from escaping from the funnel. If vessel safety is at stake, stop transfer operations and move the ship to anchorage before blowing the tubes. In case vessel has boiler trouble, notify Chevron Shipping Co. who in turn will notify the Air Pollution District Control.
2. Cargo Tank Tops:
   (a) Before berthing, all tank tops, ullage plugs, and gauge tapes must be closed and dogged down unless the Master certifies that the tanks are gas free.
   (b) Cargo and bunker tank tops must be kept closed. This also applies to permanent ballast tanks.
3. Cargo Connections, Unused – blank unused cargo and bunker connections. A proper-sized bolt in *every other hole* is the minimum requirement. Offshore risers on systems being used are to be fully bolted.
4. Engines – Keep the engines ready and the vessel trimmed so it can leave the piers under short notice. If the vessel becomes unable to get underway 2 tugs of adequate size will be standing by at all times.
5. Fire Fighting – Keep fire and emergency equipment in readiness. At least 2 fire hoses to be uncoiled and laid out at the vessel's manifold area. Place two portable fire extinguishers near the manifold.
6. Gas Venting:
   (a) Ullage Holes – Keep all ullage or gauge tapes completely closed (not secured) except for intermittent periods needed to ullage or gauge ship's tanks.
   (b) Flame Screens – When open, all ullage ports must be protected by clean, well-fitted flame arrestors of wire-gauge screens: these must be of an approved type and have no defects.
7. Gas Freeing and Tank Cleaning – Do not gas-free or clean any tanks at berth without prior approval of terminal management.
8. Gangways – Tend the gangway and keep it safely rigged, secured and lighted.
9. Mooring Lines – Tend mooring lines to keep them taut and keep the vessel in position. See that tension winches are on manual brake. During ebb tide and East winds, when the ship has a tendency to drift away from the pier, tend the mooring lines with special care.
10. Portholes – Portholes and passageway hatches facing the cargo transfer area must remain closed. Portholes facing the wharf must also remain closed or be suitably screened.
11. Repairs – While at berth, do not perform any repair work, hot work, or maintenance work without prior approval from the terminal management. Hot work will require *written* approval by terminal management.
12. Radio – At all times in port, keep the radio transmitter and aerials switched off and grounded. Portable radios (walkie-talkies) that are certified intrinsically safe may be used.
13. Sea Suctions and Bilge Valves – See that all ship's sea, bilge, and overboard discharge valves connected to the cargo system are tightly closed, lashed and sealed in accordance with U.S. Coast Guard Regulation 33 CFR 155.
    The seals are *not* to be broken while berthed except in the presence of the Shore Captain or in case of emergency.
14. Sewage Discharge – Install deflection plate over the sewage discharge if it is capable of discharging on the wharf.
15. Smoking – Allow smoking on board only in places which the Master has personally approved. There is to be NO SMOKING ON THE WHARF OR WEATHER DECK OF THE VESSEL AT ANY TIME.
16. Stern Discharge Line – Keep the stern discharge line, if any, blanked at all times.
17. Towing Wires – Keep the towing wires (fire wires) for emergency use, lowered to the water's edge from the offshore bow and stern. Tend them to keep the "eye" near the water's edge, where they can be reached by tugs in case of emergency.

B. Cargo Transfer – Observe the following additional regulations DURING CARGO TRANSFER:

1. Air Intakes and Air Conditioning Units – Close any central air-conditioning or fresh-air intakes which might take in gas. Close all intakes within a combined total of 100 ft. vertically and horizontally of cargo tank openings and venting points. External window-type air-conditioning units that face the cargo transfer area must be kept disconnected.
2. Communication – Ship/Shore – Station a responsible member of the crew on the loading deck by the transfer connections to maintain communications or remain in visual contact with the Berth Operator. He is to advise the Operator when changes in rates are required, using radio pack sets or voice contact.
3. Passageway hatches to open weather decks facing the cargo area and wharf must be kept secured except for momentary passage.

4. Electric Lights and Cables – Use only vapour-proof electric lights of an approved type, on the open deck. Disconnect portable electrical equipment on the open deck unless certified for use in hazardous areas.
5. Galley Fires – Light no galley fires unless you can first assure the terminal that they present no hazard to the cargo transfer.
6. Hand Torches (Flashlights) – See that hand torches used during cargo transfer are of an approved type, certified as safe in hazardous locations.
7. Hoses:
    (a) Before transfer, inspect cargo-loading hoses or arms to see that they are in good condition, *fully bolted,* and properly connected.
    (b) The hoses must be supported at not more than 12 ft. intervals with a bridle or mat to minimise kinks or chafing. They must not be bent to a radius less than 12 times their diameter. Do not use single slings when taking aboard or supporting during transfer.
    (c) The hose or arm-to-riser connections must have drip pans of adequate size installed under them.
    (d) When cargo transfer has concluded, each hose/arm is to be drained via the drain valve and blank-flanged *before* being removed from the vessel. The Terminal Head Operator is to be aboard the vessel to oversee the connecting and disconnecting of the loading arms and, also, to alert crew members when passing the arms.
8. Scuppers – All deck scuppers must be plugged and cemented oil tight or sealed with a Coast Guard approved device. Do not remove the plugs until ship has departed, except when necessary to drain off rain water. In such cases, supervise the draining closely and replace the plugs immediately. Install splash boards (on dock side) over scuppers. Cement is to be supplied by the ship.
9. Special Stock Hazards:
    (a) Static-Ignition Hazards – Some kinds of stock require special precautions because of the static they accumulate. Their handling will also be fully discussed during pre-cargo transfer inspection. Lube oils may be loaded through ship's risers or connections to butterworth plates. No overall loading is permitted.
    (b) Hydrogen-Sulfide Hazards – Some kinds of crude may contain dissolved hydrogen-sulfide or mercaptans in concentrations which would cause the gases vented during tanker ballasting to be hazardous or odorous. Do not ballast or load into cargo tanks that might contain H_2S or mercaptan vapours, unless the tanks have been passed for loading by the wharfmaster. The vessel must proceed to sea for clean-up prior to loadback if the wharfmaster deems the tanks unsuitable for loadback.
    (c) Aromatic-Stock Hazards – Special precautions are required for toxic cargoes such as aromatics. It is recommended that Masters review the instructions by Owners/Charterers about toxic chemical hazards.
10. Valve Shut-off – Many new tankers have motor-operated valves, operated from a central location. Never operate these valves to close off against full oil-delivery rates unless the valve closure action takes at least 60 secs. Closure times less than 60 secs. may result in surge and hammer of sufficient force to rupture the loading arm/hoses.
11. Ventilators – Keep ventilators suitably trimmed with regard to tank vents and prevailing wind conditions to prevent entry of flammable vapours.

AUTHORITY: Standard Oil Co. of California, Richmond, California.

(B) OTHER TERMINALS AT RICHMOND

BERTHING: *Parr-Richmond Bulk Commodity Wharf:*
Owners: Parr-Richmond Terminal Co.
Operated by: Parr-Richmond Terminal Co.
Use: Receipt and shipment of various dry-bulk commodities.
Water Depth: 35-36 ft.
Mechanical handling facilities: On wharf; 4×50-ton electric, travelling full portal gantry cranes, each with 100-ft. boom and 2×45-ton electric travelling full portal gantry cranes, each with 118-ft. boom, 36-in. belt conveyor for shiploading with 10,000-ton-capacity covered storage warehouse.

Santa Fe Sugar Dock:
Owned and operated by: Atchison, Topeka and Santa Fe Railway Co.
Use: Receipt of sacked sugar by inland waterway vessels for transfer to railroad cars.
Dimensions: Length of face 545 ft., lower end 51 ft.; depth alongside at MLLW 24 ft.

Levin Metals Corporation:
Owner: City of Richmond Port Commission.
Operated by: Levin Metals Corporation.
Use: Scrapping of ships, consideration of scrap and export loading of cargo.
Dimensions: Length of face 555 ft. each; Pier 1 depth 35-38 ft., Pier 2, 17 ft.

Richmond Container Terminal No. 3:
Owners: City of Richmond.
Operated by: Matson Terminals Inc.
Use: Receipt and shipment of containerized cargo in foreign and domestic trade.
Dimensions: Length of face 1,009 ft.; depth alongside at MLLW 41 ft.
Mechanical handling facilities: Two rail-mounted dock cranes, two transfer devices and two bridge cranes. Semi-automated operation.
Remarks: Face of wharf is in line with the face of adjacent wharf, providing 1,550 ft. of continuous berthing. Area of container terminal – 16 acres plus back-up area.

Richmond Terminal No. 4 Wharf:
Owners: City of Richmond.
Operated by: Richmond Terminal Agency, Pacific Molasses Co. Ltd., & Dorward & Sons Co.
Use: Bulk Liquids.
Dimensions: Length of face 1,047 ft.; South side 175 ft.; North side 100 ft.; depth alongside at MLLW 32-50 ft.

Canal Industrial Park and Willamette Iron & Steel Co.:
Owner: City of Richmond Port Commission.
Operated by: Canal Industrial Park (Pasha Truckway) & Williamette Iron & Steel Co.
Use: Import service and delivery of foreign automobiles; ship repairs.
Dimensions: Length of face 700 ft.; depth alongside at MLLW 35ft.; usable berthing space with dolphin 900 ft.
Mechanical handling facilities: Mobile handling equipment available. Complete range of crane and ship facilities for major ship repair.

TANKERS: *Atlantic Richfield Tanker Dock;*
Owned and operated by: Atlantic Richfield Co.
Use: Receipt and occasional shipment of petroleum products; bunkering vessels.
Dimensions: Length of face approx. 250 ft.; lower and upper sides 40 ft. each.

Atlantic Richfield Barge Dock:
Owned and operated by: Atlantic Richfield Co.
Use: Receipt and shipment of petroleum products by barge; bunkering vessels.
Dimensions: Length of face 150 ft.; depth alongside at MLLW 34 ft.

Richmond Terminal No. 1 Wharf:
Owners: City of Richmond.
Operated by: Petromark Inc.
Use: Receipt and shipment of petroleum products, chemicals and petrochemicals.
Dimensions: Length of face 557 ft.; depth alongside at MLLW face 35 ft.

Richmond Terminal No. 2 Liquid Cargo Wharf:
Owners: City of Richmond.
Operated by: Canal Industrial Park.
Use: Receipt and shipment of vegetable oils, chemicals and petrochemicals.
Dimensions: Length of face 380 ft.; depth alongside at MLLW 35 ft.

Texaco Wharf:
Owners: Texaco Inc.
Operated by: Texaco Inc.
Use: Receipt and shipment of petroleum products.
Number of berths: 1.
Water depth: 35 ft.

Time Oil Company Wharf:
Owned and operated by: Time Oil Co.
Use: Receipt and shipment of petroleum products.
Number of berths: 1.
Water depth: 35 ft.
Special remarks: 3×10-in. pipe-lines extend to 25 steel storage tanks in rear; total capacity of 618,000 barrels.

Union Oil Co. Tanker Dock:
Owned and operated by: Union Oil Co. of California (also services GATX Terminal).
Use: Receipt and occasional shipment of petroleum products; bunkering vessels.
Dimensions: Length of face 225 ft.; lower end 45 ft.; upper end 45 ft.; depth alongside at MLLW 35 ft.
Mechanical handling facilities: Hose handling at wharf is by ship's gear and small tractor crane.

Union Oil Co. Barge Dock:
Owned and operated by: Union Oil Company of California.
Use: Shipment and occasional receipt of petroleum products; bunkering vessels.
Dimensions: Length of face 150 ft. (approx.); lower end 45 ft.; depth alongside at MLLW 35 ft.
Mechanical handling facilities: Hose handling at wharf is by ship's gear and small tractor crane.
Remarks; Wharf and Tanker Docks are spaced about 230 ft. apart; together they provide 1 large tanker berth.

AGENT: See "San Francisco".

RICHMOND, Virginia: 37.32 N. 77.25 W.

(See Plan Book)

DOCUMENTS: See "Hampton Roads".
PILOTAGE: Entrance through Hampton Roads. Virginia Pilots Assn. original contact same as for Norfolk, Virginia. Pilots will arrange for change of Pilots to proceed up the James River.
ANCHORAGE: Hampton Roads anchorage, also river anchorage approximately 40 miles up river, shown as "Upper Brandon" on charts.
RESTRICTIONS: Navigation of river above Upper Brandon recommended in daylight hours, except vessels under 250 ft. length.

MAX. SIZE: Max. length recommended by Pilots 550 ft., draft 21 ft. 6 in. any tide, depth of channel 25 ft. MLW tide, change 3 ft. 5 in.
HEALTH: See "Health: All ports" before first U.S.A. port (Albany). Illness reports made to Washington, D.C. Quarantine Station
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: See "Hampton Roads".
TUGS: Not needed for berthing unless vessel is to be turned around on arrival. Tug available at Terminal on reasonable notice.
BERTHING: Vessels berth alongside wharf 1,250 ft. long. Depth 25 ft. at MLW.
BRIDGES: 2 bridges across river between Hampton Roads and Richmond. No specific time or notice required.
STEVEDORES: Arrangements to be made through Agents. 48 hours notice requested.
MEDICAL: Vessels cleared by U.S. Health officials at Hampton Roads before proceeding up river.
DENSITY: Water considered as 100% fresh.
FRESH WATER: Available at pier.
FUEL: Bunkers only available at Hampton Roads.
GANGWAY/DECK WATCHMEN: None required, unless crew detained by U.S. Immigration.
OPENING/CLOSING HATCHES: On bulk cargo vessels, usually opened and closed by ship's crew, also steel hatches handled by ship's crew, sometimes determined by terms of Charter.
CERTIFICATES:
Ship's Register.
Load-line Certificate.
Safety Certificate.
Tonnage tax receipts.
Certificate of nationality.
Passenger Certificate.
CUSTOMS ALLOWANCE: Tobacco, 200 cigarettes (1 carton for 2/3 days) if further allowance is needed Customs Officer will return on request of Master. Wine and Spirit, 1 bottle per officer, Customs Officer will return on request of Master.
IDENTIFICATION CARDS: Immigration landing permit required.
CONSULS: No consuls in Richmond, handled through Hampton Roads if needed.
REPAIRS: Only minor repairs, no shipyards.
REPATRIATION: Handled through Norfolk, Virginia.
AIRPORT: Approximately 10 miles from port, regular airline service.
TIME: Eastern time GMT minus 5 hours. Daylight saving time from first Sunday in May to last Sunday in October.
HOLIDAYS: January 1st, May 30th, July 4th, Labour Day (1st Monday in September), Thanksgiving Day, Christmas Day.
POLICE/AMBULANCE/FIRE: Police 780-9461; Ambulance 780-9404; Fire 780-9191.
TELEPHONES: No arrangements for placing aboard vessels.
SHORE LEAVE: Allowed. Proper papers should be available.
AUTHORITY: Port of Richmond Advisory Commission.

RIVERHEAD, Long Is., New York. 41.00 N. 72.39 W.

(See Plan Book)

DOCUMENTS: See "New York".

Terminal will provide "Declaration of Inspection" form which must be completed before cargo transfer begins.

LOCATION: The fixed Offshore Tanker Berth is situated 1.2 miles offshore from the North shore of Long Island in Long Island Sound, 4 miles 257° true from the beacon on Mattituck Inlet breakwater and 12.7 miles 178.5° true from Falkner Island Lighthouse. The geographic position of the centre point of the Operating Platform is in Latitude 41° 00′ 01″ North and Longitude 72° 38′ 50″ West. Jacobs Point Lighted Bell Buoy No. "1" is in 65 ft. of water 600 yards 275° true from the platform. The platform has 4 navigation lights situated on each corner of the structure flashing every second. A similar navigation light is also situated on each of the East and West mooring dolphins.

PILOTAGE: Pilot is arranged for by ship's Agent. Vessels with a draft of 40 ft. or less will pick up Pilot 2 miles South of Point Judith Buoy No. "2" (Location of buoy: Latitude 41° 19.3′ North, Longitude 71° 28.5′ West). Vessels with 40 ft. to 60 ft. draft will pick up Pilot N.E. of Block Island at Latitude 41° 15′ North, Longitude 71° 24′ West, just South of Buoy "A". Pilot boats "Northeast Pilot" or "Rhode Island Pilot" watch Channels 16, 13 and 18A. Distance to platform is approximately 65 miles. The Pilot will also perform the duties of Docking Master while vessel is at the Offshore Platform. It is required that the Pilot remain on board on standby while the vessel is moored at the Offshore Platform. Vessels with 50 ft. or deeper draft require a Pilot's assistant to assist regular Pilot in navigating the vessel into Long Island Sound and to the Offshore Platform.

ANCHORAGE: Vessels awaiting berth shall anchor 1 to 1.5 miles North of the platform facility. Holding ground is good and 90 fathoms (6 shackles) in the water is considered safe.

Platform crew under the supervision of the Marine Supervisor will board about 1 hour prior to scheduled mooring time. Generally launch does not arrive before this time, except for emergencies.

RESTRICTIONS: Generally, vessels are moored on any stage of the tide and at night when weather conditions permit.

MAX. SIZE: Length in North berth 1,150 ft. LOA and draft not to exceed 60 ft. Length in South berth 700 ft. LOA and draft not to exceed 50 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New York Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Tugs are arranged by ship's Agent. Tug boats generally come from New Haven. When ordering tugs, sufficient time must be allowed for tug to cross Long Island Sound at distance of approximately 18 miles. All vessels require a minimum of 2 tugs while docking. Vessels over 80,000 d.w.t. shall have 3 tugs equalling a total of 6,000 h.p.

A tug is required for undocking all vessels.

COMMUNICATIONS: Telephone at Riverhead 727-5600 (Code for station to station: Dial 516 727-5600). Cable Address "Northville Riverhead New York". Radio I.T.T. Amagansett. TWX No. 96-1415 Northville Melville and TWX No. 510-224-6443 Northville Melville.

VHF: Communication with shore and launch via portable VHF radiophone. This equipment on continuously during vessel's stay. The Platform crew maintains radio watch and constant communication with shore for general purposes and emergencies.

VHF Marine Operators use VHF Channels: Riverhead (N.Y.) Marine Operator 28; New London Marine Operator 25 & 26; Providence Marine Operator 28; to place land calls.

BALLAST: No ballast disposal facilities. Long Island Sound is inland water and United States Anti-Pollution Regulations rigidly enforced. No bilge water, oil-contaminated water, garbage or any waste matter which may pollute sea water is to be discharged overboard while vessel within Long Island Sound and approaches.

Ballast suction valves must be sealed with a numbered seal until completion of cargo discharge.

STORES/FRESH WATER/FUEL: No fresh water facilities. Small quantities provisions may be purchased at local stores in Riverhead, 4 miles inland. All services contingent upon Marine Supervisor's approval and on weather conditions.

QUARANTINE, CUSTOMS AND IMMIGRATION: New York City is port of entry for Northville. Entry and clearance must be arranged by ship's Agent. Boarding officers board in the anchorage or upon arrival. Pertinent Government officials should be advised in sufficient time, usually not less than 24 hours, Monday through Friday and 48 hours on Saturday and Sunday. Generally, entry and clearance can be arranged by Agent who should advise Customs well in advance of vessel's arrival, thus saving necessity of having Master go to Customs House in New York.

MEDICAL: Hospital in Riverhead equipped with all medical facilities. Medical attention must be arranged by ship's Agent. U.S. Public Health Service not available locally.

BERTHING: North Berth (1): Vessels berthed during flood tide will moor starboard side to and during the ebb tide current will moor port side to. Forward and stern spring lines are secured to the breasting dolphins and bow and stern lines are made fast to mooring dolphins located to the East and to the West of the platform structure. Terminal Foreman boards vessel to provide communications and assistance during the mooring operation.

South Berth (2): Vessels berthed during flood tide current will moor port side to and during the ebb tide current will moor starboard side to. Forward and stern spring lines are secured to the breasting dolphins in the South berth. Bow and stern lines are made fast to the North berth breasting dolphins, and if necessary, also to the mooring dolphins located to the East and West of the platform structure.

Four mooring buoys are situated South of the mooring facility which were formerly used for mooring vessels in the North berth. Mooring buoys will be used at the discretion of the Docking Master (Pilot) and/or Northville's Marine Supervisor.

Masters will note that platform is situated in an open roadstead and that all mooring equipment must be in proper working order and in good condition. If, in the opinion of the Pilot (Docking Master) or Northville's Marine Supervisor, the vessel's mooring equipment is inadequate, the vessel will not be permitted to remain in the berth.

Vessels must be equipped with manilla or better mooring lines of not less than 8 in. circumference and not less than 90 fathoms length.

Vessels having wire moorings secured on warping winches with brake are acceptable. Warping winches must be adequate to handle mooring lines under heavy strain. Efficient stopper lines must be readily available to "stop off" mooring lines for transfer from winch to bitts without loss of tension.

The Docking Master (Pilot) will assist the Master in the berthing of the vessel and supervise the mooring and unmooring operations.

No gangways are used at this terminal. Crew must use ship's ladder for launch service.

OIL TRANSFER CONNECTIONS: The Marine Supervisor and/or his crew will supervise the connecting and disconnecting of the hydraulically operated steel loading arms.

In the North berth there are 2×16 in. and 2×12 in. steel loading arms, and in the South berth there are 2×12 in. steel loading arms, all with appropriate reducers. The 12 in. L/U arms will connect to 8 in., 10 in., and 12 in. 150 lb. ASA flanges. When connecting 2×12 in. L/U arms the centre line of the ship's flanges must be at least 6 ft. (72 in.) apart.

The 16 in. L/U arms will connect to 10 in., 12 in., 14 in., and 16 in. 150 lb. ASA flanges. When connecting 2×16 in. L/U arms the centre line of the ship's flanges must be a minimum of 15 ft. (180 in.) apart.

The L/U arms cannot be connected directly to valve flanges. Flanged spools or reducers must be provided. Provisions must be made available for quick draining of the L/U arms.

LOADING AND DISCHARGE OF CARGO: Oil transfer operations are entirely in accord with the Rules and Regulations of the United States Coast Guard. Declaration of Inspection by the Dock person in charge and the Vessel person in charge must be completed prior to commencement of any oil transfer operations.

Discharge rates seldom exceed 13,000 to 15,000 bbls.p.h. due to elevation of tanks. Ships should anticipate difficulty stripping residual cargo.

WEATHER AND TIDE: Strong winds from North and N.W. experienced during Winter and Spring. Tide during maximum ebb and flood often reaches 3.5 to 4 knots velocity.

DENSITY: Flood tide density 1025. Ebb tide density 1020.

CUSTOMS ALLOWANCE: Tobacco, wine and/or spirit allowance: Same as permitted in New York Harbour.
IDENTIFICATION CARDS: Issued by Immigration Officer.
CONSULS: All Consuls Offices located in New York City.
REPAIRS: No repair facilities are available. *Vessel must remain* in sailing readiness at all times while moored at the platform facilities.
DRY DOCKS: At New York Harbour.
REPATRIATION: Agent arranges all crew repatriation via New York.
AIRPORT: New York Airports 80 miles distant.
TIME: Standard time GMT minus 5 hours. Daylight Saving Time first Sunday of May to last Sunday of October, GMT minus 4 hours.
POLICE/AMBULANCE/FIRE: Terminal attends Police/Ambulance and Fire services.

State Police – 727-2727, Police – 911 (Emergencies only). Fire – 0 (to report fire, otherwise 727-2750. Ambulance – 911 or 298-4016.
TELEPHONES: A coin telephone is located in the platform office.
SHORE LEAVE: Shore leave permissible.
LAUNCH SERVICE: The terminal does not provide launch service for crew shore leave. There is a local contractor who has launch service available and arrangements must be made by the vessel's local Agent.
AUTHORITY: Northville Industries Corp.

ROCHESTER, New York: 43.17 N. 77.36 W.

(See Plan Book)

Refer to "St. Lawrence Seaway" for important general information.
PILOTAGE: Not necessary.
ANCHORAGE: No anchorage available within harbour limits.
MAX. SIZE: Channel depth 23 ft. (LW). All depths in channel or alongside wharves should be checked carefully against the latest recorded elevated or lake level. This may vary from month to month. Entrance width 300 ft., turning basin depth 23 ft., 600 ft. in width.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New York Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Available. Arrange via ship's Agent.
BERTHING: Entrance piers are parallel to each other, and about 450 ft. apart. The West Pier is 3,036 ft. long and the East Pier 2,699 ft. long. Fog horn and beacon on West Pier, East pierhead lighted. Radio beacon. Port Authority Terminal located on West bank of Genesee River at end of Lake Pier. Has a quay wall of about 1,400 ft. in length. Depth of water alongside 23 ft. (LWD). Charlotte Docks located about 2 miles upstream from mouth of river on West bank.
CRANES: No floating cranes available. Stationary cranes available on order.
BRIDGES: New York Central Railroad swing bridge near mouth of the river and upstream from Port Authority Terminal. Traffic lift bridge about 0.25 mile upstream from railroad bridge.
STEVEDORES: Available by request. Charges to suit individual commodities.
DENSITY: Fresh water.
FRESH WATER: Available at both docks.
FUEL: Oil may be furnished direct from trucks at Port Authority Terminal.
IDENTIFICATION CARDS: Required.
CONSULS: None.
REPAIRS: Minor only.
REPATRIATION: Can be arranged.
AIRPORT: Approximately 10 miles from port.
POLICE/AMBULANCE/FIRE: Police, 232-3311; Ambulance/Fire, 232-2121.
SHORE LEAVE: Allowed.
AUTHORITY: Rochester-Monroe County Port Authority.

SACRAMENTO, California: 38.32 N. 121.30 W.

(See Plan Book)

DOCUMENTS: See "San Francisco."
PILOTAGE: Pilots board vessel in San Francisco Bay.
RESTRICTIONS: *Ship Channel:* Distance Fort Point to Sacramento, 79 nautical miles (146 km.). Bottom width in river reach 300 ft. (91.4 m.). Bottom width in channel reach 200 ft. (61.0 m.). Min. depth at MLLW 30 ft. (9.1 m.).

Harbour: Area 60 acres (24.3 hectare). Min. depth at MLLW 30 ft. (9.1 m.). Tidal variation 5 ft. (1.5 m.) average.
MAX. SIZE: 750 ft. LOA and 103 ft. beam, 30 ft. deep at MLLW.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to San Francisco Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: KBA 386, 156.9 mcs. (24 hours).
TUGS: Join vessel at Light 76 (turning basin).
BERTHING: Anchor – ships will have at least 1 anchor ready to let go in case of emergency, when docking or undocking. Anchor will be raised immediately upon ship being made fast to wharf.

Insurance lines are required on off-shore side, fore and aft, immediately after ship is made fast to wharf.

A cargo net shall be securely placed under gangways. Save-all nets shall be rigged abreast of holds at which general cargo is being handled.

Rat guards, at least 3 ft. in diameter, shall be placed on all mooring lines immediately after docking, and shall be maintained in place until ship's departure.

Pier 1:
Owned and operated by: Port of Sacramento.
Use: Bulk-loading rice facility.
Construction: Concrete with timber fender piles, length 600 ft. (182.9 m.).
Water depth: 32 ft. (9.8 m).
Storage capacity: 22,000 tons; 8 silos at 2,200 tons each; 6 silos at 470 tons each; 6 silos at 270 tons each.
Mechanical handling facilities: 3 loading spouts dockside, conveyor system to storage facility.
Loading rate: 600 t.p.h.
Wharf 2:
Owned and operated by: Port of Sacramento.
Use: General cargo.
Construction: Concrete with timber fender piles; apron width 60 ft. (18.3 m.); length 600 ft. (182.9).
Water depth: 30 ft. (9.1 m.).
Transit sheds: One, 86,400 sq. ft., one, Air Support Building, 40,000 sq. ft.
Pier 5:
Owned by: Port of Sacramento.
Operated by: Cargill of California, Inc., as a public utility.
Use: Bulk-grain facility.
Construction: Concrete and steel silos; concrete with timber fender piles; length 600 ft. (182.9 m.).
Water depth: 32 ft. (9.8 m.).
Storage capacity; 1,250,000 bushels (30,000 tons); 17 concrete silos; total capacity 500,000 bushels; 6 steel silos; total capacity 750,000 bushels.
Mechanical handling facilities: Conveyor system to storage facility.
Wharf 6:
Owned and operated by: Port of Sacramento.
Use: General cargo and containers.
Construction: Concrete with timber fender piles; length 600 ft. (182.9 m.)., apron 60 ft. (18.3 m.).
Water depth: 30 ft. (9.1 m.).
Mechanical handling facilities: 2 gantry cranes, 45 tons each.
Remarks: 6 acres of open wharf; 70,000 sq. ft. off dock warehouse.
Wharves 7-8:
Owned and operated by : Port of Sacramento.
Use: Bulk-material facility and general cargo.
Construction: Concrete with timber fender piles; apron 60 ft. (18.3 m.), length 600 ft. (182.9 m.).
Water depth: 30 ft. (9.1 m.).
Storage capacity: Covered 75,000 tons, open 850,000 tons.
Mechanical handling facilities: Conveyor-belt system from truck to storage, from ship to storage; from storage to ship, or from storage to truck; 2 gantry cranes.
Loading rate: 600 t.p.h.
Transit shed: 86,400 sq. ft. Bagging facilities for bulk cargoes.
STEVEDORES: Same as San Francisco.
MEDICAL: All normal medical facilities available.
DENSITY: Full fresh.
FRESH WATER: Available at all berths.
FUEL: All grades available with 24 hours notice. Delivered by barge.
GANGWAY/DECK WATCHMEN: Each ship shall have a security detail in readiness on board at all times it is in port. The security detail shall perform tasks of an emergency nature and shall have information concerning cargoes aboard in case of need for fire fighting purposes.
OPENING/CLOSING HATCHES: Opening/closing hatches is stevedore work while docked in port.
IDENTIFICATION CARDS: A pass signed by the Master or his designated officer will be required for crew members, passengers and their personal property to leave the port's fenced area. Property may be subject to physical inspection before leaving the fenced area.
CONSULS: Nearest at San Francisco.
REPAIRS: Limited repair facilities available.
REPATRIATION: Can be arranged through local Agent.
AIRPORT: 16 miles from port and served by regular airlines.
TIME: GMT minus 8 hours.
HOLIDAYS: Only days not worked are 4th and 5th July, Christmas Eve and Day, New Year's Eve and Day.
POLICE/AMBULANCE/FIRE: Tel. 371-8000. Extensions 252 and 228.
TELEPHONES: Telephones are available.
SHORE LEAVE: Crew members allowed ashore subject to Immigration clearance.
REGULATIONS: Ships will not blow boiler tubes while in port. Bilge water or oil will not be discharged into harbour. Accidents will be reported immediately to the Terminal Superintendent. Splash boards will be placed over disposal vent-pipe openings on inboard side of vessel.

Garbage – United States and California State laws make it unlawful to dispose of ship's garbage except in approved ways. Port makes approved garbage disposal available – contact the Terminal Superintendent. Garbage retained on board must be kept in tightly closed containers.

Smoking – Smoking prohibited in and around cargo compartments, and on open decks except that it may be permitted in marked areas under sheltered portion of weather decks on offshore side. Smoking prohibited on wharfs and piers except in marked areas. Smoking prohibited on or near ship while it is bunkering.

Welding/Burning – Welding or burning will not be done until written approval is obtained from the Terminal Superintendent and the Fire Marshal. All requirements of both the Superintendent and Marshal will be strictly adhered to.

Fire Signal – Upon detection of a fire, regardless of location or size, the alarm of fire will be sounded. The alarm shall be sounded by telephone and/or whistle or siren blasts. 5 each, 5 second blasts repeated as necessary.
AUTHORITY: Sacramento-Yolo Port District.
AGENT: See "San Francisco".

SAN DIEGO, California: 32.41 N. 117.07 W.

(See Plan Book)

PORT LIMITS: The seaward boundaries of the port of San Diego at which a vessel is considered to be an "arrived vessel" is that time when the vessel is boarded by a Port Pilot at Sea buoy No. 1 and (subject to charter party terms) lay time commences when notification of readiness is tendered at berth.

DOCUMENTS:

Crew Lists.
Passenger Lists.
Customs Documents.
Manifests.
Stores Lists.
Crew Curio Declaration List.

If the vessel arrives from foreign direct, 3 copies each of the above documents are required.

If the vessel movements are between U.S. ports, 2 copies each of the above documents are required.

Health Documents. Arrival from foreign direct, 1 copy only. All crew members should be in possession of valid vaccination certificates.

Manifests. Arrival from foreign direct, 1 copy of travellers manifest which remains with vessel, and 3 copies each of U.S. Customs inward foreign manifest. Bills of lading, ship's papers carried aboard vessel varies with steamship companies.

PILOTAGE: The San Diego Pilots do not maintain Pilots on station. Service is rendered according to ETA received from vessel. If any vessel's arrival or departure is delayed over 1 hour, an additional charge will be made. Telegraphic address of pilot station – radio ETA to "Pilots", San Diego. Advance notice of ETA required – 24 hours prior to arrival of vessel. Pilot boat is 54 ft. in length, painted white. The exact area where Pilot boards the vessel is No. 1 sea buoy.

ANCHORAGE: 3 miles S.E. of Point Loma Light.

MAX. SIZE: Length, breadth – no restrictions. Max. draft alongside face of terminal, 36 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to San Diego Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: All radio messages go through the Los Angeles station for relay.

VHF: The Port of San Diego Harbour Police maintains a listening watch on Channels 12 and 16. Channel 11 is available after initial call-up on Channel 16.

TUGS: Tugs normally join vessel approximately 1 mile before berth. 5 available with h.p. ranging from 200 – 1,700. There is no charge for the use of tug's lines.

CONTAINER FACILITY: A new generation, high-speed, all-electric container crane capable of handling 20 ft. and 40 ft. units, or single hook lifts of 40 long tons at National City Marine Terminal. This 17.4 acre facility includes 32,500 sq. ft. for a container freight station, a container steam-cleaning facility, office, maintenance shop, truck scales, railroad spur, and paved storage for 2,280 containers including electrical outlets for 45 refrigerated containers. Depth 35 ft.

SPECIALISED CARGO HANDLING FACILITIES: High-speed bulk-loading facilities exist with 800 ft. of 37 ft. deep water berthing space and bulk storage, plus a bulk loader boom that travels 500 ft. laterally and can be extended or raised enough to load nearly any size or type of ship.

High-speed bagging of bulk commodities is available for bagging of bulk materials from powder to pellets at the rate of 1,000 tons per 8-hour shift.

STEVEDORES: Advance notice of 24 hours desired in order to arrange gangs.

MEDICAL: Agents should receive notification of medical attention required 24 hours prior to ETA of vessel. Complete hospital facilities available.

TANKERS: Diameter of load/discharge line 6 in. to 8 in. Slop (residue) discharge facilities available upon request. 2 tanker berths – max. draft 30 ft. There are also 2 new Tanker Berths at National City Marine Terminal with 12 in. discharge lines.

DENSITY: Salt water in bay.

FRESH WATER: Fresh water available, delivery via pipeline.

FUEL: Diesel and bunker fuel available.

GANGWAY/DECK WATCHMEN: Available if considered necessary.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CERTIFICATES: Registered Load-line Certificate, Certificate of Inspection, Safety Certificate.

CUSTOMS ALLOWANCE: Tobacco: Per each crew member U.S. Customs allowed 2 cartons of cigarettes and 1 box of cigars. Wine and/or Spirits: Quantity allowed per each crew member – 1 quart.

CARGO GEAR: Up-to-date certification of all cargo gear required in order to comply with Pacific Coast Marine Safety Code.

IDENTIFICATION CARDS: U.S. Immigration requires completion of Form I.95, U.S. Coast Guard requires landing permits.

CONSULS:

Chile
Costa Rica
Denmark
Dominican Rep.
Ecuador
El Salvador
Finland
France
Honduras
Italy
Mexico
Netherlands
Norway
Panama
Peru
Sweden
West Germany

REPAIRS: All types of deck and engine repairs are available.

DRY DOCKS: Largest dry dock 700 ft. length, 104 ft. width. Capability can accommodate C – 2 mariner type or San Diego type hulls (600 ft. length, 85 ft. width) and up to and including 28,000 displacement tons. 4 additional floating dry docks with capabilities up to and including 3,500 displacement tons.

AIRPORT: Distance from marine terminal approximately 5 miles. Airport is serviced by major airlines.

TIME: Local time GMT minus 8 hours. Daylight Saving Time becomes effective the last Sunday in April and continues to the last Sunday in October.

HOLIDAYS: Recognised holidays are: New Year's Day; Lincoln's Birthday; Washington's Birthday; Memorial Day, Independence Day, Labour Day, Columbus Day, Veteran's Day, Thanksgiving Day, Statewide Election Day, Christmas Day, or any other legal holiday that may be proclaimed by State or National Authority; when a holiday falls on a Sunday, the following Monday shall be observed as a holiday.

POLICE/AMBULANCE/FIRE: Police 236 – 5911; Emergency Ambulance (Paramedic) 238 – 1212; Fire 238 – 1212.

TELEPHONES: Arrangements exist for placing telephones on board. No charge for hooking up.

SERVICES: Tank-cleaning equipment. Facilities for tank washings Compass and radar adjustments, etc.

SHORE LEAVE: Permitted.

DEVELOPMENTS: Broadway Pier has been reconstructed for use as a passenger vessel facility, public park, for berthing of public visit Naval vessels, and for berthing and clearance of fishing vessels. U.S. Customs has an office at the end of the pier.

AUTHORITY: Port of San Diego.

AGENT: See "Los Angeles".

SAN FRANCISCO, California: 37.48 N. 122.25 W.

(See Plan Book)

DOCUMENTS:

General Declaration (arrival) on Customs Form 1301.

Cargo Manifest (Customs Form 7257 A or 7527 B). One original copy indicating all the cargo on board, used for making formal entry. One copy listing all cargo on board, to be used by the Customs Inspector. One copy indicating cargo for this port only.

2 copies of Crew's Effects Declaration on Customs Form 1304.
2 copies of Ship's Stores Declaration on Customs Form 1303.
2 copies Passenger List (Form I 418).
2 copies Crew List (Form I 418).
1 Copy "Oil Pollution Certificate", issued in Washington D.C.

Customs Boarding Officer will also examine ship's register and Load-line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours of arrival from abroad, or 24 hours of arrival from a U.S. port:

(a) Health Pratique.
(b) Master's Oath (Customs Form 1300).
(c) U.S. Certificates of Payment of Tonnage Tax (Customs Form 1002).
(d) Certified Crew List (U.S. vessels only).

PILOTAGE: Pilotage in and around Golden Gate Region is provided by 3 groups of experienced, licensed ship Pilots. California Inland Pilot Association, Redstack Tugs and Independent Pilots.

The San Francisco Bar Pilots' Association, maintains a sea station 12 miles outside the Golden Gate, in the vicinity of the large navigation buoy for vessels arriving and leaving the area.

On station around-the-clock. Pilot boats are equipped with VHF radio-telephone, and maintain continuous watch for ship traffic and operate co-operatively with the Marine Exchange communication centre and lookout station. The Bar Pilots also carry portable VHF radios.

Some 8,500 ships are piloted annually into and out of the port complex, through the Golden Gate and the 2,000-ft. wide, 55-ft. deep main ship channel across the sand bar about 9 miles outside the Gate.

Considerable Summer fog is experienced on the pilot grounds. In Winter months radiation or tule fogs frequently occur. The tidal prism of hundreds of square miles of inland waters cause unusually swift and changing currents in the area. Pilotage for San Francisco Bar and entrance is compulsory and available 24 hours a day. The pilot boat is at a station 3 miles outside Main ship Bar channel about 14 miles from San Francisco, VHF Channels 18A and 10 for radio contact. Vessels with a draft of 42 ft. or more are requested to arrive at the pilot station for the inward passage about one hour before high water at the Golden Gate Bridge.

ANCHORAGE: Several anchorages available in San Francisco Bay for any type of vessel up to 50 ft. draft.

The well-protected bay affords excellent shelter and anchorage in all weather. The Captain of the Port (Coast Guard) will assign an anchorage to a vessel upon request. In San Francisco and San Pablo Bays, there are a large number of anchorages available for naval, quarantine, general and explosives.

The specific anchorages available include:

1. *General Anchorage*

(a) No. 5 – found just South of the Richmond-San Rafael Bridge, has no limitations.

(b) No. 9 – found in the South Bay, also has no limitations.

2. *Temporary Anchorage*

(a) No. 7 – found off Treasure Island, has a 12 hour limit. A ship cannot lighter nor bunker at this mooring.

No. 8 – same as No. 7 but has a 6 hour limit.

3. *Explosive Anchorage*

No. 12 – is normally not activated.

No. 13 – found off Larkspur, this mooring is activated only as the need arises.

No. 14 – found in the South Bay, this mooring is always activated.

4. *Naval Anchorage*

No. 10 and No. 21 are the most frequently utilised.

RESTRICTIONS: The San Francisco Bay region is the first on the West Coast to have sea lanes established by the Coast Guard for greater safety in its ocean approaches. Use of the lanes is not mandatory, but is strongly recommended to reduce chance of ship collisions in congested approach and departure areas. The lanes are not intended to supersede or alter applicable rules of the road.

The lanes begin within 6 miles of the San Francisco Lightship, with each lane inbound and outbound separated by a buffer zone. The headings are: North lane outbound, 305°; North lane inbound 120°, main line outbound, 247°; main line inbound, 058.5°; Southern lane outbound, 169°; Southern lane inbound 343°.

The size of the bay and the narrowness of the Golden Gate cause tricky and sometimes difficult tidal and current conditions. The flood current sets into all parts of the bay and causes swirls as far East as Alcatraz and Angel Islands. At the San Francisco-Oakland Bay Bridge there are large current eddies near the foundation piers which may require care to maintain proper course.

The bar channel is dredged to 55 ft. MLLW by the U.S. Army Corps of Engineers. Entrance channels to the various ports are dredged to 35 ft., with the exceptions of Sacramento, Stockton and Redwood City, which are 30 ft. Stockton, however, is approved for a 5-ft. deepening, and study of similar deepening for Redwood City is being completed.

MAX. SIZE: The max. permissible draft for tankers at the oil installation is 35 ft., for regular freighters and passenger ships at the San Francisco piers is 30 ft. No restrictions on length or berth. The best time to dock with max. draft is at a rising tide.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to San Francisco Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Radio station via RCA – Radio Corporation of America – Station KPH ITT – World Communications – Station KFS.

Safe and efficient navigation for all bay vessel traffic is maintained through a Ship Location and Reporting Service operated by the Marine Exchange. U.S. Coast Guard Vessel Traffic Service on Yerba Buena Island and at Port Bonita maintains 24 hour radar surveillance of all traffic from Golden Gate on the West (with 32 mile capacity beyond) to Oakland on the East, Dumbarton Bridge on the South and Port San Pablo on the North. Vessel Movement Reporting System (VMRS) extends beyond Port San Pablo all the way to the Ports of Stockton and Sacramento. Coast Guard urgently requests that all vessels as specified below, moving anywhere within the VMRS (including all area under radar surveillance), tune to Channel 13 (156.65 mHz., VHF FM): All ships of 300 gross tons and over, passenger ferries for hire over 100 gross tons, and tugs with tows of barges or dredging rigs of over 26 ft. length.

TUGS: Tugs available and normally join the vessel when approaching their pier. Tug's lines are always used, with no extra charge.

BERTHING: No restriction on berthing other than draft limitation and preferable at slack water.

Alameda: (See Plan Book). (Not part of the Port of San Francisco). Alameda, an island and city across the Inner Harbour channel from Oakland, is the home of Encinal Terminals, the largest privately owned and operated steamship terminal in the United States. There are 6 berths for vessels at Encinal.

Berths 1, 2, 3 and 4: Used for general cargo and bulk or drummed liquids. Total berthing length 2,125 ft. Depth 31 ft.

Berth 5: Used for general and containerised cargoes. Length 750 ft. Depth 35 ft. Berth equipped with Paceco container crane.

Berth 6: Used for receipt and shipment of bulk or drummed liquids. Depth 30 ft. Facility has tank storage of 12 million gallons.

Agent: See "San Francisco".

BULK HANDLING FACILITIES: *Copra Terminal, Pier 84:* Pier assigned to Cargill Company for receiving bulk copra. Berthing for 1 vessel. Length of face 185 ft. and 430 ft. North side 120 ft. Depth alongside face 32 ft. Facilities include 4 portable pneumatic unloaders, total capacity 180 t.p.h.

Port of San Francisco Grain Terminal, Pier 90: Berthing for 2 vessels. Length 1,285 ft. Depth alongside 40 ft. The terminal is used for receiving, storing and loading of grain, feeds, chemicals, fertilisers and storing automobiles. Facilities consist of a 2 million bushel grain elevator. Rail holding yard for 100 cars. 6 marine loading spouts with capacity of up to 1,500 tons of bulk material per hour (no shifting required).

CONTAINER HANDLING FACILITIES: *Mission Rock Terminal, Pier 50:* Berthing for 4 vessels. Pier used for container traffic, general cargo and passengers. Length of face 1,000 ft. North side 1,480 ft. and South side 1,100 ft. and 582 ft. Depth alongside terminal 35 ft. Facilities include a 250-ton container crane rated at 25 containers per hour. Container wharf length 1,000 ft. and width 200 ft. Storage for 900 (20 ft.) containers on pier.

Pier 80: Berthing for 7 vessels. Length of face 1,296 ft. North side 1,138 ft. South side 2,657 ft. Depth alongside 40 ft. Pier equipped with two rail-mounted container cranes (each having a 30-ton capacity); 270 refrigeration outlets; container freight station and flexibilities to handle Ro-Ro, container and breakbulk cargoes.

Pier 94: New one-berth (716 ft. apron) container facility with 40 ft. alongside depth, 2×30-long-ton container cranes, and 16.5 acre container yard, with at least 50 acres available for expansion. Apron and crane rails are extensions of Pier 96 immediately to the South.

Pier 96: Berthing for 2 vessels. Depth alongside 40 ft. The facility is used by container ships and LASH vessels. It also has flexibilities to handle Ro-Ro and general cargo ships. Lifting equipment consists of 2, rail-mounted, Paceco container cranes, forklifts, straddle carriers and mobile cranes. Other features include 230 refrigeration outlets; a LASH lighter freight station; lighter basin; elevated control tower with radio and P.A. communications system; computerised container inventory control and a container freight station.

STEVEDORES: Stevedores orders must be placed 1000 hrs. for night gangs and day gangs. 2×8-hour shifts 7 days a week. Sunday and Sunday night gangs must also be ordered on Saturday 1000 hrs.

MEDICAL: Medical, and all hospital facilities available. No advance notice required.

TANKERS: All major oil companies have their own oil discharging piers which are outside the jurisdiction of the Port Authority. Reducing pieces are available. The max. drafts are 35 ft. Tankers arriving with a greater draft are partly discharged in the bay before docking.

Davis Point: Union Oil Co. Oleum Refinery Wharf, depth up to 38 ft. MLW.

Martinez: Shell Oil Co. Wharf, depth alongside 30 to 42 ft. MLW. Phillips Petroleum Co. Amorco Wharf, 2 berths, depth 30-42 ft. MLW. Phillips Petroleum Co. Avon Wharf, depth alongside 35 ft. MLW. Urich Oil Co. depth alongside 35 ft.

Ozol: Oil Wharf, depth alongside 39 ft. MLW.

Hercules; Sequoia Ref. Corp. Terminals, depth 35 ft. MLW.

DENSITY: Average density in the bay is 1016.

FRESH WATER: Available at all piers rate between 25 and 50 t.p.h.

FUEL: Fuel available by barge or at the oil companies own pier. Special blends require some advance notice.

FIRE PRECAUTIONS: Any special instructions are given to the Master upon docking.

GANGWAY/DECK WATCHMEN: Not required but this service available at Master's request.

OPENING/CLOSING HATCHES: Normally done by stevedores. But crew may open and close before arrival at the dock or after departure.

CUSTOMS ALLOWANCE: Each crew member may land free of duty and/or taxes articles acquired abroad not exceeding $10 in value, plus 50 cigars or 300 cigarettes or 3 lb. of smoking tobacco, and not over 1 quart of alcoholic beverages.
IDENTIFICATION CARDS: Standard U.S. Immigration Forms I.-95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I.-95, issued for the same vessel.
CONSULS: All Maritime countries represented at San Francisco.
REPAIRS: The major yards in the Golden Gate region have fully equipped machine-shop facilities capable of handling virtually any job; welding, heavy plate construction, turning, boring, facing, grinding, milling and rolling.

The larger yards also have facilities for pipe, sheet metal, electrical, carpentry, painting, rigging, machining and boiler work.

Pacific Ship Repair and Triple "A" Repair are both located in San Francisco and provide berth space for all types of ship repairs at plant and at any location in the San Francisco Bay area.
DRY DOCKS: Bethlehem Steel's San Francisco shipyard has 3 floating dry docks, 1 with 22,000 tons capacity and 654 ft. long, 1 of 11,400 tons capacity and 542 ft. long, and 1 of 6,500 tons capacity and 450 ft. long. With a recently completed pier, its tie-up and outfitting space totals 4,271 ft.

Todd Shipyards Corp. has 2 dry docks at Alameda. Their larger dry dock is 873 ft. long with a clear width between wing-walls of 140 ft. and a lifting capacity of 40,000 tons. The smaller dry dock has a lifting capacity of 10,000 tons and is 542 ft. long with a clear width between wing-walls of 86 ft. There are 3,500 ft. of berthing space for ships undergoing in-the-water repairs. Todd has 3 mobile units for out-of-yard work.

Williamette Iron and Steel Company's yard in Richmond has 5 concrete graving docks. 4 of these docks can each accommodate a vessel 600 ft. long with 83 ft. beam, and 1 dock can handle a vessel 750 ft. long by 83 ft.

Tonnage capacity is limited only by the above dimensions. Williamette's facilities include 1,500 ft. of concrete outfitting pier for in-the-water repairs. The graving docks are served by 4 gantry cranes of 60-ton capacity and 2 of 45-ton capacity, and the outfitting pier by 3×45-ton cranes. Williamette has fully equipped shops for repair and conversion work, and mobile units for out-of-yard work at all Bay Area piers.
Hunters Point Naval Shipyard: (Triple A Machine Shop) Under lease from the US Navy, graving docks and repair facilities available to all types of ships. Triple A operates 3 graving docks: (No. 4) 200 ft. beam×1,100 ft. length and 50 ft. depth; (No. 3) 150 ft.×1,000 ft. and 39 ft. depth; (No. 2) 100 ft.×800 ft. and 27 ft. depth, 17 repair berths can serve ships of any length. 12 gantry cranes of 50 ton capacity serve graving docks and repair berths. 50 ft. depth channel from Golden Gate to Hunters Point; unique to West side of San Francisco Bay.
REPATRIATION: All facilities available for crew changes by sea, air or land.
AIRPORT: Distance about 10 miles South of San Francisco and is served by most domestic and international passenger airlines plus 20 international air cargo carriers..
TIME: GMT minus 8 hours, Summertime from last Saturday in April till last Saturday in October GMT minus 7 hours.
HOLIDAYS: New Year's Day; Lincoln's Birthday (February 12th); Washington's Birthday (February 22nd); Good Friday (afternoon); Memorial Day (May 30th); Independence Day (July 4th); Labour Day (1st Monday in September); Admission Day (Calif. only Sept. 9th); Columbus Day (October 12th); Veteran's Day (November 11th); Election Day (1st Tuesday after the first Monday in November); Thanksgiving Day (last Thursday in November); Christmas Day.

When any of the holidays fall on Sunday, the holiday will be observed on Monday.

On a holiday the longshoremen are working at the overtime rate (time and a half) except on the following days when no work will be performed:

1. New Year's Day;
2. Bloody Thursday (July 5th, memory of 3 longshoremen killed during the 1936 strike);
3. Labour Day;
4. Thanksgiving Day;
5. Christmas Day.

POLICE/FIRE/AMBULANCE: Police, tel. 533-0123; Fire, tel. 861-8020; Ambulance, tel. 431-2800.
TELEPHONES: On some piers telephone connections to ships are available, no extra cost for this service.
GENERAL: Vessels arrival has to be reported to the U.S. Coast Guard 24 hours prior arrival by Agent.
SHORE LEAVE: Crew members are allowed to go ashore after passing U.S. Immigration at first U.S. Port.
DEVELOPMENTS: The channel over the bar has been deepened to 55 ft. A new channel will be cut 600 ft. wide and 45 ft. deep (at low water), through the upper bay and the channel through San Pablo and Suisun Bays will be deepened to 45 ft. Manoeuvring areas near Richmond and the refinery terminals will be widened. The Stockton Deep Water Channel will be deepened to 35 ft. and the channel alignment improved.
AUTHORITY: San Francisco Port Commission.

AGENT: Cascade Shipping Co., 550 Miner Road, Orinda, California 94563. Phone: 415 – 254 – 1030 Telex: TWX 910 – 482 – 8477. Cables: "Caship".

SAVANNAH, Georgia: 32.02 N. 81.07 W.

(See Plan Book)

DOCUMENTS:
3 Crew Lists.
3 Store Lists.
3 Curio Lists.
3 Manifests.
3 Passenger Lists.
These documents required in order to enter vessel at U.S. Customs.

Direct Foreign Arrival – Quarantine Pratique issued by Public Health Service representative; Cargo on Inward Foreign Manifest Form 7527 A or B or substantially similar form, in duplicate with abstract manifest of Savannah only cargo; Crew list on Form I – 418, in triplicate; Passenger List on Form I – 418, or other acceptable form, in triplicate; Crew curio list, in triplicate, with crew declaration on Form 5123, or crew list on Form I–418, in triplicate, with numbers of attached Forms 5129 endorsed thereon; List of sea stores and ship's stores, in triplicate; for American vessels, repair declaration on Form 3415; for American vessels, certified crew list; Clearance from last foreign port, if one issued.

Coastwise arrival with Residue Foreign Cargo or Passengers – Form 1385, "Permit to Proceed", in duplicate; Travelling Manifest; Abstract Manifest, in duplicate, of cargo to be discharged in Savannah – if none, 2 "pro forma" manifests; Stores list, in duplicate; Crew list, in duplicate; Crew purchase list, in duplicate, and any crew declarations on Customs form 5123 for Savannah; Passenger list, in duplicate, if passengers are disembarking in Savannah.
PILOTAGE: Savannah Pilots' Association, 204 East Bay Street, Savannah, Georgia, 31401 (telegraphic); Pilot required all vessels; ETA 24 hours advance notice, change ETA 8 hours; VHF Channel 16 (monitored at all times), 18, 12, 13 – Radio telephone 2182 and 2738. Pilot boards vessel 1 mile outside fairway buoy.
SHIP CHANNEL: *Project depth and widths are as follows:* Sea buoy to jetties 40 ft. depth×600 ft. width; New Channel Range through Upper Flats Range 38 ft. depth×500 ft. width; The Bight Channel 38 ft. depth×600 ft. width; Fort Jackson Range to Wreck Channel 38 ft. depth×500 ft. width; City Front Channel to Kings Island Channel 38 ft. depth×400 ft. width; Whitehall Channel 36 ft. depth×400 ft. width.
ANCHORAGES: Outside fairway buoy North and N.E. of fairway buoy; no anchorages in river.
RESTRICTIONS: 29 ft. at any time; over 29 ft. on incoming tide, no restrictions day or night.
MAX. SIZE: Abbreviation OT: Ocean Terminal. Vessels berthing at OT 14 – 15 – 16 – 17. Vessels 550 to 600 ft. on slack water; vessels less than 550 ft. any time to berths 14 and 17; vessels docking or undocking at OT 15 – 16, with vessels in OT berths 14 and 17, can be docked or undocked during slack water. Vessels entering Stevens Terminals should not exceed 525 ft.; max. of 550 ft. could be handled under ideal conditions, i.e. slack water and all berths clear in slip. Vessels over 500 ft. undocking from berths 35 – 37 – 41 – 42, Stevens Terminals, should not be undocked during strength of ebb or flood tide, but may be undocked at or near high or low water slack. Vessels berthing at river front berths: vessels up to 650 ft. will be handled any time and vessels from 650 to 900 ft. on tide conditions; vessels will be handled at whatever drafts Bar Pilots will bring them in or out. Also see "Developments".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Vessels route ETA cables to Agents, etc., via Radio Lantana.
TUGS: Tugs join vessels at city front for berths above city; for berths below city, tugs usually meet vessels in vicinity of Fort Jackson or well below berth. Tugs' lines used all times.
BERTHING: The Georgia Ports Authority operates 19 general cargo berths, 2 tanker berths, 3 container berths, 2 dry bulk cargo berths, and a LASH facility.
CRANES: Ocean Terminal – One 175 short ton gantry crane, one 100 short ton gantry crane, two 50 short ton gantry cranes. Garden City Terminal – Two 35 short ton gantry cranes, two 30 short ton gantry cranes, two 45 short ton mobile cranes, Garden City Terminal (container port) – four 45 short ton container cranes, six 45 short ton rubber tyred bridge cranes. Other cranes, floating and mobile, are available from various private contractors.
BULK CARGO FACILITIES: Located at the Georgia Ports Authority's Garden City Terminal are 2 dry bulk cargo berths (1 loading and 1 discharge berth). This facility is suited for the handling of various ores, grains, peanuts, meals and fertiliser materials. The storage at this facility consists of silos for the storage of grain and grain type products as well as flat floor storage for these various other materials.
SPECIALISED CARGO HANDLING FACILITIES: Located at Container Central, on the up-river end of berth 60, is an adjustable ro-ro ramp which is situated as to allow a vessel to utilize the ro-ro ramp and container cranes at the same time. This ramp has a design capacity of 600 tons on the centre or 300 tons anywhere on the ramp or deck with the weight of the load properly distributed. At the Garden City Terminal there is a modern cold storage facility. The refrigerated space consists of 3 rooms of approximately 28,000 sq. ft.
BRIDGES: *Eugene Talmadge Memorial Bridge:* 135 ft. vertical clearance for 400 ft. at MHW.
MEDICAL: Agent should be advised as far in advance as practicable for required medical attention. U.S. Public Health Clinic in Savannah, also other extensive medical facilities. Standard information required as to inoculations, vaccinations, etc.
TANKERS: Standard requirements on diameters of load/discharge lines. No facilities for slop (residue) discharge facilities except American Oil Company. A.P.I. of local types of oil is 36 gravity marine diesel fuel. 8 tanker berths in port, max. drafts range from 32 ft. – 38 ft.

DENSITY: Average density of water at 20° Centigrade in channels of Savannah Harbour are:

	High Water	Low Water
Savannah River Entrance		
Surface	1.0196	1.0090
Bottom	1.0196	1.0181
Port Area		
Surface	1.0022	0.99915
Bottom	1.0120	1.0075

FRESH WATER: Available at all terminals. Charge $1.70 per ton of 2,000 lbs. with a minimum charge of $27.10 for each service.

FUEL: Marine Gas oil (No. 2 Fuel). Marine diesel oil (No. 4 Fuel Oil). All Intermediate grades from Intermediate 30 (=30 centistokes at 50°C) to Intermediate 420 (=420 centistokes at 50°C) Bunker fuel oil (No. 6 Fuel). Advance notice of 24 hours required.

FIRE PRECAUTIONS: No special fire precautions. All tanker berths have water and fire extinguishers on dock. Fire fighting equipment on dock. Fire fighting equipment on tugs.

GANGWAY/DECK WATCHMEN: Garden City and Ocean Terminals of Georgia Ports Authority require that a watchman, or someone in authority, will be aboard any vessel tied to their facilities at all times. East Coast Line Terminal watchman furnished by Steamship Company if watchman required. The Georgia Kaolin International does not require a watchman.

CERTIFICATES: See "Documents". Current Registry Papers, Load Line Certificates, Certificates of Inspection, etc., are required.

CUSTOMS ALLOWANCE: Tobacco, a crew member may take ashore 50 cigars, 300 cigarettes, or 3 pounds of smoking tobacco, or a proportionate amount of each. An appropriate amount of tobacco products may be held out of bond for use of passengers and crew members while aboard ship when in port. Wine and/or Spirit, a crew member may take ashore one litre of alcoholic beverages for his own use. Container should be opened, that is the seal should be broken. An appropriate amount of wine and/or spirits may be held out of bond for consumption by passengers and crew while aboard ship when in port.

CARGO GEAR: Certified in accordance with U.S. Department of Labor Regulations. Supplied by stevedores.

IDENTIFICATION CARDS: Identification required by crew members coming ashore. U.S. Immigration & Naturalisation Service issues landing permit, I – 94, to any passenger; and I – 95, to any crew member of a foreign vessel who is not considered a security risk. This form must be in man's possession any time he is ashore.

CONSULS: The following countries are represented in Savannah:

Brazil
Denmark
Dominican Rep.
France
Germany
Italy
Norway
Sweden
Venezuela

REPAIRS: All types of deck and engine repairs possible at Savannah Machine and Shipyard Company. Deck repairs from Diamond Manufacturing Company.

Radar/VHF Repairs: Marine Industrial Electronics has qualified radar and RDF, also VHF men available. They can be contacted through ship's Agents or through the Pilots or Atlantic Towing if vessels should require service on arrival.

DRY DOCKS: Savannah Machine & Shipyard Drydock 540×772×21 ft.

REPATRIATION: Responsibility of Owner's Agents. Can be arranged to all points.

AIRPORT: Savannah Municipal Airport regularly served by Delta Airlines, Inc. with 8 scheduled flights daily; Eastern Airlines with 5 flights daily; and Pan Am World Airways, Inc. with 2 flights daily. Charter service also available. Distance to Garden City Terminal approximately 5 miles, to Ocean Terminal approximately 7 miles, and to Georgia Kaolin International and East Coast Terminal approximately 9 miles.

TIME: Savannah maintains Romeo or Eastern Standard Time GMT minus 5 hours, from 0200 hrs. the last Sunday in October, to 0200 hrs. the last Sunday in April. Quebec or Eastern Daylight Saving Time GMT minus 4 hours maintained from April to October.

HOLIDAYS: New Year's Day (January 1st); Martin Luther King's Birthday (January 15th); Lincoln's Birthday (February 12th); George Washington's Birthday (February 22nd); Memorial Day (May 30th); Independence Day (July 4th); Labor Day (First Monday in September); Columbus Day (October 12th); Armistice Day (November 11th); Thanksgiving Day (Fourth Thursday in November); Christmas Day (December 25th); Good Friday.

No work will be performed on New Year's Day, Independence Day, Labor Day, and Christmas Day.

POLICE/AMBULANCE/FIRE: Police, City: 232 – 4141 and 233 – 9321, County: Police: 352 – 7780; Ambulance: Fields and Sons Ambulance Service, 233 – 0191, Fire: City: 232 – 5121.

TELEPHONES: G.P.A., Garden City and G.P.A., Ocean Terminals: telephones on board can be provided through local Agents. Stevens Shipping & Terminals – not available to ship (phones on dock). S.C.L. Terminal – not available to ship (phones on dock).

SERVICES: Compass Adjusting, Coste Compass Adjusters, 121 East 63rd Street, Savannah, Georgia 31405, Tel. 355 – 9607.

Radar, RDF, VHF, Marine Industrial Electronics, Inc., Savannah Industrial Park, Savannah, Georgia, Tel. 232 – 3489.

SHORE LEAVE: Crew members are allowed ashore provided they are not detainees.

DELAYS: With reasonable advanced notice of ETA no delay anticipated in berthing, loading, discharging or bunkering.

DEVELOPMENTS: Fourth berth under construction; Containerport – 1,200 lineal ft., 40 acres paved storage; two 45 ton container cranes.

SHIPMASTER'S REPORT: August, 1980.

Pilotage: Because of difficulties with the port crane and large storing programme we elected to berth starboard side alongside this call.

The Pilot will only undertake this on the flood (since vessel is invariably deep, berthing will only be done on the flood in any case) but because of a delay we were off the berth very nearly at slack water. The Pilot carried out the manoeuvre in the most reassuringly competent manner and I would not hesistate to do the same again if necesary; only with a Pilot prepared to carry out the manoeuvre.

Vessel is swung downriver off the container berth, about 4 cables below the berth.

When landed on starboard side to, it is just possible to plumb the berth with the crane by making the connection to the after crossover.

Discharge: Straightforward; some slight initial delay. Capable of receiving cargo at over 1,000 t.p.h. Our rate 810 t.p.h. overall.

Connection 12 in. 150 ASA. No VRL.

Density 1000 this call.

Storage capacity about 50,000 cu.m. Storage plant only for filling road and rail tankers.

U.S.C.G.: Deck inspection before commencing. Vessel was congratulated on her 'very high standard of equipment and personnel'. Monitoring detail on board throughout. Scuppers unplugged, please.

They are aware of the draft problem at LW and boarded immediately on berthing.

General: Lloyds surveyor easily available.

Bunkered lube oils whilst discharging with U.S.C.G. approval.

Can touch up ship's side from quay.

Movements allowed at night, dependent on draft/tide.

Chandler: Southern Marine: Poor service this time despite our cables. This is in contrast to excellent service last time. These services are entirely at the mercy of ship representative.

SHIPMASTER'S REPORT: October, 1980.

Approach: From East: The coast between Sandy Point to Isle of Palms near Charleston shows up at 40 miles and South of Hunting Island near Port Royal Sound at 35 miles, on radar. Port Royal channel gives a good radar echo at 15 miles. Soundings give little indication of position until fairly close inshore. Savannah light was observed at 28 miles.

DF stations at Tybee and Charleston are useful if nothing else is available.

Anchorage: Pilots advise anchoring to N.E. of Savannah Light Beacon. Good holding ground without obstructing arriving and departing traffic.

Arrival Procedure: ETA through Agents.

For deep draft ships proceeding to Ammonia Berth No. 61 about 5 miles above town, Pilot will board between 3 hours to 1.5 hours before HW.

Under 29 ft. can berth/sail any state of tide day or night. Berthing day or night.

Can berth either side to, the generally accepted side is port side. However, if taking stores try for starboard side as the crane plumbs better, plus the Chiksan arm is in the way of trucks.

For starboard side to, arrive well in time for earliest Pilot boarding time.

The problem is the berth has a reported 36 ft. at LW (actually by lead line we found (Oct. '80) a minimum of 33 ft. 09 in. reduced to datum along the dock face). Therefore before LW you have to pump out about 2,000 tonnes, any delay can be important.

Pilots: Boards from large fast cutter between Savannah Light and whistle buoy.

Give plenty of notice as cutter might be lying up-river at pilot station. Based at Cockspur Island in the ship channel. Call "Savannah Pilots".

Pilot ladder must be 8 ft. above water. Side dependent on wind. Berthing Pilot joins from tug using own ladder at Kings Island.

On departure from berth, Pilot requires 1.5 hours notice.

VHF: "Alpha" Channels used frequently.

U.S.C.G. uses 22A, Pilots use 18A, tugs use 19A. Otherwise use 16, 12 and 13.

Channel: The maximum draft of vessels has been 39 ft. with a 6 ft. tide. Normal maximum 37 ft. This can only take place on the flood so as to be on the berth at slack water.

Channel is narrow, less than Houston Ship Canal. Constant dredging is required. From Whistle Buoy to berth is about 3 hours.

Vessel is swung in Argyll Turning basin off the container quay. 24 hour navigation is undertaken.

From soundings from Savannah Light beacon to Berth No. 61 proceeding inwards 3 hours before Savannah HW (2.5 m.) a minimum of 1.6 m. under keel was found with draft 11.15 m.

Berth: Depth: "See plan". Minimum depth reduced to datum found to be 33 ft. 9 in. along jetty face.

Berth No. 61: Owned by Georgia Ports Authority and leased to Occidental.

Concrete jetty on piles with centre section connected by roadway to shore, and mooring dolphins either end connected to jetty by catwalk. Length of centre section 266 m. Good fendering.

The upriver dolphin is not used due to damage. Can turn gangway out before arrival.

Pilot with the aid of powerful tugs swings vessel in very competent manner at Argyll Turning Basin.

Density: 1001 to 1002.

Moorings: Basic 3, 2, 2, each end. Forward headlines (3) go to Ro-Ro dock and breastlines to dolphin with springs to main jetty. Due to damage the upriver dolphin cannot be used so all stern and breast lines go to Grain Berth No. 62.

Springs out first, last in. Mooring boat used. Port Authority mooring gang require 4 hours notice.

Tugs: Atlantic Towing Company based along town water front. Several large and powerful tugs. Two used, one each end, American style, tie up with own lines alongside. One and a half hours notice required.

U.S.C.G.: Very co-operative. Although Agent will try to get them to board in river for pre-inspecton, they board at dock. Carry out check list and inspection before cargo allowed to be worked. Takes about 30 minutes.

One U.S.C.G. rating on board at all times (8 hour shifts). Strict on pollution.

The U.S.C.G. do not seem to mind which way round the ship is berthed. Scuppers to be plugged.

Discharge: Into mobile Chiksan (as berth only leased). After manifold if starboard side too. Maximum rate about 1,200 t.p.h. but generally nearer 900 t.p.h. to 1,000 t.p.h. Connection 12 in. 150 ASA. No vapour return line. Shore tank capacity 45,000 tonnes, which fills rail and road tankers. Takes about 45 minutes to connect/disconnect. Shore labour assist. Shore personnel always in attendance. Manager very helpful.

In light ship condition we had 18 m. air draft which did not create any difficulties.

General: Lloyds Surveyor easily obtainable from Jacksonville. Fresh water from jetty, require 6 hours notice, especially at weekends.

Lube oils whilst discharging with U.S.C.G. permission. Stores lorry able to get close alongside ship.

Ship's crane (if starboard side to) will just plumb after end of jetty.

Liferaft service (Beaufort) at Southern Ship Supply – 24 hour service.

Shoreline infested with rats, snakes and big spiders.

Chandler: Southern Ship Service, good fresh produce.

Town: About 5 miles away. Can telephone for taxi – free of charge local calls, from hut at grain berth about 100 yards from gangway.

Airport 6 miles South of town centre with regular flights to Atlanta, International, etc.

AUTHORITY: Georgia Ports Authority. Georgia Kaolin International and East Coast Terminal. Savannah Port Authority.

The Savannah Port Authority does not operate terminals; however, is engaged in port and industrial development for the City of Savannah and Chatham County, Georgia. Harbour regulations pier and bulkhead lines, etc., come under the jurisdiction of this organisation.

SEARSPORT, Maine: 44.28 N. 68.56 W.

(See Plan Book)

DOCUMENTS:
1 Crew List.
1 Passenger List.
2 Stores Lists.
2 Foreign purchases Lists.
2 Inward foreign Manifest uniform cargo (Form 1301 General Declaration and Form 1302 Cargo Declaration).
Original Bill of Lading.
1 Form 1301 Master's oath on entry of vessel.
2 Form 1374 outward foreign Manifest.

PILOTAGE: Ship's agent notifies Pilot approximately 48 hours in advance of arrival, correcting at 24 hours. Pilot's boat called on Channel 16 and 13 VHF. Pilot boards at Monhegan Island, W.B. 14 m. When weather bad, suggest vessel heaves-to at 43° 45.3′ N. 69° 22.5′ W.

Shipmaster's Report: There is a second pilot station for ships approaching from the East.

The pilot station is located on Matinicus Rock Island. Pilot boards at Wooden Ball Light Bell Buoy "2WB." Lat. 43° 49′ N. Long. 68° 50′ W.

The pilot boat is a fishing boat with a white hull showing the international signals.

Pilot signal: 3 long and 2 short on ship's whistle.

Radio contact: VHF Channel 16 (156.8 mc/s).

36 and 24 hours ETA requested, cable "Penbay – Belfast/Maine", via Chatham Radio.

ANCHORAGES: No restrictions on anchoring.

RESTRICTIONS: No restrictions at night. Deep draft vessels brought in only on high water. Draft in concurrence with docks, 32 ft. low water. 10 ft. rise in tide – approach to Searsport 35 ft. – Bay 60 ft. limit.

MAX. SIZE: Size of vessel restricted to 38 ft. draft in harbour area. No outside installations at the port yet.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Boston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Tugs in Searsport Harbour use Channels 16 and 13. Vessels arriving Searsport go through radio station at Chatham, Mass., RCA installation, SSB station or a VHF public correspondence station.

TUGS: Penobscot Bay Towing Co., Marshall Wharf, Belfast, Maine 04915. Tel. (207) 338-3000. 24-hour service. Requested that orders for tugboat service be given during normal business hours, 24 hours in advance.

Tugs: "Patrick McAllister", 1,200 h.p.
"Eileen McAllister", diesel 1,200 h.p.
"Roderick McAllister", diesel 1,200 h.p.
"Cape Fear", diesel 1,800 h.p.

Radio: Ship to ship, VHF Channels 16-13-10.

Sea Pilots dock ship with tug's assistance.

BERTHING: Draft conditions govern arrival and departures.

Bangor and Aroostock Pier: Length 800 ft., width 100 ft. Depth alongside (East side) 34 ft., (West side) 32 ft.

C.H. Sprague Dock: Length 614 ft., depth alongside East side 34 ft. There are 3 towers for discharge of bulk cargoes.

Turning basin off docks, depth 34.5 ft. and 1,200 ft. width.

STEVEDORES:

Weekdays:
Order gangs by 1700 hrs. for following day 0800 start.
Order gangs by 0900 for same day 1300 start.
Order gangs by 1300 for same day 1800 start.

Weekends:
Order gangs by Saturday 1200 for a Sunday 0800 start.
Order gangs by Saturday 1200 for a Monday 0800 start.

MEDICAL: No advance notice required by Agent. 1 hospital, Waldo County, which takes bed patients. All seamen require Certificate showing they have had smallpox vaccination during last 3 years.

TANKERS: 2 berths at Searsport – 1 for No. 6 oil and 1 for light oil and gas. 2×8-in. hoses. 34 ft. low water.

DENSITY: Average density 1024.

FRESH WATER: Available by tug for boilers only at rate of tug hire at anchorage. Drinking water available at piers.

FUEL: No. 6 oil at C. H. Sprague dock. Light oils delivered by tank truck at dock.

FIRE PRECAUTIONS: At certain oil piers information given to Shipmaster upon arrival at pier. Ample fire protection, salt-water lines, sprinkler system on pier, local fire department.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Ship's crew may open hatch after longshoremen boarded ship.

CERTIFICATES:
Load-line Certificate.
Certificate of Foreign Clearance.
Ship's Safety Certificate.
U.S. tonnage Tax Certificate of previous trip if have them.
Radio Operator Licence.

CUSTOMS ALLOWANCE: Tobacco, 200 cigarettes per man. Wine and/or Spirit allowance 1 bottle per person.

CARGO GEAR: No additional cargo gear necessary.

IDENTIFICATION CARDS: Form I-95 must be filled out on arriving unless seamen has had a prior one made out for a previous arrival on same ship (on plastic card).

CONSULS:
Norwegian: Allan Kjos-Hansen, 30 Mayer Road, Portland, Maine, Vice-Consul.
French: Dr. Paul O. Proudian, 776 Main Street, Westbrook, Maine.
Finnish; Frank W. Bjorklund, 163 Main Street, Norway, Maine.
Italian: Dr. Domenica A. Santoro, 43 Deering Street, Portland, Maine.
Panamanian: Mary Navarro de Carrillo, Lafayette Town House, Portland, Maine.
Swedish: Martin Johnson, Vice Consul, 443 Congress St., Portland, Maine.

REPAIRS: All types of machinery repairs.

DRY DOCKS: None.

REPATRIATION: Arrangements must be made with Agent in advance by telegram.

AIRPORT: Bangor International Airport, 30 miles, Northeast Airlines.

HOLIDAYS: New Year's Day; Washington's Birthday; Patriot's Day; Memorial Day; Independence Day; Labour Day; Thanksgiving Day; Christmas Day and Veteran's Day. Possible to get gangs to work all days except on Labor Day and Christmas.

POLICE/AMBULANCE/FIRE: Police 548-2256; Ambulance 548-2900; Fire 548-2900.

TELEPHONE: Arrangements can be made to have phone put on ship, but most docks have pay phones.

DEVELOPMENTS: 2 new 40,000 bbls. tanks for liquid fertiliser.

AUTHORITY: Maine Port Authority, Portland.

•

SEATTLE, Washington: 47.36 N. 122.20 W

(See Plan Book)

PORT LIMITS: Port of Seattle limits are co-extensive with the boundaries of King County in which Seattle is situated. A vessel has "arrived" when it has tied-up to a berth.

DOCUMENTS (on arrival from foreign):
Clearance from Last Foreign Port.
2 Crew Lists on Form. I.418.
2 Passenger Lists on Form I.418 (if applicable).
Passenger Declarations if applicable.
2 Store Lists.
2 Crew Purchase (curio) Lists.
2 Manifests of Cargo for discharge on CF.7527-A or 7527-B.

If first arrival port on an inward voyage, must also have 2 sets of Manifests of complete cargo on CF.7527-A or 7527-B, one for Customs at this port and the other for use as a "Travelling Manifest" to go forward to other discharge ports.

A – For U.S. Public Health Quarantine Boarding Officer: "Quarantine Declaration" on Form PHS.43. (Only required if boarding on arrival is necessary) see "Health" before first U.S.A. port.

B – For U.S. Dept. of Agriculture Boarding Officer: "Shipmaster's Declaration and Warning Notice" on Form AIQ.43.

C – For U.S. Immigration Boarding Officer:
Crew List on Form I.418 visaed by U.S. Consul abroad.
Passenger List on Form I.418.
Attachment to Passenger List on Form I.92.
Form I.94 for each passenger.
Form I.95 or ID Card (Form 184) for each crewman. (These are re-usable for multiple entries, but for seamen on first trip to United States a new Form. I.95 must be ready for presentation on arrival.)

D – For U.S. Customs Boarding Officer and Agent or Broker:
3 copies Crew List (Form I.418).
3 copies Cargo Manifest on Form 7527A or B.*
3 copies Store List – no official form provided.*
3 copies Crew Purchases or Curio List (no official form provided).*
3 Passenger Lists on Form I.418.
For U.S. Ships – Declaration re foreign repairs on Form 3415.
For U.S. Ships – Certified Crew List from last U.S. port before going foreign.

*At subsequent U.S. ports of call 2 copies required of extracts Cargo Manifests of cargo for the port concerned, and 2 copies of lists of stores and curios remaining on board.

PILOTAGE: Compulsory for all vessels except those on coasting trade. Pilots may be obtained from Puget Sound Pilots' Association, Seattle, at short notice. Inward, Pilot boards vessel at pilot station off Port Angeles.

Puget Sound Pilots: Pilotage service furnished to any port or place on Puget Sound and its adjacent inland waters.

Pilot stations are located on Ediz Hook, Port Angeles and Seattle Washington.

Vessels desiring a Pilot should proceed to a position 0.25 miles East of Ediz Hook, where Pilot will board the vessel. If a Northwest wind, sea, or swell exists, vessels are requested to proceed to a position inside and South of Ediz Hook to obtain a lee and facilitate boarding.

In clear weather, vessels should indicate their desire for a Pilot by hoisting the International Code Flag "G" and by blowing the whistle signal of one long, one short and one long blasts.

In fog or thick weather, the blowing of this whistle signal will attract the attention of the pilot station and repetition of this signal will assist the pilot boat to locate the vessel.

The pilot station is located 1,200 yards, 277° from Ediz Hook Light. At night, the station will show from a mast, 3 vertical lights, the highest and lowest being red and the middle one green, to indicate that the pilot boat is en route to the ship. The pilot station is equipped with radar to locate and track vessels. The pilot boats, 'Juan de Fuca' and 'Puget Sound' are equipped with radar.

Communications: Vessels may ensure prompt service by advising their ETA, Port Angeles, 24 hrs. in advance, via radio to station KLB, addressed to Puget Sound Pilots, Seattle, Washington. A vessel may also advise the pilot station, Port Angeles, Washington, addressed to "Pilots Port Angeles" of their ETA, and amended ETA, when subsequent conditions make it necessary. The message is transmitted immediately from KLB to Port Angeles via telephone. The pilot station, Port Angeles, monitors VHF Channels 14 and 16 continuously and transmits on Channel 13.

At the time of passing Cape Flattery, inbound vessels are requested to re-affirm their ETA by calling the pilot station directly, using VHF calling Channel 16 and transmitting on Channel 13.

Channel 14 is for vessel traffic system only.

Pilot Ladder Requirements:

1. Please contact pilot boat via voice radio (Channel 13) approximately 30 minutes prior to arrival for desired lee.
2. The ladder must be kept clean and used solely for embarking and disembarking Pilots.
3. Rigging of the ladder, along with embarking and disembarking Pilot, must be under supervision of a licensed officer.
4. The ladder must be made in 1 length and not consist of 2 lengths shackled or lashed together, and should be equipped with spreaders about 10 ft. apart to comply with SOLAS Regulation 17, Chapter 5.
5. The pilot boats have their own lights to illuminate the pilot ladder, but a standby light should be ready for an emergency.
6. The area of the deck where the Pilot boards and leaves must be well lighted and the area must be clear of all obstacles to ensure a safe passage for the Pilot.
7. *No tag lines, pull-up ropes, or trailing lines may be attached to the lower ends of the ladder.*
8. Ladders must be rigged well clear of discharge and water outlets and at a place near midship which affords the best lee for the Pilot. At no time should the ladder be rigged near the stern of the vessel.
9. Means must be provided to allow the Pilot to pass safely onto the ship's deck. Where portable stanchions and bulwark steps are used for this, the portable stanchions must be rigidly attached to the ship's structure and not the steps. The bulwark steps must also be securely fastened.
10. The ladder must be in good condition. the treads must remain horizontal when used and the upper surface must have a rough nonskid quality.
11. Manropes approximately 3 in. manila in circumference, a heaving line and a ring buoy with a self-igniting light must be provided.
12. If your vessel is to take a load of logs, make sure the Agent makes arrangements to have a cat-walk to provide safe passage to and from the ladder.

Accommodation Ladders for embarking or disembarking of Pilots:

1. All vessels where the distance from sea level to the point of access of the ship exceeds 9 m. (30 ft.) at any time, should carry on each side an accommodation ladder. The ladder is to be so sited that when in use the lower end of the ladder shall rest firmly against the ship's side under all conditions of roll and heel, clear of all discharges, and within the parallel length of the ship.
2. A conventional pilot ladder should be rigged just abaft the lower platform of the accommodation ladder. The pilot ladder should be secured firmly to the lower platform to allow access between the pilot ladder and accommodation ladder. The pilot ladder should extend at least 2 m. (6 ft.) above the lower platform of the accommodation ladder. Manropes to be provided and rigged alongside the pilot ladder.

ANCHORAGE: Extensive anchorage in Eliott Bay, depths of 90 ft.

RESTRICTIONS: Overhead power cables at Burlington Northern Railroad Bridge with a vertical clearance of 155 ft.

MAX. SIZE: Controlled by depth at berth.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Available, 2nd tug normally used.

BERTHING: Over 46 berths for ocean-going vessels. Depths alongside, 30 to 73 ft. MLLW.

SPECIALISED HANDLING FACILITIES: Terminal 20 has among its equipment a 200-ton capacity shear-leg crane. Also has pipe-lines to carry molasses, tallow or other non-petroleum liquid cargo, and has a tank farm for storage.

Terminal 115 – 2 berths, capacity, import steel and autos.

Terminal 115 – Foss Alaska Barges, has specialised finger piers, to handle container-to-barge operations.

Terminal 128 – A barge terminal.

Terminals 5, 18, 25, 37, 42 and 46 – Container Terminals, equipped with large container cranes and yards to handle van shipments. Depth alongside, Terminals 18 and 25 – 50 ft. Terminals 5, 37 and 46 – 40 ft.

Pier 86 – fully automated, deep water, Grain Terminal. 1 berth, length 600 ft. (Max. LOA 1,400 ft. using dolphins). Depth of water 73 ft. at MLLW. Grain Terminal: capacity 4.2 million bushels, loading rate 3,000 t.p.h. via twin conveyor belts.

CRANES: *Terminal 5:* 4×33-ton container cranes.

Terminal 18: 3×45-ton and 2×33-ton container cranes.

Terminal 20: 3×50-ton revolving cranes and 1×200-ton sheer leg.

Terminal 25: 3×45-ton container cranes.

Pier 28: 1×50-ton gantry crane and 1×40-ton gantry crane.

Terminals 37, 42 and 46: 5×45-ton container cranes.

Terminal 115: 1×50-ton and 1×35-ton gantry crane.

Terminal 91: 1×35-ton gantry crane.

STEVEDORES: 58 local gangs available. Gang requirements must be made known to the contracting stevedore prior to 1100 hrs. on day before vessel plans to dock. Order before 1030 hrs. on Saturday for Saturday afternoon, Sunday, and Monday.

DENSITY: Salt water in Outer Port. Fresh water inside Canal Locks.

FRESH WATER: Available at all wharves.

FUEL: Available.

GANGWAY/DECK WATCHMEN: Watchmen required if detainees aboard.

OPENING/CLOSING HATCHES: Normally carried out by stevedores while in port.

CERTIFICATES:

Certificate of Registry.
Certificates for any previous U.S. tonnage tax payments within the past year.
International Load Line Certificate
Safety Radio Certificate
Deratisation Certificate
Cargo Gear Inspection Certificate
Certificate of Inspection (for U.S. vessels).

CUSTOMS ALLOWANCE: No definite quantities prescribed; reasonable allowance at discretion of Customs Inspector.

IDENTIFICATION CARDS: Required.

CONSULS:

Austria
Belgium
Canada
Chile
China
Costa Rica
Denmark
Ecuador
El Salvador
Finland
France
Germany
Guatemala
Honduras
Iceland
Italy
Japan
Mexico
Netherlands
Nicaragua

United Kingdom

REPAIRS: All types of repairs possible.

DRY DOCKS: 10 dry docks for vessels up to 20,000 tons.

REPATRIATION: All facilities exist.

AIRPORT: Sea-Tac International Airport.

TIME: Pacific Standard Time, GMT minus 8 hours; Pacific Daylight-saving Time, from end April to end October, is GMT minus 7 hours.

HOLIDAYS: January 1st, New Year's Day (no work); February 12th, Lincoln's Birthday (work); Third Monday in February, Washington's Birthday (work); Last Monday in May, Memorial Day (work); July 4th, Independence Day (work); First Monday in September, Labour Day (work); Second Monday in October, Columbus Day (work); Fourth Monday in October, Veteran's Day (work); First Tuesday in November, Statewide Election Day (work); Fourth Thursday in November, Thanksgiving Day (no work); December 25th, Christmas Day (no work); In addition July 5th, known as "Bloody Thursday", while not a holiday, is a no work day for longshoremen.

SHORE LEAVE: Allowed, except for crewmen detained by Immigration.

AUUTHORITY: Port of Seattle.

AGENT: Cascade Shipping Co., Colman Building, 811 1st Avenue, Seattle, Washington 98104. Phone: 206 – 622 – 2803. Telex: TWX 910 – 444 – 2079. Cable: "Caship".

SEWARD, Alaska: 60.06 N. 149.27 W. **(See Plan Book)**

DOCUMENTS:

3 copies Cargo Manifest (Forms 7527-A or 7527-B) the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (curio list).
2 copies Stores List.
2 copies Passenger List (Form I.-418).
2 copies Crew List (Form I.-418).

Customs boarding Officer will also examine Ship's Register and Load-line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:

Health Pratique.
Master's Oath (Customs Form 3255).
All Foreign clearances.
U.S. Certificates of payment to tonnage tax (Customs Form 1002).
Certified Crew List.

PILOTAGE: Alaska Marine Pilot's Association, Box 273, Homer, Alaska 99603. 48 hours advance notice. 2182 calling frequency KC – KTE – 21. Anchorages as noted on chart. C. & G. S. 8529 Resurrection Bay.

Pilot boards at Cains Heads in Resurrection Bay.

MAX. SIZE: Harbour depth 35 ft. MLLW.

ANCHORAGE: Suitable anchorage in 30 fathoms depth available for deep draft vessels at the head of the Bay, South of marked buoy.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: KWA 346 (AM) Alaska Railroad Dock, frequency monitored 2182 kc/s. KWA 364 (SSB) Alaska Railroad Dock frequency monitored 4-6-8-12 Megs.
TUGS: No regular tug service available. Prior arrangements need be made with tugs from Cook Inlet. Foss Tug & Barge or Puget Sound Tug & Barge Company.
BERTHING: 24 hour berthing. Berthing permit required. Advance notice of 48 hours requested.

200 ft. by 735 ft. steel and concrete finger pier.

East Side — 600 ft. long with 35 ft. depth of water. (10 ft. out from dock face).

West Side — 600 ft. long with 35 ft. depth of water.

South End — 200 ft. long with 35 ft. depth of water.

(East and West Berths serviced by railroad spurs).
CRANES: East Berth – 2 gantry cranes. Maximum capacity – 45 short tons, maximum radius – 105 ft. Forklifts ranging up to 35 ton capacity.
STEVEDORES: Northern Stevedoring and Handling Corporation supply labour force.
MEDICAL: Fully staffed 30 bed hospital. All medical facilities available.
DENSITY: 1.0248 at Mean High Water.
FRESH WATER: Available at East and West berths. 4 in. water line; 67 lb. pressure.
FUEL: Diesel fuel available from pipeline at South and West Berth only. Other grades delivered by tank wagon.
OPENING/CLOSING HATCHES: Handled by crew, if done before berthing ship. By stevedores if tied to dock.
IDENTIFICATION CARDS: U.S.C.G. Port Security Card or Seaman's Card required.
REPAIRS: Radio, radar, welding, machining and light engine repairs can be effected.
AIRPORT: 1 mile. Charter Service. No regular air service.
TIME: Alaska Standard Time.
HOLIDAYS: All holidays are time and one half. Cargo can be worked on all except Christmas, New Year's and Labour Day.
POLICE/FIRE/AMBULANCE: Police, tel. CA 4-5201; Ambulance, tel. CA 4-3042; Fire, tel. CA 4-3444.
AUTHORITY: The Alaska Railroad.

SITKA, Alaska: 57.03 N. 135.20 W. (See Plan Book)

Located on the Western side of Sitka Sound, Baranof Island. Open all year.
APPROACHES: 3 natural channels: Western, Middle and Eastern.
DOCUMENTS: See "Anchorage, Alaska".
PILOTAGE: Pilot pick-up point – close aboard vicinity Eckholm Light.
ANCHORAGE: Jamestown Bay.
MAX. SIZE: Harbour depth 22 ft. MLLW. Tides: diurnal range – 9.9 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
CUSTOMS: Quarantine, Immigration and Customs, local.
TUGS: 7 tugs 300 h.p. to 1,200 h.p.
BERTHING: 3 wharves.

1. Conway Dock: Berthing length 160 ft., depth 30 ft. MLLW. No cranes, 3 lift-trucks; 10,000 sq. ft. covered shed space; fresh water.

2. Japonski Dock: Government dock only for limited commercial use.

3. Alaska Lumber & Pulp Co.: (Private) Berthing length 700 ft., depth 35 ft. LW. Walking cranes only. Not less than 12 lift-trucks, 30,000 sq. ft. covered shed space; fresh water. (Located at Silver Bay, Sawmill Cove, 4 miles South of Sitka). 30,000 sq. ft. open storage.
STEVEDORES: 3 gangs.
REPAIRS: Light repairs only.
FRESH WATER: Available.
FUEL: Not available.
MEDICAL: Sitka Community Hospital and U.S. Public Health Service Hospital on Japonski Island.
TRANSPORTATION: Air and ferry.

SKAGWAY, Alaska: 59.27 N. 135.18 W.

Located at the Northern end of Lynn Canal, 14 miles North of Haines.
APPROACHES: Via Lynn Canal.
DOCUMENTS: See "Anchorage, Alaska".
PILOTAGE: Pick-up point located in vicinity of Point Retreat.
MAX. SIZE: Harbour depth 30 ft. running out to 300 ft. Tides diurnal range 16.7 ft. Also see "Berthing".
ANCHORAGE: In Lutak Inlet, 14 miles South of Skagway.
HEALTH: See "Health: All ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
CUSTOMS: Quarantine, Customs and Immigration available in Skagway.
TUGS: 2 tugs available at Skagway.
BERTHING: 1. White Pass and Yukon Railroad Dock: Containerised cargo to Vancouver and Whitehorse is the principal use, also used for tankers and cruise ships. 900 ft. long, 100 ft. wide; depth at face varies from 20 ft. to 43 ft. Southern end in poor condition. No covered storage. Open storage 80,000 sq.ft. 1 fork-lift is available. Containers presently loaded and unloaded with ship's gear. 2 straddle cranes for containers on dock.

2. Skagway Terminal Co.: Ore loading facility. 1,000 ft. berth, fender dolphins, and walkway. 42.5 ft. deep at face. Sole use for bulk cargo ships. Adjacent to the berth is a warehouse of 108,000 sq.ft. Also available are 50 acres for open storage. Loading equipment consists of 1 fixed loading spout with a capacity of 1,500 t.p.h.

3. State: City joint use ferry pier – barge off-loading facility.
STEVEDORES: 3 gangs.
REPAIRS: None.
WATER: Available in small quantities in temperate seasons only.
FUEL: None.
MEDICAL: Medical clinic and one nurse.
TRANSPORTATION: Rail, ferry and air.
AUTHORITY: City of Skagway (Port Authority).

SMITHS BLUFF, Texas: 30.00 N. 93.59 W.

DOCUMENTS, PILOTAGE, RADIO, etc.: Refer to "Port Arthur".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Meet vessel in Neches River before arriving at berth. Normally 2 tugs required berthing/unberthing.
BERTHING:

Pure Oil Co.: Distance from sea 38 miles, depth at berth 37 ft.

Sun Oil Co.: Distance from sea 38 miles, depth at berth 36 ft.
MEDICAL: All facilities available.
DENSITY: Fresh water:
FRESH WATER: Available ex-wharf at Pure Oil Terminal, otherwise by barge.
FUEL: Available ex-wharf at Pure Oil Terminal. All grades available by barge from Port Arthur or Beaumont.
GANGWAY/DECK WATCHMEN: Not required unless crewmen detained by Immigration.
CUSTOMS ALLOWANCE: 300 cigarettes and 1 quart wine or spirits for each man.
IDENTIFICATION CARDS: Foreign crew only require Immigration Landing Permit.
CONSULS: Nearest at Houston.
REPAIRS: DRY DOCKS: See "Port Arthur".
AUTHORITY: Port Director, Port of Beaumont.

STOCKTON, California: 37.57 N. 121.19 W. (See Plan Book)

DOCUMENTS: See "San Francisco".
PILOTAGE: Pilots commissioned by Stockton Port District. Pilots obtained by contacting Secretary of California Inland Pilots' Association, located at Marine Exchange, World Trade Center, San Francisco, California (KBP 386).
ANCHORAGE: Emergency anchorage only permitted in Turning Basin, 32 ft. depth.
RESTRICTIONS: Restrictions only in effect if water at flood stage. See "San Francisco".
MAX. SIZE: Draft restrictions of 30 ft. at low tide, 32 ft. at high tide.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to San Francisco Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Ship to shore Radio (KBP 376) enables constant contact with Pilots who therefore aware of any problem that may develop up or down river. Arrangements also may be made for readiness of ordered gangs within 15 minutes of ship's arrival.
TUGS: Tugs join vessel 0.5 mile up river from Main Channel; generally, ship's lines used, however, tug lines may also be utillised.
BERTHING: *Port Stockton Bulk Material Wharf, Berths 12-13:*

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Shipment of dry-bulk commodities, including clay clinkers and petroleum coke; receipt of molasses and petroleum products.

Dimensions: Length of face 566 ft.; lower side 13.5 ft., upper side 13.5 ft.; depth alongside at MLLW 35 ft.; usable berthing space 566 ft.

Mechanical handling facilities: Max. vessel coke loading rate 240 long t.p.h. 2 small bulldozers available for trimming cargo in holds of vessels, in addition to 360° spout trimmer.

Remarks: Car dumper has an operating rate of 275 tons coke/hour.

Port Stockton Wharf, Berths 10-11:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Container-handling dock; receipt of molasses and petroleum products.

Dimensions: Length of face 810.5 ft., lower side 102 ft.; depth alongside at MLLW 32 ft.; usable berthing space 810.5 ft.

Remarks: Face of wharf is in line and continuous with face of Berth 9 providing a total of 1,455.5 ft, of berthing.

Port Stockton General cargo Wharf, Berth 9:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Receipt and shipment of general cargo.

Dimensions: Length of face 645 ft., upper side 75 ft.; depth alongside at MLLW: Face 37-34 ft., upper side 35 ft.; usable berthing space; Face 645 ft. upper side 110 ft. with dolphin; width of apron: Face 41.25 ft.

Mechanical handling facilities: Forklift trucks and other types of cargo-handling equipment, owned by the Port District and by stevedoring companies, are available as needed.

Port Stockton Wharf No. 8:
Owned by: Stockton Port District.
Operated by : Stockton Port District.
Use: Receipt and shipment of general cargo; Liquid sugar facility and receipt of molasses.
Dimensions: Length of 396 ft.×88 ft.; depth alongside at MLLW 37-36 ft.; usable berthing space 484 ft. with trestle.

Port Stockton Wharf No. 7:
Owned by: Stockton Port District.
Operated by: Stockton Port District.
Use: Receipt and shipment of general cargo.
Dimensions: Length 516 ft. depth alongside at MLLW 37-36 ft.: usable berthing space 516 ft.; width of apron 31 ft.

Port Stockton Wharf No. 6:
Owned by: Stockton Port District.
Operated by: Stockton Port District.
Use: Receipt and shipment of general cargo.
Dimensions: Length 418 ft.; depth alongside at MLLW 37-36 ft.; usable berthing space 418 ft.; width of apron 31 ft.

Port Stockton Wharf No. 5:
Owned by: Stockton Port District.
Operated by: Stockton Port District.
Use: Receipt and shipment of general cargo.
Dimensions: Length of face 428 ft.; depth alongside at MLLW 34-32 ft.; usable berthing space 429 ft.; width of apron 31 ft.

Port Stockton Grain Wharf No. 4:
Owned by: Stockton Port District.
Operated by: Stockton Port District.
Use: Receipt and shipment of general cargo, receipt of bulk phosphate rock by self-discharging vessel; and shipment of bulk fertilisers.
Dimensions: Length of face 461 ft.; depth alongside at MLLW 32-35 ft.; usable space 462 ft.; width of apron 31 ft.

Port Stockton Wharf No. 3:
Owned by: Stockton Port District.
Operated by: Stockton Port District.
Use: Receipt and shipment of general cargo.
Dimensions: Length of face 461 ft.; depth alongside at MLLW 32-36 ft.; usable berthing space 461 ft.; width of apron 31 ft.

Port Stockton Open Wharf No. 2:
Owned by: Stockton Port District.
Operated by: Stockton Port District.
Use: Receipt and shipment of general cargo; shipment of logs, and handling of heavy-lift cargo. Also bulk cargo.
Dimensions: Length of face 506 ft.; depth alongside at MLLW 32-36 ft.; usable berthing space 506 ft.; width of apron: open.
Remarks: Wharf has 39,000 sq. ft. of open storage area and 7 bulk warehouses with a capacity of 70,000 S/T to the rear of the dock area. At the Industrial Park approx. 104 acres of open storage area are located South of W. Washington Street; over 50 acres of this area can be used for storing logs awaiting shipment. An additional 56 acres of open storage are located North of W. Washington Street.

Logs may be transferred to wharf by trucks and by tractors equipped with log clamps.

Stockton Elevators Grain Elevator Main Wharf No. 1:
Owned by: Stockton Elevators Inc.
Operated by: Stockton Elevators Inc.
Use: Shipment of grain by vessels and by ocean going and inland waterway barges; receipt of grain by self-unloading barges.
Dimensions: Length of face 564 ft., West side 20 ft., East side 20 ft.; depth alongside at MLLW 35-37 ft.; usable berthing space 564 ft.; width of apron, open end 20 ft.
Mechanical handling facilities: 2 towers on wharf, each with 13-in. diameter, telescopic, mechanically operated, grain-loading spout; loading rate, 900 short t.p.h. (29,877 bu.) at East tower; 800 (26,557 bu.) at West tower; combined rate, 900 short tons.
Remarks: Grain gallery connecting towers on wharf has a 30-in., electric-belt conveyor; and gallery extending from East tower to grain elevator has two 30-in. belt conveyors.

BRIDGES: Fixed-span high-level toll bridge across Carquinez Strait, with min. clearance of 135 ft. above MHHW. Southern Pacific Railroad lift span bridge crosses Suisun Bay 6.5 miles upstream from Carquinez bridge, with min. clearance above MHHW of 70 ft. when closed and 135 ft. when open. Horizontal clearance on lift span 290 ft. A third bridge, 22 miles above Southern Pacific bridge, near Antioch, has min. clearance 70 ft. when closed and 135 ft. when open. Horizontal clearance of span 265 ft.

STEVEDORES: *General Cargo* – For gang start at 0800 hrs., orders must be placed at 1600 hrs. of previous day; night gangs must be ordered by 1100 hrs. These times pertain to week-day gangs. For week-end gangs, 1100 hrs. Saturday for Saturday night, Saturday morning, Sunday night and Monday morning. Day shifts run from 0800 to 1700 hrs. Night shifts 1700 to 0300 hrs. Arrangements can be made for a special third shift from 0300 to 0800 hrs. Rates quoted on request.

Bulk Ore and Grain Cargoes – Orders for gangs must be placed at same time as for general cargo. This operation on 24 hour basis; day shift, 0800 to 1600 hrs., night shift 1600 hrs. to midnight, swing shift, midnight to 0800 hrs. Also see "Radio"s.

MEDICAL: Arrangements with San Joaquin Medical Society for physicians, surgeons and dentists. 5 hospitals within radius of 6 miles from port. Ambulance service readily available. Telephone number for this service is 466-9535 (day or night).

TANKERS: 2 berths, 32 ft. depth available.

FRESH WATER: Available through pipelines.

FUEL: All grades of fuel available with 1 day's advance notice.

GANGWAY/DECK WATCHMEN: Services of watchmen not necessary. Available if requested.

OPENING/CLOSING HATCHES: Hatches may be opened prior arrival and closed after ship sailed from port; any opening or closing of hatches at dockside must be performed by stevedores.

CERTIFICATES: See "San Francisco".

CUSTOMS ALLOWANCE: Tobacco, Wine and/or Spirit, see "San Francisco".

CARGO GEAR: Safety regulations require strict adherence to max. loading or unloading weight capacity of ship's gear.

IDENTIFICATION CARDS: Not required.

CONSULS: See "San Francisco".

REPAIRS: Minor types of repairs carried out.

DRY DOCKS: Nearest dry docks, San Francisco.

REPATRIATION: No facilities in Stockton for effecting crew changes and arranging any necessary repatriations. Special arrangements may be made through Customs.

AIRPORT: Stockton Metropolitan Airport located approx. 6 miles from port. Serviced by United Air Lines and Air West.

TIME: Pacific Standard Time in effect from last Sunday in October to last Sunday in April; Pacific Daylight Time goes into effect on last Sunday of April until last Sunday in October, when clocks are advanced 1 hour.

HOLIDAYS: New Year's Day; Lincoln's Birthday; Washington's Birthday; Memorial Day; Independence Day; Labour Day; Admission Day; Columbus Day; Veteran's Day; Thanksgiving Day; Christmas Day are all holidays. In addition to above. General Election Day, both State and National, as well as any day proclaimed by Governor of California or President of United States shall be observed as holiday. Work can be arranged for all holidays.

POLICE/AMBULANCE/FIRE: Security Force on duty 24 hours a day and can be reached by dialling extension 246 for any emergency that might arise. Stockton Police Department's emergency telephone number (209) 466-6843. Stockton Fire Department (209) 464-4646. Ambulances may be secured by telephoning (209) 466-6869; 464-4846; 463-3202; 466-1601; 464-4611; 464-1546.

TELEPHONES: Telephones placed aboard on request.

ELECTRIC CURRENT: At wharves where current available for ship's use, it is 110 volt, single phase, 60 cycle for lighting and 440 volt, 3 phase, 60 cycle for power.

SHORE LEAVE: Permitted.

REGULATIONS: Port of Stockton requests notice of ship's intent to come into port at least 7 days prior to arrival; vessels, who have made prior arrangements, will have precedence over vessels who sail into port without previous notice.

DEVELOPMENTS: Deepening of channel to 35 ft. proposed.

AUTHORITY: Port of Stockton.

AGENT: See "San Francisco".

TACOMA, Washington: 47.14 N. 122.28 W.

(See Plan Book)

DOCUMENTS (on arrival from foreign):
Ship's document.
Clearance from Last Foreign Port.
2 Crew Lists on Form I.418
2 Passenger lists on Form I.418 (if applicable)
Passenger declarations if applicable.
2 Store Lists.
2 Crew Purchase (curio) Lists.
2 Manifests of cargo for discharge on C.F. 7527-A or 7527-B.

If first arrival port on an inward voyage, must also have 2 sets of Manifests of complete cargo on C.F. 7527-A or 7527-B, one for customs at this port and other for use as a "Travelling Manifest" to go forward to other discharge ports.

A – For U.S. Public Health Quarantine Boarding Officer: "Quarantine Declaration" on Form PHS.43.
B – For U.S. Department of Agriculture Boarding Officer: "Shipmaster's Declaration and Warning Notice" on Form A1Q.43.
C – For U.S. Immigration Boarding Officer:
Crew List of Form I.418 visaed by U.S. Consul abroad.
Passenger List on Form I.418.
Attachment to Passenger List on Form I.92.
Form I.94 for each passenger.
Form I.95 of ID Card (Form 184) for each crewmen. (These are re-usable for multiple entries, but for seamen on first trip to United States a new Form. I.95 must be ready for presentation on arrival.)
D – For U.S. Customs Boarding Officer and Agent or Broker:
3 copies Crew List (Form I.418).
3 copies Cargo Manifest on Form 7527A or B.*
3 copies Store List – no official form provided.*
3 copies Crew Purchases or Curio List (no official form provided).*
3 Passenger Lists on Form I.418.
For U.S. Ships – Declaration re foreign repairs on form 3415.
For U.S. Ships – Certified Crew List for last U.S. port before going foreign.

* At subsequent U.S. ports of call 2 copies required of extracts Cargo Manifests of cargo for the port concerned, and 2 copies of lists of stores and curios remaining on board.

PILOTAGE: Compulsory for all vessels except those under coasting trade on West coast of the United States, including Alaska and British Columbia. Pilots board off Port Angeles Pilot Station.

ANCHORAGE: The depths as a rule are too great for convenient anchorage, but vessels occasionally anchor under the Northern shore about 1 mile Eastward of Brown's Point. Vessels may anchor in about 18.29 m., 450 yards N.N.W. of the outer end of Puyallup Waterway West Jetty.

City regulations permit anchorage in any part of the bay outside harbour lines so as not to interfere with vessels arriving or departing from their docks.

MAX. SIZE Length over 305 m. (centre to centre dimensions of mooring dolphins), draft subject to berth depth.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Available, join vessel in Commencement Bay, approx. half way between Brown's Point and the designated Dock. Tug's lines are used and there is a charge for tug's lines.

BERTHING: 29 deep water berths.

General Cargo: 161,000 sq.m. warehouse space, 91 hectares of open storage paved, lighted, fenced, serving all piers.

Water depths: 9.15 m. to 21.34 m. below MLLW.

BULK HANDLING FACILITIES: 550 m. pier with 12 m. to 15 m. water depth. 5 heavy lift whirley cranes and bulk unloading crane with 750 to 1,500 t.p.h. capacity; 150,000 tons capacity alumina storage structure with load-out facility; 12.14 hectare stockpile area including holding area for 300 rail cars.

2 Bulk grain elevators: United Grain: Pier 1, 4.5 million bushel capacity; loading rate: 1,000 t.p.h.; 271.34 m. dock; 15.24 m. water depth.

Continental Grain: 3 million bushel capacity: loading rate: 2,400 t.p.h.; 137 m. dock with dolphins to 244 m.; 21.34 m. water depth.

Bulk Liquid Facility: 3.5 million gallon capacity; heated tanks and piping for both rail and truck shipping and receiving; serves vessels at Pier 1, 676 m., 10.67 m. water depth, and Pier 5, 174 m., 10.06 m. water depth.

CONTAINER HANDLING FACILITIES: *Terminal 4:* Container handling and general cargo. Container handling capability – 5,000 units per month. 2 berths, total length 378.6 m., width 42.7 m., Depth 13.7 m. MLLW. 1 warehouse 13,935 sq.m., 2×40-ton IHI container cranes, 10.12 hectares paved, lighted, fenced, back-up storage. 80 Reefer container outlets (240-480 volts). Direct rail access to pier.

Terminal 7: Containers and General cargo. 4 berths, total length 823 m., width 41 m., depth 13.7 m. MLLW. 2 warehouses each 9,290 sq.m. 2×45-ton Whirley cranes, 1×40-ton IHI multi-purpose crane, 1×50-ton Peiner multi-purpose crane (Containers, dry bulk). 17 hectares paved, lighted' fenced, back-up storage. 54 Reefer container hook-ups (240–480 volts). Direct rail access to pier.

BRIDGES: The 11th Street Bridge: All ships are required to notify for opening 2 hours in advance. The Puyallup River Bridge on 11th Street has been deactivated. The Blair and Hylebos Bridges have no restrictions. Closed periods apply to the 11th Street Bridge and the hours are as follows: 0645 – 0745 hrs., 1530 – 1730 hrs.

STEVEDORES: Seattle Stevedoring Company, Jones-Washington Stevedore Company, Crescent Wharf and Warehouse Co., American President Lines Terminals Northwest.

Gang requirements must be made known to contracting stevedore prior to 1100 hrs. on day before the vessel plans to dock. (1030 hrs. on Saturdays for gangs on Saturday p.m., Sunday and Monday.)

Stowage of cargo for discharge or load determines the gang size requirements. Sufficient information for intelligent gang orders is a necessity – i.e. advance cargo plans, unusual size and/or weight, etc.

TANKERS: Loading/discharge lines 8 in. and 10 in. 150 ASA flanged connections. Slop discharge facilities not available. Fresh water available. Coast Guard regulations strictly enforced.

DENSITY: The average density in the port is 16.8 at 15° C.

FRESH WATER: Available. Delivers to vessel through portable meter hose.

FUEL: Available.

Grade	*Viscosity at 122°SSF*
Bunker "C"	165 – 175
PS – 400	112 – 116
Bunker Special	50 – 60
PS – 300	32 – 35

Advance notice required

FIRE PRECAUTIONS: Very strict precautions in force.

GANGWAY/DECK WATCHMEN: Watchmen required if detainees are aboard.

OPENING/CLOSING HATCHES: Normally carried out by stevedores. In practice, however, the crew can perform this task while in transit.

CERTIFICATES:

Certificate of Registry.

Certificates for any previous U.S. tonnage tax payments within the past year.

International Load-line Certificate.

Safety Radio Certificate.

Deratisation Certificate.

Cargo Gear Inspection Certificate.

Certificate of Inspection (U.S. vessels).

CUSTOMS ALLOWANCE: Tobacco: Wine/Spirit: No definite quantities prescribed; reasonable allowance at discretion of Customs Inspector.

IDENTIFICATION CARDS: Required.

REPAIRS: The largest repair yard in Tacoma can haul out vessels up to 1,000 tons for all kinds of repairs, including electronics, welding, painting and machining; shafts up to 30 ft. in length are machined here. Another plant does shipbuilding exclusively, but will perform topside repairs if needed. Wreckage and salvage facilities are available. Larger vessels go to Seattle for dry-docking. Minor repairs and services for small craft are available at marinas on the City Waterway and the N.E. shore of Commencement Bay.

AIRPORT: Seattle – Tacoma International Airport is 16 miles North from Port and Tacoma Industrial Airport 8 miles West.

TIME: Local time reference is GMT minus 8 hours. In Summertime it is GMT minus 7, or Pacific Daylight Saving Time, started the last week-end in April and finished the last week-end in October.

HOLIDAYS: New Year's Day (January 1st) no work; Lincoln's Birthday (February 12th); Washington's Birthday (February 22nd); Memorial Day (May 30th); Independence Day (July 4th) no work; Bloody Thursday (July 5th); no work; Labour Day (September 1st) no work; Columbus Day (Friday after Thanksgiving); Veterans' Day (November 11th); Thanksgiving Day (November 27th) no work; Christmas Day (December 25th) no work.

POLICE/AMBULANCE/FIRE: Emergency tel. numbers:
Police 593-4911; Fire MA 7-0151; Ambulance 473-1611.

TELEPHONES: Pay telephones available at Piers 1, 2, 4, 7, Blair Terminal, Pierce County Terminal, Grain Docks 23 and 24. There is no charge for this service.

SHORE LEAVE: Allowed.

AUTHORITY: Manager, Terminal Division, Port of Tacoma.

AGENT: See "Seattle".

TAMPA, Florida: 27.57 N. 82.28 W. **(See Plan Book)**

DOCUMENTS:

Passports and Seamen's Books.

Vaccination Certificate for each Seaman.

Certified Crew List: must be on American form and certified by American Consular office at foreign country from which departed.

Crew List.

Ships Register.

Load Line Certificate.

Certificate of Financial Responsibility (Oil Pollution Certificate).

U.S. Customs requires Inward Foreign Manifest (original and 3 copies). This must describe cargo which is to be discharged this port and/or any other port in vessel's itinerary. It must show:

Vessel's name and flag.

Master's name.

Last foreign port of departure.

Net registered tons of vessel.

When and where vessel built.

Consigned to Agent.

Bill of Lading Number.

Marks and numbers (on cargo).

Complete description of merchandise.

Weight in kilos or pounds.

Port of loading.

Port of discharge.

Stores Lists (original and 3 copies).

Crew Curio List (original and 3 copies).

Narcotic List (original and 3 copies).

*Dangerous Cargo List (original and 3 copies).

*This should be filled out even if nothing dangerous aboard.

Health officials will board vessel first. Bills of Lading not needed for Customs purposes.

PILOTAGE: Vessel applies for Pilot through radio station WPD and through Agent. Telegraphic address for Pilot is: Tam-pilot. Advance notice is not necessary. However, U.S. Coast Guard requires a 24-hour notice of the vessel's ETA. VHF Channel in Tampa is Channel 12.

3 pilot boats – each are different. All 40 ft. – 45 ft. motor launches flying "H" flag and carrying prescribed red and white pilot lights. No light or sound signals necessary by vessels requiring Pilots.

Normally pilot boat located between sea buoy and No. 2 Buoy in main channel. During bad weather they are located off lighthouse at Egmont Key. Anchorage within 1 mile area of sea-buoy.

ANCHORAGES: Vessels with good ground tackle can anchor anywhere outside Egmont Bar in depths of 35 ft. to 50 ft. Inside anchorages Southward of Mullet Key in depths of 30 ft. to 35 ft.; and S.W. of Gadsden Point in depths of 29 ft. to 36 ft.

Explosives and quarantine anchorages East of Mullet Key and South of Interbay Peninsula.

(1) Explosives anchorage East of Mullet Key. A rectangular area in Tampa Bay, approximately 4,459 yd. long and 1,419 yd. wide, beginning at Lat. 27° 38′ 30″, Long. 82° 39′ 09″, and extending N.E. to Lat. 27° 39′ 48″, Long. 82° 37′ 15″; thence S.E. to Lat. 27° 39′ 17″, Long. 82° 36′ 46″; thence S.E. to Lat. 27° 37′ 52″, Long. 82° 38′ 38″; thence N.W. to point of beginning. Anchorage is used by vessels awaiting loading or unloading at Port Tampa where duration of anchorage will exceed 72 hours.

(2) Temporary explosives anchorage South of Interbay Peninsula. Beginning at a point bearing 107°, 1,750 yd. from Cut F Range Front Light; thence to a point bearing 125°, 2,050 yd., from Cut F Range Front Light; thence to a point bearing 180°, 1,725 yd., from Cut F Range Front Light; thence to a point bearing 222°, 2,180 yd., from Cut F Range Front Light; thence to a point bearing 251°, 1,540 yd., from Cut F Range Front Light; and thence to the point of beginning. Anchorage is used for vessels engaged in loading explosives when duration of the anchorage is less than 72 hours.

(3) Temporary explosives anchorage off Port Tampa. A circular area with a radius of 200 yd. with the point at Lat. 27° 50′ 22″, Long. 82° 34′ 15″.

(4) Quarantine anchorage. S.E. of the temporary explosives anchorage, beginning at a point bearing 97° true, 4,370 yd., from Cut F Range Front Light; thence to a point bearing 113° 30′, 5,370 yd., from Cut F Range Front Light; thence to a point bearing 161° 30′, 3,770 yd., from Cut F Range Front Light; thence to a point bearing 163° 30′ 2,070 yd., from Cut F Range Front Light; thence to the point of beginning.

RESTRICTIONS/MAX. SIZE: *See page 1198.*

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Radio station "WPD" should be used by vessel to route ETA cables to Agents, receivers, etc. Station KUZ 383 on Channel 25 VHF, available for public messages.

GENERAL CARGO FACILITIES:

Operator	*Location*	*Length*	*Depth*	*Remarks and Equipment*
Eller & Co. Inc. (Port Authority Berths No. 209)	Verger Boulevard, Holland Terminal	600 ft. Marginal Wharf	34ft.	Fork Lifts: 1×10 tons, 4×8 tons, 5×2.5 tons, 11×4 tons. Mobile shore cranes available 70 – 300 tons
Garrison Terminals Inc.	13th and Beatrice St.	1,759 ft. Marginal Wharf	30 ft.	Crawler Cranes: 4 ranging from 37 to 72 tons. Fork Lifts: ranging from 1,000 to 20,000 lb. capacity. Bulk handling: 5 hoppers, clamshell buckets, shipside conveyor. Bagging: openmouth and valve baggers for bulk fertilizer materials.
Garrison West	Foot of Franklin St.	543 ft. Marginal Wharf	27 ft.	Crawler Cranes: 4 ranging from 37 to 72 tons. Fork Lifts: ranging from 1,000 to 20,000 lb. capacity. Bulk handling: 5 hoppers, clamshell buckets, portable shipside conveyor. Stationary under hopper bulk receiving system.
Spessard L. Holland Terminal (Port Authority Berths Nos. 202, 209, 210, 211)	Verger Boulevard	2,400 ft. Marginal	34 ft.	Back land leased to Uiterwyk Cold Storage and Eller & Company with preferential berthing rights. 15 acres Public Storage. The 100 ft. apron on all berths is public.
Kreher Terminal Berths No. 223, 224	Carbide Avenue, Hookers Point	1,120 ft. Marginal Wharf	34 ft. (for 800 ft.) 14/16 ft. (for 320 ft.)	Back land leased to South State Terminals, Union Carbide and Standard Gypsum. Wharf apron and docking area is public and subject to preferential berthing rights of one tenant.
S.E.L. Maduro (Florida), Inc.	13th and York St.	1,200 ft. Marginal Wharf	30 ft.	All sizes fork lifts including specialized newsprint handling and 52,000 lb. capacity for handling of containers; mobile shore cranes. Modern banana unloading conveyor system.
Metroport Terminals Berths 263, 264, 265, 266.	601 N. 13th Street	2,255 ft. Marginal Wharf 6 berths	30/27/25 ft.	Banana unloading conveyor system, 20 ton gasoline crane with 45 – 100 ft. boom, 4 lift trucks. Mobile shore cranes available up to 70 tons.
Southport Stevedores Inc. (Port Authority Berths Nos. 251, 252)	Foot of Grant St.	1,200 ft. Marginal Wharf	34 ft.	Cranes: 4×40 tons gantries Fork Lifts: up to 20,000 lb.
Tampa Import and Export Terminal	521 Ashley St.	960 ft. Marginal Wharf	29 ft.	Cranes: 2×35 ton Spanner, 1×25 ton Lift Trucks: 4,000 tp 10,000 lb. capacity. Dry bulk cargo conveyor system
Uiterwyk Cold Storage Corp. (Port Authority Berths Nos. 210, 211)	Verger Boulevard	1,200 ft. Marginal Wharf	34 ft.	Fork Lifts
Spessard L. Holland Ro/Ro	Verger Boulevard	—	34 ft.	Public facility – Up to 60 acres Available for marshalling and storage

SPECIALISED GENERAL CARGO FACILITIES:

Operator	*Location*	*Length*	*Depth*	*Remarks and Equipment*
Commercial Metals Transport Co.	West end of Port Sutton, east side of turning basin	530 ft. Marginal Wharf	30 ft.	Scrap metal loading facility. 4 diesel cranes 3×80 ft. boom, 1×70 ft. boom each equipped with electric magnets
Tampa Bay Terminal Inc.	Foot of Grant St.	700 ft. Marginal Wharf	34 ft.	Scrap metal loading facility. 2 diesel electric travelling, revolving, full-portal shipside cranes with 130 ft. boom and capacity of 40 tons. Equipped with electric magnets.
Cattle Loading Facility (Berth No. 232)	Lehman St. Hookers Point	245 ft. Timber Pier	22 ft.	Loading chutes, squeeze chutes, watering troughs. Partially covered timber frame holding pens with metal roof and concrete floor which will accommodate up to 800 head of cattle depending on their size. Centre of ship airspace clearance 68 ft. above MLW.
Hardaway	Port Tampa	330 ft.	6 ft.	Pre-stressed concrete products. 1×30 ton crane with 120 ft. boom.
Westinghouse Electric Corp.	6001 S Westshore Boulevard	300 ft.×50 ft. barge slip	12 ft.	400 – 600 ton capacity bridge crane with 90 ft. span.

DRY BULK FACILITIES:

Operator	Location	Depth	Max. L.O.A.	Max. Beam	Height of Vessel Waterline to bulwark	Chute Travel	Loading Rate (N)=Net (L)=Long t.p.h.
Agrico Chemical Co.	Big Bend	34 ft.	1,500 ft.	120 ft.	47 ft.	1,500 ft.	3,000 (N)
CF Industries Inc. (Port Authority Berth No. 204)	Holland Terminal	34 ft.	600 ft.	85 ft.	50 ft.	Stationary	960 (N)
Detsco Terminals Inc.	14th St. and Harbor	32 ft.	380 ft.*	80 ft.	40 ft.	350 ft.	1,250 (N)
Eastern Associated Terminals Co.	22nd St. Causeway Boulevard	34 ft.	850 ft.*	120 ft.	50 ft.	400 ft.	3,000 (N)
Gardinier Inc.	Highway 41 South	28 ft.	600 ft.*	80 ft.	51 ft.	335 ft.	400–900 (L)
IMC Phosphate Terminal Co.	Port Sutton	34 ft.	800 ft.*	104 ft.	43 ft.	378 ft.	1,800 (L)
Rockport	22nd St. Causeway Boulevard	34 ft.	900 ft.*	120 ft.	50 ft.	600 ft.	3,000 (N)

*Can load longer vessels by shifting during operation.

Shipmaster's Report: Bulk phosphates are loaded in Port Sutton (one berth) and in the East Bay (two berths: Rockport owned by SCL Seaboard Coast Line and Eastern Associated Terminal).

Loading rates: about 1,000 t.p.h. at Port Sutton;
about 3,000 t.p.h. at the two berths in East Bay area.

Trimming: the loading elevators are not equipped with trimming devices. Most cargoes can be trimmed by bulldozers. The bulldozer weighs 5 long tons, and is placed on board with ship's gear. The IMC elevators at Port Sutton and the SCL elevator (Rockport) use shore gear to place the bulldozer on board. A minimum of 8 to 7.5 ft. headroom under the coaming is required for bulldozer trimming.

DRY BULK FACILITIES: Others:

Operator	Location	Depth	Berthing Space	Handling Equipment	Storage Area	Product Handled
Cargill Inc. (Port Authority Berth No. 258)	North 19th St.	27 ft.	700 ft.	Marine leg for unloading 30,000 bushels p.h., and spout loader-rate of 600 tons	Capacity of elevator is 1,000,000 bushels; 8,000 ton bulk warehouse; 4,800 ton bulk warehouse.	Grain and dry bulk agriculture products
Detsco Terminals, Inc.	14th St. and Harbor	30 ft.	540 ft.	None.	Storage area leased out	Cement and caustic soda
Florida Portland Cement Division	Hookers Point	34 ft.	820 ft.	Belt material handling system capable of receiving 4,000 short t.p.h. of aragonite or 1,500 short t.p.h. of gypsum 3 electric, travelling bridge cranes equipped with 2.5 and 3 cu.yd. grab buckets.	800×100 gypsum storage shed; 215,000 barrel holding tanks for fuel storage (for plant consumption) 220,000 ton capacity open storage.	Gypsum rock, aragonite
Ideal Basic Industries, Inc.	Port Sutton	34 ft.	1,038 ft.	2×8 in. pipelines to storage 4×12 in. pipelines to storage.	8 silos with 190,000 barrel capacity. 3 bins with 5,640 ton capacity.	Cement
I.S. Joseph, Co.	Port Tampa	34 ft.	700 ft.	Belt elevator from storage to loading spout. rate of discharge of 500 t.p.h. Direct transfer from rail cars to vessels at 200 net t.p.h.	Silo capacity of 10,000 net tons.	Citrus pellets and other dry bulk products.
National Gypsum Co.	Port Tampa	34 ft.	950 ft.	Receiving hopper and conveyor–unloading rate of 2,000 net t.p.h.	Open area approx. 10 acres.	Gypsum rock
Paktank Florida, Inc.	Pendola Pt., Port Sutton	34 ft.	700 ft.	Dock crane with 80 ft. boom with unloading rate of 400 t.p.h. Loading tower with rate of 1,200 t.p.h.	Building 125 ft.×700 ft. with storage capacity of 50,000 tons. 4 silos with 8,000 ton capacity.	Potash, phosphatic products.
Standard Gypsum Corp. (Port Authority Berth No. 223)	Hooker Point	33 ft.	800 ft.	Evacuator and conveyor system; radial stacker.	4.62 acres	Gypsum and salt
Tampa Electric Co.	Big Bend	35 ft.	788 ft.	200 ft. high travelling tower-conveyors system with unloading rate of 4,000 t.p.h.	24 acres	Coal
Tampa Electric Co.	Port Sutton	30 ft.	450 ft.	2 electric travelling unloading towers equipped with straight-line boom, and receiving hopper-combined unloading capacity of 1,600 t.p.h.	Exact size unknown	Coal

Facilities available for smaller vessels.

Operator	Depth	Berthing Space	Product Handled
Bay Con Industries	9 ft.	685 ft.	Shell
International Salt Co.	10 ft.	170 ft.	Salt
Morton Salt Co.	14 ft.	600 ft.	Salt
Paktank Florida, Inc.	12 ft.	500 ft.	Grain fertiliser, materials, potash, caustic soda, salt.

RESTRICTIONS: Draft recommendation is 33 ft. 6 in. No tidal restrictions with exception of loaded vessels into Port Tampa.

43 ft. harbour deepening project underway. Scheduled for completion in 1984.

Existing channels:

Name of Channel	*Width (ft.)*	*Length (naut. miles)*	*Depth MLW (ft.)*
Egmont Channel	600	3.9	36
Mullet Key Channel	500	2.9	34
Tampa Bay Channel Cuts A-F	400	13.6	34
Gadsden Point Cut	400	3.1	34
Hillsborough Bay Cut A, C & D	400	7.6	34
Seddon Channel	300	1.1	34
Garrison Channel	275	0.4	30
Ybor Channel	400	0.9	34
Sparkman Channel	400	1.2	34
East Bay Channel and Turning Basin	2,700	1.5	34
Port Tampa Channel	400	7.3	34
Port Sutton Channel	280	1.0	34
Alafia River Channel	200	3.4	30

MAX. SIZE: Max. draft 34 ft. MLW. No limit on length and breadth.

TUGS: Positions are:

Main port area – right past Beacon No. 35
Port Sutton & East Bay – Beacon No. 29
Port Tampa – Cut "K"
East Tampa – Beacon No. 16

Tug's lines only.

BRIDGES: The Sunshine Skyway Bridge spans lower Tampa Bay. The twin central cantilevered span has a navigation clearance of 800 ft. and a maximum vertical clearance of 151 ft. at MLW.

STEVEDORES: Stevedoring gangs must be ordered approximately 24 hours in advance (before 1700 hrs. on day before needed).

MEDICAL: Advance notice for medical attention not required, but is preferable. All U.S. ports require valid certificate of vaccination (renewable every 3 years) for smallpox.

TANKERS:

Note that part of above terminals use same piers. Most terminals have residue discharge facilities.

DENSITY: Density is affected by local rains due to Hillsborough River. Seasonal variances too great to allow advance prediction.

FRESH WATER: Available all over port and delivered through hoses and meters. Rates of delivery various.

FUEL: All grades and types available, including all types of blended fuel and Bunker "C". 24 hour notice required. All types of lube-oil available with delivery in bulk or drums – 24 hours notice is required. Major oil companies (i.e. Shell, Amoco Oil, Texaco, Gulf, Chevron, Western Fuels, etc.) represented in Tampa. Delivery ex pipe-line, barge or truck.

PRECAUTIONS: No specific precautions other than usual.

GANGWAY/DECK WATCHMEN: Watchmen not necessary, but available when required.

OPENING/CLOSING HATCHES: Longshoremen open and close hatches.

CERTIFICATES:

Documentation Papers.
Load-line Certificate.
Certificate of Safety at Sea (when carrying passengers).
Certificate of Safety Equipment.

CUSTOMS ALLOWANCE: Tobacco, 2 packs of cigarettes per day per man, wine and/or Spirit, no set amount. Each boarding officer has different views (i.e. German and Scandinavian vessels allowed 2 bottles of beer per day per man). Allowances made within reasonable bounds at Master's discretion subject to boarding officer's approval.

CARGO GEAR: No local special safety requirements. Longshoremen and U.S. Department of Labor requirements are uniform over the U.S.

IDENTIFICATION CARDS: Passports required.

CONSULS: The following countries are represented in Tampa:

Belgium
Colombia
Denmark
Ecuador
El Salvador
Finland
France
Germany
Honduras
Italy
Korea
Mexico
Netherlands
Norway
Sweden
Turkey

REPAIRS: All types are possible.

DRY DOCKS: Graving dock: 900 ft. long × 150 ft. wide, 21 ft. from MLW to top of keel blocks; 525 ft. long on bottom × 80 ft. wide, and depth over keel blocks 16-18 ft. at MHW.

Dry dock: 200 ft. long × 65 ft. wide. There are 2 other dry docks besides those listed above.

REPATRIATION: No foreign crew pools in Tampa (located in New Orleans, San Francisco and New York). But crew changes can be made when Master radios requirements to Agent who arranges with local Consul or through crew pool in nearest city named above for applicable country (if no Consul is available in Tampa). American crew pools for all unions in Tampa.

Repatriation available at Tampa International Airport and is handled by Consul or Master.

AIRPORT: Tampa International Airport served by regular airlines and located approximately 5 miles from main port area; 5 miles from Port Tampa and 16 miles from East Tampa.

TIME: Tampa normally on Eastern Standard time with Daylight Saving Time in effect from last Sunday in April to last Sunday in October.

HOLIDAYS: New Year's Day (January 1st); Jan. 15th (Martin Luther King's Birthday); Gasparilla Day (2nd Monday in February, local holiday); Lincoln's Birthday (February 12th); Washington's Birthday (3rd Monday in February); Good Friday; Memorial Day; Independence Day (July 4th); Labour Day (1st Monday in September); Columbus Day; Veterans Day; Election Day; Thanksgiving Day (last Thursday in November); Christmas Eve; Christmas (December 25th).

When any of these holidays fall on a Sunday, they will be observed on Monday following. Work on these holidays by special arrangement only.

POLICE/AMBULANCE/FIRE: Police 223-8521; Ambulance 681-4422; Fire 223-4211.

TELEPHONES: Installation of telephone aboard can be arranged.

SERVICES: Compass adjustments available; radio direction finder; radar repairs; tank cleaning.

SHORE LEAVE: Immigration authorities grant clearance after examination of passport or bona fide seaman's papers.

DELAYS: Delay can be expected in loading phosphate rock (1 or 2 days), and same delay applicable for berthing at elevators. No delays in general cargo loading or berthing and bunkering.

DEVELOPMENTS: The Tampa Port Authority has three new projects recently completed: a roll-on/roll-off dock capable of handling the largest vessels in the trade; a liquid bulk dock to accommodate vessels up to 900 ft. in length with 43 ft. drafts; and a dry dock to accommodate vessels up to 900 ft. in length.

Dredging operations are underway by: the U.S. Corps of Engineers to deepen the main harbour channels from 34 to 43 ft. Completion of the project is scheduled for 1984.

AUTHORITY: Tampa Port Authority.

TEXAS CITY, Texas: 29.22 N. 94.53 W.

(See Plan Book)

DOCUMENTS, PILOTAGE, etc., refer to "Galveston".

RESTRICTIONS: Controlling depth in entrance channel 40 ft. Otherwise restricted by depth available at berth. Vessels enter day and night.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Houston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Available if required.

BERTHING:

American Oil Tanker Docks	depth	36 ft.
Monsanto Tanker Dock	,,	36 ft.
Texas City Oil Docks	,,	36 ft.
Union Carbide Terminal	,,	34 ft.
Import Crude Terminals:		
Docks 40 – 41	depth	40 ft.
Arco Docks No. 11 – 12	,,	40 ft.*

*Arco Dock No. 11 completed December 1979.
Arco Dock No. 12 expected to be completed mid-1980.

MEDICAL: All medical assistance available.

DENSITY: Brackish.

FRESH WATER: Available at all wharves except Union Carbide Terminal.

FUEL: Bunker C available to tankers loading/discharging. All grades available by barge from Houston.

GANGWAY/DECK WATCHMEN: Required only if crewmen detained by Immigration.

CUSTOMS ALLOWANCE: Each man 300 cigarettes or 100 cigars or 1 lb. tobacco. 1 qt. wine/spirits.
CONSULS: See "Houston".
TIME: Central Standard Time. Daylight saving time effective from April to October.
SHORE LEAVE: No restrictions unless detained by Immigration.
SHIPMASTER'S REPORT: February, 1979.
Restrictions: Vessels on maximum draft must be clear of Texas City channel before dark. There is no sailing or berthing during darkness.

For large vessels it is necessary to ballast during discharge otherwise shore connections become too high.
VHF: Channel 13 from sea and Channel 14 for berthing.
Tugs: Usually 6 tugs for vessels on maximum draft.
Tankers: Large tankers dock at Docks 40 & 41 usually starboard side to. On either dock it is not easy loading stores from the dock. 2×12 in. connections.
Consuls: British Consul at Houston.
Customs Allowances: All souvenirs to be collected (items intended as presents) and sealed.
Repatriation: As with all U.S. ports must make out Form I-408 – application to pay off or discharge alien crewman.
Airport: At Houston.
Telephone: Pay telephone at bottom of gangway.
General: Will require ship's gangway abaft of manifold if bottom of gangway is more than 115.5 ft. (35.20 m.) abaft after manifold with a freeboard of 23 ft. or more.
AUTHORITY: Texas City Terminal Railway Co.

TOLEDO, Ohio: 41.42 N. 83.28 W. **(See Plan Book)**

Refer to "St Lawrence Seaway" for important general information.
PILOTAGE: By Seaway Pilots.
RESTRICTIONS: Navigation season from mid-March to end-December, approx. The port is connected to Lake Erie by an entrance channel, depth 27 ft. Vessels size restricted by Seaway locks.
MAX. SIZE: 730 ft. length; 26 ft. draft. Height restriction of 108 ft. above water-line which applies to grain berths only.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Chicago Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Master must give at least 24 hours notice to Commander 9th Coast Guard District, Cleveland, Ohio, of the vessel's ETA at Snell Lock. Also, at least 24 hours notice of ETA at first U.S. discharge port is required. Toledo Port can be contacted through Lorain, Ohio or Port Colborne, Ontario.
TUGS: Available. Not compulsory, but sometimes necessary in bad weather.
BERTHING:
C & O Railway Dock: 2,000 ft. long, 26 ft. depth alongside.
Lake Front Dock: 1,200 ft. long, 26 ft. depth alongside.
Interlake Steel Corporation: 23 ft. depth alongside.
Mid States Terminals: 27 ft. depth alongside.
Cargill, Inc. Elevator: 27 ft. depth alongside.
Port Authority Facility: 4,100 ft. long, 27 ft. depth alongside.
Anderson Elevator: 27 ft. depth alongside.
BRIDGES:

(1) Right and left sides proceeding upstream.
(2) Closed position.
(3) Double leaf.
(4) Clearance in centre in closed position, reducing to 39.5 ft. at sides of span.
(5) Clearance in centre in closed position, reducing to 17 ft. at sides of span.
(6) High-level.
(7) Clearance on centre line of 400 ft. channel, reducing to 104 ft. at channel lines.
(8) Upstream limit of deep-draft navigation.

CARGO HANDLING FACILITIES: 3 grain elevators at Toledo load vessels at 50,000 b.p.h. There are 6 coal-loading machines, each of which can dump 1×100-ton car per minute, also 1 machine which dumps 2 cars simultaneously, for a max. of 6,000 t.p.h. There are 7 Hulett ore machines; unload lake vessels at a rate of 4,000 t.p.h. Bulk liquids handled include petroleum products, industrial molasses, palm kernel oil, liquid sugar, trichlorethylene and perchlorethylene.
CRANES: Located at Port Authority Facility No. 1 – electric gantry cranes 72.5 and 110 tons. Four 25-ton gantry cranes.
STEVEDORES: Provided by Toledo Overseas Terminal, Inc.
TANKERS:
Hocking Valley Pier: 22 ft. depth alongside.
Ashland Oil Company: 22 ft. depth alongside.
Standard Oil Company: 23 ft. depth alongside.
Gulf Refining Co.: 21 ft. depth alongside.
DENSITY: Fresh water.
MEDICAL: All facilities available.
FRESH WATER: Obtainable by pipe-line at all general cargo docks.
FUEL: All grades available at oil piers, and by harbour fuel barge.
REPAIRS: Major repair facilities available.
DRY DOCKS: No. 1: 510 ft.×72 ft. 6 in.; No. 2: 641 ft.×78 ft.
DEVELOPMENTS: Major construction projects by the three riverfront grain operators has increased grain handling capacity from 10.2 million bushels to over 18 million bushels. A new 6 million gallon facility for storage of liquid fertiliser is planned and an additional ship loading dock is under construction.
AUTHORITY: Toledo – Lucas County Port Authority.

VALDEZ, Alaska: 61.07 N. 146.21 W.
Also see "Valdez Marine Terminal".

Located at head of Valdez Arm in Prince William Sound.
APPROACHES: Via Prince William Sound to the Valdez pilot station.
DOCUMENTS: See "Anchorage, Alaska".
PILOTAGE: Pilots board approx. 2 miles North of Busby Light.
MAX. SIZE: Harbour depth over 300 ft. Tides: diurnal range 12 ft. Also see "Berthing" and also see "Valdez Marine Terminal".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
ANCHORAGE: Excellent, close by dock. Bay is too deep.
CUSTOMS: Quarantine, local. Immigration and Customs from Anchorage.
TUGS: Limited availability.
BERTHING: 1. Valdez City Dock: 36 ft. MLLW. 600 ft. long by 40 ft. wide. 2 warehouses, 1 heated, 1 unheated. Stevedore provides equipment which includes fork-lifts and 2×100-ton mobile cranes and 1×150-ton mobile crane. Dock operated by North Star Stevedoring Co.
STEVEDORES: 3 gangs.
TANKERS: *Valdez Dock Co., Petroleum Dock:* Length 200 ft., width 40 ft., depth 36 ft. at MLLW.
Also see "Valdez Marine Terminal".
REPAIRS: Minor repairs only.
FRESH WATER: Available in temperate seasons.
FUEL: Not available.
MEDICAL: 150-bed mental patient hospital; 15 beds for local use; 1 doctor, 1 dentist regularly from Anchorage.
TRANSPORTATION: Air; highway to Fairbanks and Anchorage.

VALDEZ MARINE TERMINAL: 61.05 N. 146.24 W. **(See Plan Book)**

OPERATORS: Alyeska Pipeline Service Company.

The terminal does not provide any tug, launch or pilotage assistance for the berthing or unberthing of tankers calling at the terminal. These services, as well as any other tanker services, must be arranged separately by tanker owners.

LOCATION: The Trans-Alaska Pipeline Valdez Marine Terminal is situated on the Southern shore of Port Valdez.

Port Valdez is a natural deep-water fjord located at the N.E. part of Prince William Sound which provides access from the Gulf of Alaska. Port Valdez is about 12 miles long and 2.5 miles wide, is surrounded by steeply rising mountains, and remains ice free throughout the year. The approach to Port Valdez is by way of Valdez Arm, a deep-water channel with a minimum width of approximately 3,000 ft.

The overland approach to the site, which is close to the mouth of the Lowe river, is by road about 6 miles long connecting the terminal with the Richardson Highway. The town of Valdez is 14 miles from the terminal by this route. The distance by boat across to Port Valdez is approx. 2.5 miles.

The terminal operates 24 hours per day, 7 days per week, throughout the year.

The administrative offices will normally be open between 0800 and 1630 hrs., Monday through Friday. The office telephone number is (907) 835 – 2261.

DOCUMENTS:
Certificate of Financial Responsibility.
SOLAS Safety Equipment.
SOLAS Safety Construction, or for U.S. documented vessels: U.S. Coast Guard Certificate of Inspection.
SOLAS Radiotelegraphy Certificate.
Crew Lists.
De-rat Certificate.
Clearance from Last Port.

PILOTAGE: The Pilot boards off Rocky Point. Arrangements to be made by vessel's Agent.

ARRIVAL ADVICE: Masters of vessels bound for the terminal must advise the terminal as follows:

Last Port ETA: Tankers en route to the terminal, upon departure from their last port of call prior to Valdez, will send a telegram or telex to Alyeska Pipeline Service Company, Valdez, Alaska, Telex No. 090-35-469 (Answerback: Alyeska Valz) advising the estimated Alaskan local time and date of arrival.

72-hour ETA: Not less than 72 hours, unless transit time is less than 72 hours, prior to arrival at Cape Hinchinbrook, tankers will send a telex or telegram to Alyeska Pipeline Service Company providing the terminal with the following information:

a. ETA at Cape Hinchinbrook.
b. Position/course/speed.
c. Estimated fore and aft draft upon arrival.
d. Quantity of ballast to be pumped ashore and grade of last cargo.
e. Quantity of oil to be loaded.
f. Distance from the bow to cargo manifolds.
g. Size, number and type of cargo connections.
   At first call to Terminal. Not necessary on subsequent voyages.
h. Amount of provisions and stores to be loaded.

Final ETA: Tankers will send a final ETA, 24 hours in advance of their arrival. This 24 hour ETA shall be as accurate as possible and tankers will notify the terminal whenever the arrival time changes by more than 3 hours.

Notice of Arrival: After entering the Coast Guard's Prince William Sound Vessel Traffic Service, vessels ready to commence loading or deballasting should give immediate notice to the terminal. This notice is extremely important as it can affect berthing priority.

Coast Guard Notification: Terminal will advise USCG at Valdez of all ETA's received.

AMVER Participation: The notice of arrival requirement to be given to the U.S. Coast Guard Captain of the Port in Valdez, Alaska, can be met if vessels participate in the Automated Mutual-assistance Vessel Rescue System (AMVER). Participation in AMVER will also make the Coast Guard's Prince William Sound Vessel Traffic Service aware of the tankers that will be entering the service.

Initial Radio Contact: Ship-to-shore radio telephone calls can be made to the terminal, (907)-835-2261, 24 hours a day by normal commercial Channels.

RADIO: All times are GMT – following information produced as a "guide" and subject to change.

(4) RCA – Alascom Juneau (WGG 58). Voice (AM) – 2400 kHz — 0830 hrs., 1300 hrs. and 1830 hrs. (local time).

(5) RCA – Alascom Ketchikan (WGG 56). Voice (AM) – 2400 kHz — 0830 hrs., 1300 hrs. and 1830 hrs. (local time).

TUGS: Three 5,750 h.p., twin-screw tugs and two 300 h.p., single-screw mooring launches are on standby at the terminal to provide oil spill containment, cleanup and contingency services and fire fighting services as required by the terminal. The tugs are equipped with telescoping fire monitors and will be capable of providing 3,500 g.p.m. of foam or firewater at 150 p.s.i.g. at an elevation 70 ft. above the tug's waterline. The tugs are equipped with VHF-FM radio-telephone communication equipment. Should tankers desire to contact the tugs, the tugs may be reached by calling on Channel 16 (156.80 mHz).

The tugs and mooring launches are available to provide berthing and unberthing services to tankers calling at the terminal.

VHF: The Alyeska Pipeline Service Company operates a VHF – FM base station in Valdez, Alaska under the call sign "WAB – 952". This base station is maintained for the purpose of transacting company business with either inbound or outbound vessels and is open 24 hours a day. The official language for all communications shall be English.

Channel	*Frequency*	*Use*	*At*
10	156.500 mHz	Intership and Ship to Coast Guard	A – B – C
16	156.800 mHz	Distress – Safety and Calling	A – B – C
	A –	Contingency Management Centre	
	B –	Oil Contingency Warehouse	
	C –	Operational Control Centre	

The VHF – FM marine radio system utilized by the terminal is compatible with the Prince William Sound Vessel Traffic Service which is operated by the U.S. Coast Guard in Valdez, Alaska. The USCG Vessel Traffic Service will have VHF – FM radio-telephone coverage extending beyond Cape Hinchinbrook and including Prince William Sound, Valdez Arm, and Port Valdez. The tugs available at the terminal will also be equipped with VHF – FM transceivers.

TANKER REQUIREMENTS: *General:* Certain requirements of governmental agencies are in effect at the terminal in order to minimize the chances for a pollution incident. These requirements apply to all tankers calling at the terminal.

Operations at the terminal are primarily aimed toward the safe loading of tankers and the prevention of collisions and groundings of vessels that call at the terminal. These aims will be met by insisting upon and utilizing conventionally constructed tank vessels, manned by skilled crews, use of positive vessel traffic control within Prince William Sound and Port Valdez, and use of all traffic advisory and communications services in West Coast ports. The purpose of the following requirements for tankers calling at the terminal is to materially enhance tanker loading and discharge operations and to increase the safety of navigation so that the danger of pollution from oil spills is substantially reduced.

Safe Navigation: Tankers will observe the rules and directions issued by the U.S. Coast Guard as operator of the Prince William Sound Vessel Traffic Service. These rules and directions will pertain to communications check points, ETA's, traffic lane separation, anchorages, one-way traffic, speed, etc.

In addition to the normal instruments used in celestial navigation and piloting (sextant, pelorus, etc.), the following electronic devices must be aboard and in good working order:

a. Fathometer/Depth Sounder.
b. Loran C Receiver.
c. Two Independent Radar Systems.
d. Radio Direction Finder.

All vessels must have a qualified Pilot aboard for the transit of Prince William Sound and Port Valdez.

Communications: Tankers calling at the terminal will be required to have the following communications equipment aboard and in good operating condition:

a. VHF – FM radio-telephone with sufficient Channels and speakers to comply with the Prince William Sound Vessel Traffic Service operating rules and the Bridge-to-Bridge Radiotelephone Act.
b. Radiotelegraph.
c. Portable UHF transceiver will be supplied by the terminal.
d. Single sideband radio.

The portable UHF transceiver shall have at least five Channels which are tuned to the berth frequencies listed.

Additional Equipment: Tankers calling at the terminal will be required to have the following additional equipment:

a. Tankers must carry standard 6 in. hose sufficient to make at least 50 ft. in length for emergency lightering purposes.

b. Accommodation ladders and Jacob's ladders must be of sufficient integrity and free from ice and snow to permit safe embarking and disembarking by the Pilot.

c. Mooring lines must be of sufficient size, strength, and quantity to permit safe mooring of the vessel.

d. Manifold reducers, connectors, and extensions must be made of steel. Cast iron reducers will not be permitted.

e. Tankers which call at the terminal will be required to retain all solid waste refuse aboard the vessel, or use a suitable sewage treatment plant before discharge.

f. All ullage caps will remain closed during loading except during gauging or sampling.

Operational Requirements: The following procedural and operational requirements are listed in order to make tanker Owners and Masters aware of some additional safety and anti-pollution measures in effect at the terminal. These requirements will be restated in the sections pertaining to the pre-loading inspection and cargo loading.

a. No repairs to radars shall be made while a vessel is moored to the loading berth unless authorized by the Terminal Marine Supervisor.

b. The tanker's main CW wireless set must be de-energized and switched off while alongside the loading berth.

c. Tank tops shall remain closed during loading operations. Petroleum vapours shall be vented through mast risers or stand pipes at an appropriate height above the main deck.

d. Ship's crew will assist with connecting and disconnecting loading arms to and from the vessel's cargo transfer manifold. Assurance that the arms are secured properly without damage shall be observed during pre-loading inspection. However, as a convenience the shore crew will aid the ship's crew in connecting loading arms to the ship's manifold as the shore crew will be more familiar with the shoreside facility connection.

e. All sea valves connected to the cargo piping system shall be sealed in the closed position prior to loading oil.

f. Prior to commencement of loading operations, a joint inspection of the vessel and a pre-transfer conference will be held by the Terminal Marine Supervisor and the tanker officer in charge.

g. No repairs that would result in immobilization of the vessel shall be carried out while alongside of the loading berths unless the Terminal Marine Supervisor specifically authorizes such work.

BERTHING: *Berth Priority:* Berth priority and berthing order will be determined by the Terminal Marine Superintendent who will use the general guideline of assigning tankers and berths in the order by which tankers enter the Prince William Sound Vessel Traffic Service and are in all respects ready to discharge ballast or load.

Procedures: Tugs will be dispatched by the Marine Shift Supervisor to meet inbound tankers and to assist in berthing at the nominated berth. The Master shall remain solely reponsible, on behalf of his owners, for the safety and the proper navigation of his vessel. Manoeuvring power must be available on the main engines during berthing operations. The positioning of the tanker's loading manifold in relation to the metal loading arms has to be carried out to a proper alignment, as required by the berth operator.

Maximum Allowable Berthing Velocities: The following table gives the designed maximum allowable berthing velocities for Berth Nos. 1, 3, 4, and 5. The velocities are given in inches per second for the various size tankers in the 40% ballast condition:

	Berth No. 1	Berth Nos. 3, 4 and 5
85,000 d.w.t.	9 in./sec.	12 in./sec.
120,000 d.w.t.	8 in./sec.	11 in./sec.
265,000 d.w.t.	—	7 in./sec.

Note:

(a) 1 knot=20.2 in./sec.

(b) Velocities are given for a line normal (perpendicular) to the axis of the dock or the berthing dolphins.

Mooring Hooks and Mooring Capstans: Each berthing dolphin and each mooring dolphin will be equipped with a mooring capstan and either 2 or 3 quick-release mooring hooks. Berthing dolphins will have double quick-release hooks, and the mooring dolphins will have triple hooks.

The recommended mooring line arrangement diagrams included in the "Plan Book" show the location of these double and triple hooks. Since Berth No. 1 has no berthing dolphins, the 4 double quick-release hooks are located on the loading dock.

These mooring hooks are designed to service 1 mooring line per hook. Thus, no more than 3 lines should be led to any mooring dolphin nor should more than 2 lines be led to any berthing dolphin. These mooring hooks may be released locally.

Each mooring capstan will be mounted on, and form an integral part of, the associated double or triple quick-release mooring hook. This will provide a mooring capstan to assist in securing mooring lines at every berthing dolphin, mooring dolphin, and on the floating berth loading dock.

These mooring capstans are designed to give a minimum running pull of 2,000 kg. (4400 lb.) at a rate of 30 m. (98.4 ft.) per minute. The capstan will be positioned at a height sufficient to prevent mooring lines and messengers from becoming snarled on the quick-release hooks.

Mooring launches will be used to assist the tanker in running mooring lines to the mooring dolphins at each berth.

The terminal will provide suitable messengers for heaving in mooring lines from the launches.

continued overleaf

BERTHING FACILITIES: The major ship loading facilities include four independent loading berths, numbered 1, 3, 4 and 5. Berth No. 1 is a floating berth whereas Berth Nos. 3, 4 and 5 are fixed structures.

	Berth No. 1	*Berth No. 3*	*Berth No. 4*	*Berth No. 5*

Minimum Ship Manifold Spacing 1	—	—	—	—
Minimum Ship Manifold Spacing 2	—	6 ft. 9 in.	6 ft. 9 in.	6 ft. 9 in.
Minimum Ship Manifold Spacing 3	—	6 ft. 9 in.	6 ft. 9 in.	6 ft. 9 in.
Minimum Ship Manifold Spacing 4	—	6 ft. 9 in.	6 ft. 9 in.	6 ft. 9 in.
Quick Disconnect Coupling (QDC) Size (in.)	12	16	16	16
Manifold Size Range Acceptable to QDC (in.)	10 to 16	12 to 16	12 to 16	12 to 16

Note: (1) Although all berths are designed to handle vessels in the 16,000 d.w.t. size, loading arm size requires ship's manifolds to be a minimum of 10 in. in diameter. Normally, vessels less than 45,000 d.w.t. will be handled at Berth No. 1.

(2) Because of mooring dolphin limitations, vessels of more than 180,000 d.w.t. would be acceptable only if their deck machinery and mooring leads allowed an efficient bow and stern mooring line pattern. In addition to this requirement, distance from bow to manifold and prevailing weather conditions would have to be considered before berthing of such vessels would be authorized.

Mooring Lines: Mooring arrangements shall be satisfactory to the Marine Superintendent. All critical moorings shall be of similar size and elasticity. Ropes of different material from those used to moor the ship may be used for positioning the vessel but shall not count as part of the final moorings. It is required that in ships of 90,000 d.w.t. and greater all final moorings shall be wire rope. Nylon tails may be used if fitted to all moorings. Ships should be outfitted with sufficient moorings of similar material for normal moorings. Ropes of different material may be used in emergency.

Moorings While Alongside Berth: Tankers must at all times remain adequately secured alongside the berth. Moorings must be kept at an even tension, avoiding a slack line or varying tensioning situation. Should such a situation arise and not be immediately rectified by the ship's crew after communication with the deck officer, the berth operator will suspend any transfer operation. All vessels fitted with tension winches should apply brakes once the tanker is moored and shall not leave winches in the self-tensioning position.

Emergency Towing Wires: While at a loading berth, tankers will provide emergency towing wires positioned at both the offshore bow and stern. The wires shall be in good condition, have an eye in each end, and be of adequate strength to move the vessel off the dock. The outboard eye shall be maintained at water level, and slack aboard ship shall be secured with small pieces of fibre line.

Mooring Line Arrangement Diagrams: (See "Plan Book"). The recommended mooring line arrangement diagrams are provided in the "Plan Book" as guidelines to acquaint the tanker Master with the general mooring line arrangement for the loading berths at the terminal. These arrangements are indicative of the minimum suggested number of lines and do not preclude the Master from using additional lines.

PRE-LOADING INSPECTION: *Pre-transfer conference and joint safety inspection:* Prior to the discharging of ballast from cargo tanks or loading of oil, a pre-transfer conference and a joint safety inspection will be conducted by the Terminal Marine Supervisor and a responsible deck officer aboard the tanker who will be in charge of bulk liquid transfers aboard the tanker.

The purpose of the pre-transfer conference and the joint safety inspection is to insure that both the terminal and the tanker are suitable and ready for safe loading and handling of oil.

The checklist is designed to meet the following requirements:

a. Section 4.4 of the International Oil Tanker and Terminal Safety Guide which relates to the agreed procedures and safety checks prior to the commencement of cargo loading.

b. Title 46, U.S. Code of Federal Regulations, Section 35.35-30 relating to a Declaration of Inspection for Tank Vessels.

c. Title 33, U.S. Code of Federal Regulations, Section 156.150, relating to a Declaration of Inspection prior to the transfer of bulk liquid cargo from a shore facility to a large vessel.

The checklist is to be taken aboard the tanker by the Terminal Marine Supervisor and shall be used during the pre-transfer conference and the joint safety inspection of the tank vessel to insure compliance with applicable regulations and safety standards. Columns are provided on the checklist for the Terminal Marine Supervisor and the tanker person-in-charge to initial, indicating that the requirements have been met. The original of the checklist shall remain aboard the tanker, and a copy shall be returned to the Terminal Marine Supervisor for subsequent delivery to the berth operator.

Terminal personnel, after giving due notice to the responsible deck officer, are authorized to suspend oil transfer operations if any of the safety rules listed or on the checklist are not observed, or if any other danger is believed to exist.

The Master of the tanker or his representative has the right to shut down loading operations in the event he feels shore operations are unsafe, provided he gives adequate prior notice to the Terminal Berth Operator and Marine Supervisor.

During the pre-transfer conference, the Terminal Marine Supervisor shall provide the responsible ship's officer with a printed sheet detailing description and location of the fire-fighting system and the other emergency systems at the terminal in general and at the berth to which the tanker is moored in particular. The Terminal Marine Supervisor shall also advise the vessel if any unusual or dangerous weather conditions are forecast or expected.

As the shifts on the berth change, the relieving Terminal Marine Supervisor and berth operator shall assure themselves that all conditions pertinent to their responsibilities are as previously agreed to, and shall sign the copy of the Declaration of Inspection. The relieving officer aboard the tanker shall assure himself that the original conditions still exist and shall sign the original of the Declaration of Inspection aboard the tanker. These relieving personnel will then become the person-in-charge of the transfer operation for the terminal and the tanker respectively.

BALLAST: *Ballast Quantities:* The terminal is to be informed of the approximate quantities of segregated clean and dirty ballast in the Master's pre-arrival message. This message should also state where the ballast was shipped and the grade of last cargo.

Ballast Reception Facilities: The terminal facilities will include three 430,000-barrel ballast reception tanks. Discharge of dirty ballast will be by way of the four 12 in. loading arms (Chiksans) on Berth No. 1 and the four 16 in. loading arms on Berth Nos. 3, 4 and 5. These loading arms connect to 20 in. lines at the berths and lead into a 42 in. line connecting each berth to the ballast reception tanks. Although the shore lines are insulated, they are not heat traced and there are no booster pumps to assist in the discharge of dirty ballast.

No. 5 berth is situated approx. 1.25 miles from the reception tanks and has a possible head of 150 ft. Max. pressure 40 p.s.i. (approx.).

In the event of any stripping problems, it is recommended that tanks containing unpumpable ballast be stripped internally to the slop tank and that the Load-on-top procedures be adopted.

Segregated Ballast: Only segregated ballast will be permitted to be discharged overboard. Segregated ballast is defined as ballast water that is introduced into a tank which is completely separated from the cargo oil and the oil fuel system and which is permanently allocated to the carriage of ballast. The deck log book must record all times of ballast discharge and when pumps are started or stopped. This log must also indicate whether or not the segregated ballast is being dropped in the initial stages to sea level. A close watch must be maintained on the overside discharge, with a deck floodlight or portable explosion-proof light being trained on the discharge during hours of darkness. If there are any indications of discolouration or sheen, discharge must be suspended and an investigation must be carried out. If there is any doubt as to the quality of the segregated ballast, all discharge will be made into the shore reception facilities.

Dirty Ballast: All ballast contained in any compartment or tank used for the carriage of oil will be classed as dirty no matter how clean the ballast may appear to be. No ballast carried in cargo tanks may be discharged at sea or in port.

After the connection of the loading arms has been completed and the suitable valves between the arms and the ballast reception have been opened, permission to commence discharge will be given to the responsible tanker officer by the berth operator who will have received approval from the Operations Control Centre (OCC).

Contact between the tanker and the terminal will be by means of the UHF radio that will be placed on board by the Supervisor. As during all transfer operations, there will be a continuous watch near the ship's manifold. In the event of an emergency on the berth, pressing of the emergency alarm will activate the valve closing mechanism.

On hearing this signal, the Crew member at the manifold must stop the ship's ballast pumps to avoid damage by pumping against a closed valve system ashore. (See Emergency Procedures.) On commencing discharge of dirty ballast and at frequent intervals during the discharge, a watch will be kept on the area around the sea valves even though the sea valves have been inspected during the initial safety checks and a seal has been placed on them by the inspecting Terminal Marine Supervisor. Any indications of any oily sheen will necessitate a shutdown of the discharge pumps and an investigation to be carried out before any further ballast can be discharged. Thirty minutes before completion of discharge, the responsible tanker officer will inform the berth operator who will in turn advise the OCC and the duty Terminal Marine Supervisor.

On completion of the discharge and after pumps have been stopped, the loading arm(s) used for dirty ballast discharge must be drained back into the slop tank. On vessels with an inert gas system, gauging will be taken by way of the deck purge pipes to determine that tanks are empty. It is not intended that vessels will depressure cargo tanks for visual inspections, nor should tank lids be opened on any compartment that is not gas free.

All safety regulations applicable during the loading of oil will also apply during the discharge of ballast.

Governmental Ballast Discharge Requirements:

State of Alaska: The State of Alaska requires that the Master of a vessel scheduled to take on any petroleum product or cargo, complete and sign the State of Alaska Department of Environmental Conservation Ballast Water Discharge Certificate Affidavit. To support this affidavit, the Master must be prepared to produce both deck and engine room log books and a legible copy of that portion of the Oil Record Book relevant to the sea passage from last discharge port to the terminal.

Federal Requirements: Prior to loading oil on any vessel, the terminal is required by the United States Department of the Interior to obtain from the Master of the vessel a legible copy of that part of the Oil Record Book that pertains to the voyage of the vessel to the terminal from the vessel's last oil discharge port. This legible copy shall be certified under oath by the Master as being true and correct. If the vessel is not required to maintain an Oil Record Book or similar records, the Master of the vessel is required to provide the terminal with an affidavit, duly sworn to and signed, stating any and all facts bearing upon any discharge of oil or oily water from the vessel during its voyage to the terminal from its last oil discharge port.

Should the Master be unable to comply with the preceding requirement or if it appears from the Oil Record Book or other documentation that a vessel has discharged oil or oily water during its voyage to the terminal, the terminal is required to promptly notify the Department of the Interior's representative, the Authorized Officer. Tankers discharging ballast water or other oily mixtures may be subject to penalties.

OIL CHARACTERISTICS: The predominent oil to be available at the terminal is currently North Slope crude oil. The following preliminary characteristics of North Slope crude oil are given to acquaint the Master and the cargo officers of tankers that will call at the terminal with the general properties of the cargo they will load.

Specific Gravity: 0.888 at 60° F.

API Gravity: 27.8° API.

Pour Point: + 15° F.

Viscosity: 73.5 SSU at 100° F., 169 SSU at 60° F.

Reid Vapour Pressure: Range of likely crude oil vapour pressures will be added, as pumpability is related to vapour pressure.

Sulphur Content: 0.94 per cent by weight.

Waxing: 85-117° F. (begins to precipitate). 50-55° F. (bulk of wax begins to come out of solution).

Mercaptan Sulphur: approx. 20 parts per million.

Loading temperature: approx. 117° F.

Dissolved H_2S: less than 0.2 parts per million.

LOADING FACILITIES: *General:* All loading operations will be accomplished in accordance with the joint inspection pre-transfer conference. Loading operations cannot commence until the vessel has complied with all State of Alaska and Federal Requirements and all required documentation has been provided.

Crew Responsibilities: Ship's crews will be responsible for assisting with handling the loading arms on board the tanker, furnishing and making the adaptor connections, removing blind flanges, and guiding the loading arms (Chiksans) to the appropriate manifold connections. However, as a convenience, the shore crew will aid the ship's crew in connecting loading arms to the ship's manifold as the shore crew will be more familiar with the shoreside facility connection. The Chiksan loading arms and couplings are hydraulically controlled by the berth operator who will be in constant voice communication with the individual responsible for the connection by means of the UHF portable radio that will be supplied to all vessels by the Supervisor.

If required, the terminal will supply 10 in. – 16 in. reducers at Berth No. 1 and 12 in. – 16 in. at Berths Nos. 3, 4 and 5.

Checklist Requirements: After the Terminal Marine Supervisor is satisfied that all the safety requirements have been complied with, permission will be given to commence loading. All operations in connection with starting of loading, switching of tanks, and topping off will be the responsibility of the responsible ship's officers.

Before the maximum pressure or loading rates agreed to at the pre-transfer conference are reached, slow loading will be started and the responsible ship's officer will ensure that the cargo is flowing to designated tanks, thus ensuring that all block valves separating lines are open. On completion of this check and after advising the berth operator, the pressure/rate will be increased to the maximum previously agreed by the Master, or the officer in charge.

A responsible member of the crew will remain near the manifold within sight of the berth operator. This is in addition to the officer on cargo watch who, at frequent intervals, will check the state of loading with the berth operator by means of the UHF radio. This officer will also advise the berth operator when changes in the loading rate are required.

The rate of flow into the tanker can be observed on the large digital readout situated by the berth operator's control position.

Loading Suspension: Terminal: Terminal personnel will suspend loading operations if any of the safety rules are not followed, or if terminal personnel supervising loading operations believe any other danger exists, providing adequate notice is given to the responsible ship's officer.

Tanker: The master is required to shut down loading if he feels that shore operations are unsafe, provided adequate advance notice is given to berth personnel.

Emergency Shutdown: In the event of an emergency (See "Emergency Procedures") the following types of shutdown could occur:

(1) "Dangerous" shutdown.
  (a) All berth block valves close.
  (b) Metering upstream block valves close.
  (c) Berth control valves close – one for each loading arm (in 5, 5.5, 6.0, and 6.5 seconds, respectively, to prevent surge to line).
(2) Fire shutdown
  (a) The preceding valve closures plus fire alarm and start fire pumps.
(3) Emergency shutdown, one per arm, closes control valve only.
(4) Low vapour pressure on any crude tank – initiates (1) preceding.

Pushbuttons for (1) preceding are located in berth area plus one on berth operator's alarm panel.

Pushbuttons for (2) 1 on roadway; 1 on roadway at land; 1 in Power Distribution Cabinet (PDC); 1 in Berth Operator Control (BOC) alarm panel; 1 in loading arm area.

Pushbutton for (3) 1 local at each valve.

Topping Off: Near the end of loading when topping off, the responsible ship's officer will request the gradual reduction of loading rate for topping off operations. This reduction will be achieved by the berth operator slowly closing the berth loading valves. The berth operator will progressively reduce the opening of the berth control valves and will take loading arms out of service, until the point when all berth control valves and block valves are finally closed, when advised by the ship's officer "Shut Down" or "Finished Loading". The loading arms will then be drained into a ship's tank.

Disconnecting: On being satisfied that loading arms and ship's manifold are empty, the order will be given from the responsible ship's officer to the berth operator to uncouple the quick release couplings.

During the period of disconnecting, the USCG Vessel Traffic control Centre at Valdez will have been advised. Tugs will be on standby, and providing that there are no other ship movements that would interfere with sailing, the "Early Departure System" will be carried out. The actual Bill of Lading figures will be sent to the master by W/T or Telex after departure.

COMPLETION/DEPARTURE PROCEDURE: *Topping Off:* As the tanker begins the topping off stage, the responsible ship's officer shall notify the berth operator who will in turn keep the OCC informed as the cargo loading rate is reduced. When the ship's officer estimates approximately one hour remains in the loading process, he shall notify the berth operator.

Tug Assistance: After being notified by the tanker that one hour remains in the loading sequence, the berth operator shall notify the OCC and the Terminal Marine Supervisor. The OCC shall continue to monitor the topping off process and the Terminal Marine Supervisor shall place the vessel's pre-arranged tugs on standby. The tugs shall be alongside the vessel after all loading arms have been disconnected and before any mooring lines are let go.

U.S. Coastguard Vessel Traffic Service: The departure of tankers from the terminal shall be in accordance with the published standard operating procedures for the Prince William Sound Vessel Traffic Service. The Coastguard Operations Centre located in Valdez shall be the directing authority for the operation of the vessel traffic service. The Terminal Marine Supervisor will notify the USCG-VTS one hour prior to the completion of loading and again when loading is complete. When the Terminal Marine Supervisor notifies the USCG-VTS that loading is complete, he will verify the tanker's status to enter the Vessel Traffic Service and will check on any inbound vessel traffic.

SAFETY: After the tanker is secured, the Terminal Marine Supervisor will board the tanker to contact the Master or his representative to:
- provide information on terminal safety regulations.
- agree on designated smoking areas
- advise ship's personnel on "Work Permit" and "Hot Work Permit" procedures.
- present ship/shore Safety Check List.
- present printed sheet describing terminal emergency procedures and fire fighting capabilities.

The following are **some** of the safety requirements.

Warning Signs, Lights, and Signals – Upon arrival at the terminal, a tanker shall display the following notice at the gangway:

WARNING	NO SMOKING
NO OPEN LIGHTS	NO VISITORS

During transfer of oil, and when in the non-gas free condition a red signal (flag by day and electric lantern at night) shall be displayed so that it is visible from all sides.

Blowing tubes – Funnel uptakes and boiler tubes will not be blown while a tanker is berthed at the terminal.

Use of Tools – No chipping or other operation likely to produce sparks will be allowed in any designated hazardous area. The Terminal Marine Supervisor and the responsible ship's officer shall both be satisfied that there is no such activity on the vessel or on the facility.

Flashlights, Hand Torches, Lanterns – Only self-contained battery powered flashlights, hand torches, lamps and lanterns, approved by USCG will be permitted to be used aboard the vessel or on the berths.

Main Engine – While berthed at the terminal, the tanker's main engines, steering machinery, and other essential manoeuvring equipment shall be maintained on standby status to permit the tanker to move from the berth on short notice.

Communications Equipment – A tanker's main transmitter shall be turned off and the main transmitting aerials shall be grounded whenever a tanker is alongside a loading berth at the terminal.

VHF-FM radiotelephone equipment, both portable and fixed, may be used as long as the equipment is permanently installed or intrinsically safe, conforms to FCC marine requirements, USCG requirements, and operates with a power and output of 1 watt or less.

The preceding requirements do not mean that essential servicing of ship's radio equipment cannot take place while alongside a berth. However, suitable arrangements for insuring safety during this work shall be made between the tanker and the terminal, including the securing of an appropriate work permit.

Operating and servicing of radar equipment aboard a tanker berthed at the terminal shall be agreed to by the Terminal Marine Superintendent or Marine Supervisor and shall be the subject of an appropriate work permit.

Vessels Alongside – Unauthorised craft shall be prohibited from securing to a berth at which a tanker is moored.

No craft shall come alongside a tanker while the tanker is handling crude oil or deballasting without the permission of the Terminal Marine Superintendent who shall instruct personnel aboard the craft that smoking, naked light, and galley fire regulations must be observed.

Designated Smoking Areas: Smoking shall be strictly prohibited within an area enclosing all tanker berths and loading docks and on board any tanker while at a berth, except.

(a) in buildings or other shore locations specifically approved for smoking and with such approval notices posted.
(b) on board a tanker in places specified by the Master, and agreed to by the Terminal Marine Supervisor.

Places designated for smoking shall not be outside of any of the accommodation areas. Special precautions shall be taken during conditions that may suggest danger; in particular, conditions of no wind or any indication of unusually high gas concentrations.

The Master is responsible for insuring that all on board are informed of the selected places for smoking and for posting suitable notices.

Only safety matches are permitted in approved smoking areas. The use of lighters is prohibited.

Galley Fires and Cooking Appliances – Galley burners are to be adjusted to insure efficient combustion and to prevent galley stack fires and sparks from incandescent soot. Flues are to be cleaned at regular intervals. When bottled gas equipment is used, the gas shall contain an additive which will give it a distinctive odour. Sufficient fire extinguishers shall always be provided near the galley. Oily rags and fat shall not be allowed to accumulate, and the exhaust fan ventilators shall be kept clean.

While a tanker is at a berth, the use of galley stoves and other cooking appliances with non-immersed elements such as electric hot-plates and toasters shall be permitted provided that the Terminal Marine Supervisor agrees that no hazard exists and that such use is in the galley, in the pantry, or in designated smoking areas.

Work Permits – If repairs are to be carried out on a tanker alongside a berth at the terminal, the responsible ship's officer must discuss and obtain agreement from the Terminal Marine Supervisor on the details of the work to be done. Certain types of repairs will be the subject of written work permits which shall be completed by the responsible ship's officer and authorised by the Terminal Marine Supervisor at the time of the pre-loading inspection check list. These types of repairs include but are not limited to:

(a) Repairs to main engine, steering machinery, or other manoeuvring equipment which might immobilise the tanker.
(b) Repairs to tanker's radiotelephone or communications equipment.
(c) Repairs to radar equipment.
(d) Repairs to galley equipment and cooking appliances.

Hot Work Permits – Any hot work done at the terminal, either on the berth or aboard a tanker moored to a berth must be approved by the U.S. Coastguard Captain of the Port, Western Alaska. This approval will be in the form of a signed Hot Work Permit, issued by the U.S. Coastguard.

EMERGENCY PROCEDURES: Fire: The signal for a fire aboard a tanker moored at the terminal shall be 5 prolonged blasts of the ship's whistle or siren supplemented by a continuous sounding of the ship's general alarm. In the event of a fire within the terminal, the tanker shall be notified by the berth operator and, in addition, the terminal fire alarm will also be sounded.

The initial action required of tankers in the event of a fire within the terminal is to prepare for a shutdown of all loading and ballast water discharge arms. This shutdown will be initiated by the terminal and not by the tanker. In case a shutdown does occur, loading and ballast discharge will not be commenced again until the all clear notification has been received from the Terminal Marine Supervisor.

In the event of a fire aboard the tanker or on the loading berth, the initial actions will consist of shutting down all transfer operations. The standby tug, followed by the other tugs, will be dispatched by the OCC to the appropriate berth and the fire water pump shall be started. If necessary, the tanker will be towed off the berth by tugs, using the emergency tow wires. Each berth is equipped with an independent fire water system which includes a 2,000-gallon-per-minute pump and a liquid foam system. Each berth is also equipped with the following fire-fighting equipment:

(a) 2 fixed foam monitors.
(b) 2 fixed firewater monitors.
(c) 5 fire hydrants.
(d) 3 hose reels.
(e) 1 shore to ship firewater connection including 75 ft. of 2.5 in. hose.

Each berth also has the capability to be interconnected with the tugs or with fire trucks to provide increased fire-fighting capacity. The foam system is designed for coverage of fire on the berths only and is not normally interconnected for use by shipboard firefighters in the event of a fire.

Note: Regardless of any assistance the terminal may render, vessels at the berth are expected to put their own emergency procedures into effect whenever required.

Man Overboard: In the event of a man overboard from a tanker moored at the berth, rescue efforts will be implemented immediately, and the berth operator shall be advised by UHF radio. The Terminal Marine Supervisor shall also be notified by the berth operator. The standby tug and mooring boat shall be advised by the berth operator and shall get underway immediately to attempt the rescue.

Life rings will be in position around the loading berth and also on the berthing and mooring dolphins. In case of a man overboard, the medical authorities will also be alerted by the berth operator.

Oil Spills: The notification requirements for an oil spill are delineated by Federal Law. The Federal Water Pollution Control Act (FWPCA) requires persons in charge of vessels (among others) to notify the appropriate federal agency whenever an oil spill enters navigable waters or the adjoining shoreline. The appropriate agency designated to receive these reports is the U.S. Coastguard which can be contacted on Channel 16, VHF-FM.

Notification of an oil spill shall be passed by the tanker to the berth operator who in turn shall inform the Terminal Marine Supervisor.

The terminal will call other agencies that are required to be notified.

The terminal will provide any available containment and cleanup assistance for any oil spill at the terminal. The terminal will activate its oil spill response procedures upon notification of an oil spill and shall utilise all available personnel, equipment, and resources to limit and minimise pollution.

CHARTS/PUBLICATIONS: The following official charts and publications are recommended for study when planning a voyage to Valdez, Alaska and the terminal:

(a) National Ocean Survey Charts:

Chart Number		*Title*
Old System	*New System*	
8500	531	Gulf of Alaska – Strait of Juan de Fuca to Kodiak Island
8502	16013	Cape St. Elias to Shumagain Islands
8551	16700	Prince William Sound
8520	16709	Prince William Sound – Eastern Entrance
8519	16708	Prince William Sound – Port Fidalgo & Valdez Arm, Valdez.

(b) Nautical Chart Catalogue No. 3 – Alaska
(c) United States Coast Pilot No. 9, Cape Spencer to Beaufort Sea (1964) with current supplement.
(d) Tides Tables, West Coast, North and South America (current year).
(e) Tidal Current Tables, Pacific Coast of North America and Asia (current year).
(f) United States Coastguard Light List, Vol. III, Pacific Coast and Pacific Islands (current year).
(g) Weekly Notice to Mariners published by Defense Mapping Agency Hydrographic Center (DMAHC).
(h) Local Notice to Mariners issued by Commander, Seventeenth Coastguard District, Juneau, Alaska.
(i) Radio Navigational Aids, Pacific and Indian Oceans (Publication No. 117B), published by U.S. Hydrographic Office.

WEATHER: *Wind:* The mountains which surround Port Valdez tend to constrain the flow of air to either an Easterly or Westerly direction. At Valdez Narrows, the predominant directions are Northerly and Southerly.

Jackson Point experiences stronger winds than Valdez Airport; however, light winds (less than 13 m.p.h.) occur about 85 per cent of the time. The prevailing wind directions are S.W. from May through September and N.E. from October through April. The N.E. Winter winds reach gale force but usually do not prevail for long periods. The site is well protected from Southwesterly winds but is fully exposed to the Northeasterlies and to winds coming off Mineral Creek, directly North of the facility, approx. 2.5 miles away across Port Valdez.

The occurrence of winds with speed greater than 19 m.p.h. from any direction is less than 7 per cent throughout the year.

A wind chill factor chart is presented for use in conducting operations during Winter seasons. As indicated, combinations of low temperatures and high winds combine to provide extremely low equivalent temperatures. Outdoor operations under these conditions should be closely supervised to insure that personnel and crewmen do not suffer from exposure or frostbite.

Precipitation: Precipitation is abundant during all seasons with the majority falling during the months July through November. Valdez has an average annual precipitation of 62.37 in. with a mean total of 244.5 in. of snow per year. Greatest snowfall in a 24-hour period was 43 in. in February 1928. Precipitation of an amount in excess of 0.01 in. occurs an average of 170 days per year. Estimate 1 in. rain = 12-15 in. snow.

Temperature: The mean monthly annual temperature is 35.7° F. with recorded extremes of +87° F. (June 1953) and −28° F. (February 1947). The month of January is the coldest with a mean daily minimum of 11° F. and a mean daily maximum of 26° F. The month of July is the warmest with a mean daily minimum and maximum of 45.2° F. and 60.1° F., respectively.

Visibility: Snow or snow with fog are the major causes of reduced visibility during Winter months. At the Valdez Airport, visibilities of 1 mile or less occur 3.7 per cent of the time, annually. Visibilities greater than 5 miles occur 85 per cent of the time.

Tides: The tide at Port Valdez has a diurnal range of 12 ft. and a mean range of 9.7 ft.

Waves: The port is surrounded by mountains and is well protected from the open sea and the wave action within the port is limited to wind-generated waves which are constrained by the fetch available. The maximum calculated wave height is 9.4 ft. from the East with a period of 4.3 seconds. Waves in the order of 6 ft. could occur from the N.W. quarter. An important exception to this is a tsunami or seismically generated wave which can be far in excess of the heights quoted above. Investigations in 1968 showed mean wave heights 3 to 6 ft. in Winter (independent occurence 0.7 per cent of time) and 2 to 3 ft. in Summer (0.1 per cent of time). Berths at the terminal are designed to withstand waves of 12 ft. with a vessel alongside and 20 ft. when vacant.

Ice: Valdez is an ice-free port as far as tanker operation is concerned. Light ice forms along the banks and in the small boat harbour at Valdez, but this has not interfered with small-boat operations.

Currents: It appears that surface currents measured during calm wind conditions in Port Valdez often oscillate with the tide, moving generally in and out of the port with maximum speeds of 0.5 knot. The Easterly (flooding) surface current during a falling tide may or may not persist throughout the year. Although Volume 9 of the U.S. Coast Pilot for Alaskan waters describes the current in Port Valdez as "too weak and variable to be predicted", measurements of surface current speeds typically show maximums of 0.5 to 1.0 knot.

It is requested that inbound tankers keep the OCC advised of weather conditions in the Gulf of Alaska, Prince William Sound, Valdez Arm, and Valdez Narrows in order that accurate information may be passed to outbound tankers.

VISITORS: Access to the terminal is limited to terminal personnel, authorised governmental personnel and authorised visitors with valid reasons for entry onto the terminal site.

Visitors to the Valdez Marine Terminal are requested to make arrangements through the Administrative Office in advance of their arrival at the terminal. Authorised visitors shall be met at the main gate, which provides the only land access to the terminal and is located at the East end of the terminal site, and shall be escorted through the terminal area. All persons passing through the main gate shall sign in and out with the guard. Any visitor who arrives at the main gate outside normal working hours of the Administrative Office and who has not made prior arrangements shall be turned away and requested to contact the Administrative Office during normal working hours.

The guard at the main gate shall ask any visitor desiring to meet a tanker crewman to wait at the gate until the vessel is called and arrangements have been made to meet the visitor.

Small boats and other vessel traffic will not be permitted to dock at the terminal site without the approval of the Terminal Marine Supervisor. Only taxicabs with valid passes will be permitted to enter the terminal site, and any private or commercial vehicles that are permitted in the terminal area will be subject to inspection on entering and departing the area.

SHORE LEAVE: If tanker personnel return to the Valdez Marine Terminal site in such a condition that they might require assistance to insure their safe return to the ship, they shall remain at the main gate until the guard grants them admittance. Should an escort be required, it will be provided by terminal personnel.

All tanker personnel transiting the terminal area will be required to carry their United States Merchant Mariner's Document (USMMD) and company identification of tanker owner for identification. These documents shall be presented to the guard at the main gate whenever tanker personnel enter or leave the terminal site. Should a crewman present himself without these documents, he will be detained and the Master will be called to resolve the matter.

TIME: Alaska Standard Time (150th West meridian) for a zone description of +10(ZD=+10). Local time is modified from the last Sunday in April to the last Sunday in October by the use of Daylight Saving Time for a zone description of +9 (ZD = +9 for Alaska Daylight Saving Time). This time is 2 hours behind that in Seattle and California and 5 hours behind New York.

To avoid confusion, all communications regarding sailing times, sailing dates, arrival times, arrival dates, etc. are to be quoted in Alaska Local Time.

FRESH WATER: Only in cases of extreme emergency can potable water be supplied and in a very limited quantity.

FUEL: Not available.
POLLUTION: U.S. Federal Pollution Prevention Regulations and Federal Water Pollution Control Act to be strictly observed.
TELEPHONES: Pay telephones will be located in the vicinity of each loading berth for the use of ship's personnel.

Telephones will not be placed aboard tankships calling at the terminal.
AGENCY: Alyeska Pipeline Service Company will not act as Agent for tankers calling at the Valdez Marine Terminal. Any requirements for such services as ship chandler, etc. must be obtained through the Owner's appointed ship's Agent. For security, the Valdez Marine Terminal must be notified of the appointed Agent.

VANCOUVER, Washington: 45.36 N. 122.40 W.

(See Plan Book)

DOCUMENTS: 3 copies of following:

Cargo Manifest.
Store List.
Crew Cargo List.
Crew List.

One copy of following:

Clearance from last Port.
Tonnage Tax Certificate.
Copy of Vessel register and itinerary of vessel port by port.

PILOTAGE: When entering from sea (without service of a bar Pilot) vessel or Agent must give notice between hours of 0800 and 1700 and at least 12 hours prior to ETA Astoria. Calls may be placed with Astoria office (325-4532) or at Portland office (228-9325) or by radio to "Colrip Astoriaore". River Pilots board at Astoria in channel in vicinity of Astoria Crossing Lighted Buoy No. 37. Signal for river Pilot is 1 long and 3 short whistles. When ordering bar Pilots, request radio via KLB, Seattle, Wash., about 12 hours before arrival. Address "Bar Pilots, Astoria, Ore.", giving date and time of arrival at lightship. When "Peacock" is on station Pilot boards from small power boat; when "Columbia" is on station, Pilot boards directly from "Columbia". When pilot is boarding from small boat keep engines at about 4 knots speed. Do not change course or speed until signalled by pilot vessel. Vessels having radio telephone contact pilot vessel for instructions on following frequencies: radio phone watch on Channel 16 VHF (156.8 mgc/s) also 2182 and 2738 kc/s. Pilot boat "Peacock" call WS 7217; pilot boat "Columbia" WJ 8200; Astoria Bar Pilots' office (Channel 16) KOK 360. Also see "General-Pilotage" before first U.S.A. port (Albany).
ANCHORAGES: Only designated anchorages on U.S. Coast and Geodetic Charts are at Tongue Point (Astoria), Oreg. 2 in number and designated on Chart 6151 Columbia River, Pacific Ocean to Harrington Point, as 1 Lower Tongue Point and 2 Upper Tongue Point. Additional locations on Columbia and Willamette Rivers where safe anchorages can be made upon advice of Columbia River Pilots. Anchorage in Vancouver harbour by permission of Harbour Master.
RESTRICTIONS: No restrictions on night entry. State of tide and draft restrictions not applicable to vessels drawing less than 40 ft.
MAX. SIZE: No restrictions length and breadth. Depth at Columbia River entry 48 ft. River channel to Vancouver maintained at 45 ft. by 600 ft. Seasonal tidal effect up to 3 ft. at Vancouver.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.
AGRICULTURE: "Agriculture" before first U.S.A. port (Albany).
RADIO: Route ETA cables through KBLITT Seattle, Wash.
TUGS: Normally join vessel at designated berth. Tug lines used at no charge.
BERTHING: No special requirements for berthing and no special arrival times required except under particular circumstances.

4 berths. Total length 2,535 ft. Ro/Ro facilities available.
BULK HANDLING FACILITIES: The grain terminal, owned by the Port and operated by the United Grain Corporation, has about 1,000 ft. (305 m.) of dock available. The 7 vessel spouts load 1 vessel at a time at a combined loading rate of 40,000 bushels per hour. The grain terminal can off-load at 18,000 bushels per hour, and they have a storage capacity for 4,500,000 bushels.
EQUIPMENT: The Port of Vancouver has 3 whirley cranes, 1 of which is rated at 50 short tons at 60 ft. (18 m.) and 15 short tons at 130 ft. (40 m.) the other 2 whirley cranes have a capacity of 34 short tons at 60 ft. (18 m.) and 10 short tons at 130 ft. (40 m.). These 3 travelling gantry or whirley cranes operate on parallel tracks on the face of the dock in conjunction with the double direct transfer tracks.

Bulk materials make up a sizeable portion of the Port's traffic, and consequently, large crane buckets are available for handling these cargoes. In addition, the Port has a special crane bucket for the successful handling of zirconium – a very fine sand material considered a "problem" commodity for efficient and waste-free handling.

The Port maintains a full complement of support equipment. They have 42 lift trucks with 2 – 3.5 ton capacities, 9 lift trucks with 7.5 – 15 ton capacities, 1 lift truck with a 26 ton capacity, along with various straddle-carriers, conveyors, front-end loaders, jitneys – and a range of special attachments and gear for all their equipment (such as prong-lifts for steel coils, grabs and squeezers for paper rolls, push-pull slip sheets for bag goods, cartons and boxes) to handle any special situations or problem with which they might be confronted.
STEVEDORES: Allocation for gangs Mondays through Saturday must be confirmed at 1100 hrs. to the longshore hiring hall. Allocation for gangs Sunday and Monday are made at 1100 hrs. Saturday for both day and night gangs. Same procedure applies to allocation of night gangs, but night gangs may be cancelled by 1400 hrs. afternoon of night gangs are to work.
MEDICAL: Any type of medical treatment can be provided and hospital facilities available. Only inoculation requirement for entry to U.S. is smallpox, except when vessels have called at an area infected by another disease.
TANKERS: 1 berth. 3 × 6 in. pipe-lines to 21 tanks. Storage capacity 85,800 bbls.
DENSITY: Fresh water at all times.
FRESH WATER: Available at all berths delivered through pier-side connections.
FUEL: Viscosity grades of B and lower. No advance notice required. Barging essential.
FIRE PRECAUTIONS: Port fire precautions respecting tankers are administered by U.S. Coast Guard, which enforces shipboard regulations under Code of Federal Regulations, Part 46, Sub-part D, Sections 20 to 40; Police Harbour Patrol, which controls port movements, boards vessels to warn Master regarding harbour regulations, including spilling of oil, etc.; and Fire Marshal, who exercises jurisdiction regarding fire regulations at shoreside facilities serving tankers.
GANGWAY/DECK WATCHMEN: Services at option of vessel Owner/Agent and available through private firms.
OPENING/CLOSING HATCHES: While ship is at dock, opening and closing hatches is work of longshoremen. Ship may open or close own hatches while under way.
CERTIFICATES: Registered tonnage certificate.
CUSTOMS ALLOWANCE: Tobacco, reasonable quantity. Wine and/or Spirit, reasonable quantity.
CARGO GEAR: Valid cargo gear certificate required, acceptable to U.S. Bureau of Labor Standards.
IDENTIFICATION CARDS: Immigration Dept. requires forms No. 595 and No. 31 (Repatriation). Changes can be effected at any U.S. Consulate and are honoured here.
CONSULS:

Austria
Belgium
Costa Rica
Denmark
Dominican Republic
El Salvador
Finland
France
Federal Republic of Germany
Great Britain
Iceland
Italy
Japan
Lebanon
Mexico
The Netherlands
Norway
Republic of Panama
Peru
Sweden
Venezuela

REPAIRS: All types of deck and engine repairs possible.
DRY DOCKS: See "Portland, Oregon".
REPATRIATION: Any arrangements possible for crew changes or other repatriation.
AIRPORT: Airport 10 miles from town, served by 7 regularly scheduled airlines with direct service and/or connections domestically and world-wide.
TIME: GMT minus 8 hours. Daylight saving time becomes effective annually on last Sunday in April through last Saturday in October.
HOLIDAYS: Following holidays are recognised: *New Year's Day; Lincoln's Birthday (Feb. 12th); Washington's Birthday (Feb. 22nd); Memorial Day (May 30th); *Independence Day (July 4th); *Labor Day (1st Monday in September); Columbus Day (Oct. 12th); Veteran's Day (Nov. 11th); Thanksgiving Day; *Christmas Day (Dec. 25th); Statewide Election Days. Other legal holidays may be proclaimed by State or national authority. When holiday falls on Sunday, following Monday observed as holiday. Longshore work performed on any of above-listed days is at overtime, which is one-and-a-half time rate. Days marked(*) are stop-work days, viz., no ships will be worked. This also applies to July 5th, which observed locally on unilateral basis.
POLICE/AMBULANCE/FIRE: Police 693-2555; Fire 693-1441; Ambulance provided by several private firms, but can be obtained through police or fire number.
SERVICES: All services available such as compass adjusting, major or minor repairs either with work barges or at ship repair berths; lay berths available; charts available from private companies; all chandlery supplies available.
SHORE LEAVE: Crew members permitted ashore except where vessel has made first arrival from Communist-controlled port.
AUTHORITY: Port of Vancouver.

AGENT: See "Portland", Oregon.

WHITTIER, Alaska: 60.47 N. 148.40 W.

SHIPMASTER'S REPORT: October 1980.

GENERAL: Whittier is a small port in position 60° 47′ N., 148° 40′ W. The population in October 1980 was 160. There are two hotels, one shop, a school and a post office. The port was constructed between 1941 to 1943. It was developed as a main supply depot for the storage of oil for the Anchorage area and also as a transhipment port for produce from other areas in the United States. There is regular barge traffic from Seattle and other West coast ports with ammunition, food, merchandise and motor cars. All these are carried aboard flat top railway wagons which can be loaded or discharged at any state of the tide. The port is operated by the Alaska Railroad system and there is no shore gear of any kind. Whittier is surrounded by very high mountains and there is no road or footpath in or out. There is a very short landing strip suitable for small aircraft but the normal communication is by rail which goes under the mountains in two long tunnels. The journey takes about 1.5 hours and the timetable is frequent in the Summer when a lot of people visit Whittier for boating and fishing or to get the ferry to Valdez. During Winter however the service is about four times a week, weather permitting.

FRAY BENTOS: 33.06 S. 58.18 W. (See Plan Book)

LOCATION: Km. 95 River Uruguay. On the right bank of the River Uruguay from seaward 213 miles by river from Montevideo or 145 miles from Buenos Aires.
PORT LIMITS: A vessel is considered to have arrived when she leaves the channel and goes to the berth.
DOCUMENTS: Same requirements as for the port of Montevideo.
PILOTAGE: Obligatory, except where bilateral national agreements exist concerning navigation of the River Uruguay, and the Pilot must be taken on board in Montevideo.
ANCHORAGE: Between the channel and the port.
RESTRICTIONS: When the port is closed due to bad weather, also the draft depends upon the depths of water in the "El Marques" and "Punta Caballo" passages.
MAX. SIZE: Controlled only by the draft of the vessel and the length of the berth. Max. draft 26 ft. (FW), water depends upon the river conditions.
HEALTH: Same requirements as for Montevideo.
RADIO: The call sign is CWC 25 "Control Fray Bentos Prefectura".
VHF: Port works on the following frequencies:

a) Channel 16: frequency 156.800 mHz; Usage: Calling-up and safety.
b) Channel 9: frequency 156.450 mHz; Usage: Port operations.
c) Channel 11: frequency 156.550 mHz; Usage: Central Control broadcasts in fulfilment of objectives (Safety PNN).
d) Channel 13: Frequency: 156.650 mHz; Usage: Same as Channel 11.
e) Channel 15: frequency: 156.750 mHz; Usage: Meteorological bulletins and Notices to Mariners.
f) Channel 17: Usage: P.N.N.: Maritime Safety.
g) Channel 68: Usage: P.N.N.: Maritime Safety.

Furthermore, on entering the area between Km. 6 and Km. 165 of the River Uruguay, the vessel must communicate to the Fray Bentos Prefecture Control:

a) flag.
b) name.
c) destination.
d) position.
e) course and speed.
f) max. draft.

And on leaving this area:

a) accident or fire occurred on board the vessel.
b) whether vessel has given assistance to another vessel which is damaged or in difficulties.
c) whether she has sighted any dangerous object to navigation and which is not marked.
d) any serious reduction in visibility.

RADAR: None.
TUGS: None.
BERTHING: There are two types, quays for deep-sea vessels and for coasters, both being of cement and wood.

Type	Deep-sea	Coasting
Length	125 m.	250 m.
Direction	East – West	N.W. – S.E.
Average depth	7 to 8 m.	5 m. – 6 m.
Signalling lights	Green light – West side Red light – East side	
Fresh water	2 connections	3 connections
Electricity	1 point A.C., 3-phase 220 V. South side quay in shed 3 points 220 V. D.C. (cranes)	3 points 220 V. D.C. (cranes)

Also there is the Anglo Quay with a maximum depth of 26 ft., used normally for meat.
CRANES: There are in the port 3 cranes of 3 tons each and 1 of 5 tons which can move about the port. It is possible to use ship's derricks and shore cranes at the same time.
BULK HANDLING FACILITIES: There is a silo with a conveyor belt, having a storage capacity currently of 14,500 tons, and the conveyor has a loading or discharge rate of 100 t.p.h. See "Developments".
SPECIALISED CARGO HANDLING FACILITIES: None.
BRIDGES: None.
STEVEDORES: Can be requested in advance or when the vessel arrives in port. The work is controlled by the following time table: order 0630 hrs., commence work 0700 hrs.; order 1230 hrs., commence work 1300 hrs.; order 1830 hrs., commence work 1900 hrs.
MEDICAL: Doctors and hospital facilities available.
DENSITY: 1000.
FRESH WATER: On the Deep Sea Berth there are 2 connections and on the Coasting Quay there are 3 connections controlled by the ANP. Cost of U.S. $1.20 per 1,000 litres.
FUEL: Not available.
FIRE PRECAUTIONS: Fire Brigade present.
CONSULS: Argentina, others at Montevideo.
REPAIRS: Only minor repairs can be carried out.
DRY DOCKS: None.
SURVEYORS: None.
GANGWAY/DECK WATCHMEN: Same as for the port of Montevideo.
HATCHES: If steel, handled by vessel's crew. If wooden, handled by stevedores.
REPATRIATION: See "Montevideo".
AIRPORT: None, only Montevideo.
TIME: See "Montevideo".
HOLIDAYS: The following dates will be used as national holidays of a traditional character:

1st January; 6th January; Monday and Tuesday of Carnival Week; the 6th week following Carnival, which will be called Tourism Week; 1st May; 2nd November; 25th December.

The following dates will be celebrated as national holidays as they are linked with patriotic exaltation and commemoration.

19th April; 18th May; 19th June; 18th July; 25th August; 12th October.

With regard to the holidays of 1st May, 19th April, 18th May, and 12th October, these will follow the undermentioned plan:

(a) If they occur on Saturday, Sunday or Monday, they will be observed on those dates.

(b) If they occur on Tuesday or Wednesday they will be transferred to the immediately preceding Monday.

(c) If they fall on Thursday or Friday, they will be transferred to the Monday immediately following.

POLICE/AMBULANCE/FIRE: *National Prefecture:* Tel: 321. *Police:* Tel: 201. *Fire Brigade:* Tel. 35. *Hospital:* Tel: 533.
TELEPHONES: Not possible.
SERVICES: None.
SHORE LEAVE: See "Montevideo".
IDENTIFICATION: Seaman's Book sufficient.
DELAYS: Normally there is no delay.
DEVELOPMENTS: Increase in the storage capacity of the silos of the Ministry of Agriculture and Fisheries by 5,500 tons by the end of 1981, and increase of the capacity of the conveyor belt to 400 t.p.h by the same date.
AUTHORITY: National Port Administration.
AGENT: See "Montevideo".

JOSE IGNACIO: 34.54 S. 54.43 W.

SBM: Position 34° 53′ 43″ S., 54° 42′ 45″ W.
PILOTAGE: Compulsory. Pilot boards at the Fairway Buoy in position 34° 57′ 14″ S., 54° 40′ 06″ W.
GENERAL: ANCAP have installed a Single Buoy Mooring, 3,600 m. from the shore in 16.8 m. (55 ft.) depth of water. Vessels of 150,000 d.w.t. can be handled and the average rate of discharge of crude oil is 5,000 cu.m. per hour.

The shore terminal receives, stores and pumps the crude to the refinery at Montevideo.

A River Pilot must be ordered from Montevideo for securing to the buoy, and he remains aboard until the vessel sails.

Five days before arrival, Agents must request free pratique from the Health Authorities in Montevideo, and the Customs, Prefecture and Immigration Officials, from Punta del Este.

MONTEVIDEO: 34.55 S. 56.13 W. (See Plan Book)

Also see beginning of Uruguay section.
APPROACHES: The Roads of Montevideo consist of the Outer Roads situated to the South of the bay and Inner Roads situated outside the Western breakwater.

Both anchorages are very exposed and vessels are recommended to enter the anteport.

The entrance channel has 30 ft.; the channel to Ancap's wharf (La Teja) 30 ft. 6 in. Basins 1 and 2 have a depth of 28 ft. to 31 ft., and the River Traffic Basin, 15 ft. These depths depend on dredging being maintained, but even so vessels often "drag" when on the higher marks; the bottom is fine soft silt.
DOCUMENTS:

Health:
Maritime Declaration of Health.
1 List of Passengers Disembarking.
1 List of Crew Members.
1 Deratting Certificate.
1 List of Crew International Vaccinations.

Immigration:
1 Copy of Crew List.
2 Lists of Passengers Disembarking.
2 Copies of List of Passengers in Transit.

Police:
2 Copies of List of Passengers Disembarking.
1 Copy of Crew List.
2 Lists of Passengers in Transit.

Prefecture:
2 Lists of Passengers in Transit.
1 Visaed Copy of List of Passengers with Port of Origin.
2 Non-visaed Copies of List of Passengers.
1 Passenger List – or Negative – from all ports visited.
1 Non-visaed Crew List.
1 Cargo Manifest for Montevideo.
1 Manifest for Cargo in Transit.
1 List of Inflammable Cargo or Hazardous Goods – visaed or straight.
1 List of Vessel's Data.

Customs:
1 Visaed Manifest
1 Copy of Ballast loaded at each port.
1 Negative discharge statement for each port.
If there is no Consul in previous ports, the last port where there was one.
2 Stores Lists.
2 Lists of Cigarettes and Whisky.
2 Lists of Personal Effects.
3 Lists of Bunkers on Arrival.
1 copy of Passenger List for those disembarking, or negative, and their baggage in the same list (drawn up and signed by the passengers themselves).

Agents:
2 Lists of Passengers Disembarking.
2 Lists of Passengers in Transit.
2 Crew Lists.
2 Stores Lists.
2 Manifests, including Inflammable Cargo.
2 Cargo Plans.

NOTE: The manifest must have a special section with all effects in transit or otherwise, for the free zones of Colonia and Nueva Palmira.

ANTEPORT: The Anteport is to the North of the entrance, between the breakwaters, and has 27 ft., but requires dredging, there not being safe room for more than 5 vessels at present.

PORT: The port is formed by the North side of the Montevideo Peninsula and the "Dique de Cintura", a breakwater running parallel to the coast, about 840 m. distant.

It consists of 3 basins, 2 of which are for ocean-going vessels and 1 for river traffic.

Basins 1 and 2 have a depth of 30 ft., and the basin for river traffic 15 ft.

PILOTAGE:

1. The Pilot must be requested via the Agent 24 hours in advance, giving ETA in the roads by W/T (Cerrito Radio – CWA on frequency of 500 k/cs.). It is not possible to elect a Pilot for the area of the port of Montevideo, except where the vessel exceeds 10,000 tons.
2. On entering into the system of the Control Centres, communication must be made with them, giving the information laid out in the "Basic Rules of the System of Control and Information of Maritime Movements". See "Control" in General Section before first Uruguay port.
3. By VHF on the Channels stipulated in "Basic Rules of the System of Control and Information of Maritime Movements".
4. Channel 11 must be used to communicate with the pilot vessel. The vessel is a powered craft painted reddish orange, with white deckhouse with the inscription "Practicos". During daylight hours, it flies the pilot flag, HOTEL (white and red), and at night it is necessary to have white and red lights indicating "I have a Pilot on board". Where a vessel does not have VHF, light signals must be used to communicate with the pilots' launch.

Should this launch be out of service, Pilots are transported by tugs of A.N.P. and/or REYLA.

5. The Pilot will await the vessel near the Axis Buoy located at Lat. 35° 00′ S. Long. 56° 14′ W.
6. In the event of bad weather the vessel must anchor near the Axis Buoy.
7. To take the Pilot on board, the gangway must be positioned on the side which gives most advantage *vis-a-vis* wind and sea.

ANCHORAGE: Vessels may anchor near the Axis Buoy with a draft of 30 ft. at zero tide. The sheltered anchorage is located in the foreport inside the shelter of the breakwaters. To gain access to it, the Pilot must be on board and the permitted draft will be that specified previously.

RESTRICTIONS:

1. The port is closed when winds are up to 70 km. per hour. However, up to 80 km. per hour the Prefecture may authorise manoeuvres. The port is also closed when there is fog, channel obstruction or any other problem which may make manoeuvring difficult.
2. Vessels will not be handled when there is serious damage to engines, hull or rudder.

MAX. SIZE:

1. The largest vessels operating in the port, are of the LASH type, with dimensions approx. as follows:

Overall length 272.22 m.; Beam 30.48 m.; Draft 28 ft.

2. Tankers which berth at the inflammable dock A.N.C.A.P.:

Overall length: 241.50 m.; Beam 32.33 m.; Draft 28 ft.

With regard to the dimensions of the vessel, the state of the tide and time will be considered, the Pilot will advise the Master of the best measures to adopt.

HEALTH: The procedure is as follows:

1. Request the Owner or Agent to obtain free pratique which will be done via Cerrito Radio Station – call sign CWA.

In the event of there being any suspected illness or fever on board, the vessel must anchor in the roads to await instructions, at the same time communicating this to her Agent/Owner.

RADIO: Cerrito Radio Station CWA operating on 500 kc/s., 421.5 kc/s., 4346 kc/s., 6434.5 kc/s., 8602 kc/s., 12750 kc/s., 17208.8 kc/s and 22563 kc/s.

RADAR: To be installed.

VHF: When the Control and Information Centre of Marine Movement of the Port of Montevideo entered into service, the "Montevideo Pilots" station, operated from the 21st floor of the Tupi Building, ceased to function.

This Control Centre has a range of 60 miles on VHF. It also effects communications by "Phone-Patch" between the vessel and or Agent or Owner; this, from their office or private address.

All the operations of the Centre of Control and Information of Marine Movement of the Port of Montevideo are set out in the booklet "Basic Rules of the System of Control and Information of Maritime Movements".

TUGS: Tugs come alongside in the foreport. Lines are to be supplied by the vessel, and this is not optional. In the event that the vessel has no tug cable, this will be supplied by the tug at a cost of approx. US $47.

BERTHING: The berth will be allocated by A.N.P. and is to be requested by the Agent. Vessels may berth or unberth at any time of the day or night, except when the port is closed or due to lack of available berths. Generally, there are fenders placed along the berths. In the event that the vessel requires this service, it must be requested in advance via the Agent.

When berthing or unberthing, the gangway must not be in position due to the proximity of the cranes.

Anteport: 7 anchorage berths in 28 ft. depth. However in practice there is rarely room for more than 5 vessels to anchor. Basin No. 1: 7 berths, 28 to 33 ft. depth alongside. Basin No. 2: 4 berths, 28 to 33 ft. depth alongside. La Teja: Ancap basin with berths for 2 tankers 30 ft. depth in basin and entrance channel.

Berths are allotted by the Port Authorities in the order of arrival of the vessels and according to their category, as follows:

1. Mail vessels.
2. Regular Line vessels carrying immigrants.
3. Cargo vessels.
4. Sailing vessels.

The Authorities allocate the deposit at which vessel must discharge or load.

Port Authorities give preference at Deposit No. 10 to ships operating with refrigerated cargo from this Deposit; and at Deposit No. 11 (Florida Wharf) to tankers discharging to the pipe-line situated there. Conditional that they vacate the berth within 2 hours notice, to permit berthing a preference vessel, other ships may operate at either berth.

Muelle de Escala – On the pier head, formed by the Southern side of the River Traffic Basin, and running Westwards, a quay has been built, known as "Muelle de Escala", 288 m. long, originally constructed for berthing passenger liners and war vessels, but now only used by cargo vessels, loading and discharging, when there is port congestion. There are no shore cranes and work is very slow, nor are there shore deposits. A fixed heavy lift boom capacity 200 tons is placed at the East end.

The berth is very exposed to wind and swell, and Masters are recommended to take every precaution to ensure their vessels are strongly moored and a lookout kept for changes of weather which, locally, are very sudden.

The depth of water alongside depends on dredging, but generally is over 28 ft.

River Traffic Basin – This basin is situated on the Western side of Pier "A". It is 400 m. long and has a passenger landing station on one side. The opposite side of the basin is used for coastal vessels, but mainly by the Navy.

2 warehouses, called Warehouse "A" and Warehouse "B", have been built on the East side of this basin and are serviced by 3 electric cranes. In addition, there are on the quay a 1.5 and 6-ton steam crane, which are employed when necessary.

These berths can only be used by light-drafted vessels, as depth of water is around 16 ft.

Basin No. 1 – This basin is situated between piers "A" and "B". Its entrance between the "Dique de Cintura" and the pier head "A" is about 150 m. wide. It encircles a total mooring space of 1,093 linear metres and 7 vessels can comfortably berth along the quay walls.

Pier "A" is 501 m. long on the West side; 306 m. on the East side, and 50 m. wide at the Northern pier-head.

On this pier 2 brick and concrete warehouses, Nos. 1 and 2, have been constructed, consisting of a ground floor, 3 storeys and a basement.

On the City side of Basin 1, there are 3 brick warehouses, numbered 3, 4 and 5, consisting of a ground floor of between 17,800 and 19,600 cu. m. capacity.

On the Western side of Pier "B" facing Basin No. 1, there are 2 brick and concrete warehouses, Nos. 6 and 7, with a ground floor and 1 storey having a capacity of 30,174 and 33,140 cu. m. respectively.

In Basin No. 1, berths Nos. 1, 2, 3, 4 and 5 are generally used for the discharge and/or loading of liners running to timetable.

Depths alongside vary, as it depends upon dredging, but generally are 26 ft. to 30 ft.

Basin No. 2 – This basin is situated between Pier "B" and the foot of Florida Street. The entrance to this basin is also about 150 m. wide. It has a total mooring space of 722 m. and it can accommodate 4 vessels

Pier "B" is 294 m. long on the Western side, 328 m. long on the Eastern side, 148 m. at the Northern pier-head and 13 m. wide on the bend at the Western corner of the pier-head.

At the Northern end of pier-head "B", livestock is embarked. This berth is also used for general cargo operations in times of congestion. Moorings must be strong and carefully watched as the berth is very exposed to wash of passing vessels.

There are 2 warehouses on this pier, numbered 8 and 9, facing Basin No. 2, built of brick and concrete, with a ground floor and 1 storey and with a capacity of 33,320 cu.m. each. On the city side, there are 2 warehouses, built of brick, numbered 10 and 11, consisting of a ground floor with a capacity of 15,362 cu.m. each. Warehouse No. 10 carries an additional storey, and is being used for refrigerated cargo. Vegetable oils can also be loaded at Warehouse 11 berth ex-pipe-line from 4 storage tanks each of a capacity around 1,250 tons, in the vicinity.

Depths of water alongside vary, depending upon intensity of dredging but are generally 28 ft. to 30 ft.

Coasting Quay Wall – From Florida Street to Mole F, which is the end of the Port, and over a distance of 1,900 m., there is a quay used for coastal craft, and on part of which a fish-receiving and industrialising plant is being opened; depth in this zone is 15 ft.

A floating dock is also anchored in the N.E. part of this section.

Basin For Inflammables "La Teja". (Also see "Tankers".)

On the North side of the Bay, the National Administration of Alcohol, Cement and Fuels, known as A.N.C.A.P., has a basin with concrete walls for the discharge of tankers arriving with oil to their consignment. This basin is known as the "Darsena de Inflamables", and has 1 berth for tankers on the North side in 30 ft. 6 in. and for liquid gas discharge on the Southern side, max. draft 22 ft., while on the West or land side there is a berth for coastal vessels. Width of the basin here is 147 m., which is the same as the entrance, while the South berth is 248.75 m. long. On the North berth the jetty protrudes 34 m., and is 96 m. long.

Vessels berth bows to shore, and on leaving turn immediately outside the basin, if draft is less than 22 ft., otherwise they must reverse back down the narrow access channel.

The North berth has separate lines for Crude, 10 in. and 12 in. maximum pressure 105 lbs. Fuel Oil, 8 in. and 10 in. with a pumping rate of 300 t.p.h. at temperatures between 40°C and 70°C. Diesel/Gas Oil/Kerosene 6 in. connections and pumping rate of 300 t.p.h. Naptha

Uruguay

GENERAL:

CONTACT WITH CONTROL CENTRES: All vessels entering Uruguayan waters from the Atlantic Ocean or leaving them for said Ocean must contact Control Centres as follows:

a. La Paloma as from Meridian 50° 50′ W. limited by bearing 128° of Chuy Lighthouse (lateral maritime limit with Brazil);

b. Punta del Este, as from Meridian 54° 15′;

c. Montevideo, as from Meridian 55° 30′.

The Control Centres are listening out permanently on Channel 16.

If by any reason whatever the vessel could not make the corresponding communication(s) by radio (VHF – WF – HF) it should immediately send a radiotelegram via "CERRITO" Radio Station to the Montevideo Control Centre (telegraphic address: COMOPRE) with copy to vessel's Agents in Montevideo.

Said message must include: vessel's name, flag, origin/destination, and time passing the unanswering control centre, stating reason for using telegraph.

REGULATIONS: Increased fines became effective in June 1973 in respect of infringements of the Uruguayan Marine Code. There are approximately 119 Articles to the Marine Code, and Owners and Masters of vessels proceeding to Uruguayan ports are recommended to obtain a copy of the Code (which lists port regulations and amounts of fines for infringements, maximum fine being 760 U.R.) prior to arrival. We understand that copies of the Code, entitled "Reglamento Preventivo y Represivo de Infracciones Maritimas, Fluviales y Portuarias", may be obtained from Centro Navegacion Transatlantica, Colon 1486 p. 3, Montevideo.

Freely translated, we give below some extracts of Port Regulations as specifically applicable to Montevideo, but also to all Uruguayan ports in general:

Articles 1 to 8 cover respectively the reasons for setting up this preventive set of regulations; the definition of what a vessel is in terms of the legislation; the establishment and amount of fines (they may be tripled in the event of repeated offences); the fact that very small vessels may only have imposed 10 per cent of the full fine; the jurisdiction for the regulations covering the whole of the Uruguayan coast and river frontage; the stipulation whereby the General Marine Prefecture must send to the Master of the vessel a statement of the offence immediately it is observed and this in triplicate and to the local Agent for the vessel.

The actual information which the form must contain is delineated. Notification of offences can be made after a vessel has sailed, this being to the local ship's Agent by phone and confirmed within 24 hours in writing. All Masters must give written consent to their local Agent, and the Agent must accept this in writing, empowering the Agent to act in the Master's name in all cases of fine payment. The Authorities may delay the sailing of a vessel if they see fit in connection with any offence. Finally, article 8 deals with the right to appeal to the General Marine Prefecture against any fine imposed, this having to be done within 10 days dating from the day following personal notification of the offence.

Articles 9 to 119 cover the specific offences subject to fine and indicate individually the full fine imposable in local pesos.

An abridged summary of each of the articles is as follows: No anchoring within 900 m. of the illuminated buoy in the port access channel.

Vessels carrying hazardous cargo must hoist flags according to the International Code of Signals.

Vessels with anyone on board with contagious diseases must hoist appropriate flag (letters QL).

Flag Q must be hoisted and maintained in position until Health Authority has given free pratique.

All vessels anchoring in the roads, bay or ante-port must take due precautions not to harm or cause damage to other vessels; the fine will be imposed notwithstanding claims for damages from third parties.

Agents of vessels which may wish to anchor in the roads must obtain prior permission from the Marine Authority, specifying vessel's measurements and the reason. If authorised, the anchorage to be used will be notified.

No anchoring at the docks unless justified, and anchors must be raised immediately the reason for dropping them has gone. There must be no delay on the part of vessels in complying with the Marine Authorities instructions to change berth or anchorage.

No tying up to other vessels without Marine Authority permission; no attachment to berths which have not been allocated and no changing of berth without authorisation.

No anchoring in places not authorised by the Marine Authority, the maximum fine being applied should this have caused damage to third parties.

No small craft to be tied up obstructing gangway or quays. Where this is necessary for embarking crew members, passengers, provisions, etc., the small craft must be removed immediately the operation has been completed.

Small craft must not be tied up to buoys or beacons. Vessels must not tie up at buoys or beacons.

Maximum speed of vessels in docks is 4 knots.

Navigation in channels of access to ports is governed as follows:

Maximum speed 8 knots.

Vessels must always keep to starboard.

Vessels must not overtake each other, but where this is necessary they must conform to the International Signal Code.

No anchorage in channels.

No fishing in channels.

Vessels navigating in channels must keep a distance of 1,000 m. from each other.

Vessels must not cross in front of each other in the fore-ports.

All vessels entering or leaving the ante-port or docks, changing berths or anchorages must be assisted by a Pilot and tug, unless specifically given exception to this rule by the Marine Authority.

No vessel must enter port with damage to hull, machinery or rudder unless prior inspected by the Technical Commission of the Mercantile Marine Directorate.

Any vessel springing a leak whilst navigating in the access channel, and which the bilge pumps cannot overcome, must go aground as quickly as possible off the channel so as to leave the channel open.

In case of fire on board whilst navigating in the access channel, Masters must observe usual procedure and give signals accordingly.

The strict use of semaphore signals within port must be observed.

When vessels enter the docks or remain in them, Masters, owners or Agents must request permission from the Marine Traffic Office, and report to the Office of Pilotage, and proceed in whatever form they may instruct. On leaving the same procedure must be followed.

Masters and owners of vessels must see that their vessels do not obstruct or cause harm to port works, beacons, buoys, or semaphores and once tied up they must not slacken ropes without permission of the Marine Authority except under conditions covered by items 1, 2 and 3 of article 64 of the Port of Montevideo Marine Regulations.

No vessel to have badly stowed cargo, excess weight, or evidence of lists due to bad trim of cargo.

Only those lines necessary for tying up to be used. When 2 or more vessels tie up alongside to load or discharge they are all obligated to ensure that the handling of their respective cargoes does not prejudice the working of the others.

Vessels must take proper precautions when loading or discharging raw material, i.e. sand, bones, ash, coal, etc., by placing suitable planks of wood close together to prevent any such material falling into the water.

No vessel to enter docks with the gangway already rigged.

During unloading operations, no goods to be thrown on to the quay. This must be done manually or mechanically.

During discharge operations, cargo must be so positioned on the quay as to leave adequate passage for vehicular traffic, i.e. Police, Fire Brigade, Health Authorities, Customs and Port Officials.

Planks of wood — when planks are used for any operation, they must not be placed in contact with mooring bitts or cables. When work ceases all pieces of wood, ladders, small trucks, etc, must be removed from quay, and those belonging to the ship must be taken on board, this so as not to obstruct the public path along the quay.

When cleaning or washing ships tied up at quays, no rubbish, water or cleaning material must be allowed to fall on the quay.

A very serious offence is the throwing into the water of any rubbish, sewage or other material susceptible to dirtying the water.

Very serious offences are the lightening of ships carrying petrol, crude oil, or the like, likewise the washing-out of tanks, except in authorised zones. The fine is based on the area spoiled by the wrongful discharge.

All ships should have local Agents, otherwise in the case of offences the Master is held responsible and vessels may be detained.

Vessels are responsible to ensure that no damage is made to quay installations by the cargo they load or discharge, and must always leave berths in a tidy and clean state.

Vessels' auxiliary small craft, launches and the like must not hang over the side of the vessel in port, except during operations of launching and reshipping on board, where such operations are conducted at points indicated by the Marine Authority. Such small craft may only be used for the purpose and at the times authorised by the Marine Authority.

Usual regulations concerning carriage of passengers in vessels and heavy fines are imposable for the carriage of passengers or crew members not listed.

Vessels exceeding their navigation limits shown in their Certificate of Navigability are subject to fine.

All vessels must be cleared to sail by the Marine Authority.

Vessels must use their proper name and this must be painted on in letters of minimum of 15 centimetres height and 8 centimetres wide. Letters must be white on black or black on light colour.

Masters, Owners and Agents must report any crew offence or irregularity on board to the Marine Authority.

Vessels in port must hoist the Uruguayan flag.

N.B. It is recommended that Masters correctly establish the proscribed times for raising and lowering the Uruguayan flag, in order to avoid fines.

Vessels must have their gangway equipped with handrails, and the gangway must be clearly lit at night.

All lines to shore must have rat-guards fitted.

When there are hazardous goods on board or when such goods are being worked, the vessel must hoist the International Signal Code letter B, and at night show a red light on the bow masthead, must always have engines in a state of readiness in case of danger, keep two-thirds of the crew on board, keep watchmen and firemen available (the number of whom will be determined by the number of holds containing the hazardous material), must only work with incandescent lights, and keep a Port Pilot on board if the Marine Authority so directs.

Vessels moored at quays must not move propellors, except under the direction of the Marine Authority.

Vessels must not moor in the port access channel. There must be no improper use of the International Signal Code. Signal flags must not be interspersed with flags of nationality.

If a vessel wishes to dress flags over all, or fly a flag at halfmast due to a bereavement on board, the Marine Authority's permission must be first obtained.

The use of whistles, sirens or any other audible signal within the area of the roads, bay, ante-port or docks, for any reason other than justifiable for navigation is prohibited.

Any vessel anchored, tied up to other vessels or to the shore or quays, must show a white light from sunset to sunrise which can be seen at a distance of 500 m.

In the access channel to Montevideo, no more than 4 vessels may navigate at one time — 2 entering, 2 leaving.

Maximum speed in the Montevideo ante-port is 6 knots. There must be no anchoring in the Free Zone, reserved for the manoeuvring of vessels entering and leaving.

At Montevideo there must be no anchoring along the route leading from the Free Zone to Channel "A", between the quay and the pier of the same letter. Also on the route leading from Pier "A" along a line to 100 m. to the North of the end of the West Jetty.

No anchoring in any area less than 200 m. from Pier "A" in a semi-circular coverage, taking as middle point a position half way between Quay "A" and Pier "A".

All vessels must keep to the right or to the middle when there are no other vessels in the vicinity.

International Regulations for the Prevention of Collisions apply, plus the following:

Vessels navigating along the routes established in the anteport or which have to pass directly through the passage between Jetties "A" and "B", must keep to the right when another vessel is coming in the opposite direction.

Vessels which have to cross the North, the South route or directly between Jetties "A" and "B", must ensure that they pass any other vessel at a distance not less than 50 m.

Any vessel navigating under her own power must give way to a vessel under tow by a tug.

Vessels with tugs following routes which cross one another, thereby creating a collision risk, the one passing to the starboard of the other is the vessel which must take the precautionary measures to avoid collision. If, however, the risk persists, the vessel passing to port of the other must also take measures to increase the distance between the two vessels.

No vessels to pass in pairs or in opposite direction between Jetties "A" and "B"; the semaphore signals transmitted by Quay "A" must be observed. If the signal is "vessel entering from the ante-port to the docks", the vessel in the docks, ready to sail, must wait until the incoming vessel has entered.

If the signal is "vessel leaving the docks for the ante-port" the vessel in the foreport, moving towards Jetty "A" to enter the docks, must wait in the free zone, stop engines, keeping to the right, and drop anchor if necessary, until the outgoing vessel is outside and well clear of Jetty "A".

The same regulation applies to vessels leaving the River Dock. In this case, the vessel leaving to Jetty "A" has priority, coming from Docks I and II the first will wait for the second before starting engines.

All vessels navigating in the same direction in the ante-port must keep a distance of not less than 300 m. from each other stern to bow. They must not pass each other or navigate in pairs.

In the event of offences being incurred whilst an Uruguayan Pilot is on board, at the request of the local ship's Agent, the Marine Authority will determine whether the Pilot is responsible for the offence having occurred, and take measures accordingly.

Vessels which load beyond the appropriate load line will be subject to a fine of 1,000,000 pesos.

DOCUMENTS:

1. Required by Vessel

For Customs:

Visaed Manifest and Bills of Lading – see below.

1 Visaed copy of ballast certificate from each port of origin.

1 Visaed negative cargo certificate from each port of call; if there is no Uruguayan Consulate at any of the ports the negative cargo certificate must be visaed at the next port of call where there is a Uruguayan Consul.

2 Copies of Store List covering Deck, Engine and Cabin Stores.

2 Lists of Personal crew effects.

2 Lists detailing total available stocks on board of cigarettes and whisky.

Note: All these lists must be made out in triplicate, original and duplicate to be handed to Customs and triplicate to be kept on board for reference purposes. Store List covering Engine Room stores must include total quantity of bunkers on arrival – *this is most important.*

1 Copy of list of passengers finally disembarking at Montevideo (or negative). Passengers' Baggage declaration forms drawn up by the passenger concerned and signed by each passenger.

For Port Health Officer

1 International Health Declaration, signed by Master and Doctor, if aboard. This is the first document requested by the Receiving Commission, and must be ready for delivery immediately the authorities come on board.

1 Copy of list of passengers finally disembarking at Montevideo.

1 Copy of crew list.

Consular clearances – see note.

Deratting Certificate to be at hand if required.

Vaccination Certificates to be laid out in order of Crew List.

For Immigration Officials:

2 Copies of list of passengers finally disembarking at Montevideo.

1 Copy of crew list.

2 Copies of transit list of passengers.

For Police Authorities:

2 Copies of list of passengers finally disembarking at Montevideo

1 Copy of crew list.

2 Copies of transit list of passengers.

For Port Captaincy (Prefectura):

2 Copies of list of passengers finally disembarking at Montevideo

1 Copy of crew list.

2 Copies of transit list of passengers.

1 Visaed copy of passenger list from port of origin and 2 copies (not visaed).

1 Visaed copy of crew list from port of origin and 1 copy (not visaed).

1 Visaed passenger list or negative list from all ports of call.

1 Visaed crew list from every port of call in which there have been changes in crew.

1 Visaed list of inflammables and/or dangerous cargo.

1 Cargo Manifest for Montevideo.

1 Cargo Manifest for cargo in transit.

1 List of vessel's particulars.

For Agents:

2 Copies of list of passengers finally disembarking at the port.

2 Copies of transit list of passengers.

2 Copies of crew list.

2 Copies of all Stores Lists.

2 Copies of all Manifests of all inflammables or dangerous cargoes.

2 Copies of Stowage Plans and/or Hatch Lists.

Note: The Manifest must have a special section for all effects in transit or otherwise for the free zones of Colonia and Nueva Palmira.

Other Documents

Masters must also have at hand all the usual certificates, such as Freeboard, Classification, Measurement, Safety Equipment, Radio, Fumigation, or certificate of exemption (valid for six months only).

All persons on board must have their smallpox vaccination certificates, while vessels proceeding from recognised endemic or epidemic Cholera or Yellow Fever zones must also have the necessary certificates, or Inoculation or Vaccination. All these certificates will be examined by the Boarding Commission before pratique is confirmed.

In resume, the following number of various documents are needed, plus extra copies where possible:

Crew List: 6 plus 1 visaed form from each port where changes are made.

Passenger List for the port: 10, plus 1 visaed list from port of origin and from each port of call with new passengers.

Store Lists: 5. Separately for Deck Engine and Cabin Stores. Engine List to include Declaration of Bunkers and Lube oils.

Health Declaration: 1.

Baggage Declaration: 2 for each passenger.

Manifest and Bill of Lading: 1 visaed, alternatively Ballast certificate or Negative plus sufficient copies for Agents as per individual needs.

Consular Clearances and Manifest etc. – Great importance is attached to these documents. Consular clearances must cover all ports declared in the Health form by the Master, irrespective of whether the ship has cargo or passengers for Uruguay from those ports. These documents must be carefully checked prior to arrival to make sure that the Health form only shows those ports with clearances and/or cargo or passengers for the Country.

Vessels arriving from Buenos Aires, with no cargo or passengers from previous ports of call for Uruguay, can declare Buenos Aires only on this form.

At first port of sailing, the crew list is legalised by the Consul, and any subsequent changes must be legalised at the port where the change takes place, or if not at the next port of call where there is a Consul.

The Consuls at first and subsequent ports will send, care of the Master, envelopes addressed to the Direccion General de Aduanas (Custom House) and to the Prefecto del Puerto de Montevideo. The former will contain the legalised manifest and stamped Bill of Lading, or a negative manifest, and the latter a Consular Passenger List or a legalised Negative passenger declaration. Such envelopes must be produced for each port as declared by the Master.

A vessel arriving direct from a port or series of ports where there is no Uruguayan Consul will pay the dues on arrival, but without fine.

The fine for non compliance with these regulations is heavy.

2. Required by Passengers

Valid Passport – With or without visa, see below.

Vaccination Certificate – International form against smallpox.

Tourists – Citizens of the following countries can enter as Tourists for 90 days without visa:

Austria
Belgium
Bolivia
Canada
Colombia
Costa Rica
Chile
Denmark
Rep. Dominica
Greece
Great Britain
W. Germany
Guatemala
Haiti
Holland
Honduras
Hong Kong
Ireland
Italy
Mexico
Nicaragua
Norway
Panama
Peru
El Salvador
Spain
Sweden
Switzerland
United States

while citizens of these countries require visas:

Australia
Egypt (ARE)
Hungary
India
Japan
Lebanon
Netherlands Antilles
Portugal
Syria
South African Republic
Thailand
Turkey
Yugoslavia

Citizens of Argentina, Brazil and Paraguay can enter with their own police identity cards.

Tourists in transit, without a visa, are permitted from all countries, provided they have a confirmed outbound passage, and with the exception of European Communist countries.

Consular Visas are valid for 1 year.

Passengers intending to reside in Uruguay must complete all formalities in the respective Consulate before embarking.

3. Store Lists

Separate list for Deck, Engine and Cabin stores must be prepared before arrival, and be ready in triplicate for the authorities with extra copies for the Agents, whose intervention is later needed in any ordering of further stores or in case of difficulties.

The same forms as in use in Buenos Aires are accepted, and the same regulations as to weights in kilos or measures in litres, etc., rule. There are some points of difference, however.

Full quantity of bunkers must be declared. A separate list must also be made, detailing ship's store of cigarettes and whisky.

Agents must be informed of any orders placed for Bonded stores since their signature is required on the documents.

Bonded lockers are sealed by Customs on arrival, and any bonded stores purchased in Uruguay must not be opened or used whilst in port.

PILOTAGE: Also see "Control". Pilotage is compulsory in all river and port zones, except for vessels coming from the East to ports between La Paloma and Montevideo Roads, or entering Montevideo Roads for no commercial reason. All coastal vessels either Uruguayan or foreign are also exempt.

Pilotage Zones.

(1) RIVER PLATE – Comprises zone between imaginary Lines in the East from Punta del Este (Uruguay) and Punta Rasa, on Cape San Antonio (Argentina) and on the West between Colonia and San Isidro (Argentina).
(2) RIVER URUGUAY – From 56.5 km. of Farallon Channel to Uruguayan ports on the River Uruguay.
(3) PORTS – Pilotage zones, comprises limits of each port including its Roads.
(4) S.B.M. at Jose Ignacio.

In the River Plate, Pilots presently board to the South of the wreck of the *Calpean Star,* approximately 4.5 km. South and lying 70 m. West of the dredged access channel.

Several of the pairs of buoys are missing, and only the mid channel buoy indicating the entrance to the access channel, 5 miles South from the port, and the 2 pairs nearest to the breakwaters are operating.

When taking tankers, the port Pilot usually goes out to the 5-mile mark.

There is no more than 30 ft. in the access channel at the moment; dredging is being carried on, but there are only 2 dredgers operating between the channel and the port of Montevideo itself.

The current is across the channel, running at about 1 knot, and changes direction more with the wind than the tide.

Vessels awaiting Pilot should anchor on the West of the channel and South of the *Calpean Star;* there is 24 ft. up to 500 m. West of the channel. The zone to the East of the access channel has submarine cables and must therefore be avoided.

Pilots are ordered through the Agent, and have an up to date communications system installed in their office on the 11th floor of Custom Building.

Permanent watch is kept on Channel 16 VHF, and operator speaks English. It is possible to call "Practicos Montevideo" and ask to be connected by phone to the vessel's Agent's office for last minute instructions, etc.

Channel	Frequency	Channel	Frequency
9	154.50	11	155.50
16	158.00		

The port is closed when wind force exceeds 43 knots or, at night. 37 knots, or if visibility is less than 1 kilometre, but otherwise vessels can enter or sail at any time.

There is also a Telex machine with 24 hour watch, over which messages can be transmitted to Agents out of office hours, over a weekend, for example. Call sign is DGT 843 Pilot CX. This is particularly useful for vessels sailing late from Buenos Aires, and the Office will pass on the message to the corresponding Agency by phone.

All Pilots carry a "walkie-talkie" and can communicate either with their office, the Port Authority or the Semaphore station, using Channel 9 for the port offices and 11 for the Pilot's office, 16 being kept for use with vessels.

Ordering of River Pilots for sailings from Uruguayan River Ports – Although Masters can apply directly for Pilots such applications must be made by telegram addressed to the Practico Mayor Montevideo, it is preferable for them to keep their Montevideo Agent fully informed and leave the latter to order the Pilot.

The opportunity of ordering Pilots at any hour having been discontinued makes it more essential than ever that Montevideo Agents are kept accurately informed regarding expected readiness to sail. Failure to do so will result in unnecessary demurrage being paid to Pilots or delay to the ship concerned.

Pilots for vessels proceeding from sea to a Uruguayan Port on the River Uruguay – A Uruguayan Pilot must be employed to conduct ships from sea to a Uruguayan Port on the River Uruguay.

Vessels must call at Montevideo Roads to embark Pilot and pay the cost of tug to take out Pilot. They can also, alternatively, take an Argentine Pilot at Recalada who will take the vessel to Intersection, where in either case an Argentine river Pilot will board to take the vessel to the Roads of port of destination, where a Uruguayan Port Pilot will come aboard, this being a simpler procedure and all handled by Agents in Buenos Aires (one radio advice).

Vessels from an Argentine Port bound for Uruguayan River Port – Such vessels are normally taken to immediately off port of destination by an Argentine Pilot, but they must be berthed by a Uruguayan Pilot who has to be sent from Montevideo, thus Montevideo Agents must be kept promptly informed of vessel's position to enable them to order a Pilot to berth ship without delay.

Vessels leaving Uruguayan Port for Argentine Ports on the River Parana – Uruguayan River Pilot supplied from Montevideo must be employed for unberthing, and this Pilot takes vessel to the Bravo Channel off Nueva Palmira, where the Argentine River Parana Pilot, who is normally already aboard, takes over.

The Uruguayan Pilot is paid in accordance with tariff to Nueva Palmira plus an unberthing fee and travelling expenses.

CONTROL: Reproduced hereunder is the text of a booklet supplied by Prefectura Nacional Control.

Basic Rules of the System of Control and Information of Maritime Movements

CONTROL AND INFORMATION SYSTEM FOR MARITIME AND PORT MOVEMENT

THE GOALS ARE:

(a) To support the National Merchant Marine and those of other flags to fulfil the goals proposed by the I.M.C.O. and the International Union of Telecommunications.
(b) To serve as a link between Control Towers and to give the Zonal Information and the control and the information of harbour activities.
(c) To coordinate the activities of government and private institutions or Agencies that operate in the harbours of the country with the purpose of facilitating and speeding harbour operations, avoiding delays and inconveniences.
(d) To carry out any other activity specified by the Command. To cooperate with authorities and Government Offices in every field related to its functions.

THE FUNCTIONS ARE:

1. Maintain a complete and effective control of maritime movement in the area covered by the system.
2. Maintain a complete and orderly control of all the manoeuvres (operations) in the ports of the country.
3. Prevent collisions between vessels.
4. Prevent groundings and collisions with port installations.
5. Alert the Air/Sea Rescue and Lifeboat system in case a vessel is in distress, in order to expedite aid.
6. Have plans ready in case of emergency in the ports of the country.
7. Maintain up-to-date the information related to weather, buoying, and all other aids to navigation and other operations in the area.
8. Provide the shipping agencies with up-to-date information, of any other kind of vessels or any other kind of harbour activities to avoid delays or difficulties.
9. Serve all Public or Private Institutions which operate in the ports of the country in order to gather, develop, publish, evaluate, control and coordinate all the pertinent and necessary information for efficient port operations.

CONTROL AND RESPONSIBILITY OF THE SYSTEM

The system belongs to the Uruguayan Navy and is the National Naval Prefecture, which undertakes the following controls in order to ensure its effective work. Each Control Centre is responsible for zones, harbours and their own information.

1. *Zone Control:* Control of ships navigating within the zones controlled by the system.
2. *Port Control:* Control of vessels manoeuvring or operating in the ports of the country, it includes roads and access channels.
3. *Information in each zone:* Supply and receive information to and from Captain in the various zones as to the best and safest manner of navigating their vessels.
4. *Information in Port.* – This service will assist and speed up port operations.
5. *The System.* – It is operated from the tower on floors 11, 12 and 13, of the Naval Headquarters situated in the Port of Montevideo, at Lat. 34° 54′ 07″ S. Long. 56° 12′ 07″ W.

ZONES CONTROLLED BY THE SYSTEM OF MARINE MOVEMENT

It is considered that control reaches approximately 50 miles in radius from each port.

1. *Port of Montevideo (Overseas – Coastal – Fishing).*
   "Alfa" – Control and information of the Zone.
   "Bravo" – Control and information of the Port.
2. *Port of Buceo (Sporting)*
   "Oscar" – Control and information of the Port.
3. *Port of Santiago Vazquez (Sporting and river craft).*
   "Papa" – Control and information of the Zone.
4. *Port of La Paloma (Fishing trawler centre).*
   "Kilo" – Control and information of the Zone.
   "Lima" – Control and information of the Port.
5. *Port of Punta del Este and Piriapolis (Sporting, Fishing).*
   "GOLF" – Control and information of the Zone.
   "HOTEL" – Control and information of the Port(s).
6. *Port of Colonia (Passenger port to and from Buenos Aires).*
   "Charlie" – Control and information of the Zone.
   "Delta" – Control and information of the Port.
7. *Port of Sauce (Coastal port).*
   "Tango" – Control and information of the Zone. Control and information of the Port.
8. *Port of Nueva Palmira (Ocean going – overseas vessels).*
   "Echo" – Control and information of the Zone.
   "Foxtrot" – Control and information of the Port.
9. *Port of Carmelo (Passengers and sporting vessels).*
   "Quebec" – Control and information of the Zone and Port.
10. *Port of Fray Bentos (Overseas, transit navigation international bridges).*
    "India" – Control and information of the Zone.
    "Juliet" – Control and information of the Port.
11. *Port of Paysandu (Overseas vessels – international bridge).*
    "Mike" – Control and information of the Zone.
    "November" – Control and information of the Port.
12. *Port of Salto (Coastal, sporting vessels, passenger service).*
    "Romeo" – Control and information of the Zone.
    "Sierra" – Control and information of the Port.

COMMUNICATION

Channels and frequencies: The following are regulated by the Appendix 18 MAR2 of the Radiocommunications Regulation, which are co-ordinated with those of the Republica Argentina.

Frequency 156.800 mHz – Channel 16 – Calls and Security.
Frequency 156.750 mHz – Channel 15 – Weather Reports and Notices to Mariners.
Frequency 156.650 mHz – Channel 13 – Control and information of the Zone.
Frequency 156.550 mHz – Channel 11 – Control and Port information.
Frequency 156.450 mHz – Channel 9 – Port Operations (Tugs, Pilots, Ships).

INFORMATION FROM THE CENTRES

1. *Routine*
   - a) Notices to Mariners at 1030, 1600 and 2400 hrs. GMT All emergencies will be broadcast immediately.
   - b) Weather reports at 1030, 1600 and 2400 hrs. GMT.
   - c) Gale or storm warnings, serious reduction of visibility, and closure of channels will be broadcast as soon as they are received and will be repeated every 5 minutes past the hour.
2. *Special Information*
   Storm warnings – Navigational Security, and any other information that will facilitate or assist future activities.
3. *To each vessel in navigation (en route):* It is understood that this is for Uruguayan ports:
   - a) Berth Allocated – Berth and which side of.
   - b) Tug boats which will assist (it is understood that there can be private and official tug boats assistance).
   - c) The Pilot who will assist.
   - d) Information from the Agent as to the Programme of Operations.
4. *To the Shipping Agencies*
   - a) The position of the vessel.
   - b) Estimated arrival time (ETA).
   - c) Cargo conditions.
   - d) Time at which Pilot embarked.
   - e) Time of docking (coming alongside, tie-up).
5. *To the National Port Administration (Port Authority), (ANP).*
   - a) Arrival time of each vessel (delays or advances on ETA).
   - b) Tug movements.
   - c) Information to the Captain regarding his cargo or possible change of berth.
6. *National Naval Prefecture of Argentina (Ponton Recalada Pilot Station) for Argentine River Pilots – (vessels going up river).*
   - a) ETA – Vessels proceeding up river to Buenos Aires or to the Coastal Regions (Uruguay and Argentina).

INFORMATION THE CENTRES SHOULD GET

1. *Ships.*
   - a) Position on entering each zone: i.e. Lat., Long., course, speed and deepest draft.
   - b) ETA at Pilot station buoy (Boya Eje) or as the case may be, at Recalada Pilot Station (ship's proceeding up-river).
   - c) Any useful information with regard to the ship's navigation.
2. *Pilots.*
   - a) What is specified in the General Pilot Regulations.
   - b) Time of embarkation and disembarkation.
   - c) Request from the Master for change of anchorage, berth, etc.
   - d) Information regarding any possible difficulty in the pilotage.
3. *Owners or Agents*
   - a) Shipping Movements – Overseas and Coastal.
     - (1) Monthly list of expected arrivals.
     - (2) List of ship arrival time 24 hours in advance to ensure efficient vessel operations.
     - (3) Information regarding earlier arrivals or delays of vessels.
4. *From the National Port Administration (Port Authority) (ANP).*
   - a) Berthing arrangements should be set before 1700 hrs. the day before.
   - b) Tugs and launches on duty and on stand-by.
   - c) Overseas and coastal ships sailing schedules.

IN ADDITION:

The Centres will act in the same manner as the Airport Control Tower: each and every vessel or craft in spite of having been cleared by the *Maritime Authority (Port Control – Prefecture)* must request permission from the Control Tower to move. This permission will expire automatically 15 minutes afterwards if the vessel has not started to move.

PUBLICATIONS

The Control System and information is ruled by the Published Maritime Information.

The P.M.I. has four divisions:

- i) Harbours in Montevideo, Buceo and Santiago Vazquez.
- ii) Harbours in Colonia, Sauce, Carmelo.
- iii) Harbours in La Paloma, Punta del Este, Piriapolis.
- iv) Harbours in Nueva Palmira, Fray Bentos, Paysandu and Salto.

The Montevideo Control Centre publishes:

- a) A monthly list of ships coming in to Uruguayan harbours.
- b) A daily bulletin of incoming, outgoing and operating ships in Uruguayan ports.

RADIO CHANNEL SHIPS MUST KEEP ATTENTION

1. Vessels will maintain attention to Channel 16 from the moment they enter the Zones of the System.
   These watches will be maintained until they enter the port, or are tied up or moored or have left the above mentioned Zones.
2. Should a vessel not be able to listen-out on Channel 16 for whatever reason, then the vessel with due advice to the Control and Information Centre must listen-out on Channel 11 or 13.
3. In zones "A" and "B" vessels will communicate with the Centre through Channel 11 – eventually Channel 13.

LANGUAGE

The personnel of the Centre use Spanish. Those vessels whose possibilities of communications in this language are limited may use English. If the difficulties continue they should make use of the International Code Groups, Word/Letter/Number Cards, or the Q Code.

CONTROL AND RESPONSIBILITY OF THE CENTRE OF THE PORT OF MONTEVIDEO.

1. The Centre of Control and Information of Shipping Movements pertains to the National Naval Prefecture. To attain its objectives it carries out the following controls:
   - a) *Zone Control* – Control of the vessel's navigating in the zones allocated to the Control Centre.
   - b) *Port Control* – Control of the vessel's manoeuvring within the port including roads and access channels.
   - c) *Zone Information* – Information to vessels navigating in the zone controlled by the Centre. Advice to captains about navigation conditions for the safety of their vessels.
   - d) *Port Information* – Port information to assist and expedite operations to avoid delays.
2. The Master of the vessel will at all times be in command of his vessel, will maintain authority and responsibility in accordance with the Commercial Code.

MOVEMENT CONTROL ZONES

1. The Maritime Movement Control Centre of the Port of Montevideo comprises the following:
   - a) *Zone "Alfa"* – Zone of the Rio de la Plata situated between the Uruguayan Coast and meridians 55° 30′ S. and 57° 21′ W.
   - b) *Zone "Bravo"* – Zone of the Rio de la Plata that is comprised between the meridians which cut Punta Sayago and Punta Brava, the Coast and Lat. 35° 01′ S.
     It also comprises access, (entrance) channel to the Port of Montevideo, Anteport, Basins, Channel of Basin for Inflammables (ANCAP). Sea Chart.
2. The Control and Information Centre of the Port of Santiago Vazquez comprises:
   - a) *Zone "Oscar"* – Zone that is comprised between meridians 56° 00′ and 56° 09′ W. and Lat. 34° 57′ S.
3. The Control and Information Centre of the Port of Santiago Vazquez comprises:
   - a) *Zone "Papa"* – Zone that is comprised between meridians 56° 20′ and 56° 40′ W. and Lat. 34° 56′ S. and the Coast. It includes the Port, anchorages and adjacent waters.

CONTROL AND INFORMATION CENTRE

1. The Centre is controlled by the National Naval Prefecture on floors 11, 12 and 13 of the Tower of the Naval Headquarters (Comando General de la Armada) – Aduana Building Lat. 34° 54′ S. Long. 56° 12′ 07″ W.
2. The call sign of the Control Centre is CWC39 Control Centre of the Port of Montevideo Prefecture, henceforth to be known as Montevideo Prefecture Control (Control Montevideo Prefectura).
3. The call sign of the Port of Buceo is CWC, henceforth to be known as Buceo Prefecture Control (Control Buceo Prefectura).
4. The call sign of the Control Centre at Santiago Vazquez is CWC38 henceforth to be identified as Santiago Vazquez Prefecture Control (Control Santiago Vazquez Prefectura).

COMPULSORY
COMMUNICATIONS (MESSAGES) FROM VESSELS

Vessels navigating in zone:

1. *Alfa:* Should inform the Control Centre as follows:
   - a) On entering the Zone.
     Flag
     Name
     Destination
     Position (Lat., Long., Time)
     Course and Speed
     ETA Pilot Buoy
     Maximum Draft (Deepest Draft)
   - b) During navigation, position:
     Passing Flores Island
     Passing Pilot Buoy (If possible coming up to Pilot Buoy).
     If anchoring: the position and the reason for it.
   - c) On leaving the Zone.
2. *Bravo:* Anchoring or heaving anchor in the Roads.
   - a) In navigation (passage) through the entrance channel.
     They will inform, provide the port as follows:
     Passing "Calpean Star"
     Anchoring in anteport
     Docking or undocking in basins (docks)
     Anchoring or heaving anchor in the zone.
3. *In all Zones*
   The following must be reported:
   - a) Accidents or fire on board.
   - b) Any assistance rendered to any other vessel
   - c) The sighting of any type of hazard to navigation which is not buoyed or charted.
   - d) Any serious reduction in visibility.

WE EMPHASIZE THAT!

All the ships coming from the Atlantic Ocean to Uruguayan Waters must report their data:

To La Paloma Control Centre (call signal "Control La Paloma") starting from 50° 50′, limited by azimuth line 128° of Chuy Lighthouse (Lateral maritime limit with Brazil).

To Punta del Este Control Centre (Call signal "Control Punta del Este") starting from 54° 51′.

To Montevideo Control Centre (call signal "Control Montevideo"), starting from 55° 30′.

Ships navigating through Uruguayan Waters to the Atlantic Ocean must report their data:

To Montevideo Control Centre (call signal "Control Montevideo") starting from 56° 20′.

To Punta del Este Control Centre (call signal "Control Punta del Este") starting from 55° 30′.

To La Paloma Control Centre (call signal "Control La Paloma") starting from 54° 15′.

We remind you that we have a Control Centre in Colonia Port and ships should call whenever it is possible in its proximity.

If for any reason communications cannot be obtained with Punta del Este and La Paloma Centres, cables must be sent to the Agent after passing La Paloma, giving date/hour of passing Punta del Este and La Paloma in order to be presented to Montevideo Control Centre.

HEALTH: In order to be able to enter port and berth without delay, the Authorities accept a radio, cable or telex request, couched in the following terms (messages must be sent in Spanish).

Vessels arriving from elsewhere

Capitan .... solicita libre platica
here the name of the vessel
informando proceder de Buenos Aires, siendo su escala anterior
....
here a port in another previous country which could be Santos, Valparaiso, Capetown, etc.
ondicion sanitaria buena ....Capitan
here the name of the Master

Vessels arriving from Buenos Aires

Capitan .... solicita libres platica
here the name of the vessel
informando proceder de..
here a port of origin, say London – Liverpool – San Francisco – Rijeka – Kotka – Tokyo – Oslo, etc.
siendo su ultimo puerto ....
here say Santos – Valparaiso – Capetown, etc.
condicion sanitaria buena ....Capitan
here the name of the Master

There have been cases of delay in delivery of radio messages, even though passed on by phone, but the original message must accompany Agent's request for free pratique, hence it is advisable to use cable or telex services if possible. Messages must be sent at least 24 hours ahead, and changes in ETA advised.

Although it is possible to take pratique in Uruguayan River ports, there is frequently delay there, and since vessels must enter Montevideo to pick up the river port Pilot also, it is advisable in these cases to ask for pratique at Montevideo as above, and the order from Sanitary Authorities granting Free Pratique will be handed to the Pilot to take on board with him.

In no case, however, does the granting of pratique by radio modify the inspection in port, where the usual commission must be the first to go on board.

Illness on board – Any private doctor attending a patient on board must immediately inform the Sanitary Inspector should the disease be contagious.

No patient can be landed without the consent of the doctor of the Health Department with the exception of accident cases that require immediate medical attention, and even in those cases the Health Department Doctor must be informed in order to issue a Sanitary Pass for the Hospital where the man was taken to.

If a Captain does not report the existence of illness on board he is liable to fines which are double if patients land without the consent of the Sanitary Authorities.

RADIO:

Notice to Mariners

Official Uruguayan Notices to Mariners are transmitted in Spanish only preceded by the signal TTT, the number of the Notice, letter R, then contents and are repeated for 15 days. Should there be no Notices to transmit, the wording "no hay avisos para navegantes" will be radioed.

Punta Carreta CWF 2768.5 kc/s. A 3 0.4 kW. at 0003, 1403 and 1903 hrs. (after the weather forecast).

Cerrito CWA on 4346, 8602,12750, 17208.8 A1, 1.5 kW., also on 421.5 kc/s. A1 and A2 5 kW. at 0000, 1400 and 1900 hrs. (after the weather forecast).

Montevideo CX 16850 kc/s. A3 10 kW. at 1302 and 1602 hrs. on working days, at 1700 hrs. on Sundays.

Montevideo	CX 6	659 kc/s.	A3 2.5 kW.
	CX 26	1050	A3 all transmit Notices to Mariners at 1600.
	CX 38	1290	A3 5 kW.
	CXA 4	6125	A3 10 kW.
	CXA 6	9620	A3 20 kW.
	CXA10	11900	A3 20 kW.

Weather Forecast

A weather forecast is transmitted in Spanish to cover 3 zones.

Reference AAA 830 is the Coastal area from 30° S. 50° W. out to 30° S. 46° W. and down to 33° 30′ S. 53° W. and 35° S. 49° W.

AAA 860, River Plate zone from 33° 30′ S. 57° W. to 35° S. 49° W. and down to 35° 30′ S. 57° W. to 39° S. 53° W.

AAA 870 Coast of Argentina from 35° 30′ S. 57° W. to 39° S. 53° W. and down to 41° S. 62° W.

Details of all 3 zones are transmitted as follows, valid for 24 hours.

CWA on 421.5 A1 5 kW. at 0001, 1400 and 1900 hrs.

CWF on 2768.5 A3 0.4 kW. at 0005, 1405 and 1905 hrs. and in A1 over 4346 kcW. 8602 kc/s., 12750 kc/s. and 17208 kc/s.

Time Signals

Are transmitted from 2 stations in Montevideo at 1500 and 2000 hrs. The hour is indicated by 6 dots preceded by a ten second dash and a 5 second silence. The last dot indicates the hour.

CX 6 on 650 kc/s. A3 25 kW.
CXA 6 9620 kc/s. A3 20 kW.

Standard time is GMT less 3 hours.

Direction Finding

There are 2 radio beacons specially for maritime navigation. Both operating on circular sweep from the lighthouses at Cape Polonio and Isla de Lobos.

Cape Polonio at 34° 24′ 00″ S. and 53° 47′ 45″ W. frequency 295 kc/s. A2 range 380 miles, and 500 kc/s. A1 A2.

The signal is "P" repeated 3 times in 10 seconds followed by 18 dashes in 30 seconds, repeat "P" 3 times and 10 seconds silence total period 1 minute. This is repeated 4 times after 5 minutes silence, total 10 minutes.

In good weather transmission must be requested from CWM 21 on 500 kc/s. A1 A2. In fog, there is continuous transmission from the hour.

Isla de Lobos 35° 01′ 33″ S. 54° 53′ 17″ W. frequency 300 kc/s. A2 range 380 miles. The signal "L" is repeated 3 times in 10 seconds, followed by 18 dashes in 30 seconds, repeat "L" three times, silence 10 seconds. Total period 1 minute, repeated 4 times, then 5 minutes silence total period 10 minutes.

In good weather this transmission must be requested from CWM 26 on 500 kc/s. A1 and A2.

In fog transmission is continuous from 05 minutes in each hour.

There are also the following airbeacons which can be used.

		S.	W.	kc/s.	
Colonia	COL	34° 27′ 33″	57° 45′ 49″	203	A 2 0.075 kW. cont.
Montevideo	CAR	34° 46′ 15″	56° 01′ 28″	380	A 2 0.05 kW. cont.
	CRO	34° 48′ 55″	56° 01′ 45″	305	A 2 0.05 kW. cont.
	CRR	34° 49′ 50″	56° 00′ 15″	280	A 2 0.05 kW. cont.
Gral. Artigas	GA	34° 45′ 00″	55° 58′ 00″	260	A 2 0.05 kW. cont.
Punta del Este	CB	34° 55′ 00″	54° 55′ 00″	325	A 2 occasional only.

GENERAL INFORMATION:

River Uruguay

Rises in Brazil, and later separates Argentina and Uruguay. Its right bank is generally low, wooded and swampy, the left bank high and hilly. Preparatory work has commenced on a large hydroelectric dam to be built at 332 km., above Concordia, which will take some years but will contribute to a regularisation of the river, which at present rises and falls twice every year, with the varying rainfall seasons in its basin, so that approximately half the year the water is low, usually from January to April and again in August. However, the wind also affects the depth of the water as in the River Plate, so that any seasonal forecast is impossible. A safe year round draft to Concepcion del Uruguay can be taken at 20 ft. 6 in., though vessels from time to time load to 22 ft. 6 in.

The Ministry of Marine publishes fortnightly a bulletin with all information on depths of water in the channels, as well as of changes in buoys, lights, etc.

Two new bridges communicating with Argentina now span the Uruguay river at Fray Bentos and Paysandu. The bridge at Fray Bentos has a clearance of 36 m. over zero, and a main span of 220 m.

CARGO

Movement of Cargo

Once stevedores have come aboard, no cargo, either for the port or in transit, may be handled by the crew, as otherwise the vessel will be called on for high extra wages to stevedores. This also affects the lashing of transit cargo on deck.

Stevedores will not work in the rain, except when loading meat, earning double wages while doing so. They can also be persuaded to handle baggage or mail.

When handling dusty cargo in general, or which gives off ammoniacal, nicotine, or organic emanations, masks must be provided for stevedores' use.

Overcarried Cargo

Cargo for Montevideo is often overcarried to Buenos Aires with the consequent delays in delivery and expenses for the vessel. Holds should be carefully inspected as soon as discharge is said to have been finished to avoid possible overcarrying.

Clean Receipt

Agents will advise if they wish to receive any cargo for which a clean receipt cannot clearly be given, otherwise the cargo should be rejected. Mate's receipts cannot be claused to cover any damage from rain, wetting or other causes which might be sustained after the cargo is received on ship's tackle.

Bulk cargoes falling or drifting into water or on dock

When handling bulk cargoes vessels must place between the vessel and the dock side a wooden scaffolding, with lateral boards, or strong canvas to collect all material which is liable to fall into the water or on to the Dock during handling. There is a heavy fine for non-compliance.

This should be remembered when writing charter parties, especially under FIO conditions, as this should be for account of shippers or receivers.

Delivery of cargo from vessels

The cargo is discharged direct to Fiscal Warehouses, to lorries, lighters or wagons. When the cargo is delivered to Fiscal Warehouses, receipt for this is given to the vessel's Agents by the Custom House official in charge of the Warehouse. If discharged to lighters the lighterman obtains receipt from the Custom House official once the cargo is received in warehouse. When the cargo is delivered direct to Consignees' lorries, the receipt is given by special Custom House officials called "Cargo Receivers".

The goods are delivered by the Custom House officials to the Consignees against the presentation of the "transferencia" (transfer ticket) signed by the Agents of the vessel. The Agents sign the "transferencia", extended on stamped paper, against the Original Bill of Lading, which must be legalised by the Uruguayan Consul at the port of loading.

The steamship Agents must keep a special register of all "transferencias", and are responsible to the Authorities for keeping this register. Agents must retain Original Bill of Lading for cargo discharged, as it must be shown to the Customs Authorities immediately if demanded.

When the Consignees have not received the original documents and they wish to take delivery of the goods from the Custom House they must present a Bank guarantee, drawn up in accordance with the form approved by the Shipagents Association.

Cargo manifested to this country in transit to other countries without documents for Uruguay may not be re-shipped to other countries without government permission.

Marks on goods imported to Uruguay

By a Decree dated 30th January 1939, the Uruguayan Government decided that:

"Packages entering Bonded Warehouse, excepting those containing provisions or beverages, and excepting also 'Barraca' articles, shall be marked with the gross weight, the nett weight and corresponding measurement, in a clear and legible manner. These marks may be either 'fire-branded or printed'.

"The 9th August 1939, the Customs Authorities requested that marks and numbers of cases entering Montevideo warehouses should be placed on the extreme ends".

The Customs Authorities have also made known that it is necessary for the packages entering the warehouse to show their weight and measurement in the decimal-metric system.

The inspection of potato cargoes can be effected on board the carrying vessel, and if found in good sanitary condition, can be discharged direct to shore.

Opening and Closing of Hatches

This can be carried out by either crew or stevedores, and hatches must be kept closed when not in use.

Shipments of Meat

These are controlled by the Ministry of Agriculture, whose inspectors check ships' holds before shipment can commence. Holds must be clean and disinfected and temperature controlled to minus 1° to a maximum of plus 1° Celsius for chilled meat, or minus 10° for frozen meat.

Chilled is to be hung on hooks adjustable for height and space and stow of frozen must give a uniform distribution of weight. Alternatively, special cuts are packed and shipped in cartons.

Containers

Use of containers is very limited, since these must be opened up and emptied on the dock alongside, or even on board the vessel. The container itself is considered as part of the vessel's gear, and must be re-shipped without delay.

On rare occasions the Armed Forces have had containers moved out to their barracks.

The Port Authority is buying a crane to handle containers of 8 ft. × 8 ft. × 20 ft. and a maximum loaded weight of 44,800 lbs.

Consular Dues

All ships arriving at Montevideo must pay Consular dues, with the following exceptions:

Ships that due to a change en route, or by special call of their Agents in Uruguay, during passage, arrive at Montevideo with the sole purpose of receiving orders, as long as no commercial operations are effected.

Ships arriving in distress and which leave port without effecting operations.

Ships arriving for the sole purpose of landing or embarking Pilot.

The Ministry of Foreign Affairs consider bunkering as an operation, therefore ships calling at Montevideo for bunkers must pay Consular dues.

Consular value of the Uruguayan Peso – For the payment of fees abroad, the Executive Power will fix periodically the respective values of the peso, in accordance with exchange fluctuations.

Hours of Attendance at the Uruguayan Consulates – The Office hours of the Consulates will be those fixed by the Government in agreement with the Consuls in each country, endeavouring in each case to have the same working hours as those of the Custom House and other Public Offices of each City. Outside these hours, overtime is charged.

Consular dues on Bills of Lading – When vessels load cargo for Uruguay at ports where there is no Uruguayan Consulate, these dues are collected when the vessel arrives at Montevideo or at any other Uruguayan port. The Agent then recovers these charges from the Consignees.

CREW:

Deserters – Masters and/or Agents must report any deserters when the vessel sails. The Maritime Authorities give intervention to the Police Department, and if the men are located, the Agents must hand them over to the respective Consuls. However, the Agents continue to be responsible before the Authorities for the ultimate repatriation of the men, which must be done at first opportunity.

Vessels are subject to a fine per man. The Agents have also to pay repatriation expenses, in cases where the respective Consuls will not do so.

They must also deposit a guarantee which can be used for repatriation expenses in case the deserter stays in the country for more than 15 days.

Time limit for getting crew members left behind out of the country – According to law, Agents must arrange that such crew members leave the country within 15 days. This period of grace commences as from the date of vessel's departure in respect of deserters and for those disembarked for medical treatment as from date on which they are medically certified as fit for travel.

Upkeep of men left in hospital or temporarily disembarked and traced deserters – The Agents are responsible for the maintenance of men disembarked for medical treatment, or temporarily with a special Immigration permit, and for deserters, until they leave the Country.

Stowaways – Captains of vessels having stowaways on board must report them to the Authorities, stating their name and port of embarkation. The stowaways must be kept on board. If they escape and are found after the vessel sails, Agents will be responsible for their repatriation and upkeep charges until they leave the Country. As with deserters, vessels with stowaways on board are liable to a fine per man if this regulation is not complied with.

Agents must also deposit a guarantee per man, amount to be used for repatriating the stowaway or for conveyance to the port of embarkation.

Landing members of crew – Paying off men for other than medical assistance is not permitted, but exceptions are granted in special cases. An application must be presented by the Agents to the Immigration Department, and if the permit is granted, a formal declaration is signed by the Captain of the vessel, the Agents, the Immigration Inspector and the person wishing to disembark, setting forth length of time he is going to remain in the Country and conditions of departure. The personal documents of the person allowed to land, remain in charge of the Immigration Board.

If any member of the crew is landed for medical treatment or paid off without the corresponding permit, the vessel will be fined.

Gangways and Rat-Guards

A gangway must be placed and ready after a vessel comes alongside the quay, but this must not be presented before coming in to the quay. Authorities will only come aboard by the gangways.

Gangways must also have a lifebuoy with suitable line attached and handy, and a safety net must be placed under the gangway, otherwise shore labour will not board vessels, with consequent delay.

The gangway must also be brightly illuminated at night; an oil lamp is not sufficient.

As soon as vessel is securely moored, regulation size (not less than 80 cms.) rat-guards must be placed on all ropes, wires, fenders, lines and hoses.

Heavy fines are imposed for non-compliance with any of these or other regulations.

Overside Discharges

All overside discharges from latrines, bathrooms, gallery, scuppers, engine room, etc. must be screened or covered when vessel is alongside the quay, as vessels will be fined if the discharge falls on the dock or gangway.

Adjustment of Compasses

Vessels proceeding through Magellan Straits – The disposition issued by the Chilean Shipping Authorities on 13th April 1953, states:

"When a foreign ship arrives at the Magellan Straits and applies for a Pilot, official or private, for navigating the Channels, the Pilot must first check the compass for deviations of more than 5°, and if such deviation has been determined more than 6 months ago, especially in a place with great difference of latitude or different hemisphere, compensation of compass is obligatory when not in true order, and a written declaration to this effect will be made in the pilotage agreement. The Authorities will also send an officer to verify that the compass is in satisfactory condition before entering the Straits".

To avoid probable delays, ships heading for the Straits can make the necessary compensation in the Port of Montevideo or in the ante port whilst waiting for orders for departure. This port is most convenient for this class of compensation because at the present moment there is no magnetic variation and also because it is a quiet harbour with sufficient depth for turning. A compass adjuster may be obtained at any time.

200 Mile Limit and Fishing

Uruguay has declared sovereignty over 200 miles off shore, reserving all fishing and undersea exploitation rights. A number of foreign flag vessels fishing without permits have been seized and heavily fined, their catch and gear being confiscated.

Permits are obtainable, but in no case for vessels over 500 tons gross, to operate within 60 miles from shore, while all activity in territorial waters (200 miles) is forbidden in the months of May and June.

Garbage

Garbage is collected every morning by truck. There is a strict prohibition of dumping anything into the port, and oil tanks must not be cleaned within 30 miles of the coast, and on a falling tide.

Old dunnage should not be dumped or sold, without permission from the Authorities, through Agents.

Ships' Boats

Use of ship's boats is forbidden within the port, unless they are being lowered, with prior permission, for maintenance or exercises.

Fenders

All vessels must have at least 2 large fenders, to keep them 5 ft. or more off the quay. If the vessel has no fenders, or due to deck cargo cannot use them Agents should be warned in advance to rent the necessary equipment and have it ready on arrival.

Dropping Anchor when Berthing

If an anchor is dropped when approaching a dock to berth, to control the vessel as she moves in, it is essential that the anchor should be hove in again once the ship is moored. Port regulations require this and any damage to other craft, real or imaginary, through fouling anchor or chain, would cause considerable trouble.

COLONIA: 34.28 S. 57.51 W.

LOCATION: On the right bank of the River Plate from seaward exactly 27 miles in a straight line E.N.E. of Buenos Aires, to which it is connected by ferry and hydrofoil services.

DOCUMENTS/PILOTAGE/HEALTH/RADIO: See beginning of Uruguay section.

DESCRIPTION: There are 3 access channels to the port, of which only 2 are of use to ocean-going vessels. Canal del Medio, for those coming down river, with 18 ft. and Canal San Gabriel from S.W. with 12 ft.

The port consists of an angled breakwater, and a basin with 3 quays. One of these, with 15 ft. is used for ocean-going vessels and has 4 × 3-ton cranes and 2 × 5-ton cranes.

The West quay is for coastal vessels, with only 13 ft. of water.

FUEL: Not available.

FRESH WATER: Available.

MEDICAL: Attention available.

CONSULS: Argentine, all others at Montevideo.

AGENT: See "Montevideo".

APPROACHES: *Recommended Route to Whittier Pilot:* British Charts BA. 3363 and 3364.

When Smith Island bears 256° × 8 miles, vessels should leave the traffic zone and steer 277° passing 1.5 miles South of Naked Island and 1.2 miles North of Point Eleanor. Then alter course to 281° passing 1 mile South of Mears Point. After passing Mears Point, steer 350° through Ferry Passage and alter to 280° off Point Culrose Light to the pilot station. It is not locally recommended to pass North of Ferry Island through the Dutch Group.

PILOTAGE: Pilotage is operated by the Southwest Alaska Pilots' Association who have an office in Valdez, telephone number (907) 835 – 2134. They also have an office in Homer, telephone (907) 235 – 8783. Both stations maintan a continuous watch on Channels 10 and 16.

In theory, Pilots embark at Hinchinbrook Entrance. This has not been the practice however, for the last year or so, due to the long sea passage for the small pilot boat and the severe weather sometimes encountered in this area. Pilots normally embark at Blight Reef near Glacier Island. The pilot boat is stationed at Rocky Point some 10 miles away. The normal pilot boat is "Bering" which is a 63 ft. long trawler, capable of 10 knots, with a blue hull and white house. A newer boat is also in attendance. This is a 43 ft. glass fibre boat called "Bernhof" capable of 20 knots. She has a white hull.

No vessel may enter Prince William Sound through the Hinchinbrook Entrance without permission from the Coast Guard at the Valdez Traffic Control Centre on Channel 13 or 16. Large vessels may only transit Prince William Sound in daylight hours.

If permission is obtained, vessels may proceed direct to the pilot station at Whittier, 1 mile South of Point Pigot. See "Approaches".

ANCHORAGE: Anchorage off Whittier may be obtained in 12 fathoms at Pigot Bay (60° 50.4′ N. 148° 22.0′ E.).

BERTHS/FACILITIES: The two railway berths are only for barges carrying flat top railway cars on which all cargo is carried. The Delong Pier is used for oil tankers. The length of the wharf is 140 m. and the maximum length of ship is about 170 m. The minimum depth alongside is 48 ft. at the West end and 80 ft. at the East end.

Tankers normally berth port side alongside. In October 1980 there was one tug "Avenger" in attendance being 2,000 h.p. A shore gangway is supplied. All manifold connections are 6 in. The ship must supply all reducers. Two lines are used for kerosene. Jet fuel, Mogas and diesel are imported. The distance to the shore tanks is 1.5 miles. All products are pumped from the storage area to Anchorage. Bunkers are not available for large ships. Provisions and supplies can be purchased in Anchorage and shipped down by rail. No medical facilities are available. The nearest doctor or dentist is in Anchorage. In an emergency there is an ambulance which can run on the road or rails.

GENERAL:

Weather: The winds are very strong and variable. It is very wet in Summer and has an extremely high snowfall in the Winter months. The port is completely ice free the whole year round.

Formalities: All the usual American forms apply. Customs, Immigration and Coastguard all come from Anchorage as there are no officials at Whittier.

Joining/Leaving: Crew may sign on and off at all times. During Winter Whittier is often cut off by snow.

Accommodation: Pilot and Agent stayed aboard throughout our 36 hour stay which proved very convenient for clearance and paperwork.

Agent: North Star Terminal & Stevedoring Company, Anchorage, Alaska 95510. Cable: "Norstevco Anchorage". Telex: 26471.

WILMINGTON, Delaware: 39.44 N. 75.32 W.

DOCUMENTS: Handled through local Agents.
PILOTAGE: See "Philadelphia."
ANCHORAGE: At Cherry Island.
MAX. SIZE: Length unlimited, breadth unlimited, draft 35 ft. MLW tide range 5.5 ft.
Chesapeake/Delaware Canal: Max. LOA 760 ft. Max. draft 29 ft. (FW). Height of mast 133 ft. Max. beam 170 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Washington, D.C. Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: U.S. Coast Guard, Gloucester, N.J.
TUGS: Available through Wilmington Launch Service.
BERTHING: 3,260 ft. marginal wharf. 20-100 ton crane capacity. 400-600 t.p.h. bulk unloader. Covered bulk storage of 472,000 sq.ft. Dockside freezer capacity of 1,050,000 cu.ft. at present.
DENSITY: Fresh water port. Normal 12 hour tides.
FRESH WATER: Hose connection from dock.
FUEL: Available.
GANGWAY/DECK WATCHMEN: Required.
OPENING/CLOSING HATCHES: Optional.
IDENTIFICATION CARDS: See "New York".
CONSULS: All Consuls are located in Philadelphia, Pa.
REPAIRS: Possible.
DRY DOCKS: Major repairs and dry dock facilities – Sun Ship Yard, Chester, Pa.
REPATRIATION: Facilities are available and arranged by Agent.
AIRPORT: Philadelphia International Airport, regular service.
TIME: U.S. Eastern Standard and Daylight Time.
POLICE/AMBULANCE/FIRE: Police, Ambulance, Fire, tel. 302–654–5151.
TELEPHONES: Dock-side pay phones.
SERVICES: All services available.
SHORE LEAVE: Allowed unless restricted by Immigration.
AUTHORITY: Port of Wilmington.

WILMINGTON, N. Carolina: 34.14 N. 77.57 W.

(See Plan Book)

PORT LIMITS: A ship is considered an "arrived vessel" upon arrival at Buoy 2CF.

DOCUMENTS:

3 copies Cargo Manifest (Forms 7527-A or 7527-B), the original showing all cargo on board, and 2 copies showing only cargo for this port.
3 copies Crew Manifest (curio list) (Customs Form 1304).
3 copies Stores List (Customs Form 1303).
3 copies Passenger List (Form I.418).
3 copies Crew List (Form. I.418).

Customs boarding Officer will also examine ship's Register and Load-line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:

Master's oath (Customs Form 1300).
All foreign clearances.
U.S. Certificates of payment of tonnage tax (Customs Form 1002).
Certified Crew List.
Oil Pollution Certificate.
General Declaration (Customs Form 1301).
Load Line Certificate.
Safety Equipment Certificate.

PILOTAGE: Pilots board vessels at Buoy "2CF" off the mouth of the Cape Fear River. Masters should notify local Agents by radio of their ETA's at Buoy "2CF" in order that the Pilots may be on station in advance of arrival. Additionally, Masters may communicate with Pilots by radio telephone on 2738 frequency and by VHF Channel 18A. Pilots remain on board until harbour limits of Wilmington, where docking Masters normally board vessels for purposes of docking.
APPROACHES: The port terminal at Wilmington is located on the East bank of Cape Fear River, approximately 26 miles from the sea buoy at the mouth of the river. Wilmington is 150 miles S.W. of Cape Hattaras and 26 miles North of Cape Fear.
RESTRICTIONS: The approach channel and basins adjacent to the port are maintained at a depth of 38 ft. MLW.
ANCHORAGE: Vessels awaiting Pilots normally anchor in area off Buoy "2CF". There is no safe anchorage in the port of Wilmington for large vessels to be accommodated. Small vessels can be accommodated for brief periods in anchorage basin, although it is necessary to swing with the tide in order to avoid blocking channel.
MAX. SIZE: No limits on length, breadth, and draft limit is present channel project depth of 38 ft. Master should communicate with local Agent regarding stage of tide for passage of vessels drawing 34 ft. or above.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Washington, D.C. Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: 2 towing companies operate at Wilmington.
BERTHING: A continuous marginal wharf, 6,000 ft. long. Docking at any hour, day and night.
SPECIALISED CARGO HANDLING FACILITIES. State Port Terminal: Fully equipped to serve cellular type container ships, for bulk handling; equipped with 6 yard rehandler buckets, receiving hoppers, and paved open storage areas, 2×45-ton, 1×115-ton, 2×40 ton container cranes, 1×140 ton mobile crane and 1×225-ton gantry crane; 1 berth with tank farm for handling liquid chemicals.

Almont Shipping Company: 3 berths, open and covered bulk storage, 2×25-ton cranes and 1×85-ton derrick. No facilities for LPG carriers.
TANKERS: 10 tanker berths with drafts from 30 ft. to 40 ft. MLW. Night berthing at all berths. Fresh water available.
FRESH WATER: Available from shore connections at rates up to 50 t.p.h.
FUEL: Bunker "C" and diesel fuels available locally.
FIRE PRECAUTIONS: Normal precautions observed.
REPAIRS: Minor ship repairs available.
DRY DOCKS: 1×1,000-ton lift floating dry dock.
AIRPORT: New Hanover Country Airport, 7 miles from N.C. State Port Terminal. Served by Piedmont Airlines.
IDENTIFICATION CARDS: Standard U.S. Immigration Forms I.95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I.95, issued for the same vessel.
TIME: Eastern Standard Time, GMT minus 5 hours. Daylight Saving Time, GMT minus 4 hours from April to October.
DEVELOPMENTS: A 900 ft. extension to the South end of the wharf is under design for an addition to the container terminal. Completion of construction is anticipated by 1983.
AUTHORITY: North Carolina State Port Authority.

WRANGELL, Alaska: 56.28 N. 132.22 W.

(See Plan Book)

Located on Wrangell Island. Open all year.
DOCUMENTS: See "Anchorage, Alaska".
PILOTAGE: (From sea via Dixon Entrance up Clarence Strait to Guard Island.) Under pilotage from Guard Island.
ANCHORAGE: Good anchorage N.E. of Woronofski Island in 22 fathoms of water.
MAX. SIZE: Harbour depth 32 ft. MLLW. Tides: mean range 13.7 ft., diurnal range 16.1 ft. Also see "Berthing".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
CUSTOMS: Immigration, Guard Island or local Customs office. Quarantine and Customs, local.
TUGS: 3 available, 500 h.p. each.
BERTHING: 4 wharves.

1. Wrangell Wharf Co. Berthing length 220 ft., East end depth 24 ft., West end depth 38 ft. 2 lift-trucks; 4,800 sq.ft. covered shed space.
2. Wrangell Lumber Co. Dock; Berthing length 320 ft., 150 ft. wide, depth South end 32 ft. North end 40 ft. LW. Height of pier from zero tide 23.5 ft. Crane – 1 mobile, 8 ton, 6 lift-trucks. No shed space. 3 acres open storage.
3. Alaska Wood Products: Berthing length 300 ft., 50 ft. wide. Depth at LW 32 ft. Height of pier from zero tide 23 ft. No shed space.
4. Port of Wrangell Wharf: 35 ft. depth at both ends. Fresh water available. Lift trucks on rental from local private firms.
5. Barge. Transfer bridge facilities.

STEVEDORES: 4 gangs available.
REPAIRS: None.
WATER: Available.
FUEL: None.
MEDICAL: Small but new hospital.
TRANSPORTATION: Air and ferry.

NOTES

Please also advise Shipping Guides Ltd.

8 in. Lube oils 6 in. lines, 150 t.p.h. and a line for Alcohol 6 in. There is no line for Gas. There are 3 × 5-ton electric cranes and 1 × 12-ton diesel crane. Coal and Cement are also discharged at this berth, the coal to Decauville cars and the Cement to trucks, handling 750 tons per 8 hour day, with 5 gangs.

At the South berth the oil lines are identical, and there is also a 6 in. connection for loading or discharging Super Gas, at 200 t.p.h. There are no cranes at this berth.

The Western berth has the same installations except for Super Gas and Alcohol.

There are 3 in. water lines at each berth, and use of 2 tugs is essential for berthing or unberthing. At the North berth, vessels fully loaded often lie up to 15 m. out from the quay, owing to accumulation of mud, and will gradually close in as the vessel lightens. Access gangways are placed by the Port.

Railway Connections – Basins 1 and 2, River Traffic Basin and also Deposits "A" and "B" have railway lines on all sides, belonging to the Port Administration, which are connected with the main lines of the Uruguayan State Railways.

The Port Administration has 2 electric locomotives used exclusively in the port.

Cranes – The Port Administration has 1 heavy-lift floating crane of 80,000 kilos, a mobile crane of 20,000 kilos, also 46 movable electric cranes of 5,000 kilos each; 5 movable electric cranes of 1,500 kilos each; 1 fixed electric crane of 4,000 kilos; 33 of the aforementioned 5,000 kilos cranes, are placed alongside the quay walls for vessel's operations.

There are also 24 electric trolleys of 1,500 kilos, and one of 1,000 kilos. There is a fixed crane for 200 tons on Muelle Escala.

Fiscal Lorries – The Port Administration has purchased special lorries and 12 auto cranes for receiving cargo, as the railway wagons available are not sufficient to carry all the cargo that is at present being handled at this port.

Loading Operations – Loading is effected from carts, lorries and/or wagons and the cargo is hoisted on board with the cranes. Cargo is also loaded from lighters.

Grain Loading – There are 2 Mobile grain vacuvators, each of which can load bulk grain at around 35/50 t.p.h, also 10 smaller machines that can each load around 20 t.p.h.

Fumigation – Montevideo is the only port in Uruguay at which vessels can fumigate, using the Cyanide method. The tariff is per cubic metre fumigated over a basic charge which varies according to n.r.t. There are surcharges for overtime.

Disinfection of Mail Bags – To avoid delay through disinfection mail bags can be fumigated on board in a 10% formalin solution and kept in a closed space for 4 hours before vessel gets into port. The closed space will be opened in the presence of a Health officer who will verify the use of formalin. When in doubt, fumigation will be carried out again and exposed for 2 hours.

Height of Quay above water – Tide being very small, the height of quay above water only varies from 8 to 10 ft. at low water to 10 to 12 ft. at high water. Wind influence is felt even in the bay, as a South wind will raise water as much as 5 ft., or a Northerly wind reduce it 2 or 3 ft.

New Equipment – In process of supply:

Fork-lift trucks – 3 of 5 tons and 1 of 6 tons, to lift to 3 m.

Container lifter – 1 to lift to 22.4 short tons, size 8 ft. × 8 ft. × 20 ft.

Fork extensions for fork-lift trucks in use – 25 pairs.

Mobile cranes (diesel) – 2 capacity 7.5 tons with telescopic arm up to 10 m., turning through 360°; 8, capacity 7.5 tons, fixed arm; 1 capacity 10 tons with telescopic arm up to 12 m., 360°; 1 truck-mounted crane no less than 60 tons, with arm not less than 21.5 m.

Pallets – material for making 15,000 pallets, in 2 sizes.

Slings for these pallets, also for heavy-lift cargo for use with the mobile cranes.

Lighters – 7 new lighters, ranging from 100 to 400 tons.

STEVEDORES: Working hours: 1st shift, 0700 to 1300 hrs.; 2nd shift, 1300 to 1900 hrs.; 3rd shift, 1900 to 0100 hrs.; 4th shift, 0100 to 0700 hrs.

Normal capacity per gang per hour: *(a)* Rice – about 80/90 tons per gang/hour. *(b)* Meat – about 60/100 tons per gang/hour.

Overtime is compulsory if port is congested.

Lavatory Conveniences for Shore Labour – Each vessel must furnish conveniences for all shore labour employed on board. Work has been stopped until such conveniences are installed. It is advisable, therefore, for vessels calling at Montevideo to be equipped with 2 spare lavatories, 1 for talley clerks and 1 for stevedores, etc.

DENSITY: 1002–1006.

MEDICAL: Any urgent case must be advised in advance. In normal cases, the Health Service doctor in the port will visit. For this purpose there are Clinics and Hospitals with optional assistance. Vaccination certificates are issued by the Port Health Service. There are also private health and medical services which give on-board treatment.

FRESH WATER: Fresh water is supplied by the Port Authorities at all quay berths. Request must be made through the Agents, vessels supplying their own hoses where possible. It is important that the water meter should be read together with the Port official both at connecting and disconnecting to verify the exact quantity. The cost of water is high. Loading rate 20 cu.m./hr. Water also available by barge (capacity 170 tons) loading rate 18 – 20 t.p.h.

FUEL: This can be taken on board whilst anchored in the foreport via two barges, one of 595 tons delivering at the rate of 250 to 350 cu.m./hr., the other of 310 tons at the rate of 200 to 250 cu.m./hr.

Also available from the Uruguayan tanker "Valiente" (capacity 1,337 cu.m. of fuel, rate of 700 cu.m./hr.) or 196 tons of water at the rate of 70 cu.m./hr. This service can be effected outside the port.

A.N.C.A.P. Information: All grades subject to confirmation, the request being made via the Agent 15 days in advance.

TANKERS: Dirty ballast can be discharged depending on whether or not there is a berth at La Teja, Inflammable Materials Dock. A.N.C.A.P. have the necessary reducers for any type of operation.

Diameter of pipes: Crude – 12 in.
Fuel oil – 8 in.
Dirty ballast – 8 in.

Berth depths: North quay – 29.6 ft.
South quay – 22 ft.
West quay – 14 ft.

DRY DOCKS: 2 dry docks available: Nacional, length 463 ft., width 61 ft. Maua, length 260 ft., width 28 ft. Also a floating dock, lifting capacity 12,000 tons, 545 ft. long and 93 ft. wide.

Entrance is by turn, counting from presentation of the application, but this may vary.

- *(a)* when the vessel has damage to repair.
- *(b)* when there is a fixed sailing date.
- *(c)* when a vessel requires a dock for no more than 4 days, and is preceded by one requesting 15 days or more.
- *(d)* when by reason of size a vessel cannot enter with another which is on turn.
- *(e)* National Naval vessels.

GANGWAY/DECK WATCHMEN: Shore watchmen are compulsory. Arranged by Agents. 1 required on deck and 1 for each gangway. Vessels carrying dangerous cargo must also employ a guard of the Prefectura.

Vessels calling for supplies only, for orders, in distress or to land sick crew members or to enter dry dock, need not employ Watchmen. Repairs afloat require a watchman, if they do not carry out commercial operations.

Shifts are of 8 hours, commencing at 0700 hrs. Vessels under repair, and those at ANCAP moles may fix 12-hour shifts, paying a shift and a half.

If special watchmen are required for goods or working equipment, application must also be made to the Union.

If watchmen are needed in the holds, same applies.

Regulations also require a watchmen in the holds wherever the ship has a crew member, cadet or officer permanently on watch to prevent pilferage. However, where ship's personnel are in the hold to watch the stowage of the cargo, no extra watchman is required. Masters should therefore, advise Agents if they intend to place crew members permanently in the holds during discharge, so that Agents can advise the Association before they make their claims.

Care must also be taken on arrival, since the watchman is on duty from 0700 hrs. on, whereas it may be necessary to place the gangway safety net, etc., before that time, so that Pilot may disembark.

Only those involved in this operation should go ashore. The Receiving Commission may ask for the gangway to be opened before 0700 hrs., which is in order, but no one else should use the gangway to avoid claims from the Union.

Vessels lying in the anteport must provide launches for the transport of watchmen employed.

DENSITY: This varies according to wind and tide (1006 – 1002). The degree of salinity is broadcast daily in the weather reports by radio, and varies from fresh to brackish to sea water. Steady South winds give the highest degree of salinity.

IDENTIFICATION CARDS: These are not necessary for cargo vessels, except for vessels making short calls without discharging or loading.

U.S.A.	H. A. Santos 808	409126/409051
Venezuela	Avda. Artigas 1253	493005
Yugoslavia	Avda. Espana 2697	788129

REPAIRS: All kinds of repairs can be effected, either afloat or in drydock.

DRY DOCKS:

Nacional	Length between perpendiculars	141.30 m.
	Width	28.50 m.
	Height	10.46 m.
	Depth of Water	14.11 ft. at zero
Tsakos	Lifting power	12,000 tons
	Length	165.99 m.
	Width	28.50 m.
	Height	4.41 m.
	Max. height of stocks	23.16 m.
A.N.P.	Length	67.06 m.
	Width	13.72 m.
	Height of water at the stocks	4.75 m.
Maua	Length	79.25 m.
	Length on stocks	74.42 m.
	Depth of water	12 ft.
	Width of Pontoon	15.25 m.
	Capacity of operation	2,000 tons

REPATRIATION: There are facilities for exchanging crews.

AIRPORT: Located 30 minutes away by car. There are various regular services to all parts of the world.

TIME: GMT minus 3 hours. (However changes are possible).

HOLIDAYS: 1st January (New Year); 6th January (Epiphany); 3 days in February (Carnival); 7 days in March or April (Tourist Week); 1st May (Labour Day); 18th May (Battle of the Stones); 19th June (Artigas' Birthday); 18th July (Swearing of the Constitution); 25th August (Declaration of Independence); 12th October (Day of the Race); 2nd November (All Souls'); 25th December (Christmas Day).

On these days, work will always proceed when the Agent or Owner requires it or also if the Port Authority requires it, should there be a number of vessels anchored in the roads awaiting a berth.

POLICE/AMBULANCE/FIRE: Port Police (Immigration): 95.21.51; Fire Brigade: 91.51.51 to 56 – extensions 139/337. Ambulance: 91.51.51 – extensions 272/382.

Prefecture of the Port of Montevideo: 95.21.27 – 95.21.77, 95.54.05, 95.52.01, 95.22.27, 95.24.27 ext. 07, 91.51.51 ext. 199, 91.93.03, 91.53.71 ext. 199.

TELEPHONES: There are services on all quays. Telephones can be requested by the Agent from the Port Authority.

SHORE LEAVE: Allowed.

DEVELOPMENTS: A container park and fish quay will be built alongside the Eastern Quay and in the Mantaras Zone respectively.

A battery of silos will be constructed at C.M.B. (between Warehouses 7 and 8) which will facilitate the loading and unloading of grain. Sheds 10 and 11 will be equipped with modern refrigeration machinery.

There is a large plan for improvements in equipment, tugs, dredging, etc., for which the A.N.P. (Administracion Nacional de Puertos) (National Port Administration) has received a loan granted by the World Bank.

AUTHORITY: Administracion Nacional de Puertos.

AGENT: Christopherson S.A., P.O.Box 295, Treinta y Tres 1387, Montevideo. Tel. 90.51.62; 90.75.16; 91.11.28; 91.75.78; 91.48.04. Cables: "Cristofsen". Telex 921 and 6629 (A/B "CHRIST UY").

NUEVA PALMIRA: 33.53 S. 58.25 W. (See Plan Book)

LOCATION: Situated on East bank of Uruguay River, 155 miles above Montevideo. Km. 0 on River Uruguay.

PORT LIMITS: The port of Nueva Palmira is located in the area between the parallels Lat. 33° 52′ 7″ S. and Long. 58° 25′ 3″ W.

DOCUMENTS: The documentation required is as follows:

Cargo or Ballast Manifest.
Negative Passenger List or list of passengers visaed by the Consul.
Crew List.
Stores List.
List of Personal Effects.
Tonnage Register.
Consular Clearance.
Maritime Declaration of Health.

PILOTAGE: The information required from vessels navigating within the area of the Port Control are:

Time of entry and leaving the area.
International call sign.
Name of vessel.
Flag.
Estimated course.
Latitude.
Longitude.
Port of destination.
Estimated time at port of destination or other point of call.

The area appointed for effecting change of Pilots is the Port Roads. The Pilots arrive at the vessel in a launch 5.53 m. overall length, with cabin, painted orange, owned by the Pilots' Corporation of Uruguay.

ANCHORAGE: The area designated for anchoring is located within the roads and fore-port, depth being between 20 ft. and 24 ft.

RESTRICTIONS: There are no restrictions for berthing in the port, except those imposed by weather conditions (winds, etc.). Vessels berth without the aid of tugs.

MAX. SIZE: With regard to length and capacity of vessels, there is no stipulated limit but due account should be taken of the fact that the depth of water in the port is 24 ft.

HEALTH: The Health Authorities will require a Crew List and Maritime Declaration of Health. In the event of disease being detected on board, the Health Official will proceed to inform the Aid Centre who will arrange for a doctor to attend on board, with the vessel placed in quarantine or the patient will be transferred to hospital, depending upon the illness discovered. To date, no such occurrence has arisen in the port.

RADIO: VHF equipment with permanent listening out on Channel 16.

RADAR: There is no radar equipment.

VHF: All communications are effected by means of VHF equipment. The call sign is CWC 31 – "Control Palmira Prefecture", and the following Channels are used: 6, 8, 9, 11, 12, 13, 14, 16, 25, 26, 68 and 69. The station operates permanently on Channel 16, the frequency being 156.800 mHz.

TUGS: The service of a tug is not necessary for berthing vessels.

BERTHING: The port has the Official Quay and the quay owned by Cia. Navigen.

Official Quay: Length 240 m., length of the head 80 m., width in the centre 40 m.

Navigen Co. Quay: Length 234 m. It has a conveyor belt system 500 m. long, running 15 m. above the level of the water. Electrical operating system with a loading and discharge capacity of between 300 t.p.h. and 700 t.p.h., dependent upon whether cereals or ore is being handled.

CRANES: The Official Quay is equipped with 3 cranes of the National Port Administration. They are mobile cranes on rails. Two are for 3,000 kgs., and the third is for 5,000 kgs.

STEVEDORES: As soon as the vessel communicates the ETA at the port, the Agent will make all necessary arrangements for stevedoring services to commence work as soon as the vessel has obtained free pratique. These services will be made available dependent upon the tasks required to be fulfilled.

MEDICAL: The local Public Health Aid Centre is entrusted with furnishing any medical aid which may be necessary on board.

BULK HANDLING FACILITIES: There are no tanks, but there are warehouses for storing grain and general cargo. These warehouses belong to the National Port Administration and to the Free Zone, and are located within the port area.

FRESH WATER: Fresh water is supplied by the National Port Administration. Cost is US $1.20 per 1,000 litres.

FUEL: There is a fuel storage depot within the port area, and should it be necessary to supply bunkers to a vessel, application has to be made to ANCAP who will supply via tanker trucks.

FIRE PRECAUTIONS: There are none, other than those of a routine nature.

CONSULS: There are none at local level. In the town of Carmelo, 21 km. from Nueva Palmira, there is the Consulate of the Argentinian Republic.

REPAIRS: Minor repairs possible.

SURVEYORS: None available.

GANGWAY/DECK WATCHMEN: The service of watchmen is not necessary, unless the vessel is carrying inflammable cargo, the tariff being half a re-adjustable unit per man hour. (The Re-adjustable Unit is a value which is quoted in Uruguayan currency and is determined by the banking authorities, its value as at November 1980 being approximately U.S. $10).

HATCHES: Opening and closing of hatches is normally carried out by stevedores.

CUSTOMS ALLOWANCE: Each crew member is permitted to carry out of the bonded ship's store, 5 kgs. tobacco, 2 cartons of cigarettes, and 2 bottles of wine.

CARGO GEAR: Normally, loading and discharge are effected by means of land-based equipment.

REPATRIATION: There are facilities for changing crews, and to effect any repatriation necessary. In both cases, the arrangements are carried out with the participation of the Immigration Authorities and the Maritime Agency concerned.

AIRPORT: There is the airport of Zagarzazu located between Nueva Palmira and Carmelo, approximately 15 km. from this town.

TIME: Local time is GMT minus 2 hours.

HOLIDAYS: 1st January, 19th April, 1st May, 19th June, 18th July, 25th August, 12th October, 8th December, 25th December. Holidays do not interrupt operations on vessels.

POLICE/AMBULANCE/FIRE: Police: Tel. No. 42, Ambulance: Tel. No. 82. No fire brigade.

TELEPHONES: It is not possible to have telephones installed on board vessels.

SERVICES: There are stevedoring services, Maritime Agents and Customs Clearance Agents.

SHORE LEAVE: Once free pratique is granted, there are no prohibitions for crew members going ashore.

DEVELOPMENTS: The lengthening of the head of the Official Quay by 200 m. to the North is planned.

AUTHORITY: El Sub-Prefectura de Nueva Palmira.

AGENT: See "Montevideo".

PAYSANDU: 32.18 S. 58.06 W. (See Plan Book)

LOCATION: Situated on the East bank of Uruguay River, 380 km. above Montevideo. Km. 204 on River Uruguay.

DOCUMENTS/PILOTAGE/HEALTH/RADIO: See beginning of Uruguay section.

RESTRICTIONS: River navigation controlled by depth in the passes at Almiron, Vera and Urquiza. Since river conditions vary from season to season, Agents should be consulted beforehand regarding available draft at any particular time.

ANCHORAGE: Off Montevideo.

MAX. SIZE: Up to 15 ft. draft fresh water, depending on river conditions.

TUGS: Available.

BERTHING: Grain Elevator Berth; 20 ft. depth alongside at zero tide. Coastal Berth: Length 300 m. Depth 11 ft. at zero tide. Ancap Pier: 1 berth for tankers, 30 ft. depth at zero tide.

There is 1×5-ton crane on the grain quay, and 3×3-ton cranes on the coastal berth. Loading on the Ancap berth is by lorry.

STEVEDORES: Working hours: 0800 – 1200 and 1430 – 1800 hrs. Saturdays: 0800 – 1230 hrs.

MEDICAL: All assistance available.

FRESH WATER: Available at all berths.

FUEL: By negotiating through the intermediary of the Customs Clearance Agent the required quantity is delivered.

REPAIRS: Minor repairs can be effected.

CONSULS: Local representation for Argentina, Brazil, Italy and Paraguay. All other Consuls at Montevideo.

GENERAL: Refer to "Montevideo" for all general information.

AGENT: See "Montevideo".

NOTES

Please also advise Shipping Guides Ltd.

Venezuela

GENERAL: *Berthing Priority:*

The Venezuelan Ministry of Communications has decreed, through the Directorate General for Transport and the Port Captaincies, the following new docking priority system:

1. Vessels owned by the C.A. Venezolana de Navegacion or chartered by that company.
2. Venezuelan vessels belonging to private companies.
3. Vessels of other countries.

Previously, vessels chartered by the C.A. Venezolana de Navegacion did not get priority treatment and it is understood that, with these new priorities, the number of vessels with docking privileges has been tripled, thus resulting in greater delays for vessels operated by foreign companies.

AMUAY BAY: 11.46 N. 70.15 W. (See Plan Book)

OPERATORS: Lagoven, S.A.

ESSENTIAL REQUIREMENTS:

1. Incoming vessels must send ETA at least 3 days before arrival at Amuay Bay. During hours of darkness all vessels must identify themselves on arrival either by radio-telephone or aldis, preferably the former.
2. If a ship originally cleared for another port (including some other Venezuelan port) is diverted at sea to Amuay Bay, certain information must be radioed prior to arrival to avoid heavy fine and/or delays. See "Radio".
3. No dirty ballast may be pumped overside in port or in Venezuelan coastal waters. Ballast disposal facilities are available at Amuay Terminal.
4. The use of Venezuelan Government Pilots is compulsory for docking and for movements inside the bay.
5. The Venezuelan flag should be displayed at the mast-head during daylight hours by ships anchored and berthed in Venezuelan waters.
6. In addition to other clearance documents, 2 copies of an itemised list of articles in the ship's chest must be presented to Authorities on arrival.
7. Emergency fire signal is 5 long blasts on ship's whistle or siren. No other signal is to be given in the case of emergency.
8. Ratguards must be in place on all mooring lines.

LOCATION: The port of Amuay Bay is located on the Gulf of Venezuela, on the West Coast of the Paraguana Peninsula, Venezuela. The sea buoy marking the entrance to the bay is located in Lat. 11° 44′ 25″ N., Long. 70° 14′ 50″ W.

DOCUMENTS: Inward clearance is effected on board immediately after docking by Government Port Officials and a representative of the Marine Department. It is necessary that the following documents be ready on arrival:

Clearance from last port (Consul Mail) 1 visaed.
Ballast Certificate from last port (1 copy, visaed according to paragraph *(a)* if there is no Venezuelan Consul).
Crew Lists (5 copies).
Passenger Lists (5 copies visaed).
Baggage List (3 copies visaed).
Lists of Personnel Effects (3 copies not visaed).
Store Lists (3 copies, see note below).
Lists of Slop Chest (3 copies not visaed).
Sailing permit (Zarpe).

Vessels arriving with cargo to discharge, will also require:

Manifest (Sobordo) (1 original visaed and 2 copies not visaed from each loading port).
Consular Mail (1 sealed envelope from each loading port).
Bills of Lading, 1 original and 1 copy visaed, and 4 copies not visaed from each loading port.
Tally Books (6 from each loading port).
Consular Invoice (3 originals visaed and 3 copies not visaed from each loading port).
Commercial Invoices (3 from each loading port).

Note: 1. The Store and Provisions Lists may be prepared on board prior to arrival unless the ship is coming from the Netherland Antilles, the Guianas or any other islands in the Antilles which have not attained independent status, in which case 2 copies must be visaed by the Venezuelan Consul at the port of departure.

2. The Slop Chest List is not required if included in the Provisions List.

(a) Cargo and clearance documents should be visaed by the Venezuelan Consul at the last port of call. In the absence of a Venezuelan Consul, they may be visaed by the Consul of a friendly nation, by the Chamber of Commerce, or by 2 reputable merchants, the latter's signatures to be notarised. In the absence of a Venezuelan Consul the following notation should be written on each document, in Spanish, and signed by the alternates designated above:

"Por no existir en la localidad Agente Consular Venezolano y a peticion de los embarcadores, certifico el presente documento."

(Signature)..

Although vessels proceed directly to Amuay Bay, clearance documents should be prepared showing the port as Las Piedras, Paraguana (Amuay Bay). Failure to observe this requirement may result in penalties up to a maximum of Bs.2,000.

Admeasurement Certificate: All ships calling at a Venezuelan port for the first time must be measured for tonnage by the Captain of the Port. It is the usual practice to take ashore the ship's Panama Canal or Suez Canal Certificate, or any other certificate with which Venezuela is in agreement, which is used as a basis for recalculating tonnage under the Venezuelan Regulations, and is returned before sailing. The Venezuelan Admeasurement Certificate, when later issued, is forwarded to the owners. A fee is charged for this certificate, which is payable only on the ship's first call. Vessels registered in the following countries are excluded from the above regulations: Netherlands, Germany, France, Portugal, United Kingdom, Denmark, Sweden, U.S.A, Ireland and Norway.

Vessels that were originally cleared for another foreign port, or another Venezuelan port, and were subsequently diverted at sea, should radio the following information to "Lagomar-Judibana" prior to arrival:

Vessel's name
Master's name
Vessel's flag
Number of crew
Estimated time of arrival.
Last port of call
Port for which originally cleared
Grade and quantity of cargo to be lifted.

This information is required in order to make in advance special arrangements for inward clearance, to avoid payment of fine.

Outward clearance and cargo documents are delivered on board by the Marine Dispatcher. However, in order to obtain the sailing permit, a special form, delivered on board on arrival, must be completed, not later than 2 hours before sailing time. This form gives cargo and freeboard information by the Captain of the Port.

In the event the berth is required by another vessel, a vessel having completed loading may be required to vacate the berth promptly and proceed to anchorage to await cargo documents.

PILOTAGE: Pilots are employees of the Venezuelan Government and pilotage is compulsory for vessels entering or leaving the harbour. The Marine Department will arrange for Pilots to board all vessels as necessary.

The Pilot acts in an advisory capacity; the Master retains responsibility for the ship at all times. In the event it becomes necessary to disregard the Pilot's instructions in order to ensure the safety of the ship, the Master must forward through the Marine Department a full written report of the circumstances, for delivery to the Captain of the Port.

ANCHORAGE: For vessels awaiting berth, there is a good anchorage about 1 mile N.W. of the sea buoy in 8 to 12 fathoms with a sand and mud bottom. Ship Masters are requested not to anchor at a distance greater than 3 miles from the sea buoy.

RESTRICTED AREA: A restricted fishing area has been established by the Venezuelan Government which is prohibited for mechanically propelled vessels drawing more than 5 ft. This zone lies within the area off the Paraguana Peninsula from Punta Macolla, Lat. 12° 5′ 32″ N., Long. 70° 12′ 55″ W., to Punta Estanques (Los Taques), Lat. 11° 48′ 45″ N., Long. 70° 16′ 45″ W., and a line connecting the positions below indicated: Lat. 12° 07′ 40″ N., Long. 70° 14′ 25″ W.; Lat. 12° 03′ 15″ N. Long. 70° 19′ 23″ W.; Lat. 11° 49′ 25″ N., Long. 70° 21′ 50″ W.

HEALTH: *Sanitary Inspections:* A close control of veneral diseases has been put into effect by the Government Sanitary Office.

Immediately after docking a Sanitary Inspector will board the vessel and all Crew members will be checked before going ashore.

Those persons found with infection must be sent to the Government Anti-veneral Clinic for proper medical attention and return to vessel before sailing. 20 Bolivares per ship.

Shore passes will be granted to all healthy persons.

Masters are required to cooperate in this campaign.

MAX. SIZE: Length 1,000 ft.; draft 43 ft. Also see "Berthing".

RADIO: The cable and telegraphic address for the Lagoven S.A. at Amuay is "Lagomar Judibana". Radio messages to and from ships at sea are routed through "Shipward 2 New York" for retransmittal through Aircon system to Judibana (Amuay Bay).

Radio notice of arrival should be sent 72 hours prior to arrival at Amuay.

Ship-to-shore telephone: Radio-telephone listening watches are maintained on a 24-hour basis in the Marine Office on the following frequencies: 2182 kc/s.; 156.8 Mc.

International telephone: International telephone calls are routed through Caracas, Venezuela. Telephone number is Punto Fijo area 069-51557. (It is usually difficult if not impossible to complete a call.) Telex: 54193 Lagoven.

Also see "Documents".

TUGS: Tug-boat assistance is considered essential and is afforded all vessels entering, leaving or shifting in the harbour by 2 × 1,600-h.p. tugs. Disposition and manoeuvres of tug-boat are directed by the Pilot, who uses a "walkie-talkie" to convey orders to the tugs.

BERTHING: 4 finger piers provide 8 berths, numbered 1 to 8, from South to North.

	1	2	3	4	5	6	7	8
Max. Arrival d.w.t. (m.t.)	70	92	24	44	16	30	16	30
Max. departure d.w.t. (m.t.)	112	112	48	48	38	38	94	94
Max. Draft (S.W.)	43′	43′	*37.6′	*37.6′	*37.6′	*37.6′	*37.6′	43′
Max. Length Ship	1000′	1000′	650′	700′	700′	700′	856′	856′
Max. Beam	Unl.	Unl.	Unl.	†	†	†	†	Unl.
Bow to manifold distance	495′	495′	300′	320′	330′	330′	340′	340′

Ballast line, fresh water and all grades bunkers at all berths.

*The max. draft will be increased to 40 ft.

†Max. beam permissible varies dependent upon the beam of vessel berthed on other side of the slip.

The use of an anchor when docking is permitted at all berths. It is considered prudent to have the outboard anchor hove-out prior to entering the harbour in order to facilitate speedy release if necessary while docking. The Pilot will advise whether the ship is to be berthed port or starboard side to the dock.

Products handled:

Berth No. 1 & 2: F.O., heating, heavy distillates, TJ-102, topped crudes, all crudes.

Berth No. 3 & 4: Lubes, F.O., LCT asphalts (penetration).

Berth No. 5 & 6: Naphtha, jet fuel, crudes, F.O., heating, MC/RC asphalts, kerosene, TJ-102, topped crudes, LCT (pref.).

Berth No. 7 & 8: Naphtha, kerosene, heating, F.O., jet fuel, MC/RC asphalts, all crudes except TJ-102.

LOADING: Loading rates particulary for low-flash products loaded during the hours of darkness or when topping-off cargo tanks, will be reduced by the terminal to meet existing conditions.

All loading and discharging will be stopped during the passage of an electric storm, and ullage covers must be closed and dogged down. During periods of calm, loading of gasoline or other similar low-flash products may be loaded at reduced rates or loading stopped if the heavy vapours are not being dispersed quickly enough to prevent hazards from accumulated gas pockets. Ship's officers are cautioned to be on their guard during such conditions.

Loading rates will be reduced when topping-off, if requested by the ship's officer.

Some of the fuel cargoes are loaded from fuel reservoirs through certified positive displacement meters, and shipping documents are prepared on the metered figures. All reconstituted crudes are line blended with conditions recording of component rates and quantities. Actual loading rates of both this crude and metered fuel cargoes are available at any time upon request of the standby.

Instructions as to grade or grades of cargo, and the approximate loading rate anticipated, will be given to the Master on completion of inward clearance. Supplementary information including number and size of lines and hoses will be furnished to the Chief Officer before loading commences.

If vessel's loading orders from owners or charterers do not agree with the terminal's orders, either as to grades or quantity, the marine representative should be advised immediately. The terminal is authorised to load 10% more or less than the quantity nominated; if the cargo to be lifted will be more or less than this 10% limitation it is necessary to cable New York for confirmation.

A terminal employee is stationed at each pier during the entire time the ship is discharging ballast, bunkering, or loading cargo. Fifteen minutes "stand-by" notice should be given to this man prior to completion of ballast, bunkers, or cargo.

Vessels loading liquid and flaked sulphur: *For vessels loading liquid sulphur, the following applies:*

Location: Pier 2, berth 3 at Amuay Bay.

Draft – 40 ft., length overall – 700 ft., beam – no limitation.

Loading will be at the rate of 400 long tons per hour through a 6 in. line and rubber hose.

Maximum cargo size – 25,000 long tons.

Normal loading temperature is 275° F. (Minimum – 265° F. Maximum – 295° F.). Density at normal loading temperature is 112 pounds per cu. ft. Viscosity at same temperature is 8.5 centipoises.

Safety precautions/provisions: Molten sulphur classified as "Grade E Liquid" by U.S. Coast Guard. No naked light, open flames or sparks should be permitted near any tank openings. Molten sulphur is combustible but is handled at temperatures below its flash point (325-370° F) and ignition temperatures (476-502° F).

For vessels loading flaked sulphur, the following applies: Physical characteristics of the loading facilities:

(a) Location: Lat. 11° 44′ N., Long. 70° 14′ W. Anchorage approximately 2,000 ft. South Punta Adaro with a depth of 33 ft. 400 yards offshore and dropping off to 50 ft. 1,000 yards offshore. In the rare event that the wind is Westerly the vessel would anchor further offshore.

(b) No draft, length or beam limitation. (Vessels loading up to 24 ft. draft may be anchored inside the bay).

(c) Loaded barges whose overall dimensions are 200 x 42 x 17 ft. will be brought alongside with the aid of tugs and removed when required, barges will be equipped with fenders. The hoppers are 160 × 37 × 14 ft. Loading from barges to ship will be done using ships gear and clam shells of 1.25 ton capacity. Clam shells will be furnished by Lagoven free of charge. Personnel (stevedores) to carry out the loading operation will be supplied by Lagoven or the ships crew can be used if this is set forth in the charter party. Loading rate 1,000 long tons per day.

(d) The anchorage is sheltered in the lee of the Adaro Peninsula. Wave heights vary between 1 ft. and 2 ft.

(e) Normal Maximum parcel size – 10,000 tons loaded at a rate of 1,000 tons per day, however, an additional 2,500 tons can be supplied at a loading rate of 500 tons per day.

(f) Flaked sulphur when stored in large quantities varies in density from 55 to 90 pounds per cu.ft. Average density is anticipated to be 70 lbs./cu. ft. Individual flakes are of irregular shape and are less than 0.5 sq.in. in area and less than 0.0625 in. thick. This size data is not a specification nor guarantee and is provided only to indicate the order of magnitude dimensions.

General:

Fee of Bs. 200 will be charged for trips between the Terminal and the anchorage by launch or tug for delivering personnel.

Method of cargo quantity determination: Barge drafts are marked to the nearest inch and capacity tables prepared by Charles Martin. The draft prior to commencement of and upon completion of discharging are noted. The amount transferred is obtained by consulting the tables. The quantity arrived at by totalling the amounts from the barges used is compared to the ships figures and reconciliation reasoned.

BALLAST: Vessels should arrive with sufficient ballast to permit safe handling. The Pilots require a draft of minimum 8 ft. forward, 18 ft. aft, on a T-2 or similar size tanker, 11 ft. forward and 20 ft. aft on a 26,000 d.w.t. or larger vessel. Ballast should be carried in a minimum number of tanks, and all other tanks stripped, so as to minimise deballasting time.

A relatively small amount of salt water remaining in ship's tanks or lines can contaminate crude and cause operating problems for the refiners. It is important therefore to strip tanks and lines as dry as possible.

Vessels provided with completely segregated ballast system are permitted to discharge ballast and load cargo simultaneously.

Absolutely oil-free ballast may be discharged overside. All dirty ballast must be pumped ashore. A 30-in. ballast line, 2×60,000 and 1×120,000 barrel slop tanks and separator system are available.

A considerable number of vessels are now participating in the programme to eliminate pollution of the seas. Under this programme, vessels may arrive carrying quantities of oil/water emulsion. If it is desired to follow the "load-on-top" procedure in such instances, it is requested that the Marine Representative be informed on arrival.

MEDICAL: Medical treatment and hospitalisation, if required, is provided at a hospital located in the Lagoven concession, operated by the Society of Catholic Medical Missionaries. Several dentists are located in the area.

Italian Crew members covered by Casa Maritime insurance receive medical attention from the appointed medical representative in Punto Fijo.

Authorisation forms for medical and dental treatment are provided, which require Master's signature. Transportation is available at the Marine Office. Please note that if the patient does not speak Spanish or English, an interpreter should accompany him.

FUEL: Ship's requirements specifying grade and quantity desired are to be given to the Marine Representative boarding the vessel on arrival. All grades of bunker fuel, intermediate fuels and Diesels are available except Esso diesel. Bunker delivery rates average 2,500/3,500 barrels per hour. Bunkers are loaded through meters which automatically register quantities on bunker receipts.

It is the responsibility of ship's engineer to give "standby" notice to the terminal employee and advise him when to shut down.

FRESH WATER: Fresh water can be supplied if necessary; however, supplies are limited to essential requirements. All fresh water is piped from distant sources. Loading rate is about 10 t.p.h.

CUSTOMS: Venezuelan laws are strict in regard to contraband and Masters are requested to instruct their crews not to take cigarettes or other articles ashore. Cigarettes in carton lots, cigars, tobacco, souvenirs, gifts (particularly items of women's apparel) should be collected prior to arrival in port, listed with the items in the slop chest and placed in the custody of the Master for deposit in the slop chest or closet which will then be sealed for the duration of the vessel's stay in port.

Firearms on board any merchant vessel calling at Venezuelan ports must not exceed one per officer, nor can the ammunition exceed 18 cartridges per officer, All firearms and ammunition must be noted on the stores list. Officers must not carry firearms while the ship is in Venezuelan waters and these sidearms and ammunition should be collected and held in the Master's safe custody. Crew members should be warned against taking knives or other weapons ashore.

While the vessel is in port, Venezuelan National Guard Officials are assigned on board to ensure compliance with Customs regulations. The law requires that meals be supplied to these officials during regular meal hours. Masters are requested to give them the privilege of eating in the officers' mess-room, to avoid difficulties.

DENSITY: The usual specific gravity of sea water at the berth is 1025, temperature ranges from 78°F. to 85°F.

CONSULS: Brazil, Great Britain, Italy, the Netherlands, and Norway have consular representatives in the area.

TIME: GMT minus 4 hours.

SHORE LEAVE: Also see "Health". Shore passes will be granted to all healthy persons. A representative of the Captain of the Port boards on arrival and issues the required number of passes. Shore passes are to be collected prior to sailing and given to the Pilot undocking the vessel. Vessels are not permitted to sail until all Crew members are on board, unless hospitalised or prior arrangements made for disembarking. A letter to this effect is required from the Master.

REGULATIONS: (i) *Pollution:* The laws of Venezuela are very strict in regard to the pollution of harbour and coastal waters by oil, and heavy fines are imposed for violations. No dirty ballast, oil or bilge slops are to be pumped or allowed to escape overboard. All overboard discharge valves from cargo tanks and bilges are to be secured before loading or discharging commences. Loading is to be conducted with the greatest care and vigilance in order that errors or delays in handling cargo valves may not result in overflows. All deck scuppers should be plugged before loading to avoid harbour contamination should an overflow occur. The Authorities require that a written report be submitted by the ship involved in the event of an oil spill.

(ii) *Gangways:* All vessels using the port of Amuay must provide a safe gangway. The use of rung ladders, pilot ladders, etc., is contrary to Port Regulations, and Port Authorities will not board except by means of a safe gangway or accommodation ladder.

(ii) *Passengers:* Passengers will not be permitted to disembark unless in possession of the required visa and documents. To facilitate clearance, if passengers are carried, the Master should include advice to this effect in his radio ETA.

(iv) *Visitors:* All visitors to ships are prohibited except those company employees, petroleum inspectors, etc., whose duties require their presence aboard.

(v) *Rats:* Rat guards required at all times.

GENERAL: *(a) Weather Conditions:* There is little rainfall at Amuay Bay; annual precipitation averages 12 in. The so-called rainy season usually coincides with the Caribbean hurricane season, from August to November, although Amuay lies South of the usual hurricane track. During these months calms are often experienced and winds from a Westerly direction may be expected. Normal winds are steady from the N.E., average force 4, Beaufort Scale, with a max. of force 8. Temperatures average about 85°F., with little variation from day to night or season to season.

(b) Tides: The normal range of the tide is about 12 in.; however, a 28 in. range has been observed during spring tides.

(c) Lubricating oil: Supplies of Essomarine lubricating oils are available. Requirements should be given in vessel's radio notice of arrival.

(d) Bonded Stores: Cigarettes or other stores in bond are not obtainable in Amuay Bay.

(e) Cash Advances: The local currency is the Venezuelan Bolivar and cash advances are made only in this currency. It is requested that any requirement for cash advances be included in the vessel's ETA radio, to permit delivery on board on arrival.

(f) Charts: No supplies of charts or sailing directions are available at Amuay Bay.

(g) Laundry: A 6 hour laundry service is available throughout each working day. Such service should be requested in the vessel's ETA message.

(h) Mail: Itemised lists are required for ship's mail, to be signed by the Master. Unless other instructions are given, ship's mail received after sailing, or for vessels on which no advice has been received, will be held for 30 days and then returned to Owners or Operators at ship's expense.

(i) Inspection – Petroleum Products: Chas. Martin & Co. and E. W. Saybolt, petroleum inspectors, are available if specified. Telephone numbers, Chas. Martin 44665, 44650 and 44211; Saybolt 44639, 44645 and 44227.

(j) Norwegian Government Seamen Service: A field representative of the above service is stationed at Amuay providing Norwegian and Swedish film exchange and other usual services. His telephone number is 51459.

(k) Personnel – Seamen Left Ashore: In the case of seamen left ashore for hospitalisation, repatriation or other reason, all documents and personal effects are to be delivered to the Marine Office before sailing. A letter is required from the Master advising the maximum advances to be made to the seamen, if any, and instructions concerning his repatriation. All expenses incurred by seamen left ashore, including cost of repatriation, are for ship's account.

It is important that Masters bear in mind that the Venezuelan law will at all times hold the vessel, her Master, Agent or owner, responsible for any seamen left behind in Venezuela.

(l) Provisions and Stores: Provisions and stores in limited quantities are available, the prices and quality of some items, such as fresh fruit, fish, shrimps, vegetables, etc. are competitive; dry stores are considerably higher than in most ports. The Port Steward will assist in filling requisitions.

(m) Radar and Radio: Radar and radio repairs can be effected in Amuay. A service repair man is available, but spare parts are limited.

(n) Repairs: Shore facilities are available only for emergency repairs of a minor nature. The nearest dry docks are those at Puerto Cabello and Curacao, N.A. Several contractors in the area provide labour for hull painting and for tank cleaning. Contracts for these services are made by the ship's Master directly with the contractor.

(o) Surveyors: There are no appointed surveyors to American Bureau of Shipping or Lloyd's in the area. However, with sufficient advance notice, arrangements can be made to have their nearest representatives come to Amuay to attend surveys.

(p) Walport Film Exchange: Subscribers to the Walport Service may exchange films at the Marine Office.

(q) Plimsoll Marks: The Captain of the port requires that the Plimsoll Marks of all vessels using the port be clearly visible. Vessels will be checked on completion of loading, and if the Plimsoll Marks are not readily legible, permission to sail may be withheld.

(r) Landmarks: Three conspicuous radio towers, 350 ft., painted alternate red and white bands, with red flashing aircraft warning lights, are located in the refinery area, 1 mile East of the docks.

ATTENDANCE: Representatives of the Marine Department board vessels immediately on arrival, and it is particularly requested that Masters indicate at that time all ship's requirements. The Marine Office Building is located at the Pierhead Trestle and personnel are available for assistance at all hours. Telephones are located on all docks and the Marine Shift Supervisor can be called on telephone No. 444475 or 444465.

CARIPITO: 10.09 N. 63.02 W.

OPERATORS: Lagoven, S.A.

LOCATION: Caripito is located on the West bank of the San Juan River in Lat. 10° 09′ 25″ N., Long. 63° 02′ 01″ W.

ESSENTIAL REQUIREMENTS:

1. Incoming vessels must send to Caripito their ETA Guiria at least 3 days in advance followed by confirmation 48 and 24 hours before arrival.

2. If a ship originally cleared for another port (including some other Venezuelan port) is diverted at sea to Caripito, certain information must be radioed to Caripito prior to arrival to avoid a heavy fine and/or delays. See "Radio".

3. No dirty ballast may be pumped overside in port or in Venezuelan coastal waters. Limited ballast facilities are available at Caripito Terminal.

4. Vessels calling at Caripito must obtain Government Pilots at Guiria.

5. The Venezuelan flag must be displayed during daylight hours while vessel is within port limits.

6. The emergency fire signal in Caripito dock area is 6 short blasts and 1 long blasts on ship's whistle or siren. No other signal is to be given in the case of emergency.

APPROACHES: The traffic in San Juan River is restricted to one-way from Marieta Point to Caripito. Therefore, instructions are issued at Guiria to incoming vessels relative to what action to take on arrival at Marieta Point. Outbound traffic is controlled so as not to conflict with these instructions.

1. Guiria: The town of Guiria is located on South coast of Paria Peninsula on N.W. shore of Gulf of Paria. When approaching from East a signal tower will be observed on a bluff slightly to North of town.

2. Maturin Bar: Buoy E-1, marks the entrance to Maturin Bar Channel. At Punta Gorda there is a light tower located in approximate Lat. 10° 09′ 50″ N., Long. 62° 37′ 52″ W. displays a flashing red light.

3. Channel: Maturin Bar Channel is 14 miles in length and 400 ft. in width. The tidal range over the bar varies from 4 ft. 6 in. to 4 ft. 9 in. with currents up 3 knots. The average salinity of water is 1.009; however, this may vary considerably between wet and dry seasons and spring and neap tides. Maximum draft permitted by Venezuelan regulations is 34 ft. in fresh water. There is a restriction of 6 in. less for all motor tankers. On leaving Maturin Bar Channel the San Juan River narrows from approximately 1.25 miles in width to about 0.7 miles with slight variations in width up to Marieta Point where it narrows to about 1,200 ft. and varies between 800 ft. and 2,000 ft. up to Caripito. Marieta Point marks intersection of Cano Frances and the San Juan River. It is also at this point that course of San Juan River changes approximately 100° to starboard and it is the beginning of one-way traffic. Frequently, incoming vessels are requested to anchor below this point to await outbound traffic. There are 32 lights marking strategic points in San Juan River between Maturin Bar and Caripito Terminal. These light towers are painted aluminium and are easily visible during daylight hours.

DOCUMENTS: (also see "Radio").

1. *Clearance (inward and outward).* Inward clearance is effected at Caripito. The sanitary inspector boards vessel at anchor or at berth depending on tidal conditions and/or the availability of a berth. The Customs and other Government officials usually board at the berth. However, should there be a delay awaiting berth or tide, the entry will be granted while vessel is at anchor, in which case accommodation ladder must be rigged.

It is necessary that the following documents be ready on arrival:
Ballast List (1 original, visaed).
Passenger List (5 copies, none of which visaed).
Baggage List (5 copies, none of which visaed).
Crew List (7 copies, none of which visaed).
Sailing Permit from Last Port (1 original, visaed).
Stores List (5 copies, see *Note).*
List of Personal Effects (3 copies, none of which visaed).
List of Contents of Slop Chest (3 copies, none of which visaed).
List of Passengers in Transit (5 copies, none of which visaed).

Note: The Stores Lists may be prepared on board prior to arrival unless ship is coming from Netherlands Antilles or the Guianas, in which case they must be visaed by Venezuelan Consul at port of departure.

2. *Cargo documents.* The Port of Caripito has in force a system of cargo documentation for expediting the sailing of vessel. It is as follows:

a. Certain documentation with approximate cargo figures of unofficial nature are placed on board and official cargo documents are airmailed to discharge port.

b. Blank signed documents are placed on board to vessel's departure from Caripito and thence correct figures are radioed to sub-agency at Guiria who delivers them in writing to Master, who acknowledges its receipt by signing carbon copies of transmittal sheet.

PILOTAGE: Pilots are employees of Venezuelan Government and act in an advisory capacity. The Master retains responsibility for ship at all times. In the event it becomes necessary to disregard the Pilot's instructions in order to ensure the safety of the ship, the Master must forward through the Marine Department a full written report of the circumstances, for delivery to the Captain of the Port.

Pilots are compulsory and are embarked and disembarked at port of Guiria through a sub-Agent. Vessels should proceed to the Guiria sea buoy (position 10° 33′ 12″ N. 62° 15′ 00″ W.) and await instructions. If arriving during the hours of darkness, certain instructions are usually transmitted by light signals from the signal tower. Voice radio communications can be established at any time with Guiria or Lagoven Caripito on frequencies 2182 kc/s, 2638 kc/s and 2738 kc/s. The launch which embarks the Pilot will also deliver instructions to the Master relative to the movements of his vessel en route to Caripito, port regulations, facilities, etc. The regular pilotage fees cover the area from the entrance to Maturin channel to and from Caripito. The Pilot is to be provided sleeping quarters and food equal to that provided the officers aboard ship.

Note: Complaints or observations concerning the Pilot's handling of vessel should be noted on back of pilotage ticket.

TIDES: The normal range of tide in the dock area is about 12 ft. with currents up to 3 knots during the flood and 4 knots during the ebb in rainy season (May-December). The normal current is 2.5 knots during the flood and 3 knots during the ebb.

ANCHORAGE: For vessels awaiting berth, there is an anchorage about 1,000 m. up-stream from the Caripito Terminal. Vessels awaiting clear channel may at times be requested to anchor at Punta Marieta. Vessels awaiting high tide anchor at Punta Marieta or off Punta Gorda.

MAX. SIZE: Vessels up to 745 ft., 52,000 d.w.t. and max. draft *33 ft. (FW) at No. 2 berth and LOA 630 ft., 32,000 d.w.t. and max. draft *33 ft. (FW) at No. 3 berth.

*Safe draft per tide tables.

RADIO: The cable and telegraphic address for Lagoven at Caripito is "Lagomar – Caripito". Messages to and from ships at sea are routed through the Government Radio Station at Maiquetia (La Guaira), call letters "YVG". This station operates on a 24-hour continuous watch, on the following frequencies:

Listening Frequencies: low frequency, 500 kc/s; high frequency, 4178, 6267, 8356, 12534, 16712, 22225 kc/s. Transmitting Frequencies: low frequency, 500, 472, 464, 417 kc/s; high frequency, 4322, 4352, 6505.5, 6519.5, 8722, 8730, 12817.5, 17141.6 kc/s. Radio notice of arrival should be sent 72 hours prior to arrival at Guiria and corrected if weather or other conditions delay the vessel.

Radio telephone listening watches are maintained on a 24-hour basis at Guiria and at Caripito on 2182 kc. The following frequencies are available for communications after contact: 2638 kc and 2738 kc.

All vessels en route to Caripito may also communicate with Amuay or La Salina Marine offices and request that message dealing with corrected ETA's, Pilots and other business be relayed to the Caripito Marine Office.

Vessels that were originally cleared for another foreign port, or another Venezuelan port, and were subsequently diverted at sea, should radio the following information to Creole Caripito prior to arrival:

Vessel's name
Master's name
Vessel's flag
Number of crew
Estimated time of arrival at Caripito.
Last port of call
Port for which originally cleared.
Grade and quantity of cargo to be lifted.

This information is required in order to make in advance special arrangements for inward clearance, to avoid payment of a fine. It is necessary in such a case that the following documents be ready on arrival:

Crew List (original and 6 copies).
List of Personal Effects (original and 2 copies).
List of Contents of Slop Chest (3 copies).
Stores List (original and 1 copy).

Also required are the original and 2 copies of the radiogram instructing Master to proceed to Caripito. Outward clearance documents are placed on board the vessel prior to departure from the Caripito terminal.

Masters should bear in mind that while vessels are within Venezuelan territorial waters, Government Authorities do not permit the use of ship's radio equipment. Cables and radiograms should be handed to the company representative for transmittal via shore radio communication system. Caripito has also radio telephone communication with North and South America and Europe. For further information contact Port Services Section in the terminal building, telephone C-335.

BALLAST: Ballast is not required when mooring. Any ballast carried should be in a minimum number of tanks, and all other tanks stripped, so as to minimise deballasting time.

A relatively small amount of salt water remaining in ship's tanks or lines can contaminate crude and cause operating problems for the refiners. It is important therefore to strip tanks and lines as dry as possible.

Vessels provided with completely segregated ballast system are permitted to discharge ballast and load cargo simultaneously. All ballast clean or dirty must be pumped ashore. Contaminated residues may be pumped ashore, where facilities are available for receiving up to a max. of 20,000 barrels.

A considerable number of vessels are now participating in the programme to eliminate pollution of the seas. Under this programme, vessels may arrive carrying quantities of oil/water emulsion. If it is desired to follow the "load-on-top" procedure in such instances, it is requested that the Marine Representative be informed on arrival.

BERTHING: The Marine Office Building is located on the West bank of the San Juan River upstream from the berths. Representatives of the Marine Department board vessel immediately upon arrival and it is particularly requested that Masters indicate at that time all ship's requirements. Personnel are available for assistance at all hours.

Lagoven maintains a deep water terminal, consisting of 2 ocean tanker berths, Nos. 2 and 3. These are T-type piers with breasting dolphins located approximately 10 ft. off the face of each pier.

All terminal facilities are under the control of Lagoven, S.A. The port is open for navigation during day and night. All ocean tankers are moored at berths No. 2 and 3 on the flood tide only. Vessels may sail from berth No. 3 at any stage of the tide. Sailings from berth No. 2 are restricted to flood tide only when berth No. 3 is occupied.

A vessel entering or leaving port must be assisted by the same Government Pilot taken aboard at Guiria. A Custom guard will board at the same time and remain with the vessel. A Lagoven Representative will deliver to the Master his loading and docking instructions together with any other information pertinent to the vessel's call. He will also sign the Notice of Readiness if requested. The vessel will proceed to anchor to await flood tide to dock, to await berth, or will swing to the flood tide in the turning basin and proceed directly to the berth depending on circumstances.

LOADING: Loading rates, particularly for low-flash products loaded during the hours of darkness or when topping off cargo tanks, will be reduced by terminal to meet existing conditions.

All loading and discharging will be stopped during passage of an electric storm, and ullage covers must be closed and dogged down. During periods of calms, loading of gasoline or other similar low-flash products may be loaded at reduced rates or loading stopped if the heavy vapours are not being dispersed quickly enough to prevent hazard from accumulated gas pockets. Ship's officers are cautioned to be on their guard during such conditions.

Loading rates will be reduced when topping off, if requested by the ship's officer.

Instructions as to grade or grades of cargo, and the approximate loading rate anticipated, will be given to the Master. Supplementary information including number and size of lines and hoses will be furnished to the Chief Officer before loading commences.

If vessel's loading orders from Owners or charterers do not agree with terminal's orders, either as to grades or quantity, the marine representative should be advised immediately. The terminal is authorised to load 10% more or less than the quantity nominated; if the cargo to be lifted will be more or less than 10% limitation consultation is necessary.

A terminal employee is stationed at each pier during the entire time the ship is discharging ballast, bunkering, or loading cargo. Fifteen minutes"standby" notice should be given to this man prior to completion of ballast, bunkers, or cargo.

MEDICAL: Medical treatment and hospitalisation, if required, is provided at a hospital located in the concession. Several dentists are located in the town of Caripito. Authorisation forms for medical and dental treatment are provided, which require Master's signature. Transportation is available at the Marine Office. Please note that if the patient does not speak Spanish or English, an interpreter should accompany him.

FRESH WATER: Fresh water is available in any quantity. Delivery is made through 2.5 in. national standard fire hose thread hydrants. Ship's personnel must provide hoses and connect up.

FUEL: Bunker "C" fuel oil, marine diesel and intermediate fuels are available. It is the responsibility of ship's engineer to give "stand-by" notice to the terminal employee and advise him when to shut down.

CONSULS: There are no consular representatives in the area. Vessels bound for U.S.A. or British Caribbean ports will be provided with a letter stating this fact.

CERTIFICATES: All ships calling at a Venezuelan port for the first time must be measured for tonnage by Captain of the Port. It is the usual practice to take ashore the ship's Panama Canal or Suez Canal Certificate, which is used as a basis for recalculating tonnage under the Venezuelan regulations, and is returned before sailing. The Venezuelan Admeasurement Certificate, when later issued is forwarded to the Owners. A fee is charged for this certificate, which is payable only on ship's first call. Vessels registered in following countries are excluded from above regulations: Netherlands, Germany, France, Portugal, United Kingdom, Denmark, Sweden, U.S.A., Ireland and Norway.

CUSTOMS: While the vessel is in port, Venezuelan National Guard officials are assigned on board to ensure compliance with Customs regulations. The law requires that meals be supplied to these officals during regular meal hours. Masters are requested to give them the privilege of eating in the officers' messroom, to avoid difficulties.

Venezuelan laws are strict in regard to contraband and Masters are requested to instruct their crews not to take cigarettes or other articles ashore. Cigarettes in carton lots, cigars, tobacco, souvenirs, gifts (particularly items of women's apparel) should be collected prior to arrival in port, listed with the items in the slop chest and placed in the custody of the Master for deposit in the slop chest or closet which will then be sealed for the duration of the vessel's stay in port.

Firearms on board any merchant vessel calling at Venezuelan ports must not exceed 1 per officer, nor can ammunition exceed 18 cartridges per officer. All firearms and ammunition must be noted on the stores list. Officers must not carry firearms while ship is in Venezuelan waters and these side-arms and ammunition should be collected and held in the Master's safe custody. Crew members should be warned against taking knives or other weapons ashore.

REPAIRS: Only minor repairs of an emergency nature can be made. There are no electronic repair services available in the area.

SHORE LEAVE: Shore leave is permitted and a representative of the Captain of the Port boards on arrival and issues the required number of passes. Shore passes are to be collected prior to sailing, and given to the Lagoven Despatcher undocking the vessel. Vessels are not permitted to sail until all crew members are on board, unless hospitalised or prior arrangements made for disembarking.

TIME: Local time is GMT minus 4 hours.

GENERAL:

Gangways: Gangways at berths No. 2 and 3 are provided by the terminal.

Plimsoll Marks: The Captain of the Port requires that the Plimsoll Marks of all vessels using the port be clearly visible. Vessels will be checked on completion of loading, and if the Plimsoll Marks are not readily legible, permission to sail may be withheld.

Surveyors: There are no appointed surveyors to the American Bureau of Shipping or Lloyd's in the area. With 48 hours notice, non-exclusive surveyors can be obtained from Caracas, or at times from Puerto La Cruz, or qualified Masters or chief engineers may be available for appointment as surveyors when required.

Bonded Stores: Cigarettes or other stores in bond are not obtainable at Caripito.

Cash Advances: The local currency is the Venezuelan Bolivar and cash advances are made only in this currency. It is requested that any requirement for cash advances be included in the vessel's ETA radio, to permit delivery on board on arrival. Cash returns can be accepted only during the normal working day – 0700 to 1600 hrs. Sundays and holidays excluded.

Provisions and Stores: Provisions and stores in extremely limited varieties and quantities are available at prices considerably higher than in most other ports.

Charts: No supplies of charts or sailing directions are available at Caripito.

Personnel – Seamen Left Ashore: In the case of seamen left ashore for hospitalisation, repatriation or other reason all documents and personal effects are to be delivered to the Marine Office before sailing. A letter is required from the Master advising the maximum advances to be made to the seaman, if any, and instructions concerning his repatriation. All expenses incurred by seamen left ashore, including cost of repatriation, are for ship's account. It is important that Masters bear in mind that the Venezuelan law will at all times hold the vessel, her Master, Agent or owner, responsible for any seamen left behind in Venezuela.

Laundry; Laundry service is available.

Lubricating Oil: Supplies of marine lubricating oils are available from Puerto La Cruz. Quantities required should be included in the ETA cable.

Mail: Any pending ship's mail will be delivered on board by the marine dispatcher on arrival at Caripito. At the same time he will receive any ship's mail to be dispatched. The marine dispatcher will accept personal mail only if it carries the proper amount of Venezuelan postage, or if Master authorises postage by signing 7 copies of the Company Post Transmittal form. Masters interested in knowing the individual postage amounts to be paid by each crew member, should provide a list, in duplicate, of the senders, and number of letters sent by each one identified by a number written on each letter. Copy of this will be returned aboard vessel when leaving this port outward bound. If not ready on time, it will be air-mailed to the vessel's next port of call.

Inspection – Petroleum Products and Crude Oil: Charles Martin & Co. and E. W. Saybolt, petroleum inspectors, are available from Puerto La Cruz if specified.

Visitors: All visitors to ships are prohibited except those company employees, petroleum inspectors, etc., whose duties require their presence aboard.

Passengers: Passengers will not be permitted to disembark unless in possession of the required visa and documents. To facilitate clearance, if passengers are carried, the Master should include advice to this effect in his radio ETA.

Pollution of Harbour and Coastal Waters: The laws of Venezuela are strict in regard to pollution of harbour and coastal waters by oil, and heavy fines are imposed for violations. No dirty ballast, oil or bilge slops are to be pumped or allowed to escape overboard. All overboard discharge valves from cargo tanks and bilges are to be secured before loading or discharging commences. Loading is to be conducted with greatest care and vigilance in order that errors or delays in handling cargo valves may not result in overflows. All deck scuppers should be plugged before loading to avoid harbour contamination should an overflow occur. The authorities require that a written report be submitted by the ship involved in the event of an oil spill.

EL CHAURE: 10.15 N. 64.37 W. (See Plan Book)

OPERATORS: C.V.P./Llanoven.

LOCATION: El Chaure Marine Terminal is located on the South shore of the head of Bergantin Bay. 1.8 miles N.E. of Puerto La Cruz: Lat. 10° 14′ 50″ N. Long. 64° 36′ 57″ W.

This terminal is also considered to be berth No. 6 of 'Puerto La Cruz' which see.

DOCUMENTS: To avoid penalties, ships clearing for Venezuelan Ports must present certain papers herein set forth for arrival and clearance after docking. The Clearance is made by Government officials accompanied by a company representative.

The following documents must be presented:

1 copy of Ship's register
Clearance from last port
1 copy of Ballast Certificate
6 copies of Crew list
5 copies of Passenger and baggage list
2 copies of List of passengers in transit
4 copies of List of personal effects
4 copies of Stores list
2 copies of List of slop chest
Sailing permit issued by Marine Authority of last port of call.
Dispatch issued by Venezuelan Consul at last port.

*If ship was dispatched from a Caribbean port, store list must be visaed by Venezuelan Consul at port of departure, otherwise, list may be made on board before arrival. Lists should be made separately for deck, engine and cabin stores. If no Venezuelan Consul is available, visa may be made by Consul of a friendly nation, by Chamber of Commerce or two prominent businessmen. In these cases, when Venezuelan Consul is not available, each document should have the following notation: "Por no existir en la localidad Agente Consular Venezolano y a peticion de los embarcadores certifico el presente documento" (Signature).

Translation of above Spanish quotation: "In the absence of a Venezuelan Consul in this area and per request of the shippers, this document is hereby certified (signature).

The same authority signing the above statement must attach a dispatch (Despacho) stating ship's name, nationality, Master's name, net tonnage, port of departure, port of entry in Venezuela. This dispatch must have the signature and either seal of the authority or proof of responsibility.

PILOTAGE: Pilots are employees of the Venezuelan Government and pilotage is compulsory for vessels entering or leaving the harbour. The Company will arrange for Pilots to board all vessels as necessary. Whenever it might be deemed necessary for the Master to disregard the Pilot's advice in order to ensure the safety of the vessel, a written report must be submitted by the Master to the Venezuelan Port Captain, explaining the reason for such action.

ANCHORAGE: The crossed line portion on the plan is the anchorage zone for all ships after arrival at Pozuelos Bay. The Company will dispatch the Pilot, by launch, to all ships when they are ready to be docked. On entering the Pilot Zone, the Venezuelan flag must be flown from the foremast; it must be flown at all times between sunrise and sunset.

MAX. SIZE: Max. draft 39 ft. 6 in.

RADIO: El Chaure Terminal Office may be contacted on radio-telephone SSB or AM frequencies of 2738, 2638, 2182 and 2120 kc/s. Frequency 2182 kc/s should be used for initial contact.

Arrival advice: Masters are required to advise by cable their ETA. Such notice should reach El Chaure at least 48 hours ahead of vessel. In cases of ships being diverted at sea to a Venezuelan Port, or to another Venezuelan Port, Venezuelan regulations require, by cable, prior to arrival, name of Master, number in crew, port of departure, port to which originally cleared, flag of ship and net registered tonnage.

VHF: Channel 16 can be used after arrival at Pozuelos Bay.

TUGS: Tug assistance to moor and unmoor is compulsory at El Chaure installations. Ships over 145 m. long must use 2 tugs having not less than 1,600 h.p. each for mooring and unmooring at El Chaure. 1 launch is required for handling the lines.

BERTHING: The wharf has a length of 100 ft. with dolphins established on each side. The dock accommodates vessels drawing up to 39 ft. Sea conditions are usually very good in the entire area. Waves are almost nil and out of the hurricane path. A chain of small islands makes El Chaure a natural port. Only 1 vessel at a time can be moored for loading or unloading. The normal range of the tide is 1 ft.

BALLAST: Vessels arriving in El Chaure must carry sufficient ballast to ensure safe handling. By Venezuelan Law, all dirty ballast must be pumped ashore into ballast pits. Vessels having separate clean tanks for ballast may pump overboard, after first being inspected and passed by Port Authorities. The Company Terminal facilities include a 16 in. ballast line, which empties into ballast pits about 3,500 ft. from the dock. These pits have an elevation of 32 ft. above the dock and will hold 50,000 bbls. The ballast line will stand a pressure of 100 p.s.i.g. The pressure is recorded at the dock. The vessel will be held responsible for damages to the shore ballast line and spills that maybe occur because of line rupture.

LOADING: Before tying up, blind flanges on the ship's manifold should be removed, hose derrick to be top and rigged to lift shore hoses along with dock booms. All vessels must dock with starboard side to dock. The Company dock supervisor will inform the Master of the vessel as to characteristics of cargo to be loaded, loading rates and all other information necessary for safe and efficient loading operations. During the ship's stay at the dock, company employees are available at all hours to assist in any manner. After loading is completed, if the dock space is required for another vessel the ship must vacate the berth and wait at anchorage until cargo and sailing papers are completed.

FRESH WATER: Available, rate 10 t.p.h.

REPAIRS: Facilities are limited; any repair work must be requested by Master in writing.

CONSULS: The following are in Puerto La Cruz: Belgium, Brazil, Denmark, France, Great Britain, Holland, Italy, Panama, Norway, Colombia, Spain, Sweden and West Germany.

SURVEYORS: Aivepet, Charles Martin & Company and E. W. Saybolt maintain offices in Puerto La Cruz for inspection of cargo if required.

TIME: Local time is 4 hours slow on GMT, year round.

POLLUTION: Pollution of coastal waters is strictly forbidden by Venezuelan Law. The escape of dirty ballast or of cargo either at the dock or in the harbour or in territorial waters will result in heavy fines by Venezuelan authorities. If oil is spilled an estimation of quantity should be made by the Master of the vessel, Venezuelan Authorities and Company personnel, acting jointly. Their joint report must be submitted to the Venezuelan Petroleum Inspector from the Energy and Mines Office, and also the National Guard Headquarters in Puerto La Cruz. The Ministry of Energy and Mines will assess a fine based on the quantity of oil that was spilled. Also the ship is held responsible for the spill and cleaning. Chemicals, equipment, boat and labour used for this purpose are for the ship Owner's and/or operator's account. Each ship must maintain strict supervision on discharging of ballast as well as loading cargo in order to avoid spillage.

CUSTOMS: Venezuelan laws are strict in regard to contraband and Masters are requested to instruct crews not to take cigarettes or other articles ashore.

GENERAL: *Crew:* Passes for shore leave for ship's crew will be given to Master by Company Representative on docking or at anchorage. These passes must be filled out for each Crew member prior to Venezuelan authorities visit. Passes may be used during the ship's stay but must be returned to the National Guard at the dock prior to departure. Before ship's departure a report must be made to the Dock Master if any Crew member is missing. Crew members left behind will be placed in custody by Venezuelan authorities until deported at vessel's expense. A Crew member requiring medical or dental treatment must submit his request for such aid through the Master to the Dock Master. Arrangements for seamen arriving from other ports, transferring to other ships or being repatriated are handled by the vessel's Agency.

Under the Venezuelan law the vessel is responsible for all seamen in the country during their entire stay. Masters are requested to leave written instructions with the Dock Master for handling seamen left ashore. The Master of the ship must indicate his acceptance of the responsibility for all costs incurred in handling a seaman.

Seaman Left Ashore: A letter from the Master is required advising the amount of cash advance and any other instructions concerning the seaman's repatriation. All expenses incurred by the seaman, including the cost of repatriation are for the vessel's account. The documents and personal effects of seamen left ashore for hospitalisation, repatriation or any other reason, must be delivered to the Terminal Office before sailing. Venezuelan Law holds the Master, ship's representatives and Owners responsible for any seaman left behind in this country.

In Dock: Masters are requested to observe the following regulations while alongside the Company Terminal:

1. – Sufficient number of Crew members must be on board at all times, during discharge of ballast and loading of cargo to ensure proper handling of mooring lines.
2. – Rat guards are to be on all mooring lines during entire stay.
3. – Venezuelan authorities do not permit blowing of heavy smoke from vessel's funnel, while in port. Breaking of this rule may result in Government fine and/or removal of ship from the dock.
4. – Venezuelan National Guard personnel are assigned to guard duty for each ship while it is at the dock. Meals must be furnished for these guards in the Officers' Messroom.

Visitors: All visitors to vessels are prohibited, without written permission of the Port Authorities. Dock Master, Petroleum Inspectors, Dispatchers and Terminal employees handling hoses may board ship in performance of their duties.

Charts: Not available at El Chaure.

AGENCY: All incoming vessels must have a local Agent to render all services required for a prompt and efficient tanker turnaround and to cancel all vessel disbursements.

EL GUAMACHE: 10.52 N. 64.04 W. (See Plan Book)

SHIPMASTER'S REPORT: October 1978.

LOCATION: The Port of El Guamache is a new developing port, located about 1000 feet northward of Pta Mangle on the Isla De Margarita (see B.A. Chart 230).

DOCUMENTS:
Clearance from last port.
Sealed envelope for Customs
Visaed B/L and Sobordos.
Despatch from last Venezuelan port, if any.
Consular Documents from last foreign port.
6 Crew Lists.
Vaccination Certificates of Crew.
4 Store Lists (Deck, Engine, Provisions, Bonded store).
4 Personal Effects Lists.
4 Arms & Ammunition Lists.
4 Passengers Lists.
4 Mail Lists

ANCHORAGE: On the Western side of the Pta. Mangle in Bahia Guamache, depth 8–11 fathoms.

PILOTAGE: Pilotage is compulsory. Pilot boards on arrival or at anchorage. Vessels arriving at the anchorage must keep engines on stand-by and wait for shifting or berthing instructions.

Note: As at other Venezuelan ports, vessels must fly the Venezuelan flag at masthead and lower gangway for boarding party – Agents, Customs Officers, Quarantine Officers, Immigration Officers, Pilot and representative of Port Captain, etc.

RADIO: As a new developing port, no radio service at Margarita Island, all ETA wireless messages must be sent via ITT or YVG – 72, 48, and 24 hours prior to arrival

The port office is equipped with radio telephone installation, operating 0600-2000 hours, transmitting on VHF frequencies 156.8 mc/s (Channel 16.) Vessels calling in Spanish language will be answered promptly; if calling in English will be answered by English speaking person when on duty.

TUGS: Not available.

BERTHING: Length 126 m. with 3 dolphins installed at each end with catwalk to dolphins. Depths of water, 36 ft. at LW and 42 ft. at HW.

STEVEDORES: Arranged by Agents, normal working hours 0700-2100, cargo discharged into warehouse.

GANGWAY/DECK WATCHMAN: Necessary, normally engaged by Customs or Police.

OPENING/CLOSING HATCHES: Normally by crew.

FRESH WATER: Not available.

FUEL: Not available.

TIME: Local time is GMT minus 4 hours.

AIRPORT: Distance about 15 km. from port. Connections to other cities.

MEDICAL: Available at Polamar City about 31 km. from the berth.

PROVISIONS: Fresh and dry provisions supplied through ship chandlers from Polamar City and delivered on board.

CUSTOMS ALLOWANCE: 200 cigarettes and 1 bottle of wine or spirit.

REPAIRS: No repair facility available.

TELEPHONE: No telephone connection to vessel at present but provided inside warehouse and port office.

DENSITY: 1025

HOLIDAYS: As other Venezuela ports.

SHORE LEAVE: Shore leave permitted. Passes issued by representative of the "Direccion De Marina Mercante" on arrival. Shore passes to be collected prior to sailing and given to Agent.

DEVELOPMENTS: El Guamache has a development programme to construct new wharves Northward from present pier to accommodate 6 ocean-going vessels and expected to complete within 3 years.

All port facilities will be available. Margarita Island is the only free port in Venezuela. Tourism from the mainland and overseas is increasing day by day as Margarita Island has very good weather and beaches.

EL PALITO: 10.29 N. 68.07 W. (See Plan Book)

OPERATORS: C.V.P./Llanoven.

LOCATION (of El Palito Terminal)**:** The terminal facilities operated by Llanoven S.A. at the port of Puerto Cabello (Punta Chavez), are situated on the Venezuelan coast, 7 miles West of Puerto Cabello. The terminal has a 2,475 ft. pier, part causeway and part trestle, extending out from Punta Chavez along a shallow reef then angling into water 48 ft. deep. 2 tankers can tie up simultaneously at the berths.

WEATHER: Winds are normally from the N.E. with an average Beaufort scale force of 2-3. Average temperature about 85°. The months of January, February and March have the roughest sea and swell, and vessels may not be able to dock due to the weather.

TIDE: The normal range of the tide is 1 ft.

ESSENTIAL REQUIREMENTS:

1. Incoming vessels must send ETA 72 hours before arrival at El Palito Terminal and another 24 hours before arrival advising any change of ETA.

2. If a vessel originally cleared for another port (including some other Venezuelan port) is diverted at sea to El Palito, certain information must be received prior to arrival, to avoid heavy fine and/or delays.

3. *No Ballast* may be pumped overside in port. Ballast disposal facilities are available at the El Palito Terminal.

4. The use of Venezuelan Government Pilots is compulsory for docking and undocking.

5. The Venezuelan flag should be displayed at the mast-head during daylight hours by vessels anchored and berthed in Venezuelan waters.

6. In addition to other clearance documents, 2 copies of an itemised list of articles in the ship's slop chest must be presented to the authorities on arrival.

7. The emergency fire signal is 5 long blasts on the vessel's whistle or siren. No other signal is to be given in case of emergency.

8. Rat guards must be in place on all mooring lines.

APPROACHES: The terminal pier is marked by the following lights: One occulting red light at the top of No. 1 (N.W.) Hose Rack, 80 ft. above sea level. Latitude 10° 29′ 51″ N., Longitude 68° 07′ 13″ W., and one green light, flashing every 3 seconds at the top of No. 2 (S.E.) Hose Rack, 80 ft. above sea level, located 275 ft. S.E. of No. 1 Hose Rack. A group of 5 crude storage tanks, painted aluminium, visible 20 miles on a clear day, are located 1.25 miles 200° from the head of the pier.

DOCUMENTS:

A. Admeasurement Certificates. All vessels calling at Venezuelan ports for the first time must be measured for tonnage by the Captain of the Port. It is the usual practice to take the Ship's Panama Canal or Suez Canal Certificate, which is used as a basis of recalculating the tonnage under the Venezuelan Regulations and is returned before sailing. The Venezuelan Admeasurement Certificate is forwarded to the owners at a later date. A fee is charged for the certificate which is payable only on the vessel's first call. Vessels registered in the following countries are excluded from the above regulations: Denmark, France, Germany, Ireland, Netherlands, Norway, Portugal, Sweden, United Kingdom and U.S.A.

B. Inward clearance is effected on board immediately after docking by Government Port Officials and a representative of the Marine Department. It is necessary that the following documents be ready on arrival:
Clearance from last port (1 copy).
Ballast Manifest from last port (1 copy, visaed according to paragraph *(d)* if there is no Venezuelan Consul).
Crew List (9 copies).
Passenger and Baggage Lists (5 copies, visaed; 2 copies not visaed).
List of Personal Effects (5 copies not visaed).
Store List (3 copies, see paragraph (c)).
List of Slop Chest (3 copies not visaed).
Sailing Permit (issued by maritime authority of last port).

Vessels arriving with cargo to discharge, will also require:
Consular Mail (one sealed envelope from each loading port).
Manifest (Sobordo), 1 original visaed and 2 copies not visaed from each loading port.
Bills of Lading, 1 original and 1 copy visaed, and 4 copies not visaed from each loading port.
Tally books; 6 from each loading port.
Consular invoice: 3 originals visaed and 3 copies not visaed, from each loading port.
Commercial invoices: 3 from each loading port.

C. Store list prepared should indicate separately all deck, engine and cabin stores. The store lists may be prepared on board prior to arrival unless the vessel is coming from the Netherlands Antilles or the Guianas, in which case they must be visaed by the Venezuelan Consul at the port of departure.

D. Cargo and clearance documents should be visaed by the Venezuelan Consul at the last port of call. In the absence of a Venezuelan Consul, they may be visaed by the Consul of a friendly nation, by the Chamber of Commerce or by two reputable merchants, the latters' signature to be notarised. In the absence of a Venezuelan Consul, the following notation should be written on each document in Spanish, and signed by the alternates designated above: "Por no existir en la localidad Agente Consular Venezolano y a peticion de los embarcadores, certifico el presente documento".

(Signature)

Vessels originally cleared for another port, and diverted at sea to El Palito, should radio Llanoven Puerto Cabello the following information as soon as the change of sailing orders are received:
Advise diverted.
Name and class of vessel.
Number of crew.
Flag of vessel.
Last port of call.
Port from which originally cleared.
Estimated time of arrival at Pilot station.
Type and amount of cargo vessel will load.
Time required to discharge ballast.
Master's name in full as signature (John Jones, Master).

This information is required in order to make in advance special arrangements for inward clearance to avoid payment of fines.

Outward clearance and cargo documents are delivered on board by the Marine Dispatcher. However, in order to obtain the sailing permit, a special form which is delivered on board on arrival must be completed, not later than 2 hours before sailing time. This form gives cargo and freeboard information required by the Captain of the Port. In addition, one of the 9 copies of the crew list specified above, corrected to show any changes made while in port, should be attached to the form.

PILOTAGE: The Pilot's working hours are from 0600 to 1800 hrs. There are no special charges for their assistance during those hours on workdays. On Sundays and holidays they charge overtime. There is also a charge when ship has anchored in the bay as according to the pilotage law each movement (and entering the bay is one movement) requires a Pilot. By special agreement only Pilot's overtime will be charged for anchorage, as anchorage and docking is considered as one movement with respect to Government Pilotage Fee.

Pilotage is a compulsory government service. The government charges the Pilot's assistance according to ship's net tonnage. Vessels under flags of Panama and Liberia are required to have their Venezuelan Tonnage Certificate. The government charges for docking and sailing.

Pilots are employees of the Venezuelan Government and pilotage is compulsory for vessels entering or leaving the harbour. The terminal will arrange for Pilots to board all vessels as necessary. Pilots meet the vessel via launch provided by the terminal. The Pilot may decline to moor the vessel if it is not equipped with satisfactory mooring equipment, lines, gear, etc., or if it is not sufficiently ballasted. It is the responsibility of the Master to notify the Pilot of any special conditions or peculiarities, such as defective navigation equipment, mooring lines, tackle, gear or lack of necessary equipment, which might impose hazards in connection with the handling, mooring, discharging or loading of vessels.

At the berths, vessels must be moored to the entire satisfaction of the Pilot and the terminal operators' Mooring Master.

The Pilot acts in an advisory capacity. The Master retains responsibility for the vessel at all times. In the event it becomes necessary to disregard the Pilot's advice in order to ensure the safety of the vessel, the Master must forward a full written report of the circumstances through the terminal for delivery to the Captain of the Port.

ANCHORAGE: Notice of Readiness can be tendered at anchorage. The suggested anchorage for El Palito Terminal is located 0.5 to 1 mile North or West of the seaward end of the pier. The area to the East of the pier is not recommended as an anchorage.

RESTRICTIONS: None. Vessels enter day or night and at any state of tide.

MAX. SIZE: East berth draft 38 ft. 6 in. West berth draft 40 ft. Length 730 ft.

BALLAST: Due to the exposed location of the oil piers, vessels are required to be ballasted to the following minimum drafts for safe manoeuvring to and from the berths:

Overall Length of Vessel	*Minimum Draft Required*
400 – 480 ft.	Forward 9 ft., Aft 17 ft.
481 – 700 ft.	Forward 12 ft., Aft 20 ft.
701 – 730 ft.	Forward 14 ft., Aft 23 ft.

A total capacity of 220,000 barrel slop pits and a 20 in. ballast line are available to receive all ballast.

Vessels with separate ballast tanks, lines and pumps may discharge ballast overside. Ballast for entering the harbour should be carried in the minimum number of tanks, and all other tanks stripped dry so as to minimise the time required for discharging ballast alonside berths.

All ships in ballast from abroad are charged for Consular Ballast Certificate.

HEALTH: No radio pratique. Health officers board vessel at berth.

RADIO: Puerto Cabello, Venezuela, Coastal Station call sign YVL, makes radio contact with all vessels "CQ" on 8722 kcs. at the following hours: 1130, 1330, 1530, 1830, 2130, 0030, 0200 GMT. Also "CQ" on 17141 kcs. at 1630 GMT and "CQ"on 4322 kcs. at 0430 and 0630 GMT.

VHF: Master should call El Palito Marine Terminal 3 hours before arrival on Channel 16.

TUGS: Use of tugs compulsory. Usually 2 tugs (1,600 h.p.) assist during docking and 1 (1,600 h.p.) during undocking.

BERTHING:

The use of both anchors is required for docking at both berths. It is considered prudent to have both anchors hove-out prior to entering the harbour in order to facilitate speedy release while mooring. The Pilot will advise whether the vessel is to be moored port or starboard side to the dock.

In the event the berth is required by another vessel, a vessel having completed loading may be required to vacate the berth promptly and proceed to anchorage to await cargo documents.

East Berth: Approach at very dead slow speed along a line parallel to a line formed by the East and the West berth at a distance from it equal to the distance of the North buoy. Drop the starboard anchor at the point of intersection of the ship's fore with a line formed by the two East shore range markers. Continue along same path at very dead slow speed until reaching with the ship's fore the East berth. Drop the port anchor. Allow the ship to drift into position alongside berth. This will be done by tying mooring lines as required by Pilot and with the help of the ship's engines.

West Berth: Approach at very dead slow speed along a line parallel to a line formed by the East and West berths and at a distance from it equal to the distance of the North buoy. Drop the port anchor at the point of intersection of the ship's fore with a line formed by the two West shore range markers. Continue along same path at very dead slow speed until reaching with the ship's fore the West berth. Drop the starboard anchor. Allow the ship to drift into position alongside berth. This will be done by tying mooring lines as required by the Pilot and with the help of the ship's engines.

General: Available hose connections, all 8 in., are as follows: 3 for Fuel oil, 1 for diesel products and 1 for leaded or unleaded gasolines. All dirty ballast to be pumped ashore through the fuel oil loading hoses.

LOADING:

Cargo: On completion of inward clearance, information regarding the number of hoses and loading rate will be given to the Master and Chief Officer. During ballast discharge supplementary information will be given to the Chief Officer. A 15 minute standby is required prior to finishing any grade.

Contamination of Crude: It has been established that one of the major causes of contamination of crude oil is the small amount of salt water remaining in the ship's tanks, pumps and ballast lines after discharging ballast. This small amount of salt water frequently results in costly damage and downtime to refining equipment and also presents many other problems. Therefore all tanks and lines must be pumped as dry as possible.

Draining of Hoses: Hoses are drained by gravity on all products and crude. Ship personnel must co-operate with terminal personnel in this operation to ensure complete draining of hoses into ship tanks and adequate drip cans must be placed to catch the remaining oil in line. Sawdust or equivalent must be on standby to clean up any oil leaks.

Loading Rates:

Commodity	*Available at berths*	*Size of line* (in.)	*Estimated max. barrels per hour*	*Hoses* *Pier 1* (in.)	*Pier 2* (in.)
Crude oil	1 – 2	30	27,000	3×8	2×8
Bunker C	1 – 2	24	17,500	3×8	2×8
Diesel	1 – 2	16	9,000	1×8	1×8
Unleaded gasoline	1 – 2	16	8,000	1×8	1×8
Leaded gasoline	1 – 2	16	8,000	1×8	1×8
Ship's bunkers	1 – 2	24/16/8	6,000	1×8	1×4
Lube	2	8		1×8	1×4

Loading rates will be reduced by the terminal when topping off tanks at the vessel's request.

Scuppers: Loading will not be started till all deck scuppers are properly sealed to the satisfaction of the terminal.

Simultaneous Deballasting and Loading: Vessels equipped with separate and completely segregated ballast tanks, and lines and pumps never used for oil may be permitted to discharge ballast and load simultaneously providing approval has been obtained from the terminal.

MEDICAL: Medical treatment and hospitalisation, if required, are available at the Seguros Sociales in Puerto Cabello. Several dentists are located in Puerto Cabello. Authorisation for any medical and/or dental treatment must be made by the Master. Transportation is available at the Terminal Office. If the patient does not speak Spanish an interpreter should accompany him.

FRESH WATER: Not available.

FUEL: Bunkers are available only for vessels loading cargo. Disputes as to quantity should be registered by signing the bunker receipt under protest and noting the ship's quantities thereon.

CUSTOMS: While the vessel is in port, Venezuelan National Guard officials are assigned on board to ensure compliance with Customs regulations. The law requires that meals be supplied to these officials during regular meal hours.

Venezuelan laws are strict in regard to contraband and Masters are requested to instruct their crews not to take cigarettes or other articles ashore.

Cigarettes in cartons, cigars, tobacco, souvenirs, gifts (particularly items of women's apparel), should be collected prior to arrival in port, listed with the items in the slop chest and placed in the custody of the Master for deposit in the slop chest which will be sealed for the duration of the vessel's stay in port.

CONSULS: French, Norwegian, Danish, Italian and Panama Consulates are represented in Puerto Cabello. There is no American Consulate. It is necessary for Masters of Panamanian flag vessels to visit the Panamanian Consulate at Puerto Cabello to present documents and receive dispatch as required by law. Regular office hours are from 0800 to 1200 hrs. and from 1400 to 1700 hrs. Mondays through Fridays; any dispatch issued outside of regular office hours is billed at double fees. Terminal Office will arrange transportation to Puerto Cabello upon request.

REPAIRS: Only emergency repairs of a minor nature can be made. Prices are very high.

REPATRIATION: The documents and personal effects of seamen left ashore for hospitalisation, repatriation or other reason, must be delivered to the Terminal Office before sailing. A letter from the Master is required advising the maximum amount of advances to the seaman and any other instructions concerning his repatriation. All expenses incurred by the seaman, including the cost of repatriation, are for the vessel's account. Venezuelan law at all times holds the Master, Agent or Owner responsible for any seaman left behind in Venezuela.

AIRPORT: Distant about 4 miles.

TIME: Local time is about GMT minus 4 hours.

SHORE LEAVE: Shore leave is permitted and a representative of the Captain of the Port boards on arrival and issues the required number of passes. Shore passes are to be collected prior to sailing and given to the National Guard watchmen on board.

Vessels are not permitted to sail until all crew members are on board, or special permission has been obtained to sail without a crew member.

REGULATIONS:

Engines: No engine repairs will be made while the ship is in dock. Engines are to be kept at standby at all times while the ship is in port.

Rat-guards: Vessels must use rat-guards on all mooring lines.

Visitors: All visitors to vessels are prohibited, without written permission in each case by the Port Captain or his assistant. Mooring Master, petroleum inspectors, dispatchers, and terminal employees handling hoses may board ship in performance of their duties.

Pollution: The laws of Venezuela are very strict in regard to the pollution of harbour and coastal waters by oil, and heavy fines are imposed for violations. No dirty ballast or oil is to be pumped or allowed to escape over the side. No engine-room or pump-room bilges may be pumped overboard. All pump-room sea suctions and overboard discharge valves must be secured prior to loading or discharging cargo. Loading must be conducted with the utmost care and vigilance so that errors or delays may not result in spills. All deck scuppers must be plugged tight before loading so that in the event of a spill pollution of the harbour may not result.

Garbage: No garbage is to be thrown over the side while the vessel is in port.

Passengers: Passengers will not be permitted to disembark unless in possession of the required visa and documents. To facilitate clearance, if passengers are carried, the Master should include this information in his ETA.

Firearms: Firearms on board any merchant vessel calling at Venezuelan ports must not exceed one per officer, nor can the ammunition exceed 18 cartridges per officer. All firearms and ammunition must be noted on the store list. Officers must not carry firearms while the vessel is in Venezuelan waters and these sidearms and ammunition should be collected and held in the Master's safe custody.

GENERAL:

Bonded Stores: No cigarettes or bonded stores are available at El Palito.

Cash Advances: Cash advances are available in Venezuelan Bolivares only and should be included in the vessel's ETA radio, to permit delivery on board on arrival.

Charts: No charts or sailing directions are available at El Palito.

U.S.S. Club: There is no U.S.S. Club available at El Palito or film exchange service.

Inspection Petroleum Products: Chas. Martin and Company and E. W. Saybolt, petroleum inspectors, are not available at El Palito. However, if specified in sufficient time, they may be obtained from Puerto La Cruz.

Laundry: Laundry facilities are available at El Palito.

Lubricating Oil: Certain types of Llanoven lube-oils only are available in small quantities. Requirements should be sent by radio with ETA.

Mail: Mail service posted from El Palito has been found to be fair.

Provisions: Provisions are available at El Palito.

Radio and Radar: No repairs made at El Palito.

Gangways: Gangways are provided by El Palito Terminal.

AGENT: See "Puerto Cabello".

GUANTA: 10.15 N. 64.35 W. (See Plan Book)

SHIPMASTER'S REPORT: 1978.

LOCATION: 10° 15′ N. 64° 35.5′ W. About 5 miles East of Puerto La Cruz.

DOCUMENTS:

6 Crew Lists.
6 Passenger Lists (or negative).
6 Ship's Stores Lists.
6 Crew Personal Effects Lists (well detailed).
1 Declaration of Health.
Clearance from last port.
Cargo Manifests visaed by Venezuelan Consul at loading ports.
Full set of Manifests and B/Ls.

Entry Formalities: Normally carried out after docking unless there are no berths available; then vessel can be cleared at anchorage in Bahia Pozuelos, during daytime. At night only in case of emergency.

Accommodation ladder must be rigged.

Hours of entry: From 0700 till 1100 hrs. and from 1300 till 1700 hrs. Overtime outside these hours.

APPROACHES/PILOTAGE: A vessel bound for Guanta has to enter Bahia Pozuelos as she must first call at Puerto La Cruz to embark a Pilot. The anchorage area for waiting berth turn is also in Bahia Pozuelos. This anchorage is in depths of 48 ft. to 80 ft. and is well protected from swell by surrounding islands. No size limitation.

Bahia Pozuelos is the anchorage and Pilot embarking area for 3 ports: Puerto La Cruz, Guanta and Pertigalete.

The use of government Pilot is compulsory for all vessels docking or undocking. ETA: 48 and 24 hours in advance via the vessel's Agent.

Pilot boarding hours: From 0530 till 1700 hrs. every day. Vessel cannot dock after sunset. Sailing may be arranged at any time.

HEALTH: All vessels boarded by Port Doctor. No automatic pratique.

RADIO: Curacao Radio PJC. No local station.

VHF: All Agencies maintain radio watch on Channel 16 during office hours. Tugs and launches also equipped with VHF (call: "Ramrey").

TUGS: 3 tugs available: 1 of 1,700 h.p. and 2 of 1,200 h.p. All privately owned. Sometimes vessels bound for Guanta or Pertigalete have to wait for 2 or 3 hours as these private tugs have contracts with oil companies in Puerto La Cruz and are available only when no tanker is docking or undocking. Tug's lines used. Normally tugs join the vessel inside Guanta Bay.

BERTHING: One concrete pier on piles, 763 ft. in length where vessels normally dock starboard side to. The apron is 20 ft. wide in centre, 42 ft. at ends.

One modern concrete pier on piles, 1,056 ft. in length where vessels normally dock port side to. The apron is 115 ft. wide in centre and 85 ft. at ends. The piers are well fendered with rubber hoses and used tyres.

Height of piers above HW: 10 ft. Mean tidal range: 1 ft. 6 in. Max. draft alongside small pier: 23 ft. 08 in. Minimum draft alongside long pier: 26 ft. 08 in. Depths varies from a minimum of 27 ft. to a max. of 34 ft. at the Western end of the long pier.

CARGO HANDLING FACILITIES: All cargo normally discharged by vessel's own gear, directly on to truck or trolleys. The piers are not connected to the railroad. No floating crane.

The following mobile cranes are available in the port area: 1 crane max. 120 tons; 1 crane max. 30 tons, with telescopic extension boom, max. 60 ft.; 2 small cranes max. 6 tons with a boom length of 30 ft.

Forklifts: 15 forklifts capacity 3.5 tons; weight 5.2 tons with fixed counterweight. To use these forklifts on board, the hoisting gear should lift over 6 tons.

2 forklifts capacity 5 tons, weight 12 tons; 1 forklift capacity 20 tons, weight 25 tons, specially for containers.

Flatbed trolleys: 30 trolleys capacity 8 tons; 1 trolley capacity 70 tons. No lighters available.

All discharging gear normally supplied by Agency. For heavy lifts, it is recommended to have special slings on board.

BULK CARGO FACILITIES: On the Eastern side of the Guanta Bay, there is a berth for loading coal by means of a fixed shoot. Depth alongside 30 ft.

Grain Cargo: Receivers supply suction machines. There are 2 machines available, capacity 1,000 tons per machine during 24 hours. Grain vessels work round the clock.

Liquid Cargo: Sometimes tallow and liquefied gas are handled. Discharged by vessel's pump into tank trucks. Hoses normally supplied by vessel.

CONTAINER HANDLING FACILITIES: No container berth. No crane. 1 forklift capacity 20 tons. There is a small container stacking area.

STEVEDORES: Normal working hours: 0700 – 1100 hrs. 1300 – 1700 hrs. (Monday to Friday); 0700 – 1100 hrs. (Saturdays).

Overtime: Monday to Friday, 1800 – 2300 hrs. (night shift); Saturday, 1300 – 1700 hrs.

Normally port does not work after 1700 hrs. on Saturdays or Sundays.

Ordering of gangs: For 0700 hrs. requested previous day before 1500 hrs. For 0900 hrs. requested same day at 0700 hrs.

Overtime rates: 50% for the night shift (Monday to Friday); 100% for Saturday afternoon shift.

The gangs consist of 12 longshoremen and 12 stevedores, including 2 winchmen, 1 signalman and 1 checker.

Capable supervision only available from Agency.

Rigging or cleaning gangs are available.

MEDICAL: Private hospitals at Puerto La Cruz. Private doctors generally do not visit ships. If medical attention is required on board, the Port Doctor will attend patient, unless he authorizes another doctor to make the visit.

In case of emergency, when the vessel is anchored in Bahia Pozuelos, a launch can be arranged to pick up the sick crew member.

DENSITY: Salt water all the year round.

FRESH WATER: Available at 5 Bolivares per ton at the main pier only. Hoses supplied by ship. Rate: about 5 t.p.h.

Presently there is no water available at Berth No. 3 (Western end of pier).

FUEL: No Bunker "C".

Diesel: Delivered by trucks; arrangement must be made at least 24 hours in advance.

Gas Oil: Delivered by trucks under previous arrangement.

GARBAGE DISPOSAL: No facilities.

CONSULS: See "Puerto La Cruz".

REPAIRS: Only minor engine or electric motors can be repaired.

GANGWAY/DECK WATCHMEN: Not available. No shore gangway available.

DRY DOCK: Not available.

SURVEYORS: None.

CUSTOMS ALLOWANCE: 200 cigarettes and one open bottle spirits.

REPATRIATION: Can be arranged. No special requirements.

IDENTIFICATION CARDS: Passes for shore leave are issued by officials of the Port Captain's Office, when boarding the vessel for clearance. These passes should be filled out on board. They are valid for the duration of the vessel's stay in port only and have to be returned before sailing.

In order to comply with Immigration Regulations, crew should be carefully checked before departure and any missing seaman reported to the Agent. The same applies to passengers in transit.

AIRPORT: At Barcelona, about 15 miles by road. 3 flights daily to Caracas.

TIME: 4 hours slow of GMT, all the year round.

HOLIDAYS: New Year's Day, Holy Thursday, Good Friday, Holy Saturday, April 19th, May 1st, June 24th, July 5th, July 24th, October 12th, November 24th, Christmas. No labour available on these days.

TELEPHONES: No facilities at Guanta. Private calls can be made from the central office at Puerto La Cruz (5 miles) during the following hours: 0700–2100. Long distance calls dispatched quicker from the Hotel Melia at Puerto La Cruz.

SHORE LEAVE: From a ship anchored in Bahia Pozuelos: Allowed if the vessel has been cleared and if every crew member has shore pass. One private launch available but very expensive.

From Guanta berths: Allowed with shore passes.

DELAYS: Presently, Guanta is somewhat congested and the waiting time varies from a few days to 15 days, especially during the rainy season.

GENERAL: Venezuelan regulations strictly prohibit the pumping overboard of dirty ballast or throwing garbage or dunnage in territorial waters. Heavy fines are imposed for pollution of waters and sometimes fishermen are quick to report any infringement.

Berthing Turn: On the basis "first come, first served" but Venezuelan vessels have some priority.

Supplies and laundry: Several private firms based at Pto. La Cruz. Nearly all kinds of fresh provisions are available.

Laundry service available; may be completed in 8 to 10 hours.

General: Guanta is a natural harbour surrounded by mountains which protect the bay completely in bad weather. The port has never been closed for bad weather.

Venezuelan Flag: Upon arrival at Pozuelos Bay ship should display the flag from the foremast at all times. When anchored or docked, the flag should be displayed only between sunrise and sunset.

Warehouses and Cargo Sheds: No transit cargo shed. No refrigerated storage available.

There are 5 warehouses with a total floor space of 75,000 sq.ft.

Open Space: A total of 5.7 acres, mostly covered with asphalt or concrete.

Weather: The rainy season starts in mid-May and ends in November or December. During the rainy season it is usually calm in the early hours of the day followed before mid-day by light Westerly or variable breezes. In the afternoon the breezes change to North-Easterly at about 12 knots until midnight. During the dry season the cycle is similar but the North-Easterly wind may reach 25 knots. This can prevent all communications between anchored vessels and the shore.

AUTHORITY: "INP" Instituto Nacional de Puertos.

SHIPMASTER'S REPORT: 1975.

LOCATION: 10° 14.7′ N., 64° 35.5′ W.

Guanta is located in the Bay of Guanta. It is a well protected port against currents and winds.

The port is entered between 2 well lighted islets.

DOCUMENTS:

Maritime Declaration of Health (together with inoculation list of crew).
10 Passenger – (or non-passenger) Lists.
10 Transit passenger – (or non-transit passenger) Lists.
10 Crew Lists.
4 Personal Effects Lists. (new clothes, etc., to be mentioned).
4 Ship's Stores Manifests.
Clearance last Port.

PILOTAGE: Government pilotage is compulsory. Pilot is embarked and disembarked near the sea buoy of Puerto La Cruz, in position: 10° 15.5′ N., 64° 41′ W.

ANCHORAGE: On the Pto. La Cruz roads.

RESTRICTIONS: Entering: In daylight hours only: 0600 – 1800.

Sailing: Day and night.

TUGS: One powerful tug available, compulsory to use when ship's length more than 90 m.

BERTHING: *New Pier:* Length 322 m. *Old Pier:* Length 233 m.

Water Depth: According to Pilots information: *Old Pier:* 29 ft. *New Pier:* 34 ft.

STEVEDORES: *Working Times:* Monday to Friday: 0700 – 1100 hrs., 1300 – 1700 hrs., 1800 – 2300 hrs. Saturday: 0700 – 1100 hrs., 1300 – 1700 hrs. Sunday: No work is done.

Gangs have to be ordered by 1500 hrs. the day before required.

FRESH WATER: Ships can replenish their fresh water tanks without charge (Included in port charges). Own hoses to be used.

OPENING/CLOSING HATCHES: Opening/Closing hatches, setting derricks: Special Rigger gangs take care of this. It is absolutely forbidden for ship's crew to touch these kind of jobs.

GENERAL: *Waste Water:* Special care should be taken to prevent waste water, from sanitary– or engine-room systems fouling the jetty. Heavy fines are made in case this happens and a special shore gang might be ordered to clean same.

Customs: 2 Customs officers have to be provided with food.

OPERATORS: Servicio Portuario de Guanta.

LA GUAIRA: 10.36 N. 66.56 W. (See Plan Book)

PORT LIMITS: Between the points 10° 37′ 40″ N., 66° 48′ 30″ W. and 10° 37′ 40″ N., 67° 07′ 07″ W. and the coast line.

DOCUMENTS:

Sealed envelopes for Customs.
Visaed B/L and Sobordos not in envelopes.
Consular Despatch for all Venezuelan ports.
Despatch from last Venezuelan port, if any, or
Zarpe from last foreign port, if arriving directly from abroad.
Fumigation Certificate.
Bill of Health.
Vaccination Certificates of Crew.
4 Store Lists (with arms and narcotics).
4 Lists of Personal Effects.
6 Crew Lists.
12 Lists of Passengers for La Guaira, or negative Passenger List.
8 Lists of Passengers in Transit.
2 Lists of Luggage (only for passenger luggage).
1 Master's Declaration.
1 List of Vagrants, if any.
8 Cargo Lists.

PILOTAGE: Compulsory and vessels have to wait for Pilot in the pilotage zone N.W. of the entrance. Ships can make contact with the pilot station by VHF Channel 16 or 12.

ANCHORAGE: Generally ships must anchor in the N.E. area of the entrance, the depth varies from 8 to 20 fathoms. The bottom is sand and occasionally rocks.

RESTRICTIONS: There are no restrictions imposed upon entry.

MAX. SIZE:

Berth	*Length (m.)*	*Depth (m.)*	*Remarks*
01-E	176	10.95	Roll-on/Roll-off
01-D	176	10.95	General Cargo

21	290	6.10	Warship Berth

HEALTH: Ships from Venezuelan ports obtain free pratique. Ships from abroad must send a cable to Health Authorities requesting free pratique, or advising illness.

RADIO: In order to enable Agents arrange for quick entry and berthing, Masters should give their ETA message at following intervals, via Curacao Radio (ITT): 72, 48 and 24 hours prior to arrival, indicating in the 48-hour message, the quantity of parcels (or tonnage if bulk cargo) per hatch. This is imperative for applying for the necessary personnel of the Instituto Nacional de Puerto (I.N.P.). Also, draft, passengers, requirements for bunkers, fresh water, provisions, repairs, medical assistance, etc. This telegram the Master to sign with his full name.

VHF: Communication with the Port Authorities and the pilot station are possible by VHF. Ship must make contact on Channel 16 and change after to some Channel between 1 and 70, Channel 12 is normally used for this manoeuvre.

TUGS: The use of tugboats within the port is compulsory, both for entering and leaving port, as well as for manoeuvres in the port area. Ships longer than 139 m. must be assisted by 2 tugboats.

Ship's lines are used in the manoeuvre. The Port of La Guaira has 2 tugboats of 1,800 h.p. each. Normally they join the vessel at the entrance of the port.

BERTHING: Normally a minimum of 24 ocean-going vessels can berth at one time. Berth Nos. 01-E, 01-D, 01-C, 01-B, 01-A, 01, 02 and 03 are along the breakwater pier East-West, parallel to the coast. At piers Nos. 01-C, 01-B, 01-A, there are 12 electrical cranes of 12 tons. At pier No. 03 ships discharge grain directly to a silo by 2 grain towers, average daily rate 2,000 tons. Silo capacity 12,000 tons.

Within the port is a finger pier, parallel to the breakwater pier, with 2 Customs warehouses alongside, with berths North and South, 2 each. The main pier is parallel to the coastline, East-West, with berths Nos. 10, 11, 12, 13, 14 and 15,, along which piers there is ample Customs warehouse space, including outdoor space on the roofs as well as ample uncovered storage area. There are 15 × 6 ton electrical cranes at this pier.

The Passenger Terminal is on a finger pier, in direction North-East with its land end in the corner of berth No. 15. There are 2 berths each side, namely Nos. 16 and 17 in the inner basin and Nos. 18 and 19 in the outer basin.

Passenger vessels have priority for berthing and they have to leave port within 24 hours.

BULK CARGO FACILITIES: Bulk carriers only discharge, at piers 01-D, 01-C and 03. There are no facilities for cargo.

SPECIALISED CARGO HANDLING FACILITIES: The only berth, specially equipped for roll-on/roll-off traffic is pier 01-E but pier Nos. 04, 09 and 16 are also used for this kind of cargo.

There is no fixed equipment for handling containers but the Instituto Nacional de Puerto has some mechanical equipment for handling containers.

This port does not have any other facilities for specialized cargo handling.

BRIDGES: There are no bridges.

STEVEDORES: Supplied exclusively by Instituto Nacional de Puerto at costs per weight of cargo in accordance with governmental decrees.

The Port Agent applies for the necessary number of gangs per ship. Each gang consists of 11 stevedoremen (estiba) and 11 longshoremen (caleta).

Switching of gangs from one hatch to another is not permitted.

There are no longshoremen costs for cargo handled during straight time, but only for that handled during overtime.

(a) *Straight time*
Monday – Friday 0700 – 1100 hrs.
1230 – 1630 hrs.
Saturday 0700 – 1200 hrs.

(b) *Overtime*
Monday – Friday 1800 – 2300 hrs.

(c) *Saturday afternoon* work is not permitted, but if a vessel could terminate operation and sail within a maximum of 3 additional working hours, a special permit would be granted by Customs and Port Authorities. In such a case, the additional working hours are considered as overtime.

(d) *Work on Sunday* is not permitted except for passenger vessels (officially those carrying 69 passengers, but exceptionally vessels with fewer passengers might occasionally obtain same consideration by authorities).

EQUIPMENT:

(a) *Electric Shore Cranes:* Berths 01-C to 01-A have 12 electrical cranes on rails of 12 tons capacity each. Berths 10 to 15 have 15 on rails of 6 tons capacity each. The Instituto Nacional de Puerto allow 2 × 12 tons cranes to lift pieces up to 20 tons or 9 tons weight. At pier 10 the arms of the cranes reach the roofing of the warehouses.

Use of shore cranes is not compulsory, unless the Technical Board of the Instituto Nacional de Puerto rules to use them. Other piers have no shore cranes.

(b) *Diesel-Driven Rolling Cranes:* There are a considerable number of these cranes which can lift heavy pieces of about 17 tons.

(c) *Floating Cranes:* Not available.

(d) Special lumber carriers of about 20 tons capacity.

(e) Tow trucks, fork-lifts, trucks and trailers up to 10 tons capacity.

LOADING/DISCHARGING: Cargo is discharged on the pier, when free it is taken away by fork-lifts and/or other mechanical equipment supplied by Instituto Nacional de Puerto. The use of such equipment is included in the handling fee for weight.

There are 2 grain towers on berth No. 3 leading via conveyor belts to storage silos of 12,000 tons capacity. Average daily discharge rate 2,000 tons approximately.

At berth Nos. 10 to 15 discharge to the roof of the warehouse or on the pier is possible.

OPENING/CLOSING HATCHES: Not performed by the Instituto Nacional de Puertos but by either the ship's crew, or the assistance labour of the Agent.

FRESH WATER: Available through pipe-line on the pier, day or night, by water trucks of up to 10 tons capacity in day time only.

GANGWAY/DECK WATCHMEN: The watchmen service is not necessary. It is recommended to use a seaman as watchman.
MEDICAL: There are several hospitals in the town and all the medical attention necessary. Should medical assistance be needed on board, contact the Agent.
DENSITY: The average salinity of water in the port is 1.025.
CONSULS: The following countries have consuls in La Guaira; West Germany, Belgium, Mexico, Norway, Panama and Sweden. The following countries have Vice-consulates; Denmark, Spain, Italy and Portugal.
REPAIRS: All kinds of deck and engine repairs are possible.
DRY DOCKS: There are no dry docks in this port. (The nearest is at Puerto Cabello).
SURVEYORS: All Classification Societies and P&I Clubs are represented in the port.
POLICE/AMBULANCE/FIRE: *Police:* 26148, 26347 and 27098. *Ambulance:* 22165. *Fire:* 22165 and 22587.
REPATRIATION: There are all kinds of facilities for making crew changes and arranging any necessary repatriation.
AIRPORT: The distance to the International Airport at Maiquetia is 10 km., this is served by different regular airlines.
TIME: GMT minus 4 hours. No change.
HOLIDAYS: January 1st, (New Year); February 18th/19th, (Carnival); April 3rd/4th (Easter); April 19th, (Independance Day); May 1st, (Labour Day); June 24th, (Carabobo Battle); July 5th, (Independance Day Declaration); July 24th, (Simon Bolivar's Birthday); September 4th, (Public Funcionary Day); October 12th, (America Discovery); December 25th, (Christmas).
TELEPHONES: It is not possible to place telephones on board, however calls can be made in the "CANTV" office.
SERVICES: There are no special services available. Radar repairs possible.
SHORE LEAVE: Crew members can go ashore with shore passes issued by the Port Authorities.
INDENTIFICATION: Shore passes are sufficient to go ashore.
REGULATIONS: There are no particular or unusual regulations for the port.
OFFICIALS: Once the vessel is anchored at La Guaira, Representatives of Customs, Port Captain, National Guard, Health Service, Immigration and Agency board the vessel.
DEVELOPMENTS: Increase in draft to 35 ft. by the end of 1980 excepted.
AUTHORITY: Harbour Maser, Capitania de Puerto, Terminal de Pasajeros de La Guaira.
AGENTS: Head Office (Control), Management/Brokers, Chartering and Tramp Agents, Victor H. Selinger S.A., PO Box 1632, Caracas 1010-A. Cables "Selvic" or "Seltank" Tel. (02) 81.02.71, Telex: 21402, 21934, 22859, 21631. Local Office: PO Box 304, La Guaira. Tel. (031) 27092, 27566, 27340. Cables: "Selvic LaGuaira" or "Seltank LaGuaira". Telex: 31143.

MARACAIBO LAKE (See Plan Book)

Including, Section A – BAJO GRANDE

Section E – EL TABLAZO AND PUERTO MIRANDA
Section F – PUNTA DE PALMAS
Section G – SAN LORENZO LA CEIBA

GENERAL: The following "Depth Bulletin", dated June 1978, was received from a Shipmaster in February 1979.

REPUBLIC OF VENEZUELA
NATIONAL INSTITUTE OF CANALIZATIONS
ZULIA ZONE

Depth Bulletin No. BP – 6-78 Dated: 13-06-78

The following data represents the latest information reported and refer to the date shown for each section of the channel. Depths are expressed in metres and are related to the same level of the local Navigation Charts 1001, 1002, 1003 and 1004 of the M.M.M. Mean Monthly Lowest Low Water.

The controlling depths refer to the centre area of the channel demarked by parallel lines on either side at a distance of 60 m. in the outer channel and 45 m. in the rest of the channel. The Puerto Miranda Channel is of 30 m. The theoretical position of the buoys in the aforementioned navigation charts are located at a distance of 30 m. from the edge of the channel.

Main Channel

Channel	*From*	*To*	*Date*	*Depth (m.)*	*Remarks*
Outer Section	B – 1	B – 28	19-05-78	12.8	
Inner Section	B – 28	T – 56	10-05-78	12.8	

Channel	*From*	*To*	*Date*	*Depth (m.)*	*Remarks*
SOUTH PROLONGATION	T – 56	B – 59	28-04-78	12.8	Entrance to Puerto Miranda (B – 59)
	B – 59	B – 66	26-04-78	12.8	Entrance to La Estacada (B – 66)
	B – 66	B – 76	10-03-78	12.8	Entrance to the Port of Maracaibo
	B – 76	B – 86	24-05-78	13.1	Entrance to Bajo Grande (B – 86)

	B – 96	Parallel 10° 22′ N	14-02-78	12.8	Entrance to La Salina Channel (B – 97 and 10° 22′ N)
	Parallel 10° 22′ N	M – 1	14-02-78	13.1	Entrance to Lake Main Channel (M – 1 and M – 1)
Puerto Miranda Channel		AP – 2	11-05-78	11.6	

Signed............................
The Port Captain

Signed..................................
The Director N.I. of Can.
Zulia Zone

(N.B. Certain information common to all Vessels entering Maracaibo Lake is given below. For specific details of ports/terminals within the Lake, see relative Section as indicated above).
FLAG: Local authorities require that the Venezuelan ensign be flown at vessel's masthead, from the time of entering the outer channel until clear of the outer channel outbound.
DOCUMENTS: *(a) Inward Clearance for Scheduled Vessels:* Vessels arriving in ballast or with cargo in transit require following documents:

1 copy Sailing Permit from Last Port.
2 copies – 1 visaed Ballast Certificate.
1 or more letters Consular Mail (in sealed envelope).
4 copies – 2 visaed Passenger Lists.
4 copies – 2 visaed Baggage Lists.
4 copies – 2 visaed List of Passengers in Transit.
4 copies List of Slop Chest.
4 copies List of Personal Effects.
4 copies – 2 visaed Store Lists.
5 copies Crew Lists.

Vessels arriving with cargo should have, in addition to the foregoing:

4 copies – 2 visaed Sobordos Venezuelan Inward Manifests).
6 copies – 2 visaed Bill of Lading.
2 copies visaed Inward Manifests.

In absence of a Venezuelan Consul at the last port, clearance documents should be signed by consul of a friendly nation, one of the Port Authorities, Notary Public, the Chamber of Commerce or by two well-known firms.

(b) Inward Clearance for Diverted Vessels: Vessels diverted to Maracaibo Lake Ports to load cargo, should submit all documents indicated in 1 through 10 above, except consular mail, which they will not have.

Vessels diverted at sea to Maracaibo Lake Ports which do not have a Venezuelan clearance on board, must advise loading port via radio to arrival, the name of vessel, Master's name, vessel's flag, Venezuelan net tonnage (if available, if not, the registered net tonnage), last port of call, destination port for which originally cleared, ETA San Carlos Pilot station and grade and quantity of cargo to be lifted. This information is required in order that Inward Clearance may be arranged with government officials in ample time prior to vessel's arrival. Also 3 copies of the diversion telegram received by vessel and signed by Master, together with copies of those documents listed under *(a)* should be presented to the Port Authorities upon arrival at Maracaibo. In the absence of this information, or of presentation of each of these documents to the Port Authorities the vessel will be subject to a fine. Please note, that the documents covered under *(a)* have to be presented upon arrival, regardless, if the vessel is not arriving with consular clearance or arriving after being diverted at sea.

(c) In Maracaibo 2 clearances from Custom's authorities are needed: One for proceeding from Maracaibo to loading berth, and another after loading for proceeding from Maracaibo to destination. For this reason Custom Dispatch charges may be incurred twice.

(d) American Crew List. All non-American vessels loading for a U.S.A. port should have the American Crew List ready on arrival in Maracaibo to be visaed by the American Consulate in Maracaibo and placed aboard ship before departure. The crew list should be prepared on Immigration and Naturalization Service form No. I. – 418 (Crew List Manifest) and should contain 2 sections:

Section 1 should list those crew members who are American or who possess individual visa documentation to the United States.

Section 2 should list, in the alphabetical order of their last names, those alien crew men who lack United States visa documentation and therefore require inclusion in the visa of the crew list.

Only one name may be placed on each line of the crew list. Two names should not be placed in the space of one line, nor should a full line between two names be left vacant. All copies of the crew list presented must be legible. Occasionally the names of the crew men included on the carbon copies of some crew lists presented at the consulate are blurred beyond recognition.

The information requested under columns 1, 2 and 3 should be filled in completely. Column 1 should always contain the complete first name and middle initial of the crew man. Column 2 should show the nationality of each crew member and the number of his travel Document. Column 3 should always include the name of the port where the crew man was shipped, not simply the country.

At the time of vessel's first application for a crew list, the crew list must be presented in four copies: Original and 1 copy should contain only information requested under Columns 1, 2 and 3. 2 copies must include following information of those crew men to be included on crew list visa. Column 4 should list date, city and country of each crew man's birth.

Column 5 should show place of issuance of seaman's travel document and name of Government which issued travel document. (It is not necessary to list date of issuance of travel document).

Below is a sample line correctly entered on the Master crew list.

(1)	(2)	(3)	(4)	(5)
Bello, Tomas E.	Z.23455 Venezuelan	Maracaibo Venezuela	December 8, 33 Caracas, Venez.	Cabimas, Venez

Upon subsequent crew list applications by same vessel within same year, the crew list need be presented in duplicate only, and the information in Columns 4 and 5 need be provided only concerning any new crew members who require visa documentation. When twelve months have elapsed since presentation of Original crew list, a crew list should again be prepared in 4 copies and should contain all the information required in columns 1 – 5. Such a Master crew list is required after each 12 months period.

APPROACHES: Also see "General" above. The channels leading to the Lake of Maracaibo are called the Outer Channel, the Inner Channel and the Lake Channel. The controlling depths of the Outer Channel, Inner Channel and the channel Southward to buoys M1 and M2 are normally 45 ft. At certain times the controlling depth may be less. At such times suitable notices are published advising mariners of these temporary reductions of controlling depth.

Outer Channel. The Outer Channel starts at the E.M. Buoy in position 11° 13′ 47″ North and 71° 33′ 31″ West. The light characteristics of E.M. Buoy are: flashing white every 5 seconds, visibility approximately 5 miles. The distance from E.M. buoy to the Southern end of the Outer Channel, marked by buoys B – 27 and B – 28, is approximately 15.75 miles. The channel is 1,000 ft. wide and has a normal controlling depth of 42 ft. minimum monthly observed lowest water (MMOLW) with tidal range varying about 2 ft. 3 in. This depth is maintained by periodical dredging. Tankers are required to have a keel clearance of at least 2 ft. and dry-cargo vessels a keel clearance of at least 3 ft. Vessels navigating the channel at the maximum allowable draft are confined from 2 hours before to 2 hours after high water. There are no turns in the channel and the course is 189°.

There is a breakwater 0.5 mile East of, and parallel to, the Outer Channel and extending 1.6 miles Northward from the North side of Zapara Island. The end of this breakwater is marked with a skeleton steel tower with a light 27 ft. above sea-level. Light characteristics – flashing white light every 8 seconds; visibility about 3 miles.

On Zapara Island there is a skeleton iron tower with a height of 136 ft. above sea-level.

Cross currents are sometimes encountered near Zapara, San Carlos and Pescadero Islands, especially at low water when the cross currents are strong. Overtaking at these points should be avoided.

There is one anchorage zone in the Outer Channel which is a trapezoid on the port side when navigating inbound near the Buoys B – 14, B – 15, B – 16 and B – 18. All buoys in the Outer Channel are equipped with radar reflectors.

Caution: Masters are warned to keep adequate speed in the Outer Channel even when embarking the Pilot as strong cross currents are encountered near San Carlos and Zapara Island. Pilot boats are fast and fitted with a flying bridge.

Inner Channel. The Inner Channel continues on the same course as the Outer Channel for about 10 miles, whereafter the direction changes to 150°. Entire length of the Inner Channel is about 12 miles.

The beginning of the Inner Dredged Channel is marked by buoys B – 29 and B – 30. Channel is marked by beacons, and terminates at beacons T – 55 and T – 56. The channel is 800 ft. wide and the normal controlling depth is 43 ft. MMOLW with tidal range varying from 1.5 ft. to 2.5 ft.

The channel from beacons T – 56 to Maracaibo Harbour is a dredged channel, the end of which is marked by buoys Nos. B – 73 and B – 74.

About 0.2 mile South of buoys B – 29 and B – 30, there are located 2 towers – 1 on each side of the channel, and about 1 mile further South are 2 more towers. These 4 towers are marked E – 31 and E – 32 (North) and E – 33 and E – 34 (South). Towers No. E – 31 and E – 32 are of single steel pipe construction on a concrete pile base. Towers No. E – 33 and E – 34 are of skeleton steel construction (former oil-well derricks) each mounted on 4 concrete piles. The characteristics of these towers are:

	Height above water (LWS)	
Tower No.	*Light*	*Light*
E – 31	43′	Green – Fl.
E – 32	43′	Red – Fl.
E – 33	123′	Green – Fl.
E – 34	128′	Red – Fl.

Vessels are not allowed to overtake each other in the Inner Channel between buoys B – 29 and B – 30 and light beacons T – 25 and T – 26. Vessels may overtake each other in the Inner Channel between light beacons T – 39 and T – 40 after having exchanged prescribed signals with the vessels to be passed. This manoeuvre is, of course, allowed only if conditions are favourable and no vessel navigating in the opposite direction is in sight.

Lake Channel. The channel starting at light beacons T – 39 and T – 40 and leading to Maracaibo Roads is called the Lake Channel. This is a natural channel 3,000 ft. wide and 11 miles long.

The Main Channel through Maracaibo Lake is approximately 83 miles long, not less than 244 m. wide and with a greater depth than the outer channels.

The access channels to the various ports and terminals branch off from the main channel as described under Section for each port.

CHANNEL NAVIGATION:

(a) Inbound vessels leave to starboard side the buoys and beacons marked with even numbers and to port side the buoys and beacons marked with odd numbers.

(b) Outbound vessels shall leave to port side the buoys and beacons marked with even numbers and to starboard side the buoys and beacons marked with odd numbers.

(c) Vessels should pass as close as possible to the channel's edge on starboard side. Loaded vessels have preference.

(d) Approaching vessels are to reduce speed in order to minimise the suction force of the displacing waters.

(e) Vessels must maintain a distance of 5 ship's lengths by day and 8 ship's lengths by night from other vessels navigating in the same direction.

(f) No vessel should start to manoeuvre to overtake another vessel before having received clearly the affirmative signal from the ship to be passed.

(g) A grounded vessel is not allowed to start any manoeuvre when another vessel is passing.

(h) Dredgers are frequently at work in the channels and caution should be exercised in passing them. Signals used by the dredgers are as follows:

Daytime

Black cylinder hoisted on side of yardarm: You can overtake me on the side on which the cylinder is shown.

Two black balls over the bridge: The channel is blocked.

Night

Green light on side of yardarm (a white light on mast-head helps to show on which side the green light is placed): You can overtake me on the side on which the green light is shown.

2 red lights over the bridge: The channel is blocked.

The tidal range is 4 ft. at neaps.

(i) Maximum speed for vessels navigating in lake channels has been limited to 10 knots. Masters should exercise the utmost care in complying with this regulation as heavy fines may be imposed to offending vessels.

PILOTAGE: (N.B. Maracaibo Pilotage Regulations require that inbound tankers, in ballast, while crossing the Bar, shall not have greater than 8 ft. difference between fore and aft draft. The Government Pilot will not take the vessel if this requirement is not met, unless he is satisfied that the actual draft of the vessel will permit safe navigation through the Outer and Inner Channels.

Every Master of a vessel navigating in Lake Maracaibo who desires to enter the main ship channel in Pilotage Zones No. 1 or No. 2 must first ensure that said Channel is free of traffic.

The limits of the Main Ship Channel in Pilotage Zone No. 1 are from buoys B1/B2 located at the entrance to the Outer Bar Channel and buoys B73/B74, of the city of Maracaibo. Pilotage Zone No. 2 begins approximately 1 mile below Maracaibo and extends Southward to lightfloats M36/M37. All other channels are considered as access channels to their respective port zones and subject to special local rules. Every vessel navigating to or from any port in Lake Maracaibo must follow the prescribed routes through the main and access channels leading to or from such ports, (unless special permission has been granted to do otherwise).

(a) Pilots are employees of the Venezuelan Government and act in an advisory capacity; the Master retains responsibility for the ship at all times. In the event it becomes necessary to disregard the Pilot's instructions in order to ensure the safety of the ship, the Master must prepare a full written report of the circumstances, for delivery to the Captain of the port.

(b) Inbound vessels have the option at present to embark government Pilot at the following areas:

(i) In the channel off San Carlos Pilot Station between buoys B – 24 and B – 26.

(ii) Anchorage area approximately 5.5 miles N.E. of Pilot station, San Carlos Island. Position 11° 04′ 22″ N., 71° 33′ 48″ W. East of buoy B – 17. This area is demarcated with green light buoy equipment with radar reflector.

(iii) At the E.M. Buoy.

(c) The Port Captaincy of Maracaibo is unable to guarantee embarking or disembarking Pilots at the E.M. buoy or at anchorage area position. For this reason Masters should communicate with San Carlos Pilot Station for necessary instructions as to where to pick up Pilot, who usually embarks between buoys B – 24 and B – 26. The communication system between San Carlos Pilot Station and vessels will be by Morse lamp and radio-telephone. The stand-by frequency at San Carlos is 2182 kc/s. Other existing frequencies are 2120 and 2080 kc/s.; 156.6 and 156.8 mc/s. Each pilot launch has a radio-telephone with 2182 kc/s. frequency. The launch that leaves San Carlos Pilot Station with Pilot for ship, takes approximately 20 to 30 minutes to cover distance, and distance between buoys and San Carlos is approximately 6 miles or 10 kms.

(d) Pilot Permit to navigate the Outer Channel without aid of a Government Pilot will be granted to those Masters who desire to obtain same. In order to fill the application required, a blank sealed paper and 3 copies should be signed by Master on arrival. Copy of this solicitude duly endorsed by Port Captain of Maracaibo, will serve the Master as temporary permit until the official one has been received. Masters in possession of permits to cross the Outer Channel without a Pilot, have the option to enter channel either at the E.M. buoy or between any other buoy, taking into consideration the heavy traffic of the channel. Government pilotage through the Inner Channel is compulsory at all times.

(e) Outbound vessels will receive Pilot in Maracaibo, who will Pilot vessel up to San Carlos area approximately between Towers E – 31 and E – 33, where he will disembark. The Port Captain of Maracaibo has instructed that all Captains should always in ample time identify themselves with the San Carlos Pilot Station by radio-telephone regardless of time of day. While inbound – between buoys B – 17 and B – 19 and sailing outbound – between markers T – 42 and T – 40. These instructions are obligatory and are required in order for the Pilot service to be aware, at any moment, of any emergencies which may arise, and also to avoid, especially during the night, the launch departing with an official Pilot aboard believing that the ship in sight needs his services, in which case, even though the launch or Pilot services are not rendered, the same will be charged to the company owning the ship, or its representative.

TONNAGE: Venezuelan Port Authorities base part of their pilotage charges on the size of the vessel, i.e.:

(a) On Registered Net Tonnage. Venezuela will accept the tonnage of ships registered in countries with which they have a reciprocal tonnage agreement. As of this date, such countries are:

Norway
Great Britain
France
Sweden
Ireland
Germany
U.S.A.
Denmark
Holland
Portugal

(b) On Venezuelan Nett Tonnage. Ships not registered in countries listed above, when calling at Venezuelan ports for the first time, must be measured for Venezuelan tonnage by the Captain of the Port. It is the usual practice to take ashore the ship's Panama Canal or Suez Canal Certificate, which is used as a basis for recalculating tonnage under the Venezuelan regulations, and return it before sailing. The Venezuelan admeasurement certificate, when later issued, is forwarded to the Owners. A fee is charged for this certificate, which is payable only on the ship's first call.

(c) In practice, the procedure for stating the tonnage of all ships entering the Lake of Maracaibo is as follows: The inward Pilot boarding the ship presents Master a form on which among others the Master should fill in the tonnage of ship. Pilotage charges are based on this tonnage given by the Master. Master's attention is drawn to the fact that the Venezuelan nett tonnage is usually higher than the International nett tonnage. Care should be taken if an old Venezuelan nett tonnage certificate is on board, because the country in which the ship is registered might later have signed the reciprocal tonnage agreement with Venezuela. If the pilotage charges are made on basis of a higher tonnage than the one that should be applied, it is later very difficult, if not impossible, to get a refund.

CUSTOMS: *(a) Customs Watch.* While vessel is in port, Venezuelan National Guard Officials are assigned on board to ensure compliance with customs regulations. The Law requires meals be supplied to these officials during regular meal hours. Masters are requested to give them the privilege of eating in officers' messroom, to avoid difficulties.

(b) Firearms and Ammunition. Firearms must not exceed one per officer nor may the ammunition exceed 18 cartridges per officer. All firearms and ammunition must be carefully declared on Store List and should be collected and held in Master's safe custody while vessel is in Venezuelan waters.

(c) Contraband. Strict compliance with the customs law of the country is enforced by the authorities, and Masters are strongly advised to caution crew members against attempting to smuggle cigarettes. 1 open package per person is allowed to be carried ashore, but greater quantity will result in fine and imprisonment of the offender as well as lost ship's time. Due to very strict enforcement of the customs regulations, it is recommended that no goods be carried which are not shown on Store List. Any new articles (clothes, shoes, etc.) should be included in Store List and marked as personal belongings. If during a check-up by Customs, articles considered as contraband are found, this will not only mean confiscation of these articles, but also hours or days of lost ship's time, while the case is handled at court.

CONSULS: The following nations maintain consular representative in Maracaibo:

Belgium
Chile
Colombia
Costa Rica
Denmark
Ecuador
El Salvador
France
Germany (West)
Great Britain
Guatemala
Italy
Netherlands
Norway
Nicaragua
Panama
Peru
Portugal
Spain
Sweden
Switzerland
United States of America

TIME: Local time is GMT minus 4 hours.

VISITORS: All visitors to ships are prohibited except those company employees, petroleum inspectors, etc., whose duties require their presence aboard.

PASSENGERS: Passengers will not be permitted to disembark unless in possession of the required visa and documents. To facilitate clearance, if passengers are carried, the Master should include advice to this effect in his radio ETA.

POLLUTION: The Laws of Venezuela are very strict in regard to the pollution of harbour and coastal waters by oil, and heavy fines are imposed for violations. No dirty ballast, oil or bilge slops are to be pumped or allowed to escape overboard. All overboard discharge valves from cargo tanks and bilges are to be secured before loading or discharging commences. Loading is to be conducted with greatest care and vigilance in order that errors or delays in handling cargo valves may not result in overflows. All deck scuppers should be plugged before loading to avoid harbour contamination should an overflow occur. The Authorities require a written report to be submitted by the ship involved in the event of an oil spill.

SEAMAN LEFT BEHIND: Sailing may be withheld until all crew members are aboard with exception of those ashore for justified reasons. It is important that Masters bear in mind that the Venezuelan Law will at all times hold the vessel's Master, Agent, or Owner responsible for any seamen left behind in Venezuela.

SHIPMASTER'S REPORT: August 1979.

MARACAIBO/EL TABLAZO AND APPROACHES

Approaches: If making for the "EM" buoy direct, positions can be a bit vague due to the low lying coast.

A distance off the coast can be obtained before the "EM" buoy but no real firm position.

Often there is a strong N.E. wind.

Pilot: In the 'Pilot Book', etc., mention is made of picking up the Pilot at Punta Cardon.

From the Pilots and Agent I have a clearer idea of the official viewpoint and requirements.

There is NO compulsion to take a Pilot before San Carlos.

If you are unsure of the area and the visibility is poor from all sources and in my personal viewpoint it is advisable to take a Pilot at Punta Cardon, giving ETA 12 hours in advance.

If vessel is to pick Pilot up at San Carlos send cable 24 hours beforehand through Curacao "PJC" to 'Piloto San Carlos' requesting permission to use Canal Exterior, ETA at "EM" buoy and at San Carlos. Reconfirm 12 hours before "EM" buoy and by VHF an hour before arrival on Channel 12.

The difficulty lies in language, although there is meant to be a traffic control system in Canal Exterior it is only in Spanish and the Co-ordinator speaks little English. Little information is required or given if you only speak English.

The Punta Cardon Pilot costs about $150 extra plus transport charges and entails extra distance of 70 miles from the West and 15 miles from the East.

The San Carlos Pilot boards from a fast launch at "B28" buoy and usually leaves just before the buoy. He will use hoist, in spite of official regulations which require gangway ladder arrangement, and leaves on port side outward (boards on starboard side inward). This is nearly always the case with situation of pilot station and wind, but may change.

Communications: Venezuelian station La Guaria (YVG – ALRS 6225). Most vessels use Curacao "PJC", very good. Agents reply through "PJC". Telex very good.

VHF: Call 'Piloto San Carlos' on Channel 16 (working Channel 12). Agent at Maracaibo on Channel 16 (works Channel 14, only during office hours). Agent at La Salina on Channel 16 (works Channel 14, 24 hour service but very distorted at El Tablazo).

Canal Exterior: Leads from "EM" buoy to San Carlos pilot station. A speed of 10 to 12 knots essential to keep vessel in channel on account of strong N.E. winds and currents across channel. Takes about 1 hour 10 minutes from "EM" buoy to San Carlos.

The least advertised depth at LW is 12.8 m. but shoals quickly at sides of channel. We found 11.0 m. LW to West side of channel at "B18" buoy.

Buoys "B14", "16" and "18" had shifted about 200 m. to West (August 1979). On the outer section of channel between "B4" to "B8" buoys a Westerly set right across channel very apparent and near Malecon Breakwater. At "B22" buoy an Easterly set experienced. Wind N.E. 4 – 5 tide 1 hour before and 1 hour after HW Malecon both cases.

The "E 34" pylon light off Pta. Diablo is very conspicuous. A new dredger 'Wado' works this section with North end Canal Interior. A large suction dredger, pulls to side of channel to let vessel pass. Only Spanish and German spoken. The old 'Zulia' dredger has stopped working. Another dredger is being completed for the Government and should be ready early next year (1980).

Canal Interior: About 1.5 hours pilotage to Puerto Miranda, speed above manoeuvring. This channel is generally deeper than Canal Exterior. The advertised depth of 12.8 m. seems reliable. Pilot told me they hope to get both channel Interior and Exterior deepened to 15 m. LW in the near future.

Pile light beacons "T46" and "T40" have been replaced by buoys.

Pratique: Given on berth.

Notice of Readiness: Can be tendered on arrival at berth. It is finally brought down with Bill of Lading on completion. This is normal practice. As we were cooling down it was received at completion of cooldown. Normally on berthing with lines connected.

EL TABLAZO:

Pilot: A Docking Pilot boards just before berthing and unberthing of vessel.

Tugs: 2 tugs of 1,800 h.p. Secure in "American" style using their lines.

Situation: For all intents and purposes part of Puerto Miranda but operated by different company.

Located just S.E. of Puerto Miranda berths. El Tablazo consists of 3 piers. Bulk, liquid and a small soda pier.

Anchorage: At El Tablazo – off berth, just East of main Maracaibo channel. Good holding – 3 shackles.

Pier: The bulk pier handles bulk and bagged urea fertiliser through 4 shiploaders fed from a conveyor. Three on the South side and 1 on the North side. Two of the loaders on the South side handle bagged urea down corkscrew chutes.

The liquid pier is to the South of bulk pier – berth both sides and handles ammonia, butane, propane, propylene.

Two Chicksans each side. The inshore being of 10 in. both sides and seaward being of 8 in. but fed by 10 in. line. Couplings are 300 ASA but 150 ASA spool pieces generally fitted.

Vapour lines are flexible stainless braided with rubber covering – ship's derrick required, 300 ASA coupling with 150 ASA spool piece. All berths – head IN. On the South side the outer edge of the dredged channel is marked by buoys.

All berths have good rubber fenders. Liquid pier outer end has two full faced mooring dolphins connected to main pier by catwalk. The least depth at all berths at LW is 6 fathoms, except small soda berth which has 2 fathoms at LW.

Moorings: 2-3-1 each end. Ship put alongside pier before moorings out. Plenty of mooring gangs. Very particular on position to within 0.5 m. Gangway no problem.

Fresh Water: At 15 t.p.h. from pipe at manifold amidships. There is a pumped supply at 70 t.p.h. used for loading small tankers to take to outports where supply is limited.

Operations: Language problems. There is one Loading Master who speaks good English. Surveyor on arrival and departure. Very co-operative. Venting allowed up riser.

Vapour return line goes to flare at ship's expense and can only be used if 100% product.

Max. rate ammonia 500 t.p.h., but initially can get plenty of stops. S.G. given at 15°C. The control of the rate is not very fine. You can get down to 20 t.p.h. but increase very broad. Usual notice for completion.

Dock Density: 1003.

Documentation: Carried out at berth inward, sometimes vessel taken off berth outward to local anchorage and clearance given there. Sometimes in the past inward clearance done at Maracaibo, NOT NOW.

There is much written in publications and passed around about visaed crew lists and deviation cables. I have tried, in talking to the Agent and to the Authorities to clarify the situation.

Visaed crew lists are NOT required now. But there is still a requirement that because the ship has no visaed crew list she must have deviated on passage.

Basically what is required is that the ship should be cleared on sailing for Venezuela to say, Trinidad, for orders or Curacao not Maracaibo, then on passage receive a message deviating her to Maracaibo. If she does not have deviation message a fine could be imposed but the Agent says all ships have required cable so do not know of fine being imposed.

Required:
7 Crew Lists.
3 Store Lists. Victualling only, can include bond.
3 Slop Lists. Could probably combine with above.
2 Ballast Lists. To give amount and cleanliness.
1 Vaccination List.
3 Crew Manifests.
1 Health Declaration.

I cabled in a pratique message as a matter of practice.

Shore Passes: Given by Agent for each crew member, no photos needed. Not required to be handed back on departure. Valid 3 days. After completion there seems to be a normal documentation delay to obtain clearance of up to 12 hours.

Shore Leave: The Agent will lay on a launch, but not really necessary as at El Tablazo liquid berth vessel is near the boat pier and fast launches run frequently to Maracaibo (takes 15 minutes). Arrange through Loading Master.

Can change sterling or dollars in local hotels, rate Bolivars to $, 4.30.

Films: Change Walport films at Puerto Miranda. Agent will send launch. Crew member has to go with films to change.

Agent: Only Agent on departure – no officials. Bill of Lading given by Terminal before Agent arrives.

BAJO GRANDE: 10.29 N. 71.38 W. (See Plan Book)

(1) OPERATOR: C.V.P. Llanoven Oil Terminal.

(2) OPERATOR: C.V.P. Llanoven. Natural gas liquids processing facilities.

(N.B.) For important details of Documentation, Pilotage, etc., see "Maracaibo Lake").

(1) **OPERATORS:** C.V.P. Llanoven.

LOCATION:

Maracaibo: On the North-Western shore of the Lake Maracaibo: Position: 10° 40′ North and 71° 38′ West.

Maracaibo is the capital of the State of Zulia and seat of all Government and Consular Offices, as well as the port of entry for all vessels loading at terminals in the Lake of Maracaibo. Upon arrival to Maracaibo, a representative of the appointed Agency will go on board to assist vessel.

Bajo Grande: Loading Pier: Position 10° 30′ 50″ N. and 71° 36′ 8″ W., about 8 miles (12.8 kms.) South of Maracaibo on the Western shore of the Lake and about 9,000 ft. (2,743 m.) offshore with its centre line North-South. Two vessels can berth simultaneously, one outside at Berth No. 1 and one inside at Berth No. 2.

The wharf is constructed as a pile-supported concrete island. It consists of 3 breasting platforms plus bow and stern mooring platforms. Pier Heads are 860 ft. apart.

DOCUMENTS: The following documents should be presented by the Master:

1. *Clearance from Sailing Port consisting of:*

(A) Sealed envelope from *Venezuelan Consul* in sailing port addressed to "Administrador de Aduana".

(B) Sealed envelope from *Venezuelan Consul* in sailing port addressed to "Aduana de Maracaibo" and attached to this envelope:
    Store List.
    Crew List.
    Slop Chest Inventory.
    Ballast Certificate.

(All visaed by Venezuelan Consul in sailing port).

(C) Special ballast report made up by Master.

The Maracaibo Port Captaincy, requires that the Masters of all vessels entering this jurisdiction, deliver to the Maracaibo Port Captain's representative, during his visit to ships in the port of Maracaibo, a report which must answer the following questions concerning ballast:

(1) Port or place where ballast was taken.
(2) Quantity taken.
(3) Type of ballast and condition of same.
(4) Where deballasting operation was or is to be carried out.
(5) Approximate deballasting time.
(6) Any other pertinent information that may be required.

2. Crew List	6 copies
3. Store List.	6 copies
4. Slop Chest Inventory (Deck, engine and cabin stores listed separately)	6 copies
5. List of Personal effects.	6 copies
6. Deratisation Exemption Certificate	Original
7. Venezuelan Net Tonnage Certificate	Original
8. American Crew List. (If required: See under "American Crew List" below).	4 or 2 carbon copies.

Boarding Party: The boarding party usually consists of the following persons:
One Quarantine Official
Two Customs Officials.
One Sanitation Department Official.
One Port Captain's Representative.
One Foreign Service Department Official.
One Vessel's Agent.

American Crew List: All non-American vessels loading for USA port should have the American Crew List ready on arrival in Maracaibo to be visaed by the American Consulate in Maracaibo and placed aboard ship before departure. The crew list should be prepared on Immigration and Naturalization Service Form No. 1–418 (Crew List Manifest) and should contain two sections:

Section 1 – Should list those crew members who are American or who possess individual visa documentation to the United States.

Section 2 – Should list, in the alphabetical order of their last names, those alien crewmen who lack United States visa documentation and therefore require inclusion in the visa of the crew list.

Only one name may be placed on each line of the crew list. Two names should not be placed in the space of one line, nor should a full line between two names be left vacant. All copies of the crew list presented must be legible (Occasionally the names of the crewmen included on the carbon copies of some crew lists presented at the consulate are blurred beyond recognition).

The information requested under column 1, 2 and 3 should be filled in completely.

Column 1 – Should always contain the complete first name and middle initial of the crewman.

Column 2 – Should show the nationality of each crew member and the number of his travel document.

Column 3 – Should always include the name of the port where the crewman was shipped, not simply the country.

At the time of the vessel's first application for a crew list, the crew list must be presented in 4 copies:

Original and 1 copy – Should contain only the information requested under Columns 1, 2, and 3.

Two Copies – Must include the following information of those crewmen to be included on the crew list visa.

Column 4 – Should list the date, city and country of each crew member's birth.

Column 5 – Should show the place of issuance of the seaman's travel document and the name of the Government which issued the travel document. (It is not necessary to list the date of issuance of the travel document).

Cargo documents:

1. *Captain's copy of Bill of Lading* – The Bill of Lading form used is the usual Warshipoilvoy form. Masters wishing to use another form should furnish 20 blanks on arrival in Bajo Grande. Master is requested to sign 3 negotiable Bills of Lading (Originals).
2. *One Copy of the Certificate of Quantity and Quality (Q. & Q.).*
3. *One copy of the Ullage Report.*

Outward Clearance:

Following documents are delivered on board by the local Agent before sailing:

1. *Customs Clearance* – Duplicate of "Conocimiento de Embarque" and Duplicate of "Manifiesto de Carga". (Both stamped and signed by Customs) or any other document specifically requested by the consignee or nominating source.
2. *Communication* – A letter from Maracaibo Customs Authorities to Authorities in port of destination.
3. *Zarpe* – Permission to sail signed by Maracaibo Port Captain. This is brought on board in Bajo Grande by the outbound Pilot.

Customs Guard: The Customs Guard will request Master to countersign his time on board the vessel. This is counted from the time the first hose was connected until all hoses were disconnected, regardless of whether the vessel was receiving cargo or not.

Accommodation Ladder: Vessels must provide an accommodation ladder. The use of rung ladders, pilot ladders, etc., is contrary to Port Regulations. Port authorities will board only by means of an *accommodation* ladder. it is recommended to rig this in advance in order to avoid unnecessary delays.

In order to guarantee the security and safeguard the lives of the officers that board the vessel inbound in Maracaibo, it is imperative that Masters strictly comply with the following precautionary measures:

(1) Each of the components and functional parts that holds together or supports the gangway ladder must be maintained in excellent condition.
    Therefore, wire ropes, guide blocks and bolts etc., found to be defective or in bad condition must be immediately replaced.

(2) For maximum security, each time that your vessel arrives in this jurisdiction, the above mentioned mechanisms should be thoroughly checked and tested by the personnel aboard vessel before the gangway ladder is used by the boarding party.

APPROACHES:

Channels leading to Lake Maracaibo: The channels leading to the Lake Maracaibo are called the Outer Channel, the Inner Channel and the Lake Channel.

Outer Channel: The Outer Channel starts at the E.M. Buoy position: 11° 13′ 47″ N. and 71° 33′ 31″ W. and ends at the Zapara Island, a distance of about 14 miles. (About 22 kms.).

The light characteristics of E.M. Buoy are: flashing white every 5 seconds, visibility approximately 5 miles.

There are no turns in the channel and the course is 189°. The channel is 100 ft. wide and has a normal controlling depth of 44 ft. LWS with tidal range varying about 2 ft. 3 in. Cross currents are sometimes encountered near Zapara, San Carlos and Pescadero Islands, especially at LW when the cross currents are strong. Overtaking at these points is forbidden. There is one anchorage zone in the Outer

Channel which is a trapezoid on the port side when navigating inbound near the buoys B – 14, B – 15, B – 16 and B – 18. All buoys in the Outer Channel are equipped with radar reflectors.

The Southern end of the Outer Channel is marked by buoys B – 27 and B – 28.

Inner Channel: The beginning of the Inner Channel is marked by buoys B – 29 and B – 30. The Inner Channel continues on the same course as the Outer Channel for about 10 miles, whereafter the direction changes to 150°. The entire length of the Inner Channel is about 12 miles. Beacons T – 55 and T – 56 mark its Southern end. The normal controlling depth is 44 ft. LWS. The channel is 800 ft. wide. Vessels are not allowed to overtake each other in the Inner Channel between buoys B – 29 and B – 30 and light beacons T – 25 and T – 26.

Vessels may overtake each other in the Inner Channel between light beacons T – 39 and T – 40 after having exchanged prescribed signals with the vessels to be passed. This manoeuvre is, of course, allowed only if conditions are favourable and no vessel navigating in the opposite direction is in sight. From beacon T – 56 to Maracaibo harbour the channel is 800 ft. wide, depth 44 ft., its end is marked by buoys B – 73 and B – 74.

Navigation through Channels:

Inbound vessels leave to starboard side the buoys and beacons marked with even numbers and to port side the buoys and beacons marked with odd numbers.

Outbound vessels shall leave to port side the buoys and beacons marked with even numbers and to starboard side the buoys and beacons marked with odd numbers.

Vessels should pass as close as possible to the channel's edge on starboard side. Loaded vessels have preference.

Approaching vessels are to reduce speed in order to minimize the suction force of the displacing waters.

Vessels must maintain a distance of 1 mile (1,852 m.) by day, or night from other vessels navigating in the same direction.

No vessel should start to manoeuvre to overtake another vessel before having received clearly the affirmative signal from the ship to be passed.

A grounded vessel is not allowed to start any manoeuvre when another vessel is passing. Dredgers are frequently at work in the channels and caution should be exercised in passing them. Signals used by the dredgers are as follows:

Daytime: Black cylinder hoisted on side of yardarm:

You may overtake me on the side on which the cylinder is shown.

Two black balls over the bridge:

The channel is blocked.

Night:

Green light on side of yardarm (A white light on mast head helps to show on which side the green light is placed).

You can overtake me on the side on which the green light is shown.

Two red lights over the bridge:

The channel is blocked.

The tidal range is 4 ft. at neaps. Observed squat in the channels is about 1 ft.

Maracaibo Lake Channel Guard Service Corps have had evidence of vessels travelling out of the navigation channel in the vicinity of buoys B – 3, B – 5 and B – 7; this risky procedure is considered very dangerous to the safety of the channel buoys and its installations.

Captains of all ships are reminded that all vessels inbound or outbound *must* pass the EM Buoy on the port side. This operation will be registered and controlled by their electronic devices installed at San Carlos Pilot Station.

Violators of this regulation, in addition to being economically responsible for damages to the buoys and related accessories, will be prosecuted in accordance with Article 118 Section I of the Venezuelan Law of Navigation.

In view of the above, and keeping in mind the protection of the interests of your owners, we ask that you comply at all times with this regulation emanated from the Port Captaincy.

PILOTAGE: Compulsory. Vessels proceeding direct to the Bajo Grande Terminal must enter outer channel and embark Pilot between buoys 25 and 27. After vessel arrives in vicinity of channel entrance, Master must contact *San Carlos Pilot Station* by radio telephone on Channel 16 requesting Pilot at buoys 25 – 27. The launch that leaves San Carlos Pilot Station with Pilot for ship, takes approximately 20 to 30 minutes to cover distance, and distance, between Buoys and San Carlos is approximately 6 miles (10 kms.).

Master must advise C.V.P. Llanoven and Agent ETA buoys 25 – 27, 72, 48 and 24 hours prior to arrival there.

Masters of Vessels entering Lake Maracaibo for the first time must cable their Local Agent notifying this fact, in order that the Agent may comply with the Port Regulations. This security measure makes it necessary for the ship to pick up a Pilot at Punta Cardon.

The Captain should notify Agent or contact Maraven, Punta Cardon by radio on Channel 16. As no Pilots are available at Punta Cardon, the Local Agent for the vessel requires 48 hours' notice in advance to facilitate making arrangements to fly a Pilot to Cardon and then have Maraven place the Pilot on board the ship.

The co-ordinates of Punta Cardon are approximately 11° 36′ N. and 70° 15′ W. Maraven will charge approximately Bolivares 220.00 for this service. In addition, the ship will have to pay air fare, hotel expenses, and a higher Pilotage fee for this service. However, if the Captain of a ship has previously entered the channel as an officer of a ship, he is not required to pick up a Pilot at Punta Cardon.

We remind you that Pilots are authorised to leave the Jurisdiction, only when they are disembarked in Venezuelan ports. With this understanding, when special circumstances arise in which the Pilot cannot be disembarked at San Carlos and the ship is unable to enter the nearest Venezuelan port to disembark the Pilot, in this case the port of "Las Piedras", it is required that the Agent as well as the Captain of the vessel, forward to the Port Captaincy at the earliest opportunity a detailed report giving the reasons that compelled the Captain to take the Pilot abroad.

Pilots act in an advisory capacity only, and therefore the Master of the vessel retains full responsibility at all times. In the event it becomes necessary to disregard the Pilot's instruction in order to ensure the safety of the ship, Master must forward to Local Agent a full written report on the circumstances for delivery of same, to port authorities.

The Venezuelan Pilotage Law stipulates that Pilots must be provided with the same lodging as is given an officer. In case no extra officer's cabin is available, suggest the hospital be used by the Pilot. Also, Pilot should be seated at the officers' mess for his meals.

In case of accident to Pilot while performing his duty on board, it is the responsibility of the Master to furnish the Pilot with a full written report on the accident before the Pilot leaves the vessel. The Pilot must be able to present such a report in case of a legal claim.

As a result of accidents that caused the loss of lives, the Maracaibo Port Captaincy issued a Regulation with the view of safeguarding human life at sea and other navigable waters; Official Pilots that must embark on or disembark from undocked ships, must use an automatic-inflated type life vest. This procedure is also compulsory for all persons from private or public entities that are required to go aboard vessels that are anchored, stopped or navigating in the waters of Lake Maracaibo. Likewise, at the side of the boarding ladder where the Pilot boards or disembarks, a hoist or boatswain's chair shall be placed there, and within it a life line and a gas light ready to be used in case it becomes necessary. The Port Captaincy will see to it that this Regulation is strictly complied with.

Docking Pilot: The Government's Pilot will assist in docking operations. It should be borne in mind that Pilot acts as adviser only. The Master retains full responsibility at all times. Any damage incurred to vessel or loading platform which may be deemed to have been caused by the Mooring Pilot's fault or negligence, may be held against the ship.

Undocking: Government's Pilot will assist in undocking. Two tugs will be used as for docking.

ANCHORAGE: The Pilot will not manoeuvre the ship into anchorage, but will indicate the proper location to anchor. Care should be taken because of small boat traffic.

MAX. SIZE: The following restrictions in size and draft upon loading exists for vessels docking at Bajo Grande:

	Maximum Loading Draft	*Maximum Vessel Size*	*Max. displacement upon Berthing (tons)*
Outside Berth (No. 1)	40 ft. 00 in.	55,000 d.w.t.	—
Inside Berth (No. 2)	34 ft. 06 in.	36,000 d.w.t.	20,000

RADIO: *Information to be cabled to Local Agents 3 days prior to arrival:*

1. *Flag:* If the vessel has loaded in Bajo Grande before or is listed in the Tanker Register published by H. Clarkson & Company Ltd., London, the nationality of the vessel need not be cabled.

2. *Sailing port and at which other port vessel will call in this area:* For clearing the vessel in and out of Maracaibo, local ship Agents must know beforehand from where the ship comes and which other port it will call in this area. Therefore, it is of importance to inform Agents whether the vessel will load part cargo or bunker, at which terminal, and whether inbound or outbound.

3. *Port for which vessel is cleared:* In case the vessel was diverted *en route* and consequently is not cleared for Maracaibo or one of the terminals in the Lake of Maracaibo, the Local Agents must obtain from authorities special permit for the vessel to enter the Lake of Maracaibo.

4. *Ballast Certificate:* If the vessel arrives in ballast a "Ballast Certificate" is mandatory. A fine against the vessel will issued by the Port Authorities if vessel does not have this certificate.

5. *Estimated Time of Arrival:* Cable ETA San Carlos Pilot station Buoys 25 – 27 (See "Pilotage") or, if the vessel is taking part cargo or bunkering inbound, cable ETA, bunker or first loading port. Please use local time if possible (4 hours behind GMT).

6. *Tonnage:* If the vessel has not loaded at Bajo Grande before, also cable the Gross and Net Tonnages. To determine whether the International or the Venezuelan tonnage should be mentioned, see General – "Tonnage Applicable".

7. *Master's Full Name:* Please sign your first message with Master's name and surname, which is also needed to clear the vessel in Maracaibo.

8. *Changed ETA:* An additional cable should be sent about 48 hours and 24 hours prior to arrival at Pilot stations Buoys 25 – 27 stating ETA.

Proper use of Radio Frequencies: We have received several circulars from the Maracaibo Port Captaincy, requesting Terminal Operators to caution all Masters of vessels calling at Bajo Grande Terminal on the improper use of the International Distress Frequency of (2182 k/cs) for personal conversations. This procedure is contrary to the security of vessels.

A letter containing such caution will be delivered to the Master of each vessel loading at Bajo Grande by the Agent, requesting that the Master sign a copy signifying his acknowledgement of said letter of notice.

The International Distress Frequency was established specifically and exclusively for emergency calls such as shipwreck, fire and accidents. It is also used by ships and shore stations to make first contact but immediately after contact is made, the operator should switch to one of the following frequencies: 2120, 2080, 2630 and 2738 k/cs.

9. *Compulsory use of Single Side Band radio:* A circular letter from the Venezuelan Ministry of Communications, states that no licence will be granted for the installation of radiotelephone stations of modulated amplitude (A3). The installation and use of Single Side Band radiotelephone equipment is obligatory.

In consequence, the Ministry has requested that the terminal inform all users of Double Side Band (A3) radiotelephone equipment in order that they proceed immediately to install in their ships, launches and all other marine vessels Single Side Band equipment with the same frequencies that are presently in authorised use, which are: 2080, 2120, 2182, 2638 and 2738 k/cs.

The listening and Safety Station YXW – 3 installed at the Venezuelan Nautical School is equipped to answer any calls on the International Distress Frequency with their transmitter of 1 kW.

As a result of the foregoing, a letter containing the above information has been prepared by the Terminal which will be delivered to the Masters of all vessels calling at the Bajo Grande loading terminal. The Masters of all vessels are required to sign a copy of this letter in acknowledgement of receipt.

TUGS: The Venezuelan Government has ruled mandatory the use of 2 tugs for docking and undocking.

NOTICE OF READINESS: Masters are free to tender their ships as being ready to load at any place and time which, in their opinion, conforms with the terms of the charter party. Terminal personnel authorised to countersign the notice of readiness have been instructed to indicate the time vessel was all fast or, if the vessel anchored to wait for berth, the time the vessel anchored. This does not imperil in any way the rights of the shipowner in his negotiations with the charterer and it limits the Terminal's liability to the consignee.

CARGO OPERATIONS:

Deballasting Facilities:

A recent Circular letter from the Venezuelan Ministry of Communications, Maracaibo's Port Captaincy, states that as of October 1976, no ballast (either clean or dirty) can be discharged into Lake Maracaibo waters. Therefore, all ballast must be pumped ashore to the petroleum terminal on which vessel is to take cargo. Heavy fines are assessed for vessels violating this law and therefore we strongly recommend Masters to be particularly careful in this regard.

Shore deballasting facilities are available at Bajo Grande and are subject to no special regulations and procedures as yet. Tanker ballast water is pumped through two 8 in. hose connections into a 24 in. line of about 9,000 ft. in length to a 120,000 bbls. receiving basin situated on shore.

The deballasting basin is limited to receiving *only* petroleum hydrocarbons and petroleum hydrocarbons derivates. Emulsifiers, caustics, acids and chemical slops are absolutely unacceptable. Contamination of Lake Maracaibo waters with oily or chemical materials of any nature is strictly prohibited by Venezuelan Laws. The terminal is required to report to the Authorities any such contamination by vessels docked at Bajo Grande. HEAVY FINES ARE THEN ASSESSED AGAINST THE SHIPS. Vessel's cooperation is requested to prevent contamination from tank overflows, bilge oil, line leaks or from any other source.

Tank Cleaning and Drying:

Precautions as are common for any heavy oil should be taken to ensure that no ballast is left in any tank. If the cargo is contaminated with water, the water will not separate from the oil. The salt content of the oil will be raised approximately 10 lbs. per 1,000 bbls. for every 0.10% contamination by sea water. All cargo compartments must be stripped extremely dry.

Cargo pipe-line should be drained and or purged of water. On standard T – 2 type vessels, this can be done by draining the fore and aft main cargo lines, both suction and discharge sides, into the pump room bilges followed by opening of main suction valves on each individual compartment, thereby releasing water retained in dead and transverse lines. After this procedure is completed, each compartment should be restripped with stripping pumps and lines, followed by draining the stripping line to pump room bilges. On other ships equipped with looped systems it is possible to blow the system with air and drain water into the bilges. In other situations, fresh water might be used to flush cargo piping systems of salt water and in turn strip salt water and fresh water as outlined for T – 2 vessels. All deck scuppers should be securely plugged and all precautions should be taken to avoid pollution of lake waters.

Inspection of Tanks:

Before loading can commence, tanks and loading system must be inspected and passed. This is usually done by the Terminal's own Cargo Inspector but, if consignee so requests, third party inspection can be arranged.

Inspection Companies available in Maracaibo are the following:

Chas. Martin Venezolana de Inspecciones	(CHAS MARTIN)
E. W. Saybolt & Co., S.A.	(SAYBOLT)
Redwood Petroleum and Petrochemical Division	(REDWOOD)
Analistas e Inspectores Venezolanos de Petroleo C.A.	(AIVEPET)
Inspecciones, S.A.	

Line Displacement:

When a vessel is loading crude and products, it is usually necessary to displace lines once or twice during loading. Masters will be advised of necessary line displacements before loading starts and are required to take note because NOTICE HAS TO BE GIVEN BY VESSEL when pumping should be stopped and tanks changed. Once shore tanks have been changed, it will not be possible to change the quantity of the product already in the ship, as shore lines will then contain a product different from the one already loaded. *Ship's gauges and/or draft should be carefully checked when calculating required quantities.*

Spillage:

In case spillage occurs, the Terminal Port Supervisor must be advised immediately, as any spillage must be reported to the Authorities without delay.

There has been considerable discussion in Venezuela concerning oil spillages resulting in contamination of Lake Maracaibo. Considerable pressure is being exerted by Government agencies to eliminate all spillage, and the Terminal is making every effort to avoid contamination of Lake Maracaibo.

While vessel is at Bajo Grande take special precautions to avoid dirty ballast, bilge water or any other contaminant entering the Lake.

If a spill should occur and Terminal representative, the Government's representative of the National Guard observes that the waters of the Lake are being contaminated by any substance from the vessel the Terminal will request that vessel suspends deballasting, loading or discharging operations immediately and all consequences that might arise from this operation such as short loading, the unmooring of your vessel, fines, damages to fishermen, clean up costs, etc., *will be strictly, for vessel's account.*

We strongly recommend to Masters to emphasize to the officers on deck to endeavour to avoid spillages and to make certain that the scupper plugs are installed prior to commencement of loading operations in order to withhold on deck any spillage that might occur.

After Loading:

All Butterworth plates, tanks tops and ullage plugs should be inspected to ensure against entry of water. Inspection of ullage plugs should follow on completion of temperature readings because of the necessity of taking temperatures en route. Sea suction valves should be secured by positive means until all cargo has been discharged. This may be accomplished by numbered seals, chains and padlocks. The method of securing should be noted on the inspection documents. Regardless of which method is used, appropriate log entries should be made indicating the date, time and method used and under whose supervision, both vessel officer and/or Cargo Inspector, such method was applied.

About 1 hour is required for the preparation of the cargo documents which are normally delivered on board before sailing.

Temperature of Boscan Crude and Boscan Products at Sea:

On short voyages, as for instance to the U.S.A., it has proved most practical to maintain the loading temperature. On longer voyages, as for instance to Europe, the temperature may be dropped to 130°F., which does no harm as long as sufficient time is given to bring the temperature up again to that required for discharging. Masters should, however, not expect a temperature rise of more than 5°F. per day, especially if the sea temperature is low. The heat transfer properties of Boscan Crude are very poor as are those of the heavy products made from this crude. Many ships have been delayed in the discharge port due to too low cargo temperature. A temperature of 160°F. is suggested for discharging Boscan Crude, Topped Boscan and cutback asphalts.

Discharge Cargo:

Boscan Crude has a flash point of 110 – 160°F. and a maximum viscosity of 1400 SSF at 140°F. The viscosity at other temperatures follows the pattern of other petroleum products. Boscan Crude has been successfully handled in ships fitted with both reciprocating and centrifugal type pumps with forward and after pumprooms respectively. It is generally found that this crude can best be handled at a temperature which brings its viscosity to about 600 SSF 160°F. Vessels with forward pumproom should control stern trim so that it does not exceed about 4 ft. while stripping the after tanks. Also a 5° list is very helpful when stripping. Once the cargo gets below heating coils, tanks must be pumped empty as fast as possible. At times it has been found helpful to gather tanks strippings into a single tank for discharge ashore, as it is very difficult to strip against heavy back pressures. Watch reciprocating pumps for vapourlock. Because of high viscosity, proper care should be taken that no oil is left in vessel discharge lines at low temperature.

Tank Cleaning After Discharge Cargo:

Many Masters have expressed concern over tank cleaning after discharge. Assuming that the ship proceeds to sea for this operation and has sufficient time for proper execution, vessel may be cleaned quite thoroughly using the Butterworth system. However, it is of vital importance that the system be used at maximum pressure and temperature (not below 160 p.s.i. and 170°F respectively). At these conditions and with 2 machines, it has been found that about 4 hours are required for each tank. It is of importance to keep the tanks well stripped during the Butterworthing. Some prefer to steam out the tanks before Butterworthing. If this course is adopted care should be taken that the steaming does not last more that 1 hour as the heat will drive off the light ends of the oil and leave a rubbery residue that is very difficult to remove.

It has been found helpful to keep the machines in LOW position for about 1 hour and the HIGH – MIDDLE and LOW in order, in the usual manner.

Boscan Crude and Products/Light Products:

Loading Product	*API Gravity*	*Temperature °F*	*Loading Lines used*	*Normal Loading Rate B/H*
Boscan Crude	10.0 – 10.4	160	2×18 in.	10,000
Boscan Crude Blends	13.0 – 19.0	140	2×18 in.	10,000
Topped Boscan Crude	9.5 – 10.0	160	2×18 in.	10,000
Topped Boscan Crude Asph. Grade	8.0 – 10.0	160	2×18 in.	10,000
Cutback Asphalt	11.0 – 15.0	170	2×12 in.	5,000
Asphalt Cement (Pas)	5.0 – 8.0	300	1×14 in.	5,000
Gasoil	35.0 – 42.5	90	1×12 in.	6,000
Fuel Oil No. 2	38.0 – 40.0	90	1×12 in.	6,000
Fuel Oil No. 5	21.0 – 22.0	120	1×12 in.	5,000
Fuel Oil No. 6	16.0 – 18.0	160	1×18 in.	12,000
Light Naphtha (LSR)	70.0 – 73.0	85	1×12 in.	6,200*
Heavy Naphtha (HSR)	52.0 – 53.5	85	1×12 in.	6,200*
JP – 4	45.0 – 51.9	80	1×12 in.	6,200*

*Maximum rate due to Bajo Grande Terminal security regulations.

FUEL: *Advance Notice of Requirement:*

Should a vessel arriving at Bajo Grande require any bunkers, Owner or Operator must place their nomination with C.V.P/Llanoven via Telex as much in advance of the delivery date as possible. Telex should indicate name of vessel, ETA at Bajo Grande and quantity and quality of Marine Fuels required. A cash deposit in U.S. Dollars covering the nomination must be made prior to the delivery date into the following account:

First National City Bank
339 Park Avenue
New York, N.Y.
U.S.A. 10022
Current Account No. 36990309
(C.V.P./Llanoven Petroleum Income Account)

Owner or Operator must also request F.N.C.B. to confirm via Telex to C.V.P./Llanoven that such deposit has been made in order to cover the cost of bunkers to be delivered to vessel arriving at Bajo Grande at the current ETA. Only after this Telex has been received will delivery actually proceed.

Should the Owner or Operator have a credit account with Chevron, he can also contact either Chevron International Oil Company Inc. in San Francisco (California, U.S.A.) and New York (N.Y., U.S.A.) or Chevron International Oil Company, Ltd., London (England), requesting credit to cover the delivery. CHEVRON would in turn cable to C.V.P./Llanoven the order to supply bunkers. If such is the case, the above mentioned cash deposit will not be required.

Bunker Facilities:
Bunkers are available from pipe-line at Bajo Grande Terminal for vessels loading and unloading cargo at berths No. 1 and 2. Bunkering rate is about 2,500 bbls.p.h. for Bunker "C", Intermediate Bunker Fuels, Marine Diesel and Gasoil.

Marine Fuels and Lubricants available:
Bunker Fuel (sometimes called Bunker "C")
Intermediate Bunker Fuels.
Marine Diesel and Gas Oil.
Lubricants are generally available in the Maracaibo area. Should you require any, we recommend to contact vessel's local Agent.

Lighterage:
Bunker Fuel, Intermediate Bunker Fuels, Marine Diesel and gas oil are also available for ships in the Maracaibo area. The barging rate is $0.30 per barrel; minimum $100.00. 72 hours advance notice is required for barge deliveries of all products.

FRESH WATER: Delivery of boiler and potable water is made by barge at an all-inclusive price of Bolivares 16.00 per metric ton, *minimum quantity 100 tons.* The barge holds about 160 tons and the pumping rate is about 25 t.p.h. Requirements should be cabled in advance to the Agent of the vessel in Maracaibo.

REPAIRS: No major repair facilities are available in Maracaibo but small repairs can be undertaken by local machine and electric shops. Shore labour can be furnished if required. Technicians are available for minor radio repairs. Nearest dry docks are at Curacao for vessels up to 30,000 d.w.t. and at Puerto Cabello, Venezuela for vessels up to 18,000 d.w.t.

CUSTOMS: *Contraband:* Strict compliance with the Customs Law of the Country is enforced by the Authorities and Masters are strongly advised to caution crew members against attempting to smuggle cigarettes. 1 open package per person is allowed to be carried ashore, but a greater quantity will result in fine and imprisonment of the offender as well as lost ship's time. Due to the very strict enforcement of the customs regulations, it is recommended that no goods be carried which are not shown on the store list. Any new articles (clothes, shoes, etc.) should be included in the store list and marked as personal belongings. If during a checkup by customs, articles considered as contraband are found, this will not only mean confiscation of these articles, but also hours or days of lost ship's time, while the case is handled at court.

CONSULS:
Following countries have consular representation in Maracaibo.

Argentina
Austria
Belgium
Bolivia
Colombia
Costa Rica
Denmark
Dominican Rep.
Ecuador
El Salvador
France
Germany (West)
Great Britain
U.S.A
Guatemala
Italy
Mexico
Netherlands
Nicaragua
Norway
Panama
Puerto Rico
Peru
Spain
Sweden

SURVEYORS: American Bureau of Shipping and Lloyd's Register have Agents in Maracaibo. Their services may be procured by cabling requests to the local Agent at Maracaibo.

HOLIDAYS: The Terminal office will be closed on the following days. New Year's Day (January 1st); Easter Thursday/Friday (March/April); Declaration of Independence (April 19th); Labour Day (May 1st); Battle of Carabobo (June 24th); Independence Day (July 5th); Birthdate of Simon Bolivar (July 24th); Columbus Day (October 12th); Chiquinquira's Day (November 18th); Christmas Day (December 25th); All Saturdays; All Sundays.

SHORE LEAVE: Shore Leave is permitted at the discretion of the Port Authorities; required number of shore passes will be brought on board on arrival in Maracaibo and have to be returned to the customs guard again before the vessel leaves Bajo Grande.

GENERAL:
Tonnage applicable on fees:
On ships registered in countries which have a reciprocal tonnage agreement with Venezuela, the gross Tonnage registered in such countries will be applied for calculating pilotage fees. Such countries are:

Denmark
France
Germany
Netherlands
Ireland
Norway
Portugal
Sweden
United Kingdom
U.S.A.

On ships registered in countries not listed above, such ships calling at Venezuelan ports for the first time must be measured for Venezuelan tonnage by the Port Captain. It is usual practice to take ashore the ship's Panama Canal or Suez Canal International Gross Registered Tonnage Certificate, which is used as a basis for recalculating tonnage under the Venezuelan regulations, and return it before sailing. The Venezuelan Admeasurement Certificate, when later issued, is forwarded to the Owners. A fee is charged for this certificate, which is payable only on the ship's first call.

Firearms and Ammunition:
Firearms must not exceed 1 per officer nor may the ammunition exceed 18 cartridges per officer. All firearms and ammunition must be carefully declared on the store list and should be collected and held in Master's safe custody while vessel is in Venezuelan waters.

Guards:
Customs guards are stationed on the platform at Bajo Grande. They must be provided with sleeping quarters on the ship and seated in the officers' mess for their meals. Non-compliance may cause cargo stoppage and fines. Masters are reminded that these guards are representatives of the Venezuelan Government and any uncourteous action on the part of the crew or passenger will be regarded as a slight against the Country itself.

Gangways:
The ship is to supply a safe gangway, which allows easy access to the vessel. The Terminal has a gangway which may be used on request with the understanding that any damage to the gangway or ship or shore personnel through its use may be held against the ship.

Safety:
Vessel must be in readiness to move at all times. The attention of Masters of turbine steamers are called to this regulation.
Ship's fire fighting equipment must be ready for instant use while vessel is alongside. Shore personnel will render assistance in an emergency but, since no fireboats are stationed in the immediate area, vessels should be prepared to combat fire without outside assistance. It is necessary to obtain Terminal's approval for repairs of propelling machinery.

Normal safety precautions apply. Smoking is not allowed on the pier. No hotwork is permitted on vessels alongside without a *written* permission from the Port Supervisor. *Swimming alongside pier is dangerous and absolutely prohibited.*

Launch Service:
The launch is primarily for the use of the port staff, but will transport crew when convenient.

Taxi:
Taxi service will be generally available upon request to vessel's Agent.

Visitors:
According to Port regulations concerning access to ships and loading terminals and in the interest of industrial safety, only persons directly concerned with loading operations will be permitted to board vessel or visit the loading platform at Bajo Grande.

Plimsoll Marks:
The Port Captaincy requires that Plimsoll Marks be readily visible. If they are not clearly legible, permission to sail may be withheld and a fine imposed. This is applicable to inbound and outbound vessels.

We therefore, request your full compliance with this Regulation from the Maracaibo Port Captaincy.

Marine Stores/Charts:
Marine stores are available in limited supply. Marine charts are not available.

Compass Adjusters:
There are no compass adjusters in Maracaibo.

Seamen left behind:
Sailing may be withheld until all crew members are aboard with exception of those ashore for justified reasons. It is important that Masters bear in mind that the Venezuelan Law will at all times hold the vessel's Master, Agent, or Owner responsible for any seamen left behind in Venezuela.

Crew in Transit:
In case a crew member is left ashore for a justified cause, such as hospitalization, repatriation, etc., his documents and personal effects are to be delivered to the vessel's Agent before sailing. A letter is required from the Master with detailed instructions as to maximum cash advance, etc. All expenses incurred by such members are for vessel's account.

Port Supervisor:
Masters or their representatives are invited to call at the Port Supervisor's Office on shore in Bajo Grande or over the telephone on the pier, for any further help, information or complaints.

Terminal:
Cable Address: C.V.P./Llanoven Maracaibo. Telex Nos.: 61254 and 61161.

(2) **OPERATORS:** C.V.P./Llanoven.

LOCATION: S.W. of channel buoys B – 87 and B – 88.

The installations for processing natural gas liquids at Bajo Grande processes liquids for C.V.P./Llanoven, and they are known as Product Owners. The Plant is situated in Bajo Grande, approximately 10 miles to the South of the Port of Maracaibo, on the West bank of Maracaibo Lake.

FLAG: The local authorities require the Venezuelan flag to be hoisted to the top of the vessel's mast from the time it enters the outer channel on arrival, until it leaves the outer channel on departure.

DOCUMENTS: *Customs Clearance for Programmed Vessels:*
Vessels which arrive in ballast or with cargo in transit, require the following documents (with additional file copies if these are required):
(A) Clearance from the last port
2 copies – 1 visaed Ballast Certificate
1 or more letters Consular Correspondence (in sealed envelope)
4 copies – 2 visaed Passenger List
4 copies – 2 visaed Lists of Equipment
4 copies – 2 visaed List of Passengers in Transit
4 copies – 2 visaed List of Mess Equipment and Spares
4 copies List of Personal Effects
4 copies – 2 visaed List of Stores
5 copies Crew Lists.

Vessels which arrive with cargo must have, apart from the foregoing:
(B) 4 copies – 2 visaed Venezuelan Entry Manifests
6 copies – 2 visaed Bill of Lading
2 copies visaed Entrance Manifests.

In the absence of a Venezuelan Consul at the last port, the Customs clearance documents must be signed by the Consul of a friendly nation, one of the Port Authorities, Notary Public, the Chamber of Commerce, or by two recognised signatories.

Clearance through Customs of diverted vessels:
Vessels diverted on the high seas to Maracaibo to load at Bajo Grande must present all the documents indicated in (A) above, except the consular correspondence, which they will not have.

Vessels diverted on the high seas to Maracaibo (Bajo Grande) which do not have a Venezuelan Customs Clearance on board, must advise their Agents by radio prior to their arrival, the name of the vessel, the name of the Master, nationality of the vesel, net Venezuelan tonnage (if available, if not, the net registered tonnage), last port of discharge, port to which it was originally sailing and the ETA at the Pilot station at San Carlos. This information is required to obtain the Entry Permit prior to the arrival of the vessel. Three copies of the diversion telegram received by the vessel, signed by the Master, together with those documents detailed above, must be presented to the Port Authorities on arrival at Maracaibo. Non-presentation to the Port Authorities of the documents or the information mentioned will occasion a fine to the vessel.

Inspection by Customs: All vessels arriving from foreign ports destined for the dock at Bajo Grande must anchor in the Port of Maracaibo for Customs inspection by the Port Authorities before proceeding to Bajo Grande. The vessel's gangway must be in position prior to arrival at Maracaibo.

A member of the National Guard of Venezuela will come on board every vessel at Bajo Grande to observe the activities in connection with the operations of loading and unloading. This official is authorised as representative of Customs and is known as the "Vigilante de Aduana". He must be fed and lodged at the same standard as ship's officers.

Loading Documentation: The loading and Customs papers will be delivered to the Captain by the Agent of the ship on his arrival at the Port of Maracaibo, on his voyage outwards.

PILOTAGE: Vessels entering currently have the option of taking on the official Pilot at:

(a) The channel in front of the pilot station at San Carlos, between the Buoys B – 24 and B – 26.

(b) In front of Amuay Bay or Punta Cardon. However, to arrange this service, Agents must be advised at least 48 hours in advance of this requirement.

The Pilot who boards the vessel in front of San Carlos will take it to Maracaibo, where he will disembark.

Due to weather conditions, the Port Captaincy of Maracaibo cannot guarantee the embarkation or disembarkation of the Pilots at the "EM" buoy. For this reason, Captains must communicate with the pilot station of San Carlos to receive necessary instructions as to where the Pilot will be embarked, the latter usually coming on board between Buoys B – 24 and B – 26. The system of communication between the pilot station of San Carlos and the vessels will be via radio-telephone. The San Carlos frequencies are: 2182 kc/s. and 156.6 mc/s. (VHF Channel 16). Other frequencies are: 2122 and 2080 kc/s. and 156.8 mc/s.

Pilotage to navigate through the inner and outer channels is compulsory at all times. The maximum speed of navigation in the dredged channels is 10 knots.

Vessels leaving will take the Lake Pilot on board at Bajo Grande and on reaching the port of Maracaibo the Pilot will be changed for another to take the vessel through the channel. The channel Pilot will pilot the vessel up to the San Carlos bank, generally between Towers E – 31 and E – 33, where he will disembark. The Port Captain of Maracaibo has issued instructions to all ships' Agents so that they may inform the Captain and/or Owners of the vessels that all vessels must identify themselves with the pilot station of San Carlos by radio-telephone, regardless of the time of day, when they are entering between Buoys B – 17 and B – 19 and when they are leaving between Buoys T – 42 and T – 40.

Every time a launch with an official Pilot on board leaves to attend to a vessel in sight, the costs will be charged to the company which owns the vessel or to its representative, even when service has not been given.

A government Pilot will assist each vessel from Maracaibo to Bajo Grande and on the outbound trip to Maracaibo. The government Pilot will also assist in the berthing and unberthing operations. The ship's Agent will inform the Master of each vessel, as well as the government Pilot, the schedule for berthing the vessel.

The Plant Mooring Supervisor will board each vessel prior to approaching the dock. Mooring Supervisor will assist in the mooring and unmooring operations. It should be understood that the Mooring Supervisor acts only in an advisory capacity to the Master. The vessel's Master retains full responsibility at all times. The Plant assumes no responsibility in connection with any acts or advice given by the Mooring Supervisor.

APPROACHES: The buoy which marks the entrance to the outer channel (buoy "EM") is situated in approximately position 11° 13′ 47″ N., 71° 33′ 31″ W. The characteristics of the light of the "EM" buoy are: white flash every ten seconds, visibility approximately 5 miles. The distance between the "EM" buoy to the Southern extremity of the outer channel, marked by the Buoys B – 27 and B – 28, is approximately 15.75 miles. The channel is 1,000 ft. wide and normally has a depth of 42 ft. minimum at low tide observed at the time of neap tides with a tidal amplitude varying 2 ft. 3 in.

There is a breakwater 0.5 miles to the East of and parallel to the outer channel which extends 1.6 miles to the North from the Northern side of the Island of Zupara. The end of this breakwater is marked by a steel frame tower with a light 25 ft. above sea level. Characteristics of the light are: white flash every 8 seconds, visibility about 3 miles.

Commencement of the inner dredged channel is marked by the Buoys B – 29 and B – 30. The length of this channel, which is marked by buoys, is approximately 12 miles, and ends at Buoys T – 55 and T – 56. The channel is 800 ft. wide and the normal checked depth is 43 ft. neap tides with a tidal amplitude varying between 1.5 ft. to 2.5 ft.

The channel from the Buoys T – 56 as far as the port of Maracaibo is a dredged channel, whose end is marked by Buoys B – 73 and B – 74. It is some 800 ft. wide and has a depth of at least 43 ft. The distance is about 11 miles and the tidal amplitude range is insignificant.

RESTRICTIONS: Bridge clearance at MHHW 146 ft.

MAX. SIZE: The maximum permissible fresh water draft at the dock is 36 ft. and the maximum overall length vessel the dock will accept is 700 ft. Vessels with a berthing displacement up to 20,000 long tons will be accepted, providing the approach velocity can be controlled to 0.3 ft. per second or less.

Vessels with an overall length greater than 700 ft. or with a fresh water draft of more than 26 ft. or a displacement greater than 20,000 long tons will not be accepted for loading at Bajo Grande, unless they have obtained the prior authorisation of C.V.P./Llanoven. If the vessel is not equipped to moor, load and unmoor in a safe manner, the vessel will not be loaded. In such cases, there will be no responsibility on the part of C.V.P./Llanoven.

RADIO: C.V.P./Llanoven Export Department also has radio-telephones with the following frequencies: 2080, 2120, 2182 (stand-by), 2638 and 2738 kc/s. and 156.6 (stand-by) and 156.8 mc/s., operated in accordance with the following schedule:

Monday through Friday:	From 0730 until 1130
	From 1300 until 1700
Saturday, Sunday and Holidays:	From 0730 until 1030 approx.

Any tanker or vessel bound for Bajo Grande shall cable C.V.P./Llanoven, at least 5 days in advance of its scheduled arrival time in Maracaibo, giving notice of its estimated time of arrival, loading capacity, amount and type of product to be lifted and condition of ship's tanks.

At least 48 hours in advance of arrival at the San Carlos Pilot Station, the vessel's estimated time of arrival, nationality, Venezuelan net tonnage (if available, otherwise its registered tonnage), quantity and type of cargo required, condition of ship's tanks, name of Agent, last port, Master's name and all requirements of the vessel while in port should be cabled to "C.V.P./Llanoven Maracaibo" and to the ship's Agent. As the cable office in Maracaibo is not able to communicate directly with vessels at sea, messages to "C.V.P./Llanoven Maracaibo" and to Agent should be routed via PJC Curacao, and should be prefixed "Via AAC" (All America Cables and Radio Inc.). Failure to give such proper notices shall absolve the Plant from any claim for delays or demurrage.

TUGS: 2 tugs, each 1,600 h.p.; will be used for mooring and unmooring operations.

BERTHING: The dock proper may be identified by the overwater pipe-line trestle that connects the dock with shore.

The dock is located approximately 10° 30′ N. 71° 36′ W., which is 2 miles off shore from the Bajo Grande Natural Gas Liquids Processing Plant and S.W. of channel buoys B – 87 and B – 88 on the Maracaibo channel. The dock is single sided and consists of 4 breasting pilings, 4 mooring dolphins and a loading platform.

The dock is equipped with a compressor and auxiliary equipment to assist the ship in compressing and re-condensing the ship's vapours. No liability will be assumed by the Plant Operator for unavailability of the Dock's vapour compressor. The dock is also equipped with a vent system to dispose of contaminated vapours.

A tie-up crew will handle all mooring or pick-up lines before and after loading.

The Plant tie-up crew will assist the ship's crew in positioning and connecting the cargo loading arms and in removing same on completion of loading. The dock loading arms are equipped with 10 in. ASA 300 lb. RF flanges. It shall be the responsibility of the ship to furnish its own fittings to mate with the dock's 10 in. ASA 300 lb. FR flanges.

Mooring procedure: Any vessels calling at Bajo Grande must be equipped with mooring hawsers of sufficient length and strength to run a line to each of the 2 bow and 2 stern mooring dolphins and shall use such equipment while at the dock. Vessels equipped with tension winches and cables shall utilise these in addition to the mooring hawsers or alone if the vessel has sufficient cables to meet the minimum requirements of running a cable to each of the bow and each of the stern mooring dolphins. For added security of those vessels not equipped with tension and/or cables, 1 steel cable will be furnished for a bow and another for a stern mooring dolphin by the Plant. It should be recognised by all parties that while the use of these cables is strongly recommended, the Plant accepts no responsibilities for loss or damage to any vessel or to any facility or to any person that may result from the failure of this equipment.

For the convenience and safety of all personnel boarding or disembarking while at Bajo Grande it is recommended that the vessel's accommodation ladder be rigged on the port side, this being the side normally laying against the dock. The ladder should be suspended after the Mooring Master boards and during docking operations to avoid being fouled.

BALLAST: There are installations for unloading dirty ballast. Vessels which arrive at Bajo Grande with dirty ballast must advise 48 hrs. in advance with regard to any emulsifiers, detergents or chemicals which may be present in the ballast and which are going to be unloaded. If these emulsifiers, detergents and chemicals are not acceptable, C.V.P./Llanoven will advise the ship and the latter must arrive at Bajo Grande with clean ballast.

The ballast will be unloaded at a rate of approximately 5,000 bbls.p.h., nevertheless in the case of unexpected damage or malfunction of the system at Bajo Grande, C.V.P./Llanoven will give instructions to the Master of the vessel so that he may arrive with clean ballast and C.V.P./Llanoven will not be responsible for the delays which may be suffered by vessels in cleaning their tanks prior to arrival.

It is strictly prohibited to discharge into the lake any liquid or solid waste resulting from tank cleaning. Therefore it is recommended that the Master gives instructions to all personnel so that they avoid any possible leak or contamination in the lake.

In the event that the representative of the Plant or the National Guard observe that dirty ballast is being discharged into the lake, or even residues or other contaminatory organisms whilst clean ballast is being unloaded, such operations will immediately be suspended and the consequences will be strictly for the account of the ship.

LOADING: *Notice of Readiness:* On arrival at Bajo Grande and after inspection by the Customs Authorities, and having obtained any other official approval required before loading, the Master of the vessel will notify C.V.P./Llanoven in writing that the vessel is ready to load. This notification must include a report of the conditions of the tanks of the vessel, specifying in detail the temperature, pressure, last loading, list of vessel and trim, possibility of contaminatory organisms and any other conditions which may effect the loading.

The Master of the vessel may request any equipment and/or service which he considers necessary for the safe and efficient loading of his vessel and C.V.P./Llanoven will make every effort to fulfil this request.

It will be the responsibility of the vessel to provide its own connections to join up with the RF 10 in. 300 ASA flanges of the dock.

It will be the responsibility of the ship's Master to ensure that prior to commencement of loading, the atmosphere inside the tanks, which are to receive products are within the safety limits stipulated. Nevertheless, C.V.P./Llanoven reserves the right to inspect at any time, to verify the fulfilment of these safety precautions and to refuse to load any vessel which in the opinion of C.V.P./Llanoven does not fulfil the safety requirements stipulated.

LPG refrigerated vessels will not be considered ready to load at Bajo Grande unless all the LPG tanks contain LPG vapours and are sufficiently cooled to permit shipment of the nominated products.

Vessels which receive completely refrigerated products must be capable of receiving at their boiling point from 0.5 to 2.5 p.s.i.g. Such vessels must have a refrigeration system capable of liquefying all the vapours resulting from the shipment at the rate specified and including those vapours which form as a result of the heat gained by the vessels' tanks.

Loading Procedure: The positioning and connection of the loading arm must be effected to the satisfaction of the personnel in charge of the vessel. After approval of the personnel in charge of the vessel, the loading valves may be opened to check that the connections do not have leaks and loading may commence.

The maximum loading rate is 8,000 bbls.p.h. (750 – 775 metric t.p.h for completely refrigerated products and petrol) and a minimum loading rate of 250 bbls.p.h. (23 metric t.p.h.).

The pumps are designed to supply a minimum flow of 250 bbls.p.h. at a pressure of 225 p.s.i.g. and, since the installations at the Bajo Grande Dock do not have facilities for controlling the pressure of LPG which is being loaded, they are not responsible for any damage or delay which may occur due to the request for reduction in flow and pressure of LPG in order to cool or purge the vessel's tanks.

There are no installations for generation of inert gases. LPG vessels which require cooling, purging or any other assistance in Bajo Grande can be accepted after prior request in writing from the Master of the vessel; however, these services will be charged to the vessel. The responsibility for helping to effect purging and/or cooling is charged at 733 Bolivares per hour, during the time that such operation of purging or cooling causes the vessel to exceed the permitted period of stay.

The quantity of products used in such purging or cooling will be for the account of the vessel.

In the event that the dock vapour compressor is operated at the request of the vessel's Master for a purpose other than for purging or cooling, this will be charged at the rate of 500 Bolivares per hour to the ship.

All loading and unloading operations must be suspended whilst there is bad weather and the tank covers of the vessel must be closed and secured. During periods of calm, petrol or other products with a low flash point can be loaded at reduced rates or the loading operation can be interrupted if the heavy vapours are not being dispersed with sufficient speed to avoid dangers of gas accumulation. Officers on the vessel must be alerted so that they may be on watch whilst such conditions apply.

Under normal operational conditions it may be necessary to displace the loading line. This will require the person in charge of the vessel advising the representative of the Plant when the loading is nearing completion in order to complete an equal quantity to the capacity of the loading line.

Permitted Period of Stay: (a) The permitted period of stay, as is defined hereunder, shall commence to be counted from 6 hours after arrival of the vessel at Bajo Grande. The permitted period of stay will be terminated when the final mooring cable has been withdrawn from the quay.

For the purpose of these instructions, the Notice of Readiness, may be delivered after the vessel has tied up at the dock; nevertheless, the arrival at Bajo Grande shall be defined as the time when the vessel passes between Buoys B – 87 and B – 88, which mark the Maracaibo navigational channel and are situated approximately 1,000 m. in front of the Bajo Grande Dock.

(b) In the event that a vessel arrives at a different time to that confirmed in the shipping programme, and unless C.V.P./Llanoven has approved a different arrival time, vessel must await mooring of other programmed vessels before arriving and which vessels may have arrived at that time and the permitted period of stay will commence when the loading operation commences, or 6 hours after receiving Notice of Readiness, whichever is the later. It is agreed that a vessel shall be included in the loading programme if it arrives at Bajo Grande between the hours of 12.01 hrs. on the accepted date and 0600 hrs. of the following day.

(c) Except for the provisions in (b) above, all vessels arriving at Bajo Grande will have the right to moor in the order in which they appear in the shipping programme. C.V.P./Llanoven, at their discretion, may change the order of shipment when it may be necessary for reasons of safety or for the purpose of obviating a closure of the Plant or reduction in production.

(d) The waiting time permitted shall be 24 hours, plus one (1) hour for each 6,000 bbls. of product loaded in excess of 114,000 bbls. This waiting time shall be that permitted to load the complete cargo or part of the cargo of the vessel, it being understood that any time spent in deballasting operations will not be taken as waiting time. If the loading operations are delayed or interrupted by *force majeure,* which shall include the closure of the shipping terminal due to bad weather, the time thus lost will not be counted as permitted waiting time.

(e) The loading operations shall be considered as terminated when the loading hoses are disconnected. Every vessel will leave the quay as quickly as may be practically possible after having completed shipment of the cargo and the personnel of the vessel and those on land have arrived at an agreement as to the quantity of products shipped.

(f) In the event that a vessel is moored at the quay for 6 consecutive hours after C.V.P./Llanoven has notified the Master of the ship that the installations are ready to deliver the product, if the vessel on completion of this time is not in a position to receive products, then at the discretion of C.V.P./Llanoven, the vessel may be withdrawn from the quay, to prevent the products burning or a reduction in production.

A vessel may be withdrawn from the quay at any time for reasons of safety.

Verification and Measurement: Determining factors to arrive at the official figures of a shipment:

(A) Petrol and Butane:

(1) Correction factors of the individual meters less than 1%. In this event the terminal shall always use the figures of the meters as official (and not take into account the absolute difference in barrels) taking always the precaution of carrying out a comparison between the figures of the ship and those of the land.

(2) Factor of correction in any of the meters greater than 1%. In this event the vessel's figures will be used, comparing them in all aspects with the figure of the meters without applying the correction factor and with the land tanks.

In those cases in which the vessel's figures are used, it is appropriate to suggest that they check their figures.

(3) In the event of the measuring system not operating, and the vessel cannot give its own figures, as a last recourse the figures of the shore tanks will be used.

(B) Propane:

(1) The vessel's figures will be taken proceeding in exactly the same way as in point (2) of sub-section (a) above.

(2) In the event that the vessel cannot supply figures, the figures of the shore tanks will be used.

All volumes will be adjusted to the volume equivalent to 60° F in accordance with the applicable sections of Standard API 2534 and the corresponding tables of the Measurement Tables of Oil ASTM (latest edition) or other methods or standards selected by C.V.P./Llanoven.

If the product delivered is LPG, the content of the ship's tanks will include the quantity of the product in the form of vapour.

All volumes will be calculated in U.S. liquid barrels at 60° F and the adjustments at this temperature will be made in accordance with the Oil Measurement Tables ASTM – 1P, American Edition 1952 (or the ruling tables which may replace these).

In the event of the products being loaded in a vessel whose tanks, pipes and equipment are empty when loading commences, the gross volume of products which may remain in the pipes and equipment on completion of shipment and at the time of final measurement, shall be calculated on the basis of the volumetric capacity of those pipes and equipment, adding the calculated volume loaded in the vessel's tanks and including in the total volume delivered to and received by the vessel at that time. In the event that the procedure described is used to determine the volume of products delivered and if during the time of this delivery vapours from the vessel's tanks be vented then the quantity of vapours vented shall be determined as shall also be the liquid volume equivalent to these vapours in normal conditions and this will be added to the quantity determined in (a) and (b) above.

Permissible Composition of the Atmosphere of the Tank for purging: Maximum percentage per volume of air or oxygen permissible for the safe shipment of the product when the vessel's tanks are purged with CO_2 or N_2:

Product	*Air* (CO_2)	(N_2)	*Oxygen* (CO_2)	(N_2)*
LPG	50	40	8	7
Petrol	50	40	8	7

*The percentages of nitrogen do not include the nitrogen of the air in the mixtures.

Example: If a vessel is going to load LPG and it is going to be purged with N_2, it must add sufficient N_2 to ensure that the mixture does not contain more than 40% by volume of air. The other 60% will be N_2.

Ref. Principles & Practices of Purging, 1954. American Gas Assoc. – Chapter 2, page 28.

FUEL: Heavy and medium marine diesel, intermediate fuel, and bunker "C" fuel oil are available in the area. Lubricating oils in limited quantities are also available from local contractors. All bunker, lubricating oils, water and other requirements should be cabled to the ship's Agent. For reasons of safety, no bunkers may be taken on the vessel while berthed at Bajo Grande.

FRESH WATER: Available at Maracaibo Harbour.

MEDICAL: Complete medical services are available in Maracaibo.

REPAIRS: Maracaibo: No major repair facilities are available, minor repair jobs can be taken care of through local machine and electrical shops. Shore labour can be furnished if required. Radio, radar and gyro compass technicians are available upon request.

Bajo Grande: No repair facilities are available, but when required, personnel from shops in Maracaibo will travel to Bajo Grande to effect repairs.

CONSULS: The following nations have Consular representation in Maracaibo:

West Germany
Belgium
Colombia
Costa Rica
Chile
Denmark
Ecuador
El Salvador
Spain
France
Great Britain
Guatemala
Netherlands
Italy
Norway
Panama
Peru
Sweden
Switzerland
U.S.A.

SHORE LEAVE: Launch service for official business purposes and emergencies is readily available in Maracaibo. Launch service for shore leave can be arranged through contact marine service and will be the responsibility of ship's personnel. Arrangements for shore leave transportation can be made through the ship's Agent. No shore leave facilities are available at Bajo Grande.

CLASSIFICATION SOCIETIES: American Bureau of Shipping and Lloyd's Register of Shipping, U.S. Salvage Association, Salvage Association of London, Det Norske Veritas, Bureau Veritas, Registro Italiano Navale, and Germanischer Lloyd have Agents in Maracaibo. Surveyors are available by appointment from any of these Agents.

CURRENCY: The Venezuelan unit of currency is the Bolivar (Bs) and is the only currency recognised as legal tender within the country. Masters desiring a cash advance should make the request to their Agent when advising ETA.

MAIL: Outgoing mail for ship's account may be given to the Agent's representative who boards the vessel on arrival at Maracaibo inbound. Personal mail will be accepted only if carrying the correct amount of Venezuelan postage, or if postage is authorised by the Master for the vessel's account.

GENERAL: *Maracaibo Port Captaincy:* Directive which must be observed by vessels entering and leaving Maracaibo Lake:

OBJECTIVES:

To increase the safety of Human Life at Sea, to take all necessary measures to avoid marine accidents in general and to ensure that vessels are navigated with safety in the navigable channels and waters of Maracaibo Lake.

1. All radio-telephone communications between the Control Offices of Maritime Transit under the control of the Port Captaincy of Maracaibo and vessels, shall be made, for the first contact, via Channel 16 (156.8 mc/s.) and immediately it shall be agreed that for the transmission of required information they will change to Channels 12 or 14. Also this procedure will be adopted in communication from ship to ship.

2. Any vessel which navigates in the vicinity of the buoy "EM" of the outer channel being 10 miles from the latter shall call the pilot station at San Carlos, requesting permission to enter the zone and will supply the following information:

(a) Name and type of the vessel.
(b) Nationality.
(c) Draft.
(d) Last port of call
(e) ETA at the "EM" and "B – 26" buoys.

3. The Port Captaincy will authorize by radio, via the pilot station of San Carlos, to Masters of vessels who have reported to that station request to cross the outer channel, or part of it, with the assistance of the Official Pilot, in accordance with the sequence of arrival.

4. Every 5 miles, the Master of the vessel will call up San Carlos, indicating any information which he may have and giving his position within the channel, by reference to the buoys which are on his starboard side.

5. When communication in item 1 has occurred, San Carlos will inform the vessel as follows:

(a) The location of any dredger (mobile or stationary) which is operating in the outer channel, buoys whose lights are out, changes in buoys' positions or where buoys have disappeared, vessels which have sunk, etc.

(b) If there are vessels leaving the port, to give the position of these by reference to the odd numbered buoys.

6. Vessels shall establish radio-telephone communications with the dredger when they are 5 miles from it. In this communication, they will indicate the place they estimate that the vessel will meet the dredger and any other information which they consider necessary for the safety of navigation of both.

7. San Carlos will keep vessels informed of all the circumstances mentioned above, especially the time and place that each of them estimate to pass close to any dredger which is operating in the outer channel, and in order that they do not meet the dredger simultaneously.

8. Masters of vessels will inform the pilot station at San Carlos of any other information which the latter may request.

9. Masters of vessels will keep a watch on Channel 16, on the order of the Official Pilot, until their arrival at port of destination in Maracaibo Lake and on leaving until the Pilot has left the vessel.

10. Pilots, when they are bringing a vessel into the port, at the level of the parallel of Palmas del Norte Point (Buoys T – 55 and T – 56), will call up the Port Captaincy and transmit the following information:

(a) Name of vessel
(b) Time
(c) Port where operations will be effected
(d) Name of Pilot calling.

11. When the vessel continues to navigate to the South of General Rafael Urdaneta Bridge, the Pilot will inform the Control Office of Maritime Transit in Maracaibo, the time at which the vessel will pass Buoy "B – 79".

12. The average speed of vessel in the navigable channels will be ten (10) knots, Masters being authorized as are also Official Pilots, to alter this, when the safety of navigation may require it.

13. San Carlos will check by radio-telephone the transit of vessels from the entrance buoy "EM" to the level of the parallel which passes in front of Palmas del Norte Point (Buoys T – 55 and T – 56 and vice versa).

14. Loaded vessels navigating outwards, and being in the outer channel, will have priority over vessels coming in to the same channel, provided that these do not meet with those coming out in the critical zone, included between Buoys B – 21 and B – 22 and E – 33 and E – 34. For this purpose, the San Carlos Pilot Station will inform entering vessels the situation of leaving vessels so that they may take necessary measures to avoid meeting those vessels coming out in the referred zone.

15. The Port Captaincy will check via the office of Control of Maritime Transit, the Navigation of vessels, from the parallel passing Palmas del Norte Point (Buoys T – 55 and T – 56), as far as the terminals and ports to the South of General Rafael Urdaneta Bridge and vice versa.

16. Every Official Pilot navigating outwards when passing the Buoy B – 72, will call up San Carlos by radio-telephone and will supply the following information:

(a) The time that he is passing Buoy B – 72.
(b) The time that he is arriving at San Carlos.

17. When the dredger receives any call from a vessel it will give information as follows:

(a) Location where it is at that time.
(b) Direction of dredging (South North or North South).
(c) The side on which the vessel must pass.
(d) Time necessary to make the manouevre indicating on which side of the channel dredging will continue after the manouevre.

18. The pilot station at San Carlos will be attentive to all communications made and will take note of them, in the event that their intervention may be required by dredgers or by vessels.

19. Any vessel sailing from any port in the No. 2 pilotage area of Maracaibo, will inform the Port Captain as follows:

(a) Type and name of vessel.
(b) Where from and time of leaving the port.
(c) Speed and port of destination.
(d) Estimated time of passing Buoy B – 72.

Signed – Port Captain.

Section B

LA ESTACADA: 10.42 N. 71.32 W.

(N.B. For important details of Documentation, Pilotage, etc., see "Maracaibo Lake").

OPERATORS: C.V.P./Llanoven.

LOCATION: Loading Terminal in the Lake of Maracaibo at La Estacada, located at 10° 42′ 30″ N. and 71° 31′ 40″ W. Entrance to and leaving this terminal is made between buoys B.65 and B.66.

DOCUMENTS: As soon as vessel is safely moored Agents representative will board the ship together with port authorities. The following documents are needed on arrival:

1. Clearance from last port consisting of:
   Sealed envelope from Venezuelan Consul in sailing port addressed to "Aduana de Maracaibo" and attached to the envelope:
      Store List
      Crew List
      Slop Chest Inventory
      Ballast Certificate
      All visaed by Venezuelan Consul in sailing port.
2. Crew List (6 copies)
3. Store List (6 copies).
4. Slop Chest Inventory (Deck, engines and cabin store listed separately) (6 copies).
5. List of Personal Effects (6 copies).
6. Deratisation Exemption Certificate (original).
7. Venezuelan Net Tonnage Certificate (original).
   See "Tonnage applicable".

The health officer sometimes requests to see the vaccination certificate of crew members.

PILOTAGE: (See "Maracaibo Lake"). Pilotage Compulsory.

1. All vessels must call C.V.P./Llanoven and Agent of VHF Channel 16, when passing the E.M. Buoy and when embarking the Pilot at San Carlos.

2. Reduce speed approaching inner channel buoy B – 63; rig accommodation ladder starboard side properly illuminated. Company Cargo Co-ordinator will board between B – 63 and B – 65.

3. Listen during transit on 2182 kc/s. and VHF Channel 16.

4. In event of unforeseen circumstances requiring vessels to anchor, area West of Estacada Northern Buoy mooring outside of channel limits will be used.

Vessels proceeding to La Estacada Terminal must enter the Outer Channel and embark the Government Pilot between buoys B – 25 and B – 27. After vessel arrives in the vicinity of the E.M. buoy, Master must contact San Carlos pilot station by radio-telephone on frequency 2182 kc/s. or VHF Channel 16 requesting Pilot between buoys B – 25 and B – 27.

Caution: Masters are warned to keep adequate speed in the Outer Channel even when embarking the Pilot as strong cross currents are encountered near San Carlos and Zapara Island. Pilot boats are fast and fitted with a flying bridge. Once the Pilot is on board the vessel will proceed to La Estacada, reducing speed in the vicinity of Inner Channel bouys B-63 and B-65 where C.V.P./Llanoven Cargo Co-ordinator will board. Accommodation ladder must be rigged on starboard side.

MAX. SIZE: Water depth in both buoy moorings is 42 ft. mean monthly observed lowest water (MMOLW). Because of the depth of the surrounding approaches, 41 ft. (MMOLW), admissible mid-ship's maximum draft in both moorings is 39 ft. freshwater. Under certain tidal conditions, however, with vessels over 60,000 d.w.t. and LOA exceeding 750 ft., it may be necessary to restrict loading to 38 ft. 6 in.

Masters are requested to be guided by the Cargo Co-ordinator in appropriate draft to be loaded.

Berth No. 2 will accommodate vessels up to 850 ft. LOA, and Berth No. 1 up to 720 ft. LOA. Beam in both berths is unlimited.

RADIO: *Information to be cabled to Agent, Maracaibo.*

Upon vessel's departure from the last port bound for La Estacada cable 72 – 48 and 24 hours ETA at San Carlos pilot station, including in this message last port, Master's name, if a.c. current on board and any requirements. If diverted, cable original destination, also have 5 copies of diversion cable ready on arrival. If the vessel is nominated to load a part cargo only at La Estacada, indicate at which port cargo will be completed. All cables should be sent via PJC (Curacao Radio) and via ITT All American Cables.

A separate cable should be sent to C.V.P./Llanoven, Maracaibo indicating ETA at San Carlos only.

TUGS: Use of 2 tugs of at least 1,600 h.p. is compulsory for mooring and unmooring at La Estacada (Government Decree). Use of 2 mooring launches with crew including a diver, who inspects the submarine loading hoses, is compulsory at La Estacada. These mooring launches remain alongside ship during stay in berth order act in any emergency.

BERTHING: *(a) Description:* Marine Oil Loading Terminal, is an off-shore installation and consists of two permanent buoy moorings, No. 1 to the South, and No. 2 to the North.

Berths No. 1 and No. 2 consist of 4×14 ft. cylindrical steel buoys, each fitted with a pelican hook to which ship's mooring lines are attached by contractor's mooring launches. On each buoy there are 2×1.625 in. improved plow steel wirelines to supplement mooring lines in order to provide additional security during strong winds. In berth No. 1 the plow steel wires are 520 ft. long and in berth No. 2 585 ft. long.

Both berths are two directional; ships moored heading North or South according to prevailing current.

(b) Deballasting. There are no facilities at La Estacada to receive and treat dirty ballast therefore *same must be clean.* All ballast is discharged ashore through a 16 in. line.

(c) Mooring. All ships should have an adequate supply of stoppers or other special equipment necessary to handle wires attached on mooring buoys. Vessels mooring in berths must be equipped with 4 ropes forward and 4 ropes aft. Vessels are cautioned that good quality ropes are essential and that they will be held liable for any damage occurring through improper or poor mooring ropes or inability to properly handle same.

Vessels in buoy moorings must have deck winches in readiness for use at all times. Method of berthing will be at discretion of the Government Pilot, as weather and other conditions permit.

During berthing and unberthing, ship's engines, tackle and all other gear must be in operative condition and in a state of readiness for use on immediate notice.

Weather permitting, and berths being available, vessels may be berthed at any hour of the day or night. Mooring buoys are properly lighted.

Government Pilots will assist in mooring the vessel in berth No. 1 or 2. Loading hoses can be connected both port and starboard side, according to ship's position. The Company Cargo Co-ordinator will remain on board ship to advise on connecting and disconnecting loading hoses, and loading of cargo.

The Government Pilot will later unmoor the vessel and take her out to the channel for departure.

Please keep in mind that he acts as adviser only and the Master retains full responsibility at all times. When ship is in position and mooring wires tautened, mooring winches such as tension winches must have their manual brakes put on securely, and should not rely on automatic rendering devices.

During time vessel is at the berth, frequent and regular inspection of mooring essential to ensure that mooring lines are kept taut and that movement of ship is kept to a minimum. When tugs are alongside or assisting a tanker, all cargo openings, permanent ballast tanks, lids and pump-room doors must be closed no matter what grade oil is being or has been carried, unless these spaces are gas-free.

The mooring operations are carried out by 2 mooring launches and 2 tugs.

TANK INSPECTION: As soon as all ballast is discharged and hoses connected, production supervisor or cargo co-ordinator will inspect ship's tanks. If same are dry and clean he will sign corresponding certificate.

LOADING: Berth No. 1 has 1×24 in. loading line with the corresponding manifold and Berth No. 2 also has 1×24 in. line. 12 in. – 150 lb. marine loading hoses are used. Each berth capable of a max. loading rate of 22,500 bbls.p.h., with an appropriate reduction for topping-off.

However, maximum loading rate entirely at Company's option and will vary according to circumstances and type of tanker concerned. When completing loading, stoppage of cargo will be determined on board, and Masters are requested to inform Cargo Co-ordinator at least 30 minutes in advance in order reduce pumping rate for topping-off. Cargo Co-ordinator will be in continuous contact with pumping station by means of portable radio. Should this means of communication fail, the following signals on ship's whistle will apply:

One long blast	Stand by
Two long blasts	Commence pumping
Three long blasts	Stop pumping

Upon completion of loading, Cargo Co-ordinator, together with ship's officer, will gauge ship's tanks and later prepare cargo documentation.

FUEL: Bunkers and marine fuels supplied by barge before or after loading operation at anchorage. Agent should be given prior notice.

FRESH WATER: Must be ordered with first ETA cable to Agents so that arrangement can be made with supplier. A water barge and a tug must be hired.

DENSITY: 997 – 1003.

REPAIRS: Only smaller repairs can be effected locally; however, technicians available for radio and radar repairs. Contact Agent.

SURVEYORS: American Bureau of Shipping and Lloyd's Register have Agents in Maracaibo.

CONSULS:

The following have consular representatives in Maracaibo:

Belgium
Chile
Colombia
Costa Rica
Denmark
Ecuador
El Salvador
France
Germany (West)
Great Britain
Guatemala
Italy
Mexico

U.S.A.

SHORE LEAVE: Launch is primarily for use of authorities and company staff, but will effect trips for crew if required by Master. Contact Agent who will make necessary arrangements.

GUARDS: One National Guard stationed on board. He must be provided with sleeping quarters and seated in officers' mess for meals.

He is the representative of the Venezuelan Government and therefore any courtesy extended to him will be appreciated.

CLEARANCE: Immediately after termination of loading operations, hoses are disconnected and Government Pilot will proceed to unmoor vessel. In the meantime, cargo documents are prepared by Terminal personnel, and as soon as vessel is cleared, she will proceed to her destination.

CURRENT/TIDE: Current velocity max. 4 knots. Nature of bottom, mud. The tidal range in feet for the Estacada Terminal is springs 1.5, neaps 0.5.

GENERAL: *(a) Cash Advance.* Cash advance will be in local currency (Bolivares). Cable in advance any such requirements to Agents.

(b) Mail. Outgoing correspondence may be given to the marine dispatcher. For personal mail (crew) a list should be made, indicating name of crew member, quantity of letters and destinations, and handed to Agents.

(c) Ship Chandlers. 2 ship chandlers in Maracaibo who can supply vessels with fresh meat, fish, vegetables, fruits, etc. Requirements should be transmitted in first ETA cable to Agents.

TONNAGE APPLICABLE:

The Venezuelan Port Authorities base part of their pilotage charges on the size of the vessel, i.e. on registered net tonnage or on Venezuelan net tonnage.

On Registered Net Tonnage:

Venezuela will accept the tonnage of ships registered in countries with which they have a reciprocal tonnage agreement.

As of this date, such countries are:

Denmark
France
Germany
Ireland
Netherlands
Norway
Sweden
Portugal
United Kingdom
U.S.A.

On Venezuelan Net Tonnage:

Ships not registered in countries listed above, when calling at Venezuelan ports for the first time, must be measured for Venezuelan tonnage by the Captain of the Port. It is the usual practice to take ashore the ship's Panama Canal or Suez Canal Certificate, which is used as a basis for recalculating tonnage under the Venezuelan regulations, and return it before sailing. The Venezuelan admeasurement certificate, when later issued, is forwarded to the owners. A fee is charged for this certificate, which is payable only on the ship's first call.

Section C

LA SALINA (Lacustre): 10.22 N. 71.28 W.

(See Plan Book)

(N.B. For important details of Documentation, Pilotage, etc., see "Maracaibo Lake").

OPERATORS: All terminal facilities are under the control of Lagoven, S.A.

APPROACH: Entrance and leaving this terminal is made between buoys B – 97 and B – 98.

LOCATION: La Salina located on Eastern shore of Lake Maracaibo, in Lat. 10° 22′ 18″ N., Long. 71° 27′ 49″ W. about 60 miles from the entrance buoy "EM".

DOCUMENTS: These are generally placed on board prior to departure. Vessels whose Master accepts the early departure procedure may sail with documents in blank. Figures are then radioed for inclusion in blank documents. Outward clearance documents are placed on board the vessel prior to departure.

PILOTAGE: In the event that no contact can be made with San Carlos Pilotage Station, or if there is a language problem, contact should be made with Vensport, at La Salina by voice radio on VHF Channel 16 (156.6 mc/s.).

The Docking Master boards by tug or launch at the waiting anchorage or in the outer part of the navigation channel leading to the terminal.

ANCHORAGE: The waiting anchorage off La Salina is located immediately Eastward of buoys B – 97, AS – 1 and AS – 3 (Old numbers M – 1, M – 1a and S – 1); it has a depth of between 40 ft. and 41 ft. and fair to poor holding ground in soft mud.

RESTRICTIONS: None. The port is open for navigation during the day and night, allowing ships to enter and sail at any hour.

MAX. SIZE: Up to 112,000 d.w.t. LOA 900 ft. and max. draft 39 ft. (brackish water) at Berth Nos. 6N, 6S, 7N and 7S. Max. distance bow to manifold 450 ft.

Pier No. 3 (West Side) LOA 690 ft., draft 26 ft. and 36,000 d.w.t.

Pier No. 3 (East side) LOA 575 ft., draft 26 ft. and max. d.w.t. 18,000 tons.

No restrictions on vessel's beam at any of the berths.

The access channel to La Salina has a least depth of 41 ft.

Special Note: Maximum draft for loading vessels at La Salina Lacustre Terminal is actually restricted to 39 ft. Vessels loading at this maximum draft of 39 ft. must cross the outer bar channel at HW.

RADIO: The cable and telegraphic address for the Lagoven, at La Salina is "Lagoven La Salina". Radio messages to and from ships at sea are routed through the Government radio station at Maiquetia (La Guaira) call letters YVG. This station operates on a 24 hour continuous watch, on the following frequencies: Listening frequencies: long wave: 500 kc/s.; short wave: 4178 – 6267 – 8356 – 12534 – 16712 – 22225 kc/s.

Transmitting frequencies: long wave: 500 – 472 – 464 – 417 kc/s.; short wave: 17141.6 – 12817.5 – 8730 – 8722 – 6519.5 – 6505.5 – 4352 – 4322 kc/s.

Radio notice of arrival should be sent 72 hours prior to arrival at La Salina and corrected if weather or other conditions delay the vessel.

Vensport La Salina handle all communications between vessels and Lagoven terminal control tower. VHF radio-telephone Channel 16 (156.6 mc/s.) may be used for initial contact. Channels 6, 10, 13 and 14 are also available on a 24 hour basis.

All vessels en route to La Salina may also communicate with Lagoven Amuay or Caripito Marine Offices and request that messages dealing with corrected ETA's, Pilots and other business be relayed to Vensport La Salina.

VHF: Transmit on VHF when passing Aruba or Amuay Bay updated ETA messages to either Lago Marine or Amuay Marine for relay to La Salina. Contact Vensport La Salina on VHF when within reach (normally after passing General Urdaneta Bridge) for latest berthing instructions.

TUGS: Lagoven S.A. maintains one 3,000 h.p. diesel tug and one 1,300 h.p. diesel tug. Tug-boat assistance is considered essential and is afforded to all vessels entering, leaving or shifting in the harbour.

Additional tugs can, in an emergency, be ordered from Maracaibo. The tugs are usually employed in the alongside mode and are made fast using their own ropes (2.5 in. diameter nylon).

BERTHING: At La Salina, Lagoven maintains a deep-water terminal (Lacustre) consisting of an island where are located 2 finger piers, each 1,100 ft. in length and 500 ft. between piers, providing 4 berths to accommodate tankers up to 112,000 d.w.t. Berths are numbered 6N, 6S, 7N and 7S, from North to South. At these berths various products can be loaded simultaneously namely – 6N and 6S – Crude, Naphtha and Butane; 7N and 7S – Crude; Pier No. 3 (West side), Propane and Butane; Pier No. 3 (East side), same as West side but not concurrently with West side. In addition there is an offshore platform (Pier No. 3) where liquefied petroleum gases (Butane and Propane) can be loaded.

Instructions concerning berthing are given by Vensport La Salina by means of radio-telephone.

The use of an anchor when docking is permitted at all berths. It is considered prudent to have the outboard anchor hove-out prior to entering the harbour in order to facilitate speedy release if necessary while docking. The Pilot will advise whether the ship is to be berthed port or starboard side to the dock.

The tugs are made fast on the seaward side, one forward and one aft. Vessels berth under normal circumstances always with head in, which is a relatively simple manoeuvre. Vessels are berthed starboard side alongside berths 6 North and 7 North; portside alongside at berths 6 South and 7 South.

When the vessel's bow is between two and three ships' lengths from the head of the pier, the engines are stopped or reversed. The vessel then slowly enters the berth parallel to and about 40 ft. from the continuous fender face. When the vessel's bow is just past the berth's manifold area, the forward spring line is sent in by heaving line. The vessel is then positioned by using its ropes and is pushed alongside by tugs. The current sets mostly in a general Northwesterly direction with a velocity between 0 and 2 knots. This should be taken into account, particularly when berthing at the South facing berths where the vessel may be set onto the pier.

Moorings: Mooring bollards spaced with 80 ft. intervals are located on both sides of the pier, and provide the basis for a potentially excellent mooring configuration consisting of:

3 Headlines
3 Sternlines
2 Breastlines
1 Forward, Spring line and
1 Aft Spring line.

BALLAST: Vessel should arrive at La Salina with sufficient ballast to permit safe handling. Government Pilot requirements in this connection under normal weather conditions are interpreted as drawing approximately 8 ft. forward, 18 ft. aft, on a T – 2 or similar type tanker, and 11 ft. forward, 20 ft. aft on a 26,000 d.w.t., on larger type vessels the minimum draft required is 14 ft. forward and 22 ft. aft.

Ballast should be carried in a minimum number of tanks, and all other tanks stripped, so as to minimize deballasting time.

It has been established that one of the major causes of contamination of crude oil is the relatively small amount of salt water remaining in the ship's tanks, pumps, and ballast lines after ballast discharge. This very small amount of salt, nevertheless, frequently results in costly damage and downtime to refining equipment, besides presenting many other processing problems.

It is therefore requested that the full co-operation of the Master and Officers of ships loading for Aruba, be given to ensure that all ballast tanks and lines are flushed with lake water and stripped as dry as possible.

Vessels equipped with a separate and completely segregated system of ballast tanks, lines and pumps, will be permitted to discharge ballast and load cargo simultaneously, providing approval of both the pier foreman and Petroleum Inspector is secured.

A pier supervisor who is in direct communication with the loading pumphouse is stationed at each pier during the entire time the vessel is discharging ballast or cargo or receiving cargo.

All dirty ballast must be discharged ashore. The terminal has a 100,000 bbl. reservoir connected to two high capacity separator units. Max. ballast discharge is 40,000 bbls./hr. with max. 130 p.s.i. at rail. One or two hard arms (12 in.) are usually connected for ballast discharge.

If it is desired to follow the "load-on-top" procedure it is requested that the marine representative be informed on arrival.

LOADING: Instructions as to grade or grades of cargo, and the approximate loading rate anticipated, will be given to the Master on arrival. Supplementary information including number and size of lines and Chiksan arms will be furnished to the Chief Officer before loading commences. Loading rates will be reduced as required when topping off.

If vessel's loading orders from owners or charterers do not agree with the terminal's orders, either as to grades or quantity, the marine representative should be advised immediately. The terminal is authorised to load 10% more or less than the quantity nominated.

A terminal employee is stationed at each pier during the entire time the ship is discharging ballast, bunkering, or loading cargo. Fifteen minutes "standby" notice should be given to this man prior to completion of ballast, bunkers, or cargo.

Shut-down controls for all crude oil pumps are available at each loading berth at ship's rail of loading vessels for use in case of emergency only.

LOADING RATES: Loading operations at La Salina Terminal are normally carried out at relatively high pumping rates; up to an average of 40,000 bbls.p.h. Ship's officer will be advised by the pier supervisor at what rate the cargo will be loaded. LPG is loaded up to an average max. rate of 7,500 bbls.p.h. at Platform No. 3.

During periods of calm, loading of gasoline or other similar low flash products may be at lower rates or loading stopped if the heavy vapours are not being dispersed quickly enough to prevent hazards from accumulated gas pockets. Ships' officers are cautioned to be on their guard during such conditions.

Loading rates will be reduced when topping off, if requested by the ship's officer.

Cargo Handling: The terminal is mainly a crude exporting facility, but also LPG, bunkers, condensate and gasoline are handled.

The cargo transfer facilities are:

Berth 6 North and South:
3 × 12 in. Chiksan arms for crude loading.
1 × 8 in. Chiksan arm for bunkers (located aft of manifold).
Berth 7 North:
4 × 12 in. Chiksan arms for crude loading.
1 × 8 in. Chiksan arm for bunkers (located aft of manifold).
Berth 7 South:
4 × 12 in. Chiksan arms for crude loading.
3 × 12 in. Chiksan arms for pressurized gas loading (located forward of crude loading manifold)
1 × 8 in. Chiksan arm for bunker (located aft of manifold).

Gasoline, condensate and pressurized butane are handled at Berth 6 at both sides of the manifold.

All connections are standard 150 ASA bolt hole flanges.

The emergency cargo stop button is located in the operators' shelter on both piers.

Crude loading rates up to 50,000 bbls./hr. can be provided.

The loading and discharging of all crude petroleum and its products will be stopped during the passage of an electric storm and ullage covers must be closed and dogged down.

Cautionary Advice: Whenever non-matching flange sizes necessitate the use of reducers (spool pieces), Masters should insist that the reducer or hard arm be adequately supported by a proper jack, and should refuse to let cargo transfer operations commence before a satisfactory vessel manifold and hard arm connection has been provided.

FIRE PRECAUTIONS: The recognized fire alarm signal is 4 long blasts with ship's or tug's whistle. An 8 in. fire water main line runs alongside all 4 berths with numerous double 2.5 in. outlets for connection to ship's hoses. Four elevated water/foam monitors are located on each pier providing relatively good fire fighting protection for the main deck area.

The 2 tugs are also equipped with elevated fire water/foam monitors, though on board foam storage capacity is relatively limited.

POLLUTION: There are no shore facilities to recover an oil spill. The Venezuelan authorities take a very serious view of oil pollution and heavy fines are imposed for violations of the strict pollution rules. A government representative is stationed at the terminal. It is therefore important that all precautionary measures be taken and spills avoided. In case of a spill, the port services section should be informed immediately by VHF or telephone, which is located on the pier. The use of dispersants or detergents on the water is not permitted

MEDICAL: Complete medical, dental and hospitalisation facilities are available at La Salina. Medical treatment is provided at a private clinic.

Authorisation forms for medical treatment are provided which require the Master's signature. Transportation will be supplied by Vensport La Salina.

If the patient does not speak Spanish or English, an interpreter should accompany him.

FRESH WATER: A limited supply of fresh and boiler water is available at La Salina Lacustre Terminal. Delivery is made through 2.5 in. National Standard Fire Hose Thread hydrants. Ship's personnel must provide hoses and connect up.

FUEL: Bunker C fuel oil, marine diesel and intermediate fuels are available at La Salina Terminal Lacustre. Delivery is made alongside Piers 6 or 7 by 8 in. diameter Chiksan hose, located about midship's.

Loading Rates: Bunker "C" and intermediate – 3,000 bbls.p.h. Diesel – 2,000 bbls.p.h.

It is the responsibility of the ship's engineer to give "stand-by" notice to the terminal employee and advise him when to shut down.

Supplies of lubricating oils in drums are available. Delivery will be effected while loading and requirements should be incorporated in the ETA radio.

DENSITY: The average density at the berth is 1002 but varies dependent upon amount of rainfall. The temperature ranges from 82° to 86°F.

REPAIRS: Vensport's Port Staff will assist with emergency repairs as may be required in each case depending upon availability of competent personnel and equipment. The company's shop facilities while not equipped for extensive ship repairs, may be made available to fabricate or repair items that are urgently required.

The nearest dry docks are those at Puerto Cabello and Curacao, N.A. Several contractors in the area provide labour for hull painting and for tank cleaning. Contracts for these services are made by the ship's Master directly with the contractor.

Radio technicians are available for minor repairs. With sufficient advance notice a radar specialist can be arranged to board the ship at La Salina.

CONSULS: The following countries have consular representatives in the area:

Belgium
Chile
Colombia
Costa Rica
Denmark
Dominican Rep.
Ecuador
El Salvador
France
Germany (West)
Great Britain
Guatemala
Italy
Netherlands
Norway
Nicaragua
Panama
Peru
Spain
Sweden
Switzerland
U.S.A.

TIME: GMT minus 4 hours.

SHORE LEAVE: Shore leave is permitted and a representative of the Captain of the Port boards on arrival and issues the required number of passes. Shore passes are to be collected prior to sailing, and given to Pilot undocking the vessel. Vessels are not permitted to sail until all crew members are on board, unless hospitalised or prior arrangements made for disembarking. No launch service for liberty parties is available while vessel is anchored off La Salina awaiting berth.

GENERAL: Representatives of Vensport La Salina board vessels immediately on arrival, and it is particularly requested that Masters indicate at that time all ships requirements. The office building is located at the Pier Head Trestle and personnel are available for assistance at all hours.

(a) Bonded Stores. Cigarettes or other stores in bond are not obtainable in La Salina.

(b) Cash Advances. Cash advances are made in local currency, the Venezuelan Bolivare. Cash requirements should be included in the ETA radio.

(c) Charts. On first arrival of each tanker, the Agency Dispatcher will furnish a set of local charts if required. No supplies of U.S. Hydrographic or British Admiralty charts, or sailing directions, are available.

(d) Classification Societies. American Bureau and Lloyd's Register have non-exclusive Agents in Maracaibo, and qualified Masters and Chief Engineers are available for appointment as Surveyors when required.

(e) Gangways. All vessels using the port of La Salina must provide a safe gangway. The use of rung ladders, pilot ladders, etc., is contrary to Port Regulations and Port Authorities will not board except by means of a safe gangway or accommodation ladder.

(f) Plimsoll Marks. The Captain of the Port requires that the Plimsoll Marks of all vessels using the port be clearly visible. Vessels may be checked on completion of loading, and if the Plimsoll Marks are not readily legible, permission to sail may be withheld.

(g) Port services. On arrival at La Salina Terminal, a company representative boards vessels, so it is particularly requested that Masters make known to him all ship's requirements. Master should bear in mind that while vessels are within Venezuelan territorial waters, Government Authorities do not permit the use of ship's radio equipment. Cables and radiograms should be handed to the company representative for transmittal via shore radio communication system. La Salina also has radio telephone communication with North and South America and Europe. For further information contact Vensport in the terminal building, tel. 88491 and 88492.

(h) Rat-guards. By order of the Port Authorities, vessels are required to use ratguards on all mooring lines.

(i) Personnel – Seamen left ashore. In the case of seaman left ashore for hospitalisation, repatriation or other reason, his documents and personal effects are to be delivered to the Vensport Office in La Salina before sailing. A letter is required from the Master advising maximum advances to be made to seaman if any, and instructions concerning his repatriation. All expenses incurred by seamen left ashore, including cost of repatriation, are for ship's account.

It is important that Masters bear in mind that the Venezuelan law will at all times hold the vessel, her Master, Agent or Owner, responsible for any seamen left behind in Venezuela.

(j) Provisions and stores. Fresh and dry provisions are supplied by various Ship Chandlers in Maracaibo and Cabimas (La Salina). Master should deliver his signed requisition to the Vensport Office representative who boards on arrival. Provisions would then be delivered to the vessel while loading. The prices and quality of some items, such as fresh fruit, fish, shrimps, vegetables, etc., are competitive; dry stores are considerably higher than in most ports. The Fleet Steward will assist in filling requisitions. It is important that the Master sign the Ship Chandlers invoice as authorisation for the Marine Department to make settlement.

(k) Mail. Any pending ship's mail will be delivered on board by the Vensport Dispatcher on arrival at La Salina. At same time he will receive ship's mail to be dispatched. The Vensport Dispatcher will accept personal mail only if it carries the proper amount of Venezuelan postage, or if Master authorises the postage by signing 7 copies of the Company Postal Transmittal form. Masters interested in knowing the individual postage amounts to be paid by each crew member, should provide a list, in duplicate, of the senders, and number of letters sent by each one identified by a number written on each letter. Copy of this list will be returned aboard the vessel when leaving this port outward bound. If not ready on time, it will be airmailed to the vessel's next port of call.

(l) Inspection of Petroleum Products and Crude Oil. Chas. Martin & Company and E. W. Saybolt petroleum inspectors are available if specified.

(m) Laundry. Laundry service is available between 0700 and 1700 hrs. on week-days. No guarantee can be given on time of delivery.

Section D

MARACAIBO: 10.42 N. 71.39 W.

On the N.W. shore of the Lake Maracaibo.

Maracaibo is the capital of the State of Zulia and seat of all Government and Consular Offices, as well as the port of entry for all vessels loading at one of the Terminals in the Lake of Maracaibo. (N.B. For information details of Documentation, Pilotage etc., see "Maracaibo Lake").

ANCHORAGE: The Pilot will not con the ship into the anchorage, but will indicate the proper location to anchor. Care should be taken because of small boats and ferry traffic.

ACCOMMODATION LADDER: Vessels must provide an accommodation ladder. The use of trunk ladders, pilot ladders, etc., is contrary to port regulations. Port Authorities will board only by means of an accommodation ladder. It is recommended to rig this in advance to avoid unnecessary delays.

BOARDING PARTY: The boarding party usually consists of the following persons: One Quarantine Official, Two Customs Officials, One Port Captain's Representative, Two representatives (Agent and Mooring Master).

RADIO: "Radio Marina" transmits information of interest to navigation every day from Monday to Friday from 1000 to 1015 hrs. and from 1600 to 1615 hrs. on frequency of 4,420.7 kHz in the 60 m. band, output 1 kW. All bunker, lubricating oils, water and other requirements should be included in the cable giving ETA of the vessel.

TUGS: Service not compulsory, assistance is rendered if required by the Harbour Master.

BERTHING: The manoeuvring area within Maracaibo harbour has a depth of 26 ft.

	Length	*Depth alongside*
Wharf No. 1	106 m.	15 ft.
,, ,, 2	106 m.	15 ft.
,, ,, 3	159 m.	15 ft.
,, ,, 4	159 m.	22 ft.
,, ,, 5	135 m.	25 ft.
,, ,, 6	135 m.	26 ft.
,, ,, 7	135 m.	26 ft.
,, ,, 8	135 m.	26 ft.
,, ,, 9	120 m.	25 ft.
,, ,, 10	120 m.	22 ft.
,, ,, 11	120 m.	22 ft.
National Brewery Wharf	125 m.	19 ft.
Regional ,, ,,	120 m.	21 ft.

FUEL: Heavy and medium marine diesel, intermediate fuel, and bunker "C" fuel oil are available at Maracaibo from local contractors with barges. Supplied only by barge at the wharves or anchorage. Lubricating oils are also available.

FRESH WATER: All wharves supplied with fresh water by 2 in. hoses. Rate 15/20 t.p.h. Fresh water also available from local contractors with barges.

MEDICAL: Complete medical services are available.

CONSULS:	Telephone		Telephone
Belgium	3235	Italy	
Colombia	72232	Mexico	6781
Costa Rica	6511	Netherlands	4621
Denmark	6531	Nicaragua	76703
Dominican Rep.	6511	Norway	78911
Ecuador	74055	Panama	78110
El Salvador	74241	Peru	4545
France	5297	Portugal	80870
Germany	76061	Spain	71118
Great Britain	6169	Sweden	6511
Guatemala	71193	United States	2123

STEVEDORES: Normal working hours 0700 – 1100; 1300 – 1700 and 1800 – 2300 hrs.

TELEPHONES: There is no service for connecting telephones on board vessels. Public telephones are situated in the warehouses adjacent to all wharves.

HOLIDAYS: All Sundays; 1st January; Good Thursday and Friday; 19th April; 1st May; 24th June; 5th July; 24th July; 12th October; 24th October; 18th November; 17th December; 25th December.

POLICE/FIRE/AMBULANCE: Police tel. 3821; Fire tel. 6585; Ambulance tel. 2209.

REPAIRS: No major repairs facilities are available; however, repair work can be done through local machine and electrical shops, and shore labour can be furnished if required. Radio and radar technicians are also available.

AIRPORT: International Airport "Granode Oro" situated N.W. of Maracaibo City served by many national and international airlines. A second airport with cargo and passenger services is situated at Santa Barbara del Zulia, on the banks of the Escalante River.

PROVISIONS: Fresh and dry provisions are available through ship chandlers in Maracaibo for delivery at Maracaibo Harbour or at the terminal.

SHORE LEAVE: Launch service in the Maracaibo harbour is readily available for official ship business. For personnel shore leave, depends on launch availabilities on arrival.

SHIPMASTER'S REPORT: 1976

Communication: Considerable difficulty was experienced raising La Guaira radio station (YVG) for transmitting the necessary ETA's. Our messages were transmitted via Portishead (GKR). Agents, however, advised that messages are normally transmitted through Curacao (PJC).

Pilotage: Masters making their first visit to the port are to embark the Pilot at Punta Cardon (Paraguana Peninsula). Ample notice must be given to the Agents as the Pilot has to be flown there from Maracaibo. Masters making their first visit to Maracaibo must also disembark the Pilot at Punta Cardon on departure. Masters may thereafter proceed directly to San Carlos pilot station.

Communications can be made through the Harbour Master's Office Punta Cardon.

Delays experienced off Punta Cardon did not occur on this particular occasion. Pilot boards and normally rests in the pilot's cabin until 30 minutes from the "EM" buoy.

Berthing: 2 tugs are compulsory for vessels berthing/unberthing when the vessel's length exceeds 476 ft. All other vessels 1 tug compulsory.

National Guard: A member from the National Guard is placed on board the vessel during working hours. A room has to be at his disposal (*not* the hospital) and necessary food and beverages supplied.

Stevedoring:

Normal working hours
(Monday – Friday) 0700 to 1100 hrs.
1300 to 1700 hrs.
1800 to 2300 hrs. (Overtime)
(Saturday) 0700 to 1200 hrs.
(Sundays & Public Holidays) *No work.*

Vessels must be fully rigged and hatches open and ready in all respects to load or discharge at least 15 minutes before stevedores arrive. If necessary shore labour is available to assist.

SHIPMASTER'S REPORT: 1975.

Arrival messages: Cable Agent – Maracaibo via La Guaira Radio on departure Cristobal with ETA Punta Cardon, draft, cargo stowage, gangs required and requirements. (For subsequent calls vessel will be permitted to proceed to San Carlos pilot station to embark Pilot).

24 hours prior to arrival repeat ETA Punta Cardon, to be sent as described above.

2 hours before arrival at pilot station – Punta Cardon call on Channel 12 VHF to update time of arrival.

Pilotage: Pilot boards at Punta Cardon about 1 mile off the tanker berths from a launch with a "roof landing", therefore the pilot ladder must be about 6 ft. from the water. This Pilot travels from Maracaibo to meet the vessel at Punta Cardon and takes the vessel all the way to Maracaibo. Punta Cardon to "EM" Fairway buoy – 78 miles. "EM" Buoy to Maracaibo – 35 miles.

Once the vessel has made a call at Maracaibo the Master is then exempt and may take his vessel direct to the "EM" buoy and negotiate the buoyed channel for 12 miles to San Carlos pilot station. The channel is straight, wide and the buoys are well lit and marked. A Westerly set is said to prevail across this channel from the "EM" buoy to San Carlos pilot station but it was not evident on our passage in or out. However, a strong ebb tide was noticed running out to sea off San Carlos pilot station. The channel from the "EM" buoy to Maracaibo is dredged to 41 ft. but off the berths at Maracaibo the maximum draft is 26 ft. There had been a lot of unseasonal rain prior to our call and we noted that the density of the dock water was 1001.

Documents:

1 Health Declaration.
8 Stores Lists.
8 Crew Lists.
6 Passenger Lists (If no passengers these papers have to be entered as "Nil" passengers).
8 Crew Declaration Lists.
2 Venezuelan Manifests (Sent from N.Z.)
2 Sets Bills of Lading (Sent from N.Z.)
12 Sets Tally Books (Sent from N.Z.)

Stevedores: "Servicios Portuarios De Maracaibo".

They have 24 gangs in the port and mechanical equipment to support 16 gangs. Normal working hours are 0700 – 1130 and 1300 – 1630 hrs. Overtime 1800 – 2230 hrs. Saturday 0700 – 1200 hrs. No work on Sunday.

The labour works well but is not accustomed to working refrigerated ships and when the gangs work into the wings the Agent had to supply the men with warm clothing and hot coffee. Their discharge rate for cartons of frozen cream was 18 t.p.h. In hindsight I would suggest that it would be advisable to stow frozen cream for Maracaibo in a hatch square if possible to obviate the need for the labour to go into the wings as the complaint about the "cold" does not arise until this happens. They had 14 open trucks laid on to take the cartons of cream direct to the butter works and they had an unbroken flow so the "hook" was not held up on this account.

Berthing: There are berths for 6 ocean going ships and they say they can berth these ships up to 26 ft. Tugs are available and because of berthing starboard side to we used 2 tugs. The berths are concrete with rubber fenders and there is plenty of working space for the mechanical vehicles. The Pilots speak a little English but sufficient to make themselves understood and are capable. Fresh water is available alongside but I understand if bunkers are required they have to be brought by barge and there is a minimum charge of $1,000 irrespective of the amount of fuel required. They have a repair facility which is in the hands of a local engineering company. Fresh vegetables are available and can be recommended, supplied by the only providore. He maintains a listening watch on Channel 16 VHF and has a liaison with Agents for any messages sent prior to arrival at the berth. His station is called Automercado Venezia.

AGENT: Head Office, (Management and Control), Brokers, Chartering and Tramp Agents, Victor H. Selinger S.A., PO Box 1632, Caracas 1010–A Venezuela. Cables "Selvic" or "Seltank". Tel. (02) 81.02.71 Telex: 21402, 21631, 21934 and 22859.

Local Office: PO Box 496, Maracaibo. Tel. (061) 224960. (061) 224962. Cables: "Seltank Maracaibo", or "Selvic Maracaibo". Telex: 62166.

Ethylene	80	,,	−104°/−70°C

Cargo Equipment:

North Berth: One urea in bulk loader
Cargo capacity 650/700 t.p.h.
South Berth: Three urea in sacks conveyors.
Cargo capacity 2,400 sacks of 50 kgs each per hour.

FRESH WATER: Available, 8 t.p.h., but expensive.

DENSITY: 997 – 1003.

PUERTO MIRANDA: 10.46 N. 71.34 W.

(See Plan Book)

(N.B. For important details of documentation, Pilotage, etc., see "Maracaibo Lake").

LOCATION: Situated at Eastern shore of entrance to Lake of Maracaibo, in position Lat. 10° 46′ N., Long. 71° 34′ W.

OPERATORS: Maraven, S.A.

CLEARANCE: Pratique and Custom's clearance will be granted on arrival either at the anchorage or after the vessel has been berthed. Masters therefore requested to have the accommodation ladder ready on arrival to avoid delays, since the Government Officials do not board the vessels by pilot ladder.

On arrival when pratique is requested, all vessels should fly international flag signal "Q", or show a yellow light during hours of darkness.

PILOTAGE: On arrival Puerto Miranda under Government Pilot's advice the vessel will be boarded by Government Berthing Master, who will assist Master in docking vessel. He will also assist in undocking.

CHANNEL: Channel has a leading mark formed by the towers "P" and "M" and is marked by buoys.

1. (1) Incoming traffic bound for Puerto Miranda must leave the main channel between the buoys B – 57 and B – 59 towards the anchorage.
2. (2) Vessels coming from the Lake in ballast or to complete cargo at Puerto Miranda must leave the main channel when passing the buoy B – 65 on their starboard side and proceed in the direction of Jetty 3 towards the anchorage.
3. (3) All vessels on leaving Puerto Miranda should enter the main channel by the buoyed exit channel marked by the buoys numbered AP3, AP2, AP1 and B – 59.

Once the ship is unmoored, the Berthing Master on duty at Puerto Miranda will emphasise to the Official Pilots the route to be followed in each case.

MAX. SIZE: See "Berthing".

RADIO: Port Services Office equipped with radio-telephone installation operating on 24 hours basis, transmitting on following frequencies (simplex press to talk system).

		VHF Channel
Approach calling and safety	156.8 mc/s	No. 16
CSV and other tankers port operations	156.6 ,,	No. 12
Emergency calling	2182 kc/s	

ARRIVAL ADVICE: Vessels equipped with radio-telephone installation operating on above frequencies are requested call Puerto Miranda about 3 hours before arrival at port. Calls made in Spanish language will be answered promptly, since there is always a Spanish-speaking clerk on duty. Calls in English will be answered by Berthing Master on duty, except when he is occupied, in which case the call should be repeated later on, as an alternative, the Master could ask Government Pilot to report in Spanish his vessel to Puerto Miranda. During hours of darkness all vessels must identify themselves on arrival, either by radio-telephone or Aldis lamp.

TUGS: 2 motor tugs of 2,800 h.p. assist all vessels in docking and undocking. Also one or two mooring launches will be standing by to take ropes.

BALLAST: Discharge of oil or water polluted by oil into lake waters is prohibited and will incur heavy fines and compensation to beach owners and fishermen for cleaning nets.

All dirty ballast must be discharged ashore. Clean ballast in cargo tanks may only be pumped overboard after prior consultation with Port Services Dept. Deballasting line pressure must not exceed 100 p.s.i. Vessels equipped with a special separate and clean ballast system are to discharge their ballast into lake.

Ocean vessels should be ballasted on arrival E.M. Buoy for inward passage with minimum ballast necessary for safe handling, taking into consideration Article 31 of Maracaibo Pilotage Zone Regulations, which states all vessels entering lake Maracaibo shall have a trim of no more than 8 ft., to permit safe navigation through channels.

One of the major causes of contamination of crude oil is relatively small amount of salt water remaining in ships tanks, pumps and ballast lines after ballast discharge. This very small amount of salt, nevertheless, frequently results in costly damage and down-time to refining equipment, besides presenting many other processing problems. It is therefore requested that full co-operation of Master and officers be given to ensure that all ballast tanks and lines are stripped as dry as possible.

BERTHING:

Jetties/Berths	*Depth M.M.O.L.W. ft.*	*Maximum Permissible Draft ft.*	*Length ft.*	*Displacement tons*
Jetty No. 2

	90,000	x		x	7 (5)*	7 (5)*
	70,000	x			7 (5)*	7 (5)*

Remarks: Alongside UKC for ships up to 700 ft. O.A.L. = 1 ft.

Alongside UKC for ships over 700 ft. O.A.L. = 2 ft.

(*) When vessels are fitted with tension winches – Forward and Aft.

(†) O.A.L. in Berth No. 3: This can be increased up to 620 ft. whenever vessels of Berth No. 1 have O.A.L. up to 665 ft.

(‡) O.A.L. in Berth No. 4: This can be increased only for LPG vessels up to 610 ft. if Berth No. 2 or 5 are empty when vessel arrives, then Berth No. 2 has to be temporarily restricted to vessels up to 665 ft. O.A.L.

General: Nature of bottom soft mud, but near buoys B – 59 and AP – 1 is partly hard.

Density of Water at Berths 997 – 1003.

Density of Water outer channel 1015 – 1025.

These alongside drafts are subject to reduction owing to depth in inner and outer channels.

Recommended under keel clearance (UKC) in Exit Channel 2 ft.

Vessels drawing 37 ft. and over will proceed according to monthly sailing draft table issued by Maraven, S.A.

MOORING: Vessels are to be moored to satisfaction of Pier Master. A suitable gangway will be provided by shore installation. When it is out of order vessel's gangway has to be used, which will be notified on VHF telephone before arrival at E.M. buoy.

Vessels of any deadweight must secure with at least: *Forward:* 4 headlines; 4 breasting fibre ropes in berths 1 and 2; 1 spring. *Aft:* 2 sternlines; 4 breasting fibre ropes and one spring in berths, 1 and 2. In berths 3, 4 and 5, *Forward:* 2 headlines; 4 breasting lines; 1 spring. *Aft:* 2 sternlines; 4 breasting lines; 1 spring.

When vessel is fitted with tension winches (forward and aft) the following ropes are required:

Forward: 2 headlines; 2 wires from tension winches as breasting lines in berths numbered 1, 2, 5 or 6; 1 spring. *Aft:* 2 sternlines; 2 wires from tension winches as breasting lines in berths numbered 1, 2, 5 or 6; 1 spring.

When vessels are nominated to load at berth 1 or 2 of Jetty 2 one extra headline and a second spring is required. Vessel's best ropes or wires should be used as breasting lines.

LOADING: Vessels should load in accordance with International Load Lines Regulations taking into account maximum permissible draft at this Terminal and also at Maracaibo Bar Channel.

The Captain of the Port requires that the load-line marks of all vessels using the port be clearly visible. If Harbour Authorities should refuse to pilot an out-going vessel due to being overloaded, Master will be held responsible for all delays and expenses, in connection with discharging any overloaded cargo and all further losses.

Vessels' maximum permitted loading rate should always be required. Maximum shore loading rate is 7,000 tonnes per hour, using 2 shore lines and 4 hoses.

Following ship's whistle signals should be used for loading: 2 blasts = Stand by (15 minutes prior to completion of cargo and or part cargo). 1 blast = Stop (2 minutes prior to complete cargo and or part cargo).

EMERGENCIES: In order to deal quickly and efficiently with any emergency during loading/deballasting operations, the following equipment is available:

(a) Control for quick closing of shore manifold valves. This is a red-painted hydraulic valve situated on the ship/shore gangway. In the event of a spillage aboard, this valve must be opened. Within 90 seconds the shore manifold valves will close against the loading pumps.

(b) Direct ship/shore telephone. This is a red telephone and in order to obtain instant communication with the Loading Supervisor in the Control Room it is only necessary to lift the receiver. An Alarm Bell will alert the Supervisor and a light will advise him from which berth the call originated.

FUEL: Available ex wharf: Bunker "C", thin fuels from 200 to 3,500 seconds Redwood 1 at 100°F., and marine diesel. Delivery rate 400 and 80 tons respectively. Gas oil, fuel oil and thin fuels may be supplied by barge ex-Maracaibo delivered at anchor, at a max. rate of 110 and 140 tons.

FRESH WATER: Available on all jetties with a loading rate between 20 and 30 t.p.h. This depends on number of vessels at the same time.

MEDICAL: Ship's personnel may visit local doctor on week-days between 0700 and 1130 hrs., or 1400 and 1700 hrs. Outside these hours, or in cases which require special treatment, patients receive attention in Maracaibo. Written request for medical attendance, as well as a shore pass, is always required.

CUSTOMS: 1 opened packet of cigarettes allowed to be taken from vessel by each crew member when going ashore. Masters advised to strongly caution crew against attempted smuggling.

SHORE LEAVE: Not granted until shore passes are stamped and signed by Authorities. Passes must be shown to guards at gangway and gates. Crew members must be properly dressed (long trousers and shirt) before proceeding ashore. Master must collect all passes and return them to Agent before vessel's departure.

GENERAL: *(a) Tides:* In view of the available depth in the channels which allow navigation to vessels up to about 70,000 d.w.t. fully laden at high water, permanent predictions of sailing draft tables have been prepared by Maraven S.A., and they will send these on board ships of over 47,000 d.w.t.

(b) Currents: The tidal current (Lunar tide) at this port can at times be very strong and subject to changes. Usually outgoing tide runs for 7 to 8 hours against 4 to 5 hours for incoming tide. Direction approx. at right angles to jetty.

(c) Movement of Passengers: Embarkation or disembarkation of passengers through this port is not allowed by Venezuelan Law, as this Terminal is only authorised by the Treasury Ministry (Ministerio de Hacienda) exclusively for exporting crude oil.

(d) Short Dispatch Procedure: This procedure is available for ships loading cargoes consigned to Shell Companies.

(e) Failure to Rejoin Vessel: If any member of crew is not aboard at sailing time, Authorities will not clear vessel although permission may be given to proceed to anchorage if the berth is required. If sailing permission is granted, Master is required to sign letter accepting all costs in connection with missing crew member to be for Owner's account.

(f) Launch Service: A charge will be made for a round trip to Maracaibo, but launches are only available on written request by Master. Masters who have to go on business to Maracaibo (Agency or Consulates) can make use of public service launches.

(g) Proceeding to Cardon: Vessels proceeding to Cardon to load or to take bunkers, are required to have ready on arrival at Cardon:

4 Lists of Deck and Engine Stores and Spares.
4 Lists of Stewards Stores.
6 Lists of Personal Effects.
6 Crew Lists.

In order to prevent delays it is imperative that these documents are presented to the Port Officials when they board to clear the vessel.

(h) Loading for Curacao: Unless Master requests otherwise, arrangements will be made for Goverment Pilot to board ship 1 hour after vessel has signalled "Stand-by".

(i) Guards: Custom Guards (Guardia Nacional) will be posted on all vessels and Masters are reminded that these guards must be accommodated and treated in the same manner as ships' officers. Non-compliance entails not only a fine but will result in delays in clearance and cargo operations.

(j) Visitors: Only persons on business allowed on piers. Visitors, as guest of Master, allowed board vessels provided a written and signed request presented by Master to Port Services Department. Further particulars covering procedure for obtaining permits for visitors can be obtained from Port Services Office.

(k) Cables and mail: Crew mail list forms put on board all vessels when entering Puerto Miranda. Crew's private mail accepted for posting provided all letters bear the sender's name and a list in duplicate is prepared showing addresses and sender. 1 copy of list will be forwarded to Master showing individual charges. Cables can be dispatched at all times.

(l) Norwegian Government Seamen Service: A field representative of the above service is stationed at Puerto Miranda providing Norwegian and Swedish film exchange and other usual services.

(m) Charts – Nautical Publications: On arrival of each tanker the Agency Representative will furnish a set of lake charts if required. No supplies of U.S. Hydrographic or British Admiralty charts or Sailing Directions, Nautical Almanac, etc., are available at this port.

(n) American Crew List: Vessels sailing for U.S. ports requested have American Crew List ready on arrival, so it can be forwarded to U.S. Consulate without delay.

(o) Films Exchange: Films may be exchanged at this Terminal.

(p) Fire Alarm: Each Friday morning at 1000 hrs. there will be a test of fire alarms including sirens at the wharves. Before the test will be a warning message in English and Spanish.

(q) Cash Advances: Local currency is Venezuelan Bolivar and cash advances are made only in this currency. It is requested that any requirement for cash advances be included in vessel's ETA radio, to permit delivery on board on arrival.

REGULATIONS: Following regulations should be strictly observed by Master of vessels alongside jetties. Non-compliance with these instructions entails not only a fine but delays in cargo operations.

Use of rafts for painting the ship's sides is strictly prohibited.

Lifeboats should not be lowered without the special permission of the Government Port Captaincy (obtainable on request).

Swimming in the harbour is strictly prohibited.

Waste water, sanitary or other must not be discharged on jetty.

It is strictly prohibited to paint ship's name or others on jetties. When this occurs the vessel will be charged for the cleaning.

Painting in ships alongside is strictly prohibited.

Before commencing loading, all dock scuppers should be securely plugged.

It is necessary to keep a close and constant watch on moorings and to adjust when necessary. When adjusting, call for assistance of harbour tugs before slackening off any mooring lines.

TELEPHONES:

Head Port Services Operations Office 228 during day.
Head PRDP Operations Office 222/310/323 during day.

Section F

PUNTA DE PALMAS: 10.24 N. 71.34 W.

(See Plan Book)

(N.B. For important details of Documentation, Pilotage etc., see "Maricaibo Lake").

OPERATORS: C.V.P./Llanoven.

FLAG: The Authorities require the Venezuelan flag to be flown from the mast head from the time the vessel enters the outer channel to come into the port until it leaves again by the same channel.

LOCATION: The terminal is located at Punta de Palmas del Sur, approximately 13 miles South of the port of Maracaibo on the West shore of Lake Maracaibo. The terminal proper may be identified by a 300 ft. radio tower, having 2 small red lights 200 ft. from the base, and 1 large red light on top of tower. The top light flashes every 2 seconds.

PILOTAGE: Vessels which arrive have the option of taking on the Official Pilot at the following places:

(a) In the outer channel of the Lake of Maracaibo, between buoys B-24 and B-26.

(b) In the anchorage area, located approximately 5.5 miles to the N.E. of the Island of San Carlos and to the East of the buoy B-17. This area is identified by a green light buoy, equipped with a radar reflector (position: Lat. 11° 04′ 22″ N., Long. 71° 33′ 48″ W.).

(c) On the "EM" buoy (i.e. Entrance to Maracaibo), there is also a radar reflector (position: Lat. 11° 13′ 47″ N., Long. 71° 33′ 31″ W.).

The Official Pilot who comes on board at San Carlos will take the vessel to Maracaibo. At times, due to bad weather, the Maracaibo Port Captaincy cannot guarantee the embarkation or disembarkation of Pilots at the "EM" buoy or in the anchorage at Lat. 11° 04′ 22″ N., Long. 71° 33′ 48″ W. For this reason, Masters must contact the pilots station at San Carlos so that they may give him appropriate instructions as to the place of boarding or disembarkation of the Official Pilot, who, generally speaking embarks between buoys B-24 and B-26.

The system of communications which vessels use with the pilots station of San Carlos will be the morse lamp, radio-telephone or radio.

The frequencies on which San Carlos listens out are: Radio 2182 kc/s. Radio-telephone 156.6 mc/s. It also operates with frequencies 2080, 2120, 2638, 2738 kc/s R/T and 156.8 mc/s VHF.

Vessels sailing from Punta de Palmas will take on the Official Pilot at the mooring where they are located after having terminated their loading operations. This Pilot must be requested one hour and forty-five minutes before the estimated time of being ready to sail. Vessels which embark their Official Pilot at Punta de Palmas to sail to Maracaibo will change their Pilot again on arriving at that port. The Pilot who embarks will guide the vessel to the proximities of the Island of San Carlos, between the towers E-31 and E-33, where he will disembark onto a pilot launch. The Port Captaincy of Maracaibo has given instructions to shipping Agents for the purpose of informing Masters and Owners of vessels that every Captain must identify himself in advance to the pilot station at San Carlos at any time of the day, when they are arriving at buoys B-17 and B-19, and when they are sailing at T-42 and T-40. These instructions are of an obligatory nature in order to keep the Pilots' service informed at all times of any emergency that may arise. Also to avoid an Official Pilot going out unnecessarily from his base, especially during the night in the belief that the vessel which is in sight requires his services; in this case both the service of the launch and that of the Pilotage not given will be charged to the ship's Agent or Representative.

Lake Pilotage: An Official Government Pilot will assist every ship in crossing from Maracaibo to Punta de Palmas and in its exit voyage from Punta de Palmas to Maracaibo. This Pilot will also assist in the operations of mooring and unmooring. The Agent will inform the Captain and the Official Pilot of the time determined for berthing the vessel when it arrives at Maracaibo. Vessels which load in Punta de Palmas must request a Pilot for their exit journey at least 1 hour 45 minutes in advance of the time at which they consider the vessel will sail.

CARGO DOCUMENTS: Vessel's clearance and cargo papers will be delivered to the Master on arrival in Maracaibo Harbour outbound. C.V.P./Llanoven will accept no responsibility for delay in clearing a vessel due to unavailability of personnel from offices of the Port Authorities.

APPROACHES: The buoy which indicates the entrance to the outer channel ("EM" buoy) is located in the geographical position: Lat. 11° 13′ 47″ N., Long. 71° 33′ 31″ W. The light of the "EM" buoy has the following characteristics: white light, with 1 flash every 10 seconds, visibility approximately 5 miles. The distance between the "EM" buoy and the inner extremity (South) of the inner channel, marked with buoys B-27 and B-28 is approximately 15.75 miles. The outer channel has a width of 300 m. between the limit on both sides. The navigable portion for loaded vessels is 240 m. wide. The average depth which has been checked at low tide is 13.72 m. (45 ft.) and the tidal amplitude is up to a maximum of 1.49 m. (4.9 ft.). There is a breakwater located a half a mile to the East and parallel to the external channel which extends for 2,574 m. (1.6 miles) to the North from the Northern coast of the Island of Zapara. In its outer extremity there is installed the lighthouse of the steel lattice type construction, with a height of 7.62 m. (25 ft.). The characteristics of its light are: white, with 1 flash every 8 seconds, visibility approximately 5,556 m. (3 miles).

The commencement of the internal dredged channel is marked by buoys B-29 and B-30. The extension of this channel is 19.31 km. approximately (12 miles) and ends at towers T-55 and T-56. The channel is 244 m. wide (800 ft.) and its normal checked depth is 13.72 m. (45 ft.) at average low tide, with a tidal amplitude which varies between 0.49 and 0.89 m. (1.5 and 3 ft.), at tower T-66, and from 0.82 to 1.46 m. (4.5 ft.) at buoy B-29.

The channel from tower T-56 as far as the Port of Maracaibo is dredged and its termination is marked by buoys B-73 and B-74. It is 244 m. wide (800 ft.) and has a depth of 13.72 m. (45 ft.). Its distance is 17 km. (11 miles).

The depth in all the channels may vary in accordance with the sedimentation to which they are subjected and the formation of sand banks. The Port Captaincy at Maracaibo issues notices to navigators keeping them informed as to changes in depths in the channels. Navigators are advised to keep themselves up-to-date with these notices of variations of depth when they calculate their exit draft of their respective vessels.

MAX. SIZE:

Berth	*Max. LOA*	*Max. Draft*	*Max. d.w.t.*
No. 1	835 ft.	38 ft.	80,000 tons
No. 2	835 ft.	37 ft. 6 in.	80,000 tons
No. 3	890 ft.	42 ft.	100,000 tons

Also see "Berthing".

RADIO: *Time of Arrival (ETA):* When a vessel leaves its previous port destined for the Terminal of Punta de Palmas, it must inform both its Agent and C.V.P./Llanoven in Maracaibo as to its best estimate of the date and time of arrival in Maracaibo. Then at least 24 hours prior to arrival at the San Carlos pilots' station, it must send another message to confirm the time of arrival at Maracaibo. The nationality of the vessel, name, nett Venezuelan tonnage (if it does not have this, its registered tonnage), last port, name of Master, permanent ballast or cargo in tanks or both, and any other information which is pertinent must be included in this message. The cable address of C.V.P./Llanoven is as follows: C.V.P./Llanoven, Maracaibo, Telex 61126. By virtue of the circumstances that the Cable Office in Maracaibo is not equipped to communicate with vessels on the high seas directly, messages sent to C.V.P./Llanoven and to the Agent of the vessel must be transmitted through "PJC" (Curacao), with the prefix "Via ACC" (All American Cables and Radio, Inc.).

We wish to emphasize that by virtue of the fact that our undertaking rents a part of its equipment which it uses for mooring vessels in accordance with the last message of arrival of the vessel, this message must be compiled with the greatest accuracy possible. Any alteration in the time and date of arrival affecting the vessel before or after the time indicated in its message, will be for the account of the vessel as will be the cost of rental of the equipment used.

C.V.P./Llanoven is in no way obligated to carry out the mooring of any vessel, except at the estimated time of its arrival at Punta de Palmas, although exception is made where the vessel may have been delayed in Maracaibo by virture of reasons beyond the control of the Master.

The C.V.P./Llanoven Export Department is equipped with radio-telephone and radio on the following frequencies: (2182 listening out) 2080, 2120, 2638, 2738 kc/s. R/T and (156.6 listening out), 156.8 mc/s. VHF. These are operated at the following times: Mondays to Fridays: From 0730 until 1130 and from 1300 to 1700 hrs. Saturdays, Sundays and Holidays: From 0800 until 1000 hrs. approximately.

TUGS: Tug service consisting of 2 tugs of not less than 1,600 h.p. each is provided by the terminal operator for all vessels. Both tugs will assist all vessels in mooring and unmooring operations. Should it be deemed necessary by the terminal operator to require a tug in addition to the 2 terminal tugs for mooring or unmooring vessels exceeding 750 ft. in length, charges for this additional service will be for the account of vessel.

Vessels which exceed 835 ft. overall length, and destined for Berth No. 3, require the assistance of at least an additional tug. This additional tug will remain at the convenience of the Terminal for the time that the vessel remains at the berth.

In all cases where there are adverse weather conditions, without taking into account the size of the vessel, the Operator of the Terminal, at his convenience, may request the services of an additional tug to protect the installations of the Terminal and the ship, which will be for the account of the vessel.

The Terminal Department will make the necessary arrangements through the intermediary of the ship's Agent, for contracting additional tugs. These services will be charged to the ship's Agent by the tug operator who is contracted.

MOORING: *Berth No. 1:* Located approximately 8.85 km. (5.5 miles) from the Terminal and 2 km. (1.25 miles) to the West of buoys D-95 and D-96 in the Maracaibo Channel. Distance between the bow and stern buoys is 364.90 m. (1,200 ft.).

This berth is equipped, apart from the mooring buoys, with a transversal mooring pile on its Eastern side, submerged, with chain and cable the same as those of the buoys. This does not interfere with the operations of mooring and unmooring.

Berth No. 2: Located approximately 8.85 km. (5.5 miles) from the Terminal and 2 km. (1.25 miles) to the East of the buoys D-95 and D-96 and to the N.E. of berth No. 1. Distance between the bow and stern buoys is 350.50 m. (1,150 ft.).

This berth is equipped, apart from the mooring buoys with a transversal submerged mooring pile equal to that of berth No. 1.

Berth No. 3: Located approximately 9.65 km. (6 miles) from the Terminal, 1.2 km. (0.75 mile) to the West of the buoys D-95 and D-96 and approximately 914 m. (3,000 ft.) to the East of Berth No. 2. Distance between the bow and stern buoys is 365.76 m. (1,200 ft.).

This berth is equipped similarly to berths Nos. 1 & 2 with a transversal submerged pile on the Western side of the berth.

Conditions applicable to all berths: (a) Vessels which have a total overall length of 239.26 m. (785 ft.) or more must be equipped with 2 tension capstans at the bow and on the after deck, with sufficient cable to reach the stern and bow buoys respectively.

(b) Every vessel loading at any of the berths must take into consideration that due to Government regulations, the vessel must have a minimum clearance of 0.984 m. (3 ft.) below the keel at any point during its transit through the Maracaibo Channel, without taking into account the limitations of the channel assigned to the 3 berths by the Terminal Operator. In view of this regulation and the constant variations of the depths of the channel, Masters must be guided by the most recent "Depth Bulletins" which are issued by the National Channel Institute, and by the tide tables when they are planning their transit time through the channel, and the maximum draft to which they may load their vessel.

Mooring procedures and rules applicable to mooring points: Every vessel carrying out mooring operations at any of the 3 berths must arrive with a minimum draft of 3.65 m. (12 ft.) forward and respect the following procedure and rules for berthing:

(a) Anchor: Vessels approaching the berths from the East, in the most convenient manner and safely as possible they must drop their starboard anchor in its location once the vessel has been berthed, the chain facing East, with a length of not less than 137.16 m. (450 ft.).

(b) Mooring cables: One of the following alternatives for mooring cables at each side of the vessel must be fulfilled:

1. Two cables of synthetic fibre (Nylon or Polypropylene) with 9 in. circumference and 1 steel cable which has a minimum diameter of 1.25 in.

2. One cable of synthetic fibre (Nylon or Polypropylene) with 9 in. circumference and 2 steel cables also supplied by the vessel and which have a minimum diameter of 1.25 in.

3. One cable of synthetic fibre with a 9 in. circumference and a safety cable of 1.5 in. diameter which will be supplied by the Terminal.

(c) Countertension cables: A countertension cable will be attached to the stern or fore deck. Vessels which have a length exceeding 800 ft. must use countertension cables on both sides of the deck simultaneously.

(d) Transversal cable: The transversal cable which will be supplied by the Terminal will be attached to the after deck on the starboard side. Vessels mooring at berth No. 3 must also attach an additional transversal cable to the after deck on the port side.

(e) All cables which are attached to vessels must have 6 turns around the bitts, and these must be secured so as to prevent them from unwinding.

(f) The pressure capstans must be secured in the braked position, once all other cables for mooring the vessel have been secured. These mooring cables must be maintained tight as the vessel goes down in the water whilst it is being loaded.

(g) Vessels must be supplied with sufficient cables as spares which can be used as the Terminal may require. All cables must be maintained in good condition and are subject to acceptance by the representative of the Terminal. Vessels must maintain sufficient personnel on deck during the whole time that the vessel is at the berth to attend to the cables for mooring purposes whenever this may be required by the Terminal.

It is understood by both parties that, when the Terminal may require safety cables to be used, and where such are required, C.V.P./Llanoven accepts no responsibility for damages or losses occasioned to any vessel, installation or person due to the use or failure of this equipment.

The vessel's gangway must be in position so that the mooring supervisor or other personnel from the Terminal can come on board the vessel when it arrives at Punta de Palmas.

This gangway must be suspended whilst manoeuvres are being carried out, this for the purpose of obviating any damage to it occasioned by tugs or launches.

Berthing Supervisor: The Berthing Supervisor of C.V.P./Llanoven will come on board every vessel prior to its entrance to the berth to establish radio contact between the vessel, the Marine equipment and the Office at the Terminal.

Mooring gangs and equipment: The mooring equipment will be handled by the launches employed in the manoeuvres. The tug service will be available 24 hours of the day through the intermediary of the Terminal Port.

The mooring gangs will assist the vessel personnel in the operations of hoisting, connecting and disconnecting the two 12 in. diameter loading hoses. The approximate weight of the loading hoses is 4 tons.

The launches used for the manoeuvres will place on board equipment to facilitate the work of connecting the hoses. This equipment will be at the disposal of the vessel's personnel when required as are also the launches to transport personnel.

Responsibility: The Master may request any equipment or service which he may consider necessary for a safe and efficient operation of his vessel and the Terminal Operator will do everything within his power to fulfil this requirement. Therefore all owners and operators of vessels arriving at Punta de Palmas will accept the responsibility of the safety inherent in the manoeuvring of their vessels and their movements to and from the Terminal. C.V.P./Llanoven will accept no responsibility for losses or damages occasioned to the ship, its installations and others unless such loss and damage be occasioned due to the faults in the installations belonging to the Terminal or operated by the Terminal with the exception of the security equipment.

Operational checklist: At the time when the vessel is moored and the hoses are connected, prior to the commencement of the operations of loading, the representative of C.V.P./Llanoven on board will deliver to the Master an operational checklist. The Master is required or whomsoever he may appoint to carry out this work together with

Terminal representative, to check very carefully that all the safety regulations have been fulfilled.

Berthing Supervisor: The Berthing Supervisor will have charts and plans which will be at the disposal of the Master and his advice if he should require it. The representative will also be available to inspect the vessel's tanks and to act as liaison between the Master of the vessel and the Agent or with the Terminal of Punta de Palmas, to transmit any information relative to the ship. This supervisor must receive lodging and treatment at the same level as the ship's officers.

Unmooring procedure: When the loading operations are completed, the launches will proceed to remove all mooring cables from the buoys under the supervision of the official entrusted with the vessel or the Official Pilot, assisted by the Berthing Supervisor of C.V.P./Llanoven.

Documentation: The departure and loading documents will be delivered to the Master by his Agent or his representative, when he passes through the Port of Maracaibo.

BALLAST: *Deballasting:* It is understood that it is not permitted to discharge ballast in the lake, even though this may come from tanks used solely for ballast. Ballast will be discharged with the pumps of the vessel to the deballasting system which exists at the Terminal. As soon as the loading hoses are connected, the personnel of the Terminal will align the system with its respective valves. Once these operations are completed the Berthing Supervisor on board will inform the Captain that he may commence deballasting and in turn will keep him informed as to the pressures which will be used in the operation. Once the deballasting operation has been completed, the personnel of the Terminal will align the system again and its valves so that the vessel can receive cargo through the same hoses which are used for unloading ballast and simultaneously the personnel of the vessel will align their systems on board to receive cargo. The personnel of the vessel responsible for receiving the cargo will inform the Representative of C.V.P./Llanoven (Berthing Supervisor) when the vessel is in a condition to receive and he in turn will inform the personnel of the Terminal that they may commence pumping.

LOADING: *Oil leakage:* In order to obviate contamination of Maracaibo Lake and possible legal actions, we recommend strongly that Masters of vessels emphasize to their deck officers in order to obviate leakage that they make sure that all necessary measures have been taken on board to this end prior to commencing the loading operations. The purpose of this is to maintain on deck any leak or wastage which may occur in the vessel.

Guarantee of responsibility: In the event of an oil leakage or any other contamination or any other damages to installations caused by a vessel, the operator of the Terminal, prior to the vessel sailing, will require the Agent to deposit bond in favour of C.V.P./Llanoven to cover the fine or other charges which may be incurred in collecting, cleaning, repairing the installations of the Terminal and also to cover any claims from third parties.

Loading procedure and pumping rates: The position of the loading hoses, supports and connections must be to the satisfaction of the personnel on board. The valves of the hoses for loading purposes will be opened in order to test the connections, detect leaks and then ultimately to commence operations.

The responsibility and custody of the cargo passes to the personnel of the ship from the moment when the cargo arrives at the connection which is the property of the ship.

The minimum loading rate at berths Nos. 1 and 2 is 4,000 b.p.h. The average pumping rate, under normal conditions is 13,000 b.p.h. Sudden stoppages in loading will not be permitted during loading except in cases of emergency.

Personnel on board, responsible for the loading operations, must notify the Terminal representative, not less than 10 minutes in advance of the completion of loading. This will enable the representative to instruct the operator to reduce the rate of pumping or to continue loading by gravity as he sees fit.

For reasons of security, loading may be suspended and the hoses disconnected from the vessel's manifold when weather conditions are not favourable or at any time that the Terminal considers it convenient to do so due to *force majeure* or other reasons.

Displacement of the line: Sometimes it will be necessary to displace the submarine line in combination with the loading operation. To carry out this operation it is required that the personnel responsible for receiving the cargo notify sufficiently in advance the Berthing Supervisor when the amount of cargo lacking is equal to the capacity of the line.

The capacity of the line is a fixed quantity. Therefore it must not be considered with shortcomings or excesses.

Therefore when it is necessary to effect a displacement, the loading must be calculated carefully by the vessel personnel responsible for this operation.

It is understood that any error or negligence on the part of the vessel personnel in calculating the initiation point of the displacement of the line, will require a land pump to correct the displacement. Due to the submerged manifold it will be necessary to employ a diver to operate the valves and this operation may result in a fairly costly procedure and involve a lot of time. All costs involved in fulfilling this operation, together with the time lost will be for the account of the vessel.

Increase in pumping rates: At the request of the Master and subject to the approval of C.V.P./Llanoven, it is possible to suppy a pumping rate of 17,000 b.p.h. up to a maximum of 30,000 b.p.h., provided the operations of the Terminal permit this to be done.

MEDICAL: *Maracaibo:* Complete services are available.

Punta de Palmas: Emergency cases only will be transferred to Maracaibo for treatment, at the request of the official in charge of the vessel.

FUEL: Heavy and medium marine diesel, intermediate fuel, and bunker "C" fuel oil available. Lubricating oils also available. Pumping will be affected during daylight hours and with prior permission of the Terminal.

FRESH WATER: Available from local contractors with barges. Pumping will be affected during daylight hours and with prior permission of the Terminal.

STORES: Fresh and dry provisions procurable through ship chandlers in Maracaibo for delivery at the Terminal.

REPAIRS: *Maracaibo:* There are no facilities available for carrying out major repairs. Nevertheless, repair work may be carried out through local workshops and labour can be supplied if this is required. Technicians in radio, radar, gyro compass repairs are also available.

Punta de Palmas: No type of repair will be effected here, which may prevent the unmooring of the vessel without the authority of the Marine Supervisor. Neither may boiler tubes be "blown" whilst the vessel is moored.

SHORE LEAVE: Launch service for business purposes and emergencies is readily available. Launch service for shore leave can be arranged through contract marine service and will be responsibility of ship's personnel. Arrangements for shore leave transportation can be made through Loading Master on board.

CUSTOMS: All vessels entering from foreign ports and bound for Punta de Palmas Terminal are required to anchor in Maracaibo Harbour for formal customs clearance and visit of government port authorities prior to proceeding to destination.

The vessel's accommodation ladder should be rigged prior to the vessel's arrival at Maracaibo. A member of the National Guard will board each vessel at Punta de Palmas to observe all activities connected with loading or unloading operations. This official is authorised as the customs representative, and is referred to as Customs Watch. Food and accommodation similar to officers should be made available to him by vessel.

CONSULS: See "Maracaibo".

GENERAL:

Transportation: Transportation will be supplied by launch between vessel and Punta de Palmas to the following persons, without exception:

1. Master of the vessel or the Chief Engineer, to attend to matters relating to the ship.
2. Sick personnel who require emergency medical attention.
3. Official Pilot.
4. Members of the National Guard and other Government Officials whose services relate to the tanker.
5. Doctors, when these may be required by Master, in the event of emergency only.
6. Inspectors of the oil industry.

Consular representatives, ship's suppliers, engineers, naval experts, representatives of the oil companies, suppliers of fuel and water and any other person who requires to come on board tankers when they are in Punta de Palmas must make their own arrangements for transportation to and from the ship through the intermediary of the ship's Agent. Also Agents must make their own arrangements for their own transportation.

Personnel of the ship with licence to disembark: The transportation of personnel with licence, when this is required by the Master, must be arranged through the intermediary of the Agent. Also passengers must embark and disembark at the Port of Maracaibo.

Personnel with licence are not permitted to go ashore at the Terminal of Punta de Palmas.

Classification Societies: American Bureau of Shipping, Lloyd's Register of Shipping, Salvage Association of London, Det Norske Veritas, Bureau Veritas, Registro Italiano Navale and Germanischer Lloyd have Agents in Maracaibo or in Caracas. There are experts available through the intermediary of the Agents mentioned above.

Monetary System: The monetary system of Venezuela is the Bolivar (Bs.), and is the only money legally recognised in the country. A Master who requires a cash advance must request same from his Agent when he notifies his ETA. Payment of all invoices for Terminal charges must be made in Bolivares at the Office of C.V.P./Llanoven in Maracaibo, unless other instructions are given.

Mail: Mail for the vessel can be delivered to the representative of the Agent who comes on board the vessel at the time of its arrival or sailing from Maracaibo.

AUTHORITY: C.V.P./Llanoven.

AGENT: Head Office. (Management and Control), Brokers, chartering and tramp Agents, Victor H. Selinger S.A., PO Box 1632, Caracas 1010-A. Venezuela. Cables: "Selvic" or "Seltank". Tel. (02) 81.02.71. Telex: 22859, 21402, 21934 or 21631. New Boe Code.

Local Office: PO Box 496, Maracaibo. Tel. (061) 224960, (061) 224962. Cables: "Seltank Maracaibo" or "Selvic Maracaibo". Telex: 62166.

Section G

SAN LORENZO: 09.47 N. 71.05 W.

OPERATORS: Maraven, S.A.

LOCATION: S.E. side of Lake Maracaibo.

APPROACHES: Vessels have to arrive at Maracaibo Roads through a dredged channel with controlling depths of 45 ft. in outer bar, inner channel and Punta Palmas area. In vicinity of terminal the controlling depth is 36 ft.

PILOTAGE: It is compulsory from San Carlos to Maracaibo. Pilot normally boards vessel at buoy B–26 (Position 11° 01′ N. 71° 35′ W.). It is also compulsory for all vessels which have to load at any terminal located South of the bridge Rafael General Urdaneta. This bridge has a horizontal clearance of 656 ft. and a vertical one of 148 ft. at 45 ft. MMOLW level. Pilots have to embark and disembark at Maracaibo.

When Masters have no Pilot exemption Certificate for crossing outer bar, permission has to be requested by VHF or 2182 kc/s. prior to arrival, which is being granted on request.

ANCHORAGES: Masters may use the following:

(a) Near E.M. Buoy, (not recommended because of the distance from San Carlos. The pilot launch never reaches this point).

(b) At Maracaibo Roads.

(c) At terminal approaches, in accordance with depths available in the area, and ship's draft.

LIGHTENING POSITION: In the Southern lake Area, arrangements have to be made in advance. Also at Maracaibo.

HEALTH: Quarantine officials board vessels at Maracaibo Roads. Pratique cannot be granted by radio.

RADIO: San Carlos Pilot Station has VHF Channels 12 & 16. Emergency call 2182 kc/s. Terminal has VHF Channel 12.

TUGS: Compulsory. When vessel is over 25,000 d.w.t. a second tug is required, which is available in the area, 1,200 h.p. each. There is also a launch to assist the vessel during manoeuvring.

BERTHING: Continuous wharf 2,340 ft. in length with dolphins. This terminal is only for handling crude and its products. Maximum berthing displacement: 20,000 tons.

	Berth No. 1	*Berth No. 2*	*Berth No. 4*
Max. LOA	560 ft. 00 in.	665 ft. 00 in.	
Max. Depth	24 ft. 06 in.	35 ft. 06 in.	Out of Service
Max. Draft	23 ft. 06 in.	34 ft. 06 in.	
Loading Rate	1,450 t.p.h.	2,000 t.p.h.	

These depths are referred to the minimum monthly observed lowest water level (MMOLW).

DENSITY: At berths 998 and at outer bar between 1020 and 1025.

FRESH WATER: Available ex-barge at Maracaibo Roads.

FUEL: Any grade. In case vessels require grade not available at berth it may be supplied ex-barge at Maracaibo, which has mixing equipment able to supply the grade involved. Rate 20 – 140 t.p.h.

MOORING-UNMOORING: Carried out by Official Pilots. Mooring is Head-out to facilitate departure.

DEBALLASTING: Installations have ballast pit with capacity 650 cu.m. Max. discharge rate 600 t.p.h.

TANK CLEANING FACILITIES: Carried out by outside contractor.

REPAIRS: Minor repairs only, including electronics.

LA CEIBA: 09.28 N. 71.04 W.

SHIPMASTER'S REPORT: 1979.

BERTHING: There is a cement loading installation about 2 cables South of the 160 m. long pier at La Ceiba suitable for vessels up to 120 m. in length.

The approach channel is dredged to 9 m.

END OF MARACAIBO SECTION.

MORON: 10.32 N. 68.11 W.

LOCATION: CVP's shipping and refining facilities are situated on the central coast of Venezuela in an area which is known as Golfo Triste, 11 miles West of Puerto Cabello.

The Terminal is an "S.B.M. System" located in position:
Latitude: 10° 31′ 50″ North
Longitude: 68° 10′ 50″ West.
(2 miles N.W. of Punta Moron and 5 miles S.E. of Yaracuy river mouth).

The Refinery and main storage tanks are located 1 mile South of the buoy on the nearby mainland.

DOCUMENTS: *Venezuelan Tonnage Certificate:* All ships arriving in Venezuelan ports for the first time must be measured by the Maritime Authorities for issuance of a Venezuelan Tonnage Certificate, known as "Certificado de Arqueo". This document gives the measurements and weight of the vessel in accordance with existing laws. The cost of measuring and issuing of the Certificate is contingent on the size and tonnage of the vessel.

It is the usual practice to take ashore the ship's "General Arrangement" and "Capacity" plans which are used as a basis for calculations. These plans and the Venezuelan Tonnage Certificate are later forwarded to the ship's Owners.

Vessels registered in the following countries are exempt from the above regulations, due to existing reciprocal agreement with Venezuela: U.S.A., Great Britain, Denmark, Ireland, France, Germany, Netherlands, Sweden, Norway, Portugal.

Above regulations, due to existing reciprocal agreement with Venezuela: Government Port Charges, such as Port Captain Habilitation for entry and despatch of vessels and Pilotage Dues, for all vessels except those registered in the countries mentioned above, in which case the Lloyd's Registered Tonnage is used.

Inward Clearance: Inward Clearance is effected on board by Government, Port and Customs Officials, CVP's Marine Office Representative and the Dispatcher or Expediter or a representative of the Agency, immediately after mooring.

The following documents must be ready on arrival:

(A) *In Ballast:*

1. Clearance from last port
2. Ballast manifest from last port (1 copy visaed according to paragraph (e) if there is no Venezuelan Consul)
3. Crew list (10 copies)
4. Steward's store list (all foodstuff, liquors, tobacco, etc.) to be declared on a separate and independent sheet (6 copies) (see paragraph D)
5. Deck and engine stores and spare parts list (paint, varnishes, chains, ropes, etc.) to be declared on a separate and independent sheet (6 copies) (see paragraph D)
6. Medicine chest list (including narcotics accurately itemised) (6 copies)
7. Slop chest list (6 copies)
8. Personal effects list (6 copies)
9. List of passengers in transit (if any) (6 copies)
10. Sailing permit (issued by Maritime Authority of last port of call)
11. Passenger and baggage list (if any) (6 copies visaed; 3 copies not visaed).

(B) *With Cargo to Discharge:*

In addition to the documents stated in paragraph (A), following will also be required:

1. Consular Mail (one sealed envelope from each loading port)
2. Manifest (Sobordo) (1 original visaed and 3 copies not visaed from each loading port)
3. Bills of Lading (1 original and 2 copies visaed, and 4 copies not visaed from each loading port)
4. Tally books (6 from each loading port)
5. Consular Invoice (3 originals visaed and 3 copies not visaed, from each loading port)
6. Commercial Invoices (3 from each loading port)

(C) *With Cargo in Transit:*

In addition to documents required in cases (A) or (B), a copy of the Bill or Bills of Lading covering all in-transit cargo is required.

(D) Store list prepared should indicate separately all deck, engine and cabin stores. The store lists may be prepared on board prior to arrival unless the vessel is coming from the Netherlands Antilles or the Guianas, in which case they must be visaed by the Venezuelan Consul at the port of departure.

(E) Cargo and clearance documents should be visaed by the Venezuelan Consul at the last port of call. In the absence of a Venezuelan Consul, they may be visaed by the Consul of a friendly nation, by the Chamber of Commerce or by two reputable merchants whose signatures shall be notarized. In the absence of a Venezuelan Consul, the following notation should be written in Spanish on each document signed by the alternates designates above:

"Por no existir en la localidad Agente Consular Venezolano y a peticion de los embarcadores, certifico el presente documento".

(Signature)

Outward Clearance:

On completion of loading, vessels will be unmoored immediately and proceed to the corresponding anchorage area for the completion of port formalities and cargo documents. These formalities usually take from 2.5 to 3 hours to complete from the time that the ship has been unmoored.

In order to obtain the sailing permit, a special form which is delivered on board on arrival, must be completed one hour before unmooring. This form gives cargo and freeboard information required by the Harbour Master to be handed together with the crew's shore passes via the Harbour Master's representative or Customs representative on duty (National Guard).

Outward clearance and cargo documents are delivered to the anchorage by the dispatcher or expediter.

PILOTAGE: On arrival at Moron, vessels should wait for the Government Pilot and for the CVP Marine Office representative.

Vessels must not enter the port limits unless Pilot and CVP Marine Office Representative are on board. The use of Government Pilot is compulsory for all vessels entering or leaving territorial waters, however, all manoeuvres or operations should be under direct supervision of the CVP Marine Representative.

CVP will arrange for this service at all times, and if for any reason, a tanker is required to wait for any time at anchor, the ship will be advised through the pilot boat or via the coastal radio station "YVL".

APPROACHES: The CVP Marine Terminal in Moron is well marked with light beacons, and presents no navigational difficulties in clear weather.

Reference to the chart, will show that the Golfo Triste is easily navigable; but owing to the presence of fishermen, when approaching the coast Masters should keep a particularly sharp lookout for fishing boats, nets and small craft.

Lighthouse on Shore:

Description: A post painted with red and white horizontal bands.

Position: Latitude 10° 31′ 06″ North.
Longitude 68° 11′ 21″ West.

Light: Flashing White every 3 seconds. Flash 1 second, Eclipse 2 seconds, Flash 1 second. Visibility 10 miles.

Night Arrival: When the ship arrives after 1700 hrs. local time during Winter or after 1800 hrs. local time during Summer, it will have to anchor until daybreak. *No night mooring is allowed.*

Vessels are able to leave at night.

ANCHORAGE: It is forbidden to anchor near the SBM. The SBM is secured in position by 8 chains, each chain 234 m. long; there are also pipe-lines between the buoy and the coast. The recommended anchorage is well shown in the navigational chart, and it is recommended because it is near to the pilot boat pier (Punta Chavez). Vessels should anchor outside the Puerto Cabello pilotage zone.

MAX. SIZE: 55,000 d.w.t. and max. draft 39 ft. Depth of water 42 ft.

RADIO: *Cable Address:* "Cevepe-Moron".

All Radio Communications from vessels should be via the coastal radio station "YVL" Puerto Cabello, and the first word of the text "Termar".

Arrival messages (ETA):

Loading:

(A) Masters of all vessels destined to load at Moron Marine Terminal are requested to give ETA at least 72 hours in advance of arrival.

The Radio Message should include:

1. First word of the text "Termar"
2. Ship's flag
3. Ship's name

4. Net registered tonnage
5. Port of departure
6. When originally cleared for another port, including any other Venezuelan port, and diverted at sea to Moron Marine Terminal, vessel should include diversion advice, and port to which vessel originally cleared.
7. Number of crew and passengers
8. Quantity of dirty ballast in metric tons
9. Time required to discharge ballast
10. Type and amount of cargo vessel will load
11. Bunker requirements (only bunker "C" fuel oil available)
12. Other requirements
13. Master's name

(B) 24 hours before arrival vessel should Radio advising any change (or no change) of ETA. First word of the text "Termar".

(C) Finally 12 hours before arrival vessel should *Radio again* confirming ETA. First word of the text "Termar".

Discharging:

(A) Masters of all vessels destined for discharging at Moron Marine Terminal are requested to give ETA at least 72 hours in advance of arrival.

The Radio Message should include:

1. First word of the text "Termar"
2. Ship's flag
3. Ship's name
4. Net register tonnage
5. Port of departure
6. When originally cleared for another port, including any other Venezuelan port, and diverted at sea to Moron Marine Terminal, vessel should include diversion advice and port to which vessel was originally cleared.
7. Number of crew and passengers
8. Deepest draft
9. Type and amount of cargo on board
10. API gravity of the cargo
11. Bunker requirement (only bunker "C" fuel oil available).
12. Other requirements
13. Master's name

(B) 24 hours before arrival vessel should Radio advising any change (or no change) of ETA. First word of the text "Termar".

(C) Finally 12 hours before arrival vessel should Radio again confirming ETA. First word of the text "Termar".

Important:

Notice of diversion of ship at sea not received prior to arrival of vessel, subject ship to heavy fines and delays.

When ship comes from neighbouring ports less than 72 hours from Moron Marine Terminal vessel should radio the first message, as soon as possible, in order to avoid delays on arrival. Any expenses incurred or delays resulting from lack of radio information will be for the account of the ship.

Example to confirm ETA:

The t/s "Petrolasa" estimate to arrive on July 15th at 1400.

Cevepe
Moron
Termar Petrolasa Confirm ETA 151400
Master

OR:

Cevepe
Moron
Termar Petrolasa Confirm ETA Wednesday 1400
Master

Marine Band:

Any ship which wishes to establish communication with Moron Marine Terminal on the frequencies of 2080 kc/s., 2120 kc/s, 2182 kc/s, 2638 kc/s and 2738 kc/s. (International Marine Band) it will be able to do so if previously sends a radiogram stating the date and the time, as there is no permanent radio operator.

When there is a ship at the port, the radio operator is permanently on watch on 2182 kc/s. from Monday to Friday between 0700 and 1200 hrs. and between 1300 and 1600 hrs. local time.

It is forbidden to use the radio equipment without the authorization of the CVP Marine Office Representative.

VHF: Any ship wishing to establish communication with the Moron Marine Terminal on the frequency of 156.55 mc/s. (Channel 11) will be able to if prior to arrival a cable is sent stating the date and time, as there is no permanent radio operator.

When there is a ship at the buoy, this Channel is used for cargo operations.

TUGS: Not available.

MOORING: All vessels planning to moor at Moron Marine Terminal shall be equipped with not less than 2 wires of sufficient length and strength (not less than 100 ft. long and 5.5 in. circumference).

Each end with thimble. Thimble must accept 2.5 in. shackles.

These two wires are fastened on the forecastle bitts one on each side according to the Marine Office Representative's instructions.

If the vessel is not equipped with 2 wires, CVP will furnish 2 wires 100 ft. long and 5.5 in. circumference.

When the vessel is about 300 ft. from the buoy, the mooring launch will pick up 2 ropes from the vessel and will secure then with 2.5 in. shackles, each one, to a wire of 1 in. diameter and 30 ft. long. These wires are connected in the opposite end, each one, to a specially shaped "triangle" plate.

These "triangles" are connected to a 10 ft. long chain, these chains are intended to rest (one at port and the other one at starboard), on the vessel's fairleads at the bow when mooring is completed.

The chains are attached by means of two nylon ropes 110 ft. long and 12 in. in circumference, to the buoy.

After heaving of ship's ropes and after placing the chain in the fairleads each "triangle" is connected with wires previously fastened to the forecastle bitts by means of a shackle, one on each side. In order to improve the ship's safety it is recommended to reinforce this operation with two or more ropes from vessel, to facilitate the sailing manoeuvre. *No ship in the mooring manoeuvre must be placed less than 300 ft. from the buoy.*

Night Mooring:

The mooring manoeuvre is realised during the day, the sailing manoeuvre is carried out at any hour during the night, so the forecastle lighting must be adequate.

When the lighting in the forecastle is not sufficient, it will delay the sailing of the ship until daybreak, and all charges for this delay will be paid by the ship.

Unmooring:

The ship's lines used to reinforce the moorings remain secure until the last moment, in order to disconnect the shackles without risk.

A launch will be ready near the bow to release these lines.

S.B.M.: *Description:* The uppermost part painted white, the hull white and red in vertical bands.

Fitted with radar reflector on top.

Position: Latitude: 10° 31′ 50″ North.
Longitude: 68° 10′ 50″ West.

Light: Flashing white every 9.5 seconds. Flash 2.5 seconds. Eclipse 7 seconds. Height 10 ft. Visibility 5 miles.

HOSES: *Floating Hose:*

Description: A 16 in. diameter black floating hose with red foam plastic floats. This floating hose can move freely 360° around the buoy and is 557 ft. long.

Light: The position of the floating hose is indicated by 2 red buoys with red light flashing every 1 second; Flash, 0.5 seconds; Eclipse 0.5 seconds.

During the manoeuvres while the mooring launch is working with the ship's lines another launch keeps the floating hose clear of the side of the ship. This floating hose is 170 m. long, to be connected to a 12 in. diameter ship's manifold.

Vessels nominated to load/discharge/take bunkers in this port must prepare their manifolds with 12 in. diameter connections.

Hose handling: Shore employees will assist in connecting and disconnecting hose to vessels. A ship's officer must be present and the ship's deck officer on duty must approve the hose connection on board.

Ships must be adequately equipped with derrick, blocks, tackle, wire runners and sundry equipment to efficiently hoist the floating hose from the sea to the loading position. Sundry equipment should include wrenches, drift pins, nuts and bolts, wire and fibre strops, drip pans, gaskets, etc.

To assist in vessel turnaround, tankers should have all necessary booms and cargo gear rigged and ready before ship is boarded by Pilot.

Loading is effected both by night as well as by day and such standards can only be assured by vessels having equipment fully suited to Terminal requirements.

Before mooring, blind flange on the ship's manifold should be removed in order to speed up the connection of floating hose by shore personnel. A maximum pressure of 150 lbs. is allowed on the loading hose.

LOADING: The approximate maximum loading rates of products available is:

Product	*Barrels per Hour*
Fuel Oil	up to 15,000
Bunkers	up to 15,000

Discharging Rate:

As governed by vessel's pumps, but a maximum pressure of 150 lbs. is allowed on the loading hose.

Documents:

The time to complete the documents and cargo papers, starting from the hour that the ship has been unmoored is about 3 hours. However, this time is reduced to only 40 minutes if the Master on arriving, signs the documents. This reduces the waiting time, and eliminates the possibility of the papers to the Consignee, Owner, etc., being dropped into the water or being damaged during the two journeys by boat.

BALLAST: A vessel *must have sufficient ballast for safe handling,* having due regard to existing weather and sea conditions. Through a careful watch of the weather and sea conditions, frequent exchange of information between ship and Terminal, and by a knowledge of the behaviour of his own vessel a ship's Master may come to the Terminal with a minimum of ballast.

Clean Ballast can be pumped into the sea, but Masters are reminded that pollution of the sea incurs heavy fines.

Dirty Ballast can be received ashore via 16 in. submarine pipe-line to ballast disposal facilities.

Vessels equipped with a separate system of ballast tanks will be allowed to discharge ballast and load oil simultaneously, providing approval is first obtained from the CVP Marine Terminal Supervisor.

It is the ship Master's responsibility to see that no oil of any kind is pumped or spilled overboard from the ship.

The discharge of dirty ballast within the territorial waters of Venezuela is strictly prohibited. As a further measure to avoid pollution from oil within coastal regions, Masters of tankers are requested not to clean tanks and lines and not to pump dirty ballast within 50 miles of the Venezuelan territorial waters.

MEDICAL: No medical or dental services are to be expected at Moron (except in case of emergency and subject to a doctor being available).

FRESH WATER: Not available.

FUEL: Only Bunker "C" Fuel Oil is available. Chief Engineer to witness shore tanks gauges.

TIME: GMT minus 4 hours. No changes.

REPATRIATION: Not allowed.

CONSULS: French, Norwegian, Swedish and Panama Consulates are represented in Puerto Cabello, 12 miles East of Moron.

SHORE LEAVE: Launch for shore leave personnel depends on launch availability on arrival, advance notice should be given in order to arrange for one. The Master should so advise via coastal radio station "YVL" Puerto Cabello in a separate message, to the CVP Marine Office.

It is important that Master bear in mind that this service is supplied by an outside firm on a round trip basis and that the service is between Puerto Cabello and the ship, and between the Master and the contractor.

In Moron Marine Terminal there are no facilities to embark/disembark. CVP does not assume any liability for this outside service including injuries or accidents, even if it occurs inside the port limits. Master of the vessel is solely responsible in all respects, but CVP reserves the right, at anytime and without notice, to withdraw, control, supervise or change regulations of such service according to self interest.

GENERAL: *National Holidays:* By order of the local Port Authorities it is requested that all ships in port be fully dressed on the following National Holidays: January 1st, April 19th, July 5th, July 24th, October 12th, December 25th.

Merchant Marine Holiday: On June 21st the country celebrates the National Merchant Marine Day. It is requested that all ships in port be fully dressed this day.

Launch Service: Launch service for transporting Pilots, Port Authorities and CVP personnel, handling lines to buoy, connecting floating hose, and for other official business is readily available.

These launches are on duty continuously under the direction of the Marine Terminal Supervisor, and are *only for official business.*

Laundry: No laundry facilities are available at Moron.

Formalities: With the Pilot and Marine Office representative a Quarantine Medical Officer will board the vessel and grant pratique, subject to no infectious diseases having been reported on board during the voyage. The ladder should be ready for this purpose before arrival.

On completion of mooring, a Customs inspection is carried out. The Master will be required to furnish particulars of the vessel including bonded stores, cargo, bunkers, and other information. Custom surveillance is strict and store rooms and bar will be sealed. All contraband will be confiscated by the Authorities and fines assessed.

After inspection, a member of the National Guard, as the Customs representative, will ensure that vessels in port comply with regulations. Food and accommodation similar to Officers should be made available to him by the vessel.

Strict compliance with the Customs Laws of the country is enforced by the Authorities, and Masters are strongly advised to caution crew members against attempting to smuggle cigarettes, cigars, tobacco, souvenirs, gifts (particularly items of women's apparel) or other articles. A maximum of twenty cigarettes per person for personal use is allowed to be carried, a greater quantity will result in the imprisonment of the offender with possible heavy fines and delays to the vessel.

The presence of unauthorised craft alongside a ship will render the ship unacceptable. it is the duty of the ship's personnel to see that the ship's side is clear of all such craft.

Harbour Master's representative who boards at the same time issues the required number of shore passes for crew members. These passes must be shown when proceeding ashore to the government guards. They are to be collected by the Master prior to sailing and handed to the Harbour Master's representative.

Masters are requested to have shore leave expire at least two hours before expected departure. Men then found missing should be reported to the CVP Marine Office.

Vessels are not permitted to sail until all crew members are on board, unless said crew members are hospitalised or have previously been signed-off by the Master through the CVP Marine Office.

If any crew member is missing at sailing time and cannot be found, his passport and other personal documents must be handed to the CVP Marine Office as well as written instructions as to his repatriation, when found. All cost and expenses of a crew member so left behind will be for ship's account.

Safety of Personnel: No swimming is permitted within port limits. No fishing is permitted in the manoeuvring area. Chipping and scaling on deck or overside is strictly prohibited within the port limits.

No painting overside is permitted in the manoeuvring area.

No person under the influence of alcohol is to be allowed on deck.

It is strictly prohibited to carry firearms and ammunition, knives or other weapons. These may not be carried while in Venezuelan waters and must be declared on store list. Said arms and ammunition, should be collected and held in the Master's safe custody.

Seamen Left Ashore: In the case of seamen left ashore for hospitalisation, repatriation, desertion or other reason, all documents and personal effects are to be handed to the Marine Office representative before sailing. A letter is required from the Master advising the maximum advances, if any, to be made to the seaman, and instructions concerning his repatriation. All expenses incurred by seaman left ashore, including cost of repatriation are for ship's account.

It is important that the Master bears in mind that the Venezuelan Law will at all time hold the vessel, her Master or Owner responsible for any seaman left behind in Venezuela.

Tank Cleaning and Mopping: Several contractors in the area provide labour for tank cleaning and mopping.

Masters in need of this service should submit requirements to CVP Marine Office, who will contact and request a contractor to go on board to discuss details and estimate cost of work to be effected.

It must be pointed out that the Master of the vessel is solely responsible for the proper fitness of the ship's tanks for loading his next cargo, and will therefore be held liable for any contamination of the cargo after loading, due to inadequate tank cleaning. Therefore, it is up to him to decide the degree of tank cleaning necessary.

Seamen's Club: There is no Seamen's Club at Moron.

Film Exchange: No film exchange service.

Bonded Stores: No cigarettes or bonded stores are available at Moron.

Mail: Ship's mail received after the ship has sailed, or for vessels on which no advice has been received, will be held for 2 weeks and then returned by airmail to the Owners or Operators or senders, at ship's expense, unless specific instructions have been received beforehand.

For a good service please use the following address:

Name of crew member
Ship's name
Corporacion Venezolana del Petroleo
Atencion: Oficina de Marina
Apartado 146, Puerto Cabello – Estado Carabobo
VENEZUELA

Hydrographic and Meteorological Data: The local weather of Moron is on the whole favourable, and the visibility in this area of the Golfo Triste is generally fair to excellent. The climate is considered to be healthy. Easterly winds prevail most of the year. Moron lies far South of the usual Caribbean hurricane tracks but occasionally rough sea and swell are likely to occur.

Trade winds normally blow from the N.E., force 4 Beaufort scale. The average temperature is 28°C. and the density of water is 1028.

Calm days or even Westerly winds may be expected; at this time smog from the neighbouring factories is held in suspension in the atmosphere and visibility is reduced too a very short distance. The phenomena are more deceptive than fog in that mariners are apt to believe visibility to be greater than it actually is.

Provisions: No provisions or ships' chandlers are available at Moron. In Puerto Cabello, there are, but the service is very expensive and possible only on weekdays.

Sufficient Personnel: One qualified Deck Officer must be on deck at all times while the vessel is in port.

Competent crew members must be on deck at all times while the vessel is in port; one watching the mooring ropes, one watching the ladder and the others to ensure proper handling of cargo, or ballast. One responsible member of the ship's crew must be stationed by the ship's main control valves nearest the shore during loading and discharging.

Chief Engineer must provide sufficient and responsible personnel to ensure proper handling of bunkering.

In default of these requirements, the CVP's Marine Office Representative has full authority to stop loading/discharging.

All operations in connection with the starting of loading, discharging, gauging, switching of tanks and topping off must be directly and personally supervised by ship's officer.

Constant Readiness: Vessels must maintain engines and propulsion machinery in readiness to leave the Terminal under full power on short notice.

No repairs are permitted.

Inoperative ships or partially inoperative ships will be rejected. Should they become inoperative while in the Terminal, they will be removed at the vessel's expense.

An efficient watch must be maintained by both deck and engine departments while in port.

A sufficient number of men must be on board at all times for manoeuvring the vessel or for emergency situations.

Suspension of Loading: The Terminal reserves the right to suspend oil handling operations in the event any of the foregoing safety rules are not observed, or in the event of non-compliance with safety rules generally observed by competent tanker personnel. Oil handling operations may also be suspended if any other danger is believed to exist.

Visitors: all visitors to vessels are prohibited, except CVP employees, Petroleum Inspectors and others (technicians, ship chandlers, etc.) whose duties require their presence on board.

Passengers: Passengers will not be permitted to disembark.

Lubricants, Oils and Greases: Certain types of CVP lubricant oils only are available in small quantities. Requirements should be sent by cable in order that the necessary labour arrangements for delivery can be made.

Radio and Radar: No repairs made at Moron. However, with sufficient notice, it is possible to call a technician from Puerto Cabello.

Accommodation: The CVP Marine Office asks the Master to pay attention to everything possible while the vessel stays in port to its representative, as well as providing accommodation according to his rank.

SAFETY: The vessels personnel are responsible for the safety of the vessel and themselves and must take all necessary precautions whether or not so advised by the Marine Office. Any safety precautions imposed by the Marine Office representative and disregarded by the ship's officers or crew will be considered just cause for rejection of the vessel and all expenses related thereto will be for the account of the vessel.

When a ship is at the buoy or in vicinity thereof, its engines must remain on standby with full power for immediate use. Deck machinery shall be kept in instant readiness. *Positively no repairs of any sort will be permitted at the Buoy.* Ship's whistle to be on instant readiness at all times.

The Bridge and/or Control Area shall not be locked or otherwise arranged to prevent immediate entry at all times by the Marine Office representative.

Not less than one deck officer and five seamen shall be on deck, alert and available at all times. No person under the influence of alcohol is to be allowed on deck.

No transistor radio sets or other electrical appliances may be used on deck unless certified for use in hazardous petroleum areas and subject to approval of Marine Office.

All scuppers must be plugged and witnessed by the ship's Master. Refusal to plug scuppers will result in the ship being rejected. Drain trays, sawdust and all materials necessary to clean up any oil spillage on deck to be available for immediate use. Adequate lighting on board as well as on the surrounding sea is required.

After complete discharge of ballast Marine Office representative or petroleum inspector will witness closing of pumproom sea suction and sealing of same.

The presence of unauthorised craft alongside a ship will render the ship unacceptable. It is the duty of the ship's personnel to see that the ship's side are clear of all such craft.

No stores of any kind will be handled while vessel is under "Notice of Readiness".

No stores will be handled while vessel is on the moorings or vicinity thereof.

Fire fighting equipment shall be in instant readiness throughout the vessel and additional extinguishers available at the loading manifold while hose is being connected and disconnected. Water shall be available on deck at all times, and fire hoses connected at all fire stations and flaked out for immediate use.

No radio transmissions will be permitted on board ship except by the express permission of the Marine Office.

When ships are loading or discharging crude or ballast and while tank tops are open or ullage plugs are open, boiler tubes are not to be blown. Every precaution must be taken to see that no sparks escape from the funnel or from the galley stack. No ullage hole shall be left open unless effectively covered with a gauze mesh wire spark arrester. Smoking will be permitted in places approved by the Marine Office representative. There may be occasions when smoking will be entirely prohibited. Cigarette ends should not be thrown overboard or through portholes, at any time.

Lifebuoys should be available in the loading manifold area and at points of entry and exit from the ship.

All personnel should avoid breathing gas escaping from tank ullage plugs whilst loading and gas vents should be used.

Vessel's fresh air masks and resuscitators shall be laid out in a readily accessible position ready for immediate use.

All accommodation doors, port holes and ventilators should be closed during loading operations and doors and openings to machinery spaces in vicinity of ship's tanks to be closed.

There should be laid out on the forecastle deck and poop deck "Fire Towing Wires" of suitable strength.

No swimming is permitted whilst vessels are on the Buoy.

No fishing is permitted within the Buoy or within the restricted navigation area.

Chipping and scaling on deck or overside is strictly prohibited within the port limits.

No painting overside is permitted in the manoeuvring area.

AUTHORITY: CVP/Llanoven.

ORINOCO RIVER

Including, Section A – MATANZAS
Section B – PALUA
Section C – PUERTO ORDAZ
(CVG Ferrominera Orinoco)
Section D – PUNTA CUCHILLO
(Lagoven S.A.)

IMPORTANT: VHF compulsory. Vessels without at least a VHF radio aboard will not be attended to by the Pilots at the Barima pilot station and so will not be allowed to enter the Orinoco River.

GENERAL:

1. As early as possible, advise Puerto Ordaz Radio Station, call letters YVM, giving ETA at Buoy EO of North (natural) channel, or at Buoy 0.1 of South (dredged) channel.
2. 24 hours prior to arrival, send another ETA to YVM.
3. Upon arrival, depending on whether Master intends to enter Orinoco waterway through North or South channel, adhere to following procedure:
   (a) *North Channel.* Notify Port Captain, Ciudad Bolivar, via YVM, of time of arrival at Buoy EO and give ETA at Beacon G7 (mile 27.7).
   (b) *South Channel.* Request permission to enter from Port Captain, Ciudad Bolivar, via YVM. *Do not enter* until notified by YVM that Port Captain has granted permission; while awaiting, lay to or anchor at least 1 mile outside of Buoy 0.1.
   (c) All vessels must also communicate with the Point Barima pilot station, call sign YV5QE on 2182 kc/s. HF or 43.18 VHF to be informed of traffic.

   Ship's Officer's Report: July 1980.
   On arrival; vessels should contact the pilot station on VHF Channel 16, call sign "Amacuro Pilots", for advice and permission to enter the channel.
4. While navigating waterway, inbound or outbound, report position to YVM hourly on the hour.
   Ship's Officer's Report: July 1980.
   Seaward of Punta Barima report to "Amacuro" on VHF Channel 16.
5. No Pilot required nor available for navigation along North or South channel at the Boca Grande of the Orinoco River.
6. The International Rules for Preventing Collisions at Sea apply outside of Beacon G7, mile 27.7.
7. Given the case of 2 vessels navigating North and South channels respectively the one navigating the South channel is the privileged vessel.
8. Anchoring either in North or South channels is forbidden.
9. Throughout Orinoco waterway, the down-bound loaded vessel is the privileged vessel.
10. It is compulsory to fly Venezuelan ensign inside of Buoy EO or Buoy 0.1.
11. Vessels can only carry clean ballast within Orinoco Waterway.
12. Pilotage compulsory within Pilotage Zone No. 1 of the Orinoco. Pilots board at outer boundary of said pilotage zone in upstreamward vicinities of Beacon G7.
13. Regulations for the Pilotage Zone No. 1 of the Orinoco apply inside of Beacon G7.

APPROACHES: (Also see "Radio" – paragraphs *(b)* and *(c)*).

1. *The Waterway*

A Radio Direction Finder, located at Lat. 8° 3′ 45″ N., Long. 60° 28′ 28″ W., transmits following signal continuously: YV – AYV. The transmitter has an output of 500 watts with a range of about 200 miles and operates on a frequency of 305 kc/s. While navigating the waterway, ships should favour the shore on their starboard side to the extent possible, giving preference of manoeuvre to loaded vessels in all cases. Ships navigating upstreamward (inbound), upon approaching narrow channels should await the passing and give way to downbound vessels. It follows, therefore, that downbound loaded vessels are the privileged vessels.

2. *The Boca Grande (Barima Bar) Channels*

There are 2 navigable channels across the Boca Grande (Barima Bar), identified as follows: North channel (or natural channel), and South channel (or dredged channel). The 2 channels have converging courses and meet at mile 27.7 in the vicinity of Beacon G7. Vessels navigating the South channel are privileged, regardless of the direction in which they travel.

(a) The North (Natural) Channel

This channel has a min. depth of 12 ft., referred to Mean Low Water. The approach from the sea is marked by a battery-operated electric flashing black buoy, identified with the letters EO. This buoy is located in 46 ft. of water at Lat. 9° 00′ 10″ N., Long. 60° 18′ 20″ W. Its characteristics are: colour of light, white; flash, 1.0 seconds; eclipse. 6.0 seconds; height above water, 10.7 ft., visibility, 7 miles. From seabuoy EO, the channel develops for 7.3 miles to Buoy EOA on a course of 213° 40′ True, then for 2.8 miles to Buoy EOB on a course of 198° 57′ True. From this point the channel follows an approximate straight course of about 205° True for a distance of 17 miles to Beacon G7. Starting from EOB distances between successive navigation aids are as follows: G1 at 1.9 miles; G1A at 1.5 miles; G3 at 2.1 miles; G3A at 2.3 miles; G5 at 3 miles; EL 24 at 2.6 miles; G7 at 3.7 miles. All navigation aids are black buoys fitted with white lights, except Beacon G7 and EL 24 which is a range structure indicating the West side limit alignment of the South (dredged) channel. This structure has been fitted with a white flashing light to mark the North (natural) channel.

(b) The South (Dredged) Channel

The South channel is a 400 ft. wide dredged channel. Depths therein accommodate the maximum draft authorised by the Port Captain. The approach from the sea is marked by a battery-operated electric flashing black buoy, identified with the number 0.1. This buoy is located in 45 ft. of water at Lat. 8° 55′ 52″ N., Long. 60° 11′ 17″ W. Its characteristics are: colour of light, white; flash, 0.5 seconds; eclipse, 11.5 seconds; height above water, 25 ft.; visibility, 11 miles. From seabuoy 0.1, the channel develops along 4 different courses over a total distance of 27.7 miles to Beacon G7. The course reduces by about 7° True at each of 3 turning points, located at miles 9, 15 and 21 respectively. The initial course of 234° 18′ True continues to mile 9 where it changes to 227° 07′ True. Upon reaching mile 15, the course again changes to 219° 51′ True to mile 21. At mile 21, the course changes to 212° 45′ True to Beacon G7 at mile 27.7. The centreline of the channel on all courses is visually marked by range structures fitted with green flashing, directionally beamed lights. The West (right ascending) side limit of the channel through mile 21 is also visually marked by range structures fitted with amber flashing, directionally beamed lights; the alignment given by the side ranges develops 200 ft. to the West and parallel to the centreline of the channel. Battery operated electric flashing navigation aids are located along both sides of the channel. All navigation aids along the East (left ascending side of the channel are located 325 ft. from centreline or 125 ft. outside of the channel lateral limit. White flashing navigation aids are located at 1 mile intervals through mile 25.1; all aids along this side are black buoys, except beacons 8.1, 9.1, 14.1, 15.1, 20.1, 21.1, 22.1, 23.1, 24.1, 25.1, 27.1 and 27.7 (G7). All navigation aids along the West (right ascending) side of the channel are located 200 ft. from centreline or on the exact lateral limit of the channel. Red flashing buoys painted red are located at 1 mile intervals from mile 1.6 to mile 11.6. From mile 11.6 to mile 27.7, there are only 2 aids; red buoys 13.6 and 26.0.

3. *The River Channel*

From mile 27.7, the navigable channel develops upstream. The river channel is generally deep and wide, except for the following 12 reaches which require periodic dredging: miles 27.7 to 36.5; miles 37.3 to 38.6; miles 53.1 to 54.2; miles 99.0 to 106.5; miles 109.1 to 111.0; miles 131.7 to 131.9; miles 136.6 to 139.0; miles 141.2 to 145.8; miles 146.2 to 149.4; miles 167.6 to 170.8; miles 178.4 to 182.4; miles 183.5 to 184.1. Dredged channels are normally 300 ft. in width, but occasionally can be restricted to a minimum of 250 ft. The depth maintained therein can accommodate the maximum draft authorised by the Port Captain. By Notice to Mariners, the Port Captain has instructed all Masters and Pilots to reduce speed and to proceed with caution while navigating the aforesaid reaches, especially during the low water season.

4. *River Stages*

In response to the cycle of wet and dry seasons, the flow of the Orinoco River follows a relatively regular pattern of rise and fall each year. The river normally begins rising in late March or early April and continues to rise until it peaks at crest in late August. In September, the river begins a fairly steady recession until the extreme low-water stage is reached, generally in March. The amplitude of stage variation above the low water plane of reference (0.0 ft.) at Palua (Mile 181.7) averages about 35 ft. with min. variations of 31 ft. and max. variations of 39 ft. The effects of the flood rise decrease progressively below Palua and practically vanish in the upstreamward vicinities of the Boca Grande.

5. *Tides and Currents*

(a) The indicated mean tidal range is 5.4 ft. Tidal influence is not experienced above mile 60 during high river stages. At low river stages, a tidal effect can be observed throughout the waterway, although it progressively diminishes, moving upstreamward. However, the tidal effect is still significant at Puerto Ordaz, mile 184, where a max. semidiurnal change of 1.7 ft. has been recorded.

(b) The strength of river currents is generally commensurate with flow, the strongest currents occurring at high river stages. The velocity of currents at any one time generally decreases moving downstreamward. However, in certain locations, this pattern is affected by particular characteristics of river width and shape as well as by bottom gradient. Max. velocities of about 6 knots have been recorded.

6. *Navigation Aids*

(a) The navigation aids installed along the waterway consist of buoys, beacon and ranges. All aids are lighted. Identification is provided by means of numbers representing the approximate mileage of each aid, to the nearest one-tenth of a mile. The last digit of numbers identifying white lighted aids is odd, while the last digit of numbers identifying red lighted aids is even. White lighted aids mark the left ascending limit of the navigable channel, while red lighted aids mark the right ascending limit. Aids are placed as to be intervisible, to the extent that — when abreast of any one aid — the preceding and following ones can be sighted. Consecutive aids always carry different light characteristics. Buoys are normally placed on the exact lateral limit of the channel (except for black buoys along the South channel at the Boca Grande); beacons, instead, are located at variable distances outside of the channel.

(b) During the execution of dredging along any of the reaches which require periodic maintenance, buoys are generally moved 100 ft. outside of the channel lateral limits. This information is made available to ships by YVM.

(c) The Ministerio de Comunicaciones, Direccion de Marina Mercante, publishes semi-annually a complete list of navigation aids. Monthly lists of changes are also published so that the complete current list can be maintained up to date.

(d) Upon encountering damaged, inoperative, or misplaced navigation aids, vessels should immediately notify YVM.

(e) Vessels are forbidden to make fast to any navigation aid.

7. *Dredging Aids*

Range structures, generally located close to shore or over the bank, are normally used to mark the lateral alignments of the channel along the reaches which require periodic dredging. These ranges are generally fitted with amber flashing, directionally beamed lights. The lights are extinguished except during execution of dredging. Dredging ranges *are not* to be used for navigation.

8. *Navigation Charts*

Navigation charts of the Orinoco Waterway should be aboard vessels for use by the Master. These charts are sold by the Instituto Nacional de Canalizaciones and are also available for purchase from the Orinoco Mining Company. If requested, CVG will, if possible, arrange to make the charts and latest revisions available through the Pilot who boards at Punta Barima, provided such request is received by radio (YVM) at least 48 hours in advance of the Pilot's boarding. A set of navigation charts, corrected to latest revisions, is maintained in the office of the Traffic and Ships' Agency of CVG in Puerto Ordaz. Masters may use this facility to keep their charts up to date.

DOCUMENTS: (Clearance, documentation and other requirements).

1. *Consignment of Inbound Vessels*

The official documents of all vessels proceeding to Puerto Ordaz should show the following consignment: to: CVG Ferrominera Orinoco, Ciudad Bolivar, Zona de Puerto Ordaz. The proper consignment of vessels proceeding to Palua, on official documents, is as follows: Iron Mines Company of Venezuela, Ciudad Bolivar, Zona de San Felix.

2. *Customs Requirements*

Vessels bound for Venezuela in ballast, without passengers, from foreign ports outside the West Indies or Guianas, require the following documentation:

(a) Vessels must have a ballast despatch statement (Certificado de Lastre) which must consist of a note from the Venezuelan Consul, if such Consul is present at the port of departure; otherwise, in descending order of desirability, from the Consul of another friendly nation, the local Chamber of Commerce or 2 reputable merchants of the port of departure. The note should include the name and nationality of the vessel, name of the Captain, registration number of the vessel and tonnage, sailing date and assertion that the vessel is en route in ballast, cargo, or with passengers. The note should be given to the Captain of the vessel or his Agent in an open envelope, which the Captain can exhibit in intermediate Venezuelan ports of call and can turn over to Customs authorities in the Venezuelan ports of destination. Under no circumstances may the ballast despatch statement be signed by an Agency of the government of the country from which the vessel is departing.

(b) The vessel must have a clearance certificate (Certificade de Zarpe) or sailing authorisation issued by the Customs Authorities of the port of departure, representing the government of the country the vessel is departing from. No consular certification need be placed upon this document.

(c) Stores List (Lista de Rancho) signed by Master unless vessel is dispatched from the West Indies or Guianas, then the stores list must be visaed by the Venezuelan Consul at port of departure. Stores list must indicate separately all deck, engine and cabin stores. These lists may be prepared on board prior to arrival.

(d) Spare Parts List (Lista de Repuestos). It must contain a note of all the spare parts and objects for the service of the vessel, including fuel. No consular certification required. To be signed by the Master and to be current as of the day of entering the Venezuelan port.

(e) List of Effects for use of Captain and Crewmen (Lista de efectos personales de la dotacion). No consular certification required. To be signed by the Master and to be current as of the day of entering the Venezuelan port. The Customs are very strict and will confiscate any article that appears new.

3. *Health, Immigration, and Police Requirements*

Vessels bound for Venezuela in ballast, without passengers, from foreign ports outside the West Indies or Guianas, require following documentation.

(a) Current individual International Vaccination Certificates for each member of the crew.

(b) Rat Eradication Exemption Certificate. No consular certification required.

(c) Crew Lists (original and seven copies). No consular certification required.

(d) Panama or Suez Canal or any comparable type measurement certificate.

Contraband: The Venezuelan law is very strict on this subject. It cannot be emphasised too strongly that all new articles, clothing, cigarettes, liquor, etc., must be declared and sealed-up upon arrival.

Meals for Pilots and government officials. It is requested these men be granted the privilege of eating in the officers' dining salon.

N.B. Masters of vessels calling at Trinidad for bunkers before proceeding to Venezuela must also have the documents stamped by the Venezuelan Consulate at Port of Spain.

PILOTAGE: In order to expedite the movement of shipping in the waterways, Masters are requested to establish contact with YVM station as soon as possible, giving ETA pilot station at Barima (Orinoco River entrance). At the same time a radio-telegraph message must be sent to Agents giving ETA Barima and cargo required. When vessels is 24 hours from pilot station, send another ETA via YVM.

After reporting the ETA in advance of arrival, try to contact directly, by radio, the Estacion de Pilotos when the ship approaches the sea-buoy of the bar entrance (about 2 hours before arrival at the pilot station). See "Ship's Officer's Reports" in 1st Section – "General".

After taking the Pilots aboard, report to Radio Marina and continue giving the ship's position according to the mile, up-river, at exactly every hour on the hour, and receive from Radio Marina the pertinent information concerning the traffic in the river waterway. If no communication can be established by voice radio aboard, comply by radio-telegraph by way of the YVM station. See "Ship's Officer's Reports" in 1st Section – "General".

Ship's Officer's Report: July, 1980.

Hourly position reports are made on W/T to YVM when the Pilot is aboard (He writes the telegrams in Spanish).

Pilots are the employees of the Venezuelan Government and act in an advisory capacity. The Master retains responsibility for the ship at all times.

(1) Pilotage is not required and Pilots are not available for navigation outside the pilotage zone. Masters will take charge of inbound and outbound navigation on the North or South channel outside Beacon G7 at the Boca Grande, without Pilot's assistance.

(2) Pilotage is mandatory within the Pilotage Zone No. 1 of the Orinoco. Inbound vessels will embark the government River Pilot in the upstreamward vicinities of Beacon G7. It is important that vessels pass Beacon G7 and be in sight of the pilot station at Barima in order to avoid any delay, as Pilots may not proceed until vessel is sighted. The government River Pilot will pilot the vessel while navigating the waterway; a special government Docking Pilot will generally take the vessel into and out of the Puerto Ordaz harbour.

Signals

(1) All signals used outside of the pilotage zone (that is to say. seaward of Beacon G7 – mile 27.7) shall conform to the International Rules for Prevention of Collisions at Sea.

(2) Within the pilotage zone (that is to say, inside of Beacon G7 – mile 27.7) the signals used shall be in accordance with the "Regulations for the Pilotage Zone No.1 of the Orinoco". It should be noted that these signals are peculiar to the Orinoco Waterway, and are not necessarily in conformance with the International Rules.

(3) Within the pilotage zone, special signals are used for passing dredgers at work along the waterway.

Speed

The Captain of the Port has the authority to impose speed restrictions. By means of "Notices to Mariners", the Port Captain has ordered that all vessels reduce speed while navigating by the following locations: San Felix Dock, mile 179.8; El Toro, miles 95.4 to 96.6. It is recommended that speed be also reduced while navigating by the Palua Dock (mile 181.8), Barrancas (mile 143.2), and Curiapo (mile 60.4). At the inception of the low water season each year (generally in early January), the Port Captain has in the past issued a "Notice to Mariners" instructing all vessels to reduce speed and proceed with caution while navigating the following river reaches: (1) miles 184 to 178, (2) miles 171 to 167, (3) miles 150 to 141, (4) miles 140 to 137, (5) miles 133 to 131, (6) miles 112 to 109, (7) miles 106 to 98, (8) miles 55 to 53, (9) miles 39 to 36

ANCHORAGES:

(1) No ships are permitted to anchor either in the North or South channel at the Boca Grande. Vessels are to anchor at least 1 mile outside of Buoy EO or Buoy 0.1.

(2) Within the pilotage zone, no vessel is allowed to anchor in narrow channels, nor close to a turn.

(3) Between Beacon G7 — mile 27.7 and mile 137, vessels which need anchoring may do so by coming as close as possible to shore on the ship's starboard side.

(4) Between mile 137 and mile 184, the Pilotage Regulations provide for 3 permanent anchorages and 1 seasonal anchorage, as follows:

Area No. 5 (permanent); miles 139.3 to 140.4. Area No. 6 (permanent): miles 150.1 to 151.7. Area No. 7 (permanent): miles 178.0 to 179.0. Area No. 8 (seasonal): at the junction of the Caroni and the Orinoco. It should be observed that Area No. 7, as determined in the Pilotage Regulations, partially encroaches on the narrow (dredged) channel and on shore. Vessels are to anchor in the naturally deep and wide part of the area.

(5) The low-water anchorage (for 1 ship only) previously established by the Port Captain between miles 182 and 183 is no longer in use. This area is currently used as the turning basin for vessels exiting the Palua channel, upon sailing from the new Palua dock at mile 181.8.

(6) If due to emergency a ship is required to anchor in places other than the designated areas, it should do so in such a way as not to obstruct the channel and by taking the necessary precautions to avoid swinging around.

(7) Upon anchoring vessels should notify YVM.

MAX. SIZE:

(1) *Max. permissible draft.* The Port Captain of Ciudad Bolivar can establish the permissible draft for the Orinoco waterway to a max. of about 43 ft.

(2) *Controlling Depths and Authorised Draft*
The draft authorised by the Port Captain for the Orinoco Waterway is made public by means of a "Daily Bulletin of Depths and Draft" (Boletin Diario de Profundidades y Calado). Each daily bulletin issued by the Port Captain carries the following information, in Spanish and English:

(a) Controlling (minimum) depth between miles 184 and 133, and corresponding location.

(b) Controlling (minimum) depth between miles 133 and 42, and corresponding location.

(c) Controlling (minimum) depth between miles 42 and 0, and corresponding location.

(d) Predicted high tides (height and times) at mile 13.5.

(e) River stage (height of river level above low water plane) at Puerto Ordaz and Palua.

(f) Authorised draft, in feet and inches.

The controlling depths given for locations comprised between miles 184 and 42 are actual depths, and reflect depth conditions as of the date of the bulletin. The controlling depth given for locations comprised between miles 42 and 0 is referred to mean low water springs and does not include the height of tide at high water.

The authorised draft may be predicted either on the controlling depth existent between miles 184 and 42 or between miles 42 and 0, dependent upon whichever is the least.

When the controlling depth between miles 184 and 42 is the significant factor, the permitted draft authorised is at least 2 ft. less than the controlling depth in this sector.

When the controlling depth between miles 42 and 0 is the significant factor, the permitted draft authorised is generally less than the mean low water springs controlling depth but occasionally can be equal to the mean low springs controlling depth.

Whenever the MLWS controlling depth existing between miles 42 and 0 does not provide sufficient clearance under the keel of the vessel at low water, the Master is expected to navigate by the site where the controlling depth is located only at times when the height of tide will assure a safe passage.

(3) *Variations in authorised draft:*

(a) The authorised draft is generally increased or decreased by multiples of 6 inches.

(b) Throughout the year the authorised draft is susceptible to variations, according to the conditions of the depth and width existing in the channel at any one time. On the basis of average river stages it is estimated that the authorised draft should be about 33 ft. in the dry season from December to May.

During the rainy season, from June to November, the max. permissible draft may be as high as 43 ft.

HEALTH: Radio pratique may be obtained by sending a message, after picking up Pilot, to the Port Health Officer, advising that there is no sickness on board, name of last port, ETA, number of crew and nationality of vessel and name and nationality of Master.

RADIO:

(a) Communications: Communications are generally handled through the radio-telegraph station at Puerto Ordaz, call letter YVM. This station is operated on a 24 hour basis. The operating frequencies are: 440 kc/s; 472 kc/s; 4322 kc/s; 6505.5 kc/s. The GMT — CQ times and frequencies are: 0900 hours, 4322 kc/s; 1200 hours 6505.5 kc/s; 1430 hours 8722 kc/s; 2000 hours 8722 kc/s; 0030 hours 8722 kc/s; 0300 hours 4322 kc/s.

There is no charge for messages from ship to shore or from shore to ship handled directly through YVM. A VHF frequency modulated radio system provides voice communications along the Orinoco Waterway. Master sets for the system are installed in the Puerto Ordaz radio-telegraph station (voice call: "Master Radio"); Marine Radio handles shipping matters exclusively. The system consists of a high-band VHF frequency modulated voice radio network. To ensure a more efficient and satisfactory coverage, this system operates on dual frequencies alternating according to location, so that ships can either transmit on 161.700 Mc/s. receiving on 159.000 Mc/s., or transmit on 161.150 Mc/s. receiving on 159.850 Mc/s. For best results, ships should select frequencies according to the following: From sea to mile 50: transmit on 161.700 Mc/s., receiving on 159.000 Mc/s.; From mile 50 to mile 112: transmit on 161.150 Mc/s., receiving on 159,850 Mc/s.; From mile 112 to mile 159: transmit on 161.700 Mc/s., receiving on 159.000 Mc/s.; From mile 159 to mile 184: transmit on 161.150 Mc/s., receiving on 159.850 Mc/s.

Pilot station at Barima Bar, Palua and Matanzas are equipped with this system. For the Puerto Ordaz area, ships will transmit to Marine Radio on a frequency of 43.02 Mc/s. and to others on a frequency of 43.18 Mc/s., receiving in both cases on a frequency of 43.18 Mc/s.

Ship's Officer's Report: July, 1980.
The VHF Channels listed are not available on standard marine sets. All VHF work is done on Channel 16 (Pilot to Pilot), and reporting on W/T to Radio Marina.

(b) *Control of Navigation:*

(i) Navigation on the North (natural) channel at Boca Grande is free. However, vessels are requested to notify the Port Captain, Ciudad Bolivar, via "Amacuro Pilots" on Channel 16, upon arrival at Buoy EO, giving ETA at Beacon G7, mile 27.7.

(ii) Simultaneous navigation in opposite directions by 2 or more vessels is not permitted on the South (dredged) channel at the Boca Grande. The restriction is placed on inbound traffic, to the extent that any vessel wishing to enter the South channel requires prior authorisation from the Port Captaincy of Ciudad Bolivar. The request for permission to enter the South channel is to be addressed to the Port Captain, Ciudad Bolivar, via "Amacuro Pilots" on Channel 16. and is to be transmitted before the vessel reaches Buoy 0.1. Upon receipt of the request, the Port Captain will notify the vessel via "Amacuro Pilots" on Channel 16, whether permission is or is not granted, indicating, in the latter case, the approximate waiting time. Until permitted to enter, vessels are to anchor at least 1 mile outside of Buoy 0.1. Once that authorisation has been granted, vessels are to enter the South channel at the earliest opportunity. Any vessel which has been notified to wait may elect to proceed and enter through the North (natural) channel; in this case, the vessel will have to satisfy the requirements outlined in paragraph (1) above.

(iii) While navigating the Orinoco Waterway inbound or outbound vessels are to report their position to YVM hourly on the hour. Seaward of Punta Barima, to "Amacuro Pilots".

(c) *Accident, Stranding, etc.*

(i) Should a collision, stranding or other accident occur in the waterway, or should it be found necessary to take control of the vessel away from the Pilot for any reason, the Venezuelan law requires that a written report be made to the Captain of the Port by the Master of the vessel involved within 24 hours. The report is to be addressed to the Captain of the Port and may be handed to the Pilot or the ship's Agent for delivery. The Master need not appear in person before the Captain of the Port unless specifically ordered to do so.

(ii) Slight groundings or touching of banks and bottom may simply be noted on the reverse side of the receipt for pilotage signed by the Master.

(iii) In case of collision, stranding, slight grounding, touching of banks and bottom, or other accidents, vessels should immediately notify YVM.

Section A

MATANZAS: 08.17 N. 62.50 W. **(See Plan Book)**

N.B. See "Orinoco River" for all important entry requirements.
OPERATORS: CVG Siderurgica del Orinoco CA.
ANCHORAGES: Between miles Nos. 195 and 197, Orinoco River.
MAX. SIZE: Length 600 ft., breadth 74 ft., distance between rail and hatch combing 23 ft., max. draft 30 ft. in rainy season May to November, and 26 ft. in dry season.
RADIO: See "Orinoco River". Cables address of Matanzas terminal operators is "Sidor Matanzas – Telex 22709" and cables may be routed through Caracas, Curacao or Trinidad Radio.
TUGS: Every vessel over 2,000 registered tons is required to use a tug when berthing. Tug is 1,600 h.p.
BERTHING: Undertaken day or night. Length of quay 300 m. Depth alongside 28 ft. (Summer), 60 ft. (Winter).

There are 2 gantry cranes for bulk cargo, capacity 20 tons, can also be fitted with electro-magnets. 3 gantry cranes with fixed jibs for general cargo, capacity 5 tons, can also be fitted with electro-magnets.
MEDICAL: Private hospital and several doctors available.
TIDE: 6 inches rise and fall at the berth. Current, in Winter 6 knots; in Summer 1.5 knots.
FRESH WATER: Available at rate of 12 tonnes p.h.
FUEL: Available in emergency.
CUSTOMS ALLOWANCE: 200 cigarettes and 1 bottle spirits allowed per crew member for personal consumption.
IDENTIFICATION CARDS: Provided by authorities, and necessary if crew going ashore.
REPAIRS: Local workshops undertake minor repairs.
AIRPORT: Distant 10 miles. 6 flights a week to Caracas.
HOLIDAYS: No work on 1st January, Maundy Thursday, Good Friday, 1st May and 24th December. Work can be arranged on other holidays.
DEVELOPMENTS: The existing quay is being extended by 430 m. Depth will exceed 42 ft. in Summer. Water and fuel services will be available. New equipment includes 6 semi-gantry cranes with capacity of 30 tons and a fixed heavy lift crane with 400 tons capacity.

Section B

PALUA: 08.21 N. 62.41 W.

N.B. See "Orinoco River" for all important entry requirements. Specific details, relevant to Palua only, are as follows:

SUPPLIER: The ore supplier is Iron Mines Company of Venezuela, cable address El Pao San Felix (Venezuela). Their Palua office is fitted with VHF radio-telephone on 161.150/159.850 Mc/s. and 2182 (call) kc/s.

CLEARANCE: Agent will secure the Clearance dispatch.

Note: The Palua dock and facilities are the private property of Iron Mines Company of Venezuela. All Company regulations must be obeyed by vessels and vessels personnel.

The Bill of lading will be prepared by Iron Mines Company of Venezuela, also the Commercial Invoice on the Consular Invoice form 138. The Inward Foreign Manifest, U.S. Customs form 7527–B, should be prepared by Master after sailing from Palua.

MAX. SIZE: Max. Draft 43 ft. Max. d.w.t. 70,000 tons.

HEALTH: The vessel will be boarded by the Public Health Doctor after docking at Palua; unless instructions to the contrary.

In the event that the Authorities have to board the vessel anchored out in the stream, an accommodation ladder should be rigged, preferably on the starboard side, to keep the port side clear for docking. Venezuelan authorities and workmen will not use Pilot ladders.

RADIO: Should a vessel receive radio advice at sea to proceed to Palua, and the clearance is to another port, the Master must radio to Agents and advise the name of the vessel, flag, port of embarkation, original port of destination, Captain's name and the number of members in the ship's crew including the Master. This is necessary in order to comply with the Venezuelan Custom Law.

BALLAST: To provide the best manoeuvring trim on docking, it will be at the discretion of the Master to properly ballast the vessel. But in order to lose no time on loading operations, as well as to prevent short loading, the ballast should be pumped out as soon as possible, using utmost caution not to pump oil or sludge overboard in the port area.

APPROACH AND DOCKING IN PALUA: After passing the village of San Felix, and before reaching the turn off from the main channel, a tug and a Docking Pilot will meet the vessel and will assist in the docking manoeuvre. Although the Master will always be responsible for the vessel's movements either in the case of docking or undocking, the Docking Pilot will actually pilot the vessel to, and dock the ship at Palua.

At mile 180.5 the ship should leave the main channel, turning to the left to follow the new dredged entrance channel of approach which is marked by 2 flashing buoys: white on the port and red on the starboard side. Diamond-shape range marks of 6 ft. side, painted white with black diagonal cross, indicate the centre line of the approach channel. The front range, fastened on the ore loading pier, shows flashing green light, and the rear range, set on a tower shows flashing green light, and the rear range, set on a tower approximately 2,000 ft. away, has fixed green light.

The docking shall be port side to in all events; and please stow all hatch boards, or pontoons, or steel battens, etc., on the starboard side of the hatch as this will keep the gear cleaner and lessen the work of the ore handling gang.

The dock will provide a gangway for access to the ship. Nothing should overhang the port side of the vessel on docking.

If the loading berth is not available the arriving vessel would be instructed to anchor at an anchorage just below the entrance to Palua approach channel at mile 179.

LOADING DOCK: The ore loading port is located at mile 181.5 of the Orinoco waterway, along the left bank going up-river. The new steel dock here is aligned up and down stream in the general direction of the current. It is 907 ft. long between its pointed heads, with 791 ft. of boarding side along, the deck fixed at about 6 ft. over the maximum rise of the river in the flood season. It has a strong fender system of steel structure covered with timber overhanging the side, down to near the lower river stage; and is fitted with 14 bollards plus 2 more, one on each head, for proper docking and securing the vessel.

Once the vessel is moored alongside the new ore loading dock, there shall be no further shifting necessary to load, as the loading tower moves along the dock on rails to facilitate the loading through the various hatches.

LOADING: The ore handling and loading equipment for Palua has a capacity to load 3,000 metric tons of ore per hour, for the time being. With this capacity, the vessel's mooring lines should be tended during the operation.

The boom of the loading tower is so designed as to allow free movement in any direction, fore and aft. The gantry and boom travel along the dock for a distance of 518 ft., and can place the ore at a distance horizontally out from the dock fenderline of 23 ft. min. and 62 ft. max. at the highest water stage, and from min. 29 ft. to max. 67 ft. horizontally out at the lowest stage.

Care must be taken during the course of loading to avoid piling the ore too high in the holds, as this necessitates hand trimming before the hatch covers can be properly secured, and incurs unnecessary trouble.

UNDOCKING: The Master, assisted by a Docking Pilot, if required, will handle the vessel on leaving the dock, going upstream from the dock not less than 0.75 miles distance to the turning basin in the same heading as when the ship moored alongside. One tug (or 2 tugs if required), will go alongside the ship prior to undocking and will assist the vessel until it is headed downstream in the main Orinoco channel. The amber lights at the heads of the dock form a range to mark the shoreside boundary of the local dredged channel. A red light high up on the loading gantry will come in the same range as the 2 amber lights. In the turning basin a tug-boat will assist the vessel swinging downstream.

When the ship is in the main channel, properly headed downstream, the Docking Pilot will leave on the tug, and the River Pilots (2 of them) will assume the navigational direction. Report to Radio Marina by voice radio and give ETA at mile 31.

Report again to Radio Marina giving position every hour, and try to contact Barima Pilot station sometime before arrival at mile 31, where the Pilots will disembark.

If voice radio communication is not possible, comply by radio-telegraph by way of the YVM station.

REGULATIONS: The Master, members of the crew and passengers if any, are required to have in their possession individual smallpox vaccination certificates. Serious delays may result in the dispatch of the vessel if this requirement is not complied with.

The Venezuelan law is very strict on the subject of contraband. It cannot be stressed strongly enough that all *new* articles, clothing, cigarettes, liquor, etc., must be declared and sealed up on arrival.

Concerning passes, the regulation states that "members of the crew who are not officers of the vessel, in order to go ashore and return aboard, have to be supplied with an identification card to be issued by the Purser of the vessel or his substitute, which card will contain the name of the vessel, the name of the crew member and the date of issue. This card will have to be signed by the person issuing same and has to be authorised by the respective officer of the Port Captain's office for the district".

GAS-FREE CERTIFICATE: Vessels reporting to Palua to load ore should have the holds and cargo compartments swept clean and ready to receive cargo. Also, any combination ore/tanker vessel tendering to load iron ore at Palua shall present, along with the notice of readiness, a Gas-free Certificate if said vessel has in the past been employed in the carriage of petroleum products. Such certificate shall be dated subsequent to the discharge of the vessel's last petroleum cargo. But they are advised that around Palua in Venezuela there is no chemist available for granting such a Gas-free Certificate. It may be secured before arriving at Venezuela by calling at Trinidad, reporting to cable address: Harriman, Port of Spain.

In case of necessity, or for convenience, it could be arranged for the chemist to travel to Venezuela to meet the ship in Palua, advising Harriman (Port of Spain) at least 3 days before arrival at Palua.

If the vessel is equipped with a gas-indicating meter (explosimeter), Iron Mines Company of Venezuela will accept the Master's certification in writing that the vessel is gas-free. However, they reserve the right to check the vessel with their own equipment prior to acceptance.

CONSULS: At the present time there are no Consular Agents located around Palua, the nearest being in Ciudad Bolivar or Caracas.

FLOOD SEASON: The port experiences a yearly flood season from the middle of June to the middle of November, to a max. of about 38 ft. at the last days of August, above the lowest stage (during the first days of April) in the dry season that occurs from the middle of November to the middle of June.

TIDE: The wind in the locality blows generally upstream, and on exceptional occasions during the dry or low-river season, when the current is weak, does overcome the current and cause the anchored ships to tend with stern upstream.

REPAIRS: Minor emergency repairs of mechanical, electrical and electronical types may be carried out in the shops by the personnel of the Iron Mines Company of Venezuela. The American Bureau of Shipping has a surveyor at Puerto Ordaz, near Palua.

MEDICAL: There is a medical dispensary at Palua, and a hospital of the Company at El Pao, where seamen may be admitted when requiring hospitalisation in emergency cases.

FUEL: All grades of bunker fuel are available at Palua, delivered by barge.

FRESH WATER: Drinking water is available at the dockside in limited quantity of about 100 tons every 24 hours. Small amounts of fresh provisions may be obtained in the locality.

Section C

PUERTO ORDAZ: 08.21 N. 62.43 W.

OPERATORS: CVG Ferrominera Orinoco.

LOCATION: The operations of the CVG Ferrominera Orinoco are centred in the State of Bolivar in Eastern Venezuela and iron ore is loaded into ocean-going vessels at Puerto Ordaz 8° 21′ N., 62° 43′ W., at the junction of the Caroni and Orinoco Rivers, approximately 184 nautical miles from the open sea.

GAS-FREE CERTIFICATE: Any combination ore-tanker vessel tendering to load iron ore at Puerto Ordaz shall present, along with the notice of readiness, a gas-free certificate if said vessel has in the past been employed in the transportation of petroleum products. Such certificate shall be dated subsequent to the discharge of the vessel's last petroleum cargo. Gas-free certificates can be obtained through an approved surveyor in Puerto Ordaz.

HEALTH: Vessels will be boarded by the Public Health Doctor in the stream off Puerto Ordaz. He will not come up a Pilot ladder and will insist on an accommodation ladder which should be rigged and ready when he approaches. In order not to delay docking, this accommodation ladder should be rigged on the port side during low river stage, and starboard side during high river stage.

RADIO: Should a vessel receive radio advice at sea to proceed to Puerto Ordaz, and the clearance is to another port, the Master must radio station YVM Puerto Ordaz, and advise the name of the vessel, flag, port of embarkation, original port of destination, Master's name and number of members in the ship's crew. This is necessary in order to comply with article 17 of the Venezuelan Customs Law.

TUGS: All vessels touching at Puerto Ordaz will be assisted by a tug in docking and undocking manoeuvres. Line-handlers are available on the dock to secure mooring lines on vessel's arrival, and to release them on vessel's departure.

BERTHING:

1. **The Harbour:** The Puerto Ordaz Harbour extends from mile 183.5 to mile 184.1 of the waterway. The harbour consists of a natural basin formed by the mouth of the Caroni as it flows into the Orinoco. The width of the turning area within the basin varies from a min. of about 1,600 ft. at low water to a max. of about 2,000 ft. at high water. The lighted buoys marking the navigable limits on either side of the harbour are moved to different positions according to river stages in order to achieve full utilisation of navigable waters. The bottom of the harbour is generally rock, with scattered layers of sand overburden deposited as sediment by the river. This sand is regularly removed by dredging in order to maintain depths which will accommodate the maximum draft authorised by the Port Captain. The bottom configuration across the harbour consists of a rocky shelf extending about 900 ft. from the face of the dock. Beyond this shelf the bottom slopes steeply into a deep gorge, then rises to form a sandy beach along the opposite shore. The velocity of river currents at this site varies according to stage levels. A slower current is generally experienced over the rocky shelf adjacent to the dock, with velocities averaging about 1.5 knots at flood stages and about 0.5 knots or less at reduced river stages. The velocity of the current over and along the deep gorge averages about 3.5 knots at flood stages and 1.5 knots or less at reduced river stages. During extreme low water, the basin is subject to tidal influence and the velocity of currents is minimal, although there is no reversal of flow. The direction of the current is aimed slightly toward the face of the dock at its S.E. end but deflects away from the pier about 500 ft. downstreamward. Access to the harbour is by way of a naturally deep and wide fairway which is the continuation of the gorge as it enters the Orinoco River.

2. **The Dock:** The Puerto Ordaz dock is located along the right ascending side of the harbour and extends outward from shore on a S.E. by East alignment. The all-steel fixed-height dock is 1,885 ft. long; its elevation is 41 ft. above low water plane (0.0 ft. stage). This dock is fitted with a strong fender system and with a sufficient number of accessible bollards for proper docking and securing.

3. **Arrival:**

(a) Notice of Readiness: When completely ready to receive cargo, vessels will submit "Notice of Readiness" to CVG Ferrominera Orinoco. Vessels will be loaded in the order in which Notices of Readiness are accepted by CVG Ferrominera Orinoco. The Company will advise when the vessel may proceed alongside the dock.

(b) Docking: Special Docking Pilots are provided for the docking and undocking of vessels at Puerto Ordaz. These Pilots are qualified River Pilots, thoroughly familiar with local conditions. All vessels will dock starboard side to. During the low water stage, which is from the middle of November to the middle of June, no gangway should be rigged and nothing should overhang the starboard side of the vessel. When the river is sufficiently high which is from the middle of June to the middle of November vessels are requested to have starboard gangway or accommodation ladder rigged and ready to lower immediately after docking in order to expedite the commencement of loading. Venezuelan authorities and workmen will not use Pilot ladders. Vessels reporting to Puerto Ordaz to load ore should have holds and cargo compartments broom clean and ready to receive cargo. Considerable time will be gained if this requirement is met prior to reporting.

(c) Hatches: On arrival at Puerto Ordaz all hatch boards or pontoons, beams, tarpaulins, steel battens, wedges, etc., should be stowed on the port side of the hatch. This will keep the hatch gear cleaner and lessen the work of the ore handling clean-up gang.

(d) Ballast: In order to lose no time with the loading operations, as well as preventing short-lifting, all ballast should be pumped out before arrival at the dock. Use utmost caution not to pump oil or sludge overboard in the port area. CVG Ferrominera Orinoco Ships' Agency Representative will contact vessel on arrival and will assist in every way possible.

4. **Departure:** All vessels which have completed loading at Puerto Ordaz and have received the latest river information from the port offices, and are ready for their river transit in every respect, will proceed outward via the Orinoco Waterway, disembarking the Pilot at mile 31. Once the Pilot has disembarked, vessels shall proceed over the South (dredged) channel to mile 0, and exit the waterway.

TANKERS: See "Punta Cuchillo".

MEDICAL: There is a hospital at Puerto Ordaz which will admit seamen requiring hospitalisation.

FRESH WATER: Drinking water is available alongside the dock.

FUEL: Bunker "C" and diesel oil is available.

CONSULS: An Italian consulate Agent at Puerto Ordaz, nearest consuls for other countries at Cuidad Bolivar or Caracas.

REPAIRS: Minor emergency repairs may be carried out in the shops of CVG Ferrominera Orinoco.

TIME: The legal time of Venezuela, which is 4 hours behind GMT, shall be used in Pilotage Zone No. 1 of the Orinoco river.

SHORE LEAVE: Permitted, but it is mandatory that all crew members should report back to their respective ships before sailing time.

GENERAL: 1. *Ore Loading Equipment:* The ore handling and loading equipment installed on the pier has a speed ratio of 6,000 long tons of ore loaded per hour. Due to this great loading capacity the vessel's mooring lines must be tended at all times.

2. *Handling Facilities:* A movable 110-ton, rail mounted stiff-leg derrick is installed on the dock for the handling of general cargo.

3. *Provisions:* Small amounts of fresh provisions are available.

4. *Surveyor:* The American Bureau of Shipping has a non-exclusive surveyor in Puerto Ordaz. Lloyds has an Agency in Ciudad Bolivar with a branch office in Puerto Ordaz, and will appoint surveyors upon request.

AGENTS: Mailing Address: CVG Ferrominera Orinoco C.A., Agencia de Barques, Puerto Ordaz. Telex No. 86249 (ORINADM).

CVG Ferrominera Orinoco acts as ship's Agent for all vessels consigned to load iron ore at Puerto Ordaz. This function is performed by the Superintendent, Traffic & Ship's Agency and his staff, whose offices are located adjacent to the loading dock at Puerto Ordaz.

Section D

PUNTA CUCHILLO, (Puerto Ordaz Terminal): 08.20 N. 62.47 W. (See Plan Book)

N.B. See "Orinoco River" for all important entry requirements. Specific details relevant to Punta Cuchillo only are as follows:

OPERATORS: Lagoven S.A.

LOCATION: The terminal and dock is located near Mile Post 192 on the South side of the river.

PILOTAGE: Government Pilot will pilot vessel to Puerto Ordaz. In some cases this same Pilot will act as Mooring Pilot and dock vessel at the terminal. If River Pilot does not also act as Docking Pilot, the River Pilot will disembark at mile 178 during low water, and mile 183, in high water, and a Docking Pilot will embark and take the vessel to mooring.

Pilots are obtained at the G7 buoy of the old channel, which is the same as Buoy 27.7 of the new channel and is located 5 miles West of the old lighthouse at Punta Barima at Lat. 08° 36′ 00″ N., Long. 60° 30′ 40″ W. It is important that vessels pass this buoy and be in sight of the Pilot Station (1 mile E.S.E. of Punta Barima Lighthouse), as Pilots will not proceed to the vessel until it has been sighted.

RADIO: Vessels diverted at sea to Punta Cuchillo which do not have a Venezuelan clearance on board, must advise Lagoven by radio as soon as they receive their orders to change destination. The following information must be given: Master's name, vessels flag, net tonnage, last port of call, port to which originally cleared and ETA. This information is required in order that inward clearance may be arranged with government officials in ample time prior to vessel's arrival. In absence of this information, vessel will be subject to a fine.

MAX. SIZE:

Gauge Reading	*Maximum Draft*	*Tide Required at Bar*
12–14 ft.	33 ft.	None
14–17 ft.	34 ft.	None
17–20 ft.	35 ft.	None
20–23 ft.	36 ft.	None
23–26 ft.	37 ft.	None
26–29 ft.	38 ft.	None
29–32 ft.	39 ft.	None
32–35 ft.	40 ft.	None
35–38 ft.	41 ft.	half of high tide
38–41 ft.	43 ft.	half of high tide

HEALTH: Vessel will be boarded by the Public Health Doctor in the stream off San Felix or Puerto Ordaz or occasionally at the Terminal. If he boards before docking, an accommodation ladder should be rigged and ready when he approaches, as he will not come up a pilot ladder.

All Masters, members of the ship's crew, and passengers, if any, are required to have in their possession individual smallpox vaccination certificates. If this requirement is not complied with, a serious delay may result in the dispatch of the vessel.

BERTHING: The dock at the terminal consists of a docking platform, 2 breasting dolphins and 2 mooring dolphins. The docking platform is connected to shore by a 10 ft. causeway capable of carrying a light truck.

At mean low river stage, water depth at the face of breasting structures is 40 ft. The bank rises sharply from face of dolphins toward shore. The 40 ft. depth contour extends parallel to shore for a considerable distance upstream and down stream from the dock, allowing a flat approach angle.

Current is negligible during low river stage and is approximately 6 knots at midstream at high river stage. Current runs generally parallel to the face of the dock at the dock site.

Top of dock elevation is 45 ft. above low water stage. Buffering system extends from a point below low water stage to a point immediately below top of dock. Nothing should overhang the shoreward side of the vessel when docking during the lower stages of the river. The buffering system is designed to accommodate forces exerted by a vessel of 47,000 tons displacement, approaching the dock with a velocity component perpendicular to the dockface, of 0.5 ft. per second.

Bollards for vessel's lines are provided at the mooring dolphins and at the breasting structures. Mooring dolphins will safely withstand 200,000 lbs. of mooring line tension.

The facilities include a 24 in. diameter submarine pipe-line which crosses the river a short distance down-stream of the dock. The crossing is marked by triangular-shaped signs on both banks of the river. Masters are cautioned against use of vessel anchors in this area.

The terminal pumps are capable of loading oil aboard ship at the rate of approximately 14,000 barrels per hour.

INWARD CLEARANCE FOR DIVERTED VESSELS: Vessels diverted to Puerto Ordaz to load cargo should submit all documents, except consular mail, which they will not have. In lieu of this, they should submit 4 copies of the cable to divert, leaving enough space for the translation in Spanish. Vessels diverted at sea to Puerto Ordaz (Lagoven Terminal) which do not have a Venezuelan clearance on board must advise Lagoven at Puerto Ordaz, by radio as soon as they receive their orders to change destination. The following information must be given: Masters name, vessels flag, net tonnage, last port of call, port to which originally cleared and ETA. This information is required in order that inward clearance may be arranged with government officials in ample time prior to vessels arrival. In absence of this information, vessels will be subject to a fine.

SAFETY: The following is a condensation of the safety precautions that should be observed when the vessel is alongside the dock:

(i) All passageway doors leading to the cargo deck areas are to be kept closed during cargo-loading operations.

(ii) Ship's firefighting equipment must be kept ready at all times while berthed at Lagoven dock.

(iii) Smoking or carrying lighted or unlighted pipes, cigars or cigarettes on the weather decks of the vessel, or on the dock, is strictly prohibited under all circumstances. Masters are requested to instruct their crew not to throw lighted cigars or cigarettes over the side or out of the portholes.

(iv) An efficient watch must be maintained on deck and in the engine-room on the vessel, and a sufficient number of men must be on board at all times to move the vessel any time, in case such is required.

(v) If the galley is located near oil-handling operations of any nature, the skylight lids should be kept down and secured to prevent the galley being sprayed with oil in the event of a burst hose.

(vi) Ventilators in the vicinity should be turned away from the scene of operation.

TUGS: The use of tugs is necessary in docking and undocking manoeuvres of boats at this Marine Terminal. Alcoa has a 2,100 h.p. tug available for this service. A tie-up launch will be provided to assist in the mooring of the vessel, and will handle all the mooring lines before and after loading.

LOADING: Monagas crude is the only cargo available at the Puerto Ordaz Terminal. This crude has an API gravity of 11.9° to 12.5° F. (6.490 – 6.517) U.S. barrels per long ton. This cargo must be heated to approximately 140° F. in order to attain normal discharge rates.

Loading is accomplished through 3×10 in. hoses provided with 10 in., 150 lb. ASA flanges. Hoisting gear is provided for handling the hoses. A dock crew will connect the cargo hoses and disconnect them on completion of loading. Some adapters and other tools are available on dock. The oil will be loaded at an elevated temperature.

Precautions, as are common for any heavy oil, should be taken to ensure that no ballast water is left in any tank to be filled with this oil. If the cargo is contaminated with water, the water will not separate from the oil. The salt content of the oil will be raised approximately 10 lb. per 1,000 barrels for every 0.10% contamination by sea water.

All cargo compartments must be stripped dry. Cargo pipe-lines should be drained and/or purged of water.

There is no provision at the Puerto Ordaz Terminal for disposal of dirty ballast or tank washings. Tankers bound for Puerto Ordaz for loading must dispose of all dirty ballast and tank washings before entering the Orinoco River.

Prior to proceeding to sea, all butterworth plates, cargo tank hatch covers and ullage plugs should be inspected to ensure against entry of salt water.

FRESH WATER: Fresh water is available ex-barge; cable advice of 24 hours is required. Dry provisions may be obtained in very limited quantities.

FUEL: Bunker fuels are available at all hours from Astilleros Orinoco C.A., who operate a floating storage and blending facility in the Orinoco River. Bunker fuels may be received at Lagoven dry dock while loading crude. Full cargoes can be made available.

TIME: GMT minus 4 hours.

MEDICAL: Medical assistance can usually be arranged, particularly in the case of an emergency.

REPAIRS: No major repair facilities are available. However, small repairs can be taken care of through local machine and electrical shops, and shore labour can be obtained if required.

AGENCY: Lagoven handles all papers and documentation connected with the ship's business. Lagoven will also help the ship's Master in providing required land transportation, limited provisions, or any other assistance that may be required for the operation of the ship's normal business. Alcoa will also assure that the ship's requirements are met in regard to Sanitary Inspection, Customs Inspection and Guardia Nacional.

END OF ORINOCO SECTION

PERTIGALETE: 10.15 N. 64.34 W.

LOCATION: Situated in a sheltered bay about 2 miles East of the port of Guanta, or about 4 miles from the pilotage zone situated in the North.

PILOTAGE: The pilotage zone in Pozuelos Bay is the same as for Guanta, i.e. an area situated between the islands of Borracha and Chimana, in the Bay of Pozuelos (formerly called Bergantin Bay).

From the pilotage zone for the port of Guanta/Puerto La Cruz, the private pier Pertigalete is to be approached by sailing between the Isla de Plata and the island of Cachicamo. Pilotage is compulsory in and out and is performed by well-trained government Pilots. The navigation is considered very safe.

MAX. SIZE: The depth of water for ocean-going vessels alongside the Pier is 20 ft. (shore side) to 40 ft. (sea side).

TUGS: Available from inward clearance port at Guanta/Puerto la Cruz.

BERTHING: The private pier in Pertigalete for berthing ocean-going vessels is up to 150 m. (492 ft.) long. The apron is ample and allows easy manoeuvre of trucks with cement. On the same pier the cement factory is regularly receiving raw material and machinery, but the berthing is along the West side of the pier for coastwise trade, so does not interfere with operations for ocean-going vessels. There are chutes, conveyor belts from the nearby silos, and a heavy crane.

TANKERS: Berth at private wharf at Pamatacualito, operated by Baroid de Venezuela SA.

Length of berth 113.60 m., depth alongside 10 m.

LOADING: The cement factory is able to deliver to the pier 2,000 to 2,300 bags per hour, to be loaded simultaneously into arrived vessels. According to experience load rate is about 300 bags per hour and gang by steam winches, and about 400 bags per hour and gang by electric or hydraulic winches.

STEVEDORES: Loading operations are performed exclusively by the personnel of the cement factory. Winchmen are also supplied by the cement factory. All costs, including overtime, are for account of the cement factory, inclusive of stowing and trimming the vessel.

Under normal conditions on Saturday afternoon there is no work, but almost without exception the cement factory works overtime on Saturdays if by doing so the vessel can be despatched that day. On holidays, if circumstances call for urgent operation, the cement factory has the option to work overtime. Work on Sunday is prohibited.

AUTHORITY: Private pier of C. A. Venezolana de Cementos and is under the jurisdiction of Customs and Harbour Master of Guanta/Puerto la Cruz, Eastern Venezuela. All charter business and general administration is covered by Caracas Headquarters of C. A. Venezolana de Cementos.

AGENTS: Head Office (Management and Control), Brokers Chartering and Tramp Agents, Victor H. Selinger, S.A., PO Box 1632, Caracas. 1010-A. Cables: "Selvic" or "Seltank". Tel. (02) 81.02.71. Telex: 21402, 21934, 22859, 21631. Local Office: PO Box 4194 Puerto La Cruz. Tel. (081) 662107, 662665. Telex: 81340. Cables: Selvic Puertolacruz, Seltank Puertolacruz.

PUERTO CABELLO (inc. Barburata):
10.29 N. 68.07 W.

PILOTAGE: Pilotage is compulsory and vessels have to wait for Pilot in the pilotage zone, West and N.W. of the port entrance (S.W. of Punta Brava).

MAX. SIZE: Bulk Cargo Pier: up to 32 ft. draft. Inner Port: up to 28 ft. draft. Also see "Tankers".

TUGS: The use of tug-boats within the port is compulsory both for entering and leaving port, as well as for manoeuvres in the port basin, for foreign flag ships over 300 tons.

BERTHING: The port entrance is 100 m. wide in direction West to East. Berth No. 1 and half of Berth No. 2 are along the same entrance channel, where ships are berthed only as an exception or when the port is rather congested. The total length of the North (main) Pier for the berthing of ocean-going vessels is 1,025 m., room enough for 6 to 8 vessels. For administrative reasons the pier is divided into 8 berths of about 128 m. each. Between Berths No. 2 and 3, the pier is bent Southwards. Along the pier there are warehouses which under normal circumstances provide sufficient indoor space.

Along the East Pier, of 350 m. length, there are no warehouses. This pier gives berthing facilities to 3 or 4 middle-sized vessels.

Along the South Pier, of 500 m. length, there are 2 warehouses. This pier is exclusively used for coastwise shipping, fishery and small craft in general.

The dredged channel along the East Pier is only 80 m. wide. This is the only channel which connects the main basin of the port with the South basin of the port, the latter served through the South Pier.

BULK HANDLING FACILITIES: 400 m. long new pier, designed exclusively for the handling of bulk cargoes.

This bulk cargo pier has an apron of about 25 m. and allows ships with a draft of 10 m. at any time.

Ships moored along this new pier are not able to take water there, but have to be shifted to the general cargo piers in the port of Puerto Cabello.

There is no telephone installation on the new pier.

Tug-boat service and assistance of Pilots is compulsory to negotiate the distance to and from the bulk cargo pier.

General cargo is not allowed to be handled at this pier. There are no cargo handling facilities whatsoever and no kind of rolling equipment either. All the vessels, unless they have up-to-date discharging equipment of their own, have to provide derricks of minimum 5 tons capacity to support the SKT discharging equipment of receivers. The cargo is discharged in bulk cargo trucks, fully closed and with only rather narrow manholes for the SKT arm.

The new grain terminal has been opened. The wharf is 400 m. long and allows 2 vessels to berth. Max. depth 30 ft. Average discharge rate 1,500 tons per day.

TANKERS: *Borburata:* The Maroven Terminal lies about 2 miles East of the port entrance.

Berth No.	*Max. length*	*Max. beam*	*Max. draft*
1	400 ft.	—	20 ft.
2	575 ft.	72 ft.	31 ft.

No. 1 berth is used for bunkering only.

No. 2 berth is used for the discharge of refined products and bulk chemicals. It is fitted with 4×8 in. Chicksans and a range of hoses from 4 in. to 8 in.

A Pilot is compulsory, and boards at Puerto Cabello. If the vessel is cleared outwards at Borburata, the Pilot may return to the pilot station by road.

Berthing and unberthing in daylight only.

Lagoven Terminal: The buoy mooring is used for the discharge of petroleum products. Max. length 198 m. Max. beam 28 m. Max. draft 34 ft., will be increased to 38 ft. Max. Tonnage 40,000 d.w.t. Vessels berth using 5 shackles on the port anchor, and 6 stern lines to 3 mooring buoys.

Terminal Marino Holanda: Consists of 3 buoys situated in a depth of 45 ft. near Guaguaza Lighthouse. Used for loading/discharge of Chemicals.

STEVEDORES: *Straight time:* Monday to Friday: 0700 to 1100 hrs. and 1300 to 1700 hrs.

Overtime: Monday to Friday: 1800 to 2300 hrs. Normally overtime beyond 2300 hours is not permitted.

Relief Gangs: Obtainable, if there are not too many ships working in the port at a time, for the hours from 1100 to 1300 and 1700 to 1800.

Work on Sunday: Not permitted except for passenger vessels, and considered as such are those carrying more than 60 passengers, and with a medical doctor on board.

Saturday afternoon work: Not permitted. But if a vessel can terminate operation and sail with a maximum of 3 additional hours' work, a special permit can be obtained from Customs and Port Authorities. In such case, the additional working hours are considered straight time work.

FRESH WATER: Water is supplied through pipe-line on the pier, day or night.

For night work, a special gratuity to watermen is customary.

The drinking water in Puerto Cabello is tropical treated, well-filtered and wholesome.

Every vessel of over 600 net tons calling at Puerto Cabello, and other ports in Venezuela, should arrange to take water only at Puerto Cabello in order to avoid double water dues.

OPENING/CLOSING HATCHES: Is not performed by the National Port Services, but instead either the ship's crew or hired assistance labour must be used. Recommended that ship's crew open and close hatches.

REPAIRS: The adjacent Naval Yard, the entrance to which is within the main port, opposite the North Pier, is equipped for minor repairs both on engine and hull. For emergency purposes, the dry dock could be used. Its capacity is for ships up to 30,000 to 35,000 tons. All repairs on the hull are effected by a special crew transferred from the Naval Yard.

At the dry dock there is 1 crane of 15 tons capacity. Within the Naval Yard there are 2 slipways for ships of 125 ft. max. and 210 ft. length max. respectively.

Venezuelan Navy ships always have priority.

AGENTS: Head Office (Direction and Control). Brokers, Chartering and Tramp Agents, Victor H. Selinger, S.A., PO Box 1632, Caracas, 1010–A Venezuela. Cables: "Selvic" or "Seltank". Tel. (02) 810271. Telex: 21402, 22859, 21631, 21934. Local Office: PO Box 174 Puerto Cabello. Tel. (042) 63750, (042) 63549. Cables: "Selvic Puertocabello" or "Seltank Puertocabello". Telex: 42479.

PUERTO DE HIERRO: 10.38 N. 62.05 W.

DOCUMENTS:

Last Port Venezuelan Consulate Clearance.
6 Crew Lists.
6 Passenger Lists.
6 Stores Lists.
6 Narcotic Drugs Lists.
2 Health Declarations (forms provided and filled by doctor on arrival).
Smallpox Vaccination Certificates of Crew.
Derat Certificate.

PILOTAGE: Pilot boards at sea buoy 10° 37′ N., 62° 06′ W. If no pilot boat meets vessel on arrival, ship must anchor to wait orders. Send 7 day, 48 and 24 hour ETA's to cable address "Transterm Guiria". Vessels should anchor in the vicinity of sea buoy. No radio-telephone available.

ANCHORAGE: Vicinity of sea buoy. Good holding ground.

RESTRICTIONS: Vessels may have to wait at anchorage until slack water for docking when tide/current is strong.

MAX. SIZE: Dock, East berth: 30 ft. at LW; 33 ft. at HW; 690 ft. length, 90 ft. beam. Dock, West berth: 19 ft. at LW; 32 ft. at HW; 600 ft. length, 60 ft. beam. Also see "Berthing".

HEALTH: Doctor boards at berth and grants pratique. Any suspected disease or fever to be reported at that time. Vessels arriving from a Venezuelan port do not require pratique.

RADIO: La Guaira, Venezuela.

TUGS: None available.

BERTHING: Berthing at times limited to slack water period depending on strength of tides. Pilot will advise.

Bauxite Terminal: Max. draft 37 ft. Depth alongside 40 ft. Max. d.w.t. 40,000 tons. Loading rate 3,000 t.p.h.

STEVEDORES: Bulk cargoes: discharging rate 700/800 t.p.h., loading rate 800/1,000 t.p.h. No facilities available for handling general cargo.

MEDICAL: No notice required. Venezuelan Navy Hospital with limited medical assistance.

TANKERS: No oil carriers.

DENSITY: LW – 1020. HW – 1023.

FRESH WATER: Available in limited quantities at berth. Rate of delivery 30 t.p.h.

FUEL: In an emergency. Diesel fuel medium, specific gravity at 60° F. 0.85, API gravity at 60° F. 35, viscosity SSU at 100° F. 37, viscosity engler at 20° C. 1.40.

CUSTOMS ALLOWANCES: Two cartons of 200 cigarettes each or equivalent in tobacco. Two 0.75 litre bottles.

IDENTIFICATION CARDS: Issued locally by Navy on arrival.

REPAIRS: None. Small company workshop.

CONSULS: None.

AIRPORT: Nearest airport (1 hour voyage on launch) is Guiria with 2 weekly flights to Caracas and the same number to Port of Spain, Trinidad. Next nearest (1 hour launch plus 2 hours car) is Carupano with 4 daily flights to Caracas.

TIME: GMT minus 4 hours. Permanent.

HOLIDAYS: Cargo worked 24 hours a day, 365 days a year.

GENERAL: The whole of Puerto de Hierro is a Venezuelan Navy Supply Base. The dock and cargo installations are operated by Puerto de Hierro, S.A., a subsidiary of Caribbean Steamship Company, S.A. Only bulk cargoes transhipped by Caribbean Steamship are handled.

DEVELOPMENTS: Possibility of increasing draft to 42 ft. at loading berth, and to 30 ft. at discharging berth.

AUTHORITY: Puerto de Hierro, S.A.

PUERTO LA CRUZ, (Puerto La Cruz Terminal): 10.13 N. 64.38 W. (See Plan Book)

OPERATORS: S. A. Meneven. Postal Address, Apartado 4064, Puerto La Cruz, Venezuela. Radio Address, Meneven, Puerto La Cruz. (Venezuela). Telex: 81147 Meneven.

FLAG: Venezuelan flag must be displayed from the foremast when entering zone as well as in docking operations regardless of the hour. At all other times the Venezuelan flag must be displayed between sunrise and sunset.

LOCATION: Puerto La Cruz located on Pozuelos Bay on the N.E. coast of Venezuela. Its harbour is well protected by numerous islands against sea currents. The hurricane path is several hundred miles to the North and has never affected the flow of navigation in the Puerto La Cruz area.

The lighthouse marking the entrance to Pozuelos Bay is located: Lat. 10° 18′ 18″ N., Long. 64° 41′ 7″ W. Visibility is 20 miles.

DOCUMENTS: Arrival clearance is effected on board vessel shortly after docking by Government Officials and a representative of the Company. The following documents are required:

1. Ship's Register.
2. Dispatch issued by Venezuelan Consul at last port (1 copy).
3. Ballast Manifest (1 copy).
4. Crew List (6 copies).
5. Passenger and Baggage List, if any (5 copies).
6. List of Passengers in Transit, if any (5 copies).
7. List of Personal Effects (4 copies).
8. Store List (5 copies).
9. List of Slop Chests (4 copies).
10. Sailing Permit issued by Marine Authority at last port of call.

*Store List should indicate separately all deck, engine and cabin stores.

PILOTAGE: The use of Government Pilots is compulsory for all vessels entering or leaving territorial waters. The Company will arrange for this service at all times. If it becomes necessary for the Master of the vessel to disregard Pilot's orders in order to ensure safety of the ship a written report from the Master shall be submitted promptly to the Government Port Captain in Spanish. Meneven will assist in translation, when necessary.

The zone for Pilot to board or to anchor awaiting Pilot is delineated by the following 3 lines: South by parallel 10° 15′ N., East by meridian 64° 40′ W., and West by an imaginary line from Punta Puinare on Isla Chimana del Oeste to the North point of Morro de Barcelona.

When ready to dock, a Pilot will be despatched by launch to ship.

MAX. SIZE: No limitation is placed on width of tankers. Ships up to 1,000 ft. in length can be turned around in the inner harbour area. Max. safe draft alongside (berth No. 5) is 55 ft. (Also see "Berthing".)

HEALTH: In theory the Government Port Doctor is to board each incoming vessel and board only outgoing vessels which carry passengers. In practice, however, the doctor boards at his discretion.

Ships cleared between the hours of 1700 – 0800. Mondays through Fridays and all day Saturday, Sundays and holidays are charged by Immigration Service for the issuance of shore leave passes. There is no charge for this service from 0800 – 1700 hrs. Mondays through Fridays. Transportation and immigration clearance fees on movement of seamen are billed at cost.

RADIO: Masters are requested to advise Meneven Puerto La Cruz by radio 48 hours in advance of estimated arrival giving vessel's name, date and hour of arrival, bunkers, name of Master, port of departure, draft (arrival), Venezuelan gross tonnage, flag of ship. Vessels may contact the terminal by radio-telephone on 2182 kc/s. and VHF Channel 16. There is standby attention 24 hours a day. The terminal also has the frequencies 2080, 2120, 2638, 2738 and VHF Channel 13.

Ship-to-shore radios are installed on the oil dock and on both tugs. A 350-watt AM transmitter-receiver is monitored 24 hours a day.

TUGS: 2-tug service is compulsory by law in this port. The Company has available a first-class diesel-electric tug of 1,600 h.p. and a contract tug of 2,100 h.p.

Tug assistance is charged as follows for each tug per manoeuvre according to the following deadweight scale – as published in the "Tanker Register" by H. Clarkson of London.

1 – 20,000 d.w.t.	–	Bs. 2,450
20,001 – 30,000 d.w.t.	–	Bs. 2,870
30,001 – 40,000 d.w.t.	–	Bs. 3,300
40,001 – 50,000 d.w.t.	–	Bs. 3,750
50,001 d.w.t. upwards	–	Bs. 4,200

BERTHING: The loading facilities consist of 6 berths. Products available and safe draft are as follows:

	Berth 1	*2*	*3*	*4*	*5*	*6**
Crudes	×	×	×	×	×	×
Heavy fuel oil					×	×
Refined products			×	×		
LPG		×	×			
Bunker "C" fuel	×	×	×	×	×	
Diesel fuel	×	×	×	×	×	×
Intermediate fuels	×	×	×	×	×	
Fresh water	×	×	×	×	×	×
Max. safe draft (ft.)	38	38	38	38	55	39.5
Max. d.w.t. (thous.)	45	45	45	45	110	55

*El Chaure Terminal – Now Pier No. 6. Also see "El Chaure".

Upon arrival at dock the following rules must be observed:

(a) Masters must ensure that mooring lines are properly tended during the discharge of ballast and loading of cargo, and that sufficient personnel is on board at all times to handle same. Discharging or loading will be temporarily suspended upon infringement of this regulation.

(*b*) Masters are requested to remove the blank flanges from their vessel's loading manifold before docking, so as to expedite the connecting of the shore hoses by company personnel. Vessels using berth No. 5 are also requested to have their derrick and gangway ready for use.
Note: Vessels normally dock with starboard side to dock, unless otherwise advised.

(*c*) While docked, discharge of sea water, hot water or steam on dockside of ship is prohibited. Hot water or steam may activate the automatic sprinkler system as well as damage piping located under the dock surface.

(*d*) Rat-guards must be placed on all ropes connected with the shore.

(*e*) Heavy exhaust smoke from vessel's funnel is not permitted. Any infringement of this rule will result in Government fine and/or removal of ship from dock.

(*f*) Meals must be provided in officers' mess-room for Venezuelan National Guard personnel who may be assigned to the vessel during stay in port.

LOADING: After the vessel has been cleared, the Company Dock Supervisor on watch will give the Master of the vessel written instructions as to grade or grades of cargo, loading rates, information on size of hoses and lines, and other information pertinent to the loading of the vessel.

During loading operations, company employees are on watch to administer to the needs of each vessel.

Upon termination of loading cargo, hoses are normally displaced with air at controlled rates prior to disconnecting. If the ship's officers request that the alternate procedure of draining hoses be effected, shore personnel will be happy to comply provided the following steps are observed by ship's officers:

1. Advice be received prior to termination of loading cargo.
2. Ship's receptacles be situated to receive oil drained on board. It should be noted that heavy fines are imposed for spills or overflows which contaminate the bay.

Shortly after completion of loading company personnel will take ship's ullages and, later, deliver cargo and sailing papers to an officer of the vessel.

Ships must vacate berth upon completion of loading and await papers at anchorage if the berth is needed for another vessel. The Dock Supervisor on duty will advise ship's officer of this matter.

BALLAST: Although climatic conditions in Puerto La Cruz are relatively mild, vessels should arrive with sufficient ballast to permit safe handling. Venezuelan regulations strictly prohibit the pumping overboard of dirty ballast in territorial waters. All ballast must be pumped ashore with the exception of vessels especially equipped with clean segregated systems which are reserved for ballast only. Vessels so equipped will be permitted to pump overboard after first being inspected and approved by shore personnel. Heavy fines are imposed for pollution of waters and industrial fishermen are quick to report any infringement. Max. discharge pressure to shore installations is 90 p.s.i. through the 16 in. line which dumps into ballast lakes approximately 300 m. South of dock.

No vessel will be allowed to discharge ballast if last previous cargo was sour crude and/or could result in unpleasantness to area inhabitants.

FRESH WATER: Fresh chlorinated water is available at an average rate of approximately 10 t.p.h. Total volume of water that can be supplied during the normal period alongside averages about 150 tons. As water is not held in special reserve for vessels requirements but supplied from terminal water system, availability may be limited dependent on time of year and other conditions.

FUEL: The terminal is not a general bunker station. Only ships loading petroleum may take bunkers.

Bunker "C", heavy diesel fuel and complete range of intermediate fuels are available in quantity. Delivery rates to the ships are approximately as follows: Bunker "C", 200 t.p.h.; heavy diesel, 150 t.p.h.; intermediate fuels, 150 t.p.h.

Bunkers are delivered concurrent with the cargo and should be taken as soon as clearance is granted.

Meters are installed on all bunker systems and are calibrated in net barrels.

The dock valves on the bunker lines will only be opened and closed upon advice from the ship's personnel.

Lubricants and gasoil are available through the vessel's Agent.

CUSTOMS: Crew members should be warned against taking knives or other lethal weapons ashore, as this is strictly prohibited. All firearms and ammunition must be noted on stores list. They cannot exceed 1 per officer and 18 cartridges per gun. No arms may be carried while ship is in Venezuelan waters or tied up at dock. Contraband of any description will be confiscated. Each man is allowed 1 package of cigarettes on his person and this package must be opened. No liquor is to be taken ashore. It is prohibited to carry liquor from shore to ship without authorisation from captain of vessel. It is further strictly prohibited to consume liquor in dock area.

It is normally forbidden to take photographic cameras ashore. However, upon written request to the National Guard contingent on the oil dock, special permission may be obtained. This is subject to 2 limitations: (1) that the camera is returned to the ship; (2) that no photographs are taken of the petroleum installations.

IDENTITY CARDS: Passes for shore leave are issued by the officials of the "Capitania de Puerto", who board with the Customs authorities upon the vessel's arrival at dock. These passes are valid for the duration of the vessel's stay in port and must be returned before sailing to the guard assigned to the vessel.

In order to comply with Immigration Regulations, crews should be carefully checked before sailing, and any missing seamen reported to the vessel's Agent. Crew members left behind when the vessel sails will be held in custody until deported at the vessel's expense.

CONSULS: The following foreign countries have consular offices in the vicinity of Puerto La Cruz:

Belgium
Brazil
Colombia
Denmark
France
Great Britain
Italy
Norway
Sweden
Netherlands
Dominican Rep.

Vessel's Agent should be appraised of vessel's consular requirements promptly upon docking.

REPAIRS: Request for repair work by local contractors must be accompanied by a written request from the Master of the vessel.

REPATRIATION: Seamen discharged from hospital for transfer to another port, seamen arriving from another port or those being repatriated are handled by the vessel's Agent, who must comply with all Venezuelan Regulations.

In the case of seamen left ashore for any reason, Masters are requested to furnish a letter accepting responsibility for all expenses incurred, advances if any, and instructions for repatriation. Venezuelan regulations, at all times hold the vessel responsible for a seaman during his stay in the country. Close contact is maintained by radio with ship owners regarding disposition of their seamen.

TIME: GMT minus 4 hours. Permanent.

REGULATIONS:

Excessive Smoke. It is absolutely prohibited to exhaust heavy smoke through a ship's funnel while tied up at the Company's docks. It is also prohibited to blow boiler tubes. Failure to comply with this regulation will result in any or all of the following actions:

1. Vessel's discharge of ballast or loading of crude or products will be immediately shut down.
2. Vessel will be subject to fine from authorities.
3. Vessel may be removed from dock.
4. Owners will be advised of infractions of this regulation.
5. Fines, time lost, and other related expenses will be charged against the vessel.

Pollution. Venezuelan laws are very strict on this subject and local authorities quickly enforce existing statutes. For this reason each Master is handed a circular that emphasises the necessity of complying with federal and local laws and customs.

The spilling or discharge of dirty ballast, crude oil or petroleum products into coastal waters is defined as pollution, as is also the throwing overboard of garbage, trash or other unwanted objects while the vessel is at anchor or dockside. Prior to the start of loading operations all discharge valves, bilges and scuppers must be closed and strict vigilance exercised during deballasting and loading operations.

When a spill does occur, the Master, Government officials and a company representative evaluate the quantity and submit a report to the Government Petroleum Inspector. This report becomes the basis for a federal fine that is practically incontestable. An additional expense occurs when local authorities require assistance in cleaning beaches and shorelines after a major spill and can pinpoint the responsible vessel or source.

TONNAGE CERTIFICATE: Due to reciprocal agreements between Venezuela and the following countries, ships flying the flag of any of the below-named countries are exempted from Arqueo compliance and payment of fees: Denmark, Great Britain, France, Germany, Netherlands, Ireland, Norway, Portugal, Sweden, United States.

Ships bearing the flag of any other nation shall require a Venezuelan Arqueo Certificate. The cost of measuring is contingent on the size and tonnage of vessel. The certificate is usually issued after the ship sails from port. It is then sent to the marine department of the Owners of the vessel by airmail.

GENERAL:

Charts. No charts or sailing documents are available in the terminal. Same should be forwarded by airmail to the vessel's Agent for delivery to the ship.

All ship requirements such as chandlery supplies, mail, cash advances, medical, dental, consular requirements, repair work, laundry service, bonded stores, transportation etc. should be obtained through the vessel's Agent.

PETROLEUM INSPECTORS: E. W. Saybolt Company, Chas. Martin & Company, Aivepet and Redwood have resident representatives in Puerto La Cruz for independent petroleum or product inspections. Their offices are located in the dock office building located between berths Nos. 1 and 2 (second floor).

TELEPHONES: There is a telephone booth on each dock. The supervisor on duty may be contacted by calling number 308 or 906.

SHIPMASTER'S REPORT: February 1979.

Documents:

3 Copies of list of passengers or nil passengers.

3 copies of a letter by Master stating that vessel was diverted after sailing from previous port and explaining why clearance destination is wrong.

3 copies of cable ordering diversion.

Anchorages: Good holding ground in N.W. part of anchorage area, thick mud.

Restrictions: Maximum height of manifold about 18.95 m. so necessary for vessels of 140,000 d.w.t. to load some cargo before completion of ballast.

Max. Size: If draft less than 30 ft. on arrival vessel can approach berth direct from West, and use 2 tugs. If more than 30 ft. draft then vessel must use channel to the North of berth and use 3 or 4 tugs. This for vessels of 140,000 d.w.t.

VHF: Tankers call "Meneven" on Channel 16, then change to Channel 12 or 13. Also call Agents on Channel 16.

Berthing: Back springs to bollards on jetty. Breasts and heads and stern lines to hooks on dolphins. These hooks are secured to bollards by wire of circumference 19 cm. or diameter 6 cm.

Consuls: No U.S. Consul available and Agents will give Master letter to this effect for U.S. Immigration.

General: Ballast, if clean, may be pumped overside. If dirty, advise Meneven prior to arrival of quantities to be pumped ashore. They will also accept slops if not sour crude or smelling too badly.

Notice to Shipmasters:

We wish to advise the Masters of all vessels calling at this port that it is strictly prohibited to take photographs.

It is likewise contrary to regulations to carry ashore a camera. Same is liable to be confiscated by the Government Authorities.

Signed S. A. Meneven.

AGENCY:

All incoming ships to lift cargoes at this Terminal must have a local Agent to render all services required for a prompt and efficient tanker turnaround and to cancel all ships disbursements during the port stay.

S.A. Meneven as operator of the Terminal charges a fixed fee of Bs. 2,000 for General Services such as supervising the docking and undocking manoeuvres, hose connections, loading and documents required by the cargo buyers or consignee. Handling of Telexes, documents and air postage will be charged at cost.

Offices of Meneven loading and marine personnel are located on the first floor of the building between berths Nos. 1 and 2. Any matter concerning loading, bunkering, is handled through this office, which is open 24 hours of every day. On the ground floor of this same building is located the Documentation Section.

PUERTO SUCRE (Cumana): 10.28 N. 64.12 W.

(See Plan Book)

SHIPMASTERS REPORT: August 1980.

DOCUMENTS: As for Guanta. Entry formalities, normally after berthing but if at anchor will board about 0900 hours.

PILOTAGE: Pilotage is compulsory for berthing and unberthing. Pilot will anchor vessel if required.

APPROACHES: Approaching Puerto Sucre at night, the lights of the city are visible for many miles, but the light indicated at the end of the pier is non-existent, also the water tower marked on the chart with red lights is non-existent.

Two vessels were alongside when this vessel approached so the pier was clearly visible with the lights of the ships, otherwise there are no lights on the pier.

The pier indicated on the chart just North of the main pier is no longer there although at low water parts of the supports are still visible. Further North there are 3 piers, approximately half cable long, used by fishing boats. They start approximately 1 cable North and 1 cable between each, also there are car ferry terminals before the mouth of the river South of Pta. Carenero. This river mouth is undergoing extensive work which is apparently to be a fishing harbour.

A tall white building is situated in approximate position 10° 27.8′ N., 64° 11.1′ W., it has a fixed red light and an occulting red light at night. A silo is situated in approximate position 10° 26.7′ N., 64° 11.25′ W., this has 3 red lights in a horizontal line at night. There is an air light on the control tower at the airport, alternating white and green every 5 seconds, but this is only lit when an aircraft is due.

ANCHORAGE: Anchorage is limited in pilotage area "A". This vessel anchored 3 cables off the shore line and 3 cables off the pier in 30 fathoms of water, vessels also anchor two and a half to three miles S.W. of pier in 25 fathoms, however Pilots prefer vessels to use nearer anchorage.

VHF: Pilots occasionally on Channel 16, but very littenglish spoken, the ship's chandler has a VHF set and can be very helpful as he speaks very good English.

TUGS: One tug is available to assist with berthing/unberthing.

BERTHING: Vessels use both sides of the pier and ro-ro vessels tie up stern to the head of the pier. Soundings were taken around the pier (See Plan).

CARGO HANDLING FACILITIES: There are numerous fork lift trucks of all sizes, 4 mobile cranes and some small towing vehicles. This vessel had a cargo of bagged fertilizer which was discharged onto lorries and there was no shortage of these, even when working 2 ships with 10 gangs no delays were caused due to lack of transport. Ship's gear is used at all times but the mobile cranes can be hired if required.

MEDICAL: Services available.

FRESH WATER: Available using ship's hoses.

FUEL: Diesel oil is available but difficult to obtain as it has to be brought from Puerto la Cruz by road tankers.

WATCHMEN: Not available, one member of National Guard on board, requires a cabin if one available. This vessel had no spare accommodation but the guard must still be fed.

SHORE LEAVE: Permitted, but shore passes must be carried and passes returned when vessel leaves.

GENERAL: *Provisions and Laundry:* Available.

Garbage Disposal: No facilities.

PUNTA CARDON: 11.36 N. 70.15 W.

OPERATORS: Maraven, S.A.

PORT LIMITS: The area enclosed by the parallels of 11° 38′ 00″ N. and 11° 36′ 38″ N. and the meridian of 70° 14′ 25″ W.

FLAG: It is compulsory to display the Venezuelan flag at the foremast starboard yardarm during daylight hours for ships anchored or berthed in Venezuelan waters. The ships Services will provide a Venezuelan flag at any time for ship's account.

LOCATION: The port of Punta Cardon is located on the Gulf of Venezuela, on S.W. coast of Paraguana a Peninsula, Venezuela. Punta Cardon is an open sea port with practically no swell, due to the Easterly winds prevailing almost all year from the shore side.

ESSENTIAL REQUIREMENTS:

1. Incoming vessels must send ETA at least 3 days before arrival at Punta Cardon.

2. If a ship, originally cleared for another port (including any other Venezuelan port) is diverted at sea to Punta Cardon, certain information must be radioed prior to arrival in order to avoid heavy fine(s) and/or delays.

3. No dirty ballast may be pumped overside in port in Venezuelan coastal waters. Ballast disposal facilities are available at Punta Cardon Terminal.

4. The use of Venezuelan Government Pilots is compulsory for berthing and unberthing,

5. In addition to other clearance documents, 5 copies of an itemised list of articles in the ship's slop chest must be presented to the authorities on arrival.

6. The emergency fire signal is 5 long blasts on the ship's whistle or siren. No other signal is to be given in cases of emergency.

7. Rat-guards must be placed on all mooring lines.

DOCUMENTS: Clearance (inward pratique). Inward clearance is effected on board by Government Port and Customs Officials and a representative of the Oil Movements Department immediately after berthing. The following documents must be ready on arrival:

(1) In ballast:

*(a) Clearance from Last Port (1 copy).
*(b) Ballast Manifest from Last Port (1 copy).
(c) Crew List (7 copies).
(d) Steward's Store List (all foodstuff, liquors, tobacco, etc.), to be declared on a separate and independent sheet (5 copies, see note (2)).
(e) Deck and Engine Stores and Spare Parts List (paints, varnishes, chains, ropes, etc.), to be declared on a separate and independent sheet (5 copies, see note (2)).
(f) Medicine Chest Lists (including narcotics accurately itemised) (5 copies).
(g) Slop Chest Lists (5 copies).
(h) Personal Effects Lists (4 copies).
(i) Sailing Permit (issued by Maritime Authority at Last Port of call) (1 copy).
(j) Passenger and Baggage Lists (if any) (2 copies).
(k) List of Passengers in transit (if any) (4 copies).

* Documents marked with asterisk are to be visaed by Venezuelan Consular Authorities at the last port of call.

In the absence of a Venezuelan Consul the documents must be visaed by the Consul of a friendly nation, or by the Local Chamber of Commerce, or by 2 local reputable businessmen, whose signatures shall be notarised.

In the absence of a Venezuelan Consul the following notation should be written in Spanish on each document signed by the alternates designated above.

"Por no existir en la localidad Agente Consular Venezolano y a peticion de los embarcadores, certifico el presente documento".

(Signature)

(2) Both the Steward's Store List, the Deck and Engine Stores and Spare Parts List may be prepared on board prior to the vessel's arrival. However, if the vessel is dispatched from the colonial Antilles or Guianas, these lists as well as the personal Effects List must be visaed by the Venezuelan Consul at the port of departure. The Steward's Stores List must be comprehensive and accurate, especially with regard to cigarettes and liquor. All new clothing, gift, souvenirs, etc. are to be clearly marked. All personal effects of the crew are to be collected and placed in the Bonded Stores Locker, ready for sealing by the Customs Authorities on arrival.

Although vessels proceed directly to Punta Cardon, clearance documents should be made out showing the port as "Las Piedras, Paraguana (Punta Cardon)". Failure to comply with this requirement may result in fines up to a max. of U.S. $600.00.

(3) Clearance documents out-bound: Outward clearance and cargo documents are delivered on board by the Ships Services Representative.

In the event that the berth is required by another vessel, a vessel having completed loading may be required to vacate the berth promptly and proceed to anchorage to await cargo documents and clearance.

PILOTAGE: Pilots are employees of Venezuelan Government and pilotage is compulsory for vessels entering or leaving harbour. The Ships Services Office will arrange for this service at any time. If it becomes necessary for Master of the vessel to disregard Pilot's orders in order to ensure safety to the ship, the Master must promptly submit a written report to the Harbour Master on the matter, via the Ships Services Representative, stating reason for this action.

Pilots sustaining injuries: It is compulsory to submit a full report in cases where a Pilot is injured while performing duties on board vessels.

ANCHORAGE: The anchorage at Cardon roads within a radius of 2 miles from end of jetties has depths varying from 54 ft. to 100 ft. (LWS) and a bottom consisting of mud with some patches of small stones, sand and shells. There are no known obstructions from West to N.W. of the Piers and there is ample water for a clear approach when coming from West and N.W., but the anchorage is limited on the South by a sandspit projecting 1 mile S.W. off Punta Cardon Cape. A beacon is located on this Sandspit in position: Lat. 11° 36′ 03.4″ N., Long. 70° 14′ 15.6″ W. Fl.R. ev. 1 sec. 17 ft. 5 miles (U).

APPROACHES: Restricted Fishing Area. Masters when approaching coast should keep a particularly sharp lookout for fishing boats, nets and small craft.

Mechanically propelled vessels drawing more than 5 ft. are prohibited from navigating in the restricted fishing area that extends off Paraguana Peninsular from Punta Macolla, Lat. 12° 5′ 32″ N., Long. 7° 12′ 55″ W. to

Punta Estanques (Los Taques), Lat. 11° 48′ 45″ N., Long. 70° 16′ 45″ W., and a line connecting the position indicated below:

(a) Lat. 12° 07′ 40″ N., Long. 70° 14′ 25″ W.
(b) Lat. 12° 03′ 15″ N., Long. 70° 19′ 23″ W.
(c) Lat. 11° 49′ 25″ N., Long. 70° 21′ 50″ W.

Leading Lines

	Position			*Height in Metres*
Jetty	*Latitude* N.	*Longitude* W.	*Colour*	*(LWS)*
I	11° 37′ 19.2″	70° 13′ 54.6″	Green	4.70
	11° 37′ 23.1″	70° 13′ 47.6″	Green	14.20
II	11° 37′ 32.0″	70° 14′ 02.0″	Red	4.83
	11° 37′ 35.9″	70° 13′ 55.1″	Red	14.30
III	11° 37′ 08.1″	70° 13′ 53.5″	White	3.06
	11° 37′ 09.1″	70° 13′ 50.6″	White	14.94
IV	11° 37′ 41.9″	70° 14′ 12.0″	Blue	5.10
	11° 37′ 42.4″	70° 14′ 09.4″	Blue	21.54

Land Marks

2 radio towers, very conspicuous, with micro-wave antenna at the middle painted in aluminium white, in position, Lat. 11° 38′ 03″ N., Long. 70° 13′ 56.2″ W. Height 205 ft. (62.5 m.).

Navigation aids

A light is located on the outer radio tower.

Position: Lat. 11° 38′ 03″ N., Long. 70° 13′ 56.2″ W.

Characteristics: Fl. White and Red, ev. 10 sec. Height 205 ft. (62.5 m.) 21 miles (U).

Sectors: Red 340° – 009°, White 009° – 009°, Eclipsed 202° – 340°. (All bearings are true from seaward).

Beacon: Located on sandspit of Punta Cardon.

Position: Lat. 11° 36′ 03.4″ N., Long. 70° 14′ 15.6″ W.

Characteristics: Fl. Red. ev. 1 sec. Height 17 ft. (5.2 m.) 5 miles (U).

2 large chimneys are very conspicuous in the Refinery Area. The North chimney is situated Lat. 11° 37′ 54.6″ N., Long. 70° 13′ 10.8″ W. Height above MLWS 399.6 ft. (121.8 m). The South chimney is situated Lat. 11° 37′ 52.9″ N., Long. 70° 13′ 09.8″ W. Height above MLWS 396.3 ft. (120.8 m.). For daylight distinguishing marks, both are painted with broad red and white bands and at night both have a string of all round fixed red lights at the top and the same at the middle height.

A steel tower. A commercial radio tower is situated outside the Refinery Area in position: Lat. 11° 36′ 29″ N., Long. 70° 13′ 42″ W. Height above MLWS 164.7 ft. (50.2 m.). This is not very visible during the day, but at night it has at the top, flashing every second, an all round Red Light, visible at 12 miles.

MAX. SIZE:

	Jetty/Berth		*Depth LWS*	*Draft*	*Length in feet*	*Displac. in tons*
No. 1	North Outer	(3)	42′ 00″	39′ 06″	710	25,000
	South Outer	(4)	42′ 06″	40′ 00″	710	25,000
	North Inner	(1)	31′ 06″	30′ 00″	575	25,000
	South Inner	(2)	32′ 06″	31′ 00″	575	25,000
No. 2	North Outer	(3)	43′ 00″	40′ 06″	710	25,000
	South Outer	(4)	41′ 06″	39′ 00″	710	25,000
	North Inner	(1)	21′ 00″	19′ 06″	424	25,000
	South Inner	(2)	23′ 00″	21′ 06″	424	25,000
No. 3	North Outer	(3)	47′ 00″	44′ 06″	900	62,000
	South Outer	(4)	48′ 00″	45′ 06″	900	62,000
No. 4	North Outer	(3)	47′ 06″	45′ 00″	900	54,000
	South Outer	(4)	47′ 06″	45′ 00″	900	54,000

TUGS: 2 tugs of 1,200 h.p. and 1,600 h.p. respectively are available, and their assistance is compulsory for berthing. Number, disposition and manoeuvres of tugboats are directed by the Pilot. The following tug signals in practice in this port are listed below for Master's guidance:

Short blasts are used to give orders to the tug situated ahead.

Long blasts are used to give orders to the tug situated aft.

1 blast means *push* tug engine, ahead (if it is stopped); *stop* tug engine, stop (if it is moving).

2 blasts, *pull* tug engine, astern.

1 long, 1 short, 1 long and 1 short whistle, "Calling tugs".

2 long and 2 short whistles, "Tugs Dismissed".

RADIO: Arrival messages (ETA). Master of vessels bound for or diverted to Cardon are requested to radio the following information to "Maraven. Caracas" via "La Guaira Radio", call sign YVG, 72 hours in advance of estimated arrival, or as soon as possible.

(a) Name of vessel
(b) Flag
(c) ETA
(d) Last Port.
(e) Master's name
(f) Number of crew and passengers
(g) Port for which the vessel is cleared
(h) Quantity of clean ballast on board
(i) All requirements

This information is of the utmost importance to the Harbour Authorities in facilitating the entry of vessels in general, and in case of diversion.

VHF Radio Telephony. The radio and communication centre is located in the Oil Movements Office Building situated at the foot of No. 2 Pier at a height of 50 ft. above sea level. The roof of the building is painted black and the word "Marine" painted across in large white letters.

There is an RT set operating 24 hours a day on the following frequencies, and manned by English speaking operators:

156.6	mc/s	FM	VHF	(Channel 12)	Range	limit	25 miles
156.8	mc/s	FM	VHF	(Channel 16)	,,	,,	25 ,,
2120	kc/s	AM	HF		,,	,,	150 ,,
2182	kc/s	AM	HF	(Channel 1)	,,	,,	150 ,,
7620	kc/s	(SSB)	HF	(Channel 3)	,,	,,	300 ,,

Call sign: "Marine Cardon".

Vessels not equipped with radio telephone may call the installation by signal lamp (Aldis lamp) whereupon the service launch will be sent out to vessel to pick up any message it may have.

BERTHING: Without exception ships always moor head-in on all berths. It is considered prudent to have the outboard anchor hove out prior to approaching piers to facilitate speedy release while docking if necessary. Vessels are to be moored to satisfaction of the Port Services Superintendent or his deputy; mooring lines must be tended regularly and kept hove taut to prevent surging and possible damage to ships, docks or hoses. When adjusting mooring lines, the assistance of harbour tugs should be requested before slackening off any mooring line.

BALLAST: It is suggested that vessels nominated to load at this installation arrive with the minimum of ballast on board, necessary for the safe handling of the vessel under normal conditions. In this connection experience has shown that, under normal weather conditions, vessels can be safely berthed and unberthed with a quantity of ballast of approximately 20% of their respective Summer deadweights. Clean ballast can be pumped into the sea, but Masters are reminded that pollution of the sea incurs heavy fines. Dirty ballast can be received ashore. Maximum discharge pressure to shore installation is 150 p.s.i. in the 20 in. ballast line of Jetty No. 2; Jetties Nos. 4 and 1 have a 24 in. ballast line, and Jetty No. 3 has a 16 in. line. Masters are requested to endeavour to arrive at this port with 20% SDW ballast.

MEDICAL: Facilities are available for medical and dental treatment, vaccination and hospitalisation in a private clinic.

The doctor's working hours for out-patient treatment are as follows: Monday to Friday, 0900 to 1100 hrs., 1400 to 1700 hrs. Saturdays, Sundays and holidays, only urgent cases will be attended to.

Emergency cases will be attended to at all times.

Masters requiring medical or dental service or vaccination for their crew members should call Ships Services by dialling 2105. Our representative will make the necessary arrangements with the clinic and arrange for transportation to pick up the crew members on the pier and to take them to the clinic and back. Any crew member who is sent ashore for medical or dental treatment, and who does not speak English or Spanish, must be accompanied by a crew member who speaks one of these languages.

Doctors do not attend patients on board. In serious cases where the patient is unable to walk an ambulance will be provided to take him to the hospital.

FRESH WATER: Fresh water is available at all berths. Loading rate is 30 t.p.h.

FUEL: Available if advance notice given. Funds at to be remitted to Chase Manhattan Bank, One Chase Manhattan Plaza, New York, 24 hours in advance to Maraven S.A. (Account No. 001-1-992773).

CUSTOMS: Venezuelan National Guards are stationed at the piers to ensure that vessels in port comply with regulations.

1. *Smuggling.* Strict compliance with the Customs laws of the country is enforced by the Authorities and Masters are strongly advised to caution crew members against attempting to smuggle ashore cigarettes in carton lots, cigars, tobacco, souvenirs, gifts (particularly items of women's apparel) or other articles. A maximum of twenty cigarettes per person for personal use is allowed to be carried but a greater quantity will result in the imprisonment of the offender with possible heavy fines and delay to the vessel.

2. *Bar.* On Customs Authorities instructions vessels maintaining a "Bar Service" on board for the use of officers, crew, passengers and visitors, must keep the bar closed during the vessel's stay in port.

3. *Firearms.* Firearms on board any merchant vessel calling at Venezuelan ports must not exceed one per officer, nor can the ammunition exceed 18 cartridges per officer. All firearms and ammunition must be declared on stores list. Officers must not carry firearms while ship is in Venezuelan waters. Said arms should be collected together with the ammunition and held in the Master's safe custody. Crew members should be warned against taking knives or other weapons ashore as these will be confiscated and the bearer fined.

CONSULS: Brazil, Great Britain, Italy, Netherlands and Norway have Consular representatives in this area.

TIME: Local time is GMT minus 4 hours.

CERTIFICATES: All ships arriving in Venezuelan ports for the first time must be measured by the Maritime Authorities for issuance of a Venezuelan Tonnage Certificate, known as "Certificado de Arqueo". This document gives the measurements and weight of the vessel in accordance with existing laws. The cost of measuring and issuing of the Certificate is contingent on size and tonnage of vessel.

It is usual practice to take ashore the ship's "General Arrangement" and "Capacity" plans, which are used as a basis for calculations. These plans and the Venezuelan Tonnage Certificate are later forwarded to ship's Owners.

Vessels registered in following countries are exempt from above regulations, due to existing reciprocal agreement with Venezuela: U.S.A., Great Britain, Denmark, France, Germany, Netherlands, Ireland, Sweden, Norway, Portugal.

The Venezuelan Tonnage Certificate is used in calculating Venezuelan Government Port charges, such as Port Captain Habilitation for entry and despatch of vessels and Pilotage Dues, for all vessels except those registered in the countries mentioned above, in which case the Lloyd's Registered Tonnage is used.

HOLIDAYS: By order of the local Port Authorities it is requested that all ships in port be fully dressed on the following national holidays: January 1st, April 19th, July 5th, July 24th, October 12th, December 25th.

REPAIRS: Shore facilities are available for emergency repairs of a minor nature. The nearest dry docks are located at Puerto Cabello and Curacao, N.A. Request for repairs should be mentioned in the ship's ETA message.

SHORE LEAVE: Shore leave is permitted and Harbour Master's representative who boards vessel on arrival issues the required number of shore passes. These passes must be shown when proceeding ashore to the Government and Company Guards at the gangway and refinery gates. They are to be collected by Master prior to sailing and handed to Pilot unberthing the vessel. Masters are reminded that in accordance with the instructions of local police, crew members be properly dressed before leaving the vessel, i.e. long trousers and shirts.

Masters are requested to have shore leave expire at least 2 hours before expected departure. Men then found missing should be reported to the Ships Services Office, tel. 2105, who will endeavour to locate them. An officer must accompany shore personnel in order to identify the missing crew member.

Vessels are not permitted to sail until all crew members are on board, unless said crew members are hospitalised or previously signed off by the Master through the Ships Services representative. If any crew member is missing at sailing time and cannot be found, his passport and other personal documents must be handed to the Ships Service representative, as well as written instructions as to his repatriation, when found. All costs and expenses of a crew member so left behind will be for ship's account.

GENERAL:

1. *Animals:* The importation and transit of all birds belonging to the genus parrot or parakeet is prohibited. For other birds a valid health certificate is required. For so-called "small animals" e.g. dogs, cats, monkeys, rabbits, etc. a valid health certificate and a valid rabies vaccination certificate are required.

2. *Bonded Stores:* Stores in bond are not obtainable in Punta Cardon. The nearest port with bonded stores facilities is Curacao.

3. *Board of Trade Gangway:* A safe gangway must be provided by the vessel and should be rigged as soon as possible after mooring to allow the Port Authorities to board, and should not be taken in until Pilot has boarded to unmoor vessel. The use of rung ladders, pilot ladders, etc. is contrary to Port Regulations and Port Authorities will not board except by means of a safe gangway or accommodation ladder.

4. *Damage during Manoeuvres:* When a vessel or the pier sustains damage during manoeuvres with an official Pilot on board, it is the responsibility of the Master to submit to the Ships Services representatives, immediately after the accident, a report in quintuplicate, for presentation to the Harbour Master. Such reports should give full details of the accident and of all engine movements as ordered by the Pilot, as well as a sketch in triplicate of the ship's manoeuvring position at the time. These will be translated by the Agents into Spanish and forwarded to the Harbour Master.

5. *Cash Advance to Masters:* Cash advances to Masters are made only in Venezuelan currency, which is the Bolivar. Cash requirements should be included in the vessel's ETA message. Foreign currencies are accepted in the United Seamen's Service Club.

6. *Rat-guards:* By order of the Port Authorities rat-guards must be fitted to all mooring lines. Non compliance entails a fine of 200 Bolivares for each unguarded line.

7. *Kerosene, Motor Gasoline, Gas-Oil, Solvents:* Supplies for ship's purposes are available in drums. The return of empty drums ashore is prohibited by Customs regulations. Therefore the cost of each drum will be billed to the vessel in the Port Disbursement Account.

8. *Lubricants, Oils and Greases:* Supplies of products are available. Vessels arriving at Punta Cardon on Saturday or Sunday or on a holiday should give ample notice of their requirements by cable in order that the necessary labour arrangements for delivery can be made. This procedure also applies to the delivery of white oils mentioned under 7 above, when required outside working days.

9. *Laundry Service:* Laundry service is available throughout each working day. Such service should be requested in the vessel's ETA message.

10. *Wireless Transmitters in Port:* It is strictly prohibited to use vessel's wireless transmitters in the Port of Cardon. Non-compliance with this regulation may result in a fine being imposed on the vessel by the authorities.

11. *Mail:* On vessels' arrival, blank Mail List Forms will be handed to the Master to be completed in sextuplicate and duly signed by him, when sending ship's and crew mail ashore for posting. Ship's mail received after ship has sailed, or for vessels on which no advice has been received, will be held for 15 days and then returned by airmail to the owners or operators or senders, at ship's expense unless specific instructions have been received beforehand.

12. *Marine Surveyors:* Both the Lloyd's Agents at Maracaibo and Norske Veritas at Caracas have a representative in Punta Cardon who acts on their behalf when a surveyor is requested. However, in the case of continuous or classification surveys, advance notice of 4 days should be given in order to arrange for an appointed surveyor to come from Caracas. There is also a representative of the American Bureau of Shipping in this area (Caracas).

13. *Miramar Club:* Masters, chief engineers and their wives can visit the Miramar Club. For this purpose entrance passes should be requested from the Ships Services Office, tel. 2105.

14. *Manaure Bathing Beach:* The above mentioned bathing beach is open to all ship's staff and crew members.

15. *Norwegian Government Seamen Service:* A Norwegian Vice Consul and Welfare Officer is stationed at Punta Cardon, and provides the usual services to seamen of this nationality. His telephone number is 4359.

16. *Navigation Charts:* Navigation charts are not available at this port.

17. *Passengers:* Movement of passengers over Cardon Piers is subject to restriction under terms of agreement with the government. Passengers will not be permitted to disembark unless in possession of the required Venezuelan visa and travel documents. If passengers are carried, Master should so advise in his radio ETA so that arrangements can be made for Immigration Authorities to visit vessel on arrival and thus facilitate clearance.

18. *Petroleum Inspection:* Charles Martin & Co., and E. W. Saybolt, petroleum inspectors, are available in this area. Contact can be made through the Loading Supervisor (tel. 2821).

19. *Personnel – Seamen Left Ashore:* In the case of seamen left ashore for hospitalisation, repatriation, desertion or other reasons, all documents and personal effects are to be handed to the Oil Movement Department's representative before sailing. A letter is required from the Master advising the maximum advances, if any, to be made to the seaman, and instructions concerning his repatriation. All expenses incurred by seamen left ashore, including cost of repatriation, are for ship's account. It is important that Masters bear in mind that the Venezuelan law will at all times hold the vessel, her Master, or Owner responsible for any seaman left behind in Venezuela.

20. *Photographing:* The taking of photographs within the boundary fence of the Cardon Refinery is prohibited. Taking cameras ashore is likewise prohibited.

21. *Provision and Stores:* Provisions and stores are available. Requisitions should be conducted through the Ships Services Office. Telephone number 2105 or the Ships Services representative when he calls on board with the authorities on arrival. Ships chandlers are not permitted to visit ships, unless specifically instructed to do so by the Agents.

22. *Radar and Radio Repairs:* Repair and maintenance services for radar, radio, gyro compass, radio direction finder, echo sounder, etc. are available. The repair man should be contacted through the Ships Services Office, telephone number 2105.

23. *Safety of Personnel:* It will be appreciated that persons intoxicated by alcoholic drinks can create risks of accidents; therefore we ask the Master's co-operation to ensure that these persons do not enter the refinery gates and/or board their vessel unless accompanied by sober members of their crew. In this connection we will advise the Master or one of his officers, so that measures can be taken to ensure the safety of the forementioned person(s) e.g. by sending one or more of the crew to the gate to accompany him (or them) to the ship.

24. *Visitors:* Visits to ships are prohibited except from those company employees, petroleum inspectors, etc., whose duties require their presence on board.

25. *Walport Film Exchange:* Subscribers to the Walport service may exchange films at the U.S. Seamen's Club situated at the foot of No. 2 Pier, from 0730 to 2200 hrs. every day, by telephoning 2803.

26. *Staff and Crew Changes:* No staff and/or crew should be engaged or discharged without consulting Ships Services (telephone 2105). In case of discharge, identification documents must be handed to the Ships Services representative or the Norwegian Consular Officer in the case of Norwegian vessels.

27. *Tank Cleaning and Mopping:* Several contractors in the area provide labour for tank cleaning and mopping. Masters in need of this service should submit their requirements to the Ships Services Office (telephone 2105), who will contact and request a contractor to go on board to discuss details and estimate costs of work to be effected. It must be pointed out that the Master of the vessel is solely responsible for the proper fitness of the ship's tanks for loading his next cargo, and will therefore be held liable for any contamination of the cargo after loading, due to inadequate tank cleaning. Therefore it is up to him to decide the degree of tank cleaning necessary. He may, of course, seek advice from the installation representative in this respect, whenever there is any doubt.

28. *Turnaround:* To promote the economical operation of their vessel, Masters are requested to co-operate with installation representatives in minimising their in-port time. Any delays which are considered unnecessary or extensive should be reported to the loading Supervisor (tel. 2133) so that corrective measures can be taken.

29. *U.S.S. Club:* All seamen are welcome to the club operated by United Seamen's Service which is located at the shore end of Pier No. 2. Shore passes are required to reach this Club. Beer, soft drinks, ice-cream, candies and various souvenirs and presents can be purchased at reasonable prices. Free cinema shows are usually held twice weekly. A letter-posting service is available as well as recreational facilities, e.g. billiards, table tennis, darts, etc. A barber shop operates during daytime.

TELEPHONES:

Communications Office (General and Port Information, 24 hours service), 2604. Ships Service Office (All services to ships: mail, doctor, taxi, papers, etc., 24 hours service), 2105. Agents Office (Weekdays) (0700 to 1200 – 1300 to 1600 hrs.), 2125. Loading Supervisor (Re cargo and bunkers), day, 0700 to 1600 hrs., 2821/2133; at night, after 1600 hrs., 2133. U.S.S. AUTHORITY: Maraven, S.A.

Vietnam, Socialist Republic of

DANANG: (Tourane): 16.04 N. 108.13 E.

(See Plan Book)

SHIPMASTER'S REPORT: 1976.

DOCUMENTS: On arrival usually dealt with immediately by the: Immigration Service, Police Service, Customs Service, Agency and Health Service.

Ships Documents: Certificate of Registry, Radio Certificate, Load line Certificate, Safety Equipment Certificate, Port Clearance from last port.

Cargo-Documents: Bill of Lading (8 copies), Cargo Manifest (8 copies), Stowage Plan (5 copies), In Transit Cargo Manifest (if any).

Immigration: Crew List (7 copies), Store List (2 copies), Crew's Effect Declaration (2 copies), Passports of the Crew.

Health: Vaccination List (2 copies), Provision List (2 copies), International Vacc. Certificates.

All documents to be ready on arrival. Cameras and binoculars to be collected and placed in a locker, to be sealed. Bonded stores not sealed.

PILOTAGE: Pilot station at a position 16° 10′ N. 108° 11′ E. Pilot boards from a tugboat and moves the ship to a position about one mile West of Phare de l'observatoire. Pilot boarding during daytime only. Ships arriving at night should anchor in a position close to the pilot station. Pilot will board the ship at 0600 hrs. in the morning. ETA should be given 48 hours and 24 hours prior to arrival at the pilot station.

RESTRICTIONS: There are no restrictions for entering the bay.

HEALTH: A 24 hours cable should be sent to the Agent, stating that all crew are fit and healthy. If any sickness on board cable 48 hours in advance.

RADIO:

Callsign	*Frequency*	*Working hours GMT*
XVT	500 kc/s.	0001 – 1200 hrs.
XVT 2	417.5 kc/s.	0001 – 1200 hrs.
XVT 2	8,570 kc/s.	0130 – 0145 hrs.
		0830 – 0845 hrs.
		1200 – 1315 hrs.

VHF: There is no VHF station.

RADAR: There is no radar post.

TUGS: There are three tugboats available, one of 1,200 h.p., two of 800 h.p. each. Tug's lines are used if necessary.

BERTHING: There is one fingerpier of 250 m. and another under construction. The latter to be ready towards the end of 1976. A tanker berth is situated in position 16° 04′ N. 108° 15′ E. called My Khe. Tankers proceed to this position, after clearance, with Pilot rounding by the peninsula. (See Plan). At the cargo pier all discharging is done by ship's gear.

CRANES: There are no cranes available. There is one heavy lift Floating Crane of 100 tons capacity.

BULK HANDLING FACILITIES: Bulk cargoes are sometimes handled at the port (i.e. maize) but there are no special facilities.

BRIDGES: No bridges.

STEVEDORES: Ordered by the Agent. No ETA necessary. Working hours 0001 – 0400 hrs., 0800 – 2400 hrs. Approx. discharging rate general cargo 400 tons/gang.

MEDICAL: Six hours notice required for medical assistance. There is a hospital in town. Inoculations required for cholera, smallpox and yellow fever.

TANKERS: Two submarine hoses of 8 in., all kinds of white spirits discharged through both lines. Maximum back pressure 8 kg. at ship's manifold. Average discharging rate 200 t.p.h. per line.

DENSITY: Cargo pier brackish depending on the season. At the tanker berth salt.

FRESH WATER: Available by barge, rate of delivery 50 t.p.h.

REPAIRS: Repairs taking longer than 2 hours are not permitted unless permission is granted by the Port Master. Small repair facilities can be carried out ashore. There are no drydocks at this port.

DECK WATCHMEN: Cargo ships alongside the pier are provided with a gangway watch. Tankers discharging at My Khe will have two security guards on board during the stay in port.

HATCHES: Old type hatches opened and closed by shore labour. Special patent hatches by crew.

CUSTOMS ALLOWANCE: The bonded stores are not sealed. There are no restrictions for quantity of spirits, cigarettes beer etc. It is strictly prohibited to supply any bonded stores to shore personnel.

CARGO GEAR: There is one floating heavy lift crane of 100 tons.

REPATRIATION: Possible, but takes some time and can be very difficult. Haiphong is a better place for crew changes.

AIRPORT: There is an airport about 7 km. from the town. Air services to Ho Chi Min City and Haiphong, local flights only, twice a week.

TIME: GMT plus 7 hours (no Summertime) is kept along the whole coast.

HOLIDAYS: There are no special holidays.

POLICE/AMBULANCE/FIRE: Via local Agent, telephone number 21161.

SERVICES: There are laundry facilities (2 days ashore) with a 24 hours service. Shipchandler available at all times. Good fresh vegetables and fruits, depending on the season. Also good sea food.

SHORE LEAVE: Permitted via local Agent with 6 hours notice. Persons with invalid passport are not allowed to go ashore.

REGULATIONS: It is strictly prohibited to throw any garbage into the bay, heavy fines. Garbage collected by barge.

DELAYS: Remittance has to be granted by owners or charterers before sailing. Without a sufficient remittance the vessel does not receive a clearance.

Alongside the pier berthing and unberthing only between sunrise and 1400 hrs. due to strong winds in the afternoon. At any other time when strong winds are experienced berthing and unberthing not allowed. The fore mentioned also for the tanker berth at My Khe, here berthing is normally carried out during the morning hours, when there are weak winds. During a strong monsoon it is sometimes necessary to stop discharging operations and unberth the ship.

GENERAL: Ships calling for the first time at Danang port should give their ETA and call sign, nationality, all other necessary particulars so that the ship can be identified by the Navy. Ships, chartered by the Vietnamese Government should state this also and whether time or voyage charter. Ships carrying general cargo should also give all particulars about the stowage of the cargo, whether any deck cargo, heavy lifts etc.

AGENTS: Ocean Shipping Agency, 1a Quang Trung, Danang. Cable: OSA Danang, telephone 21161.

SHIPMASTERS' REPORT: September 1980.

DOCUMENTS: See "General".

PILOTAGE: Compulsory. Pilot boards in position 16° 10′ N., 108° 11′ E. Notice required 24 hours. Daylight only for berthing except in cases of emergency.

ANCHORAGE: In the Bay of Tourane; depth up to 19.0 m.

RESTRICTIONS: No restrictions in the bay and anchorage, depth of water up to 19.0 m.

RADIO: Danang Radio.

VHF: Pilot on Channel 16.

TUGS: Two tugs available; 1 of 1,200 h.p., the other being used for barge work only.

BERTHING: Location 16° 07.1′ N., 108° 12.6′ E. Two piers available. Distance from sea to berth 4 miles. Max. size permissible: LOA 190 m., beam 26 m. and deepest draft 11 m. Least depth of water in channel from sea to berth 13.0 m. Mean tidal range at berth 0.5 m. Nature of bottom at berth – mud and sand. Average density 1016.

Cargo Handling Facilities: No bulk handling facilities or quay cranes available. There is a quarter ramp for Ro/Ro vessels and a 50 ton floating crane. Security is good as armed police are on duty throughout the vessel's stay. There is adequate storage space for break bulk and palletised cargoes. No container handling facilities. Stevedore gangs are available as required and work throughout 24 hours except for meal breaks.

BARGES: There are steel barges of various sizes which are towed by tugs.

SERVICES: The following are available: Fresh water; fresh provisions; minor repairs facilities; airport with internal flights only; laundry services; bunker fuel oil; diesel oil; lubricating oil; doctor and hospital; groceries and meats.

GENERAL:

Officials boarding on arrival with Pilots:

Two armed police who remain aboard during vessels stay at anchor.

Officials boarding when vessel anchored:

Agent and assistant.
1 Customs Officer.
1 Immigration Officer.
1 Agriculture Inspector.
2 Quarantine Inspectors.
2 Security Officers.

Documentation:

8 Crew Lists.
2 Stores Lists – Deck, Engine and Provisions.
2 Crew Customs Declaration Lists.
2 Currency Lists for foreign money in Crew's possession.
2 Bonded Stores Lists.
1 Health Declaration.
2 Crew Vaccination Lists.
All Vaccination Certificates.
4 Copies of Bills of Lading.
7 Copies of Cargo Manifest.
2 Copies of Cargo Manifest – Cargo in Transit.
1 Form (Supplied) for Ships Sextants, Binoculars, Cameras, etc.
1 Form (Supplied) for Arrival Details and Times.
All discharge books (passports of Officers wives collected for safe keeping ashore).

Restrictions:

Main and Emergency Transmitters sealed.
Storno's (Walkie Talkies) sealed.
Cameras sealed.
Bond sealed.
Inspection of all Cabins on arrival.

General:

Vessel on 4 hours notice at all times for sailing or shifting berth. Although bond sealed release of spirits available at any time from Customs.

Very strict on cigarettes with issue of only 200 per week per person. Shore passes issued to all personnel. Shore leave very restricted but bus service available to Seaman's Club nightly from 1800–2130 hrs. accompanied by a guard.

Maximum of 20 cigarettes per person for shore leave.

Seaman's Club takes sterling (£5 notes and above only) and U.S. dollars.

One sight seeing tour was to have been arranged this call but cancelled due to adverse weather conditions. (Limited number of cameras would have been available on this occasion).

Remittances from owners take at least 1 month before any cash is made available.

One typoon warning received this call when vessel had to vacate berth and proceed to anchorage.

One emergency vacation of berth at 0300 hrs. this call when heavy swell built up alongside pier.

On departure full inspection of cabins and personnel, discharge books (passports of Officers wives returned). Shore passes collected. No mail received this call due 1 month delivery time. No restriction on bond for coastal passage Danang to Haiphong.

HAIPHONG: 20.52 N. 106.41 E.

SHIPMASTER'S REPORT: 1976.

DOCUMENTS:

8 Crew Lists.

2 Ships Stores Manifests.

2 Crew Personal Effects Declaration (especially: cameras, binoculars, and Foreign Currency).

2 Vaccination Lists: smallpox and cholera. All International Vaccination Certificates. All Passports (are taken in custody by Security Officials).

Special Documents: Special forms which are handed to vessel on arrival.

Health Dept:

1 Declaration of Health on arrival.

1 List of Provision Store (incl. vegetables, fruits, fish, shellfish, meats etc. and where taken).

1 Report of water taken on board: (Drinking — or Ballast water, tons, ports where taken) — tank now being used to supply drinking water.

State Security Dept.:

4 Copies List of Articles forbidden to be used in port: ie. radio transmitter/receiver — Numbers and power; radar; VHF; radio direction finder; echo sounder; sextant, signal gun, signal rockets, flare signals, arms, ammunitions, cameras, binoculars, tape recorders, band recorders.

Note: The radio transmitter, VHF, radar, binoculars, cameras are sealed.

2 Copies: Declaration of Arrival.

Note: Cameras, binoculars of the crew have to be collected and placed in a locker which is sealed. Bond is *not* sealed, and consumption is free.

PILOT: Boards at ZERO buoy.

Note: There is no VHF radio contact possible and there is no signal station available, ETA should be given as exact as possible.

RESTRICTIONS: Max. draft to enter: 25 ft. (HW).

If ship's draft is more than 25 ft. ship has to lighten into lighters. This is done in Baie d'Halong. The procedure is that after embarking the pilot at Zero buoy, the ship is brought to this bay (in daylight hours only) via: Bai de Lan Ha – Entree Profonde – Rade du Crapaud – Chenal du Volta – Chenal de la Cathedrale.

In our case we anchored in Chenal de la Cathedrale; 20° 52′ N. 107° 03′ 06″ E. and discharged our gas oil cargo into tanker barges varying in size from 125 – 400 long tons. Some coastal tankers (1,500 – 2,000 long tons) are also available for accepting the cargo.

When discharging into lighters – ship should provide suitable hoses.

GENERAL: 1. Ship was cleared by authorities at this anchorage. In view of the distance to Haiphong – 5 hours by motorboat – this clearance is only given in daylight hours. Often the ship's Agent stays on board during cargo operations.

2. Because the radio transmitter is sealed, no direct contact with the outside world is possible. All messages for the Agents at Haiphong should be given to the lighters going there.

3. Medical assistance: A doctor and Hospital is available in Hongay – on the other side of the Baie d'Halong. The doctor inspects the patient first on board before permission to go ashore is given.

4. Outward clearance: Same procedure as inward clearance. Authorities come by motorboat from Haiphong (boat leaves there at about 0600 hrs. and arrives in Halong Bay at about 1100 hrs. Passports are handed back to crew.

5. On inward as well as on outward clearing, crew has to stay in their cabins for inspection by customs and security officials.

AGENTS: Vietnam Ocean Shipping Agency, 11 Dai 1ô Tran Phu, Haiphong. Phone: 166-245-513. Telegrams: VOSA Haiphong.

SHIPMASTER'S REPORT: April, 1979.

PILOTAGE: Boarding position: 20° 41′ N., 106° 58′ E.

The pilot boat is a 25 m. long steel vessel with white hull and superstructure. A Vietmanese flag is printed on the white funnel.

The Pilot boarded without notice, also the Agent (VOSA) did not reply to any cables requesting information. Pilotage carried out during night time only in the Winter.

Two soldiers board with the Pilot and if vessel is to anchor for lightering the Pilot and soldiers remain onboard.

BUOYS: The marking of the channel by buoys is good, but for day time only. At night the lights are poor and vessels have to keep a good lookout for them.

CUSTOMS: Bond is sealed when the vessel is alongside. Very strict allowance for cigarettes.

SHIPMASTER'S REPORT: October, 1980.

DOCUMENTS: See 'Shipmaster's Report' for Danang dated September, 1980.

PILOTAGE: Compulsory. Pilot boards in position 20° 41′ N., 106° 58′ E. 24 hours notice required.

ANCHORAGE: The inner anchorage is between the outer bar and the channel cut, depth at LW 8 m.

RESTRICTIONS: It is not advisable to enter or leave during hours of darkness as there are only a limited number of lights and buoys.

MAX. SIZE: Max. LOA 200 m., beam 26 m., draft 7.5 m. Lightening facilties are available at Baie D'Halong for vessels with draft of up to 10 m.

HEALTH: Quarantine Authority require 24 hours notice of arrival.

RADIO: Haiphong Radio handles vessels traffic.

TUGS: Available. 1×600 h.p., 1×500 h.p.

VHF: The Agency (Vietnamese Ocean Shipping Agency – VOSA) on Channels 6 and 16. They will forward messages to the Pilot.

BERTHING: Berth situated in position 20° 52′ N., 106° 43′ E. The berth was built in 1976 and is down river from the town berths. In all there are 12 berths available. Our berth was 18 miles from the entrance. Max. size acceptable at the berth, LOA 200 m., beam 26 m. and deepest draft 7.4 m.

Cargo Facilities: No bulk handling facilities; no cranes at this berth but some were sighted at the town berths; no Ro-Ro facilities visible. There is a floating crane with a capacity of 60 tons (approx.). Security is good as armed guards stay aboard the vessel throughout. No container facilities of any kind sighted. Labour works around the clock in 3 shifts.

BARGES: Wood and steel barges available, some have engines.

CONSULS: None, nearest are in Hanoi.

SERVICES: The following are available: Fresh water; fresh provisions (depending on time of year); minor repair facilities; airport; laundry service; diesel oil; lubricating oil; doctor and hospital; small amounts of groceries and meats.

GENERAL: Any vessel intending to remain at the port for a long period of time should have onboard sufficient stores and fresh water prior to arrival, as if vessel at anchor, stores and fresh water can take up to one week to arrive.

HO CHI MIN CITY: 10.45 N. 106.45 E.

DOCUMENTS: On arrival at Nha-be or at the Port. As usual, the examination is executed immediately by the Officers representatives of: Sanitary Service, Immigration Service, Customs Service, Police Service, Stevedoring Agencies.

Stevedoring Agencies:

8 Ho Chi Min City Inward Cargo Manifests or In-transit Cargo Manifests at Ho Chi Min City.

2 Crew Lists.

All Original Cargo Manifests.

3 Landing or In-transit Passenger Lists.

2 Landing Passengers Luggage Lists.

2 Free of Tax Goods Lists.

Ho Chi Min City Port Authority:

Following Documents are to be presented to the Ho Chi Min City Port Authority by the Stevedores:

1 Report, informing the arrival of the ship.

2 Cargo Plans on board.

3 Cargo Manifests.

3 Cargo Unloading Plans.

1 General Cargo Unloading Permit.

6 Requests to Sanitary Officer for sanitary examination operation.

Important Notices:

(1) Manifests of Ho Chi Min City Inward Cargo are to be compiled by complete set, each set comprising original port's manifests; a recapitulation table will be added to each set indicating the total amount of parcels, tonnage or volume loaded on board for each port. This total amount will be repeated in all letters, stating: "This total amount has been visaed by the Customs Office."

(2) On arrival at Vung-Tau, (Cape St. Jacques), the Master of the ship should collect all required documents and get them ready to be presented. The Quarantine Officials may possibly come unawares on board for prior examination.

PILOTAGE: Upon arrival at pilot station the pilot service should be informed by cable of the exact position of anchorage, draft of the vessel, and the maximum speed the ship can do in the river.

Every evening from 2000 hrs. to 2200 hrs. (local time) radio watch should be kept with Ho Chi Min City XVS on the frequency of 500 kc/s. In case the vessel is to proceed up the river the next morning the pilot service will cable the Captain the exact hour of departure from Cape St. Jacques (Vung Tau).

The pilot service will not send any Pilot to ships that do not give the information as to draft, speed of vessel, and exact position at the anchorage station at Cape St. Jacques (Vung Tau).

Pilot station at Vung Tau, tel. 6. Pilot station at Ho Chi Min City, tel. 21222 and 90503. Pilot boards at Vinh Dua (Gulf of Coco Trees).

ANCHORAGE: In depths of about 30 ft.
RESTRICTIONS: River transits, berthing and unberthing are effected in daylight hours only. Vessels should arrive 2 hours before daylight HW. At least 1 ft. keel clearance required. Least depth in channel, 27 ft. below chart datum.
MAX. SIZE: Length 673 ft. Vessels can proceed without restrictions above 27 ft. depending on daily tide.
HEALTH: Port officials board at Vung-Tau if vessels call at Vung-Tau. Free pratique will be obtained from local authorities. For vessel calling at Ho Chi Min City, port officials will board upon docking alongside at Ho Chi Min City. Port and free pratique will be pratique at Ho Chi Min City.
RADIO: Ho Chi Min City Radio, call sign XVS.
TUGS: Available up to 2,600 h.p. Tankers usually berth without tug assistance.
BERTHING: Depth at quays 26 ft. to 36 ft.
TANKERS: Discharge at Nha-Be: Ex-Caltex Terminal, narrow pier with mooring buoys, depth in berth 27 ft. Ex-Shell Terminal, "T" jetty with mooring buoys, depth in berth 31 ft. Ex-Stouvae Terminal, pier with mooring buoys, depth in berth 30 ft. No slop disposal facilities.
DENSITY: About 1005 at berths.
MEDICAL: Doctors and hospital facilities available.
FRESH WATER: Can be supplied by barge subject to advance notice of 24 hours.
FUEL: Diesel oil can be supplied.
REPAIRS: Machine shop facilities only.
AIRPORT: Situated about 5 miles from the city. International services.

NOTES

Please also advise Shipping Guides Ltd.

Virgin Islands

FREDERIKSTED, St. Croix: 17.43 N. 64.53 W.

DOCUMENTS: All forms are standard U.S. Government Forms:
Passenger List (I–418) – 3 copies.
Crew List (I–418) – 3 copies.
Clearance from Last Port.
Inward Customs Manifest (7527-B) – 4 copies.
Ship's Stores Declaration – Customs Form 1303 – 2 copies.
Crew Effects Declaration – Customs Form 1304 – 1 copy.
(Also see separate headings – "Health" – "Customs" – "Immigration".)

PILOTAGE: Services available day or night. Payment for Pilot services is mandatory whether Master uses Pilot or not. (Vessels commissioned by the U.S. or foreign government, yachts and vessels under 100 gross tons are exempt from pilotage fees, except when the services of a Pilot are requested).

ANCHORAGE: Open roadstead on the lee (West) side of St. Croix, providing a good anchorage with no significant tide.

HEALTH: See "Health Regulations" before first U.S.A. Port (Albany).

Garbage should be disposed of beyond the 3-mile limit. On passing the 3-mile limit all garbage disposal units which open to the sea should be closed. All garbage should then be placed in covered cans and retained on board until the ship is again beyond the 3-mile limit.

RADIO: *(a)* Vessels may communicate with Island via:

Mackay Radio, Amagansett, New York	Call Letters WSL
Chatham, Massachusetts Radio	Call Letters WCC
Lantana Radio, Florida	Call Letters WOE
Barbados Radio, Barbados	Call Letters VPO
Destrellan Radio, Guadeloupe	Call Letters FFO
Fort de France Radio, Martinique	Call Letters FFP

All stations maintaining 24-hour service. These radio stations then relay the messages by cablegram to Frederiksted via either ITT World Communications Inc. or Cable and Wireless, Western Union International.

(b) Master of every vessel arriving Frederiksted is required to give at least 24 hours advance notice of arrival to Captain of the Port, U.S. Coast Guard – San Juan, Puerto Rico, by wireless on 500 kc/s. or by radio telephone 2182 kc/s.

Call Letters for U.S. Coast Guard, San Juan, Puerto Rico – NMR.

(c) Masters are requested to advise Agent their expected time of arrival as far in advance as is possible, vessels arriving from ports other than U.S. or Caribbean Islands should give at least 7 days notice, and vessels arriving from U.S. ports should give at least 4 days notice. In addition, a message should be sent verifying arrival at least 48 hours in advance, with delays reported as necessary. Arrival messages should include information regarding repairs, stores, number of crew and passengers on board. If cash is required, a minimum of 7 days (prior to date of arrival) notice is mandatory.

(d) While vessels are in Frederiksted the authorities do not permit the use of the ship's radio transmitters.

(e) Vessels equipped with VHF equipment should commence radio watch on Channel 16 when vessel is 100 miles from St. Croix. Contact with Agents and shore facilities can be made direct or via Virgin Islands Marine Operator – Station WAH – Call Letters WAH.

TUGS: None readily available – tugs can be arranged with 48 hours advance notice.

BERTHING: A government-owned pier with a 1,400 ft. long approachway, bridging Maritime Zone to a pier-head 240 ft. long by 60 ft. wide. Vessels 600 ft. and over with a max. forward draft of 25 ft. have been accommodated.

FRESH WATER: Very limited, delivered by truck.

TIME: GMT minus 4 hours. Atlantic Standard Time.

HOLIDAYS: The following are legal holidays: Sundays; January 1st (New Year's Day); January 30th (Roosevelt's Birthday); February 12th (Lincoln's Birthday); The third Monday in February (Washington's Birthday); March 31st (Transfer Day); Holy Thursday; Good Friday; Easter Monday; Whit Monday; Last Monday in May (Memorial Day); June 22nd (Organic Act Day); July 4th (Independence Day); July 2nd (Supplication Day); The first Monday in September (Labour Day); The second Monday in October (Columbus Day); The fourth Monday in October (Veterans Day); November 1st (Liberty Day); The fourth Thursday in November (Thanksgiving Day); December 25th (Christmas Day); December 26th (Christmas Second Day), and such other days as the President or the Government may by proclamation declare as holidays.

The following are legal half-day holidays, commencing at Noon, viz: Every Thursday during the months from April to November, inclusive, except Thursdays in those weeks where there already is a legal holiday other than Sunday. Whenever any holiday falls upon a Sunday, the Monday following is a legal holiday.

REGULATIONS: The U.S. Coast Guard strictly enforces the Harbour Pollution Act of 1924, prohibiting discharge of refuse and oil in navigable waters of the U.S. Virgin Islands. Local Port Regulations are similar to those applying in U.S. Mainland Ports.

CUSTOMS: Customs Officers will board at anchorage or wharf berths, and will require an accommodation ladder.

Vessels required to enter and clear through Customs House:
Vessels loading or unloading cargo;
Vessels embarking or disembarking passengers;
Vessels remaining in port over 24 hours:
Vessels requesting permission for their passengers to go ashore during the stay of the vessel in port.

Vessels in above categories must present following documents:
Clearance from Last Port;
3 copies of Crew List (Form I.418) or substantially similar form – see note below*)
3 copies Passenger List (Form I.418) or substantially similar form – see note below*)
4 copies Inward Foreign Manifest covering all cargo for discharge at St. Croix, V.I., showing weights or measurements (of basis of how cargo is freighted) on all items (Customs Form 7527-A or 7527-B).
2 copies Stores List (Engine-Deck-Commissary-Narcotics).
1 copy Crew Effects Declaration (Custom's Form 1304).

* List of passengers and crew shall be on Customs and Immigration Form I.418 or on a substantially similar form, except that where no steerage passengers are aboard upon arrival, the listing of the passengers may be in the form of a vessel "Souvenir List". Or similar list, in which the names of the passengers are listed alphabetically by class.

Sealing of Stores: Upon arrival of a vessel from a foreign port, or a vessel engaged in foreign trade from a domestic port, sea stores and ship's stores not required for immediate use of consumption on board while vessel is in port and articles acquired abroad by officers and members of crew, for which no permit to land has been issued, shall be placed under seal, unless customs officer is of the opinion that circumstances do not require such action. Customs Inspectors in charge of vessel, from time to time, may issue stores from under seal for consumption on board by passengers and crew.

Passengers disembarking must present personal baggage declaration if from foreign.

IMMIGRATION: Recommended that Masters who are unfamiliar with U.S. Immigration Procedure should seek clarification from Agents as far in advance as is possible.

If a vessel arrives direct from a United States mainland port or from Puerto Rico no immigration inspection will be performed. If a vessel arrives direct from a foreign port the vessel shall undergo immigration inspection.

Vessels arriving without a visaed crew list, may be able to obtain a waiver from Officer in Charge of U.S. Immigration & Naturalisation Service, by making application on Form I.193. A fee of $10.00 is required to obtain a waiver.

In order to expedite the clearing of the vessel, it is suggested that prior to arrival all passengers subject to inspection should be assembled where the inspection is to be performed.

Stowaways must be reported in ETA Message and listed on a Passenger Manifest (Form I.418) and on Form I.94, and must be reported to the U.S. Immigration Officer as soon as he boards.

All non-resident alien crew members, whether shore leave is required or not, are required to have in their possession valid Passports, Seamen's Book or Identification Card (with photo) and Form I.95 (crewman's Landing Permit) or Form I.184 (Alien Crewman's Permit and Identification Card) on arrival. All resident alien crew members are required to have in their possession Alien Registration Receipt Card (Form I.151) on arrival.

SHORE GANGWAYS: Available.

LAUNCHES/TENDERS: Not available.

AIRPORT: Distant 8.5 miles.

AUTHORITY: Virgin Islands Port Authority.

LIMETREE BAY, St. Croix: 17.41 N. 64.44 W.

(See Plan Book)

LOCATION: The facilities of Hess Oil Virgin Islands Corp. (Hovic) are located in Limetree Bay on the South coast of the island of St. Croix, U.S. Virgin Islands. St. Croix is 32 miles South of St. Thomas and St. John Islands and 50 miles S.E. of the island of Puerto Rico. It is the largest of the U.S. Virgin Islands being 19 miles long and averages 3.5 miles in width.

The sea buoy "ELB" No. 2 marking the entrance to Limetree Bay channel is located in 60 ft. of water on the Westerly side of the channel: Lat. 17° 40′ 42″ N., Long. 64° 44′ 18″ W.

The sea buoy is painted red and is equipped with a flashing white light having a 1 second flash, 9 second eclipse with a visibility of 7 miles.

DOCUMENTS: Clearance (U.S. – Foreign). Inward clearance is effected on board immediately after docking. Clearance should be made for Christiansted, St. Croix, via Limetree Bay.

The following documents are required by the Customs and Immigration authorities for entry and clearance:
Master's Certificate on Preliminary Entry.
Master's Oath.
Stores List.
Crew Purchase List (Curio List).
Inward Foreign Manifest.
Quarantine Free Pratique.
Deratisation Certificate.
Crew List (Certified).
Clearance from Last Port.
Crew men Landing Permits.
Passenger List (if any passengers).

PILOTAGE: Service is available 24 hours a day and is compulsory for all vessels using HOVIC facilities in Limetree Bay. The HOVIC Harbour Master acts as Pilot and will assist the Master in docking and undocking vessels using Hess Oil facilities; however, the Master of the vessel retains full responsibility for the ship at all times. The Pilot can be contacted by VHF Channel 16. Pilot boards at the sea buoy, position 17° 40.7′ N., 64° 44.3′ W. Vessels over 45,000 d.w.t. are subject to movements in daylight only. Vessels should remain outside the sea buoy until boarded by the Pilot. The Pilot will be placed aboard by a company tug.

The tug HOVIC 1 is equipped with a radio-telephone having the following crystals: 2182 kc/s. U.S.C.G., 2638 kc/s., Ship to ship. 2738 kc/s., Ship to ship 2134 kc/s., San Juan, Puerto Rico and Galveston, Texas. Ships having the above crystals should call the HOVIC 1 – 3 hours before their arrival at the sea buoy, and advise of any change in their ETA.

ANCHORAGE: There is no suitable anchorage for deep draft vessels off the port. Normal practice is to stop engines and wait 6 to 8 miles from the sea buoy if required to wait instructions. In bad weather vessels should proceed to Frederiksted and anchor in the vicinity of the long pier in depths of 30 to 60 ft. Vessels shall have their anchors ready to let go upon entering the channel into Limetree Bay.

APPROACHES: Entrance to channel marked by a black sea buoy, equipped with a white flashing light, visible 8 miles. The buoy (ELB No. 1) (flashing every 5 seconds) is at the West side of the channel (Lat. 17° 40′ 42″ N., Long. 64° 44′ 18″ W.). At sea buoy there is 60 ft. of water and the channel has a depth of 60 ft. to Nos. 3 and 4 berths.

The turning basin opens up Eastward from the channel line and is approximately 1,200 ft. long and 1,000 ft. wide. The West turning basin is 1,500 ft. by 1,200 ft. with a max. depth of 35 ft.

RESTRICTIONS: Navigation permitted 24 hours a day except for ships over 50,000 d.w.t.

The Harbour Master will check and report on each vessel's draft before piloting them inbound or outbound.

HEALTH: National quarantine laws are enforced in the U.S. Virgin Islands by officers of the U.S. Public Health Service. All vessels are subject to inspection.

RADIO: Masters are requested to advise both HOVIC – St. Croix and their Agents by radio 48 hours and 24 hours in advance of their ETA giving the vessel's name, date and hour of arrival (local time), bunkers and water required.

TUGS: Tug assistance in the channel, docking and undocking is mandatory and is provided by 3×1,800 h.p. diesel tugs stationed in the port to provide this service. All tugs are under the orders of the HOVIC Harbour Master and are equipped with fire pumps and monitors to assist in fire fighting.

There are also 2 tugs of 7,000 h.p. available for the mooring of large tankers.

BALLAST: United States laws prohibit the pumping overboard of dirty ballast while a vessel is within U.S. coastal waters. All ballast must be pumped to facilities available ashore. However, if a vessel is especially equipped with clean segregated systems which are reserved for ballast use only, it is permissible to pump overboard at the dock after first being inspected and approved by the Dock Master.

In pumping dirty ballast ashore, the ballast is received through 1×12 in. shore line at a max. discharge pressure to shore installations of 125 p.s.i. The ballast is pumped into a ballast facility about 1 mile North of the dock. Due to the limited facilities and to the possibility of 2 vessels deballasting at the same time, it is requested that vessels arrive with the min. possible ballast.

The U.S. Oil Pollution Act of 1924 applies to the Pollution of Coastal Waters. Violators are subject to fines of up to $2,500 and a year's imprisonment for each offence.

NOTICE OF READINESS: Notice of readiness to load or discharge is a warranty that the vessel is in all respects ready to load or discharge, and that all of the ship's equipment (including, but not limited to tanks, pumps, valves, and pipe-lines) is ready and fit to load or discharge petroleum and/or petrochemical products. Notice of readiness will not be accepted unless the vessel is in all respects ready to load or discharge as appropriate. Vessel will not be deemed ready to load or discharge and pumping will not commence until the senior deck officer shall have executed and delivered to HOVIC a "Declaration of inspection prior to bulk cargo transfer" as required by U.S. Coast Guard Regulations.

BERTHING: *Hess Hovic Terminal:* A shore gangway is provided.

There are at present, 7 berths on finger pier, 3 on East side and 4 on West side.

Deepest berths are No. 3 and No. 4 each with 60 ft. depth of water alongside.

Port Alucroix: Situated to the West of Hess Oil Terminal. The port is entered via the Krause Lagoon Channel with a controlling depth of 35 ft. at MLW, and width of 300 ft. At the head of the lagoon is the Martin Marietta Alumina Terminal.

Pilot boards approximately 2.5 miles South of Martin Marietta Alumina sea buoys No's. 1 and 2.

Container Port: Situated close West of the Hess Oil Terminal. The port is entered via the Krause Lagoon channel and the container port channel.

LOADING: Loading operations are normally carried out at relatively high pumping rates. Loading rates may be reduced by request. Loading cargo overall will not be permitted without specific written authorisation from HOVIC'S General Manager.

Hose pressures should not exceed 125 p.s.i. during loading or discharging.

Oil Dock is serviced by: 1×24 in. diameter crude line, 1×24 in. diameter No. 6 oil line. 1×20 in. diameter gasoline line, 1×20 in. No. 2 oil line, 1×10 in. diameter kerosene line, 1×12 in. diameter ballast line, 1×8 in. diameter fresh water line.

4×10 in. hoses are available for connecting up to each of the 20 in. and 24 in. shore lines – single 10 in. hoses are available for the kerosene and ballast lines.

Oil Dock 2 serviced by: 1×24 in. diameter crude line, 1×24 in. diameter 6 oil line.

MEDICAL: Medical attention is generally available from the public hospital at any hour of the day or night to crew members of all vessels. The representative of the ship's Agent should be contacted by the Master with any requests for medical attention for the crew. For each man needing medical or dental attention, a form should be completed in duplicate and signed by the Master, or in his absence, by the Chief Officer. The form should provide the date, patient's name, rating, and the name of the vessel. In case of emergency, or when a patient cannot be moved from the vessel, the Master should advise the ship's Agent by radio if at sea, or on the telephone if in port.

DENSITY: 1025.

FRESH WATER: The island of St. Croix is dependent almost entirely on rainfall for its supply of fresh water. There are wells but many of them are rather saline in nature. As a result fresh water is scarce and expensive. In conjunction with its refinery operation HOVIC operates a desalination plant and limited quantities of fresh water are available providing at least 48 hours notice of these requirements is given prior to the ship's arrival. All fresh water is metered aboard ship.

FUEL: Both No. 6 fuel oil (Bunker C) and light marine diesel are available by prior arrangement. Advice concerning quantities should be given in the vessel's arrival message (ETA) sent 48 hours prior to arrival.

AIRPORT: Situated 5 miles from port facilities.

SHORE LEAVE: Under normal circumstances, no restrictions are imposed by the Immigration Authorities on shore liberty. Masters are requested to have all crew members on board at least 1 hour prior to departure time, to avoid delay "awaiting crew members". If crew members of foreign vessels are to be given shore leave, Form I – 95 must be prepared for each member of the crew.

TIME: The U.S. Virgin Islands use Atlantic Standard Time, which is 4 hours slow of Greenwich Mean Time.

GENERAL: *(a) Immigration:* The United States immigration laws apply in the U.S. Virgin Islands. Passports and visas are required.

(b) Customs: The customs collection district of the U.S. Virgin Islands is under the jurisdiction of the U.S. Treasury Department but has its own Customs laws.

(c) Liquors: The transportation of alcoholic beverages inside HOVIC's property is strictly prohibited; consequently, no liquor or beer may be removed from vessels. the only exception to the foregoing is in the case of bonded stores ordered by Masters.

(d) Visitors: No visitors are permitted in the dock area. Only persons on official ship's business are permitted on the piers.

(e) Laundry: Only limited facilities are available to handle ship's laundry.

(f) Surveyors: Representatives of the American Bureau of Shipping, Lloyd's Register and other maritime classification societies are available in San Juan, Puerto Rico on 12 to 24 hours notice. The ship's Agent will assist Masters in soliciting their services.

(g) Mail: Official and personal mail will be delivered on board by the ship's Agent when vessels are being cleared inwards. Mail received for vessels while in port will be delivered on board prior to sailing. Outgoing mail is accepted from Masters, provided it is accompanied by a mail transmittal slip to support disbursements.

(h) Transportation: Walking through the refinery is not permitted. Arrangements for transportation will have to be made through the ship's Agent or the Refinery General Manager's Office.

(i) Supplies and Repairs: Limited supplies of provisions and marine hardware are available on the island. There are no facilities for major repairs closer than San Juan, Puerto Rico. Machine shops in Christiansted and Fredriksted can assist in making minor repairs.

(j) Overloading: Masters are advised that the international laws are strictly enforced with regard to overloading and should be guided accordingly. In cases where overloaded cargo has to be discharged, all expenses incurred, including ship delay, will be for the vessel's account.

(k) Weather Conditions: The loading and discharge of all crude petroleum and its products will be stopped during any electrical storm. Ullage screens or ullage plugs must be in place. Loading gasoline or other similar low-flash products will be stopped during periods of calms when the heavy vapours cannot be dispersed quickly enough to prevent hazards from accumulated gas pockets. Ship's officers are cautioned to be on their guard during such conditions. In the event of abnormal weather conditions in the area, such as a hurricane, vessels will be notified that additional moorings are required. If the situation so demands, Masters will be told to suspend all operations and proceed to sea until normal weather conditions again prevail.

(l) Demurrage: Vessels are required to vacate berth promptly upon completion of cargo handling operation (loading or discharging operations, as the case may be). Permission to lay alongside at any time the vessel is not engaged in cargo handling operations must be granted in writing by the Dock Master. The Harbour Master will keep vessels advised of other vessels awaiting berth. If any vessel fails to vacate its berth upon completion of cargo handling operations and expiration of free laytime for dock usage as outlined below, the vessel will be responsible for penalties and demurrage as follows:

(a) To pay dock demurrage.
(b) To hold HOVIC blameless for any demurrage and damages incurred as a result of other vessels awaiting berth.

The following rules shall govern the determination of demurrage:

(a) One hour free laytime will be allowed after completion of cargo handling operations. This free time will start at the time cargo hoses are disconnected from the ship's manifold on completion of loading or discharge of cargo. Vessels awaiting cargo papers and/or Customs clearance must vacate the berth within 1 hour of such completion and move outside to wait for their papers.
(b) Three hours free laytime will be allowed for ballasting after discharge operations.

AUTHORITY: Hess Oil Virgin Islands Corp. and Virgin Islands Port Authority.

ROAD HARBOUR & PORT PURCELL, Tortola, British Virgin Islands: 18.25 N. 64.37 W.

PORT LIMITS: All the area of water North of an imaginary line drawn from Burt Point to Hog Point (see B.A. Chart 2020).

DOCUMENTS:

Clearance from last port;
1 Declaration of Health Certificate;
4 Crew Lists;
2 Crew Store Lists;
2 Ships Stores Lists;
2 Passenger Lists.

PILOTAGE: Only compulsory for vessels of 200 n.r.t. and over, when proceeding alongside or leaving Port Purcell unless a vessel is in possession of a valid Exemption Certificate issued by the Ports Manager. Pilot boards at Port limits after receiving advice from Agents preferably 12 hours prior to arrival. Link calls made through Tortola Radio, Channel 27 daytime and Channel 16 at night.

Vessels arriving ahead of ETA sound "G" on whistle if unable to advise Agent.

No inward pilotage at night, unless emergency, night Pilotage outwards by special arrangement.

ANCHORAGES: Between Buck Island and Beef Island or immediately South of Port limits, approximately 12 fathoms.

Tanker anchorages independent of Port Authority and maintained by Shell and Esso, for small vessels only, little tidal influence.

RESTRICTIONS: Anchorage within Port limits prohibited unless authorised by Ports Manager. Max. draft alongside Port Purcell 22 ft.

HEALTH: Customs issue pratique for vessels with clear bill of health, otherwise request doctor to board on arrival alongside or at anchor.

RADIO: Call sign "PORT PURCELL" – can be reached by VHF Channel 16. Cable and Wireless maintain a Public Coast Station on Tortola, call sign "Tortola Radio", with an approximate range of 50 miles and provides linked telephone calls between ships and any shore based telephone subscriber. From 0700 hrs. – 1900 hrs. watch is kept on Channel 16, at night for emergencies only.

For distances in excess of 50 miles any other convenient shore station, (eg. Barbados, St. Thomas) that will accept messages for onward cabling or telephoning to Tortola.

BERTHING: Port Purcell quay is 800 ft. long, max. draft 21 ft. at any state of tide, salt water. Ships discharge with own gear.

CRANES: Port Purcell has 1 mobile shore crane, max. lift 8 tons. Prior advice required for use.

MEDICAL: Hospital facilities available, no routine inoculations, etc., required unless specially notified.

DENSITY: Entirely salt water within port limits.

FRESH WATER: Available in limited quantities at Port Purcell, approx delivery 20 t.p.h. and costs US$5.00 per 1,000 gallons.

FUEL: Diesel only for small vessels delivered by road tanker to Port Purcell, 2 hours notice.

REPAIRS: Minor repairs only.

HATCHES: Opened and closed by crew.

CUSTOMS ALLOWANCE: No sealing of tobacco, wine or spirits.

AIRPORT: Beef Island, 7 miles, regular local flights to St. Thomas, Puerto Rico, Antigua which connect with several main lines to Europe and the Americas.

TIME: GMT minus 4 hours.

HOLIDAYS: Port Purcell closed Christmas Day, Good Friday and August Monday (1st in month).

POLICE/AMBULANCE/FIRE: Dial 999.

TELEPHONES: Telephones available for use on board ship, cost for connecting US $25.00 and 8 cents for local calls.

SHORE LEAVE: No restrictions for crews.

IDENTIFICATION CARDS: None required.

DELAYS: None should be expected. Cargo working is geared to ship's arrival, irrespective of time and 24 hours continuous working if required.

AUTHORITY: Ports Manager and Harbour Master, Road Town, Tortola.

ST. THOMAS: 18.20 N. 64.56 W. (See Plan Book)

Harbour of St. Thomas, U.S.V.I. situated on South side of Island of St. Thomas. It is 1,434 miles from port of New York. Northern side of Island borders on Atlantic Ocean, and Southern side on Caribbean Sea. The Harbour is one of the best in the West Indies, being almost landlocked.

WEATHER: The weather is usually mild with little wind. Squalls when they occur, usually come from the N.E.

DOCUMENTS: *Quarantine, Customs and Immigration* – see "Frederiksted".

Agent:
1 Copy Crew List (Form I. 418).
1 Copy Passenger List (Form I. 418).

PILOTAGE: Compulsory and available day and night. Pilot Boat has letter "P" on deck house and flies International Code flag "P". Pilots will meet vessels 1 to 3 miles outside harbour, boarding via Jacob's ladder.

ANCHORAGE: Outer Harbour Anchorage located beginning at Scorpion Rock Lighted Buoy No. 1 (18° 19′ 25.6″ N.: 64° 55′ 8″ W.) thence 180° 1,580 yards; thence 263°, 2,490 yards; thence due North 1,255 yards; thence due East to the Southerly tip of Sprat Point, Water Island; thence to Cowell Point, Hassel Island, and thence to point of beginning. This anchorage is considered good and is about 8 fathoms with sand bottom.

RADIO: The St. Thomas Marine Operator will guard the following from 0600 to 2100 hrs.: Channel 26, 16 VHF, 2009 – 2506 and 2182 AM, and the upper side band (2010.4 – 2507.4) of the same frequency. The Harbour Master's Office maintain a 24 hour watch on VHF Channel 16 (working on Channel 12).

(b) Master of every vessel arriving at St. Thomas is required to give at least 24 hours advance notice of arrival to Captain of the Port U.S. Coast Guard – San Juan, Puerto Rico by wireless on 500 kc/s. or by radio telephone 2182 kc/s.

(c) Masters are requested to advise Agents their ETA, at least 36 hours in advance. Arrival messages should include cash requirements (local currency U.S. Dollar) and advice regarding repairs, stores, etc. This information is particularly necessary in the cases of vessel arriving on weekends or holidays. For cruise vessels the arrival messages should also include the number of passengers and crew on board.

(d) While vessels are in St. Thomas Harbour, the authorities do not permit the use of the ship's radio transmitters.

(e) U.S. Coast Guards: This organisation maintains a small Marine Safety Detachment in St. Thomas to observe, service and effect repairs to navigation aids in vicinity of St. Thomas. An 82-ft. Coast Guard Patrol Boat "Point Whitehorn" (82364) is attached to the station for primary purpose of search and rescue work. Maintains watch on VHF Channel 16. Radio telephone marine information broadcasts, including Notices to Mariners, will be made on 2670 kc/s., after first making a preliminary announcement on 2182 kc/s. Radio telephone urgent and safety broadcasts or Marine Informations will continue to be made on 2182 kc/s.

TUGS: Normally not considered necessary for docking, however tugs are available for docking and undocking ships.

BERTHING: Wharf of the West Indian Company Limited, located on Eastern shore of harbour basin. Wharf is bulkhead type, 2,234 ft. long, running N.E./S.W., and is well protected to seaward. Mooring bits are spaced at intervals of 50 ft. There is a "cut out" in the wharf 950 ft. from N.E. corner, which is 22 ft. wide and approximately 3.5 ft. above low water. This ramp is slanting from 8.3 to 3.5 ft. over a distance of 20 ft. Similar type of ramp located on West Corner of wharf. Safe depth alongside from 27 ft. near N.E. end to 30 ft. on S.W. end. Bulwark is 8.3 ft. above mean tide. Average difference between high and low tide is 11 in.

Dockages dues are payable to the West Indian Company Limited, as per tariff.

In the Crown Bay area (access via East or West Gregerie Channels) the V.I. Port Authority maintains facilities which include a "T"-head pier extending 500 ft. from shore, where ships up to 25,000 g.t. can moor to breasting dolphins 200 ft. on centres, and mooring dolphins 200 ft. fore and aft from them. Controlling depth presently 30 ft. This pier is used for berthing tourist and tanker vessels only. A curved bulkhead at top of Crown Bay, approximately 900 ft. long, is used for roll-on/roll-off, container and break bulk cargo. Controlling depth 15 ft. 24-hour arrival notice is required.

CARGO HANDLING: Containers are handled at the West Indian Company and the Crown Bay area (V.I. Port Authority), but no special gantry cranes are available. Roll-on/roll-off cargo handled at these facilities as well. No liquid chemicals facilities exist here but there is a small privately-owned LPG plant limited to 20 ft. draft and 250 ft. length. Shell uses this facility for gasoline and light diesel. The "T"-pier in Crown Bay is used for the V.I. Water and Power Authority for movement of fuel and water, and Texaco has its own pipe-line on the same pier for their products.

STEVEDORES: Discharging and/or loading arranged by the West Indian Company Limited for account and risk of vessels.

Rates of discharging and/or loading dependent on vessel's equipment and stowage. However, following may be considered average:

General Cargo 6 weight tons per gang hour.
Bagged Goods 8/10 weight tons per gang hour.
Lumber 10/12 weight tons per gang hour.

Each stevedore gang normally consists of 12 stevedores (10 on board and 2 ashore) 2 winchmen, 1 signalman, 1 foreman.

FUEL: Bunkers are not available except for small craft.

FRESH WATER: Mostly rain water which when available is supplied by the West Indian Company Limited. This supply is limited and is on an emergency basis only. Water may also be requested from the Government of the Virgin Islands in cases of emergency only. Delivery effected by pipe alongside wharf. Water by barge can be delivered in St. Thomas.

MEDICAL: Local hospital is the Knud-Hansen Memorial Hospital, which is equipped with facilities for operations, etc.

TIME: Official St. Thomas time is Atlantic Standard Time, which is 4 hours behind GMT.

HOLIDAYS: The following are legal holidays in St. Thomas: Sundays; January 1st (New Year's Day); January 15th (Martin Luther King); January 30th (Roosevelt's Birthday); February 12th (Lincoln's Birthday); The third Monday in February (Washington's Birthday); March 31st (Transfer Day); Holy Thursday; Good Friday; Easter Monday; Whit Monday; The last Monday in May (Memorial Day); June 22nd (Organic Act Day); July 4th (Independence Day); July 25th (Supplication Day); The first Monday in September (Labour Day); The second Monday in October (Columbus Day); The fourth Monday in October (Veterans Day); November 1st (Liberty Day); The fourth Thursday in November (Thanksgiving Day); December 25th (Christmas Day); December 26th (Christmas Second Day), and such other days as the President of the Government may by proclamation declare as holidays.

Whenever any holiday falls upon Sunday, the Monday following is a legal holiday.

REGULATIONS: The U.S. Coast Guard strictly enforces the Harbour Pollution Act of 1924, prohibiting discharge of refuse and oil in navigable waters of the U.S. Virgin Islands.

Local Port Regulations are similar to those applying in U.S. Mainland Ports.

HEALTH, CUSTOMS, IMMIGRATION: Refer to Frederiksted.

CONSULS: Following countries have consular representatives in St. Thomas.

Belgium
Denmark
Dominican Republic
El Salvador
France
Great Britain
Haiti
Netherlands
Norway
Panama
Sweden

AIRPORT: Distance 2 miles. Connections with International flights from Puerto Rico.

GENERAL: *Gangway.* 1 aluminium gangway available which is 34 ft. long and 2 ft. 6 in. wide – made with skidding prevention strips only and therefore not recommended for use as a passenger gangway. There is a similar gangway that is owned and used on V.I. Port Authority facilities. Since presently these are the only gangways; they are made available to vessels on first-come-first-served basis.

Stores. St. Thomas should not be depended upon for large quantities of provisions or deck and engine stores, as practically all commodities are imported making prices higher than United States mainland ports and Puerto Rico. No regular Ship's Chandlers established in St. Thomas, V.I.

Storage Facilities: The West Indian Company Limited undertakes ordinary storage for a limited period of time in 8 transit warehouses, all 14 ft. high with a total floor area of 80,000 sq. ft., plus an additional 9,600 sq. ft. roof covered area. There is also a large uncovered area available for outside storage. Only limited cold storage facilities are available on The West Indian Company's Dock.

Ice: Small quantities may be obtained.

Laundry: Modern laundry service is available.

POLICE/AMBULANCE/FIRE: Police 915; Ambulance 774-1212; Fire 921. Port Authority: 774-2250, 774-2333.

AUTHORITY: Virgin Islands Port Authority.

NOTES

Please also advise Shipping Guides Ltd.

Western Samoa

APIA: 13.50 S. 171.45 W. (See Plan Book)

PORT LIMITS: The Customs Act defines the port of Apia as follows: The limits of the said port of Apia shall be a circle of two miles radius from the Custom house now existing in Apia and the said port shall include all land, river, and sea included within that circle. The Shipping Act defines the limits of the port in similar terms using the Export Wharf as the centre of the two mile radius circle. Both of these features are shown on chart 2211.

DOCUMENTS:
1 Clearance from previous port of call.
3 Crew Lists.
3 Passenger Lists.
2 Health Documents.
1 Manifest.
Bills of Lading.
Ship's Papers (stores and poisons).
List of Dangerous Goods.

PILOTAGE: 72 hours ETA is required, confirm 24 hours before arrival. Pilotage is compulsory for merchant vessels. Pilot boards 1.5 miles outside harbour on line of leading beacons. Pilot boards from harbour tug.

By night, in addition to usual navigation lights, Pilot boat carries standard identification, i.e. a red light on foremast with all-round visibility. Exemption from pilotage may be granted to Masters of vessels trading regularly to Apia, but pilotage dues are still payable.

ANCHORAGES: In 20 fathoms outside a line drawn between the 2 reefs and preferably on line of leading beacons. Bottom is coral.

RESTRICTIONS: No night-time or tide restrictions. Turning basin dredged to 36 ft. in 1972, extending to 1,200 ft. from each end of the wharf. Arrivals preferred during daylight hours.

MAX. SIZE: Shore bollards to take stern and bow lines for vessels up to 800 ft. in length. Max. draft 35 ft.

Buoy mooring for tankers up to 32,000 d.w.t. consists of 3 white buoys, 1 ahead and 2 astern. Vessel also uses starboard anchor.

HEALTH: Doctor boards vessel on arrival alongside.

RADIO: ETA's should be sent 72 hours before arrival, and confirmed 24 hours before. Signals to incoming ships by radio or radio-telephone from Apia radio station 5WA. For radio, ships should call on 500 kc/s. and operate on 483 kc/s. For radio-telephone, ships should call on 2182 and operate on 2162 or other available frequency as may be arranged once contact has been established. Apia maintains continuous service. Call sign "Apia Radio" repeated.

Apia Radio maintains continuous service, and the Harbour Master can be called on Channel 16 during normal working hours. The tug and pilot launch also operate on Channel 16 .

TUGS: 2 tugs available, *Pualale,* 425 b.h.p. (7 ton pull) and *Savaii,* 175 b.h.p.

BERTHING: Export Wharf – reinforced concrete wharf 604 ft. in length on the East side of inner harbour. Max. depth alongside 36 ft. All loading and discharging is carried out with ship's gear. No wharf cranes available. This wharf and all surrounding areas enclosed by fence is Customs area and all vessels trading to or from places outside Western Samoa must depart from or arrive at this wharf.

New wharf 604 ft. long, vessels up to 800 ft. may be berthed.

There is 250 ft. of berthing alongside the inner face of the Southern arm of the wharf for small ships in deep water.

There are no special Ro-Ro facilities.

Shore equipment: One 15 ton mobile crane. Two×20 ton forklifts. About 10×3 to 5 ton forklifts.

STEVEDORES: Arranged by ship's Agents.

MEDICAL: Advance notice to Agents preferable. Doctors and good general hospital where seamen may be admitted.

There is a private medical clinic and a private dental clinic. Both high standard.

TANKERS: Shell, Mobil, and B.P. operating in Samoa, and have own discharging facilities. Tanker terminal situated on West reef. Discharge line is 6 in. diameter. Launch service may be provided between ship and shore at a small charge.

DENSITY: 1025 – but may alter considerably during rainy season.

TIDES: Mean high water intervals 6 hours 27 minutes, Spring range 3.8 ft., mean range 2.6 ft. Tidal stream normally slight, but after heavy rain outflow from rivers and streams can cause it to become quite strong.

The current across the harbour entrance about 600 m. off the reef can be variable, but is predominantly Westerly and velocities up to 4 knots have been reported but this is not normal.

FRESH WATER: Available at wharf from shore installation.

FUEL: Only light diesel fuel available.

FIRE PRECAUTIONS: Fire services available on wharf, station is 0.5 miles distant.

GANGWAY/DECK WATCHMEN: Recommended and available.

OPENING/CLOSING HATCHES: Opened and closed by stevedores.

CUSTOMS ALLOWANCE: No enforcements.

IDENTIFICATION CARDS: Not needed.

CONSULS: The New Zealand High Commissioner represents all British subjects; French Consul, Australian High Commissioner, Embassy of the Chinese People's Republic, South Korean Consul, West German Consul, United States of America Consul.

REPAIRS: Minor repairs only.

AIRPORT: 25 miles from Apia on Western side of Island. Regular and frequent mail and passenger services. Direct to Auckland or USA via American Samoa.

TIME: GMT minus 11 hours. No alteration to clocks.

HOLIDAYS: No cargo on Sundays between 0300 and 2100 hrs. The recognised holidays are Christmas, New Year, Boxing Day, Good Friday, Easter Monday, Whit Monday, Anzac Day and Independence holidays from 1st June to 3rd June.

TELEPHONES: Police and public telephones near wharf and provisions are available for telephone connection to tourist vessels berthed at the wharf.

POLICE/AMBULANCE/FIRE: Hospital 21.212; Police 22.222; Fire 999 emergency or 20.404.

SHORE LEAVE: No restrictions.

GENERAL: *Supplies:* Provisions available. Deck and engine room supplies can be obtained in limited quantities.

Divers: No divers other than scuba divers are available, and skin divers may be recruited for up to 50 ft. diving.

Oil Pollution: The pumping of bilges, etc., within harbour limits is not permitted and *heavy penalties will be imposed for any breach.*

Garbage Disposal: The dumping of refuse of any kind within harbour limits is strictly prohibited. Properly covered receptacles will be made available and rubbish disposal vans will clear them as necessary. A small charge will be made for this service.

Charts: BA 1730 – Samoa or Navigation Islands.
BA 1339 – Plans in Samoa.
BA 2211 – Apia Harbour.

AUTHORITY: Harbour Master, Ministry of Transport.

Windward Islands

CASTRIES, St. Lucia: 14.00 N. 60.59 W.

(See Plan Book)

DOCUMENTS:

5 Crew Lists.
5 Passenger Lists.
1 Stores List.
1 Clearance from Last Port.
2 sets of Manifest mailed prior to arrival.
2 copies each Bills of Lading.
3 copies each of Manifests on arrival.
1 Health Certificate.

PILOTAGE: ETA to Agents at least 48 hours in advance, and further advice if any changes. Agents inform Pilot's office of expected time. Ship remains approximately 3 miles out of harbour, and is located by Lighthouse guard who immediately informs Pilot's office. Pilot meets ship in Pilot boat – *Cheverton* 27 ft. Fibreglass hard top with a "V" hull, single inboard 4236 Perkins diesel engine, complete with navigation and pilot lights. Painted black all around, with letter "P" painted in white on both sides of bow. Name of pilot launch 'Charles' painted in white at the stern. Signal for Pilot: day time flag "G"; and night: white light or blue light. VHF and 2182. Pilot embarks on the starboard side via Pilot ladder.

ANCHORAGE: North of leading lights, about 0.5 mile from harbour, depth about 12 fathoms.

RESTRICTIONS: No ship exceeding 100 nett registered tons must enter without a Pilot.

MAX. SIZE: Not longer than 600 ft. (cargo and passenger). Tankers – not longer than 400 ft. Alongside, all ship's draft 24 ft. with the exception of Berth No. 4 which accommodates ships with a draft of 28 ft.

HEALTH: Pratique given by Pilot. Health Officer boards ship and if any infectious diseases are on board, ship is anchored out until doctor arrives.

RADIO: 2182 kc/s., 2527 kc/s., 2638 kc/s., 2146 kc/s., 2582 kc/s., 2381 kc/s.

VHF transmitting and receiving in the 156 mHz range on Channels 6, 12, 14 and 16.

These radio stations are situated at Vigie Lighthouse, Castries and at Moule-a-Chique Lighthouse, Vieux Fort operating on a 24 hour basis.

TUGS: Not necessary.

BERTHING: Berthing arrangements are made by the Port Manager before the ship's arrival having received the ETA.

Castries: Deep and sheltered anchorages off entrance. Approach channel 300 ft. wide, with min. depth of 6 fathoms. Turning basin 1,100 ft. in diameter, depth 6 fathoms. Inter-island cargo berth 450 ft. long, 12 – 18 ft. deep. Short stay cruise ship berth, 550 ft. long, 28 ft. deep. Also see "Shipmaster's Report".

Vieux Fort: Depth of 8 fathoms at the entrance and 5 fathoms within the Port. 2 berths, 500 ft. long, 27 ft. 6 in. deep. Also see "Shipmaster's Report".

CONTAINER HANDLING FACILITIES: Equipment for handling containers are available including a P & H model 9125 T.C. – 140 ton truck crane which is owned by Atlantic Lines. The Company has a rental agreement with the Port Authority.

MEDICAL: In urgent cases only, advise requirements in advance. Hospital facilities available.

TANKERS: Discharging by marine and floating hose, 6-in. and 4-in. lines. Berths alongside quay (2), off shore (2). Presently fuels discharged: Mogas 95 and 83, kerosene gas oil, colas RS2, cutback RC2, banana spray oil.

FRESH WATER: Available by delivery hose from water hydrant on wharf.

FUELS: Gas oil 48/52 DI – API. Viscosity at 60° 36.3 S.G. at 60° 0.8435.

GANGWAY/DECK WATCHMEN: Available if required.

OPENING/CLOSING HATCHES: By crew.

CERTIFICATES: Ship's Register required on board.

CUSTOMS ALLOWANCE: Tobacco, one carton of 200 cigarettes. Wine/Spirit, one quart.

CONSULS:

Norway	Tel. 2214	France	Tel. 2351 – 2
Portugal	Tel. 2811	U.K.	Tel. 2484 – 5
Holland	Tel. 2811		

REPAIRS: Only welding and painting work available.

DRY DOCKS: None.

REPATRIATION: Facilities available.

AIRPORT: Distance from wharf 2 miles. 4 flights per day. Airlines: BWIA, LIAT, Caribair.

TIME: GMT minus 4 hours. No alterations to clock.

HOLIDAYS: New Year's Day (1st January); New Year's Holiday (2nd January); Independence Day (22nd February); Good Friday (late March or early April); Easter Day (April); Easter Holiday (April); Labour Day (1st May); Whit Monday; Corpus Christi (late June); Queen's Birthday (12th June); Emancipation Day (1st Monday in August); Harvest Day (1st Monday in October); Discovery Day (13th December); Christmas Day (25th December); Boxing Day (26th December).

POLICE/FIRE/AMBULANCE: Police dial 99; Fire 97; Ambulance 95.

TELEPHONES: Arrangements exist for placing on board.

GENERAL: Ships arriving after 2000 hrs. cannot be attended to until 0700 hrs. following day.

SERVICES: Compass adjusting.

SHORE LEAVE: Allowed.

DEVELOPMENTS:

New Expansions. Under Plan "A":— (See Plan Book)

The new expansion includes 2 berths which will be built to accommodate vessels between 700 and 800 ft. in length with a draft of 35 ft.

There will also be a new container park storing up to 500 containers using the laneway system, but using block stowage, about 1,000 containers can be stored. This will increase storage capacity for containers to 3,500. After the new expansion is completed, there will also be a total upland of between 15–17 acres and covered space of 100,000 sq. ft. Provision is also being made for storing up to 200 reefer containers (8 ft.×8 ft.×20 ft.).

A new transit shed will be built with 40,000 sq. ft. and cold storage with 80,000 cu. ft. for reefer cargo.

An effective part of the port of Castries can already offer transhipment facilities.

Under Plan "B":—

Length of berth 500 ft. (vessels up to 600 ft. can easily be accommodated). Depth of berth 28 ft. 18,000 sq. ft. transit shed for stuffing and unstuffing containers. Storage space for containers – 1,000 of the international size 8 ft.×8 ft.×20 ft.

Under Plan "C":—

Construction of 2 Dolphin Piers for cruise ships North side of Castries Harbour located at Seraphin Point to accommodate vessels of 16,000 d.w.t. and 40,000 d.w.t. respectively. Provided a tug is available for those of 40,000 d.w.t.

SHIPMASTER'S REPORT: 1979. Castries.

Pilotage: Compulsory. Pilot boards 0.75 miles West of Vigie light, ladder usually on the port side.

Restrictions: Vessel is able to enter and leave at any stage of the tide, day or night.

Max. Size: Max. draft 23 ft. 6 in.

VHF: Pilot on Channel 16.

Berthing: No. 6 Berth, West Wharf: Distance from entrance to berth 1 mile. Max. LOA (Approx.) 550 ft. Max. draft 23 ft. 6 in. There is mechanical equipment available to handle palletised cargoes, adequate storage space for breakbulk cargoes and palletised cargoes. The loading rate for bananas is 15 t.p.h. per gang with ship's derrick and the labour was satisfactory. Accommodation ladder required.

Services: Fresh water, fresh provisions, repair facilities, machine shop, Airport, laundry services, bunker fuel oil, diesel oil, lubricating oils, doctor, hospital, groceries and meats.

SHIPMASTER'S REPORT: 1979. Vieufort.

Pilotage: No ship exceeding 100 n.r.t. must enter without a Pilot. Pilot boards 0.5 miles S.W. of Mathurin Point (there is a strong N.W. current off Mathurin).

Restrictions: Vessel may enter and leave at any stage of the tide, day or night.

Max. Size: Max. LOA 520 ft.

Tugs: Tugs are not available and are not necessary for docking and undocking.

VHF: Available.

Berthing: One berth only available. Distance from entrance to berth 0.5 miles. Nature of bottom at the berth is mud. All banana loading is carried out by the side doors. Vessels berth port side to the quay. A very high rate of loading is attained (100 t.p.h.). A limited amount of mechanised equipment for handling palletised cargoes is available and also limited storage space for palletised and breakbulk cargoes. No equipment for handling containers is available, but there are storage facilities for containers arriving by tug/barge. Accommodation ladder required.

Services Available: Only fresh water, airport and doctor available (i.e. no fuel or provisions available).

AUTHORITY: St. Lucia Port Authority.

KINGSTOWN, St. Vincent: 13.09 N. 60.57 W.

(See Plan Book)

DOCUMENTS:

Customs:
2 copies Ship's Store List.
1 copy Crew Store List.
1 copy Crew List.
1 copy Passenger List.
1 copy List of Cargo not manifested.

Immigration:
2 copies Passenger List.
2 copies Crew List.

Port Officer:
1 copy Declaration of Health.
1 copy Passenger List.
1 copy Crew List.
2 copies Port Officer Return.

PILOTAGE: Not compulsory. Cable Agents 24 hours prior arrival order arrange Pilot. English-speaking Pilot boards at harbour entrance – about 2 miles from anchorage. By day Pilot vessel flies Pilot flag and by night signal lights.

ANCHORAGE: Well protected. Tourist vessels lie at anchor, between 15 and 20 fathoms, or at pier.

RESTRICTIONS: None. Vessels may arrive and/or sail any hour day or night.

HEALTH: Port Health Officer boards vessel at anchorage requires Bill of Health or Master's declaration, and one copy Passenger List. Vessel's own form of manifest accepted. Vaccination Certificates are not required to be shown, and passengers and crew do not require inoculation. Passenger and crew muster, not required. Health Doctor requires letter

signed by Ship's Doctor (if any) and certified by Master stating all passengers and crew in possession of valid smallpox vaccination certificates. No persons allowed leave vessel before pratique granted and Immigration officials boarded vessel.
TUGS: Are not required for berthing and none are available in the port.
BERTHING: No tidal restrictions, no strong currents. Occasional on-shore South winds during August and September but only light winds. Rest of year off-shore winds. Mooring boats available for taking lines. No special moorings required. Jetty situated at S.E. corner of harbour and about 70 ft. out from beach. Bow and stern lines to landing stage. Landing stage in good condition and well lit. If vessel at anchorage and not at berth transit ashore by ship's motor launches only. Anchorage about 2 cables distant from quay.
FRESH WATER: Available.
TELEPHONE: May be connected on board if required, rental charge 4 dollars per day.
CUSTOMS/IMMIGRATION: Customs and Immigration officers board vessel at anchorage or quay. Vessel entered and cleared at Customs House by Agents. Ship's own form of manifest accepted by Customs and Immigration. On passenger vessels, ship's bar is sometimes sealed.
IDENTIFICATION CARDS: Not required for going ashore.
VISAS: Not required for crews or passengers, but nationals of foreign countries other than U.S.A. or Canada disembarking for permanent residence require Visas.
PROVISIONS: Limited quantities of provisions, fish, fruit and vegetables. Pasteurised cows' milk obtainable. Stocks of ice available.
CURRENCY: No special currency regulations in force and passengers permitted to take ashore any amount of U.S., Canadian or foreign currency. Currency exchanges at Banks or tourist bureaux, but Bank tellers do not board vessel to exchange currency. Local currency may be re-exchanged for U.S. dollars at local Tourist Bureau before departure. U.S. or Canadian currency accepted by stores, shops, restaurants and hotels.

SHIPMASTER'S REPORT: January 1979.
Pilotage: Not compulsory. Pilot boards 0.5 miles South of Fort Charlotte Light. A heavy swell may be experienced and vessel is always rolling.
Restrictions: Vessel may enter and leave at any stage of the tide, however, berthing is not recommended during hours of darkness. Unberthing may be carried out at any time.
Max. Size: LOA 550 ft. Max. draft approximately 30 ft.
VHF: Fort Charlotte on VHF Channel 16.
Berthing: One berth only available, vessels always dock port side to. Wharf is concrete with hard rubber fenders. There are storage facilities for breakbulk cargoes and palletised cargoes, there is also mechanised equipment for handling bananas. There is no equipment for handling containers nor is there storage space for containers. Loading rate for bananas 15 t.p.h. per gang using ship's derricks. Vessel's accommodation ladder required.
Facilities Available: Fresh water, fresh provisions, airport, laundry services, doctor, hospital, groceries and meats.

AUTHORITY: Port Manager, Kingstown Port Authority.

PORTSMOUTH, Dominica: 15.32 N. 61.29 W. (See Plan Book)

Portsmouth is an anchorage port principally engaged in the export, by lighter, of bananas and the export of agricultural produce by small inter-island vessels.

Documentation required is as for "Roseau". Safe anchorage is available anywhere within the port with distance off dependent on the size of vessel. Pilotage is not compulsory and if required must be obtained at the Roseau Pilot station.

No alongside facilities (except those for lighters) exist and no cargo handling equipment is maintained.

A steel piled/concrete decked finger pier 230 ft. long, 40 ft. wide is planned for construction at Longhouse, completion expected December 1980. This berth will have 12 ft. of water at the head. It is intended that the pier will provide lighterage berthing and accommodate inter-island sloops, schooners and motor vessels. Final planning of upland and equipment is yet to be undertaken.

All enquiries in the respect of the use of the port of Portsmouth should be addressed to the Port Authority, Roseau.
MEDICAL: A Cottage Hospital is available.
POLICE/AMBULANCE/FIRE: Police Tel. 5222, Ambulance Tel. 5237 (Hospital), Fire Tel. 5215, Custom House Tel. 5255.

SHIPMASTER'S REPORT: January, 1979.
Pilotage: Not compulsory or required.
Restrictions: Vessels may enter or leave at any stage of the tide during day or night.
Tugs: None available.
VHF: Not available.
Anchorage: Vessel anchored with the lighter jetty bearing 100°, distance 4 cables. Depth of water 70 ft. Cargo is delivered to the vessel by small lighters which are towed from a timber and steel jetty owned by Geest Line. Loading of bananas is carried out through side doors only. The quality of work was good.
Services Available: Doctor and airport (fresh water, fuel and other services are not available).

ROSEAU, Dominica: 15.17 N. 61.24 W. (See Plan Book)

PORT LIMITS:
15° 19′ 00″ N., 61° 24′ 29″ W.;
15° 21′ 00″ N., 61° 24′ 29″ W.;
15° 21′ 00″ N., 61° 23′ 09″ W.

DOCUMENTS: Port Authority requires before commencement of discharge, 2 copies of the vessel's manifest, and 1 stowage plan or hatch block sheet. Masters are advised that these should be airmailed ahead of the arrival. On arrival, documents required are:
Port Authority:
Ship's Register to sight.
International Health Declaration.
1 Crew List.
1 Passenger List.
1 Hazardous Cargo List.
Customs:
Clearance from last port.
1 Stores List.
2 Personal Effects Declaration.
1 Manifest.
1 Crew List.
1 Passenger List.
Immigration:
1 Crew List.
1 Passenger List.

PILOTAGE: Pilotage is compulsory for berthing all vessels in excess of 100 g.r.t. Pilotage is available for anchorage on request. Pilots will board in approx. position 15° 17′ 54″ N. 61° 24′ 50″ W. The pilot boat will display International code "H" by day and a white light over red light by night. Requests for Pilots should be made 24 hours in advance either through the vessel's Agent or by cable to "Domport". Vessels may contact the Port Authority through Dominica Port Radio on VHF Channel 16 from 0800-1600 hrs., and for 2 hours in advance of the vessel's ETA.
ANCHORAGE: A restricted area exists in Woodbridge Bay between:

15° 19′ 00″ N., 61° 24′ 15″ W.,
15° 18′ 00″ N., 61° 24′ 15″ W.,
15° 18′ 00″ N., 61° 24′ 00″ W.

and vessels may not anchor therein, except under Port Manager's instructions. Anchorage may be taken South of this area and in Roseau Roadstead 1.5 – 2 cables offshore in 15 – 30 fathoms depending on the vessel's size. All anchorages are steep-to and care should be exercised so as not to drag off the bank when anchoring.
MAX. SIZE: See "Berthing".
HEALTH: International declaration of Health. In addition any death, fever or suspected contagious disease should be notified in advance to Agents or Port Authority by cable or radio.
RADIO: See "Pilotage".
TUGS: None.
BERTHING: Woodbridge Bay Ocean Berth Length 500 ft., min. depth 36 ft. MLWOST.

Schooner berth 120 ft. with a depth alongside of 9 ft. (inshore) to 36 ft.

Roseau Jetty, Length 93 ft. min. depth 18 ft. (Out of commission due to hurricane damage. Repair not expected before 1981/82).
STEVEDORES: Arranged by vessel's Agents.
CARGO HANDLING FACILITIES:

Mechanised Cargo Handling: Breakbulk cargo is handled palletised on ships/shippers/port pallets. Adequate forklift trucks, trailers, and tractors are available to work all berths, Small inter-island vessels can be discharged by 5-ton mobile cranes (2). Containers up to 20 d.w.t. can be handled ashore if placed on port trailers by ship's gear. Ro-Ro barges capable of trimming to ramp height of +10 ft. are accommodated on the South end of Woodbridge Bay Pier.

Tankers/Bulk cement carriers: Petroleum products are presently handled at 5 different anchorages on the west coast.

L.P.G.: Woodbridge Bay (2) max. draft 12 ft. floating hose from vessel.

Mogas – Gasoil (Dieselene), Kerosene, Sprayoils: Rockaway (2), 1 mile North of Woodbridge Bay, draft 18 ft. 800/900 ft. floating hose from ship.

Boiler Fuel (Bunker C): Belfast, 2 miles North of Rockaway, max. draft. 18 ft. (up to 25 ft., if vessel equipped for stern discharge) 4-in. submarine line.

Bulk Edible Oils and Soap Chemicals: Belfast max. draft 14 ft., 4-in. floating hose (200 ft.) from shore.

The above are single anchor, stern-to berths with stern lines to shore posts. Vessels should have at least 4 ropes available aft and provision to bend 2 lines together.

The above are private facilities but pilotage is available. In the case of Woodbridge Bay (L.P.G.) pilotage is compulsory. Tankers in their ETA advice should include their cargo by products and their draft.
MEDICAL: One Government general hospital, one private group medical clinic and one private dental clinic are available.

On board visits by a doctor can be arranged.

Where possible advance notice should be given.
DENSITY: Approx. 1025.
FRESH WATER: Available alongside all berths at a cost of EC $12.00 for 1,000 gals.
FUEL: Dieselene (Gas oil) available in limited quantities ex-tank wagon at all berths. Other grades not available.
GANGWAY/DECK WATCHMEN: Available if required.
OPENING/CLOSING HATCHES: Beam and board hatches, crew or stevedores; Ship's option. Patent Hatches; ship's crew.
CERTIFICATES: Previous port clearance; ship's register, to sight.
CUSTOMS ALLOWANCE: 200 cigarettes, or 0.5 lb. tobacco or 25 cigars, 26 ounces of spirits per crew member.
IDENTIFICATION: Dock passes for crew members will be issued through the vessel's Agents.

CONSULS: (Or Consular Agents).

		Business	*Residence*

Netherlands	W. A. Astaphan	3221	2524
Belgium	Achille L. Pinard	2781	2756

REPAIRS: Minor and emergency repairs can be arranged. Engines and deck gear cannot be put out of service without permission of the Port Manager.

REPATRIATION: Limited inter-island flight capacity to nearest international airports – Guadeloupe, Martinique, Antigua, Barbados.

AIRPORT: Melville Hall 37 miles. Inter-island services only.

TIME: GMT minus 4 hours.

HOLIDAYS: New Year's Day, Carnival (Mardi Gras) 2 days. Good Friday, Easter Monday, Labour Day, Queen's Birthday, Whit Monday, August Monday, National Day (Nov. 3rd – 4th), Union Conference Day (A Sunday in November), Christmas Day, Boxing Day.

Minimum working: Can be arranged on these days, but it is not advised over the Carnival or National Day Holidays.

POLICE/AMBULANCE/FIRE: Police Tel. 2222 or call on 2182 kHz., Fire Tel. 2888, Ambulance Tel. 2321.

At anchor or away from a telephone, blow 3 short and 1 prolonged blast at frequent intervals until acknowledged on VHF Channel 16 or by lamp.

TELEPHONES: On board service can be provided at the Ocean Wharf, Woodbridge Bay (discontinued at present due to hurricane damage).

SERVICES: Assistance can be given for emergency repairs to electronic equipment, compass adjusting and D/F calibration subject to advance notice. Provisions can be obtained, but advance notice should be given especially for fruit and vegetables of high quality.

SHORE LEAVE: After inward clearance, there are no restrictions on shore leave. Masters are advised to note that immigration law holds the vessel/owner/agent, financially reponsible for any crew member or intransit passenger left behind (for whatever cause). Vessel's having no accredited Agent will be required to satisfy Immigration Authorities before outward clearance is granted.

SHIPMASTER'S REPORT: 1979.

Pilotage: Compulsory. Pilot boards 0.5 miles off the quay and requires two hours notice of vessel's arrival.

Restrictions: Vessel is able to enter or leave at any stage of the tide day or night.

Max. Size: M.V. "Oriana". LOA – 804 ft., draft 30 ft.

Tugs: Not available. Vessels able to dock and undock without the aid of tugs.

VHF: Channel 16.

Berthing: One berth only available with wooden fenders. A heavy swell may be experienced whilst alongside berth as it is very exposed. Loading rate for bananas is 16 t.p.h. per gang. There is ample mechanised equipment for loading palletised cargoes. There is also storage space for breakbulk and palletised cargoes. The quality of the labour was good. There is no equipment for handling containers and there is no storage space for containers. Accommodation ladder required.

Services Available: Fresh water, fresh provisions, airport, hospital and doctor (no fuel, repair facilities or other services available).

AUTHORITY: Dominica Port Authority.

ST. GEORGE'S, Grenada: 12.02 N. 61.46 W.

DOCUMENTS:

Health Authority: Health Declaration.

Harbour Master: 1 Crew List, 1 Passenger List.

Customs: Stores List, Crew Declaration, Crew List, Passenger List, Clearance from last port.

Immigration: 2 Crew Lists, 2 Passenger Lists.

PILOTAGE: If Pilot is required at daybreak order should be placed by 1600 hrs. the day before.

ANCHORAGE: Vessels anchor in position 12° 02′ N., 61° 46′ W.

BERTHING: Length of berth 800 ft. Depth alongside 28 ft. at the Southern end and 21 ft. at the Northern end. Berth owned by the Government of Grenada.

STEVEDORES: Available.

FRESH WATER: Available.

FUEL: This can be arranged with sufficient notice.

TELEPHONES: Telephones can be arranged through the local Agent.

MEDICAL: Doctor and general hospital available.

SHIPMASTER'S REPORT: January 1979.

Pilotage: Pilotage not compulsory but recommended. Pilot boards off the channel green buoy.

Restrictions: It is not recommended to enter in hours of darkness, however, it is possible to unberth. Vessels may enter and leave at any stage of the tide.

Max. Size: Max. LOA for single screw vessel is 520 ft.

Tugs: Tugs are not available and they are not required for docking and undocking.

VHF: Not available.

Berthing: There is only one quay and vessels usually dock port side to. Berthing in hours of darkness is not recommended as there is a sharp bend in the approach channel. Loading rate for bananas is 10 t.p.h. per gang with ships derricks. There are no facilities for loading palletised cargoes, however, there is adequate storage space for both breakbulk cargo and palletised cargoes. There is no equipment or storage space for containers. Accommodation ladder required.

Fresh Water: Available.

Medical: Doctor and hospital available.

Airport: Available.

Services: Laundry services and provisions available.

NOTES

Please also advise Shipping Guides Ltd.

Yemen Arab Republic

GENERAL:

CIRCULAR: Extract from the Circular dated 21st June, 1975 from the Hodeidah Port General Corporation, Hodeidah, Y.A.R.

INFORMATION AND GENERAL CONDITION:

1. *Payment of Tolls and Dues:*
All charges imposed herein are payable in cash, in advance except in the circumstances in which the General Manager of the Hodeidah Port General Corporation exceptionally agrees otherwise.

2. *Definition to Certain Terms:*
(a) Harbour's Limits: 14° 55′ 34″ N., 53° 37′ 00″ E. At this point is Buoy No. 1, about 4 miles West of Ras Alkateeb.
(b) Pilot's Point Limits: Buoy No. 2. At this point, Pilots embark and disembark from the vessel for piloting them for berthing or departure.
(c) "Anchorage Area": Is the area where vessels drop their anchor awaiting Pilot. The suitable area for this is next to Buoy No. 2, 14° 57′ 02″ N., 42° 52′ 04″ E.
(d) "Vessels" shall deem to refer in the Regulations to every floating craft made to sail on water by its or without its own means, whether or not fit for navigation.
(e) "Working Day": Commences at 0600 hrs. and ends at 1800 hrs. Night: Commences 1800 hrs. ends 0600 hrs. following day. Weekend: Commences Thursday 1200 hrs. and ends Saturday 0600 hrs.

3. *Public Holidays:*
The following occasions are observed as Public Holidays, which commence from 1200 hrs. on the preceding day and end at 0600 hrs. following the holiday:–

1. Weekly Holiday: Friday.
2. Al-Hijra (Moslem New Year): *1st Muharram.
3. Maulid-El-Nabi (Prophet's Birthday): *12th Rabia Awal.
4. Al-Meiraj (Prophet's Ascension Night): *27th Rajab.
5. Al-Shaabania: *15th Shaaban.
6. Idd-El-Fitr (4 days): *1st to 4th Shawal.
7. Idd-El-Adha (5 days): *9th to 13th Dulhijja.
8. Revolution Anniversary (3 days): 26th to 28th September.
9. 13th June (National Holiday).
10. Labour Day (1st May).

*N.B.: For Hijra Calendar dates, the corresponding Georgian Calendar dates will be those proclaimed by the Government of the Yemen Arab Republic.

CIRCULAR: To Owners/Masters.
We quote below text of a circular dated 21st January, 1979, issued by the General Corporation for Ports and Marine Affairs, Hodeidah, for your information and necessary compliance:
"No vessel, having no workable derricks or winches of her own, shall be received or accepted.
Agents shall be responsible for said obligations and without any liability to the Port General Corporation, in all Yemen Ports.
Due to non-availability of discharging means of floating cranes at anchorage and non-guarantee of available shore cranes, advisable you ensure that all ships calling under your agency should be fully equipped as required."

PILOTAGE: Pilotage is compulsory on all vessels irrespective of their size, on entry and departure.

TUGS:
1. All vessels under 400 g.r.t. are exempted from usage of tug's assistance, but where such a vessel uses the tug, the minimum fees for the actual type of tug used, will be levied.
2. Assistance of the tugs, 1,200 h.p. and 720 h.p. is compulsory to all vessels during mooring and unmooring.
3. Tug 'Al-Kateeb', 1,200 h.p. is compulsory and its charges will be levied whether used or not.

FINES:
1. A minimum fine of Rials 500/– and not exceeding Rials 2,000/– for failing to hoist the flag of the Yemen Arab Republic on the highest mast of the vessel.
2. Rials 160/– for arrival at outer harbour without prior notification (at least 24 hours prior notice is required).
3. Vessels attempting to enter the Inner Harbour without prior permit and without Pilot will bear all responsibilities against that in addition to a fine of between Rials 5,000/– and 10,000/–. This is also applicable on sailing.
4. Rials 500/– to 1,000/– for draining water onto the quays in addition to the responsibility for whatever may be caused against that.
5. Rials 500/– to 1,000/– for throwing garbage overboard.
6. Rials 500/– to 1,000/– for immobilising/repairing engines without prior permission from the Authorities.
7. In case a Pilot is called to take the vessel out but she fails to sail for reasons of her own or her Agents, the following expenses will be charged in addition to Pilotage fees:
(a) Pilot detention.
(b) Tugs assistance.
(c) Unmooring fees.
(d) Any other expenses.
8. The Corporation also reserves the right to impose any fine considered for violating its rules and regulations.

HODEIDAH: 14.48 N. 42.55 E.

Also see "General" before first port.
FLAG: It is essential that from the time they enter Yemen territorial waters all vessels fly the Yemen Arab Republic flag and this should be flown continuously until they leave these waters on sailing. Failure to observe this courtesy may result in a heavy penalty. The design of the flag is red, white and black horizontal strips of equal size with green star in centre of white strip.
DOCUMENTS: On arrival 16 copies of Manifests of cargo for discharge are required and each must be endorsed with the word *Correct* by the *Customs Authorities* at the Port of Loading. It is imperative that at least 2 of the 16 copies of manifests on board the ship should be freighted copies, otherwise 2 additional copies, showing freight details should be airmailed to Hodeidah separately to arrive in advance of the vessel. The Master should also be in possession of 1 copy of each Bill of Lading and certificate to show vessel is not blacklisted.
PILOTAGE: Pilotage is compulsory and as the entrance of the Channel giving access to the Port cannot be observed from the port area itself it is essential that accurate ETA's be given to the Agent in order to avoid delays waiting for a Pilot.
Vessels will be piloted down a dredged channel of about 8 miles in length. The channel, which is buoyed with black starboard and red port buoys, is 7.5 m. deep and 100 m. wide. – *The buoys are not at present lit and therefore entrance and exit from the harbour can only take place during daylight hours.* It is understood that illumination of buoys and leading marks will be completed by mid-1981 when night movement will be possible.
ANCHORAGE: Masters are also recommended to ensure that on arrival they anchor off the entrance to the new port to await the Pilot and do not anchor off the old port opposite the town some 5 miles to the South and which is still shown as being the Port of Hodeidah on some charts. Vessels anchoring in the wrong area may suffer some delay before they can be contacted and asked to proceed to the correct area. Masters should be advised to anchor at the outer anchorage in the following position: 14° 55′ N., 42° 54′ E.
MAX. SIZE: Max. draft alongside 26 ft.
HEALTH: All members of the crew must be vaccinated against yellow fever, smallpox and cholera otherwise permission will not be given to disembark.
RADIO: Masters should also ensure that a radio watch is kept to receive calls from the Port Authorities. The Hodeidah Radio station is operative between 0600 and 1800 hrs. daily, the call sign is: 4WD or 4WD3 (short).
TUGS: 6 tugs, 375 h.p. – 1,800 h.p. Pilot launch 250 h.p. also available to assist.
BERTHING: The quay is 540 m. in length with 4 berths, the first 70 m. long, depth 6 m., the second, third and fourth are of 150 m. length and 8.5 m. depth. *Officially, ships berthing are restricted in length to 180 m. and to a max. draft of 26 ft.*
The quay is of concrete construction and is well founded, vessels being secured to bollards in the normal manner. Use of rat-guards is recommended. The quay is equipped with 4 electric cranes described as having a max. capacity of 5 tons. Floating crane of 75 tons capacity available.
There is also a dolphin berth for discharging of petroleum products, which is connected by submarine pipes to storage tanks near the port area. The depth alongside is 6 m.
STEVEDORES: All labour is provided by Agent's representative including winchmen and tally clerks, but winchmen are provided entirely at ships' risk.
Rates of discharge vary but are quite satisfactory and with bagged cargo the average obtained is 15 tons per hatch per hour. Night work is possible.
It is normal for labour working on board to request drinking water to be supplied. Whilst this may be unusual, Masters are advised to comply, as otherwise slow working or perhaps even stoppages may result.
Vessels are expected to supply food on board to cargo supervisors, foreman, and tally clerks. It may be left to Master's discretion whether this is supplied, but if not the Agency will have to supply same and the cost will be debited to the vessels.
Working Hours: Normally from 0600 hrs. to 1100 hrs. and again from 1300 hrs. to midnight. Additional work outside these hours, including after midnight can usually be arranged if necessary, although this cannot be guaranteed. Any work after midnight is overtime.
MEDICAL: Hospitals at Hodeidah and Sanaa-Taiz.
FRESH WATER: Available; pumping rate 10 t.p.h.– 15 t.p.h.
FUEL: Small quantities of diesel oil available from Yemen Petroleum.
CONSULS: (and Embassies):

Algeria
China
Egypt
E. Germany
Ethiopia
France
Italy
Iraq
Korea
Kuwait
Lebanon
Libya
Saudi Arabia
Syria
United Kingdom
U.S.A.
U.S.S.R.
W. Germany
Yugoslavia

REPAIRS: Light repairs can be carried out.
SURVEYORS: Lloyd's Agency available.
AIRPORT: Flights to Sanaa. Also flights from the new Hodeidah International Airport.
TIME: GMT plus 3 hours.
HOLIDAYS: For 1981: January 16th, Prophet's Birthday; May 1st, Labour Day; May 28th, Mi'rage Feast; June 13th, National Feast; June 12th, Al-Shaabania (15th Shaban); July 30th to August 2nd, End of Ramadan Month (Id-El-Fitr); September 26th, Revolution Anniversary; October 14th, Revolution Day; October 9th-13th, End of Pilgrimage (Id-El-Adha).
Friday is the weekly day of rest, Sunday being a normal working day. There are also a number of Moslem holidays, the date being based on the Western calendar. Work is usually possible on such days but cannot

be guaranteed. Holidays for special occasions are also liable to be declared at short notice. Friday if worked 50% and public holidays 100% surcharge. During the Moslem fast period of Ramadhan lasting about twenty nine days, which again varies from year to year, work is slower.

SHORE LEAVE: Allowed. The Master should prepare a list of persons wishing to go ashore as Agent has to issue I.D. cards.

REGULATIONS: It is strictly forbidden for crew and passengers on board to take photographs while a vessel is in the harbour approaches or secured to the jetty in harbour.

Any vessel which permits oil and/or water to be discharged into the harbour will be liable to a minimum penalty of US $500.

DEVELOPMENTS: A new container-Ro/Ro quay is under construction and will be ready late 1981. Also see "Report" below.

REPORT: Received August 1979.

Hodeidah Port is situated 5 km. away from the old town, built in 1961, the population of which is about 200,000. It was built on the Red Sea Coast at a place S.E. of Khour Ras Alkatheeb, 4 km. away from the town of Hodeidah.

Hodeidah port is built at a location safe from storms and strong winds. The port is under the administration of the Ministry of Public Works, managed by the Hodeidah Port General Corporation. It has a direct connection with the capital city of Yemen, Sana'a, by a modern highway and another connecting the twin capital Taiz.

The official characteristics of the port are given as an external pool, 10 m. in depth, where ships can anchor. A channel, minimum 45 m. wide, about one km. long and 7.9m. to 8.3 m. deep, enters into the inner pool. Maximum draft allowed is 25 ft. at HW. Buoy markings and signals for safe entry and departure are available The dimension of the inner pool is irregular, about 500 m.×400 m. Overall depth is 7.6 m. at LLW, except for 100 m. wide strip along the 300 m. berth where the depth is 8.5 m.

The port consists of a quay for loading and discharging and one special jetty for tankers. The total length of the quay is 570 m. forming 4 berths of 120 m., 150 m., 150 m. and 150 m. respectively. The quay can receive vessels up to 180 m. in length with a draft of 25 ft. in HW. The quay is equipped with 4 electric shore cranes of 5 tons maximum lifting capacity each and two mobile cranes each of 30 tons capacity.

Discharging speed for bagged cargo is between 250 tons and 300 tons per hatch per day. For general cargo the discharging speed is about 150 tons per hatch per day.

At present, there are 21,660 sq.m. of cargo storage floor space:

Shed No. 1	45 m.×60 m.	2,700 sq.m.
2	96 m.×60 m.	5,760 sq.m.
3	50 m.×60 m.	3,000 sq.m.
4	50 m.×60 m.	3,000 sq.m.
5	25 m.×60 m.	1,500 sq.m.
6	45 m.×60 m.	2,700 sq.m.
7	50 m.×60 m.	3,000 sq.m.

and several open storage yards for heavy machinery and equipment. There are fuel tanks with a storage capacity of 16,000 cu.m. connected to the oil jetty by means of a pipe-line system. A wireless station for communications, from ship to shore and vice versa, is also available.

Future Development: The development of Hodeidah Port includes:

1. Dredging:
   a. Deepening of the approach channel to 9.0 m. below MLW (Mean Low Water) with the provisions of a passing bay and deepening of the port bais to 9.0 m. below MLW.
   b. Deepening to a depth of 9.5 m. MLW alongside Berth No. 2 and No. 6.
   c. An area to the West of Berth No. 1 to a depth of 4.0 m. MLW.
   d. Reclamation of land to construct Berth No. 6.

At the end of 1980 Hodeidah port will have:

Berth No. 1, length 110 m., dredged to 8.0 m.
Berth No. 2, length 150 m., dredged to 9.5 m.
Berth No. 3, length 150 m., dredged to 9.5 m.
Berth No. 4, length 166 m., dredged to 10.0 m.
Berth No. 5, length 195 m., dredged to 10.0 m.
Berth No. 6, length 195 m., dredged to 10.0 m.
Oil berth for 15,000 d.w.t tankers dredged to 10 m.

2. Berth No. 6: 195 m. long berth with a 40 m. wide apron. The corner between berth No. 5 and 6 could be used to handle ro/ro vessels. Berth No. 6 is designed for container ships of: 22,500 d.w.t., length 204.0 m., breadth 31.0 m., draft 9.2 m., container capacity 1,522 units.

One container crane of 30.5 tons capacity will be installed on Berth No. 6 and will be able to load and unload between 30/40 containers per hour.

Ro/Ro Corner: Ro/Ro ship 22,750 d.w.t., length 210 m., breadth 33.0 m., draft 9.1 m.

3. Slipway: Provision of a 500 ton slipway next to the mechanical workshop. Slipway will be able to handle vessels 32 m. in length, 10 m. wide and 3.2 m. draft.

4. Paved Storage Areas: The concrete paving of open storage areas behind the 40 m. wide apron will amount to approximately 80,000 sq. m.

5. Buildings and Other Services: Construction of service buildings will include offices of the Port Corporation, Customs, Labour, First-aid with canteens, wash places and toilets.

6. Oil Terminal: 2 new breasting dolphins and 2 mooring buoys for handling tankers up to 15,000 d.w.t.

7. Floating Craft: A new 75 ton self-propelled floating crane to be provided.

8. Cargo Handling Equipment: 8 high level boom cranes, 1 port type mobile crane, 10 forklifts, 10 tonne trailers with tractors, 3 ro/ro tractors with goosenecks and ro/ro trailers.

9. Grain Silo Complex: The project under construction in Hodeidah port consists of a 20,000 ton Silo and a 14 stall bagging plant which has bagging capacity of 200 per hour. The whole installation has a through of 160,000 tons per year.

Water Mains: These will be extended to berth No. 6 and fire mains from sea water and maintained with a 70 m. head by hydraulic ator.

Special Uses:

Berth No. 4 – grain unloading (40% berth occupancy).
Berth No. 6 – containers (with 30.5 ton fully container crane).

Container capacity will exceed 300,000 tons per year but will depend on the capability to empty containers and create an equivalent to that of the shipping.

Ultimate capacity of Hodeidah port in 1980 with 6 berths will be as follows:

Berth No. 1	150,000 tons
Berth No. 2	200,000 tons
Berth No. 3	200,000 tons
Berth No. 4	200,000 tons
Berth No. 5	200,000 tons
Berth No. 6	300,000 tons
Ro/Ro	200,000 tons
Total	1,450,000 tons

Cargo must be carried by ships with a draft less than 9.2 m.

Anchorage at Hodeidah/Ras Alkatheeb Ports:

Vessels arriving at Hodeidah Roads should anchor in the following positions inside Buoy No. 2.

Lat. 14° 55′ 58″ N., Long. 42° 53′ 53″ E.

Masters should radio or cable Agent the following information at least 24 hours in advance:

(i) Exact ETA.
(ii) Draft – fore and aft.
(iii) Quantity of cargo on board and distribution.
(iv) GRT, NRT and LOA (When vessel is calling for the first time).

Through Hodeidah Radio Station, Calling Sign: 4WD 500 Kc/s.

(Frequency from 0500 hrs. up to 1700 hrs. GMT). 72 and 48 hours prior notice of arrival can also be given through Aden Radio.

Pilotage on entry and departure is compulsory. Normally, no pilotage is allowed after 1630 hrs., or before 0600 hrs. Hence vessels arriving in Hodeidah Roads after 1630 hrs. may not be piloted in until 0700 hrs. the following morning. Likewise, vessels which do not sail before 1630 hrs. may not be piloted out until 0600 hrs. the following day.

Supply of fresh water and shipchandlering is available.

Documents:

4 Copies of Cargo Manifest.
2 Copies of Freight Manifest.
1 Copy of Bill of Lading.

(These should be airmailed to Agent after departure of vessel from port of loading.)

11 Copies of Cargo Manifest.
1 Copy of Freight Manifest.

(To be handed over to Agent by Master on arrival of vessel.)

Port Formalities:

1. Doctor.
2. Immigration.
3. Customs.

FOLLOWING TO BE STRONGLY OBSERVED BY ALL MASTER/CREWS OF VESSELS CALLING AT HODEIDAH:

1. Sale of wines and spirits prohibited.
2. Discharging water onto quay and dismantling ships engines at berth not allowed.

In addition to above, Masters/Crews should be advised to take serious note of all prohibitions stipulated in the Port Tariff, see "General" before first port – "Fines".

AUTHORITY: Hodeidah Port Authority.

AGENT: The Hodeidah Shipping & Transport Co. Ltd., P.O. Box 3337, Hodeidah, Yemen Arab Republic. Tel. 2403/4/5. Cables: "HODSHIP". Telex: 5510 (Hodeidah) and 2218 (Sana'a). Answerback: "HODSHIP". Branches at Mocha, Saleef, Taiz and Sana'a.

MOCKA: 13.17 N. 43.10 E.

Mocka new port opened in June, 1979, with equipment for loading and unloading.

BERTHING: 150 m. of quay for vessels of up to 26 ft. draft (Depth 27 ft). Vessels may berth simultaneously. Cargo is discharged direct onto trucks or onto open area. New sheds are under construction.

TUGS: 2 available.

FUEL: Not available.

TIME: GMT plus 3 hrs.

REPORT: Received August, 1979.

The project of constructing Mocka Port has been in execution since April, 1978. The construction was completed during April, 1979 and the port was officially opened to International traffic in June, 1979.

Jetty: The port consists of a jetty of 150 m. in length and 35 m. wide with a draft of 8.5 m. during low tide. This jetty can accommodate 2 vessels at a time, each of 150 m. length, on both sides and a Ro-Ro vessel at the head. A protecting jetty for breakwaters is also constructed for controlling the force of strong waves. It is 750 m. in length and 15 m. wide with various depths from 5 m. to 3.5 m. This jetty is constructed for the purpose of protecting the main jetty and can receive coasters and lighters of aforesaid drafts.

Anchorage: The dimension of the manoeuvring area, for vessels securing at berth and departing from the main jetty, is 420 m. The length of the channel leading to the manoeuvring area is 2,000 m. with a draft of 28 ft. 5 in. during low tide, whereas the draft during high tide is about 30 ft. Vessels calling at Mocka should anchor at the following position: Latitude 13° 20′ 01″ N., Longitude: 43° 13′ 02″ E.

Storage of Cargo: The reclaimed area for storage of discharged goods consists of 300,000 sq.m.

Future Developments: There are plans for building other jetties together with protecting jetties in the near future.

Location: Mocka is connected to Hodeidah by a road of 240 km. out of which 45 km. is gravel and will be surfaced during 1979 as programmed by the government. Mocka is also connected to the twin capital of the Republic, Taiz, by a road of 110 km.
Bunkers: Bunkers, at present, are not available at this port. Any vessel calling at this port is required to supply fresh water for drinking purposes to all labourers during stevedoring operations.
Radio: Vessels calling at Mocka are advised to contact Agent through Hodeidah Radio Station, call sign, 4WD, 500 kc/s. (frequency from 0500 hrs. up to 1700 hrs. GMT), as, at present, this port is not equipped with a wireless station. It is proposed to establish one during 1979.

SHIPMASTER'S REPORT: August, 1980.
Vessel: 6,000 d.w.t., 104.0 m. LOA. Discharged 2,000 tons of RBD palm oil.
Port Limits: None defined, however vessel is in port limits and 'arrived' once anchored within the anchorage marked on BA. chart 1955.
Documents: 1 copy personal effects declaration, 1 copy stores list, 1 copy inoculations and vaccinations and at least 10 copies of cargo manifests, 3 copies of crew list.
Anchorages: Vessel anchored safely in a position with the North Fort Barge 103° True – 1.74 miles. Vessel's max. draft was 20 ft. and there was 30 ft. of water below the keel at 1 hour before low water. It is inadvisable to proceed further South, especially at night due to the placing of unlit channel marking buoys by the port.
Pilotage: There are presently two berths, one on either side of a finger wharf. The Pilot boards at the anchorage and brings the ship alongside one of these berths. There are 3 Pilots in Hodeidah and 1 in Mocka.
Max. Size and Restrictions: Max. permissible draft is 26 ft. salt water and max. LOA permissible is 500 ft.
Radio: None. The port operates VHF on Channels 16 and 14. There are no fixed hours and the port radio is in operation only when the port wishes to communicate with the vessels
Radar: None.
Tugs: 2 tugs assist vessels for berthing and unberthing. We were assisted by the 'Markaron' (2,000 h.p.).
Cranes: None. There are mobile cranes available with the prior arrangements of the ship's Agents. Otherwise ship's gear is mainly used.
Stevedores: None in the strictest sense. Labour is recruited by the Agents and made available on board.
Tankers: There is no facility for discharging petroleum cargo.
Density: 1025.
Fresh Water: Not available.
Fuel: Not available.
Fire Precautions: None.
Consuls: None.
Repairs: Not available.
Drydocks: None.
Surveyors: None.
Watchmen: None.
Customs Allowance: Bonded stores are not sealed. Master is verbally informed not to make any issue from the bonded stores without the Customs permission. All officers and crew who declared their quota were allowed to keep same.
Repatriation: Possible, but local Agent has no knowledge of how to effect it.
Airport: None.
Time: GMT plus 3 hours.
Shore Leave: Allowed. The town is situated about 4 km. from the jetty. There is no entertainment that seamen can find in this town and it is not advisable to be ashore after dusk.
ID Cards: None are issued but ship's personnel going ashore have to carry their seaman's book or passport along.

AGENT: See "Hodeidah".

RAS ALKATHEEB: 14.55 N. 42.53 E.

The Port of Ras Alkatheeb is situated 14 km. from the main city of Hodeidah and connected by a gravel road which is in the process of being resurfaced and broadened with two traffic lanes on the same alignment, thus providing a first class road transport link between Hodeidah and Ras Alkatheeb. Also see "Hodeidah".
BERTHS: The port has a berth 180 m. in length and 6 m. wide, pontoon type, with ships berthing on either side. This port can receive vessels with a max. draft of 26 ft. at high tide. Besides, the port also has a pontoon comprising of 60 m. in length and 16 m. wide with a draft of 14 ft. Vessels can be secluded with barges and coasters with a draft of 14 ft. which can be connected to the shore, thus enabling ships to discharge directly onto waiting trucks. Said pontoon is mainly used for bagged cargo on direct delivery basis.

Presently, this port does not have shore crane facilities and all unloading is done with ship's own gear.
Storage and Delivery: Due to lack of storage facilities at this port, delivery at present, is given directly under the hook.

SHIPMASTER'S REPORT: November 1980.

1. Port does not accept Vessel's Registration until vessel is anchored between Buoy No. 1 and No. 2. This as per the Port Radio VHF station.
2. Buoy No. 2 is placed about 6 cables N.N.W. of charted position.
3. Do not attempt entry at night since Buoys are unlit and there are many uncharted stranded wrecks visible only during daytime.
4. Tugs available: 4×700 b.h.p. and 3×1,800 b.h.p. Pilotage only during daytime.
5. Vessel berthed at Ras Khatib pontoon. Max. draft 8.0 m., total effective length of pontoon 270 m.
6. Port issues a directive to Agents giving estimated time to discharge. If not completed, port charges at the rate of 4 Rials/per metre/per hour of stay extended.
7. Distance from Ras Khatib berth to town 15 km. Only 10 to 15 shore leave passes given to vessel regardless of number of crew.
8. No chipping and scraping permitted but painting is allowed.
9. Fresh water inside port is $4/– per ton, at Ras Khatib $20/– per ton by barge.
10. Provisions available but expensive.
11. Repatriation possible but very difficult due to having to obtain permission from Saana (Capital).
12. Cargo work is fast, 260 tonnes of cement per gang per day. Normal shift 0730 – 1200 hrs. and 1500 – 2330 hrs.
13. As per "Pilot", there will be dredging carried out soon and also lighted buoys will be placed.
14. Ras Khatib light Fl. 3 sec. of very low power.
15. Yellow fever inoculation not compulsory unless coming from infected area.

SALEEF (Salif): 15.18 N. 42.41 E.

Saleef port is a natural port on the Red Sea, approximately 80 km. North of Hodeidah port. Two routes, one round the North end of Kamaran Island and the other around the South end provide suitable access to the harbour.

As prevailing winds are generally Southerly or Northerly, vessels are able to approach the berth from downwind. This is important as vessels will probably have to berth without tug asistance. Initially, mooring facilities are designed for 50,000 d.w.t. vessels and consists of a wharf head 20 m. wide, 93 m. long with two dolphins. A 10 m. wide trestle connects the wharf head to the shore. Facilities are designed to absorb the berthing impact of a ship approaching with a velocity component of 15 cm. per second perpendicular to the berth face and for a 50 tons mooring line pull.
Future developments: For further developments of Saleef port, a French consulting firm has been awarded the contract, as consultants only, to submit a report on future developments of this port.

SHIPMASTER'S REPORT: December 1979.
Acknowledgements: Most of the information has been gleaned from local Agency representatives and Capt. A. Saeed, Harbour Master.

Reference has been made to Red Sea Pilot and various BA. Charts. Local written information is unavailable for the area concerned.
General: Salif lies some 60 km. North of Hodeidah, it is a natural deepwater harbour sheltered by Kamaran Island.

Since 1976 the port has enjoyed moderate expansion and can now boast a modern jetty capable of berthing ocean going vessels; other pontoon type berths are available, these being linked to the shore by small stone jetties. At present the port can accommodate two vessels of up to 200 m. length with a draft of 12 m.

Salif is geared for the export of bulk salt and the import of grain and some general cargo. In the near future a further pontoon type berth is due to come into operation to be used solely for the import of bulk cement. A bagging plant and silo have been constructed to handle the additional cargo.

This report is mainly directed to the facilities associated with the import of grain, however where possible relevant information has been included which could prove useful to other vessels trading in the area.
Documents:
6 Crew Lists with passport numbers.
2 Bonded Stores Lists.
2 Personal Manifests.
2 Vaccination Lists.
3 Copies Cargo Manifest.
Local inward forms made out on arrival.
Approaches: (BA. Charts: 543 and 548). Recommend approaching around the North end of Kamaran Island, as mentioned in Red Sea and Gulf of Aden Pilot, page 390.

The lighthouses stand out well, but at night they are not lit (December 1979). The only difficulty in making Salif, in daylight, is passing to the South of N.W. shoal light. The channel at this point being about one mile wide. At night the lighthouses prove quite good radar targets, and the various islands etc. show up quite well. Once around the top of Kamaran Island course can be set down Kamaran Passage to the anchorage area off Ras el Salif. Charterers frequently advise that passage is possible South of Kamaran Island, however this is not advisable; the leads mentioned on the chart are very difficult to see and there is no room for error.
Anchorage: No specific area designated but anywhere in the vicinity of Salif Jetty. For vessels waiting for the wheat berth it is best to anchor about 0.75 miles West of Ras el Salif. Good holding ground in about 14 fathoms of water. For vessels with poor radar it would be best to anchor outside Kamaran Island until daylight, when passage can be made in safety.
Weather: See "Red Sea Pilot" for information. At Salif the wind usually picks up during the day and this can delay berthing if the strength is above force 4.
Pilotage: Pilot boards in anchorage area from medium sized launch. Yemenese Pilot with limited English.

Daylight pilotage only.
Berthing: Vessels berth, at the bagging plant pontoon, head to wind. The pontoon consists of a flat topped barge made fast to a small stone jetty; it is well fendered with car tyres. The offshore anchor is used whilst coming alongside and a launch runs various ropes ashore to posts set on the land. Five ropes are required either end and it is necessary to join the first few together as considerable lengths are initially run. Th bagging pontoon can only accommodate one vessel at a time.

The general cargo and salt exporting jetty lies some distance to the South of the bagging plant. This pier can take one vessel of up to 200 m. in length. Facilities at this berth are an improvement over the pontoon, however for the import of grain type cargoes, it is not so efficient, it being necessary to bag the cargo by hand. Both berths can take vessels with up to a 39 ft. draft.

Buoys are at present being laid to the North of the bagging pontoon and these could prove an obstacle for vessels berthing. The moorings are being laid to assist vessels making fast to the new cement pontoon (see "Projects").

Quarantine/Health Regulations: Doctor boards on arrival, either at anchorage or alongside. No health forms as such. Smallpox only vaccination certificates required unless vessel from infected area when Yellow Fever and Cholera certificates are needed. No deratting facilities.

Customs: Usual Islamic laws in force. Bond not sealed and apparently no objection for crew to consume spirits/beer on board. On no account must alcohol be given/sold to local Yemenese.

Immigration: Passports are inspected on arrival. (Harbour Master acts as translator for Immigration Authorities.) Shore leave granted with passes for Salif area only. Special permission has to be given to proceed outside local area, i.e. Hodeidah.

For crew repatriation, passports are taken to Sanaa by Agent for necessary visas to be arranged.

Medical Facilities: One doctor resides in Salif, Yemenese and speaks English. He will attend the ship rather than the patient visiting him. The nearest hospital is in Hodeidah.

Port Operations (Bagging Plant): Foremen and workers are hard working. The foremen reside in caravans close to the bagging plant whilst most of the stevedores come from Salif.

The method of discharge is to load a number of diesel driven evacuators on deck and by various pipelines, these are connected to a storage hopper situated on the pontoon/barge. The hopper is connected to a small bagging plant and by means of conveyors the sacks are loaded onto road transport.

Discharge rates per 24 hours worked between 1,600 tonnes and 1,850 tonnes. Charter Party rate indicated about 750 tonnes per day. The takeaway rate from the hopper appears to be adequate with plenty of road trucks available. The grain is shipped immediately to different parts of the Yemen.

It is usual to carry sufficient bags to enable the complete discharge of the grain to go unhindered. The bags are baled and discharged onto the pontoon at regular intervals.

Ship's gear is required at each hold to sling the pipes that lead from the evacuators into the hatch. It is also required for discharging the gunnies and for loading the evacuators (1.5 tonnes). The evacuators appear reliable but spillage of diesel results during re-filling etc.

Fresh Water: Available but expensive. Supplied by road tanker at 15 tonnes a time, it is necessary to use ship's pump for pumping the water aboard. Agents require ample notice prior to supplying water.

Fuel: Heavy oil and diesel oil not available unless barged from Hodeidah.

Stores: Not readily available; fresh stores difficult to obtain.

Agency: The main Agency lies some 60 km. by track away, and the ship is attended by a runner who commutes between Hodeidah and Salif. Considerable delays result before ship's business can be completed and it is necessary for everything to be in writing; repatriation, in particular, is difficult for the organiser as well as the traveller.

Communications between Salif and Hodeidah are non-existent, a telephone line exists, but this is out of order, it is however possible to communicate directly through Portishead Radio and sometimes the only way to get messages out.

Local currency and American Dollars are obtainable from the Agents. It is difficult to obtain the money from the Agents and generally it is best to arrive with sufficient cash on board to cover any expenditure.

To arrange repatriation it is necessary to allow at least six days. Visas have to be obtained from Sanaa and tickets arranged. If pre-paid tickets have been sent from U.K., then they must arrive in ample time. The airport at Hodeidah has regular connections with Sanaa which in turn is linked into most air routes via Paris. Transportation from the ship to Hodeidah is by Land Rover or similar four wheel drive vehicle.

Port Regulations: Nothing in writing. The Harbour Master, Capt. Saeed, is the person to approach if anything required. Apparently Salif is designated a military zone and this is the reason no written information is available.

Gangway: The vessel only lies alongside for a distance of about 80 ft. amidships and consequently a pilot ladder is used instead of a gangway or brow. If this causes any difficulty, ship's lifeboat can be used as a ferry between gangway and shore.

Watchmen: Supplied by local Police/Army. They remain aboard during vessel's stay and keep pilferage to a minimum. They also keep close watch on any alcohol that may be obtained by local Yemenese.

Shore Leave: See "Immigration".

Garbage: No facilities for taking garbage away from the ship; best to dump waste food etc., whilst retaining cardboard boxes, and plastic containers.

Repairs: Possible to immobilize main engines, as once on the berth it is unlikely to shift. No repair facilities ashore.

Time: GMT plus 3 hours (no change).

Flag: Yemen Arab Republic Flag must be flown at all times. Red, white, black horizontal stripes with a black star in the white section.

Consuls: Situated in Hodeidah or Sanaa. Harbour Master available for Noting Protest, etc.

Tugs: None available for berthing though frequently tugs operate in the area towing barges, pontoons, etc.

VHF: Situated in port office but hours of working very flexible. The Harbour Master normally calls any vessel up shortly after anchoring.

Fire/Ambulance: None available.

Projects: A new pontoon berth, similar to the grain berth, is being constructed about 0.25 miles to the North. Silos have been erected close to the shore and are capable of storing 9,000 tonnes of finished cement. A bagging plant has also been constructed next to the silos. It is intended that cement be shipped, in bulk, and with evacuators discharged into the silos. This project is due for completion sometime in 1980.

NOTES

Please also advise Shipping Guides Ltd.

Yemen, People's Democractic Republic of

ADEN, (including Little Aden): 12.48 N. 44.54 E.

DOCUMENTS:

3 Crew Lists for Ship's Agent, Police and Immigration.
3 Passenger lists for Ship's Agent, Police and Immigration.
1 Health Form to be shown to Pilot on boarding and handed to Ship's Agent.
Manifests, Bills of Lading if landing cargo only.
Ship's Register to be sighted by Pilot.
Arrival Declaration to be filled in by Ship's Agent after arrival.
Dangerous material declaration to be handed to Pilot on boarding.

PILOTAGE: Compulsory for all vessels proceeding to oil berths or over 200 g.r.t. To call Pilot fly International Code Flag "G" or red/white/red lights at night. Call "Harbour Control" on VHF Channel 16, or R/T 2182 kc/s. 48 hours notice of ETA with draft to Harbour Office.

Pilot boat will meet ship at the Fairway Buoy in all weathers. Pilot boat is 50 ft. launch painted red, flying Pilot flag by day or white/red lights at night. Pilot will board on port side of ship by pilot ladder. Vessels waiting Pilot can anchor anywhere in Outer Harbour except in a Prohibited Area of 2,000 ft. from Fairway Buoy.

ANCHORAGES: Ample anchorage area available with depths from 18 to 54 ft.

(a) Anywhere North of Fairway Buoy clear of Main and Little Aden Channels and clear of Prohibited Area mentioned above.
(b) Deep water anchorage anywhere to S.W. of Fairway Buoy clear of Little Aden Channel and Prohibited Area mentioned above.

MAX. SIZE:
Aden:

(a) Max. length 900 ft., breadth no restriction, depth 38 ft. at datum for vessels taking bunkers from A.B.C. (Aden Bunkering Co.).
(b) Vessels taking bunkers from Mobil, Y.K.T.C. (Yemen-Kuwait Terminal Co.), Stanvac and Esso, max. length restricted to tankers of 750 ft., and passenger ships of 600 ft., breadth no restriction, depth 39 ft. at datum.
(c) Larger vessels can be considered on application to the Port Officer. Longest vessel to enter 940 ft.

Little Aden Refinery:
Max. length 760 ft., breadth no restriction, depth 40 ft. at datum and max. deadweight 55,000 tons.

Note: In both harbours vessels manoeuvring require 2 ft. water under keel, and vessels of draft 37 ft. and above require 4 ft. water under keel.

Ballast draft for Tankers: All tankers when manoeuvring within the port shall be ballasted properly to a mean ballast draft which shall not be less than half the Summer draft and the trim by the stern not exceeding 6 ft. These figures are the minimum for normal conditions and may be increased when conditions necessitate at the discretion of the Pilot.

HEALTH: Vessels requiring pratique fly International Code Signals or 3 red lights at night.

Control of quarantinable and infectious diseases is direct responsibility of Port Health Officer. All passengers from infected local areas except children under age of one year are required to have valid international certificate of vaccination or revaccination against yellow fever and cholera. Valid certificates of vaccination against smallpox are required of arrivals from all countries.

RADIO: All ships landing passengers are boarded by Assistant Port Health Officer unless radio pratique has been given. Pratique may be obtained by wirelessing Port Health Authorities no earlier than 12 hours and no later than 4 hours before arrival, in accordance with international procedure. All landing passengers medically inspected and vaccination certificates checked on board before free pratique granted. Ships having infectious diseases on board are also boarded; after examining the case and taking any necessary precautions the Assistant Port Health Officer grants restricted pratique. Ships also inspected for issuing deratting exemption certificates. Deratting carried out when necessary and deratting certificate issued.

Cable and Wireless (Mid East) Ltd.: Mercury House, Ras Boradi (Tel. 22223/5).

6 In		Dolphin & breast buoys (oil)	800	38
7 In	T	Dolphin & breast buoys (oil)	750	39

The capital letters in column one denote alternative designation of mooring buoys/dolphins.

Free zone. Initial Stage 525,420 sq. ft. open space and 162,000 sq. ft. covered space. Import and export industrial facilities. No restrictions, no taxes. Transhipment storage free for unlimited period.

STEVEDORES: ETA advice to Ship's Agents at least 48 hours before arrival.

MEDICAL: Advance notice for medical attention not normally required except for serious cases requiring doctor's attendance on board, or ambulance cases. Vaccination certificate required for landing. Hospital facilities available.

TANKERS: Tankers carrying dangerous petroleum (flash point below 73° F) and those not gas free or carrying more than 3 tons of category one cargo (explosives) cannot enter Aden Harbour during hours of darkness. They can enter Little Aden day or night. Slop (residue) discharge facilities available at Little Aden. 4 tanker berths for discharge/loading at Little Aden with max. datum depth of 40 ft.

Berthing at Oil Harbour: Functions of Oil Harbour Little Aden to receive crude oil in bulk for oil refinery and to export refined petroleum products. Vessels carrying cargo for refinery other than oil discharge at Inner Harbour.

Oil harbour has finger jetty and 2 T-head jetties which provide berths for 4 tankers. Tankers of up to 55,000 tons Summer deadweight can be accommodated.

Berth	*Type*	*Normal maximum length of ship in feet*	*Datum depth in feet*
1	Dolphin & mooring dolphins	750	40
2	Dolphin & mooring dolphins	750	40
3	Dolphin & mooring dolphins	750	40
4	Dolphin & mooring dolphins	750	40

DENSITY: Salt water at all times.

FRESH WATER: Ample available, delivered by barge in Aden at about 50 t.p.h. Ordinary water in Little Aden supplied by pipe-line at about 40 t.p.h. and condensate at about 2 t.p.h.

FUEL:

(a) A.B.C. (4 berths).
Marine fuel 2500 sec., 1000 sec., 600 sec., 200 sec.
Diesel oil and gas oil.
(b) Yemen-Kuwait Terminal Co., Mobil, Esso, Stanvac.
Marine fuel – all grades below, 3,500 sec.
Diesel oil and gas oil.
All supplies done on a Nomination basis through the Company's Head Offices, with the vessel giving at least 48 hours notice to Aden.

FIRE PRECAUTIONS: As per the Refinery regulations. Tug wires to be rigged.

GANGWAY/DECK WATCHMEN: It is recommended watchmen are employed; they can be supplied by Ship's Agent.

OPENING/CLOSING HATCHES: Normally carried out by stevedores, derrick-topping by ship's crew. Vessels not to move in harbour with beams off.

CUSTOMS ALLOWANCE: Tobacco/Wine, Spirit allowance. No restriction at the moment. Bonded stores not allowed to be supplied more than 1 hour before ship sails.

IDENTIFICATION CARDS: Not required at the moment.

CONSULS:

REPAIRS: Workshops are equipped to carry out: Boiler repairs; Plating and sheet metal work; Galvanising work/moulding work; Welding and blacksmith's work; Main and auxiliary machinery repairs; Carpentry and joinery work; Electrical and plumbing work; Refrigeration repairs; painting, cleaning and chipping. Repairs afloat to vessels up to 80,000 tons are undertaken; repairs to the largest vessels carried out mostly in Outer Harbour.

Wireless engineering section with fully qualified personnel giving round-the-clock service of repairs and maintenance of radar and wireless equipment.

DRY DOCK: 1 sideways slipway taking 1,500 tons and floating dock lifting capacity 4,500 tons. Length 137 m., breadth 31 m. Max. draft 6.0 m.

REPATRIATION: Arranged through Ship's Agent and Immigration.

AIRPORT: About 5 miles from port. Flights to U.K. via Beirut (Middle East Airlines), Khartoum (Sudan Air Lines).

TIME: GMT plus 3 hours. No alteration of clocks.

HOLIDAYS: Most holidays are religious which have moveable dates. National holidays are 14th October and 30th November. Cargo work usually carried out during all holidays. Friday is a public weekend holiday.

POLICE/AMBULANCE/FIRE: Ambulance Crater 53232; Harbour Police 22851; Port Health 22626/7; Fire 22222.

TELEPHONES: No connection to ships but link calls can be made on VHF through Yemen Communications using Channel 16 to call and working on Channel 26. Some Agents have private VHF channels.

GENERAL: Outer harbour contains ample anchorage area for vessels requiring datum depths up to 54 ft. Inner harbour approached by 2.7 mile dog-leg channel, dredged to 35 ft., from Fairway buoy in Outer Harbour where Pilots board. Inner harbour protected by breakwater at Steamer Point and by rubble mound. It provides 24 buoy or anchor-and-buoy berths, including 13 with oil bunkering facilities. Majority of these berths have a datum depth of 30 or 38 ft., with max. length of ship ranging from 275 ft. to 750 ft. In addition 3 dolphin berths, with bunkering facilities, of 39 ft. datum depth and normally accommodating ships of 750 – 900 ft. max. length; vessels of greater length can be accommodated with the approval of the Port Officer. Quays and wharves cater for shallower-draft vessels and lighters.

Oil harbour, serving refinery at Little Aden, reached by 38 ft. channel from Fairway buoy, provides facilities for tankers of up to 750 ft. All berths and anchorages are under the jurisdiction of the Port Officer.

SHORE LEAVE: *Regulations:* In accordance with Art. 8 of the Immigration Rule No. 28 of the year 1969, all crew members coming ashore will be excused from obtaining visa provided they surrender their passports to the Immigration Officer-in-Charge. These passports will be given back to the holders before they return to their particular vessels. Any crew member unable to comply with these instructions will not be permitted to visit the town.

Ships' crew are not allowed to stay ashore after 0300 hrs., unless permission is granted for longer period.

REGULATIONS: Vessels must fly the National flag of P.D.R.Y. at foremast. No movement of "dangerous petroleum" at night. Vessels must vacate oil berths on completion of bunkering. Main engines must not be immobilised in an oil berth. Sufficient crew must remain aboard vessel at all times to move her.

SHIPMASTER'S REPORT: 1976

Documents:

Pilot: Sights Ship's Register to check tonnages.
Customs: 2 Crew Lists; 1 Bond List.
Immigration: 2 Crew Lists.
Doctor: 1 Health Form; 1 Vaccination List (smallpox).

Note: Crew List should have consecutive numbers as well as Agreement numbers.

Agents:

2 Crew Lists; Arrival information sheet; Statement of Owners full address also Cable address; 2 Arrival declaration for Yemen Ports Authority; 2 Aden Port Log; 1 Charges sheet for Mail; 1 Sailing information sheet; 1 Currency refund sheet.

Agent brings these Forms on board and will assist with filling in the information.

Communications: It was found impossible to make Radio Contact with Aden prior to 5 days before arrival. Best time seems to be after Aden sends its Traffic List. VHF contact was made at 12 miles as the hills around Aden appear to blanket signals when further away. Channels 16, 13, 8 or 6.

Approach: This is straight forward. The B.A. Charts appear to be well up-to-date. The Fairway Buoy is easily seen at 8 miles. Pilot boards here. Pilot ladder required. Authorities will not allow the accommodation ladder to be used.

Mooring: There was a trainee Pilot with both the inward and outward Pilot.

Ship was swung using starboard anchor and 1 tug aft. Berthed at No. 4 Berth. Forward: 3 ropes to buoy on inside plus starboard anchor 5 shackles. Aft: 1 rope from port quarter and 1 from starboard quarter taken to outside buoy, then 2 ropes, 1 from each quarter taken to inside buoy. Ship then hove to be centred between the 2 after mooring buoys. When ship in position oil pipe-line, on floats is towed alongside.

Visit: Agent boarded with Doctor. At first Doctor was insisting all had to have Cholera vaccinations but is not really necessary. Immigration and Customs boarded. All pleasant and helpful. Bond was sealed.

Port Facilities: 2 fairly powerful tugs. Numerous mooring boats, 1 floating crane seen but as to lift capacity this was not ascertained. Port is run by The Yemen Ports Corporation. Like the Agency it is State owned.

Watchmen: Agents automatically provide 2 watchmen. Seemed to be alert.

Regulations: Masters are requested to assist the Port Authority by not allowing Bumboatmen or fishermen to board without written permission. The Port Authority advises Masters to be most careful if they do issue written permission. There were no bumboats about and no one seeked permission to come aboard to do business.

One half hour prior to sailing the Pilot signal red-white-red in a vertical line or "G" to be hoisted also call Port Control on VHF 16.

Use of ship's whistles or sirens is very controlled.

Bunkering: Ship's crane used to hoist pipe-line aboard. The bunkering operation went smoothly and the Oil people seemed co-operative.

Walport Film Exchange: Agents were cabled but it is necessary for an Officer to go with the Agent to make the exchange.

Mail: Mail posted in London on 22nd March or 23rd March was stamped as having arrived Aden 28th or 29th March.

General: It would seem that the Port Authority, State, etc., are very keen to build up a thriving Port. It would also seem that they endeavour to give a good efficient service. I gather there is a special duty free shop ashore for the purchase of souvenirs, goods, etc.

AUTHORITY: Director General, Port of Aden Authority.

NOTES

Please also advise Shipping Guides Ltd.

Yugoslavia

BAR: 42.05 N. 19.03 E. (See Plan Book)

The 1979 earthquake destroyed some important facilities completely. Others suffered minor damage. However the port is capable of continuing with the same and even more handling capacity.
DOCUMENTS/HEALTH: General Declaration, Health Declaration, Crew Lists and Passenger Lists.
PILOTAGE: Advance notice 24 hours through ships Agent. Pilot boat blue hull, white deck house, with letter "P" on each side. Pilot boards off West Breakwater.
ANCHORAGE: Safe anchorage in about 57 m. off West Breakwater. Anchoring not allowed nearer then 0.5 mile off Breakwater.
RESTRICTION: Vessels enter/leave port by day and night. Tankers allowed only during daylight. Depth entrance 14 m..
MAX. SIZE: Fully loaded vessels up to 14 m. draft.
RADIO: Bar-Radio, call sign YUW, 500 kc/s. and 447 kc/s. Radio telephony on 2182 kc/s on 2 meters band and on Channel 16.

Pilots/Agents can be contacted through Bar-Radio on VHF.
TUGS: Available.
BERTHING: Berth assigned at Agent's request or Receiver's/Shipper's, both for liners or tramps, at the daily meeting of the Harbour Board.
STEVEDORES: The Port Enterprise "Luka Bar" is the sole stevedoring company. Work is done in 2 shifts: first 0600–1400 hrs., second 1400–2200 hrs. Third shift can be ordered at daily meeting, paid as overtime.
MEDICAL: Medical care available at Medical Centre at Bar.
TANKERS: New oil berth can accommodate tankers up to 80,000 d.w.t., draft limit 14 m. Bunkers from local bunker station. Tank cleaning, pumping of slops and degassing not permitted in port.

Tankers must be ready to leave port at 30 minutes notice, at any time and at request of Port Authorities.

Grain silos with 30,000 tons capacity available.
CARGO HANDLING FACILITIES: Available for all kinds of general cargo, containers, pallets, Ro-Ro, bulk, fuel oil and chemical cargoes. Regular passenger service to Italy and from May – October to Greece.

Grain silos with 30,000 tons capacity available.
DENSITY: Sea water average Salinity.
FRESH WATER: Available from hydrants on quay.
FUEL: Can be obtained from local bunker station. All grades available. A fuel barge may be available in the near future.
GANGWAY/DECK WATCHMEN: Available at Master's request.
OPENING/CLOSING HATCHES: Normally performed by crew, or as per Charter Party.
CARGO GEAR: *Mobile Shore Cranes:* 6×5/6 tons, 3×3 tons, 3×8 tons. Fork-lifts capable of handling containers, Vacuvators, 3 cranes for bulk cargoes. 1×40 ton container crane. If not agreed in C/P, loading and discharging is by shore cranes.
CUSTOMS ALLOWANCE: About 40 cigarettes and reasonable amount wine/spirits per man per day.
IDENTIFICATION CARDS: Shore passes issued by local Police.
CONSULS: Same as "Rijeka".
REPAIRS/DRY DOCKS: Dry Docks at Shipyard "Veljko Vlahovic', Bijela 36 miles from Port of Bar, capacity of about 130,000 d.w.t. and 35,000 d.w.t., available for all types of deck and engine repairs. Minor damage can be done while loading/discharging.
REPATRIATION: From Bar by bus, train (International Lines), and ship. From Airports Tivat, Titograd and Dubrovnik by plane.
TIME: Central European Time, GMT plus 1 hour. No daylight saving.
SERVICES: At nearby town of Tivat is representative of Yugoslav Register of Shipping, and compass adjuster. Other services at Master's request.
HOLIDAYS: January 1st and 2nd, May 1st and 2nd, July 4th and 13th, November 29th and 30th. Work can be arranged on Sundays and 2nd day of two-day holiday.
POLICE/AMBULANCE/FIRE: Police Tel. 92; Ambulance Tel. 94: Fire Tel. 93.
SHORE LEAVE: Allowed.
DEVELOPMENTS: See "Plan".
AUTHORITY: Lucka Kapetanija.

AGENT: Jadroagent – Bar. Topolica b.b. P.O. Box 10, 81350 Bar. Cable: Jadroagent Bar. Telex: 63141 yu jadrag.

DUBROVNIK (Gruz Harbour): 42.38 N. 18.07 E.

DOCUMENTS/HEALTH/HOLIDAYS: Same as "Rijeka".
PILOTAGE: Compulsory. Pilot boards at a point situated approximately in centre of triangle formed by Kolocep Island, Daksa Island and Grebeni Rocks. Pilot boat may be contacted on VHF Channel 16.
ANCHORAGE: In about 22 fathoms in channel between Daksa Island and mainland. This anchorage is exposed to strong N.N.E. winds in Winter time.
RESTRICTIONS: Only port of Gruz is open to commercial traffic, the old port of Dubrovnik (within the city walls) can accommodate only yachts and small craft drawing under 9 ft.
MAX. SIZE: Max. length 230 m., max. draft 32 ft., no limits on beam.
RADIO: Dubrovnik Radio: *Telegraphy:* call sign YUX, working on 500 kc/s. and 447 kc/s., (working 24 hrs.). Traffic list 0030, 0430, 0830, 1230, 1630, 2030 hrs.

Telephony: Working on 2182 kc/s and 2615 kc/s, (working 24 hrs.). Traffic list every odd hour + 20 minutes.
VHF: Listening Channel 16 throughout 24 hrs. and working on all Channels. Duplex Channel 23 with connection to national and international telephone network. All times are GMT.
TUGS: No permanently stationed tug boats, but can be ordered when necessary from other ports.
BERTHING: Berths for 5 ocean going vessels. Six cranes from 1, 5 to 25 tons lifting capacity.
CARGO HANDLING FACILITIES: The port handles some bulk cargoes (grain and bauxite) occasionally and in small quantities but is not specially equipped for handling these and other cargoes.
STEVEDORES: The port enterprise "Luka Dubrovnik" is the sole stevedoring company. Work is done in 2 shifts: first 0600-1300 hrs., second 1400-2100 hrs.
MEDICAL: General hospital and medical facilities available.
FRESH WATER: Available from hydrants on quay.
FUEL: Not available. Only oil for diesel engines in limited quantities. Heavy fuel can be delivered by coastal tankers from Split.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: If not performed by crew, stevedores.
CUSTOMS ALLOWANCE: About 40 cigarettes and limited amount wine/spirits per man per day.
CARGO GEAR: Although operations are performed usually with shore cranes ship must have efficient cargo gear and relative certificates.
IDENTIFICATION CARDS: Issued by local police.
CONSULS: Netherlands.
REPAIRS: Small repairs only.
SURVEYORS: Bureau Veritas.
REPATRIATION: By bus, ship or plane from Dubrovnik International Airport.
TIME: Central European Time. GMT plus 1 hour.
POLICE/AMBULANCE/FIRE: Police, tel. 92; Fire, 93; Ambulance, 94.
SHORE LEAVE: Allowed.
AUTHORITY: Lucka Kapetanija Dubrovnik.

AGENT: Jadroagent – Dubrovnik. Gruska obala 63, 50000 Dubrovnik. Cable: Jadroagent Dubrovnik. Tel. 23464 and 24464. Telex: 27514 yu jadrag.

KARDELJEVO (Formerly Ploce): 43.03 N. 17.26 E. (See Plan Book)

DOCUMENTS/HEALTH/HOLIDAYS: Same as "Rijeka".
PILOTAGE: Compulsory for vessels over 500 g.r.t. Pilot boards vessel at entrance of the channel within a circle of 3 miles radius from Point Visnjica. Pilot station on VHF Channel 16.
ANCHORAGE: Vessels may anchor under lee of the coast between Point Visnjica and Dobrogosce Bay except in case of S.W. and West winds when recommended drop anchor about 1 mile South of Soline Bay (S.E. of the entrance of the channel). Good holding.
RESTRICTIONS: Ship entering channel between Visnjica Point and embankment of right hand bank must keep in middle, leaving buoys to starboard. Recommended speed 5 – 8 knots.
MAX. SIZE: Draft limited to max. 34.5 ft. Length limited to 220 m.
RADIO: Nearest Radio Station Split Radio YUS – 2182 kc/s. and 2574 kc/s.
VHF: Channel 14 and 16.
RADAR: No port Radar service.
TUGS: 2 tugs of 850 h.p. each.
BERTHING: Bosanska Obala (Berths No. 7 and 8): Length 227 m., drafts up to 31 ft. – no shore cranes.

Biokovska Obala (No. 1 and 2) Berths Nos. 4, 5 and 6: Length 368 m., drafts up to 32 ft., seven 5-ton cranes.

Gat Oslobodenja: North side (No. 3) Berths Nos. 1, 2 and 3: Length 410 m., drafts up to 32 ft., one 7-ton crane and three 5-ton cranes. Head: Length 250 m. South side (No. 5) Berths Nos. 20, 21 and 22: Length 507 m., drafts up to 34.5 ft., five 10-ton cranes.

One floating crane up to 100 tons capacity.

Channel depth 28 ft.
BULK CARGO FACILITIES: Grain, ores and minerals by shore cranes equipped for grab discharge at quay No. 3 and 5. Grain through feeders to railcars. Alumina silo (capacity 20,000 tons) at quay No. 1 – length 140 m., draft 30 ft., with loading facilities.
SPECIALISED CARGO HANDLING FACILITIES: No berth specially equipped for handling containers, only by floating crane. Oil terminal for all kinds of oil derivates and chemicals is to be completed in 1980.
BRIDGES: No bridges to pass through.
STEVEDORES: Port Enterprise "Luka Ploce" Kardeljevo, is the sole stevedoring company. Work in 2 shifts: 0600 – 1400 hrs. and 1400 – 2100 hrs. Timber operations normally performed during first shift only. Overtime possible.
MEDICAL: Medical service available. Nearest hospital at Mostar (64 km.), Dubrovnik (110 km.) and Split (110 km.).
TANKERS: New oil terminal with fuel and oil tanks under construction, to be completed in 1980.
DENSITY: 1010 – 1030.
FRESH WATER: Available from quay.
FUEL: Heavy fuel oil and M.D.O. obtainable for all types of vessels by mid-1980. Delivery by tank trucks. Advance notice required.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: May be done by crew, otherwise by stevedores with extra payment.
CUSTOMS ALLOWANCE: About 40 cigarettes and reasonable amount wine/spirits per man per day.
IDENTIFICATION CARDS: Shore pass issued by local Immigration office.
REPAIRS: Only small repairs.
DRY DOCKS: None.
SURVEYORS: Lloyds, A.B.S., N.V. and Yugoregister at Split (110 km. from Kardeljevo).

CARGO GEAR: Although the port is equipped with shore cranes and a floating crane of 100 tons capacity, ships must have efficient cargo gear and relative certificate.
REPATRIATION: Possible by train or bus. By plane from nearest airports, Split (110 km.), Dubrovnik (110 km.) and Mostar (64 km.).
TIME: GMT plus 1 hour.
POLICE/AMBULANCE/FIRE: Police, Tel. 058/79 – 006; Ambulance, 058/79 – 115; Fire, 058/79 – 029.
TELEPHONES: Not possible to place telephones onboard.
SHORE LEAVE: Allowed.
DELAYS: Only occasionally for bulk carriers.
DEVELOPMENTS: Draft is to be increased to 50 ft. by 1985. A new dock and equipment for bulk cargo is also to be constructed by the end of 1985. Ships of 100,000 tons are to be accepted at that time.
GENERAL: Lloyd's sub-Agents: Jadroagent Kardeljevo.
AUTHORITY: Lucka Kapetanija – Kardeljevo

AGENT: Jadroagent – Kardeljevo, Trg Marsala Tita 66, P.O. Box 111, 58340 Kardeljevo. Cable: Jadroagent Kardeljevo. Telex: 26239 yu jadrag. Tel. 058/79-046 or 058/79-117.

KOPER: 45.31 N. 13.44 E. (See Plan Book)

PORT LIMITS: The seaward boundaries of the port are between "Debeli Pt." (Punta Grossa) and Pt. Vilizan.
DOCUMENTS:

5 Crew Lists.
5 Passenger Lists.
5 Cargo Manifests.
2 Freighted Manifests.
2 Bills of Lading.
2 Store Lists.
1 Crew Effects List.
1 Cargo Gear Certificate.
1 Derating Declaration.
1 Health Certificate.

PILOTAGE: Pilot station may be contacted on VHF Channels 16 and 20 from 0600 hrs. until 2200 hrs. every day excluding holidays. Pilot boards 1 mile from entrance in roads or at anchorage. Definite notice to be sent by telex 24 hours before vessel's arrival in port area through its Agent in Koper. In case of bad weather, ship must wait for a Pilot at anchorage.
ANCHORAGE: Port area, depth 17 m., sandy bottom. Safe anchorages in case of S.E. wind near Pt. Vilizan and in case of N.E. wind near Debeli Pt. (Punta Grossa).
RESTRICTIONS: Vessels enter port by day and night, except tankers which enter during daylight hours and at nights in fair weather.
MAX. SIZE: General cargo and container vessels drawing up to 32 ft. and tankers with 39 ft. draft. No length restrictions.
HEALTH: Ship must have Health Declaration and in this case pratique is automatic. In the event of any suspected disease or fever on board, Master must advise Harbour Master or Agent by VHF Channel 16 or by telegraph.
RADIO: Communication on MW and SW through Rijeka Radio.
VHF: Communication on Koper Roads on Channel 16, 20 and 12. On Channel 20 it is possible to telephone outside the country.
RADAR: No service available.
TUGS: In area of old port, 2 available, 750 h.p. and 1,500 h.p. equipped for fire fighting.
BERTHING: 1,200 m. of operative quay with depths from 6 to 12 m. Berth Nos. 2, 8, 9 are equipped with shore cranes. On other berths handling is by ship's own gear.
CRANES: 5 shore cranes with capacity of 20 tons. 3 shore cranes are on Pier 8, 9 and 2 on Pier 2. Mobile cranes: 2×20 tons, 1×12 tons.

Timber terminal is equipped with Portal crane of 8 tons. All harbour services are mechanised, i.e. performed by fork-lifts, trucks, transporters, pallets and other modern means.
BULK CARGO FACILITIES: 2 berths, (No's. 8 and 9) with length 280 m. together equipped with 3 shore cranes (grab discharging/loading) with max. draft 32 ft. Loading/discharging rates for grain, ores, meal, etc. 1,500 tonnes per WWD. Fertilisers etc., 1,000 tons WWD. Also used for handling logs and timber.
SPECIALISED CARGO HANDLING FACILITIES: 2 ro/ro berths for handling ro/ro traffic (up to 15,000 d.w.t.).

The container berth (No. 7, length 150 m., depth 33 ft.) is equipped with 1 × 40 ton container crane with annual capacity of 60,000 TEU. For handling containers the port has 5 straddle carriers for 20 - 40 ft. containers. Containers stacking 2 high, 6 Mafi tugs, forklifts for handling empty containers, forklift truck for ro/ro handling (25 tons) and rubber tyred gantry for loading/discharging containers onto railway cars.

Terminal for liquid chemicals has a depth of 10 m.
BRIDGES: None.
STEVEDORES: Gangs ordered from the Port of Koper Authority, who are stevedores, by Agents and forwarding agents in Koper.
MEDICAL: Medical assistance and hospital available.
TANKERS: Tanker berth for crude oil with max. draft 40 ft., equipped with 3×8 in. arms.
FRESH WATER: Available from any pier. Rate of delivery about 15 t.p.h.
FUEL: None available.
FIRE PRECAUTIONS: Usual precautions.
CONSULS: Italy.
REPAIRS: Small repairs can be carried out at Koper. In Izola, 2 miles from Koper, is wharf "2nd October". The repair service for containers is in the Port.
DRY DOCKS: In Izola for vessels up to 16,000 d.w.t.
SURVEYORS: In Koper – Jugoregister. In Rijeka or Trieste all representatives.
GANGWAY/DECK WATCHMEN: Available at ship's request.
HATCHES: Opening/closing hatches. If not performed by crew, then by stevedores.
CUSTOMS ALLOWANCES: 200 cigarettes for each member of crew and 1 bottle of spirits and reasonable amount of wine per man per day.
CARGO GEAR: 40 ton heavy lift shore crane and container crane (50 tons) available. Loading/discharging mostly effected with ships gear.
REPATRIATION: By bus, by railway from Koper or by air from the airport.
AIRPORT: Ljubljana (Brnik) – 120 km. Rijeka – 100 km. Pula – 100 km. Ronke (Italy) – 80 km.
TIME: GMT plus 1 hour.
HOLIDAYS: New Year's days (1st, 2nd January), 27th April, May Days (1st and 2nd May), 4th July, 22nd July, 1st November, Republic Days (29th, 30th November).
POLICE/AMBULANCE/FIRE: Police No. 92, Ambulance No. 94, Fire No. 93.
TELEPHONES: From anchorage it is possible to telephone through VHF Channel 20. Telephones can be installed onboard at berths Nos. 1a, 1, 2, 3, 4 and 5.
SHORE LEAVE: Allowed after clearing inwards (free pratique).
IDENTIFICATION CARDS: Shore pass issued by local police (without photograph).
REGULATIONS: None.
DEVELOPMENTS: Construction of a new berth for bulk cargoes (No. 10) nearing completion, will become operational in 1980. New ro/ro ramp under construction until 1980. Second container crane on container pier will be operational beginning 1981. Container pier will be extended by 200 m. and work is expected to be completed during 1981. Draft on this berth will be 12 m. Also under construction and expected to be completed during 1980 is a new ro/ro ramp enabling vessels to work ro/ro and lo/lo simultaneously.

SHIPMASTER'S REPORT: October 1979.
Stevedores: Port works 5 days a week in 2 shifts; 1st shift 0600 hrs. to 1300 hrs.; 2nd shift 1400 hrs. to 2100 hrs.; a third shift may be worked from 2200 hrs. to 0530 hrs. Also possible to work 1st, 2nd and 3rd shifts on Saturdays and Sundays.
Pilotage: Pilot station contacted on VHF Channel 16 from 0600 hrs. to 2200 hrs. Vessels berthed alongside during these times. Pilots board about 1 mile from the entrance to the port or at the anchorage. Pilot vessel painted blue in colour and displaying large white 'P' on the bow. Pilots speak very good English. Vessels unberthed 0001 to 2400 hrs.
General: The use of cameras is prohibited within the port area.

AUTHORITY: Lucka Koper.

AGENT: Jadroagent – Koper. Vojkovo nabrezje 30, P.O. Box 60, 66000 Koper. Cable: Jadroagent Koper. Telex: 34234 yu jadrag.

PULA: 44.52 N. 13.50 E.

DOCUMENTS/HEALTH/HOLIDAYS: Same as Rijeka.
PILOTAGE: 48 and 24 hours notice of ETA must be given to Agent. Pilot boards vessel off the breakwater. Merchant vessels bound for Pula must signal their name and port of departure to the signal station at Muzil.
ANCHORAGE: Vessels waiting for berth or free pratique can anchor in the outer harbour at about 0.4 miles West of the island S. Andrija.
RADIO: Coastal station Rijeka-Radio (call sign "YUR").
VHF: Communications with Agents through VHF on Channel 16.
TUGS: Up to 600 h.p. available from shipyard "Uljanik", otherwise from Rijeka.
BERTHING:

Gat Rijeka: North side length: 138 m., depth 20 ft.
South side length: 150 m., depth 17 ft.
Obala Ugljen: length 140 m., depth 22 ft.
Gat Ugljen: East side length: 160 m., depth 22 ft.
West side length: 140 m., depth 17 ft.
Obala Tv.Cementa: length 146 m., depth 20 ft.
Obala Uljanik: length 160 m., depth 22 ft., used only for discharge of steel plates.

CRANES: No shore cranes except one of 5 tons at Obala Tv.Cementa and one of 75 tons at Obala Uljanik.

A floating crane of 45 tons at shipyard "Uljanik".

Two mobile cranes of 17 tons and 20 tons respectively.
STEVEDORES: Port Enterprise "Luka" is the sole stevedoring company. Working 2 shifts: from 0700 to 1500 hrs. and 1500 to 2300 hrs. Saturdays, Sundays and holidays may be worked on overtime.
MEDICAL: Hospital and all kinds of medical assistance available.
FRESH WATER: Available from quay.
FUEL: Available by barge from Rijeka – advance notice required.
REPAIRS: Available from local shipyard "Uljanik".
SURVEYORS: Lloyd's Register, Jugoregister, Norske Veritas.
GANGWAY/DECK WATCHMAN: Service available.
OPENING/CLOSING HATCHES: May be carried out by crew otherwise by stevedores on extra payment.
CUSTOMS ALLOWANCE: About 40 cigarettes and reasonable amount of wine/spirits per man per day.
CARGO GEAR: Loading/discharging by ship's own gear.
REPATRIATION: Possible by train, bus and air.
AIRPORT: At Pula.
TIME: GMT plus 1 hour.
POLICE/AMBULANCE/FIRE: Police tel. 92; Ambulance tel. 94; Fire tel. 93.
IDENTIFICATION CARDS: Shore passes issued.

REGULATIONS: Speed limit: within a line joining Prostina Point (Point Kristo) and Kumpar Point vessels must proceed at a speed not exceeding 8 knots and within a line joining Andrija Island and Sv. Petar Peninsula at a speed not exceeding 5 knots.
GENERAL: Lloyds Agents: Jadroagent-Rijeka.
AUTHORITY: Lucka Kapetanija.

AGENT: Jadroagent – Pula, Obala Marsala Tita 14, 52000 Pula. Cable: Jadroagent Pula, Telex: 25210 yu jadrag.

RIJEKA: (Including Bakar, Omisalj and Urinj)

45.21 N. 14.26 E. **(See Plan Book)**

PORT LIMITS: Outer line of Anchorage area.
DOCUMENTS:

5 Crew Lists
5 Passenger Lists
3 Manifest of Dangerous Cargo (send cable before arrival with description)
3 Store Lists
2 Private Declaration
9 Cargo Manifests
3 Freight Manifests
2 Transit Manifests
2 Cargo Plans
2 Copies of Bill of Lading

Cargo and Freight Manifests and Cargo Plan with Hatch List if possible should be mailed to Agent from loading port.
PILOTAGE: Compulsory for vessels over 500 g.r.t. Pilot boards in the roads within anchorage area limit. Pilot on VHF Channel 8 and 16.
ANCHORAGES: All vessels with exception of those loaded with dangerous or hazardous cargoes, must anchor in the zone enclosed by the following points:

a) 45° 20.0′ N. – 14° 22.7′ E.
b) 45° 17.5′ N. – 14° 20.0′ E.
c) 45° 15.1′ N. – 14° 27.1′ E.
d) 45° 18.4′ N. – 14° 28.5′ E.

Tankers and vessels with dangerous cargoes must anchor in the following zone:

a) 45° 17.8′ N. – 14° 28.0′ E.
b) 45° 15.1′ N. – 14° 27.1′ E.
c) 45° 14.1′ N. – 14° 29.4′ E.
d) 45° 16.1′ N. – 14° 31.8′ E.

HEALTH: To obtain free pratique 24 hours before arrival advise following details: number of crew and passengers, health conditions and possible infectious diseases. No person allowed to leave vessel until free pratique obtained.
RADIO: Rijeka Radio, call sign YUR 500 kc/s, Radio telephone on 2m band covering area of North Adriatic or by VHF Channel 16.
TUGS: 600 to 2,200 h.p. available.
BERTHING: At Rijeka basin:

Gat O. Kersovani: East side length 150 m., West side length 135 m., head 80 m., draft 24 ft.
Ljubljanska Obala: Length 247 m., draft 30 ft.
Gat. V. Nazor: East side length 196 m., draft 26 ft., head 84 m., West side length 170 m., draft 25 ft.
Beogradska Obala: Length 361 m., draft 26 ft.
Gat V. Gortana: East and West side lengths 120 m., draft 24 ft., head 80 m.
Zagrebacka Obala: Length 361 m., draft up to 27 ft.
Gat. L. Ribara: Only East side length 160 m., draft 28 ft., head 50 m.
Splitska Obala: Length 182 m. draft 22 ft.
Trscanska Obala: Length 189 m., draft 18 ft.
Lukobran P. Drapsin: Operative length 600 m., draft up to 21 ft.

At Susak basin:

Obala 10.rujna: Length 240 m., draft 21 ft.
Supilova Obala: Length 132 m., draft 22 ft.
Gat Barcic: North side length 106 m., draft 26 ft., South side length 106 m., draft 22 ft., head 31 m.
Lukobran Susak: Length 320 m., draft 24 ft.

CRANES: Shore cranes with lifting capacities from 1.5 to 5 tons available at respective berths except at Gat V. Nazor – West side, Splitska Obala, Trscanska Obala, Supilova Obala and Gat Barcic where vessel's own gear must be used. Floating cranes of 30 and 100 tons. At shipyard "3.maj" berth (20 ft.) 1 bridge crane of 300 tons.
BULK CARGO FACILITIES: Ore terminal at Bakar Basin: Length of quay 400 m., max. draft 17 m. if vessel's length up to 300 m. The terminal is equipped with one 32-ton and two 16-ton "Paceco" unloaders. This terminal is also used for discharging of coal in shipments presently not exceeding 90,000 tons.

Goranin Obala – almost opposite the ore terminal mostly used for loading of coke, trucks and timber by means of two 5-ton cranes. Max. draft 29 ft. 9 in.

Silo and Beogradska Obala (max. draft 34 ft. when vessel about 8 m. off quay) for grain and meal by means of 2 towers to elevator of 32,000 tons capacity. Terminal for phosphate at Gat L. Ribara by crane grabs to special shed or feeders with facilities for bagging.

Also see "Shipmaster's Report" dated November 1979.
SPECIALISED CARGO HANDLING FACILITIES: Container terminal at Brajdica consisting of one quay 163 m. long and one ramp for roll-on/roll-off vessels 40 m. long. Draft alongside 10 m. The terminal is served by one 35-ton portal crane and one straddler.
STEVEDORES: Port Enterprise "Luka" Rijeka is the sole stevedoring company. Working 2 shifts: 1st from 0630 to 1430 hrs., 2nd shift from 1430 to 2230 hrs. Saturdays, Sundays and holidays may be worked on overtime. Unloading of bulk cargo at the basin of Bakar during the first shift on Saturday is considered to be an ordinary working shift. Timber operations normally performed during first shift only.
MEDICAL: Two hospitals and all kinds of medical assistance.
TANKERS: At Bakar basin, berths for tankers up to 80,000 d.w.t. stern to shore and up to 40,000 d.w.t. alongside quay (draft 32 ft.) loading refined oil products.

At Urinj – 5 miles East of Rijeka – 1 berth for tankers up to 200,000 d.w.t. discharging crude oil. Also used for loading of virgin naphtha shipments. Tankers moor stern to quay using both anchors. Depths of 17 m. marked by 2 buoys. Cargo hoses: one flexible floating hose of 20 in. with 2 ends of 12 in. each. For connecting hoses on ship's manifold a derrick or crane of minimum 5 tons S.W.L. required. Also see "Shipmaster's Report" dated February, 1980.

At Omisalj (Krk Island) (45° 13.4′ N., 14° 32.2′ E.) – 7 miles S.E. of Rijeka – new oil terminal for tankers up to 350,000 d.w.t. (min. size 40,000 d.w.t.) and with draft up to 27 m. Two "T" shape piers (steel platforms) for alongside berthing. Each berth is equipped with four unloading arms of 16 in. for crude oil discharge and 2 arms of 12 in. for bunker delivery. Fresh water available, rate 25 t.p.h.
DENSITY: 1020 to 1025 depending on place, season and weather.
FRESH WATER: Available from quay in any quantity.
FUEL: All grades of bunker available by barge – advance notice required.
FIRE PRECAUTIONS: If 2 tankers moored side by side in Bakar, tug required to stand-by. Tankers moored stern to quay must have towing line ready.
CONSULS: Netherlands, Sweden. Others at Zagreb and Belgrade.
REPAIRS: All kinds available.
DRY DOCKS: 3 Floating Docks: 5,600 tons, 12,000 tons and 24,000 tons lifting capacities.
SURVEYORS: Lloyd's Register, Bureau Veritas, American Bureau, Jugoregistar.
GANGWAY/DECK WATCHMEN: Service available.
OPENING/CLOSING HATCHES: May be carried out by crew, otherwise by stevedores for extra payment.
CUSTOMS ALLOWANCE: About 40 cigarettes and 0.5 litre wine and a reasonable amount of spirits daily per man.
CARGO GEAR: Although operations usually by shore cranes, ship must have efficient cargo gear and relative certificates.
REPATRIATION: Possible by train, bus and air.
AIRPORT: At island Krk (28 km. from Rijeka).
TIME: GMT plus 1 hour.
HOLIDAYS: January 1st and 2nd, May 1st and 2nd, July 4th and 27th, November 29th and 30th. Work can usually be arranged on Saturday, Sundays, January 2nd, May 2nd and November 30th from 0700 to 1400 hrs. on extra payment. If a holiday falls on Sunday the next working day becomes a holiday.
POLICE/AMBULANCE/FIRE: Police tel. 92, Ambulance tel. 94, Fire tel. 93, Port fire brigade tel. 25-126.
SERVICES: Facilities for discharge of Tank-washings at Bakar, compass adjusting.
IDENTIFICATION CARDS: Shore passes issued.
GENERAL: Lloyd's Agents' Jadroagent – Rijeka.
DELAYS: Waiting for some specialised berth occasionally experienced.

SHIPMASTER'S REPORT: Urinj: February, 1980.
INA Petroleum Co. Berth: See "Plan".
Office: The Port of Urinj, phone 41–022 ext. 250. Can be contacted via Rijeka Radio at any time.
Berth: The petroleum berth of Urinj (Lat. 45° 17′ N., Long. 14° 31.7′ E.) is situated 5 miles E.S.E. from the port of Rijeka. Its position is marked by a buoy whose characteristic is Fl.W. 3 sec. It is open 24 hours a day for commercial activities. The depth of water at this berth varies from 45 m. to 20 m. below the level of mean tides. The bottom is mud. Because of this it can accept tankers up to 200,000 d.w.t.
Documents on Arrival: The following documents are required on arrival:

5 Copies of a Crew List (full personal data, including birth place, date of birth, etc., are necessary).
5 Copies of Passenger List – if any
2 Copies of List of Ship's Stores
2 Copies of Manifest of Dangerous Goods – if any
2 Copies of Customs Declaration List
2 Copies of Transit Cargo Manifest
1 Cargo Manifest with extra copy for Customs.

Notice of Arrival: Vessels should give notice of arrival to their Agents via Rijeka Radio 48 hours and 24 hours in advance.
Approaching Directions: After passing Cape Jablanac a course of 060° leads safely to the tanker anchorage. The Pilot will board at anchorage area from a tug if the vessel is to proceed to the berth immediately.
VHF: Vessels equipped with VHF radio telephone should contact "Rijeka Pilot" on Channel 8 or "Rijeka Radio" on Channel 16 for berthing instructions.
Tugs: For berthing of a vessel the use of tugs is obligatory.
Gangway: Vessels should use their own port side gangway.
Manoeuvring: When the Pilot boards the vessel and forward tug is secured, both anchors (with one shackle in the water) should be ready for use. The stern mooring lines are carried toward the shore by a mooring boat. Usually 9 to 10 lines are used (6 from the vessel, and 4 from shore).

Connecting Hoses: After mooring operations have been completed, the connecting hoses will be brought alongside the starboard side of the vessel by a workboat. There are 2×12 in. hoses available, one for crude oil and one for products. Connecting and disconnecting of the hoses will be done by INA personnel, supervised by the Port Captain. The assistance of the ship's crew in operating windlasses, winches, etc. is required.
Note:

a) A minimum S.W.L. of 5 tons for the 12 in. hoses is required.

b) The vessel is responsible for good conditions and effectiveness of the equipment.

c) Vessels are required to keep main engine on stand-by all the time during their stay in berth, therefore no repairs to the main engine of the vessel may be undertaken during berthing. Power must be kept on for possible adjustments of mooring lines, anchors, and derricks.

Discharging: When the connecting of the hoses is completed, and the ullage report completed, Chief Officer will report the readiness of the vessel for discharging operations. The vessel is required to discharge the cargo as quickly as possible. Max. discharging rate is about 6,000 t.p.h.

Sailing: After the discharging operation is completed, the vessel should leave the berth as soon as possible. The Master should keep in touch with the Port Captain who will despatch a Pilot and Authorities on time.

Deballasting: After arrival at anchorage or berth and free pratique has been granted, the Loading Master will take samples of the ballast water for quality checks. Permission to discharge ballast water overboard will be granted by the Port Captain only. If laboratory analysis is not accepted by the Port Captain, vessel must shift to the slop-discharging installation at Bakar. The "not accepted ballast water" must be discharged there through stern discharge line only. After tank cleaning and line-flushing, vessel will be returned to Urinj with or without ballast at Master's option.

Loading: INA Refinery produces several kinds of products.

Cargo Loaded: Clean unleaded virgin naphtha.
Density at 15° Centigrade −0.74.
Loading rate – average 1,500 cu.m.p.h.

Documents on Sailing: The following documents are required on sailing:
4 Copies of Crew List
4 Copies of Passenger List
2 Copies of List of Ship's Stores.

Free Pratique: To obtain free pratique by radio, vessels should send the following information to their Agent 48 hours in advance via Rijeka Radio:
The number of crew and passengers,
Health conditions and possible infectious diseases.

Note: No one is allowed to leave the vessel until free pratique is granted.

Medical: There are 3 well equipped hospitals in Rijeka whose medical staff is capable of giving full medical protection.

Fresh Water: There is an unlimited supply of fresh water available. It is supplied by a floating pipe-line attached to the Eastern signal buoy.

Fuel: All grades of bunker are available. Order must be placed 48 hours in advance.

Laundry: Laundry service has to be ordered immediately after arrival in order to ensure delivery of the clean laundry in time.

General: All kinds of repairs available by shipyard "Viktor Lenac".

There is a floating crane capacity up to 100 tons.

Dry docks accepting ships up to 60,000 d.w.t. also available.

Ship Supplies: In order to ensure timely supply of food and groceries vessel should place an order through the authorised stores (ship chandlers) immediately after or before arrival by radio.

Shore Passes: Shore passes are required for personal identification and serve as an entry permit to the terminal. Shore passes must be returned to the Immigration Office before sailing.

Transportation: During the time at the berth transportation of the crew and passengers from the vessel to the terminal is arranged by a shore launch from 0800 hrs. – 2400 hrs.

Lights: Manifold and poop mooring areas should be adequately lit to enable night mooring and discharging operations to be carried out with safety. Sea area around the ship also has to be properly illuminated.

Deck Watch: Deck watch must be maintained at all times while the vessel is in berth. In addition to its normal duties, the watch must inspect the hose connections and area around the ship against oil spillage, pollution, and to prevent unauthorised persons from boarding the vessel.

Action in Case of Emergency: In the event of a fire, oil spillage, or other emergency on the vessel, the emergency signal is 3 or more blasts of not less than 10 seconds duration each on whistle or siren supplemented by a continuous ringing of the general alarm bells.

SHIPMASTER'S REPORT: Bakar: November, 1979.

Approaches: Entry to Rijeka Bay is made between mainland (Istra) and the island of Otok Cres. A small ferry runs between the two from a landing stage just North of Rt. Prestenice and another connects with Rijeka. A very conspicuous, red and white horizontal striped 700 ft. high chimney is situated about 1.5 miles West of Bakarski Zaliv and makes a good steering guide for the run across as the actual entrance is difficult to pick out being very narrow and blending in with the hills behind.

Anchorage: Initially we were ordered, by Port Authorities, to anchor 1 mile S.W. of the chimney but later requested to move closer to Rijeka for convenience in servicing vessel. Second anchorage 1.5 miles South of main breakwater. Depth of water both places 32 fathoms and we used 10 shackles cable on port anchor. Bottom is glutinous mud and despite force 8, gusting 9 winds we held our position although many cargo ships dragged quite alarmingly. The normal winds for this time of the year (November) are the "bora", a cold strong N.E. wind which funnels down the mountains and can develop suddenly to gale force. We had unusually strong and prevalent S.E. winds during 10 days at anchor.

Communications: Pilot station listens on VHF Channel 16 and works Channel 8. Rijeka Radio was very easily contacted on VHF and proved of great help in connecting with Agents, Owners and Charterers. Rijeka Radio not quite as good for contact on W/T as does not seem to follow the times for listening as laid down. R/T proved difficult as well, due to his frequencies being same as other main radio stations.

Port Officials: Agent and boarding party boarded morning after arrival and cleared ship with very little difficulty, only normal representation required. Shore passes, made out by Agent, sent on board later same day. Permission to immobilise engines and lower lifeboats given by Harbour Master on arrival although this later cancelled due to approach of storm after 24 hours.

Shore Leave: It is possible to arrange for shore launches while at anchor to give shore leave but the service can be curtailed due to bad weather and in Winter could result in crew being stranded ashore. Last boat from the port being 2200 hrs. At the berth, no restriction on shore leave exists and there is an excellent bus service into Rijeka from the village of Bakar. Prices are comparable with UK and quality of goods similar. In Bakar itself is an excellent restaurant, family owned, which serves first class food in very nice surroundings. The Owner speaks perfect English.

Fresh Water: At anchor, limited water is available by tug but very expensive. On the berth, good quality water is readily available in any quantity required.

Bunkers: Both intermediate and diesel oil is available by barge, price unknown but thought to be above average. Normally ships taking large quantities of bunkers would bunker at Augusta, Sicily.

Stores: Storing poses a problem due to several points. The access to the ship on the berth is difficult for large lorries as the extension to the wharf carried out over the past three years has wrecked the approach road to the face of the wharf and also the lorries if they make it to the wharf cannot get close alongside due to the conveyor belt and rails.

Storing at the anchorage also poses problems as there are no barges suitable for carrying large amounts and launches were used to bring the stores out to the ship but these can only carry a small quantity at a time. We had to load some large and heavy pieces of engine spares which had been sent from UK by lorry and these were transferred to a pontoon barge for delivery to the ship.

Crew Changes: Personnel were routed through Zagreb* mainly and this entailed a four hour drive from the airport to the ship, although it is possible to send people via Trieste which is a bit nearer. On arrival at Rijeka they have to see Immigration and are issued with shore passes. Wives and children should be entered on a passenger list and not included on the crew list as they get a special pass for 90 day entry.

*Whether this is normal routing or was Company's choice is not known.

Cargo Handling: Berth has been extended and depth alongside increased to allow vessels drawing 17.5 m. to safely lie alongside although the 48 ft. 6 in. rock which was found previously at the Eastern end of the berth is still there according to the Pilot. (Approximate position of rock about 50 ft. off wharf and about 250 ft. from Eastern end). Berth is left in a very broken down looking state and lacks decent mooring posts at the Western end. Cargo is handled by 3 grabs (although only 2 were in use this call) 1 very large and the other 2 much smaller. Discharge rate on this call was averaging 30,000 t.p.d. with the major share being done by the larger grab which is at the Western end of the wharf. Cargo is either taken directly away by ore trains (if iron ore) or dumped onto back of wharf or if coke is taken direct to a coking factory on the other side of the bay by a covered conveyor belt. Storage or dumping facilities are very limited and this has a controlling effect on the discharge. When discharging iron ore, if insufficient trucks arrive and the stockpile is full, then discharge is on a stop/go basis and slow and also fully dependent on the trucks arriving regularly. This ship discharged 149,320 tonnes in six days as against a previous call experienced when 118,100 tonnes were discharged in 6.7 days. Maximum airdraft 16.5 m. on berth.

Stevedores were good and co-operation was good. Any damage caused was repaired before departure without causing any delay to the ship and the standard of repair was good.

Repairs: Besides the "3 MAJ" shipyard, there are quite a few smaller yards and workshops where repair work can be arranged.

Medical: There is a special clinic for seamen which opens at noon. In attendance at that time is a general doctor who refers patients to the different specialists and usually entailed a visit next day to see those people.

Customs Allowance: On arrival, each man allowed 200 cigarettes and 0.5 litre wine/spirits during stay. Customs would allow an issue every 5 days of 200 cigarettes per man and 8 bottles of spirits for the ship.

Developments: The Authorities are continuing with the good work and building a container terminal at the Eastern end of the bay. Present terminal being at Rijeka, and outside breakwater, which is virtually unprotected.

AUTHORITY: Lucka Kapetanija

AGENT: Jadroagent – Rijeka, Obala J.R. mornarice 16, 51000 Rijeka, Cable: jadroagent Rijeka, Telex: 24100yu jadrag, 24268yu jadrag.

SIBENIK: 43.43 N. 15.52 E.

DOCUMENTS/HEALTH/HOLIDAYS: Same as "Rijeka".

PILOTAGE: Compulsory for vessels over 500 g.r.t. Pilot boards vessel at the entrance of St. Ante Channel, within a circle of 3 miles radius from Jadrija Lighthouse.

ANCHORAGE: Vessels waiting Pilot must anchor between Prvic Island and the shore if coming from the West, or between the South point of Zlarin and the shore if coming from the East, all in depths of 22 m.

In the Bay of Sibenik, vessels may anchor on the N.W. side of St. Ante Channel in depths of 30 – 40 m.

RESTRICTIONS: All vessels over 50 g.r.t. must apply for permission to enter St. Ante Channel by using International Code Signal "Z" by flag during daylight hours and a white light above a red light visible 2 miles all round or a sound signal (letter "Z" of morse code) during night hours. Vessels may enter channel only when authorised by a signal, 2 black balls vertically disposed by day or 2 green lights vertically displayed by night, made by the signalling station at Jadrija.

MAX. SIZE: Only draft limited. 33 ft. alongside in deepest berth.

RADIO: None. Vessel may call Agent through Rijeka Radio and Split Radio.

TUGS: 1 of 750 h.p.

BERTHING:
Obala JRM: Length 274 m., draft up to 7 m. – no shore cranes.
Gat Vrulje: East side length 132 m., head 114 m., West side length 101 m., draft up to 9 m. – no shore crane.
Obala Dobrika: Length 225 m., draft 10 m. – three 5-ton shore cranes.
Obala Rogac: Length 362 m., draft 10 m. – two 7-ton shore cranes.
Obala Sipad: Length 294 m., draft up to 7 m. – no shore cranes.
Obala Crnica: Length 90 m., draft 6.5 m. – no shore cranes.
BULK CARGO FACILITIES: Ores and minerals (phosphate) at quays Rogac and Dobrika.
STEVEDORES: Port Enterprise: "Luka" – Sibenik and timber stevedoring company "Sipad".
Port works in two shifts: 0600 – 1300 hrs. and 1400 – 2100 hrs. Overtime possible 2200 – 0500 hrs.
Timber operations normally performed during first shift only.
MEDICAL: Medical service available including hospitalisation.
DENSITY: 1020 – 1025, depending on place, season and weather.
FRESH WATER: Available from quay.
FUEL: Diesel and Gas oil in small quantities.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: If not performed by crew, can be done by stevedores at additional charge.
CUSTOMS ALLOWANCE: About 40 cigarettes and 0.5 litre of wine/spirits per man per day.
CARGO GEAR: General cargo and timber are handled using ship's gear. Ore and minerals by shore cranes fitted with grabs.
IDENTIFICATION CARDS: Shore passes given by local police.
REPAIRS: Small repairs only.
REPATRIATION: By train or bus and by air from Split Airport nearby, or from Zagreb or Zadar.
TIME: GMT plus 1 hour.
POLICE/AMBULANCE/FIRE: Police, 92; Ambulance, 94; Fire, 93.
TELEPHONES: No facilities for placing telephone on board.
DEVELOPMENTS: New terminal for phosphate to become operative in 1981.
GENERAL: Lloyd's Sub-Agents – Jadroagent Sibenik.
AUTHORITY: Lucka Kapetanija.

AGENT: Jadroagent – Sibenik, Obala oslobodenja 9, 59000 Sibenik. Cable: Jadroagent Sibenik. Telex: 27323 yu jadrag. Tel: 22-570, 22-571 (After hours) 25-544.

SPLIT: 43.31 N. 16.26 E.

DOCUMENTS/HEALTH/HOLIDAYS: Same as "Rijeka".
PILOTAGE: Compulsory for vessels over 500 g.r.t. Pilot boards vessel 0.5 miles South of Split breakwater or on request at Splitska Vrata.
ANCHORAGE: Vessels anchor approximately 0.5 miles South of Split breakwater.
MAX. SIZE: Length and breadth not limited. Draft permitted in Southern Basin 29 ft. Northern Basin 35 ft. (general cargo) and 37 ft. (grain).
RADIO: Split Radio, call sign "YUS" 500 kc/s. Radio telephone on 2 mc/s
TUGS: From 300 to 1350 h.p. available. VHF Channel 16.
BERTHING:
At Solin, Vranjic and Northern Basin: Jugovinil, factory quay: K. Sucurac: length 120 m., draft 32 ft.
Partizan: Factory quay: length 222 m., draft 26 ft.
Prvoborac: Cement factory quay: length 274 m., drafts up to 26 ft.
Northern Port: Continuous quay: total length 850 m., with 5 berths having following drafts: berth No. 1, 28 ft.; berth No. 2, 32 ft.; berth No. 3, 24 ft.; berths No. 4 and 5, 35 ft.
Silo Quay – Vranjic: length 100 m., draft up to 37 ft.
Quay A. – Vucicic-Vranjic: length 262 m. draft up to 29 ft.
At the town port (mainly used by passenger and coastal vessels):
Gat Proleterskih Brigada: quayage 350 m., drafts from 13 to 23 ft.
Gat Sv. Duje: quayage 465 m., drafts from 19 to 29 ft.
Breakwater quay: length 230 m., drafts from 16 to 29 ft.
CRANES: Berths at the Northern port are equipped with two 7-ton bridge cranes (berth No. 2) and four 5-ton portal cranes. 1 floating crane of 60 tons.
BULK CARGO FACILITIES: Grain at Silo quay where elevator of 40,000 tons capacity. Discharging by motor vacumvators.
STEVEDORES: "Lucki prekrcaj i skladista" is the sole stevedoring company. Work in two shifts: from 0600 – 1300 hrs. and from 1300 – 2000 hrs. On Saturdays overtime rates apply.
MEDICAL: All medical assistance including hospitalisation.
TANKERS: At Solin where "INA" – Petronafta – petrol berth, draft 38 ft., and "Brizine" berth, draft 28 ft.
FRESH WATER: Available from quay.
FUEL: Available by barge, advance notice required.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: By crew or stevedores.
CUSTOMS ALLOWANCE: About 40 cigarettes and reasonable amount wine/spirits per man per day.
IDENTIFICATION CARDS: Shore passes issued by local immigration office.
CONSULS: British, Dutch, Italian, and Danish.
REPAIRS: Any kind, including drydocking.
DRY DOCKS: Floating dock at Trogir for vessels up to 28,000 d.w.t.
SURVEYORS: Lloyd's Register, Bureau Veritas, American Bureau, Jugoregister.
CARGO GEAR: Ship's gear used at certain berths.
REPATRIATION: By train, bus and aeroplane.
AIRPORT: Local airport "Split".
TIME: GMT plus 1 hour.
POLICE/AMBULANCE/FIRE: Police, 92.; Ambulance, 94; Fire, 93.
GENERAL: Lloyd's Sub-Agents: Jadroagent Split.
AUTHORITY: Lucka Kapetanija.

AGENT: Jadroagent – Split, Saveznicka obala 1, 58000 Split. Cable: Jadroagent Split. Telex: 26116 yu jadrag.

ZADAR: 44.07 N. 15.14 E.

DOCUMENTS/HEALTH/HOLIDAYS: Same as "Rijeka".
PILOTAGE: 48 and 24 hours notice of ETA must be given to Agent. According these notices Agent arranges for Pilot to board on arrival. Pilot boat blue motor launch with large "P" on bow and "H" flag. Pilot contacted on VHF Channel 12 or 16.
ANCHORAGE: About 0.5 mile, 245° from green port light, (FL. G. 2 sec.) on the North part of Zadar Peninsular. Average depth about 40 m.
MAX. SIZE: Zadar, passenger port, permissible draft 6.25 m. (20.5 ft.) Zadar-Gazenica, port for dry cargo, max. draft forward 6.60 m. (21.7 ft.) Aft 13.5 m. (44.3 ft.). Length 160 m. Also see "Tankers" and "Berthing".
RADIO: Rijeka Radio, "YUR" or Split Radio "YUS".
VHF: Information/Operations Centre Zadar listens on VHF Channel 16. Pilot listens on Channel 16 or 12.
TUGS: 1 tug 1,200 h.p. Large vessels use 2 tugs, with the additional tug coming from Split. Tugs normally join 200 m. – 300 m. from breakwater, vessel's lines usually used.
BERTHING: *Soya Bean Berth:* 1 berth for soya bean or grain with discharging equipment 400 t.p.h. Max. draft 11 m. (36.1 ft.).
CRANES: Heavy lift shore crane, capacity 100 tons.
STEVEDORES: Number of gangs required to be stated in usual notice of ETA.
MEDICAL: Advance notice not necessary, hospital facilities available.
TANKERS: Gazenica Port: 1 tanker berth max. draft 10.35 m. (34.1 ft.) forward, 15.0 m. (49.2 ft.) aft. Length of the ship is not restricted.
DENSITY: Average density in the port – 1026.
FRESH WATER: Fresh water connections on piers, rate of delivery 8 – 15 t.p.h.
FUEL: Fuel available for coasters only.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Normally, but not compulsorily, carried out by stevedores.
CUSTOMS ALLOWANCE: 200 cigarettes per person. Tobacco and liquor sealed in bond.
IDENTIFICATION CARDS: Needed. Issued by police.
CONSULS: None.
REPAIRS: Deck and engine repairs possible.
REPATRIATION: Facilities exist for effecting crew changes and arranging necessary repatriations.
AIRPORT: Zadar airport served by regular daily flight for Zagreb with connection on all international flights.
DRY DOCK: 1 floating dock for ships up to about 2,000 b.r.t. in Zadar. 1 floating dock for ships up to about 20,000 b.r.t. on Ugljan Island.
TIME: GMT plus 1 hour.
POLICE/AMBULANCE/FIRE: Police, 92; Ambulance, 94; Fire, 93.
TELEPHONES: No facilities for placing telephones on board.
DEVELOPMENTS: Gazenica Port: A second berth for dry cargo is under construction.
AUTHORITY: Lucka Kapetanija – Zadar.

AGENTS: Jadranska Pomorska Agencija, Filijala Zadar, N. Nodila b.b., Zadar. Tel. 23210, 23215. Telex: 27129 Yu Jadrag. Telegrams: Jadroagent Zadar.

ZELENIKA: 42.27 N. 18.35 E.

DOCUMENTS/HEALTH: Same as "Rijeka".
PILOTAGE: Pilot boards at entrance of the Bay of Kotor, near point Punta Ostro. In bad weather Pilot boards at anchorage.
ANCHORAGE: Good ground for anchorage S.W. of Zelenika, about 0.25 mile off port light in about 27 fathoms.
MAX. SIZE: Port of Zelenika damaged by earthquake and temporarily closed. Vessels berthing at the passenger quay at Herceg-Novi.
HEALTH: Radio Agent requesting free pratique, 24 hours before arrival. For vessels over 500 g.r.t. pratique is given at the anchorage. For small ships and yachts, pratique is given at Herceg-Novi.
TUGS: None. In cases of necessity can be ordered from shipyard at Bijela.
BERTHING: The berth is assigned through the Agents giving notice 24 or 48 hours in advance. At present there is berthing for small ships only at the passenger port at Herceg-Novi.
STEVEDORES: State stevedoring company.
MEDICAL: Nearest hospital at nearby town of Herceq-Novi.
FRESH WATER: Available from hydrant on the passenger quay at Herceg-Novi.
FUEL: Nearest bunker station is at Bar.
OPENING/CLOSING HATCHES: If not performed by crew, can be done by stevedores.
CUSTOMS ALLOWANCE: About 40 cigarettes and 0.5 litres wine/spirits per man per day.
CARGO GEAR: Loading, unloading performed with ship's gear.
IDENTIFICATION CARDS: Shore passes issued by local police.
CONSULS: None.
REPAIRS: Any kind of repairs including dry docking at nearby shipyard at Bijela.

DRY DOCKS: Floating dock lifting capacity 10,000 tons, LOA. 184 m., length over keel blocks 165.6 m., inside free breadth 25.5 m.

Floating dock lifting capacity 33,000 tons. LOA 252 m., length over keel blocks 235 m., inside free breadth 44 m.

The yard is about 4 miles East of Zelenika. The yard has 1,300 m. of fitting pier.

REPATRIATION: By bus to Dubrovnik, and from there bus, plane or ship to main cities in Yugoslavia.

TIME: Central European Time. GMT plus 1 hour.

HOLIDAYS: January 1st and 2nd; May 1st and 2nd; July 4th and 13th; November 29th and 30th. Work can be arranged on Sundays and on 2nd day of two-day holidays.

POLICE/AMBULANCE/FIRE: No direct connection, in case of necessity call Agency, Tel. (082) 81-456 Jadroagent or (082) 81-261 Jugoagent.

SHORE LEAVE: Allowed.

AUTHORITY: Lucka Ispostava Zelenika.

AGENT: Jadroagent, Medunarodna pomorska i saobracajna agencija, Poslovna jedinica, Bijela. Tel. (082) 81-456. Telegraphic address: Jadroagent Bijela.

NOTES

Please also advise Shipping Guides Ltd.

Zaire Republic

GENERAL:

ETA: It is essential that any change of vessels ETA should be transmitted sufficiently in advance in order to avoid short shipments of cargo.

Matadi is only a transit port where cargo is not stored in order to avoid congestion.

Imported cargo is immediately re-forwarded to the interior while export cargo is only brought to Matadi a few days before the ETA of the vessel for which it has been booked.

Therefore, in order to make the cargo available at Matadi, shippers need a notice varying according to the cargo concerned, but which cannot be less than 2 weeks as is the case for coffee.

Agents at Matadi and Boma have been instructed to inform Port Authorities latest 4 days before berthing of inward cargo tonnages.

Non compliance with this provision may result in berthing delay.

PILOTAGE: Vessel should cable ETA 24 hours before arrival to the Harbour Master. Cable address: "Maritime Banana".

Pilotage compulsory for all vessels over 500 g.r.t. bound for Boma and Matadi.

Ships bound for Matadi and/or Boma must take a Pilot at the pilot station at Banana (at the mouth of the Zaire River). Pilot station at Banana can be contacted directly by radio (VHF).

In order to increase the safety and to facilitate the navigation on the river the Regie des Voies Maritimes have decided that in case a vessel is not equipped with a VHF installation the Pilot will bring one on board, for which a charge is made.

The following rules must be observed at the request of the Regie des Voies Maritimes for embarking and dis-embarking of Pilots.

If gangway is rigged astern on the port side it is compulsory to use the pilot ladder also.

If gangway rigged amidships on port side it is recommended that the pilot ladder is used in combination with the gangway.

Pilots requesting only the gangway do so at their own risk.

Theoretically sailing from Matadi/Boma is only authorised as far as vessel can reach Banana latest at 1800 hrs. since navigation on the Zaire river is normally limited to daylight hours.

With regard to the trim the pilotage services ask Masters to comply with following rules:

Maximum trim 13 ft. aft; 4 ft. forward.

DOCUMENTS: *Ship's Documents required on arrival:*

Clearance from last port.
7 Crew Lists.
3 Lists of Arms and Ammunition.
7 Passenger Lists.
1 List of stowaways.
2 Crew Declarations.
3 Lists of Ports of Call.
2 Stores Lists.
1 International Tonnage Certificate.
1 International Load Line Certificate.
1 Deratisation Exemption Certificate.
1 Cargo Ship Safety Equipment Certificate.
1 Certificate of Registry.
1 Radiotelegraphy Certificate.
1 Construction Certificate.
1 Certificate Form on Board.
Free Pratique.

Documents required for disembarking passengers and discharging cargo:

A. To be received by mail at least 8 days before ship's arrival:
(1). Cargo:
  3 Freight Manifests
  8 Cargo Manifests
  5 Copies of Bills of Lading
  6 Copies of Stowage Plans.
(2). Passengers:
  1 Accountancy
  3 Passenger Lists, for passengers for the port/or in transit.
B. To be received by ship's bag at ship's arrival at quay:
  On arrival following documents must be available on board:
(1). Cargo:
  1 Freight Manifest
  4 Cargo Manifests
  3 Copies of Bills of Lading.
(2). Passengers:
  1 Freight Manifest
  4 Passenger Lists for passengers for the port and/or in transit.

It is most important that stowage plans be available before vessel's arrival. Vessel's operations are indeed delayed to the next shift if same are only remitted upon arrival.

HEALTH: Ship's crew must have an International Certificate of Vaccination against yellow fever, smallpox and cholera.

FUEL: Must be ordered from Petrozaire at least 48 hours before required. Normally supply of gasoil, light and heavy fuel is effected at Banana between buoys 12 and 14 ex-barges with: minimum quantity – 250 tons; maximum quantity – 800 tons (total barge quantity).

Smaller quantities can also be supplied in Matadi or Ango Ango.

DRAFTS AND CURRENTS: Drafts on River Zaire are actually as follows (December 1980):

Inwards: High Water: 27 ft. 00 in.
Outwards: High Water: 28 ft. 00 in.

The authorized drafts are notified regularly by the Port Authorities.

The currents of the river and from berth to berth as well in Matadi as in Boma vary and depend upon the high and low levels of the water sometimes adverse currents and still waters as stated before.

For proceeding to Matadi and according to the season vessels must have at least a speed of 10.5 to 11 knots, especially to pass the "Devil's Cauldron" about 3 miles before Matadi. 12-13 knots or greater sometimes requested for a 10-15 minute period.

STEVEDORES: The ONATRA (Office National des Transports) – public institution, has the monopoly of the handling, stevedoring and transit operations at the ports of Matadi and Boma.

At each berth the responsible "Pier Master" remains in constant contact with the first Mate during the whole operation.

Working shifts are as follows: 1st. shift: 0630 – 1430 hrs.; 2nd shift: 1430 – 2230 hrs. overtime; 3rd shift: 2230 – 0630 hrs. overtime.

Work must be ordered the day before vessel's arrival. However, if gangs are available, work can still be ordered the day of vessel's arrival but latest at 0930 hrs. during week days.

In principle no work is done on Sundays, holidays and during the night. If required same has to be ordered by writing 1 working day in advance before 1000 hrs. Port Authorities will then decide according to the situation at that time.

According to the situation of the Port, the Authorities can also order labour 24 hours per day Sundays and holidays included.

At Boma there is no third shift – however on special request, work can eventually be granted until 2400 hrs.

At Matadi work during third shift will only be ordered upon special request from vessel.

GENERAL: *Quay Practices:*

The Zaire courtesy flag must be hoisted by foreign ships during daytime.

In view of the proximity of the town, the use of whistles, sirens and similar signals is forbidden.

Safety nets must be put between ship and quay at each of the working hatches and beneath the gangway.

No rubbish whatsoever may be thrown overboard.

Official Language:

The official language used by the Port Authorities and Administration is French.

Cargo plans:

According to ONATRA'S instructions, stowage plans of ships calling at Matadi/Boma must be issued in such a way that they show clearly where all goods loaded for Matadi/Boma in several ports are located. This enables ONATRA to have, at once, a clear view of each vessel and to study, before ship's arrival, the discharging/loading possibilities.

Those stowage plans must reach Agent before ship's arrival.

Vessels loading/discharging operations will only start during the next shift if stowage plans are remitted upon vessels' arrival. A request can be made to shift the vessel to a more convenient berth depending upon the cargo concerned.

With regard to cargo loaded, ONATRA does not issue stowage plans and Masters should consequently be instructed to draw up stowage plans themselves for transmission to corresponding discharging ports.

It is customary not to moor ships at Matadi/Boma between 2200 hrs. and 0600 hrs. They remain at anchor.

Important Notices:

In connection with manifests for Matadi/Boma cargo:

1. Liner Terms Cargo:

According to the General Rules and Tariffs stowing, unstowing, loading, discharging rates are applied on weight/measurement, whichever is the highest irrespective of the freight unit.

The Port Authority ONATRA instructs therefore that:

a) The freighted manifest remitted to them must show three columns detailing respectively weight and volume and freight unit (freight tons) of each cargo/bill of lading.

b) At the bottom of each page a summing up of tonnage/weight, tonnage/volume and freight units (freight tons) should be mentioned.

c) The last page of the manifest shall contain a separate recapitulation of weight tons, volumes and freight units (freight tons) showing thus the respective totals of each item.

Corrections or additionals added by the Agent at Matadi/Boma by hand or with typewriter are not accepted by ONATRA.

ONATRA is fully implementing the regulations and, for vessels whose manifests are incomplete or incorrect, a penalty, which may reach 1,000% of the stevedoring costs (or 10 times) is charged.

2. F.I.O. Cargo:

The same information is to be supplied as for Liner Cargo but, in addition, the manifest and B/L must clearly mention that cargo is carried on free out terms.

BANANA: 6.01 S. 12.25 E.

DOCUMENTS: See "General" before first port.

APPROACHES: In view of the strong current, and in view of the fact that the lights of the navigation buoys on the river do not always work properly, night navigation is practically impossible. Tankers, therefore, arriving at night, or in times of congestion, are recommended to anchor approx. 5 miles West of Moita Seca Light in approx. 10 fathoms, about 12 miles from Stella Buoy.

PILOTAGE: River can be entered direct from sea in deep water. Pilot (Not compulsory) will board vessel as from 0600 hrs. with Authorities off Stella Buoy (Outer navigation Buoy No. 2) located in position:

Latitude: 6° 02′ 0″ S.
Longitude: 12° 22′ 30″ E.

The position of the flare of the SOCIR Refinery at Moanda is:

5° 57′ 51″ S.
12° 25′ 07″ E.

The flare is visible during day and night and may be a good bearing for vessels approaching river.

Sailing from "Stella Buoy" at 0600 hrs. vessels with a speed of up to 14 knots must pass Bulabemba before 1400 hrs. and vessels with speed in excess of 14 knots by 1500 hrs.

MAX. SIZE: Tankers up to 35 ft. draft may discharge at buoy moorings. Also see "Berthing – Commercial Port".

HEALTH: Quarantine Officer boards at sea buoy. Free pratique usually granted as soon as Maritime Health Declaration completed. Valid smallpox, cholera and yellow fever inoculations required for all crew members.

RADIO: *Tankers:* At least 3 days notice required to Agent (ETA and draft only) and to Harbour Master, "Maritime Banana" (ETA only). It is necessary to transmit these notices via another shore station (e.g. Capetown Radio, Libreville Radio, etc.), as the Banana Radio Station can only be reached 2 days prior arrival. Close advice on changes in ETA necessary to prevent delays in waiting for Pilot and lighters.

Radio Banana (9 PA) working on 495 kc/s. and 8714 kc/s.

BERTHING:

Commercial Port:

The commercial port consists of a landing space of approximately 2,000 sq.m. in front of a warehouse with approximately 2,500 sq.m. storing room.

ONATRA, the Port Authority, has no cranes and the port equipment is extremely limited. Any discharging and/or loading must therefore be done by ships' gear.

With a draft of more than 17 ft. (indicative) cargo operations to be performed at anchor between Buoys No. 12 and No. 14. Barges and gangs are then supplied on request.

With a draft of less than 17 ft. (indicative) vessel can berth at ONATRA wharf inside Banana Bay.

Length of the wharf: 75 m.

CARGO OPERATIONS: Tankers discharge-into/load-from cargo barges moored alongside either side. These barges (3 in total) are equipped with 8-in. cargo hoses (position of hose connection amidships) and suitable fenders, have a capacity of 1,650 long tons or 2,050 cu.m., and can receive the cargo at the rate of up to 400 t.p.h. Under normal conditions the refinery will handle 3 barges per shift of 12 hours. Cargo operations are effected continuously day and night, during Sundays and holidays, in shifts from 0600 hrs. to 1800 hrs. and from 1800 hrs. to 0600 hrs. Therefore a tanker of approx. 19,000 tons can be completed in a net discharging/loading time of approximately 48 hours. During the cargo operations, 6 deckhands stay on board to handle cargo hoses and barges. These men are to be provided with meals and accommodation (one spare cabin will be sufficient). Masters are also requested to instruct their crew to assist with the mooring/unmooring of cargo barges alongside.

DENSITY: Brackish to salt.

FRESH WATER: Not available.

FUEL: Must be ordered 48 hours in advance from Petro-Zaire. Bunkering takes place between Buoys Nos. 12 and 14. Gasoil, light and heavy fuel oil available. Barge capacity 800 ton, minimum order 250 tons.

MEDICAL: Doctor available for emergency only. No dental or hospital facilities.

TANKERS: Tankers berth in river anchorage between buoys 12 and 16. Tugs not available and not required.

Upon arrival at the berths, tankers should use both anchors on long scope in view of the current. When anchoring it is recommended to drop outside anchor first, up to approx. 3 shackles and subsequently, after the ship's swing to starboard, the starboard anchor. It is essential that ample cable is used on both anchors, approx. 8 shackles. Tankers sail without Pilot and may leave any time.

Loading:

For loading purposes vessels are anchored at buoy in position:

Latitude: 05° 57′ 50″ S.
Longitude: 12° 08′ 19″ E.

while the storage tanker is moored in position:

Latitude: 05° 57′ 30″ S.
Longitude: 12° 06′ 00″ E.

No tank-cleaning facilities. Barge available for dirty ballast reception limited to 2,000 cu.m. per trip which occasionally and on special request can be put at disposal by the refinery.

REPAIRS: No facilities.

HOLIDAYS: See "Matadi".

GENERAL: During stay of tankers at anchorage the discharge and/or loading operations are constantly supervised by representatives of the refinery, who are to be accommodated on board and to be provided with meals.

SHORE LEAVE: Shore leave is presently not allowed due to lack of communications; only in urgent cases a crew member may join one of the refinery tugs. There is no entertainment whatsoever ashore.

AUTHORITY: Office National des Transports, ONATRA.

AGENT: See "Matadi".

BOMA: 05.51 S. 13.03 E.

DOCUMENTS: See "General" before first port.

PILOTAGE: Port is situated on the right bank of river, about 44 miles above pilot station at Banana.

Radio "Maritime Banana" 24 hours prior arrival giving ETA at Banana and requesting Pilot. Sailing for Banana from 0600 hrs. till 1500 hrs. Sailing for Matadi from 0500 hrs. till 1600 hrs.

RESTRICTIONS: Depth at bar 30 ft. Permissible draft for navigating river varies between 20 ft. to 27 ft. according to local conditions and should be checked with Port Authority in advance.

HEALTH: Quarantine Officer boards on arrival. All crew members require valid smallpox, cholera vaccinations and yellow fever inoculation certificates.

TUGS: 2 tugs of 200 and 300 h.p. available to assist berthing.

BERTHING: Total quay length 450 m. with 3 berths alongside. Depth of water at the quay 8 m. at low water. Maximum current at the berths is 3 knots.

STEVEDORES: See "General" before first port.

Port Equipment:

6 electric cranes on rails, capacity 3 – 6 tons.
2 steam cranes on rails, capacity 7.5 ton at 6 m. (5.0 ton at 10 m.).
5 banana conveyors.
1 electric crane, capacity 6 tons.
8 forklifts.
5 tractors and 40 trailers and carts.
1 Palmkernel elevator.
1 Automatic grab.
2 Hyster carry cranes.
7 barges, capacity 100 tons.
1 pontoon, capacity 75 tons.

FRESH WATER: Available from quays, not suitable for drinking.

FUEL: See "General" before first port.

MEDICAL: Doctors and hospital facilities available.

REPAIRS: No facilities.

HOLIDAYS: See "Matadi".

GENERAL:

Exports: Logs and timber, plywood, veneerwood, coffee, cocoa, rubber, bananas, palmkernels, oils, cakes, about 8.8% of the total exports of the Zaire.

Imports: Various. About 2.5% of the total tonnage imported into Zaire.

Current at Quays: The currents of the river vary from berth to berth and depend upon the low and high level of the water with sometimes adverse currents and still waters.

Maximum speed at high level: 3 knots.
Minimum depth at the lowest level: 8 m.

AUTHORITY: Office National des Transport – ONATRA.

AGENT: Socomexas S.P.R.L. Aven. du Zaire, No. 119/F., B.P. No. 122, Boma, Republique du Zaire. Telephone: 267.

MATADI, (including Ango-Ango): 05.49 S. 13.27 E.

(See Plan Book)

DOCUMENTS: 7 days before arrival of vessel the following must be in the hands of the Agent:

4 Manifests (detailing explosives, general cargo, heavy lifts).
3 Stowage Plans.
6 Copies of Bills of Lading.
1 Freighted Manifest.

On arrival:

Maritime Declaration.
Ship's Register.
3 Crew Personal Effects Lists.
2 Stowage Plans.
1 Freighted Manifest.
3 Lists of Ports of Call.
7 Passengers Landed.
7 Passengers in Transit.
5 Crew Lists.
5 Crew Boys Lists.
2 Provisions Lists.
4 Individual Manifests.

PILOTAGE: Compulsory for vessels over 500 g.r.t. Radio "Maritime Banana" 24 hours prior arrival giving ETA at Banana and requesting Pilot. Pilot boards at Banana Pilot station. Distance from Banana to Matadi about 75 miles. Sailing for Banana from 0600 – 1200 hrs. Sailing for Boma from 0500 – 1600 hrs.

RESTRICTIONS: Depth at bar 30 ft. Permissible draft for navigating Zaire River varies between 20 ft. and 27 ft. according to local conditions and should be checked with the Port Authority 3 days in advance.

MAX. SIZE: Controlled by draft in river.

HEALTH: Quarantine Officer boards on arrival. All crew members require valid smallpox, cholera and yellow fever inoculation certificates.

TUGS: "Inga" 850 h.p., "Boma" 250 h.p., "Banana" 600 h.p. and "Soyo" 220 h.p.

BERTHING: At Matadi.

Pier 1 – 149 m.
Pier 2 – 161 m.
Pier 3 – 155 m.
Pier 4 – 158 m.
Pier 5 – 156 m.
Pier 6 – 176 m.
Pier 7 – 188 m.
Pier 8 – 149 m.
Pier 9 – 167 m.
Pier 10 – 143 m.

Minimum depth at Piers 8 and 10 is 10 m.

In addition there is a berth length 400 m. for barges.

At Ango-Ango:

Pier A. Length 150 m.

(As a rule for discharge of inflammable goods and explosives.)

UNLOADING RATE: 400 to 600 tons of general cargo per day of 2 shifts.

CRANES:

44 Cranes Electric and hydraulic on rails	3 – 6 tons
2 Cranes Steam	5 tons
1 Crane Steam	10 tons
1 Derrick Fixed	*50 tons (Pier 4)
1 Floating Crane	14 tons
1 Bridge Crane	5 tons
6 Cranes Electric	3 – 6 tons
2 Cranes Electric	10 tons
3 Cranes Electric	6 tons

*Actual capacity 34 tons.

BULK HANDLING FACILITIES: Palm oil is stocked by 4 companies in Matadi, 3 of which have pipe-lines to a main quay. The palm oil installations of CCP are at Ango-Ango where ships must berth at Sep Zaire pier. Vessels handling Sep Zaire cargoes are given priority at this pier and in case of unavailability of berth, palm oil would be loaded by barge of 260 tons capacity at Matadi.

Palm kernel oil is also loaded at Berth Nos. 2 – 9 and Palm Oil at Berth Nos. 2 – 8 in Matadi.

P.L.Z. (Plantations Lever au Zaire) capacity	13,450 tons
AMATO-Freres	3,700 tons
MADAIL	2,340 tons
C.C.P.	3,627 tons

Cereals discharged by suction at No. 9 berth. Rate 1,000 t.p.h.

BARGES/EQUIPMENT:

Barges:

- 2 Pontoons N.T. 41 tons each
- 8 Pontoons N.T. 75 tons each
- 1 Lighter N.T. 91 tons
- 2 Lighters N.T. 99 tons each
- 1 Tankbarge N.T. 279 tons
- 19 Lighters N.T. 339 tons each
- 1 Lighter N.T. 438 tons
- 11 Lighters N.T. 487 tons each
- 1 Lighter N.T. 514 tons
- 1 Lighter N.T. 522 tons
- 10 Lighters N.T. 557 tons each
- 2 Landing craft 875 tons each

Equipment:

- 28 Tractors and 242 trailers and carts
- 71 Forklifts with a maximum capacity of 2,500 kilos
- 21 Conveyors
- 2 Roller bridges
- 3 Fork conveyors
- 3 Platforms
- 1 Pushwagon tractor
- 2 Roller conveyors
- 2 Chain conveyors
- 3 Sweepers.
- Grain Elevators (Midema)

DENSITY: Fresh water.

STEVEDORES: See "General" before first port.

TANKERS: Discharge at Sep Zaire pier at Ango-Ango or Matadi. If lightening necessary before berthing, this can be effected at Ramler Buoy, 17 miles above Banana. No tank-cleaning facilities. No fresh water.

FRESH WATER: Delivery aboard the ship through valves and at each pier. Maximum daily capacity 200 tons. Delivery takes place according to the quantity asked for and usually during night.

Delivery cannot be done at the loading berth of Sep Zaire at Ango Ango.

Suppliers need 48 hours notice. It is therefore highly recommended that Masters cable their needs well in advance to Agent and/or through owners.

FUEL: See "General" before first port.

MEDICAL: Doctors and hospital facilities available.

REPAIRS: Small repairs possible at railway workshop.

HOLIDAYS: (Legal holidays in 1980): 1st January, (New Year's Day); 4th January, (Martyrs of Independance); 1st May, (Labour Day); 20th May, (Anniversary of the M.P.R.); 24th June, (Anniversary of the Zaire currency of the new Constitution and Fishersday); 30th June, (Independance Day); 1st August, (Parents Day); 14th October, (Zaire Youth Day); 27th October, (Anniversary of the change of name of the country); 17th November, (Army Day); 24th November, (Anniversary of the new regime); 25th December, (Christmas Day).

GENERAL: *Currents at the quays:*

The currents of the river vary from berth to berth and depend upon the high and low levels of the water with sometimes adverse currents and still waters. Difference between high and low level of the river is approximately 5.50 m.

Maximum speed at high level: 6 knots.

Minimum depth at lowest level: Minimum 8 m. at low water and minimum 10 m. at low water at the new Kala Kala quays.

Exports: Logs and timber (plywood, veneerwood), coffee, cocoa, rubber, copal, bananas, manioc, groundnuts, palm kernels, oils, cakes, fibres, cotton, cres, and copper.

Port Equipment and Accommodation: Matadi is the only Zaire port handling the despatch of export products originating from the interior and the import of products destined to Zaire (excluding Boma which is of minor importance and only serves the Mayumbe area).

About 50% of the tonnage in – and outward goes through Matadi at the head of the C.F.M.K. railroad from Matadi to Kinshasa. The latter locality being a handling and concentration centre of the goods directed to or coming from Matadi.

SHIPMASTERS' REPORT: January 1981.

Documents and papers required on arrival Matadi:

- 7 Crew Lists.
- 2 Maritime Declarations of Health.
- 4 Passenger Lists (even if nil).
- 4 Ports of Call Lists.
- 4 Arms and Ammunitions Lists (even if nil).
- 4 Narcotic Lists.
- 3 Stores Lists.
- 2 Crew Customs Declarations.
- 1 Vaccination List (Cholera/Smallpox/Yellow Fever).
- 1 Animal List. (even if nil).

Following documents have to be shown to the Port Authorities:

- Classification Certificate.
- Ship's Register.
- De-ratting Certificate.
- Certificate of Tonnage Measurement.
- Cargo Ship Safety Construction Certificate.
- Cargo Ship Safety Radio-telegraphy Certificate.
- Cargo Ship Safety Equipment Certificate.
- International Load Line Certificate.
- The official Log Book of the vessel and the Articles.

The number of crew written in the crew lists will be checked with the entries in the Articles.

Shore Leave: Each crew member receives a shore pass without particulars, which has to be returned before departure of the vessel. Fines will be imposed if shore leave pass is lost.

AUTHORITY: Office National des Transports – ONATRA.

AGENTS: Socomexas, S.P.R.L., B.P. 83, Matadi, Republic du Zaire. Tel: 22.33 and 22.35. Cables: Comexas. Telex: 51.114.

LUCINDA, Queensland: 18.31 S. 146.25 E.

LOCATION: Lucinda is a first port of call and is situated in position 18° 31′ S., 146° 25′ E. This port is approximately 680 miles North of Brisbane.

PILOTAGE: Location of pilotage boarding ground is 18° 30′ S., 146° 24′ E.

The pilot vessel is equipped with VHF Channels 16, 12 and 6. No regular watch is kept.

HEALTH: Pratique available 24 hours a day, 7 days a week. This is carried out alongside.

TUGS: Required for all movements.

BERTHING: The sugar wharf has an approach jetty from the shore 5.76 km. in length. The berth is 224 m. long.

The wharf is used for the export of bulk sugar which is loaded via a travelling gantry.

The depth of water at LWOST is 13.6 m.

The mean Spring rise is from 0.5 m. to 2.9 m. whilst the mean water neap rise is from 1.2 m. to 2.1 m.

The sugar berth was constructed to accommodate vessels of 40/45,000 d.w.t. with loading rate of up to 1,420 tonnes per hour at the offshore deepwater wharf. Tugs are required for all movements. Berth starboard side to. The maximum all up weight of vehicles allowed on wharf is 5 tonnes gross. There is a height clearance of 2.1 m. on apron.

There are 3 sheds and are confined to bulk sugar storage only. Total capacity 231,000 tonnes. (400,000 tonnes in 1980).

FRESH WATER: Not available.

FUEL: Not available.

GENERAL: *Stores:* Available from Townsville but should be ordered prior to arrival.

AUTHORITY: Department of Harbours and Marine, Townsville.

AGENT: See "Townsville".

Brazil

FORTALEZA: (also see page 115).

SHIPMASTER'S REPORT: January 1981.

TUGS: One available of 1,600 h.p., used for all berthing/unberthing operations.

BERTHING: Berth No. 5 has been dredged to take ships with a draft of 10 m. Deep laden grain ships lighten at this berth by using shore cranes to discharge into lorries before shifting under the sucker towers.

A dredger is based at Fortaleza and works continuously.

CRANES: There are now 2 travelling suction towers for handling grain, each with 2 tubes, at Berth No. 3 where max. draft is 8 m.

ITAQUI: (also see Sao Luiz, page 132).

SHIPMASTER'S REPORT: January 1981.

MAX. SIZE: Max. draft at LW 34 ft. (as advised by Rio Agents).

CRANES: Two mobile grain suckers at Warehouse Quay serving Maranhao Wheat Mill.

FRESH WATER: Ample available ex-wharf, rate 18 t.p.h.

TIME: GMT minus 3 hours throughout the year.

PORTO TROMBETAS: 01.28 S. 56.23 W.

OPERATOR: Mineracao Rio do Norte S.A. – MRN.

LOCATION: The Porto Trombetas Bauxite Terminal is situated on the right bank of the Trombetas River, State of Para. The Trombetas River is a left hand affluent of the Amazon River.

Geographical location:

Lat. 01° 27′ 31″ S., Long. 56° 22′ 48″ W.

The shortest route through the fairway from the North Bar of the Amazon River (North Entrance) to Porto Trombetas is approximately 575 nautical miles.

The distance between the Port of Belem, capital of the State of Para, and Porto Trombetas is approximately 880 km. by air and 611 nautical miles down river.

The distance between the Terminal and Oriximina, the nearest town to Porto Trombetas, is 42 nautical miles.

DOCUMENTS:

(a) Cargo Papers: Master will receive copies of each of the documents listed below:

Notice of Readiness.
Bill of Lading (non-negotiable copy).
Cargo Receipt.
Stowage Plan.
Statement of Facts.
Draft Survey Result.
Manifest of Cargo.

Masters shall approve and sign the Notice of Readiness, Bill of Lading, Draft Survey Result, Statement of Facts and Cargo Receipt, as required by the Shippers and Agents.

(b) Documents Required:

6 Crew Lists.
4 Crew Personal Effects Lists.
7 Passenger Lists (or Negative Passenger Lists if no passengers onboard).
1 Ballast Declaration.
2 Negative Manifests of each port of call where no cargo loaded for Porto Trombetas.
2 Copies of Manifest and 1 copy of each Bill of Lading, if with cargo for Porto Trombetas.

At hand to show:

Crew and Passenger Vaccination Certificates,
Ship's Data,
Fuel, diesel, water quantities on arrival,
Deratting or Exemption Certificate.

(c) Clearance: Ship's Agents will furnish clearance papers for sailing as well as the cargo manifest.

PILOTAGE: Pilot service is available between Porto de Santana and Porto Trombetas. They will board and disembark in the vicinity of Porto de Santana. The Pilots will stay on board at Porto Trombetas.

ANCHORAGE: *Anchorage at Fazendinha for visit of Authorities and embarkation/disembarkation of Pilots:*

In order to avoid any delay due to entrance to Porto de Santana, the Port Captaincy of the State of Para and Federal Territory of Amapa has officially determined the Fazendinha area for visit of Authorities and embarkation/disembarkation of Pilots.

Such area is located around Latitude 00° 04′ 06″ S. and Longitude 51° 06′ 45″ W.

Whenever passing by the port of Macapa, vessels bound for Porto Trombetas are supposed to contact Messrs. "AMSANAV SANTANA", through VHF Channel 16.

Messrs. AMSANAV SANTANA will arrange the visit of Authorities and embarkation of Pilots.

NAVIGATION: *Nautical Charts:*

(a) The Nautical Charts issued by the Hydrographic Navigation Offices (Brazilian Navy) and listed below are used to navigate from the Amazon River North Bar to Porto Trombetas:

200	Maraca to Machadinho Island.
210	Vicinities (approach) of the North Bar to the Amazon River.
220	From the North Bar to Porto de Santana.
201	North Bar of the Amazon River.
202	Bailique Island to Ponta do Capinal.
203	Ponta do Capinal to Pedreira Islands.
204	Pedreira Islands to Santana Island.
205	Macapa to Santana Island.
4101A	Macapa to Mangabal Island (Santana Island included).
4101B	Mangabal Island to Comandai Island.
4102A	Gurupa to Almeirim.
4102B	Almeirim to Prainha.
4103A	Prainha to Costa do Ituqui.
4103B	Costa do Ituqui to Meio Island (Santarem included).
4104A	Meio Island to Santa Rita Island (Obidos included).
4401A	Obidos to Paru Lake (entrance Trombetas River included).
4401B	Paru Lake to Caipuru Lake (Oriximina included).
4402A	Caipuru Lake to Bacabal.
4402B	Bacabal to Erepecu Lake (Narrow Channel of Bacabal and Porto Trombetas).

All charts and publications can be altered by Notice to Mariners (Brazilian Navy information service).

(b) All nautical charts are available through the vessel's sub-Agents if required in advance.

Navigation Inwards:

(a) Undoubtedly the greatest difficulty for navigators coming from the sea is to cross the Amazon River North Bar sand banks.

Bulk carriers navigating to Porto Trombetas will be in ballast, for this reason there should be no need for them to await the high tide, in so far as at low tide, it is possible for them to cross the bar with 9.75 m. (32 ft.) draft.

(b) With adequate nautical charts, good radar and calibrated direction finder, an experienced navigator should be able to enter the North Bar of the Amazon River to Macapa without major difficulties.

Navigation Outwards:

(a) Navigation from Macapa to Ponta do Ceu offers no problem and it will not be necessary even to reduce speed.

(b) The critical section for navigation is from Ponta do Ceu to the open sea as, in addition to the 32 ft. draft, ships have to take advantage of the tide to cross banks of the North bar, where they are affected by the adverse action of a strong current.

Under such conditions ships have to be equipped with such facilities which will permit accurate positioning.

The high tide provides good bottom to anchor at several places along the navigable routes.

Navigation Aids:

A radio beacon is installed at Ponta do Ceu.

The main details are:

Frequency:	290 kHz.
Signal Letters:	EH
Working Hours:	Continuous
Geographical Position:	Lat.: 00° 45′ 40″ N. Long.: 50° 06′ 58″ W.
Range:	300 miles.
Signal:	Ao and A^2 (1,020 H2)
Character of Signal:	(EH . . .), Twice in Ao during 10 seconds and A^2 (1,020 H2) during 5 seconds.

Mineracao Rio do Norte S.A. MRN is not responsible for the location and operation of the navigation aids.

Tidal Information:

The Hydrographic Navigation Office of the Brazilian Navy based on data furnished by the National Astronomical Observatory publishes an Annual Tide Table for the majority of Brazilian ports, including the North Bar of the Amazon River – the Brigue Island, Lat.: 00° 05′ N. and Long.: 50° 05′ W. and Porto de Santana.

(See DG 16–14 Tabuas de Mare (Tide Tables DG 16–14).

Outer Bar Tide Current:

On the Nautical Chart No. 210 information about tide current is furnished (see upper left side of the chart).

RESTRICTIONS:

Draft Restrictions:

Amazon River North bar:
37 ft. fresh water at high tide.
32 ft. fresh water at low tide.

Trombetas River:
36 ft. fresh water from August to December (ebb tide season).
37 ft. fresh water from January to July.

Remarks: These figures are subject to further confirmation with Shippers and vessel's Agent.

RADIO: *Arrival Advice:*

For Agency purposes vessel proceeding to Porto Trombetas shall send ETA North Bar of the Amazon River to Messrs. "AMSANAV BELEM". For your guidance, one notice is required 72 hours prior to such arrival which means vessel's passage along Entrance Buoy located at Lat.: 01° 14′ 30″ N. and Long.: 49° 37′ 16″ W. This procedure will allow sub-Agents at Belem to convey Pilots to Fazendinha Anchorage Area accordingly. After passing along the mentioned entrance buoy, vessel shall proceed via North Channel of the Amazon River up to Fazendinha Anchorage Area located at Lat.: 00° 04′ 06″ S. and Long.: 51° 06′ 45″ W. During such sailing to Fazendinha Anchorage Area vessel will receive from Messrs. "AMSANAV BELEM" all information regarding eventual changes in position of buoys, operations of lights and other aids.

When passing along Macapa (about 8 miles before Fazendinha Anchorage Area) Master is expected to be in contact with Messrs. "AMSANAV SANTANA" through VHF Channel 16. At that time all instructions for vessel's anchorage at Fazendinha in order to receive visitation of Authorities will be forwarded by Messrs. "AMSANAV SANTANA".

When leaving Fazendinha Anchorage Area, Master will be requested to inform local sub-Agents of ETA at mouth of the Trombetas River to be re-transmitted to "DOCENAVE" Porto Trombetas.

Before entering the Trombetas River, Master must obtain "Confirmation for Entrance" from Shipper's Dock Master through VHF Channel 16.

TUGS: One tug of approximately 30 ton bollard pull and one line handling boat are available for berthing and unberthing.

BERTHING:

Bauxite Loading Terminal:

The bauxite loading terminal is equipped to load ore carriers up to approximately the Panama Size.

The maximum loading rate is 6,000 tonnes p.h. but the average loading rate is estimated at 4,200 tonnes p.h. The pier is 100 m. long and the maximum permissible air draft (the distance from the waterline to the top of the hatch coaming) is 13.50 m. at the high water period. The mooring system consists of four concrete dolphins upon metal piling and four mooring buoys.

Accommodation for Vessels:

(a) One vessel can be berthed at the loading dock. Two waiting vessels can be secured to mooring buoys about 1.8 miles downstream from the berth. A secondary waiting area is located West of the mouth of the Trombetas River in the vicinity of Lat. 01° 54′ S. and Long. 55° 40′ W. There is good holding ground in this area and some protection from canaranas and other floating debris.

(b) The movement of all vessels within the Trombetas River system is under the control of MRN. Inbound vessels are not permitted to enter the Trombetas River without prior clearance from MRN. Such approval can be obtained by contacting MRN or DOCENAV on VHF. In case such permission has not been received, the vessel shall anchor at the secondary waiting area in the Amazon River until it is granted. This is necessary because there are two areas within the Trombetas River where vessels are not permitted to pass. Vessels will normally be loaded at Porto Trombetas in order of arrival, provided that they are within their lay-day period as previously agreed with MRN.

Berthing and Unberthing:

For berthing and unberthing the width of the channel in front of the terminal is currently 300 m.

Manoeuvring of vessels should be performed at Master's and Pilot's discretion.

Fendering: No fenders are needed for docking. The terminal is equipped with permanent fenders.

Anchor: The use of vessel's anchor during manoeuvring is permitted at Master's and Pilot's discretion.

Loading Hours: 24 hours a day, Sundays and holidays included.

Hold Condition: No cleaning crews are available.

Holds should be cleaned prior to arrival and they will be inspected before acceptance of vessel.

Loading Operation: The bauxite is transferred from the stockpile to the ship's holds through a conveyor belt system and automatic shiploader.

The shiploader boom moves horizontally around its hinge with an angle of 53° 24′ 44″ to each side.

The loading operation usually starts soon after the vessel is alongside and cleared by the Authorities.

Careful check of vessel's draft and trim should be made by the ship's officers at all times during loading operations. Cargo is belt trimmed only.

The cargo weight should be determined by the "ship's displacement" method (light versus loaded draft survey).

Tonnage on the conveyor belt system between stockpile and ship is approximately 275 tons. This tonnage must be discharged into the holds to complete the loading.

MRN reserves the right to require any vessel to undock after loading and completing the necessary formalities in order to permit another vessel to berth or for any other reason.

GENERAL CARGO WHARF: MRN handles general cargo at a general cargo wharf 350 m. downstream from the shiploader.

MEDICAL: Medical service may be arranged at the MRN hospital, in emergency. Health conditions in the region are good. No epidemics or tropical diseases are recorded in the region.

BALLAST: Vessels are not allowed to discharge salt ballast into the Trombetas River. Salt ballast can be discharged into the Amazon River up till Almeirim Island.

POLLUTION: No facilities are available at the terminal to receive slops, salt water or contaminated ballast.

Discharge of any material other than clean ballast will be subject to heavy penalties as prescribed by the Brazilian law. It is not permitted to discharge salt water ballast into the Trombetas River.

TANKERS: Tankers discharge bulk fuels at a floating pier situated about 400 m. upstream from the Terminal.

FRESH WATER: Available subject to prior consultation with MRN.

FUEL: Not available.

CONSULS: None.

REPAIRS: Small repairs can be undertaken by MRN workshop in extreme emergency only.

SURVEYORS: There is no Classification Society surveyor at Porto Trombetas. Whenever needed a surveyor can be appointed, who will come from any other Brazilian port by plane.

P & I Club: Not available at Porto Trombetas. Administrative assistance and legal advice on matters concerning ship's civil liability to third parties can be obtained from a representative in another Brazilian port who will come by plane.

AIRPORT: The nearest international airport is Manaus (capital of the State of Amazon). There is a domestic airline service between Manaus and Santarem, Belem and Santarem, and Santarem-Porto Trombetas.

TIME: Local time is GMT minus 4 hours.

IDENTIFICATION CARDS: Crew and Passengers: There are no restrictions by the local authorities, but crew members and passengers should have their identification papers when on shore. Visits to the industrial area require prior approval of MRN.

GENERAL:

Weather:

(a) Rain: during the rainy season precipitation is usually heavy but of short duration.

(b) Wind: from July to December, East and E.S.E. winds predominate and they are usually moderate with occasional strong gusts. From January to June calmness predominates followed by N.E. winds backing to S.W. with persistent showers. The predominant wind speed is 10 knots.

(c) Haze is rare in the Amazon River, but it is more frequent in the Trombetas River, particularly early in the morning.

Tide and Current:

In the Porto Trombetas region, the current may reach two knots during high water season (January to July).

Temperature: An average of 30°C.

Mail: Ship's and crews' mail should be addressed to: Mineracao Rio do Norte S.A., MRN legal domicile:

Avenida Almirante Tamandare, 1.114
Belem – Para – Brasil
CEP 66.000.

Telephone: Telephone communication between Porto Trombetas and the rest of Brazil and also international calls are available.

Telephone number: (091) 522 – 2634
(091) 522 – 2335

Telegraph: There is no public station in Porto Trombetas. Telegrams from Porto Trombetas must be sent through the vessel's Agent.

Services:

Shipchandlers and Laundry not available.
Deratting and Fumigation not available.
Electricity not available for supplying vessels.

Porto Trombetas Port Captaincy:

The Brazilian Navy has installed an Agency at Porto Trombetas with the purpose of controlling all vessels destined to the port.

MRN recommends that the Brazilian Pollution Regulations be carefully observed.

The Port Captaincy is located in the vicinity of the shiploader and for any communications, this Port Authority can be reached at the following Telex and Telephone numbers:

Telex: (091) 1470
Telephone: (091) 522 – 2634
(091) 522 – 2335

Agency:

All ships will be attended by Vale do Rio Doce Navegacao S.A. – DOCENAVE through its regional office in Porto Trombetas, and DOCENAVE's sub-Agents in Belem and Porto de Santana (Agencias Mundiais Ltda.):

DOCENAVE's head office:
Rua Voluntarios da Patria, 143
Rio de Janeiro, State of Rio de Janerio
22.270, Brasil
Telephone: (021) 286 – 8002
Telex: (021) 221242, 22249, 22730
Cable Address: "DOCENAVE RIO DE JANEIRO"

DOCENAVE's regional office:
Trombetas, State of Para
68.270 Brasil
Telephone: (091) 522 – 2335
Telex: (091) 1470
Cable Address: "DOCENAVE PORTO TROMBETAS"
Manager: Mr. Marcos Sant'Anna
*Home Phone: (091) 522 – 2335

DOCENAVE's sub-Agents:
Agencias Mundiais Ltda.
Av. Presidente Vargas, 121, 2° andar
P.O. Box 190
Belem, State of Para
66.000 Brasil
Telephone: (091) 224 – 4078, 224 –4267, 224 – 4822, 224 – 4867
Telex: (091) 1184
Cable Address: "AMSANAV BELEM"
General Manager: Mr. R. J. Burnett
*Home Phone: (091) 235 – 0359
Assistant Manager: Mr. E. A. St'Roas
*Home Phone: (091) 223 – 4153

Telex: (091) 1708
Cable Address: "AMSANAV SANTANA"
Manager: Mr. Assis de Souza
*Home Phone: (621) 6796

SHIPMASTER'S REPORT: November 1980.

Vessel visited Porto Trombetas on November 23rd until 25th, 1980 for loading a full cargo of bauxite ore. This port is situated on the righthand side of the Trombetas River, State of Para, a lefthand affluent of the Amazon River, approximately 575 nautical miles from the open sea.

All vessels destined for Porto Trombetas are cleared inwards at Santana, Federal Territory of Amapa, as being the first Brazilian port of call.

On arrival at Porto Trombetas, State of Para, the vessel was visited again by Customs and Federal Police in order to clear the vessel for this "Port of Call". Again several documents were needed. On departure from Porto Trombetas a "Harbour Master's Clearance" is received which has to be handed over to the Santana Authorities, usually via the River Amazon Pilots leaving the vessel in Santana, in exchange for a clearance from that port, delivered by pilot launch.

OPERATORS: Mineracao Rio do Norte S.A. – MRN

Legal Domicile:

Avenida Almirante Tamandare, 1.114
Belem – Para
CEP 66.000
Telex: (091) 1154

Telex: (021) 23352
Telephone: (021) 205 – 9112
Cable: "RINORTE".

RIO GRANDE: (also see page 124).

The following amendments were received from the Port Authority of Rio Grande in December 1980.

DOCUMENTS: See "General" before first port.

PILOTAGE: Compulsory for all vessels entering the Bar or requiring any shifting in the port area. Also compulsory for foreign fishing boats. The Pilot's boarding area outside the Bar is the circular area with one mile radius which centre is the Buoy No. 1 of the Approach Channel.

Requests for a Pilot to be made by Agent, normally 4 hours in advance. Vessels can contact Pilots by VHF Channel 16.

The Pilot's boat is easily identified as it is painted red and is well distinguished from the various boats used in the port.

Priority to enter the Bar: Priority to enter the Bar is established by the anchoring time or arrival time at the outer anchorage or the Pilot's boarding area and vessels should, when anchoring, inform the Port Captaincy, by the 500 kHz. frequency of the coastal station EMBRATEL "PPJ", the name of the vessel, port of registry, port of origin and date-hour of arrival.

When berth is not available and all the inner anchorage areas are occupied, vessels arriving at the Port of Rio Grande should stay outside the Bar.

ANCHORAGE: The official anchorage for vessels arriving at Rio Grande or that have to wait outside the Bar is the circular area within one mile radius, of centre 32° 12′ S., 53° 02′ W.

In order to increase the safety to navigation on the inner part of the channel, the Port of Rio Grande is divided into six areas as follows:

PERMITTED ANCHORAGE AREAS:

Area Alfa: Available for anchoring of up to maximum four vessels of 200 m. LOA, outside the channel. Vessels over 200 m. LOA have to wait outside the Bar to await berth. In special conditions the Harbour Master may grant permission for those vessels to anchor at that area, to load or discharge, using one floating elevator and one barge.

The area *ALFA* is limited by the following points:

A1 – Lat.: 32° 10′ 00″ S.
– Long.: 52° 05′ 27″ W.
A2 – Lat.: 32° 10′ 00″ S.
– Long.: 52° 05′ 03″ W.
A3 – Lat.: 32° 08′ 00″ S.
– Long.: 52° 05′ 48″ W.
A4 – Lat.: 32° 08′ 00″ S.
– Long.: 52° 06′ 06″ W.
A5 – Lat.: 32° 08′ 24″ S.
– Long.: 52° 06′ 06″ W.

Area Charlie: Available for the anchoring of a maximum of two vessels of up to 180 m. LOA, to load or discharge, using one non-self-propelled floating elevator, or two floating elevators of which one has to be necessarily self-propelled.

The area *CHARLIE* is limited by the following points:

C1 – Lat.: 32° 05′ 10″ S.
– Long.: 52° 05′ 30″ W.
C2 – Lat.: 32° 05′ 00″ S.
– Long.: 52° 05′ 48″ W.
C3 – Lat.: 32° 05′ 18″ S.
– Long.: 52° 05′ 33″ W.
C4 – Lat.: 32° 05′ 18″ S.
– Long.: 52° 05′ 50″ W.
C5 – Lat.: 32° 06′ 00″ S.
– Long.: 52° 06′ 06″ W.
C6 – Lat.: 32° 06′ 00″ S.
– Long.: 52° 05′ 45″ W.

Area Echo: Available for the anchoring of a maximum of 5 (five) liner vessels of up to 170 m. LOA.

The area *ECHO* is limited by the following points:

E1 – Lat.: 32° 04′ 37″ S.
– Long.: 52° 05′ 25″ W.
E2 – Lat.: 32° 04′ 51″ S.
– Long.: 52° 05′ 03″ W.
E3 – Lat.: 32° 04′ 15″ S.
– Long.: 52° 04′ 07″ W.
E4 – Lat.: 32° 04′ 00″ S.
– Long.: 52° 04′ 37″ W.

Area Golf: Available for the anchoring of vessels proceeding or coming from the Ports of Porto Alegre and Pelotas, inland vessels and vessels loading or discharging, using one non-self-propelled floating elevator, or two floating elevators of which one has to be necessarily self-propelled.

The area *GOLF* is limited by the following points:

G1 – Lat.: 32° 03′ 27″ S.
– Long.: 52° 02′ 30″ W.
G2 – Lat.: 32° 03′ 36″ S.
– Long.: 52° 03′ 13″ W.
G3 – Lat.: 32° 02′ 21″ S.
– Long.: 52° 02′ 24″ W.
G4 – Lat.: 32° 01′ 51″ S.
– Long.: 52° 02′ 24″ W.
G5 – Lat.: 32° 00′ 48″ S.
– Long.: 52° 02′ 40″ W.
G6 – Lat.: 32° 00′ 48″ S.
– Long.: 52° 03′ 06″ W.
G7 – Lat.: 32° 02′ 32″ S.
– Long.: 52° 02′ 52″ W.
G8 – Lat.: 32° 02′ 45″ S.
– Long.: 52° 02′ 57″ W.

PROHIBITED ANCHORAGE AREAS:

There are three areas where vessels cannot anchor, two located in front of the Terminals of the Super Port and used for manoeuvring of the vessels berthing or unberthing on those Terminals, and the third located on the fork of the main channel of approach to the New Port and channel of approach to Pelotas and Porto Alegre.

Area Bravo: Limited by the following points:

B1 – Lat.: 32° 08′ 00″ S.
– Long.: 52° 06′ 06″ W.
B2 – Lat.: 32° 08′ 00″ S.
– Long.: 52° 05′ 45″ W.
B3 – Lat.: 32° 06′ 00″ S.
– Long.: 52° 06′ 06″ W.
B4 – Lat.: 32° 06′ 00″ S.
– Long.: 52° 05′ 45″ W.

Area Delta: Limited by the following points:

D1 – Lat.: 32° 05′ 00″ S.
– Long.: 52° 05′ 46″ W.
D2 – Lat.: 32° 05′ 10″ S.
– Long.: 52° 05′ 30″ W.
D3 – Lat.: 32° 04′ 51″ S.
– Long.: 52° 05′ 03″ W.
D4 – Lat.: 32° 04′ 37″ S.
– Long.: 52° 05′ 25″ W.

Area Foxtrot: Limited by the following points:

F1 – Lat.: 32° 04′ 00″ S.
– Long.: 52° 04′ 30″ W.
F2 – Lat.: 32° 04′ 15″ S.
– Long.: 52° 04′ 00″ W.
F3 – Lat.: 32° 03′ 34″ S.
– Long.: 52° 03′ 27″ W.
F4 – Lat.: 32° 03′ 32″ S.
– Long.: 52° 03′ 35″ W.
F5 – Lat.: 32° 03′ 32″ S.
– Long.: 52° 04′ 30″ W.

RESTRICTIONS: According to the Brazilian legislation it is prohibited to spill oil or throw overboard any refuse on to the Port waters. The vessels that wish to de-ballast of throw overboard residues resulting from the washing or sweeping of holds should do so outside the Bar, in the circular area of 10 miles radius, with centre at the point 32° 00′ S. and 49° 00′ W., maintaining a course of 090° and speed of 10 knots. The Port Captaincy will grant permission to vessels that need to leave the Port and cross the Bar to do these operations.

MAX. SIZE: The deepest allowable draft in the approach channel to the Port is 37 ft. up to the Cotrijui Grain Terminal; from there inwards there is a variable and progressive reduction to the depth along the remaining part of the channel, ending with a depth of 29 ft. alongside the New Port.

HEALTH:

(a) Vessels arriving from a foreign port of call must receive a visit from Port Health Authority. Each passenger (whether to land or in-transit) and crew members must be in possession of a valid international vaccination certificate against smallpox. Also see "General" before the first port.

(b) Maritime Health Declaration has to be made out and handed to the doctor at the time of visit. When all papers have been examined and found in order, the doctor will authorise lowering of the yellow flag and hand over free pratique.

(c) Vaccination against smallpox can be made on board and respective international certificate issued.

(d) In case of death, suspected disease, serious accident, etc., on board, before vessel arrives in port, Master should radio Agent giving full particulars so that necessary steps may be taken with Health/Police authorities.

RADIO: The Port of Rio Grande has a coastal station of the EMBRATEL network, "Juncao Radio", operating on the international call sign "PPJ", on a wavelength of 600 m. (500 kc/s.). There is telephone communication between radio station and shipping offices, so that, normally, messages are relayed without any appreciable delay. According to government regulations, EMBRATEL is to monitor/control all maritime traffic through its coastal stations, therefore only the tugs and launches used in the Port traffic are allowed to have VHF sets for manoeuvring, therefore all VHF traffic between Agent/ships is channelled through "PPJ" as Agents are not allowed to have their own VHF sets.

TUGS: The Port of Rio Grande has 10 (ten) tugs used in the normal port operations and in refloating vessels. In order to discipline the requisition and employment, the tugs are grouped in accordance with their power: Small, Medium and Large.

The tugs are normally requested by the Agents and placed at the disposal of the Pilot, who should use the tugs in accordance with the size and draft of the vessel, as follows:

1. For berthing/unberthing manoeuvres (vessels in d.w.t.):
   up to 2,500 – optional
   from 2,501 to 5,000 – 1 small tugboat
   from 5,001 to 10,000 – 1 small and 1 medium
   from 10,001 to 20,000 – 1 medium and 1 large
   more than 20,000 – 2 large tugboats
2. To turn vessels or to come in/go out stern first (vessels in d.w.t.):
   up to 2,500 – 2 small tugboats
   from 2,501 to 5,000 – 3 tugboats (1 medium and 2 small)
   from 5,001 to 10,000 – 3 tugboats (1 large and 2 small)

BERTHING: *Old Port:* Used by fishing boats and tugs.

New Port: Has 1,890 m. of continuous quay with 29 ft. draft. Has three rows of sheds for general cargo, plus a series of terminals along its length, mechanically equipped to facilitate loading and unloading operations.

BULK HANDLING FACILITIES: *Cesa Silo:* Terminal used for storage, loading and unloading of grain in bulk. Storage capacity of 60,000 tons. Equipped with two loading/unloading towers of the pneumatic suction type with a discharging rate of 100 t.p.h. each.

Companhia Riograndense de Adubos: This terminal handles raw material used in the manufacturing of fertiliser. The discharging operation is processed through grids with rate of 2,500 to 3,000 tons per day. The discharged cargo is transported by tip-up trucks to the plant, that has a storage capacity of 30,000 tons.

Samrig Terminal: Located on the fourth line of port warehouses. It is used for storage and loading of soyabean meal. It has a storage capacity of 35,000 tons and the loading is performed through a conveyor belt with a rate of 300 t.p.h.

DNPVN Terminal: It has a receiving grid used both for trucks and railroad wagons. Storage capacity of 60,000 tons. It is mainly used for storage and loading of soyabeans, however, it can also be used for storage and loading of soyabean meal. Loading is done through a conveyor belt.

Acos Finos Piratini: Terminal used for storage, loading and discharging of iron ore via conveyor belts. The discharging of vessels is performed at a rate of 600 – 800 t.p.h. and the loading of barges at a rate of 250 t.p.h. Storage capacity of 20,000 tons.

Fertilizantes do Sul S/A-Fertisul: Receives raw material (liquid and solid) used for manufacture of fertilisers. To receive solid fertiliser the conveyor belt of Acos Finos Piratini's installation is used, and, for liquid, there is a pipe-line running from Fertisul's tanks to the New Port's Southernmost part. This pipe-line is used for phosphoric and sulphuric acid, while ammonia is received through a pipe-line running from the Bunker Pier to Fertisul's special ammonia tank, located in the Super Port area.

Discharging rate (approx.) as follows:

Ammonia	400 t.p.h.
Phosphoric acid	1,000 t.p.h.
Sulphuric acid	600 t.p.h.
Solids	400 t.p.h.

Vegoil Terminal: Used for the receiving of, storage and loading of crude soyabean oil. Four tanks with storage capacity of 16,000 tons total. The oil is normally received from trucks or barges. Barges have a discharging rate of about 150/250 t.p.h. The loading is performed via a pipe-line running from the tanks to the New Port (Bomba Geral area) with a loading rate of 300 t.p.h.

Bianchini Terminal: One warehouse with storage capacity of 40,000 tons. Loading rate of 500 t.p.h. Uses conveyor belt system.

AGEF Grain Terminal: Storage of soyabean and soyabean meal. Belongs to the Federal Railroad Administration and is linked to the DNPVN Terminal loading installations. Storage capacity of 24,000 tons (2 sheds).

Meat Reefer Warehouse: Has a total storage capacity of 8,200 tons.

Barge Terminal: Basically it is an installation linked to Bianchini, SAMRIG, DNPVN and AGEF Terminals, used for discharging of soyabean meal/soyabeans from barges. It uses cranes with grabs to discharge the barges. The cargo is transported by a conveyor belt to the Terminals.

The New Port has along its extension several cranes varying from 3 to 12 tons, used for operations with general cargo and containers.

Super Port: Port complex located at the 4th "Secao da Barra" on the West margin of the approach channel, with various terminals equipped with loading/discharging equipment conveniently suitable for the handling of bulk cargoes.

Bunker Pier: Located approximately one mile North from the place called "Ponta da Mangueira"; it is a pier 228 m. in length and draft alongside of 33 ft. Primarily used for the receiving of crude oil and for the loading of bunker barges. There also are located the connections of the Fertisul Ammonia Terminal, Manah and CRA Phosphoric Acid Terminals.

Luchsinger Madorin Fertiliser Terminal: Located South of the bunker pier, has a T-shaped pier, 118 m. in length and draft of 36 ft. It has facilities for discharging sulphuric acid, phosphoric acid, liquid anhydrous ammonia and two conveyor belts for discharging of raw material used in the manufacturing of fertiliser. The storage capacity of solid fertiliser is of 100,000 tons. On the inside part of the pier there are loading facilities for barges with a loading rate of 300 t.p.h.

Discharging rates are as folows:

Liquid ammonia	544 t.p.h.
Sulphuric acid	500 t.p.h.
Phosphoric acid	1,200 t.p.h.
Solid fertiliser	500 t.p.h.

Portobras' Wheat & Soyabean Terminal: Presently under construction. Expected to be operative by mid-1981. It is located South of Luchsinger Terminal with a solid pier 611 m. in length and draft of 47 ft., allowing for the berthing of vessels up to 412 m. LOA. Loading rate of 3,000 t.p.h. and storage capacity of 130,000 tons. Can receive cargo simultaneously from trucks and railroad wagons, at a rate of 250 – 500 t.p.h. On its completion it will be the biggest Grain Terminal in Latin America.

Cotrijui Grain Terminal: Located South of the new Portobras' Wheat & Soyabean Terminal, it has a "T"-shaped pier of 265 m. length and draft of 39 ft. It can receive vessels up to 60,000 d.w.t. It has 8 sheds with 25,000 tons soyabeans, 27,000 tons of wheat and 18,000 tons of soyabean meal capacity each and two tanks for storage of soyabean oil with capacity of 5,000 tons each. Loading rate as follows:

Soyabean	2,000 t.p.h.
Wheat	1,000 t.p.h.
Soyabean meal	600 t.p.h.
Soyabean oil	500 t.p.h.

Transhipment Dolphins: Located South of the Cotrijui Grain Terminal is used for transhipment of vessels over 180 m. LOA. Draft alongside is 37 ft.

Meat Terminal: Located South of the Transhipment Dolphins, has a solid quay of 300 m. in length and draft of 37 ft. It has a reefer warehouse with 4 cold chambers with a total storage capacity of 10,000 tons. The pier has 2 gantry cranes for the loading/unloading of containers.

STEVEDORES: *Working Hours:* Straight time, 0730/1130 – 1300/1700 (weekdays). During weekdays, labour for morning shift which commences at 0730 hrs., may be ordered up to 0715 hrs.; at 1245 hrs. extra gangs may, if necessary, be engaged for afternoon shift commencing at 1300 hrs. For night work, longshoremen (i.e. dock labourers distinct from stevedores) must be ordered before 1600 hrs.; stevedores, tally-clerks, etc., for night work may be engaged up to 1845 hrs. for shift that starts at 1900 hrs.

Sunday/holiday work must be ordered previous day, up to 1600 hrs.

MEDICAL: Two hospitals available which have adequate facilities to deal with a majority of cases.

FRESH WATER: Along the New Port quay there are 30 connections for fresh water that is delivered at a rate of about 25 t.p.h., or less, depending on the number of vessels being supplied. The terminals on the Super Port area lack those facilities apart from the Bunker Pier which has 6 connections with a rate of 20 t.p.h. For ships anchored at the Inner Roads fresh water can be supplied by a barge owned by the Port Administration, with a capacity of 400 tons. The barge requires the assistance of a tug to tow it.

FUEL: Can be supplied by truck (diesel), at the Bunker Pier (diesel and fuel) and ex-barges (diesel and fuel). Most commonly bunkers are supplied ex-barge. Suppliers are Petrobras, Shell, Elf, Exxon and Texaco. Stem has to be made previously abroad and price charged is the one in force on the day of delivery.

GANGWAY/DECK WATCHMEN: Compulsory for all sea-going vessels to have a port gangway watchman, normally requested by the ship's Agents, to the Watchman Syndicate. Apart from the gangway watchman, it is advisable to employ a crew member as deck watchman to look after the ship's safety.

OPENING/CLOSING HATCHES: Opening and closing of conventional hatches normally done by stevedores, without any extra cost, advisable, however, for steel hatches to be handled by crew.

CUSTOMS ALLOWANCES: Each crew member allowed one carton of cigarettes (or the equivalent in pipe tobacco) and one bottle of spirits, per week. Ships that remain in port over a week may request customs, through their Agent, to open bond for another weekly issue.

IDENTITY CARDS: Foreign crew members are not allowed to go ashore without presentation of identity card, on which there is a photograph of holder and personal details. These cards are provided by the Agent upon arrival. The identity card must be delivered on disembarkation to the Federal Police, who will return it to the crew member on re-embarkation.

REPAIRS: Two small repair shops equipped to carry out minor repairs. No dry docks. Radio, radar and gyro technicians available, but expensive.

REPATRIATION: Seamen rejoining their ships or being repatriated have to proceed to Porto Alegre, by bus, where arrangements can be made for embarkation by air.

TIME: GMT minus 3 hours.

HOLIDAYS: *National:* 1st January*, 21st April, 1st May*, 7th September, 15th November, 25th December*.

Municipal: 2nd February.

Days marked (*) No labour available.

GENERAL: *Light and Power:* The supply to the New Port is done by the State Company of Electric Energy (CEEE) with 13. 8 kV, 60 c/s. voltage that is lowered by 6 sub-stations along the quay, from 600 to 1,000 kVA to 380 to 220 V. Along the quay, every 25 m. there is a power plug to connect the power to the port cranes with 300 A. Those plugs can also connect the power to the vessels along the quay.

SEPETIBA TERMINAL: (also see page 135).
(See Late Plans)

REPORT: December 1980.

Location: Madeira Island – District of Itaguai – Rio de Janeiro.

Geographical Coordinates:

Latitude: 22° 56′ 11″ South, Longitude: 43° 50′ 20″ West.

Access:

Railroad – Wide gauge linking the Port to Japeri.

Highway – Connecting BR-101 highway to the Northern and Southern highways.

Ocean – Deep channel with 15 m. in the initial phase with 18 m. later.

Infrastructure:

Electric Power – High tension line of 138 kva.

Water – Guandu system, with great capacity.

Available systems of communication: telephone, telex and radio.

Hand-labour – Specialised and semi-specialised, available in the area.

Supplies – Easily available in the area.

Stages of the Project:

1st Stage: The terminal has a capacity to transport 5.8 million tons of coal/year, added to the manoeuvring of 130,000 tons/year of alumina from Valesul. Termination expected in the 2nd half of 1981.

2nd Stage: To be developed soon after the termination of 1st stage. Will be constituted of installations for the exportation of 18 million tons/year of iron ore (2 berths); 4 million tons/year of steel products (3 berths) and a quay for the transport of natural gas, sulphur, fertilisers and containers.

Construction being executed:

Access channel – With 22 km. extension and 200 m. width. Manoeuvring basin of 11 m. depth where vessels will manoeuvre without cargo.

Berthing quay: With 540 m. length and 39.25 m. width, allowing the berthing of 2 vessels (one of 90,000 t.d.w. and another of 50,000 t.d.w., or 2 of 65,000 t.d.w.) at South face, and 2 of 45,000 t.d.w. at North face. It will have 2 conveyor belts for coal and one for alumina, being 3 m. wide reserved for the installation of equipment in the 2nd stage.

Access bridge: The access to the quay is by an "L" shaped bridge, 750 m. in length and 22.5 m. width.

Sea-wall: It covers the Southern part of Madeira Island with an extension of 4,000 m. It will also be utilized for the passage of coal conveyor belt lines, access roads, and in the 2nd stage, for the access of steel products and ore conveyor belt lines to the quay.

Stocking area: Parallelogram-shaped, it will have 2,500,000 sq.m. and a stocking capacity of 500,000 tons.

Rear stocking area:

Reserved for cargo (coal, ore, solid and liquid bulks, etc.)	5,050,000 sq.m.
Reserved for the administration, maintenance and services	1,200,000 sq.m.
Reserved for small industries associated with the port activities	800,000 sq.m.
	7,050,000 sq.m.

Operational equipment:

Quay equipments: Coal – 2 dischargers of 1,500 t.p.h. each
2 dischargers of 800 t.p.h. each
Alumina – 1 sucker of 300 t.p.h.

Transport equipment:

Coal – 2 conveyor belts of 4,500 t.p.h. each
Alumina – 1 conveyor belt of 300 t.p.h.

Piling equipment:

Coal – 2 fork-lifts of 4,500 t.p.h. each
2 recyclers of 3,000 t.p.h. each

Centralized Control: Equipment is controlled by an automated Main Control Centre which will supervise the operations.

Water supplying and fire fighting system: A 200 mm. duct, expected capacity of 200 litres/second. A reservoir of 1,500 cu.m. will supply the whole port including the fire line.

Sewage: A compact modular station has been initially planned, and subsequently an underwater pipe-line.

Buildings and auxiliary installations:

Buildings for the Administration and Operations.

Buildings for the Maintenance and Services.

For the Communications Room.

Expansion: So as to increase the capacity of the coal terminal to 2.8 million tons/year, making a total of 8.6 million tons/year, 2 more dischargers will be required, one (1) with a capacity of 1,500 t.p.h. and another with 800 t.p.h.

Cayman Islands

CAYMAN BRAC: (also see page 197).

SHIPMASTER'S REPORT: November 1980.

Vessel (230,000 d.w.t.) arrived at Cayman Brac for 2 to 3 months storage and lightening operations. No information or charts were on board prior to arrival.

Cayman Brac is a small island about 12 miles by 1.5 miles and is used solely for lightening operations, a maximum of 4 pairs of ships being handled at one time, but usually only 2.

There are 2 Pilot and port official boarding areas, North boarding area 19° 43′ N., 79° 53′ W. and South boarding area 19° 40′ N., 79° 53′ W., the choice depending on the wind direction. If no chart on board Cayman Brac can be approached to within 1 mile at any draft. There is no proper harbour, the launches have to boarded from the beach using small boats, the launches remaining at moorings some distance offshore which can make transfer difficult in bad weather, especially for heavy stores.

There are no stores available on Cayman Brac, all stores have to be flown in from Grand Cayman or from Tampa, Florida. There is no official shipchandler on Cayman Brac although the Agent will assist vessels requesting small amounts of stores. We were informed by other vessels that usual method of obtaining large stores was to arrange for a supply by container direct from Tampa, Florida to the ship using a small coastal freighter. Other ships had stored at Barbados on the way in and way out. All stores are very expensive.

On arrival at Cayman Brac contact was initially made with "Cayman Brac Pilots" on Channel 16. However the call sign "Cayman Brac Pilots" is not usually used as this is in fact 'Cayman Energy' who organise all Pilots, launch services and lightening operations. 'Cayman Energy' is run by Captain H. Banks who appears to man the shore VHF station 24 hours a day, in addition to occasionally acting as a Pilot.

There are very few suitable anchorage positions, due to deepwater existing right up to the reef. There is one at the West end of Cayman Brac suitable for a VLCC with maximum draft of 66 ft. This is close to the boarding areas. Another at the West end of Little Cayman is suitable for a VLCC but two hours by launch from boarding area. There is another at East end of Little Cayman suitable only for vessels up to 100,000 tons. We used the anchorage at the West end of Cayman Brac and although very close to shore experienced no dragging during time anchored. We were informed by Pilots that no ship had ever dragged from that anchorage. Pilot essential for anchoring.

Agents are "Cayman Harbour" who monitor Channel 16 and are very helpful at all times. A doctor is available but no dentist. (Cable: "CAYHARB CAYMANBRAC").

Lightening Operations: Normal procedure is for ship to be lightened (STBL) to fender starboard side before berthing, 4 fenders being brought out by launch 'Cayman Mariner' or 'North Harbour' also 2 hoses and reducers if required, on a barge. The fenders are positioned and hoses connected using 2 shore operators assisted by ship's crew. This can take up to six hours, during which time a Pilot is on board. Two Pilots and 2 shore operators remain on board during lightening. Then, if conditions are suitable both vessels steam with wind 15° on starboard bow, STBL at 4 knots and lightening ship comes up from astern on starboard side and closes with STBL, the operation being controlled by Pilot on lightening ship.

Berthing can take from 1 to 3 hours depending on circumstances, so a suitable clear run is required ahead of vessels to enable this to take place without altering course. Needless to say berthing vessels have right of way over all other vessels and this local rule is enforced by 'Cayman Energy".

Both ships have a Pilot during the entire berthing, lightening and unberthing operations, also Pilot remains on STBL until fenders and hoses removed. This is done unless next lightening operation is expected in near future, as fenders are liable to damage if left in position on STBL.

Due to Cayman Brac lying N.E./S.W. and wind during Winter months generally from N.E. there is not much shelter available but even so lightening operations are only occasionally interrupted due to weather.

Ullages and cargo figures on our vessel and lightening ship were checked by Calib Brett Surveyors, this service having been arranged by charterers, it is not standard procedure, but depends on charterers.

Whilst lightening, navigation is carried out by STBL so bridge must be manned throughout, as well as cargo control room. Vessel steams normally at slow speed to maintain suitable position, with long periods of "stop" when engines are not required. During this time lightening ship's engines are not used. Maximum discharge rate permitted during discharge is 5,000 t.p.h. No difficulties were experienced during berthing or discharge except that due to communication problems with charterers, STBL and lightening ship occasionally had differing orders regarding discharge quantities, however this could usually be sorted out by "Cayman Harbour" in a short time.

There is a twice daily flight from Grand Cayman to Cayman Brac. This flight is always fully booked but even so seats are usually available. Extra flights are also made when required. Flights lasts 50 minutes and costs £10.00 single. There are 2 hotels on Cayman Brac and rooms are usually available.

Documents: On arrival Customs and Immigration board and require 4 copies each:

Crew Personal Effects Lists (Crew Lists also required before sailing).

Stores Lists including Narcotics.

Crew Lists (with full names).

Vaccination Lists.

Currency is Cayman Island Dollars (CI$) but U.S. Dollars are accepted with exchange rate US$ 1.00 = CI$ 0.82.

Cuba

GENERAL INFORMATION:

THE FOLLOWING IS A COPY OF A PORT INFORMATION BOOKLET COMPILED BY MAMBISAS AGENCIES AND RECEIVED TOO LATE TO BE INCLUDED IN THE "CUBA SECTION".

(1) ARRIVAL ADVICE: ETA messages should be sent to Mambisas Havana when Havana is the first port of call, or to Mambisas* (at port of call) and Mambisas Havana simultaneously, when the first port is other than Havana.

Mambisas Agency at the port where vessel was nominated for operation or call will advise Port Authorities and concerned parties, but this in no way relieves Masters from any specific obligation to advise other parties according to Charter Party, or orders received from Owners, Managers, Charterers, etc., to such effect.

*(See No. 2 item "Mambisas Cable Addresses").

(2) MAMBISAS AGENCIES – CABLE ADDRESSES: The following list of Agencies is in geographical order, starting from the Westernmost port Head Agency on the North coast (Mariel) in an Easterly direction, and from East to West on the South coast, ending at the sub-Agency of Nueva Gerona.

Mariel:	(including Santa Lucia, Bahia Honda and Cabanas): Mambisas Mariel.
Havana:	Mambisas Havana.
Matanzas:	Mambisas Matanzas.
Cardenas:	Mambisas Cardenas.
Isabela de Sagua:	Mambisas Sagua la Grande.
Caibarien	Mambisas Caibarien.
Nuevitas:	(including Boca Grande and Jucaro): Mambisas Nuevitas.
Puerto Padre:	(including Manati): Mambisas Puerto Padre.
Antilla:	(including Banes, Felton, Preston, Nicaro, Tanamo and Vita): Mambisas Antilla.
Moa:	(including Punta Gorda): Mambisas Moa.
Baracoa:	Simon Baracoa.
Guantanamo:	Mambisas Caimanera.
Santiago de Cuba:	Mambisas Santiago de Cuba.
Manzanillo:	(including Pilon, Niquero, Media Luna and Ceiba Hueca): Mambisas Manzanillo.
Guayabal:	Mambisas Santa Cruz Del Sur.
Jucaro:	Mambisas Nuevitas.
Boca Grande:	Mambisas Nuevitas.
Cienfuegos:	(including Tunas de Zaza and Casilda): Mambisas Cienfuegos.
Nueva Gerona:	Mambisas Nueva Gerona.

(3) LOCAL TIME: Official local time in all Cuban territory is that for the 75th West Greenwich Meridian and there is a difference of 5 hours compared to GMT, that is, 1200 hrs. GMT is equivalent to 0700 hrs. local time.

From the last Sunday in April to the last Sunday in September, Summer Daylight Saving Time is in effect and the difference then is only of 4 hours, that is, 1200 hrs. GMT is equivalent to 0800 hrs. local time.

(4) PILOTAGE: Pilotage is compulsory for all foreign and Cuban vessels at all Cuban ports.

(5) HEALTH AND SANITARY REQUIREMENTS: In case of suspected disease or fever on board, Master must radio Mambisas Agency in order to advise the Health Office.

Vessels proceeding from countries affected by Aphthous Fever or Bovine Plague are subject to fumigation including crew members', passengers' clothes and shoes; therefore, it is advisable to have clothes/shoes gathered in an appropriate space or cabin in order to speed up fumigation.

Vegetable or animal products are subject to inspection before cargo is allowed to be discharged.

All crew members and passengers must have vaccination cards up to date.

Free pratique is automatic for vessels coming direct from another Cuban port; from foreign countries, usual procedure of Sanitary inspection applies.

(6) DOCUMENTS REQUIRED:

Sanitary Authorities:

1 Bill of Health.
1 Crew List.
2 Passenger Lists (if any).

Vaccination cards and deratisation certificate will be inspected by Authorities.

Immigration Authorities:

3 Crew Lists.
3 Passenger Lists (if any).

Customs Authorities:

3 Crew Lists.
3 Passenger Lists, including baggage (if any).
3 Crew Personal Effects Lists.
2 Provisions Lists.
2 Spares and Stores Lists.
3 Cargo Manifests (if any cargo on board).
3 In-Ballast Manifests (if no cargo on board).
3 Manifests of Cargo in care of the Master (if any).
1 Copy of Clearance from Last Port.

Agents:

4 Crew Lists.
3 Cargo Manifests
2 Copies each Bill of Lading.
3 Manifests of cargo in care of the Master.
6 Hatch Lists.
6 Stowage Plans.

(7) CERTIFICATES REQUIRED:

Ship's Register.
Safety Equipment.
Load Line.
Safety Radio.
Safety Construction.
Deratisation.

(8) USE OF SOUND SIGNALS IN PORT: It is prohibited to use sound signals except those internationally known for safe navigation, fire or emergency.

(9) DRY DOCK: There is a dry dock at the port of Havana with berthing capacity of 440 ft. length and 91 ft. width which can accommodate vessels up to 23 ft. draft.

(10) REPATRIATION: There are good facilities and repatriation can be arranged through Mambisas Agency.

(11) HOLIDAYS:

National Anniversaries	*Holidays*
January 1st.	July 25th.
May 1st.	July 27th.
July 26th.	Sundays
October 10th.	

(12) SHORE LEAVE: Shore leave is granted to crew members from about 0800 hrs. to 2400 hrs., depending on the port.

Seamen's Book or Passport is handed to gangway guard for shore leave in exchange for a shore pass.

(13) WOOD DUNNAGE: Can be supplied at the port of Havana.

In the outports, wood dunnage can also be supplied but occasionally it is very difficult to obtain and therefore it is advisable for vessels in ballast for loading bagged sugar to obtain wood dunnage at last port of call before arriving in Cuba.

(14) SURVEYORS: Following surveyors are established in Cuba:

Cuban Maritime Regulation Surveyors, Bureau Veritas, Lloyd's Register, German Lloyd and U.S.S.R. Ship's Register.

Above listed surveyors should be contacted through the Consignataria Mambisas main office.

(15) CUBAN PORT REGULATIONS BOOKLET: In order that Masters may be properly informed, on not only Port and Cuban Government Regulations, but also on various matters related to loading and/or discharging operations, a copy of the booklet "Cuban Port Regulations" is handed to every Shipmaster upon arrival.

(16) IMPORTANT NOTICE. EIGHT HOURS DAILY WORK: We wish to call attention to the fact that although the working periods observed at the various Cuban Ports vary considerably, as for example, the port of Jucaro where the period is from 0600 – 1000 hrs., 1200 – 1600 hrs.; Caibarien 0700 – 1100 hrs., 1200 – 1600 hrs.; Havana 0700 – 1300 hrs., 1300 – 1900 hrs. etc., and others from 0700 – 1100 hrs., 1300 – 1700 hrs.

Labour Legislation presently in force provides that the number of hours to be worked is 8 hours daily, from Monday to Friday, and 4 hours on Saturday, for a total of 44 hours weekly.

ANTILLA (including Preston, Felton and Nicaro): (See Late Plans)

(1) LOCATION: The Port of Antilla is located on the North side of Nipe Bay, on the North Coast of Cuba: Lat. 20° 50′ N., Long. 75° 44′ W.

Nipe is the largest bay in Cuba and is considered among the biggest in the world.

Within Nipe Bay there are 3 ports: Felton, Preston and Antilla, Antilla being the head port of a region, and very important because of its natural resources in agriculture, mining, etc., as well as for sugar industries close to the port.

The Antilla Agency attends also at the following ports: Preston, Felton, Nicaro, Banes, Tanamo and, temporarily at Vita.

Nipe Bay is suitable for large vessels of any length and up to 20 m. draft, which can anchor in the vicinity of buoy No. 9, (La Estrella Shoal) inside the triangle formed by Pt. Saetia, Pt. Berraco and La Estrella Shoal.

Antilla is a very efficient port in all respects but as a sugar shipping port ranks among the best in the nation.

(2) PILOT: *Where Pilot should be taken and distance to place of operation:*

The place where Pilots board the vessels nominated to perform operations at Antilla, Preston, Felton, Banes or Nicaro, is located at 1 mile N.E. of Point Mayari, that is in an East/West line from Pt. Mayari lighthouse on the course of the bearings indicated by the port chart.

The exact position where Pilots board vessels is: Lat. 20° 47′ 46″ N., Long. 75° 32′ 15″ W.

From this point the distances to the ports are:

	Miles to pier	*Miles to anchorage*
Antilla	13	13.5
Preston	6.5	6.5
Felton	5	4
Nicaro	13	12
Banes	17	17
Fondeadero Saetia	2.5	

Point Mayari Lighthouse consists of a conical/cylindrical steel tower, painted aluminium, 40 ft. tall and its light is visible up to 10 miles away.

As the pilot station is located in Antilla, upon receipt of an ETA message from an incoming vessel, Mambisas Agency immediately informs the Pilots who depart accordingly to Saetia to await the vessel.

Once the Pilot is in Saetia it is almost impossible to communicate with him, therefore Masters must exert care in sending ETA messages to Antilla in order to offer the Pilots the closest ETA at Pt. Mayari, thus avoiding unnecessary problems for Pilots or delays to ship.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: Entrance to Nipe Bay is safe and free of risks. Limitations as to length and draft of vessels are only those imposed by the places of operations or ports.

Entrance channel is ample (0.75 miles wide at its head and 0.33 miles at its narrowest point, located South of Pt. Caimanes), having a minimum depth of 150 ft. up to Saetia Anchorage.

From Saetia up to Antilla piers the distance is 10 miles.

Navigating toward Western Nipe Bay, in the direction of Antilla, after Saetia is past, to the South can be seen: Cayagima Cove, Point Cobos, the mouth of Mayari River and the Port of Preston.

To the North can be seen after departing from Saetia: the town of Ramon, located on high lands at the back of Melilla Cove, Pt. Berraco, Pt. Las Chivas, Honda Cove, Pt. Salinita, Hermenegildo Cove, Pt. Negra, Felipe Cove, Pt. Carbonera and Pt. Salina.

From the latter onward, Antilla's piers channel is navigated, and to the North can be seen Pt. Barrancones, Marbella Cay and finally the town and port of Antilla.

Vessels' maximum official draft and length allowed to enter or sail from Antilla are: Length 557 ft., draft 21 ft. fore, 23 ft. aft.

Regarding length of 557 ft., it is the maximum advisable for dry cargo vessels.

Tankers having a length of 610 ft. have called at this port to load molasses.

Entrance to or sailing from Nipe Bay and Antilla can be effected either during day or night-time.

(4) ANCHORAGES: Anchorages at Nipe Bay are used only when waiting for berth, or as Saetia, to await favourable tide to enter Banes or Nicaro.

No operations are performed at anchorages.

Saetia Anchorage: Located about 1,000 m. West of Pt. Carenero (Saetia).

Limitations: Draft 20 m., Length: No limitations. Swinging area: About 800 m.

3 vessels (557 ft. in length) or one supertanker can be accommodated at this anchorage.

The bottom is soft mud but anchors hold well, ships usually anchor with 4 or 5 shackles of chain.

In front of this anchorage is the small town and beach of Saetia.

Usually this anchorage is used by vessels destined for Felton or to await favourable tide to enter the ports of Banes or Nicaro.

La Chiva Anchorage: Located at about 1.25 miles from Pt. Berraco, to the North on the Melilla Heights, the small town of Ramon can be seen.

Limitations: Draft 20 m., Length: No limitations. Swinging area: About 900 m.

Can accommodate two 557 ft. length vessels or 1 supertanker.

The bottom is hard sandy mud with loose stones and anchors holding is good. It is sheltered from the winds by Melilla Heights.

Ships usually anchor with 3 or 4 shackles of chain.

This anchorage is used for similar reasons as Saetia.

Cajimaya Anchorage: Located just in front of the port of Felton.

Limitations: Draft 32 ft., Length 600 ft. Swinging area: About 400 m.

2 vessels can be accommodated at anchorage.

The bottom is soft mud but anchors hold well.

Sheltered from winds by Saetia mountains, ships usually anchor with 3 or 4 shackles of chain.

This anchorage is used by vessels awaiting berth at Felton.

Pt. Salinas Anchorage: Located about 500 m. S.S.W. of buoy marking Salina Grande Shoal; Antilla Town is about 3 miles to the N.W. and at a similar distance is Preston to the S.S.W.

Limitations: Draft 31 ft., Length: No limitation. Swinging area: About 500 m.

Four or five regular size vessels can be accommodated at this anchorage.

The bottom is soft mud but anchors hold well.

It is not sheltered from winds, being located in a spot where, when there is bad weather, the sea becomes rough.

Usually vessels anchor with 3 shackles of chain.

This anchorage is used by vessels awaiting berth at Antilla.

Preston Anchorage: Located about 1,200 m. N.N.W. of the head of Preston pier; to the South of the small town of Guatemala (formerly Preston) sugar mill can be seen.

Limitations: Draft 30 ft., Length: No limitations. Swinging area: About 1,000 m.

Three or four regular size vessels can be accommodated at this anchorage.

The bottom is soft mud but anchors hold well, anchorage is open to the winds.

Usually vessels anchor with 3 shackles of chain, depending on wind force.

This anchorage is used by vessels awaiting berth at Preston.

Corojal Anchorage: Located about 320 m. N.W. from Antilla pier head, just in front of Antilla town.

Limitations: Draft 18 ft., Length 557 ft. Swinging area: About 180 m.

Anchorage can accommodate 1 vessel only.

Bottom is soft mud but anchors hold well.

Anchorage is open to the winds and vessels anchor with 2 shackles of chain, depending on wind force.

This anchorage is used to wait for Port Doctor visit in cases of incoming vessels from foreign countries and also to await berth at Antilla.

Antilla Anchorage No. 2: Located about 700 m. from Antilla pier head.

Limitations: Draft 23 ft., Length 500 ft. Swinging area: About 300 m.

Anchorage can accommodate 1 vessel only.

Bottom is soft mud but anchors hold well.

It is open to the winds and vessels anchor with 3 or 4 shackles of chain. If strong winds do blow, then vessels drop another anchor to reduce the swinging action.

This anchorage has the same use as Corojal Anchorage.

Saetia, La Chiva and Cajimaya Anchorages have no transportation service; the remaining anchorages have launch service available, if requested by Masters.

(5) TIDAL VARIATION: Tidal variation at this port averages 2.25 ft. to 2.5 ft.

(6) BUNKERS: It is not possible to obtain bunkers at Antilla.

(7) WATER: *(Potable or for boilers):*

Small amounts of water (about 30 tons) can be delivered if requested 48 hours in advance.

Water is brought to the port by railroad tank-cars from distant places, and is pumped directly to ships by portable pump.

Water deliveries at Antilla are deficient and not reliable, because on occasions there are no tank-cars available.

Price: $4.83 per ton FOB, delivery rate 15 t.p.h.

Daily delivery rate cannot be determined due to unreliability of transportation.

(8) PAPER/WOOD DUNNAGE: It is advisable that vessels nominated for operations at Antilla, or any of the ports listed as attended by Antilla Agency, arrive with enough wood dunnage.

Wood dunnage, although not impossible to obtain, sometimes is hard to secure, and to avoid delays it is better to have the vessel supplied at a prior port of call.

Paper is supplied if ordered at least 3 days in advance.

(9) REPAIRS: No repairs can be performed at this port.

(10) PORT AUTHORITIES: All Port Authorities are located at Antilla.

(11) WORKING HOURS: Monday to Friday: 0700 – 1100 hrs. – 1300 – 1700 hrs. Saturdays: 0700 – 1100 hrs.

(12) PORT OPERATIONAL CAPACITY: Three vessels loading sugar can be operated simultaneously but labour available is only 12 gangs.

Average rate for loading sugar is 900 tons in an eight hour work period for 5-hatch vessels.

(13) CARGO HANDLED BY THE PORT: Importation: Diesel oil, gasoline and general cargo.

Exportation: Bagged raw sugar and molasses.

Coastal trade: General cargo, diesel oil, gasoline, kerosene.

(14) TRANSPORTATION: Transportation to or from Antilla is difficult, although railroad and bus transportation is available.

Best advisable means of transportation to any place or city of the nation is to travel to Holguin from which transportation means are numerous and easily attainable.

Transportation between Antilla and the rest of the ports attended by Antilla Agency is usually by means of launches, but there is also a road connection, and distances and travelling time from Antilla are as follows:

Port	*By Launch*	*By Road*
Preston	1 hour – 7 miles	1 hour 45 mins.
Felton	1 hour 30 mins. – 11 miles	2 hours 15 mins.
Nicaro	2 hours – 14 miles	3 hours 15 mins.
Tanamo	—	4 hours
Banes	—	1 hour

There is a regular daily scheduled launch service from Antilla with stops at Preston and Saetia, final destination, Nicaro.

Launch leaves Antilla daily at 0900 hrs. and arrives Nicaro at 1100 hrs.

(15) COMMUNICATIONS: At Antilla, means of communications are: Telephone, telegraph, radiograms RCA System, telex and Post Office.

The Antilla Agency is connected to the National Telex System, which is the quickest means of communication.

Vessels proceeding to Cuba can communicate with Mambisas Antilla Agency through "CLA" Havana Radio Station which immediately relays the messages to Antilla by radiograms, telegraph or telex.

Masters must send their ETA messages simultaneously on VHF Channel 16 to Mambisas Antilla and Mambisas Havana.

(16) MAIL AND PARCELS: Should be sent to our Main Offices at Havana from where it will be sent to Antilla by the quickest means possible.

(17) AGENCY ADDRESS:

Empresa Consignataria Mambisa,
Agencia Antilla,
Ave. Wenceslao Aguilera No. 55,
Apartado No. 52,
Antilla, Prov. de Oriente.
Telephone: 8248 and 8225 (office); 158 and 159 (night).
Telex: 021124.
Cables: Mambisas Antilla.

Agency VHF works on Channel 16.

(18) OPERATIONS AT BAY OR ANCHORAGE: No operations at bay or anchorage performed at this port.

(19) MEDICAL ATTENTION TO CREW MEMBERS: Crew members requiring medical care are treated at Antilla Hospital, where they can be hospitalised if necessary.

(20) BAGS LOADED PER SLING: Six bags of raw sugar 100 kilos each.

(21) EQUIPMENT TO LOAD BULK RAW SUGAR EX-BAGS: The port has 5 sets of complete equipment powered by diesel motors.

Each set of equipment consists of a grate, funnel support, canvas funnel and telescopic thrower.

Sugar bags are opened on the square of the hatch.

(22) PLACES OF OPERATION: The 3 berthing spaces of this port have standard gauge railroad tracks.

Each pier is connected with 1 railway which is independent of the others, but with no car, outlet at end of piers, consequently, to perform any movement, it is necessary to take out the remaining cars. For that reason, there is no road connecting the piers, and since piers are not paved, trucking operations cannot be performed.

Pier No. 4

22/1 North Side: Length 458 ft., maximum length vessel allowed 557 ft., draft 17 ft. forward and 23 ft. aft.

22/1 South Side: Length 458 ft., maximum length vessel allowed 557 ft., draft 21 ft. forward and 23 ft. aft.

The construction of this pier is concrete, that is the platform and the piling. It is protected by hard wood fenders and has a fixed red light at the S.W. end.

Cargo handled by this pier: Bagged raw sugar, molasses, general cargo.

Tanker Information: Molasses pumping rate averages 35,000 gallons per hour.

Molasses: Two connections: 1×8 in., 1×12 in. diameter.

22/2 Coast Pier: Length 398 ft., draft 20 ft. even keel., maximum advisable vessel length for operation 455 ft.

Construction of this pier is similar to Pier No. 4, concrete piling and platform, and, in fact, is really a continuation of Pier No. 4 South Side and for that reason if a vessel longer than 455 ft. is docked at this pier, it is in detriment to the operations of vessel docked at No. 4 South Side, which will have part of its length outside the pier.

Cargo handled by this pier: Bagged sugar, general cargo, gasoline, kerosene and diesel oil.

Tanker Information: Average discharging rate for gasoline, kerosene and diesel oil is about 300 t.p.h.

Diesel oil, kerosene, gasoline: Connections 1×8 in., 1×6 in. and 1×4 in. diameter.

(23) PORT AUXILIARY EQUIPMENT: Only auxiliary equipment of the port is the tugboat 'Macabi', which is also used to assist vessels at the nearby ports of Felton, Preston, Nicaro, Banes and occasionally Vita.

Tugboat 'Macabi' particulars are: Length 81 ft. 1 in. Breadth 24 ft. Gross tonnage 183.53, net tonnage 86.00. Engine: one 750 h.p. diesel motor, speed 8.5 knots.

(24) PLANS OR WORKS UNDER WAY FOR IMPROVEMENT OF PORT FACILITIES: It is planned to build at this port, among other improvements, a bulk raw sugar shipping plant.

(a) PRESTON (Guatemala):

(1) LOCATION: This port is located on the North coast of Cuba: Lat. 20° 46′ N., Long. 75° 40′ W.

Preston is one of the 3 ports located within Nipe Bay and is situated on the South coast of said bay, on a peninsula named "Punta Tabaco", S.E. of Antilla.

Traditionally this port has shipped the production of "Guatemala" sugar mill (formerly "Preston") which ranks among the biggest in the sugar industry.

Mayari River flows to the East and close to the port, and maintenance dredging is necessary alongside pier to preserve the depth required.

Dredging is effected at the West side of pier as the East side is not used.

(2) PILOT: *Where Pilot should be taken and distance to Place of Operations:* (Please see (2) under Antilla).

From the place where Pilots board the vessels to Preston pier the distance is 6.5 miles.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: (Please see (3) under Antilla up to Pt. Carenero, Saetia).

As is described under Antilla, up to Pt. Carenero (Saetia), the channel is common to the 3 ports located in Nipe Bay.

On reaching Pt. Carenero, vessels take a course Northwestward in the direction of the buoy marking "La Estrella" Shoal and then take a course W.S.W. up to Preston pier.

On the North side can be seen: Pt. Piedra, Melilla Cove and on the hills the town of Ramon. Pt. Las Chivas and the rest of coast of the bay up to Antilla port and town, which is clearly visible.

On the South side can be seen: The entrance to Cajimaya Cove and Felton town, Pt. Cobos, lighted buoy No. 5 marking "La Estrella" Shoal, the mouth of Mayari River and lastly the town and port of Preston.

There are no limitations as to vessel's length, and max. draft allowed is 25 ft., which is imposed by pier's depth.

Entrance to or sailing from Preston can be effected during day or night-time, generally without tugboat assistance, except when there is flood tide or wind interference, then tugboat assistance is required.

(4) ANCHORAGE: Preston anchorage is located about 1,200 m. from the pier. (Please see (4) under Antilla).

(5) TIDAL VARIATION: Tidal variation at this port averages from 2.25 ft. to 2.5 ft.

(6) BUNKERS: Bunkers cannot be supplied to vessels at Preston.

(7) WATER: *(Potable or for Boilers):* Delivered by pipe-line to ships while docked to Preston pier. Delivery rates: During sugar harvesting season, from 5 to 10 tons daily, only during night-time, otherwise from 40 to 50 tons daily, depending upon the pressure on the line.

Price: $1.00 per ton.

(8) PAPER/WOOD DUNNAGE: There are difficulties and limitations in supplying dunnage materials. (Please see (8) under Antilla).

(9) REPAIRS: No repairs can be performed at Preston.

(10) PORT AUTHORITIES: (Please see (10) under Antilla).

Under Cuban Customs Laws and Regulations, Preston is a sub-port of Antilla. Occasionally a doctor from Preston hospital attends the clearing of vessels in order to avoid delays, duly authorized by Antilla port doctor.

The rest of Authorities travel to Preston from Antilla to clear vessels, but at this time a plan is under study for Nicaro Authorities to clear vessels at Preston.

(11) WORKING HOURS:

Monday to Friday: 0700 – 1100 – 1300 – 1700
Saturdays: 0700 – 1100
Sundays: No work performed

(12) PORT OPERATIONAL CAPACITY: Only 1 vessel can be operated at a time.

(13) KIND OF CARGOES HANDLED BY THE PORT:

Exportation: Bagged raw sugar and molasses.
Importation: General cargo and occasionally fuel oil.
Coastal Trade: Discharge of fuel oil.

(14) TRANSPORTATION: Usually transportation between Preston and Antilla (and other nearby ports) is performed by launch and also by road.

From Preston there are the following distances and travelling time to:

	by launch	*by road*
Antilla	7 miles – 1 hour	1 hour 45 minutes
Nicaro	8 miles – 1 hour	1 hour 15 minutes
Felton	5 miles – 45 minutes	45 minutes

(15) COMMUNICATIONS: Vessels cannot communicate directly with Preston. Means of communications between Felton and Antilla (and other nearby ports) is only by telephone.

Telephone communications are rather irregular and sometimes are the cause of delays in urgent matters. (Please see (15) under Antilla).

(16) MAIL AND PARCELS: (Please see (16) under Antilla).

(17) AGENCY ADDRESS: (Please see (17) under Antilla).

The port of Preston is attended by Antilla Agency personnel.

(18) OPERATIONS AT BAY OR ANCHORAGE: No operations at bay or anchorage are performed at the port of Preston.

(19) MEDICAL ATTENTION TO CREW MEMBERS: Crew members requiring medical attention are treated at Preston hospital, where they can be hospitalised if necessary. Also dental services are available.

Cases requiring highly specialised medical treatment are sent to Lenin hospital at Holguin.

(20) BAGS LOADED PER SLING: 6 bags 100 kilos each of raw sugar.

(21) EQUIPMENT TO LOAD BULK RAW SUGAR EX-BAGS: Although raw sugar is shipped through this port, it lacks equipment.

(22) PLACE OF OPERATION: Preston pier is located at the Northern extremity of Punta Tabaco.

Its construction is entirely of hardwood, including its piling, and at the moment it is not in good condition and requires rebuilding.

Its length is 1,036 ft. of which 586 ft. corresponds to the berthing area, located at the end of it.

Along the pier run double standard railroad tracks but there is no outlet at pier's end.

Guatemala Pier: (Formerly Preston Pier) Overall length: 1,036 ft. – berthing length: 586 ft. Draft: 25 ft. even keel. No limitations as to vessel's length. Water available, but bunkers not available.

Tanker Information:

Fuel Oil: 2 connections – 1×8 in., 1×10 in. diameter.
Molasses: 2 connections – 1×8 in., 1×10 in. diameter.

(23) PORT AUXILIARY EQUIPMENT: This port has no auxiliary equipment.

(24) PLANS OR WORKS UNDER WAY FOR IMPROVEMENT OF PORT FACILITIES: None at the present time.

(b) FELTON:

(1) LOCATION:

This port is located on the North Coast of Cuba: Lat. 20° 44′ 45″ N., Long. 75° 35′ 40″ W.

Felton, as are Antilla and Preston, is located in Nipe Bay and is the closest port to the Bay entrance.

It is located 1.75 mile to the S.W. of Saetia, just in Cajimaya Cove and 3 miles East of Preston.

At the present time this port mainly handles the importations of raw materials for the fertiliser plant in the vicinity of the port.

(2) PILOT. *Where Pilot should be taken and distance to place of operations:* (Please see (2) under Antilla).

From the place where Pilots board the vessels to Felton pier there is a distance of 5 miles.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS:

(Please see (3) under Antilla up to Pt. Carenero, Saetia).

As described under Antilla, up to Pt. Carenero (Saetia), the channel is common to the three ports located in Nipe Bay.

On reaching Pt. Carenero, vessels turn course Southward seeking Felton Channel and after four changes in the pilotage route the port is seen.

The most remarkable points of visual orientation after Pt. Carenero is sailed past, are:

On the East side: Saetia Cay, Points Campeador No. 1, 2 and 3; lighted buoys Nos. 1-A and 3-A (green light) and the unlit buoys indicating the port channel.

On the West side: Pt. Cobos, Pt. Largo, the town of Felton and the unlit buoys marking the channel.

Entrance to the port up to Cajimaya Anchorage can be effected either in day or night-time, but docking or undocking is performed only during daylight hours, if it is not windy.

Limitations as to draft and length of vessels are those imposed by the place of operation or Cajimaya Anchorage. (Please see No. 22 for limitations and conditions).

(4) ANCHORAGE: Anchorage for this port is Cajimaya Anchorage, but Saetia Anchorage can also be used. (Please see (4) under Antilla).

(5) TIDAL VARIATION: Tidal variation at this port averages from 2.25 ft. to 2.5 ft.

(6) BUNKERS: No bunkers available at Felton.

(7) WATER: *(Potable or for Boilers):* Temporarily no water available at Felton.

(8) PAPER/WOOD DUNNAGE: There are difficulties and limitations in supplying dunnage materials. (Please see (8) under Antilla).

(9) REPAIRS: There is no possibility to perform repairs at this port.

(10) PORT AUTHORITIES: (Please see (10) under Antilla).

Under Cuban Customs laws and regulations, Felton is a sub-port of Antilla, but Authorities travel to the port of Felton in order to clear vessels.

(11) WORKING HOURS: For discharging fertiliser raw materials or fuel oil, 24 hours a day are worked, Saturdays and Sundays included. For general cargo, when occasionally discharged, from 0700 hrs. to 1500 hrs. Monday to Saturday.

(12) PORT OPERATIONAL CAPACITY: Berthing space of this port only permits operating 1 vessel at a time.

(13) KIND OF CARGOES HANDLED BY THE PORT: Importation: Fertilisers raw materials in bulk, occasionally general cargo. Coastal Trade: Discharge of fuel oil, occasionally general cargo.

Exportation: None.

(14) TRANSPORTATION: Usual means of transportation between Felton and Antilla, and other nearby ports, is by launch and also by road.

From Felton there are the following distances and travelling time to:

	By launch	By road
Antilla	11 miles – 1 hr. 30 mins.	2 hrs. 30 mins.
Nicaro	3 miles – 30 mins.	50 mins.
Preston	4 miles – 40 mins.	1 hr.

(Please see (14) under Antilla).

(15) COMMUNICATIONS: Vessels cannot communicate directly with this port.

Means of communication between Felton and Antilla (and other nearby ports) is only by telephone.

Telephone communications are rather irregular, and sometimes are the cause of delays in urgent matters.

(Please see (15) under Antilla).

Masters must send their ETA messages simultaneously to Mambisas Antilla and Mambisas Havana.

(16) MAIL AND PARCELS: (Please see (16) under Antilla).

(17) AGENCY ADDRESS: (Please see (17) under Antilla).

The port of Felton is attended by Antilla Agency personnel.

(18) OPERATIONS AT BAY OR ANCHORAGE: No operations performed at bay or anchorages.

(19) MEDICAL ATTENTION TO CREW MEMBERS: There is a small hospital at Felton where crew members requiring medical and dental care are attended.

Cases requiring surgical or specialised treatment, are sent either to Mayari Hospital or Lenin Hospital, at Holguin.

(20) BAGS LOADED PER SLING: No bagged sugar is shipped through this port.

(21) EQUIPMENT TO LOAD BULK RAW SUGAR EX-BAGS: As there are no sugar shipments through this port, such equipment is not needed.

(22) PLACE OF OPERATION: The place of operation of Felton is a solid coastal-pier built of concrete, although vessels are not docked directly at it.

Vessels are berthed to 3 solid steel dolphins, the first and the third being spaced 350 ft. apart.

Dolphins are located at about 50 ft. from the side of the pier and therefore vessels are 50 ft. off the pier.

Pier is located at the East side of that portion of land on Nipe Bay and runs from North to South.

Besides the three solid dolphins, vessels are secured also to two mooring buoys located 250 m. to the West, in front of and parallel at the pier.

There is an electric shore crane mounted on rails that runs along the pier, which is used mainly for the discharge of bulk raw materials for fertilisers, with a 4 ton grab. If the grab is removed the crane is capable of lifting up to 40 tons, and can be used for the discharging of heavy equipment, such as tractors, bulldozers, etc. This crane has a wide field of operation.

Also in operation at this port is a device called "Unicular", a kind of hopper-car, which runs on rails from the hatch of the vessel to the pier, and is loaded by ships gear to its full capacity of 3 tons.

Taking into consideration the characteristics of pier, the manoeuvring basin and the approach channel to place of operations, the following regulations must be followed:

Vessels up to 500 ft. length:

Can dock without tugboat assistance, during daylight hours, if the wind and sea do not interfere with the manoeuvres.

Same conditions for undocking.

Maximum draft allowed 28 ft.

Vessels longer than 500 ft. and up to a maximum of 557 ft. length:

(a) Assistance of tugboat, of 750 h.p. or more, is required.
(b) Vessels must dock with bow facing North.
(c) Docking must be effected during flood tide.
(d) Condition of sea and wind at the time of docking must be taken into consideration in order to avoid interference of wind and sea with the manoeuvres.
(e) Maximum draft allowed is 26 ft. or 27 ft., depending on the type of vessel, its manoeuvrability, etc.

Tanker Information: Fuel oil: 1×8 in. diameter.

(23) PORT AUXILIARY EQUIPMENT: None other than the mentioned shore crane.

(24) PLANS OR WORKS UNDER WAY FOR IMPROVEMENT OF PORT FACILITIES: None at the present time.

(c) NICARO (Levisa Bay):

(1) LOCATION: This port is located on the North Coast of Cuba: Lat. 20° 43′ N., Long. 75° 33′ W.

The port of Nicaro is situated inside Levisa Bay, on a small peninsula named "Lengua de Pajaro", located at the Southwestern part of the bay.

Levisa Bay is landlocked, sheltered and moderately ample. Its shores are rather irregular due to numerous points, creeks, coves and inlets. The centre of the bay is free of cays, but close to the coast and around it, there are several cays.

Ample zones of shoals almost entirely cover its extension, except the channels and the anchorage zones.

Nicaro region is very rich in mineral fields and the port is used principally to export the production of the mining enterprise located there.

At the West side and next to Levisa Bay, Nipe Bay is located, and to the East, having a common entrance, which is divided as a fork by Pt. Dos Bahias, is Cabonico Bay.

(2) PILOT: *Where Pilot should be taken and distance to Place of Operation.*

(Please see (2) under Antilla).

Distance from the place where Pilots board the vessels to Nicaro anchorage is 12 miles, to Nicaro pier 13 miles.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: The entrance channel for the port of Nicaro is difficult for vessels over 350 ft. length, due to its narrowness and because of having sharp turns, some of them forming angles of almost 90°. Also, its bottom and banks are rock and coral. Regarding draft it offers no obstacles as there are about 174 ft. and 47 ft. depths max./min. respectively.

To minimize all risks and perform a fairly safe crossing of the entrance channel, while entering to or sailing from this port, the following measures must be accomplished:

(i) Entrance or sailing to be effected only during daylight hours, at slack water.

(ii) Tugboat assistance is required for vessels exceeding 350 ft. in length.

(iii) Vessels length should not exceed 500 ft., being the extreme max. length allowed, if really necessary, 513 ft.

(iv) Simultaneous entrance or sailing of 2 or more vessels is not permitted.

Channel is navigable by only one course.

Max. draft allowed to vessels operating at Nicaro pier is 28 ft. forward and 29 ft. aft. (at low tide).

As vessels larger than 350 ft. length require tugboat and it is obtained from the nearby port of Antilla, it is necessary that vessels assigned to perform operations at Nicaro advise their ETA with sufficient time in advance to vessel's arrival.

The restrictions for vessels to sail or enter this port during night-time are due to the port conditions such as: lack of light buoys in the bay and the channel, as well as the inherent dangers in the channel due to its narrowness and its winding shape.

(4) ANCHORAGES: There are two anchorages at Nicaro:

Anchorage No. 1: Located at about 1,200 m. S.W. of Pt. Gorda and 1,500 m. N.N.E. of Raton Cay.

Limitations: Draft: 30 ft. – Vessel's length: 513 ft.

Swinging area: About 200 m.

Can accommodate 1 vessel only.

Soft mud bottom but anchors hold well.

It is open to the winds. Usually vessels anchor with 2 or 3 shackles of chain.

Anchorage No. 2: Located at about 1,000 m. N.E. of pier's head.

Limitations: Draft: 30 ft. Vessel's length: 513 ft.

Swinging area: About 200 m.

Can accommodate 1 vessel only.

Soft mud bottom but anchors hold well.

It is open to the winds, usually vessels anchor with 2 or 3 shackles of chain.

At both anchorages launch service is available at Master's request.

(5) TIDAL VARIATION: Tidal variation at this port averages from 2.25 ft. to 2.5 ft.

(6) BUNKERS: No bunkers available at Nicaro.

(7) WATER: *(Potable or for boilers):* It is supplied to vessels while docked to Nicaro pier (both sides).

Average delivery rate: 30 t.p.h. Price: $1.00 per ton.

Water is delivered usually by night in order not to disturb the Nickel Plant production, although, occasionally it is delivered during the daytime.

Vessels must furnish the hoses.

(8) PAPER/WOOD DUNNAGE: (Please see (8) under Antilla).

(9) REPAIRS: There is no repair shop at this port.

(10) PORT AUTHORITIES: Although Nicaro, under Cuban Customs Laws and Regulations is a sub-port of Antilla, all Authorities are located at Nicaro (delegations).

(11) WORKING HOURS:

Sugar:

Monday to Friday: 0700 – 1100 hrs. – 1300 – 1700 hrs.

Saturday: 0700 – 1100 hrs.

Nickel loading and other cargoes:

Monday to Friday: 0800 – 1130 hrs. – 1230 – 1700 hrs.

Saturday: Same periods.

On Sundays the port does not perform any work, except discharging of tanker vessels.

(12) PORT OPERATIONAL CAPACITY: Port can operate 2 vessels at a time: One dry cargo vessel loading or discharging and 1 tanker vessel.

At the present time the port does not have enough personnel to operate 2 dry cargo vessels at a time.

(13) KIND OF CARGOES HANDLED BY THE PORT: Importation: Anthracite coal, liquid ammonia, general cargo and occasionally diesel oil.

Exportation: Nickel oxide, nickel sinter and occasionally bagged raw sugar.

Coastal trade: Fuel oil, diesel oil and general cargo.

(14) TRANSPORTATION: Means of transportation from Nicaro to Antilla (and other nearby ports) is usually by launches but also can be effected by car.

Distance from Nicaro to Antilla by launch is 14 miles, taking about 2 hours and by road is 130 km., taking about 3 hours.

There is a connecting canal for small craft drawing 6 ft. or less (Angostura Canal) between Nipe Bay and Levisa Bay, which is used by launches navigating to Antilla, Preston and Felton, reducing travelling distance between Nicaro and Antilla by 10 miles.

Distance between Antilla and Nicaro for vessels drawing over 6 ft. and not able to cross Angostura Canal, is 24 miles.

(15) COMMUNICATIONS: Means of communications at Nicaro are:

Long distance telephone, RCA System Radiograms and telegraph.

Telephone communications are rather irregular and difficult, therefore any instruction or sudden change in previous instruction to vessels operating at Nicaro may not be delivered in time.

Vessels proceeding to Cuba can communicate with Antilla Agency through "CLA" Havana Radio Station which promptly relays the message to Antilla.

Vessels cannot communicate directly with the port of Nicaro.

Masters must send their ETA messages simultaneously to Mambisas Antilla and Mambisas Havana.

(16) MAIL AND PARCELS: (Please see (16) under Antilla).

(17) AGENCY ADDRESS: Nicaro is attended by Mambisas Antilla Agency personnel (Please see (17) under Antilla).

At this port of Nicaro our enterprise has a small office, located close to the pier, telephone number 62.

(18) OPERATIONS AT BAY OR ANCHORAGE: No operations at bay are performed at Nicaro.

(19) MEDICAL ATTENTION TO CREW MEMBERS: There is a hospital at Nicaro where crew members are treated. If X-rays are required by doctors the patient is sent to Mayari Hospital (45 minutes travel by road).

Those cases requiring specialised treatment are sent to Holguin (3 hours travel by road).

Dental care is available at the town of Levisa, located 6 km. distant from Nicaro.

(20) BAGS LOADED PER SLING: Six bags, 100 kilos each of raw sugar.

(21) EQUIPMENT TO LOAD BULK RAW SUGAR EX-BAGS: The port does not have this equipment.

(22) PLACE OF OPERATION: The place of operation of Nicaro is its pier, a large installation built of reinforced concrete, 690 ft. long, of which, counting from the head of pier, 450 ft. corresponds to the berthing area, and the remaining 240 ft. is the narrow part of pier connecting with the shore, not used for operations.

Along both sides of pier run railroad tracks of standard gauge, and also trucks can operate.

At the South side of pier, mounted on rails, there is a gantry crane. The boom of the crane is about 50 ft. long and although mounted on the South side, can also operate at the North side, which is not often done because it loses much in efficiency and speed.

The crane is electrically powered and its accessories are: A grab 1.5 tons and another 3 tons capacity, steel slings, special slings for loading nickel, etc.

All this equipment, excluding ship's tackle is the only one available for loading or discharging at this port.

Both sides of pier have muddy bottom.

Nicaro Pier.

Overall length: 690 ft. Berthing length: 450 ft.

Max. length allowed to vessels: 513 ft.

No bunkers available.

North Side:

Draft: 26 ft. 6 in. forward and 29 ft. aft.

Kind of cargoes handled by this side: Bagged raw sugar, general cargo, fuel oil, diesel oil and liquid ammonia.

Water available by pipe-line.

Tanker Information:

Liquid ammonia: 2×6 in. diameter.

Fuel oil: 2×8 in. diameter.

Diesel oil: 1×6 in. diameter.

South Side:

Draft: 28 ft. forward and 29 ft. aft.

Kind of cargoes handled by this side:

Anthracite coal, nickel oxide, nickel sinter, bagged raw sugar, general cargo.

Water available by pipe-line.

This side of pier was dredged in 1969.

(23) PORT AUXILIARY EQUIPMENT: None other than the gantry crane.

(24) PLAN OR WORKS UNDER WAY FOR IMPROVEMENT OF PORT FACILITIES: None at the present time.

BANES:

(1) LOCATION: Banes is located on the North coast of Cuba: Lat. 20° 53′ N., Long. 75° 40′ W.

Banes is a sheltered, landlocked port located next and to the West of Nipe Bay.

Traditionally this port used to ship raw sugar and molasses, that is, the production of "Nicaragua" sugar mill, formerly "Boston".

Due to limitations imposed by the characteristics of this port to the length of vessels, and the constant increase in size and tonnage of vessels operating currently in Cuba, gradually the port lost its use and importance, and nowadays is only used for coastal trade.

While approaching Banes, the points of visual orientation are:

Banes Bay Light, shown from a red iron skeleton structure, 30 ft. above sea level, situated about 400 yds. Southward of Pt. Fuerte. A small house located on the Southern side of the entrance to bay, and the port entrance itself, cliffs at both sides and forming a remarkable canyon.

(2) PILOT: *Where Pilot should be taken and distance to Place of Operations:* (Please see (2) under Antilla).

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: Entrance to port is effected through a narrow channel with some sharp turns, along which tidal currents which flow strongly, and due to that fact, is entered/sailed only during daylight at slack water.

Channel bottom is rocks and coral, averaging a depth of 60 ft.

Due to its characteristics, the assistance of a tugboat is necessary to enter to or sail from Banes and vessel's length is limited to 360 ft.; draft is limited to a maximum of 19 ft. forward and 23 ft. aft, which is the pier's maximum draft.

Banes port mouth lighthouse is located on the Western extremity of Caracolillo Beach, between Pt. Fuerte and Pt. Penasco.

At the extremity of Pt. Penasço there is a masonry house, visible up to 2 or 3 miles away.

(4) ANCHORAGE: *Macabi Anchorage:* Located S.S.W. of Nicaragua Pier.

Limitations: Max. draft 31 ft., max. length 360 ft. Swinging area: About 620 m.

Anchorage can accommodate 2 or 3 vessels.

Bottom is soft mud but anchors hold well and vessels anchor with 3 or 4 shackles of chain.

No operations performed at anchorage.

(5) TIDAL VARIATION: Tidal variation at this port averages 2 ft. 4 in.

(6) BUNKERS: No bunkers available at Banes.

(7) WATER: *(Potable or for boilers):* Can be supplied while vessels are docked at Nicaragua Pier, by 3 in. pipe-line.

Delivery rate 4 t.p.h. Price $1.00 per ton.

(8) PAPER/WOOD DUNNAGE: (Please see (8) under Antilla).

(9) REPAIRS: No repairs can be effected at this port.

(10) PORT AUTHORITIES: All Port Authorities are located at Antilla except Port Captaincy which is located at Banes.

Authorities travel from Antilla to clear vessels at Banes.

(11) WORKING HOURS: For discharge of fuel oil: 24 hours a day, 7 days a week.

If any dry cargo vessels are operating Monday to Friday: 0700 – 1100 hrs. – 1300 – 1700 hrs. Saturday: 0700 – 1100 hrs. Sunday: No work performed.

(12) PORT OPERATIONAL CAPACITY: Only 1 vessel can be operated.

(13) CARGO HANDLED BY THE PORT: At the present time only cargo handled is the discharge of fuel oil (coastal trade).

(14) TRANSPORTATION: Transportation between Nicaragua Pier and Antilla or Banes is by road. From the pier to Banes there is a distance of 15 km. and to Antilla 50 km. (Please see (14) under Antilla).

(15) COMMUNICATIONS: Only means of communications between Antilla and Banes are telephone and telegraph.

(Please see (15) under Antilla).

(16) MAIL AND PARCELS: (Please see (16) under Antilla).

(17) AGENCY ADDRESS: (Please see (17) under Antilla).

Banes is attended by Antilla Agency personnel.

(18) OPERATIONS AT BAY OR ANCHORAGE: No operations at bay or anchorage are performed.

(19) MEDICAL ATTENTION TO CREW MEMBERS: Crew members requiring medical attention are treated at Banes Hospital, where they can be hospitalised if necessary.

Dental care is also available.

(20) BAGS LOADED PER SLING: No bagged raw sugar is shipped at Banes.

(21) EQUIPMENT TO LOAD BULK RAW SUGAR EX-BAGS: As no sugar is shipped through this port there is no need for such equipment.

(22) PLACE OF OPERATION: Nicaragua Pier (formerly Banes Pier): Length 240 ft., max. length allowed to vessels 360 ft., draft 19 ft. forward and 23 ft. aft.

The pier is built entirely of wood and in need of repairs.

Only 1 vessel can be berthed. Water available by pipe-line. No bunkers available.

Tanker Information: Fuel oil: 1×8 in. diameter.

(23) PORT AUXILIARY EQUIPMENT: Port has no auxiliary equipment.

(24) PLAN OR WORKS UNDER WAY FOR IMPROVEMENT OF PORT FACILITIES: None at the present time.

BARACOA: (See Late Plans)

(1) LOCATION: This port is located on the North coast of the extreme Eastern portion of Cuba in Oriente Province:

Lat: 20° 21′ N., Long: 74° 30′ W.

Its bay is fan shaped and is almost in its entirety sand and mud bottom, 325 yds. in width at its entrance, and within opens out to 1,150 yds. in a N.W. and S.W. direction, and 800 yds. in breadth.

Its shores are bordered by sand banks.

"Buren", an isolated rock visible only at low tide, lies about 30 yds. North-Westward of Pt. Barlovento; the sea always breaks on it; it is steep-to and constitutes the only danger.

S.E. of the town is Miel Bay where excellent anchorage is available.

(2) PILOT: *Where Pilot should be taken and distance to place of operation:*

Pilots board the vessel 2 miles in front of the port. Distance from the point where Pilots board the vessels to the operation place (anchorage) is about 2 miles.

Pilot station is located at Baracoa City.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: Entrance channel is straight, without turns.

Vessels up to 400 ft. length and 28 ft. draft can enter through the channel, but only in daylight hours.

When approaching Baracoa, "Yunque de Baracoa", a mountain, can be seen 4 miles Westward of the entrance. It is a remarkably steep and flat-topped mountain rising to a height of 1,824 ft.

(4) ANCHORAGE: All operations at this port take place at anchorage (please see Item No. 22).

(5) TIDAL VARIATION: There is an average of 2 ft. to 3 ft. between high and low tides.

(6) BUNKERS: No bunkers available at this port.

(7) WATER: *(Potable or for boilers):* No water available at this port.

(8) PAPER/WOOD DUNNAGE: Vessels cannot be supplied with dunnage materials at this port.

(9) REPAIRS: There is no repair shop at this port.

(10) PORT AUTHORITIES: All Port Authorities are located at Baracoa.

(11) WORKING HOURS:

Monday to Friday: 0700 – 1100 hrs. – 1300 – 1700 hrs.
Saturday: 0700 – 1100 hrs.

(12) PORT OPERATIONAL CAPACITY: Only one vessel can be operated at a time.

(13) KIND OF CARGOES HANDLED BY THE PORT: During the last few years the only cargo handled by this port is coastal trade.

(14) TRANSPORTATION: Transportation to and from Baracoa is difficult.

There is daily air service and also bus service to Moa and other towns in the province, but best advisable means of travel is by car.

(15) COMMUNICATIONS: There are the following means of communication: telephone, telegraph, radiogram, air mail and regular mail.

Vessels navigating to Baracoa can communicate with the port Agency through "CLA" Havana Radio Station which relays the messages promptly to Baracoa.

Masters must send their ETA messages simultaneously to Simon Baracoa and Mambisas Havana.

(16) MAIL AND PARCELS: Must be sent directly to Baracoa Agency by air mail or air express.

(17) AGENCY ADDRESS: At Baracoa, Empresa Nacional de Cabotaje, (Cuban Coastal Trade Enterprise) acts as sub-Agents of Consignataria Mambisa, and their complete address is:

Empresa Nacional de Cabotaje,
Calle Iro. de Abril No. 14
Apartado No. 27
Baracoa, Prov. de Oriente
Telephone: 56
Cable: "Simon Baracoa".

(18) OPERATIONS AT BAY OR ANCHORAGE: All operations are performed in bay.

(19) MEDICAL ATTENTION TO CREW MEMBERS: Crew members requiring medical or dental care are treated at Baracoa General Hospital where, if necessary, they can be hospitalised.

(20) BAGS LOADED PER SLING: No sugar is shipped through this port.

(21) EQUIPMENT TO LOAD BULK RAW SUGAR EX-BAGS: No such equipment is required because this port does not ship sugar.

(22) PLACE OF OPERATION: As there is no pier at this port, vessels load and discharge their cargo at anchor in the bay by means of barges.

(23) PORT AUXILIARY EQUIPMENT: This port has several barges with a capacity of 100 tons each and a tugboat.

(24) PLAN OR WORKS UNDER WAY FOR IMPROVEMENT OF PORT FACILITIES: None at the present time.

CAIBARIEN:

(1) LOCATION: This port is located on the North coast of Cuba: Lat. 22° 32′ N., Long. 79° 28′ W.

Port operations are effected at Frances Cay Anchorage, 16 miles from the City of Caibarien.

In rough weather, operations are generally suspended, because it is not possible for the lighters to remain alongside ship.

In spite of the fact that all cargo operations are effected by lighterage, this port is most efficient and very often surpasses the cargo rates of other ports.

(2) PILOT. *Where Pilot should be taken and distance to Place of Operation:* Pilots board vessels 0.5 miles from Catalina buoy at the entrance of Frances Cay Anchorage.

Pilot station is located at Frances Cay in a place known as Punta del Asta.

Pilots usual means of communication is radio-telephony, which service is available at the Port Captain's Office in Frances Cay, which is close to the pilot station.

Also, advice is given by motor-launch.

Distance from the point where Pilots board the vessels to:
Inner Anchorage (La Caldera): 2 miles.
Outer Anchorage (La Poza): 0.5 miles.
Outer Anchorage (Port Buoy): The place where Pilots board the vessels.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: Port is entered directly from open sea and there is no entrance channel, vessels must proceed to the first buoy of the Outer Anchorage (Catalina Buoy) and at that point pick up Pilot.

Vessels can enter or sail from Frances Cay Anchorage with any length and with a max. draft of 35 ft.

When vessels draw less than 20 ft., they proceed to the Inner Anchorage (La Caldera); when over 20 ft. and up to 26 ft., to the Outer Anchorage (La Poza) and those drawing over 26 ft. proceed to the Third Anchorage (Port buoy).

The following Regulations must be observed during vessel's stay at Caibarien roads:

Vessels arriving with a draft of 19 ft. 06 in. or less:

(a) All ships arriving with a draft of 19 ft. 06 in. or less must proceed to the inner anchorage for loading or unloading, being compulsory to remain in this anchorage until reaching a draft of 20 ft. even keel.

(b) If Master refuses to proceed to this inner anchorage with a draft of 19 ft. 06 in. or less he incurs a penalty of extra charge of about 7 cents on each bag of sugar to be delivered in this port, payable to the crew of the sugar barges employed in the transportation of cargo from the shore warehouse to the anchorage of Frances Cay.

Shifting or changes of anchorages:

(a) Vessels must remain at the same place where the official Pilot of the port ordered them to be anchored.

(b) It is not allowed, by the port authorities, to shift or change anchorage of the vessel from the place indicated by official Pilot of the port, without authorization from the Customs House Officer in charge onboard the vessel. Also all shifting and changes of anchorages will have to be done only under the supervision and command of local Pilot.

(c) The Master of the vessel will notify the Customs House Officer onboard, when shifting or change of anchorage place is required, then the Customs House Officer will notify the Pilot accordingly in the proper time, being the Official Pilots the only ones authorised to perform the shifting or changes of anchorages places.

Please also note that in case the aforementioned orders are not followed or observed by the ship's Master and/or the ship's officers, a penalty or fine of a minimum of $500.00 (five hundred dollars) will be charged to the vessel, which fine will have to be paid by the Master prior to departure from this port. Besides the penalty, no cargo will be delivered to the ship if she is anchored in any other place of this road not indicated by the local Pilot.

Careful attention should be paid to these important notices in order to avoid unnecessary expenses, responsibilities and loss of time during stay loading vessel in this port.

Vessels can enter/sail during day and night-time.

Frances Cay light, group occulting white, visible 8 miles away, stands on a iron skeleton structure 36 ft. high, on the Western end of the Cay.

(4) ANCHORAGES: (See description under 22(a), 22(b) and 22(c).

(5) TIDAL VARIATION: Tidal variation at this port averages 2 ft.

(6) BUNKERS: No bunkers available at this port.

(7) WATER *(Potable or for Boilers)*: No water available at this port.

(8) PAPER/WOOD DUNNAGE: Wood dunnage not available at this port. Paper dunnage can be obtained if requested well in advance.

(9) REPAIRS: There is a repair shop at Caibarien, but due to the distance from Caibarien to Frances Cay where vessels anchor, it is very difficult and highly expensive to perform repairs and only minor ones can be performed.

(10) PORT AUTHORITIES: All Port Authorities are located at Caibarien and they travel by launch or motor boat to clear the vessels at Frances Cay Anchorage.

(11) WORKING HOURS:

Monday to Friday: 0700 – 1100 hrs. – 1300 – 1700 hrs.
Saturdays: 0700 – 1100 hrs.
Sundays: No work is performed unless absolutely necessary.

(12) PORT OPERATIONAL CAPACITY: Two vessels can be operated simultaneously.

(13) KIND OF CARGOES HANDLED BY THE PORT:

Exportation: Bagged raw sugar and molasses.
Importation: Occasionally general cargo but mostly bagged cargoes.
Coastal Trade: Occasionally general cargo.

Although bagged raw sugar is reported as an exportation product of the port, for the last 2 years no sugar has been exported through Caibarien.

(14) TRANSPORTATION: Transportation means to and from Caibarien are poor, although railroad and bus services are available.

Best means of transportation is by train or bus to Santa Clara and from there transportation is available to any place or city.

(15) COMMUNICATIONS: Means of communications between Caibarien and Frances Cay is radiotelephony.

Several tugboats operating at this port are also equipped with radiotelephony; likewise stevedores enterprise, Port Captaincy and the molasses reservoir (Ponton San Pascual).

The official radiotelephony hours of communication are: 0800 – 0900, 1100 – 1400 and 1600 hrs., but after these hours, other communications can be established, when needed, upon request.

At Caibarien there are the following means of communication: National wireless telegraphy, telegrams, long distance telephone and Post Office.

Mambisas Caibarien Agency is connected with the National Telex System and this is the best means of communication with this port.

Vessels navigating to Cuba can send their messages to Caibarien through "CLA" Havana Radio Station which relays the messages promptly to Caibarien.

Masters must send their ETA messages simultaneously to Mambisas Caibarien and Mambisas Havana.

Pilot VHF works on Channel 16.

(16) MAIL AND PARCELS: As Caibarien has no air mail or air express service, all mail and parcels should be sent to our Havana main offices from where it will be relayed by the quickest means to Caibarien.

(17) AGENCY ADDRESS:

Empresa Consignataria Mambisa
Agency Caibarien
Calle 4 No. 305 (second floor)
Apartado No. 72
Caibarien, Prov. de Las Vilas
Telephone: 3-1805 (office) 3-3215 (night)
Telex: 041186
Cable: Mambisas Caibarien

(18) OPERATIONS AT BAY OR ANCHORAGE: All operations at this port are effected at anchorage.

(19) MEDICAL ATTENTION TO CREW MEMBERS: Crew members requiring medical or dental care are treated at Caibarien Hospital, where they can be hospitalised if required.

(20) BAGS LOADED PER SLING: Five bags, 100 kilos each of raw sugar.

(21) EQUIPMENT FOR LOADING BULK RAW SUGAR EX-BAGS: The port lacks this equipment and if bulk raw sugar is shipped, there are 6 grates, but trimming is done by shovelers.

(22) PLACES OF OPERATION:

(a) Inner Anchorage: (La Caldera) where vessels load up to 20 ft. draft.

(b) Outer Anchorage: (La Poza) where vessels load up to 26 ft. draft.

(c) Outer Anchorage: (Port Buoy) where vessels can load up to 35 ft. draft.

Bottoms of "Caldera" and "Poza" Anchorages are mud and sand. "Port Buoy" Anchorage bottom is stone, but free of reefs.

Tanker Information: Only blackstrap molasses are exported by this port.

When vessels arrive drawing less than 20 ft. or in ballast, they dock at Pontoon or Hulk "San Pascual", which is located in 20 ft. of water, proceeding then to complete at another port or are shifted from this place to "La Poza" or " Port Buoy" Anchorages where they complete the cargo, which is delivered by barges.

(23) PORT AUXILIARY EQUIPMENT: This port has several barges and 3 tugboats used for towing the barges.

(24) PLAN OR WORKS UNDER WAY FOR IMPROVEMENT OF PORT FACILITIES: None at the present time.

CARDENAS: (See Late Plans)

(1) LOCATION: This port is located on the North coast of Cuba: Lat. 23° 03′ N., Long. 81° 12′ W.

Cardenas is the Northernmost port of Cuba being in a large bay 9 miles wide N.W. to S.W. and from 6 to 10 miles long from West to East.

It is a shallow bay with muddy bottom.

(2) PILOT: *Where Pilot should be taken and distance to Place of Operation.*

Pilots board vessels at the first buoy marking the port entrance channel, that is, between Mono Cay and Piedras Cay. Distance from this place to Cardenas pier is 16 miles and 6 miles to Diana Cay Anchorage.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: Entrance to port is effected between Mono Cay and Piedras Cay.

The channel head is located at a point almost equidistant to Blanco Cay and the end of Hicacos peninsula, but closer to the latter.

It is an artificial channel but it has no narrowness and no turns.

Its bottom is rock, sandy at the head and for the first mile, and muddy all the rest of its course.

In front of the pier the channel opens in the shape of a funnel forming around it the inner harbour or basin.

Considering that from the place where Pilots board the vessels up to the pier or vice-versa takes about 4 hours, including manoeuvres, vessels must commence manoeuvres to enter or sail from this port at least 3 hours before dusk. Vessels are allowed a maximum length of 560 ft., max. draft of 20 ft. 6 in. at any tide, and 22 ft. at high tide.

In case of large vessels, it is necessary to wait for slack water for crossing the channel stretch known as Buba Channel, about 2 miles long, between Buba and Diana Cays.

Approaching Cardenas, the most conspicuous points of visual orientation are:

Piedras Cay lighthouse which stands 78 ft. above high tide, a stone cylindrical construction on a white building, its white light visible up to a distance of 14 miles.

Southwestward of Piedras Cay the long ribbon of white sands of Varadero Beach can be seen, and in the background the hotels and buildings.

To the S.E. Diana Cay lighthouse, a 38 ft. high metal tower and the string of cays such as: Chalupa, Romero, Blanco, etc.

(4) ANCHORAGES:

Bay Anchorage No. 1: Located 1.25 miles Northward of pier, about a mile in extension and a draft of 15 ft.

Bay Anchorage No. 2: Located 2 miles Northward of pier, about a mile in extension and a draft of 15 ft.

Poza Diana Cay Anchorage: Located about 7 miles from pier, about 1.25 miles in extension, draft 30 ft.

Los Meritos Anchorage: Located about 12 miles from pier, about 1 mile in extension, draft 23 ft.

Piedras Cay Anchorage: Located 16 miles from pier in the open sea, unlimited swinging area, draft 40 ft.

(5) TIDAL VARIATION: Tidal variation at this port averages 2 ft.

(6) BUNKERS: No bunkers available at this port.

(7) WATER: *(Potable or for boilers):* Pier has 7 water intakes connected to a water reservoir which is supplied by tank-trucks and/or railroad tank-cars.

Price: $3.00 per ton. Delivery rate: 20 t.p.h.

Daily delivery rate dependent upon transportation available.

(8) PAPER/WOOD DUNNAGE: No wood dunnage available at this port.

Paper available if requested well in advance.

(9) REPAIRS: There is no repair shop at this port.

(10) PORT AUTHORITIES: All Port Authorities are located at Cardenas.

(11) WORKING HOURS: Monday to Friday: 0700 – 1100 hrs. – 1300 – 1700 hrs. Saturdays: 0700 – 1100 hrs. Sundays: No work performed.

On occasions when daily task has not been accomplished, an extra shift is worked from 1900 to 2300 hrs.

(12) PORT OPERATIONAL CAPACITY: The dock has space to dock 4 vessels (2 at each side) and a small size vessel at the head of pier, but personnel available at present time is enough for working only 1 dry cargo vessel and a tanker vessel discharging fuel oil.

(13) KIND OF CARGOES HANDLED BY THE PORT:

Importation: General cargo, bagged fertilizers, flour, lumber, wood pulp, etc.

Exportation: Bagged refined sugar.

Coastal trade: Discharge of fuel oil.

(14) TRANSPORTATION: Transportation to and from Cardenas is good.

To Havana there are scheduled bus departures about every 2 hours, to Varadero every 30 minutes, and also several departures to Sagua la Grande, Isabela and other nearby cities.

(15) COMMUNICATIONS: There are the following means of communication:

RCA radiograms system, telegraph service, telephone and telex.

Vessels navigating to Cuba can communicate with Mambisas Cardenas through "CLA" Havana Radio Station which immediately relays the messages to Cardenas.

While navigating in Cuban waters approaching Cardenas, vessels can communicate by radiotelephone with "CLW" Cardenas Radio Station at 2760 kc/s.

Masters must send their ETA messages simultaneously to Mambisas Cardenas and Mambisas Havana.

(16) MAIL AND PARCELS: All urgent mail and parcels should be sent to our main offices at Havana from where it will be relayed to Cardenas by the quickest means possible to ensure prompt delivery.

Ordinary and non-urgent mail or parcels can be sent directly to Mambisa's Cardenas Office.

(17) AGENCY ADDRESS:

Consignataria Mambisa,
Agencia Cardenas,
Calle 2 entre Cespedes y Ave. 2da.,
Apartado No. 2847,
Cardenas, Prov. de Matanzas.
Telephone: 306 (office); 4840 (night).
Telex: 052168.
Cables: Mambisas Cardenas.

(18) OPERATIONS AT BAY OR ANCHORAGE: No operations at bay or anchorage performed at this port.

(19) MEDICAL ATTENTION TO CREW MEMBERS: Crew members requiring medical attention or dental care are treated at Cardenas Civil Hospital, where patients can be hospitalised if necessary.

There is a first aid station and an ambulance at the pier.

(20) BAGS LOADED PER SLING: 12 bags of refined sugar of 50 kilos each.

(21) EQUIPMENT TO LOAD RAW BULK SUGAR EX-BAGS: Raw sugar is not shipped through this port and such equipment therefore is not necessary.

(22) PLACE OF OPERATION: The only place of operation at Cardenas is its pier.

It is of solid reinforced concrete construction having double standard railroad tracks along the length of pier, on each side. It is also well paved and trucking operations can be performed alone or in combination with railroad operation.

Railroad cars do not interfere with cargo operations, as once emptied they can be carried out by shifting them to the second track or by going around the pier by the opposite side.

Tankers discharging fuel can be operated at either side or at the pier head.

There are 3 fresh water intakes on each side and 1 at the head of the pier.

Pier is capable of operating 5 vessels at a time, that is: 4 regular size vessels, 2 at each side, and a tanker at the head.

Both sides of pier are of equal length and have same facilities, being at the N.W. and the S.W. sides.

Cardenas Pier:

Length 319 m. (1,014 ft.), width 80 m. (262 ft.), draft alongside 24 ft. Max. draft allowed for vessels' operations 20 ft. 6 in. at any tide, 22 ft. at high tide.

Cargo handled at this pier has been detailed in No. 13.

Water available by pipe-line.

No bunkers available.

Tanker Information:

Discharge of fuel oil: There are 4 intakes at the pier:

Two at North side, 1 at the head and 1 at South side.

Pipe-lines 8 in. and all connections 6 in. in diameter.

(23) PORT AUXILIARY EQUIPMENT: Port has the following auxiliary equipment: 1 shore crane, 3 fork lift trucks, 4 conventional tractors, 3 rail tractors.

(24) PLAN OR WORKS UNDER WAY FOR IMPROVEMENT OF PORT FACILITIES: Dredging of the port has been recently completed and there is a plan to increase port personnel.

CIENFUEGOS (Including Casilda and Tunas de Zaza):
(See Late Plans)

(1) LOCATION: This port is located on the South Coast of Cuba: Lat. 22° 09′ N., Long. 80° 27′ W.

Cienfuegos Bay, by its natural characteristics, offers ample protection for vessels within port premises. It is about 10 miles long, from North to South and 3 miles wide, from East to West, surrounded by high ground and mountains.

The Coastal outline is rugged inside the bay, due to numerous points and creeks and at the widest part of the bay, to the N.W., is the city of Cienfuegos and some of the port's installations, and further, to the North of the city, the remainder and most modern of the port installations.

(2) PILOT. *Where Pilot should be taken and distance to Place of Operation:* The Pilot boards the vessel at 0.5 miles S.W. of Los Colorados lighthouse at the following geographical position:

Lat. 22° 01′ 33″ N., Long. 80° 26′ 53″ W.

From this place to the different places of operation of the port there is a distance of 7 to 8 miles.

Pilot station is located at Jagua Castle, on the West coast of the bay, just in front of and to the West of Pasa Caballos Point.

Pilot service is available 24 hours daily and they have a 24 hours watch, and advice of arriving or sailing ships is announced by a semaphore station.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: Entrance to port is performed by a channel which begins between the points of Los Colorados and Sabanilla and runs for 3 miles up to La Milpa Point. From La Milpa the channel continues toward the interior of the bay firstly by the South and afterwards by the West of Carenas Cay up to the General Anchorage.

From the General Anchorage vessels can proceed either to the piers at the South of the port or to the North anchorage and the installations of the North Zone.

The bottom of the channel is muddy and its various depths are as follows:

From the head of the channel up to Las Milpas max. depth is 214 ft. at lighted buoy No. 3 and minimum of 68 ft. at the West of Pasa Caballos Point.

From La Milpa up to General Anchorage minimum is 48 ft. and from then on up to the North Anchorage minimum of 40 ft.

The channel has 2 sharp turns only, but adequate precautions must be taken when entering Cienfuegos harbour, always with Pilot on board, which is compulsory at all ports. The first turn of 68° is at Pasa Caballos Point and because this is the narrowest part of the channel where Tidal currents flow strongly, it is here where precautions should be exerted.

The second turn of 98° is at West of Carenas Cay, but due to the width of the channel at this point and the fact that tidal currents have no great effect, manoeuvres are easier at this turn.

Max. length for entering or sailing from this port is 700 ft. and max. draft 37 ft.

No tugboat required for entering or sailing from this port and vessels with a length of 207 m. have entered without tugboat assistance but for vessels from 207 m. up to a max. of 225 m. entering or sailing from Cienfuegos should take the following measures:

Only during daylight hours, during slack water and the assistance of 2 suitable tugboats. Vessels of 4,000 g.r.t. or larger can sail from the port only at slack water to avoid the risks of tidal currents at Pasa Caballos turn, but this measure does not apply to incoming vessels which can enter at any time.

The port of Cienfuegos can be entered at day or night time.

At the entrance to the port, at Los Colorados Point, there is a lighthouse also named Los Colorados which rises 83.1 ft. above high tide, located at Lat. 22° 02′ 04″ N., Long. 80° 26′ 29″ W.

The lighthouse is painted in a white-yellowish shade and flashes white light every 5 seconds visible 21.8 miles away.

(4) ANCHORAGES: The bay of Cienfuegos has ample anchorage zones.

The most important are: General anchorage at about the middle of the bay and North anchorage, at the North part of the bay.

Regarding the capacity and conditions of Cienfuegos anchorages it can be said that they meet the requirements of the largest vessel which presently or in future could enter this port.

As the anchorages of this port are used also for the discharge or loading of general cargo, please see complete information under Item No. 22.

(5) TIDAL VARIATION: Tidal variation at this port average 1ft. 6 in.

(6) BUNKERS: Regular bunkers can be obtained at this port (whatever type of diesel oil or fuel oil may be stored in the shore tanks at the time of delivery).

Fuel oil is supplied to vessels by means of barge, capacity 240 tons which is towed to the place where ship is operating or berthed.

Diesel oil is supplied by docking at pier, by pipe-line.

If any tanker vessel is operating at "Pablo E. Guzman" pier, delivery must wait until tanker finishes operations and leaves pier.

Mixtures of fuel and diesel oil, IFO, (Intermediate fuel oil), cannot be obtained at this port.

(7) WATER *(Potable or for Boilers):* Delivered by means of barge, capacity 200 tons, which at the present time is in bad condition, having frequent breakdowns and is often out of operation. It is going to be replaced, but until such time water delivery by barge must be considered as only a possibility, not to be depended upon, so it is unreliable.

Water can be obtained at either side of Tricontinental Pier at an average rate of 10 t.p.h.

Water, delivered by barge or taken alongside "Tricontinental Pier" is priced at $1.50 per ton.

(8) PAPER/WOOD DUNNAGE: This port has conditions and facilities to supply dunnage materials, but specially in the case of wood dunnage, requisition must be placed at least 5 days before delivery date.

(9) REPAIRS: Minor repairs can be effected but requisition must be placed in advance in order that the appropriate technician can determine if repairs can be made, informing the cost of repair to vessel's administration.

(10) PORT AUTHORITIES: All port Authorities are located within the limits of the city and port of Cienfuegos.

(11) WORKING HOURS:

Mondays to Fridays: 0700 – 1100 hrs. – 1300 – 1700 hrs.
Saturdays: 0700 – 1100 hrs

Although the above are the official working hours of the port of Cienfuegos, frequently 3 shifts of 8 hours each are worked, commencing at 0640 hrs. Also on Sundays a shift is worked from 0640 to 1100 hrs. This is done whenever all conditions, including personnel and weather, are favourable.

(12) PORT OPERATIONAL CAPACITY: The port can operate 9 ships simultaneously as follows:

1 Loading bulk raw sugar.
2 Loading or discharging general cargo (docked).
1 Loading or discharging general cargo (on anchorage).
1 Loading molasses.
4 Tanker vessels discharging petrolum products.

(13) KIND OF CARGOES HANDLED BY THE PORT: Through this port all kinds of cargoes are imported with the exception of bulk wheat and bulk fertilizers.

Exports: Bulk raw sugar, molasses and occasionally general cargo.

Coastal trade consists mainly of discharge of petroleum products, and other kinds of coastal trade cargoes are seldom handled by this port.

(14) TRANSPORTATION: Cienfuegos has an excellent transportation system:

There is a daily flight Havana – Cienfuegos which arrives at Cienfuegos around 1130 hrs. and departs for Havana at about 1200 hrs.

Also a daily departure of passenger railroad service Cienfuegos – Havana.

Bus line Cienfuegos – Havana has scheduled departures every 2 hours.

Other bus lines have excellent service to Camaguey, Santa Clara and other cities.

Taxi service is available to any point within city limits or to any place or city and should be requested to our Cienfuegos Agency.

(15) COMMUNICATIONS: There is complete telephone service: Local, long distance and International.

RCA System radiograms have national and international service.

There are also the Wireless Service, Government Public Telegraph Service and Post Office.

Our Agency can communicate with Havana and the rest of the parts by telex, this service being the most reliable and quickest of the means of communication.

Cienfuegos telex number is 04218.

Vessels navigating toward Cuba can communicate with Mambisas Cienfuegos Agency through "CLA" Havana radio station which relays the message to Cienfuegos immediately.

When navigating in Cuban waters and nearing Cienfuegos, vessels can communicate directly through "CLC" Cienfuegos radio station which immediately informs Mambisas Cienfuegos Agency of any message received and the Agency can answer through "CLC", which also have radiotelephony system.

Masters must send their ETA messages simultaneously on VHF Channel 16 to Mambisas Cienfuegos and Mambisas Havana.

(16) MAIL AND PARCELS: Mail should be sent by airmail, parcels and spare parts by air express.

Any mail or parcels received at Havana by our Main Office, destination Cienfuegos, are sent daily by air express to Cienfuegos Agency, which use the same method from Cienfuegos to Havana.

(17) AGENCY ADDRESS:

Empresa Consignataria Mambisa
Agencia Cienfuegos
Ave. 50 No. 2712
P.O. Box 420
Cienfuegos, Prov. de Las Villas, Cuba
Telephones: 5718 and 6422 Night: 6715 and 5332
Telex: 04218 – Cables: Mambisas Cienfuegos

Cienfuegos Agency also attends the ports of Casilda and Tunas de Zaza.

(18) OPERATIONS AT BAY OR ANCHORAGE: When piers are occupied, loading or discharging operations can be performed at anchorage, for which there are several barges, tugboats and 1 floating crane of 35 tons lifting capacity.

(19) MEDICAL ATTENTION TO CREW MEMBERS: Crew members requiring medical attention are treated, and hospitalised if necessary, at Cienfuegos General Hospital.

Dental care is rendered at 2 Dental clinics.

(20) BAGS LOADED PER SLING: No bagged sugar is shipped through this port.

(21) EQUIPMENT TO LOAD BULK RAW SUGAR EX-BAGS: All bulk raw sugar is shipped by the Bulk Raw Sugar Shipping Plant by means of modern mechanical equipment and bulk raw sugar ex-bags is not shipped through this port.

(22) PLACES OF OPERATIONS:

		Draft in ft.	
		Fore	*Aft*
(a)	Tricontinental Pier: East Side (Bulk Sugar)	32	33
	West Side (General Cargo)	26	28
(b)	Pablo E. Guzman Pier: West Side (Discharge of clean petroleum products)	27	30
	East Side: Out of use		
(c)	Molasses Terminal: Loading of molasses	33	33
(d)	ICP Submarine Pipe-line: Discharge of Fuel Oil	58	58
(e)	Olimpia Medina Pier: General Cargo	24.5	25.5

(f) Fertilisers Plant Submarine Pipe-lines: Discharge of Naphtha & Fuel Oil	31	31
(g) Thermoelectric Plant Submarine Pipe-line: Discharge of Fuel Oil	38	38
(h) North Anchorage: Discharge/Loading of General Cargo	40	40
(i) General Anchorage: Discharge/Loading of General Cargo	48	48
(j) Quarantine and Explosives Anchorage:	50	50

(a) Tricontinental Pier: Located on the North coast of the bay, at the West of Manaca Cove, in front of the city of Cienfuegos.

It is a solid construction of reinforced concrete, 206 m. (676 ft.) long and 43 m. (141 ft.) wide. The East side of the pier is specially conditioned for loading bulk raw sugar and has 2 cranes, mounted on rails, that run along the length of pier, each capable of loading 600 metric t.p.h.

Although the length of the pier is 206 m., at the East side the berthing length is only 165 m., because at the shore end there are 2 resting bases for the cranes, where they remain when idle.

In direct line with the pier is the parabolical warehouse, which is capable of holding 90,000 metric tons of bulk raw sugar. Next to it is the receiving station of the plant, where a continuous flow of railroad hopper cars discharge the sugar coming from many sugar mills in Las Villas and Matanzas provinces.

The West side of the pier is being used as a general cargo discharging berth, but the future planning for this side is for discharge of bulk wheat, to supply the flour mill, now under construction.

Tricontinental Pier

East Side:

Berthing length: 542 ft., overall length: 666 ft.

Max. length of vessel to dock and operate: 615 ft.

Drafts: 32 ft. fore, 33 ft. aft.

Cargo handled this side: Loading of bulk raw sugar.

Fresh water available by pipe-line.

West Side:

Overall and berthing length: 666 ft.

Draft: 26 ft. fore, 28 ft. aft.

Cargo handled this side: Discharge and loading of general cargo.

Fresh water available by pipe-line.

Docking to this pier can be effected either in day or night-time because it is well lit.

All operations, except loading bulk raw sugar, must be effected by means of trucks because although railroad tracks reach the shore end of pier, there are no tracks alongside.

Vessels nominated to load bulk raw sugar at Cienfuegos, must arrive at Tricontinental pier clean and ready to load and any undesirable dunnage material must be discharged at other ports or piers, due to the fact that it has only sufficient personnel to attend the mechanical loading and there are no stevedores available.

(b) Pablo E. Guzman Pier *(Formerly Ferrocarril Pier):* Located on the N.W. side of the city, between Pt. Arenas and Pt. Verde.

It is only used to discharge clean petroleum products and for supplying diesel oil bunker to vessels.

It is of steel and concrete construction with rubber and wood fenders.

Fixed light at pier permits night docking.

The bottom at both sides of pier is soft mud.

West Side:

Length: 300 ft.

Vessel's max. length for docking: 610 ft.

Width: 73 ft. Connection diameter: 8 in.

Draft: 27 ft. fore, 30 ft. aft.

Cargo handled by this side: Discharge of diesel oil, kerosene and gasoline*.

Discharging rate: About 400 t.p.h.

East Side: Out of use

*Although three different products are discharged, only one can be discharged at a time, as there is only one pipe-line to shore tanks.

(c) Molasses Terminal Berth (Formerly Naticorp Pier): Located on the West coast of Pt. Majagua, this installation consists of a wooden narrow passage 1,804 ft. long ending at a steel platform along which runs the pipe-lines, one 16 in. and other 12 in., and a catwalk.

Loading of molasses is performed through three connections, diameter 8 in. each, but in the near future they are going to be replaced by 10 in. diameter connections.

Docking can be effected only during daylight hours.

Vessels berth to 4 solid dolphins, 2 mooring buoys aft, and 2 fore, across the head of the installation.

Draft: 33 ft. even keel (not official)(†).

Max. length: 610 ft., Loading rate: 350 t.p.h.

(†)This place has been dredged recently (Former draft 30 ft. – 30 ft. 6 in.) but new official draft has not been released at the moment of publication, and mentioned draft is only the result shown by previous experience.

No water or bunker available by pipe-line.

(d) ICP Submarine Pipe-line Anchorage *(Formerly Standard Anchorage):* Located on the West side of Pt. Majagua.

The submarine pipe-line is 2,900 ft. long from the intake up to the deposit tanks, 12 in. in diameter. The connection is 8 in. in diameter.

Vessels berth to 3 mooring buoys aft, using both anchors.

Minimum depth at this place is 58 ft.

The only product handled is fuel oil, which averages a rate of discharge of 420 metric t.p.h.

No water or bunker available by pipe-line.

Berthing operation performed only during daylight hours.

(e) Olimpia Medina Pier *(Formerly Cacicedo Pier):* Located on the South side of the city at Marsillan Cove.

Only one vessel can be worked, being of concrete construction with wooden/rubber fenders. The fenders are going to be replaced as at the present they are not suitable.

It has a fixed bearing light in order to dock vessels at night.

Cargoes can be handled either by trucks or railroad as the place is paved and has railroad tracks alongside.

Length: 383 ft. Width: 45 ft.

Draft: 24 ft. 6 in. fore, 25 ft. 6 in. aft.

The bottom alongside pier is soft mud.

Operations performed at this pier are usually loading or discharge of general cargo.

(f) Fertilizers Plant Submarine Pipe-line Anchorage: Located at the South of Ramirez Cove.

A fuel oil pipe-line 2,310 m. long 16 in. in diameter with a 10 in. connection.

The naphtha pipe-line is 10 in. in diameter with a 10 in. connection.

Vessels berth to 3 mooring buoys aft and use starboard anchor of the ship.

The official draft is 31 ft. even keel.

The bottom is soft mud.

Vessels discharging naphtha must pump, after discharging same, about 200 tons of fresh water and water must be taken at prior ports of call as delay may result to vessel if Cienfuegos water barge is not able to supply the water due to the conditions explained in Item (7).

Average rates of discharge are:

Naphtha: 400 t.p.h.

Fuel oil: 450 t.p.h.

Berthing operation to this place performed only during daylight.

No water or bunker available by pipe-line.

(g) Thermoelectric Plant Submarine Pipe-line Anchorage: Located on the North side of the North Anchorage.

Pipe-line is 14 in. in diameter and 6 in. connection.

Vessels berth to 3 mooring buoys aft and to another mooring buoy at the port side forward and use the starboard side anchor.

Minimum draft is 38 ft.

Only product handled is fuel oil which can be discharged at an average rate of 500 t.p.h.

Berthing operation can be performed only during daylight hours.

No water or bunker available by pipe-line.

(h) North Anchorage: Located on the North part of the bay, at the Zone N.W. of the city and South of Tricontinental Pier and Ramirez Cove.

This zone is located between: Lat. 22° 09′ and 22° 09′ 30″ N. and Long. 80° 28′ and 80° 28′ 30″ West.

Although the bottom is soft mud the anchors hold perfectly well and securely.

Minimum draft of anchorage is 40 ft. and it can accommodate several large vessels with sufficient swinging area.

Vessels anchor with 3 shackles of chain.

At this place vessels await berth, bunker or water, etc. and also can discharge or load by means of barges.

(i) General Anchorage: Located in the middle of the bay and covers a square space limited by Pt. Gorda and Jaragua Cove at the South and Pt. Majagua and Pt. Salinas at the North:

(Lat. 22° 07′ – 22° 08′ 15″ N. – Long. 80° 27′ 15″ – 80° 28′ W.).

Minimum draft is 48 ft.

Bottom is soft mud but in spite of this anchors hold well and securely.

Usually vessels anchor with 3 shackles of chain.

At this anchorage vessels await berth, bunker, water, provisions, etc. and also can discharge or load by means of barges.

(j) Quarantine and Explosives Anchorage: Located at 0.5 mile off Pt. Barril.

As indicated by its name, this anchorage is used in case of quarantine to vessel or when carrying explosive cargo.

The bottom is soft mud having a draft of 50 ft.

Vessels anchor at this anchorage with 3 shackles of chain.

(23) PORT AUXILIARY EQUIPMENT: The following equipment is owned and operated by the port of Cienfuegos:

4 Tugboats: 2 – 150 h.p., 1 – 168 h.p., 1 – 120 h.p.

8 Cargo Barges: 3 – 100 tons, 3 – 130 tons, 1 – 150 tons, 1 – 180 tons.

1 Fuel Oil Barge: 240 tons.

1 Water Barge: 200 tons.

1 Floating Crane: 35 tons.

(a) CASILDA:

(1) LOCATION: The Port of Casilda is located on the South coast of Cuba. Lat. 21° 45′ N., Long. 79° 59′ West.

This is the shipping port for Trinidad, distance 3 miles from Casilda.

The town of Casilda and the port are situated on the North shore of a safe, landlocked small bay, shoal over its greater part.

(2) PILOT. *Where Pilot should be taken and distance to Place of Operation:* Pilots board vessel at 0.5 miles East of Blanco Cay and from this place to Casilda pier there is a distance of 9 miles.

Blanco Cay is a small islet 22 ft. above sea level, having numerous palms and trees and a lagoon in the centre.

Blanco Cay is located at following positions: Lat. 21° 38′ 28″/ 21° 38′ 14″ N., Long. 79° 52′ 53″/79° 53′ 29″ W.

At the Eastern end of Blanco Cay there is a lighthouse consisting of a metal structure 43 ft. high, flashing a white light.

During day-time the tall palm trees are more conspicuous than the lighthouse.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: Jobabo channel is the main entrance to this port and runs East of Blanco Cay.

Channel bottom is soft mud and on its course has a difficult "S" shape turn where precautions should be taken, nevertheless tugboat is not required for entering or sailing manoeuvres.

Entrance to port can be effected only during daylight hours and Masters must take notice that if vessel arrives before daybreak and Pilot is required in order to anchor and wait for daylight, an extra charge will be incurred.

In the same manner, if vessel arrives at dusk, it is probable that she cannot enter port, because docking must take place during daylight hours.

For entering to or sailing from this port, max. length permitted is 565 ft. and max. draft 25 ft.

(4) ANCHORAGES: The port has several anchorages, such as: "La Poza", located at bay, 17 ft. draft; "Bajo del Medio", an area 2.5 square miles,, draft 25 ft.

"Jobabo" 26 ft. draft.

Also N.E. of Blanco Cay there are anchorage areas, having 40 ft. draft, and more.

(5) TIDAL VARIATION: Tidal variation at this port averages 2 ft.

(6) BUNKERS: No bunkers available at this port.

(7) WATER: *(Potable or for Boilers):* Water is available by pipe-line if docked alongside pier, in limited quantity.

Price $1.50 per ton. Average daily delivery: 30 tons.

(8) PAPER/WOOD DUNNAGE: Wood dunnage is not available at Casilda.

Paper dunnage is available if requested well in advance as there is a small stock in the port, and if vessel's requisition exceeds port's stock, difference can be brought from the paper mill nearby.

(9) REPAIRS: There is no repair shop at Casilda, only a welding shop.

(10) PORT AUTHORITIES: Custom House and Port Doctor are located at Trinidad, the remainder at Casilda.

All authorities clear the vessels at Casilda, regardless of where located.

(11) WORKING HOURS:

Monday to Friday: 0600 – 1000 hrs. – 1200 – 1600 hrs.
Saturday: 0600 – 1000 hrs. – 1200 – 1600 hrs.
Sunday: No worked performed, but when worked same periods apply.

(12) PORT OPERATIONAL CAPACITY: Two vessels can operate simultaneously at Casilda:

One at the West side of pier loading sugar or discharging dry cargo, and another at the South side discharging petroleum products or loading alcohol.

During dry spells it is possible to operate 2 dry cargo vessels, one on each side of pier, but this is not advisable as both vessels will be worked at half capacity because of limit of labour.

(13) KIND OF CARGOES HANDLED BY THE PORT: Exportation: Bagged raw and refined sugar, alcohol.

Importation: General cargo, wood pulp, caustic soda, fuel oil, crude oil, lumber, etc.

Coastal Trade: Discharge of: Fuel oil, crude oil and occasionally diesel oil and general cargo.

(14) TRANSPORTATION: Transportation to or from Casilda is difficult.

Railroad system connects Casilda with Trinidad continuing to Cumbre, where it joins the Central railroad system, or to the city of Placetas, located on the Central highway system. From Cumbre railroad travel is available to any place in Cuba, likewise at Placetas by road.

There are also roads to Cienfuegos and Sancti Spiritus.

(15) COMMUNICATIONS: The only means of communications at this port are telephone and telegraph services.

Vessels navigating to Cuba can send their messages via "CLA" Havana Radio Station, which immediately relays the message to our Cienfuegos Agency.

While navigating in Cuban waters, Masters can contact "CLC" Cienfuegos Radio Coastal Network, which also relays the messages promptly to Cienfuegos Agency, and can answer them by the same system.

Station "CLC" also has radiotelephony.

Masters must send their ETA messages simultaneously to Mambisas Cienfuegos and Mambisas Havana.

(16) MAIL AND PARCELS: Should be sent to Mambisas Main Office Havana, from where it will be relayed to Casilda by the quickest means that ensure delivery.

(17) AGENCY ADDRESS: (See (17) under Cienfuegos).

Casilda is attended by Mambisas Cienfuegos Agency personnel.

Our enterprise has no office at Casilda, but Agent in the port can be contacted through telephone 2077.

It is difficult to communicate with the Agent in the port, and any information required must be requested from our Main Offices or Cienfuegos Agency.

The Agent at Casilda communicates daily with Cienfuegos Agency, which relays the information to our Main Offices.

(18) OPERATIONS AT BAY OR ANCHORAGE: No operations at bay or anchorage performed at Casilda.

(19) MEDICAL ATTENTION TO CREW MEMBERS: Crew members requiring medical care are treated at Trinidad City Hospital, where they can be hospitalised if necessary.

(20) BAGS LOADED PER SLING:

Raw sugar: 6 bags of 100 kilos each.
Refined sugar: 6 bags of 100 kilos each.
or 12 bags of 50 kilos each.

(21) EQUIPMENT FOR LOADING BULK RAW SUGAR EX-BAGS: The port lacks this equipment and if bulk raw sugar ex-bags is shipped, the trimming is done by shovellers.

(22) PLACE OF OPERATION: Casilda pier is built in the shape of an "L" the upright part of the "L" being the West side and the inferior part the South side.

Vessels docked at pier can be supplied limited quantities of fresh water and also, if necessary, electric power 110/220/440 volts.

Pier has railroad tracks along its length and at the paved West side trucking operations can be effected.

South side is not paved and is mostly used for operating tankers.

Coastal Pier No. 1: (East Side):
Length: 520 ft. Max. length permitted: 565 ft. Draft: 25 ft.
Cargoes handled on this side:
Importation: General cargo, wood pulp, lumber, caustic soda, etc.
Exportation: Bagged refined and raw sugar.
Coastal Trade: Occasionally general cargo.
Water available by 2 in. diameter pipe-line.
No bunkers available.
Docking only during daylight hours.

Coastal Pier No. 2: (South side):
Length: 390 ft. max. length permitted: 565 ft. Draft. 25 ft.
Cargoes handled by this side:
Importation: Fuel oil and crude oil, and occasionally diesel oil.
Exportation: Alcohol.
Coastal Trade: Fuel oil and crude oil, and occasionally diesel oil.

Tanker Information:
Fuel/Crude Oil: 1×8 in. diameter.
Diesel Oil: 1×6 in. diameter.
Alcohol: 1×5 in. diameter.
Water available by 2 in. diameter pipe-line.
No bunker available.
Docking only during daylight hours.

(23) PORT AUXILIARY EQUIPMENT: The port does not have any auxiliary equipment.

(24) PLAN OR WORKS UNDER WAY FOR IMPROVEMENT OF PORT FACILITIES: None at the present time.

(b) TUNAS DE ZAZA

(1) LOCATION: Tunas de Zaza is located on the South coast of Cuba. Lat. 21° 37′ N., Long. 79° 32′ W.

This port lies about 1.25 miles North of Pt. Ladrillos and just at the point is the mouth of Zaza river.

The port has no pier, and the shipping of bagged raw sugar is effected at an anchorage close to the town.

(2) PILOT: *Where Pilot should be taken and distance to Place of Operations:*

Pilots board the vessels at the entrance of either Tunas or Breton Channels.

The geographical position of the places where Pilots board the vessels are as follows:

Breton Channel: At buoy No. 2 located: Lat. 21° 08′ 18″ N., Long. 79° 30′ 24″ W.

From this place to the place of operations there is a distance of 8 miles.

Tunas Channel: At buoy No. 1 Located: Lat. 21° 31′ 00″ N., Long. 79° 41′ 24″ W.

From this place to the place of operations there is a distance of 1.5 miles.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: Port can be entered by two different channels:

Breton Channel, which is used by vessels exceeding 22 ft. draft or when coming from the East from Pt. Maisi, and Tunas Channel used by vessels drawing 22 ft. or less or when coming from the West from the Cape of San Antonio.

Entrance and transit through either channel can be effected without the assistance of tugboat, and although it can be accomplished either in day or night-time hours, in the case of this port it is not effected because the entrance to the port can be performed only during daylight.

Breton Channel: Its bottom is rocky-sandy and has no turns.

Max. draft to enter or sail from this port by this channel is 29 ft. with no length limitations.

Tunas Channel: Its bottom is sandy and its course is straight, without turns.

Max. draft to enter or sail from this port through this channel is 22 ft., with no length limitations.

(4) ANCHORAGES: All operations at this port are performed at anchorages – see Places of Operations (No. 22).

(5) TIDAL VARIATION: Tidal variation at this port averages 1 ft. 6 in.

(6) BUNKERS: No bunkers available at this port.

(7) WATER: No water available at this port.

(8) PAPER/WOOD DUNNAGE: No dunnage materials available at this port.

(9) REPAIRS: There is no repair shop at this port.

(10) PORT AUTHORITIES: All authorities are located at the nearby city of Sancti Spiritus and Port Doctor at Zaza del Medio.

Vessels can proceed directly to Tunas de Zaza where they are visited by all authorities.

(11) WORKING HOURS:
Monday to Friday: 0600 – 1000 hrs. – 1200 – 1600 hrs.
Saturdays: 0600 – 1000 hrs. – 1200 – 1600 hrs.
Sundays: Only when necessary.

(12) PORT OPERATIONAL CAPACITY: Only one vessel at a time can be operated.

(13) KIND OF CARGOES HANDLED BY THE PORT: Only exportation of bagged raw sugar.

(14) TRANSPORTATION: Transportation to or from Tunas de Zaza is rather difficult.

There are two daily car services, and also road transportation is possible by bus but auto service is preferable.

(15) COMMUNICATIONS: The only means of communication are telephone and telegraph.

Vessels cannot communicate directly with this port.

Vessels navigating toward Cuba can send their messages via "CLA" Havana Radio Station which immediately relays the message to our Cienfuegos Agency.

While navigating in Cuban waters Masters can contact "CLC" Cienfuegos Coastal Radio Network which also relays the messages promptly to Cienfuegos Agency and can answer them by same system.

Station "CLC" also has radiotelephony.

Masters must send their ETA messages simultaneously to Mambisas Cienfuegos and Mambisas Habana.

(16) MAIL AND PARCELS: Should be sent to Mambisas Main Office Havana from where it will be relayed to Tunas de Zaza by the quickest means that ensure delivery.

(17) AGENCY ADDRESS: (See (17) under "Cienfuegos").

Tunas de Zaza is attended by Mambisas Cienfuegos Agency personnel.

Our enterprise has no offices at Tunas de Zaza.

It is difficult to communicate with the Agent attending the port and any information required must be requested from our main offices or Cienfuegos Agency.

The Agent at the port communicates daily with Cienfuegos Agency which relays the information to our main offices.

(18) OPERATIONS AT BAY OR ANCHORAGE: All operations are effected at anchorage. See detailed information under No. 22.

(19) MEDICAL ATTENTION TO CREW MEMBERS: Sick crew members can receive medical attention at Sancti Spiritus Hospital where they can be hospitalised if required. Dental attention, is also given.

Sancti Spiritus is located 18 miles Northward (inland).

(20) BAGS LOADED PER SLING: 6 bags of raw sugar of 100 kilos each.

(21) EQUIPMENT FOR LOADING BULK RAW SUGAR EX-BAGS: The port lacks this equipment and if bulk raw sugar ex-bags is shipped the trimming is done by shovellers.

(22) PLACES OF OPERATIONS:

(a) *Inner Anchorage:* Located about 1.25 miles South-Westward of the town.

Draft: From 24 ft. to 27 ft.

Soft mud bottom.

(b) *Outer Anchorage:* Located South of Pt. Ladrillos.

Draft: 30 ft. (load only up to 29 ft.).

Soft mud bottom.

(23) PORT AUXILIARY EQUIPMENT: The port does not have any equipment and whenever required, it is brought in from Cienfuegos.

(24) PLAN OR WORKS UNDER WAY FOR IMPROVEMENT OF PORT FACILITIES: None at the present time.

GUANTANAMO (See Late Plans)

(1) LOCATION: This port is located on the South coast of Cuba and is the Easternmost port of the coast. Lat. 19° 59′ N., Long. 75° 10′ W.

Guantanamo is an ample, sheltered, landlocked bay of an approximate extension of 11 miles.

The mouth of the port is formed by 2 points: Point Leeward on the West side and Point Windward on the East side. Point Windward is round shaped, drab olive coloured and with arid cliffs. Where on a grey painted building is located a lighthouse, the white light of which flashes twice every 20 seconds and is visible up to a distance of 26 miles. Point Leeward is low, having a landing field.

For description purposes, Guantanamo Bay may be divided into what could be considered outer harbour and inner harbour. The outer harbour is rugged having a number of creeks with several cays, mostly in the centre. This outer harbour is almost entirely occupied by the United States of America Naval Base and it is convenient to make clear that the merchant vessels nominated for operations at Boqueron, located in the inner harbour, do not need any permit or authorisation of said Naval Base.

The inner harbour is most ample, practically free of cays and widening out forms 2 bays, separated by Point Manati. The bay located at the N.E. is known as Joa Bay.

Guantanamo City is located at a distance of 23 km. inland, in the most important coffee-growing district of Cuba.

Guaso River flows into the Northwestern extreme of Guantanamo Bay and Guantanamo River at St. Nicolas Point.

All operations at Guantanamo are performed at Boqueron pier, located on the East coast of the bay, in the threshold of the inner harbour.

(2) PILOT: *Where Pilot should be taken and distance to Place of Operation:* Pilots board the vessels at a distance of 1 mile from buoy No. 1, at the entrance of the port.

Distance from this place to:

General Anchorage: 7.5 miles.

Boqueron Pier: 7 miles.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: The entrance channel is wide and most deep on the course leading into the bay and its bottom is muddy. Once inside the bay, both, the main channel and Eagle channel are not so wide, with slight turns which offer no difficulties to navigation and manoeuvres. The bottoms of these channels are also muddy.

On the whole these channels are well marked with buoys and therefore offer no risks for navigation.

The entrance to and the sailing from the port and crossing of the channels, must be performed during daylight and vessels should not exceed 610 ft. in length with max. draft of 19 ft. Tugboat assistance is not required for entering or sailing from this port.

Approaching Guantanamo from the Southward, to the North-Northwestward, about 15 miles Westward of the harbour, a remarkable conical peaked mountain will be seen, which at closer range resembles a riding saddle. To the West of this mountain a smaller one can be seen with two little hillocks.

The coast in the vicinity of the entrance is cliffy and rugged.

There is so much depth on the approaches to Guantanamo that it is impossible to obtain any sounding until the vessel is properly navigating the entrance channel.

(4) ANCHORAGE: General anchorage is located in an area on the South of Joa Bay, immediately after the bar N.E. of Point "El Deseo" has been passed, and through Cay Ramon. Depth is from 25 ft. to 27 ft. and swinging area is 400 m.

(5) TIDAL VARIATION: Tidal variation at this port is from 1.5 ft. to 2.5 ft. depending on the season of the year.

(6) BUNKERS: Bunkers cannot be supplied at this port.

(7) WATER: *Potable or for Boilers:* Is supplied to the vessels docked at Boqueron Pier through 2.5 in. pipe-line. Price is $2.30 per metric ton. Average delivery rate is 10 t.p.h.

Vessels must furnish the hoses for water delivery. Water can be obtained at both sides of pier.

(8) PAPER/WOOD DUNNAGE: Although dunnage materials can be obtained at Guantanamo, if possible, it is preferable that vessel arrives supplied with same, because sometimes the requisition of the vessel may be higher than the port stock, and that could mean delays.

Whenever necessary to request dunnage materials at this port, the requisition should be made not less than 5 days in advance of vessel's arrival.

(9) REPAIRS: There is no repair shop at this port.

(10) PORT AUTHORITIES: All Port Authorities are located at Caimanera where Mambisas Agency Office also is located.

Caimanera lies across the bay, just in front of Boqueron Pier, at a distance of 1.5 miles.

(11) WORKING HOURS:

Monday to Friday:	0700 – 1100 hrs. – 1300 – 1700 hrs.
Saturdays:	0700 – 1100 hrs.
Sundays:	If necessary
Night:	If necessary.

(12) PORT OPERATIONAL CAPACITY: Two vessels can operate simultaneously:

A tanker loading molasses at the North side of the pier, and another vessel loading sugar at the South side.

(13) KIND OF CARGOES HANDLED BY THE PORT: Mostly raw bulk sugar and molasses.

It is possible to handle import merchandise, preferably bagged cargoes, but it is necessary to co-ordinate direct transportation from alongside vessel to destination warehouses, because at the port there is no warehousing space available. Due to this fact discharge of imported goods is effected only sporadically.

(14) TRANSPORTATION: Transportation between Caimanera and Boqueron is effected only by means of launches.

Distance between Caimanera and Boqueron is 1.5 miles.

From Caimanera to Guantanamo, travelling could be effected either by railroad or paved highway and for both routes the distance is 23 km.

There are 3 daily scheduled trains and 14 modern bus departures, travelling time being approximately 40 minutes.

From Guantanamo to Havana there is a scheduled bus service with several departures daily. Travelling time from Guantanamo to Havana by bus is 16 hours. Also there is a daily departure at 1230 hrs. of an airway service Guatanamo/Santiago/Havana.

There is a very efficient service of minibuses for the transportation of travellers to and from the airport.

From Guantanamo to Santiago de Cuba there is also bus service with several departures daily, travelling time being 2 hours.

(15) COMMUNICATIONS: At Caimanera there are the following services:

Telephone, local and long distance, telegraph and Post Office.

There is no telephone communication between Caimanera and Boqueron.

Vessels navigating toward Cuba can communicate with Mambisas Caimanera Agency through "CLA" Station at Havana and the message will be relayed to Caimanera by telegraph service.

Masters must send their ETA messages simultaneously to Mambisas Caimanera and Mambisas Habana.

(16) MAIL AND PARCELS: Must be sent to our Main Offices at Havana, because vessels loading sugar at Guantanamo usually load their cargo in a very short time and all mail and parcels received would be sent to Guantanamo or a second loading port, whichever is deemed to ensure delivery.

(17) AGENCY ADDRESS:

Empresa Consignataria Mambisa,
Linea No. 9 entre Marina y Correos,
Apartado No. 5, Caimanera,
Guantanamo, Prov. de Oriente.
Telephone: 23.
Cable: Mambisas Caimanera.

Agency VHF works on Channel 16.

(18) OPERATIONS AT BAY OR ANCHORAGE: All operations performed at this port are alongside pier.

(19) MEDICAL ATTENTION TO CREW MEMBERS: At Caimanera there is a modern hospital equipped for both, medical and dental services, where crew members are attended when required.

In serious cases or when highly specialised medical care is required, the patients are sent by ambulance to Guantanamo Regional Hospital.

(20) EQUIPMENT FOR LOADING BULK RAW SUGAR EX-BAGS: The port has complete equipment for loading bulk raw sugar.

(21) PLACE OF OPERATION. DESCRIPTION: Before going into details of the place of operation, it is convenient to clarify some matters to avoid misunderstanding:

As has been explained in Item No. 3 (Entrance to Port), max. permissible length is 610 ft., but it must be understood that this length refers to tankers loading molasses as in this type of vessel the length of the pier does not affect the normal loading operation. On the contrary, dry cargo vessels which exceed 500 ft., will always find it difficult to load their cargo, because the after hold will be outside of the pier.

The pier is a solid concrete construction 504 ft. long and 60 ft. wide. Along the pier run 4 railway tracks of standard gauge.

Water can be supplied to vessels at either side of pier.

Molasses is loaded at the North side only, but sugar can be loaded at both sides of the pier.

Although the draft at either side of pier is 22 ft., vessels load only up to 19 ft., owing to the draft of the port channel.

Boqueron Pier:

(a) North Side:
Length: 504 ft. Draft: 22 ft.
Cargo handled: Molasses and bagged raw sugar.

(b) South Side:
Length: 504 ft. Draft 22 ft.
Cargo handled: Bulk raw sugar.

(22) PORT AUXILIARY EQUIPMENT: This port has no auxiliary equipment.

(23) PLAN OF WORKS UNDER WAY FOR IMPROVEMENT OF PORT FACILITIES: All the raw sugar exported is by mechanical means due to a new plant.

HAVANA: (See Late Plans)

(1) LOCATION: This port is located on the North coast of Cuba: Lat. 23° 09′ N., Long. 82° 21′ W.

Havana is a natural, landlocked, well sheltered harbour and the most important port of the country owing to its port facilities and for being the capital.

The port of Havana offers to vessels within its premises the security of a safe port.

(2) PILOT: *Where Pilot should be taken and distance to Operations Places:* Pilots board vessels at approximately 1 mile from the port mouth, although occasionally and specially during night-time, they go out about 3 miles to meet vessels.

Distance from the place where Pilots board vessels up to port anchorage or wharves is about 1.25 miles.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: The port is entered through a straight channel with Morro Castle to the East, La Punta Castle to the West.

The bottom is muddy, with no narrowness, but at the entrance there is a strong current which is to be taken into consideration in the entry manoeuvres of any vessel.

Maximum draft of the channel at low tide is 42 ft. and tankers can enter drawing up to 37 ft., as they take a special course up to refinery piers, once they are in the bay.

Port can be entered to or sailed from, either in day or night time and it is not necessary to wait for slack or favourable tide, except tankers drawing 37 ft. which can enter only at high tide.

While approaching Havana the most remarkable points of visual orientation are its tall buildings and Morro Castle, located on the East side of the entrance.

(4) ANCHORAGES: There is an ample anchorage zone area where loading and discharging operations are performed.

(5) TIDAL VARIATION: Tidal variation at this port averages 1 ft. 6 in.

(6) BUNKERS: Vessels can be supplied with bunkers at Havana, and following types are available:

Regular diesel oil, regular fuel oil, I.F.O. mixtures (intermediate fuel oil).

Diesel oil is supplied by a 350 ton capacity barge, and fuel oil by a 1,500 ton capacity vessel which is towed to piers or anchorage in order to fulfill deliveries. This vessel also delivers the I.F.O. mixtures and is named 'Playa Colorada'.

I.F.O. mixtures are prepared at the following viscosity degrees: 50 – 200 – 400 – 600 – 800 – 1,000 and 1,500 maximum. (Redwood International Scale, at 100°F).

I.F.O. mixtures are only available at the port of Havana.

Note to Chief Engineers: It is advisable when ordering I.F.O. mixtures to specify always maximum and minimum allowable viscosity of the product.

(7) WATER: *(Potable or for boilers):* Vessels can be supplied with fresh water by means of barges at bay or when docked to pier. There are several barges assigned to that purpose.

Average delivery rate is 100 t.p.h. Price: $1.50.

If delivered from 1700 hrs. up to 0700 hrs. or Saturday after 1200 hrs. until Monday 0700 hrs., overtime charge of $30.00 is added.

(8) PAPER/WOOD DUNNAGE: Dunnage materials are available at this port but must be requested 3 days in advance of intended delivery.

(9) REPAIRS: There is a reliable repair shop.

Requisition must be placed in advance in order that a technician can determine if repairs can be made, informing the cost of repair to vessel's administration.

(10) PORT AUTHORITIES: All Port Authorities are located within port premises and use launch in order to clear the vessels.

(11) WORKING HOURS: Monday to Friday: 0700 – 1300 hrs. – 1300 – 1900 hrs. Saturday: Same periods. Sunday: No work performed unless necessary.

Although the above are port's working hours, if necessary 2 additional shifts of 6 hours may be worked if conditions as to personnel and weather are favourable.

(12) PORT OPERATIONAL CAPACITY: Including all kinds of operations and cargoes, the port can work about 34 vessels simultaneously, not counting those which may be loading or discharging at anchorage.

(13) KIND OF CARGOES HANDLED BY THE PORT: As stated, the port of Havana handles all kinds of cargoes in and out. In order to give an idea as to diversity, the following are the most common and important:

Importation: General cargo, bulk grains, lumber, crude oil, petroleum by-products, bulk and bagged fertilizers, bulk edible vegetable oil, refrigerated cargoes, chemical products, heavy cargoes such as machinery and equipments, etc.

Exportation: General cargo, fresh and canned fruits, liquors, rum, glycerine, leaf tobacco, cigars, cigarettes, fuel oil, etc.

Coastal Trade: General cargo, sugar and other foodstuffs, crude oil and petroleum by-products, cement, bagged fertilisers.

It must be pointed out that lately no sugar is exported through the port of Havana except occasionally.

(14) TRANSPORTATION: Transportation facilities from Havana are excellent and due to the numerous means of transportation, it is impossible to detail them all.

For any particular information Havana Agency may be contacted.

(15) COMMUNICATIONS: The following means of communication are available at Havana:

Cable: C.L.A. International, R.C.A., Western Union.
Telephone: Local, long distance and international.
Telex: Local, National telex system and international.
Airmail and Air Express: National and international.

At our main offices in Havana there are two telex machines, which is the quickest means of communication available.

Vessels navigating to Cuba can communicate with Mambisas Habana through "CLA" Havana Radiotelegraphy Station which relays the message immediately to us by telex.

While approaching Havana vessels can communicate by VHF radiotelephony with:

Mambisas Agency: Channel 12.
Pilots: Channel 16.

Both, Agency and Pilots, are on the air 24 hours of the day.

Masters must send their ETA messages to Mambisas Habana.

(16) MAIL AND PARCELS: Mail and parcels should be sent by airmail and air express, respectively.

(17) AGENCY ADDRESS:

Empresa Consignataria Mambisa,
Agencia Havana,
Lamparilla y Oficios,
P.O. Box No. 1785,
Havana, Cuba.
Telephone: 61 – 1159 (day and night).
61 – 6706 – Agency Export Dept.
61 – 9068 – Agency Clearance Dept.
Cable: Mambisas Habana. Telex: 051148 and 051197.
Agency VHF works on Channel 12.

(18) OPERATIONS AT BAY OR ANCHORAGE: When all piers are engaged, loading or discharging operation as well as discharge of heavy cargoes, are performed at anchorage, for which there are several barges, tugboats and floating cranes available.

(19) MEDICAL ATTENTION TO CREW MEMBERS: Crew members requiring medical attention are treated at "Commander Fajardo" Hospital where they can be hospitalised if necessary.

Those cases requiring dental care are treated at "10 de Octubre" Dental Clinic.

(20) BAGS LOADED PER SLING: 12/15 bags 50 kilos each refined sugar; 6 bags 100 kilos each raw sugar. (Sugar is shipped through this port only occasionally).

(21) EQUIPMENT FOR LOADING BULK RAW SUGAR EX-BAGS: This port lacks this equipment.

(22) OPERATIONS PLACES: Description of operations places commences with "Sierra Maestra Terminal", located on the S.W. coast of the bay, near the entrance, and continues around the bay installations counter-clockwise, up to the last installation "Andres Gonzalez Lines Dock", located on the N.E. coast and just at the port entrance.

When under the item "Draft" 2 figures are shown, for instance: 30/33 ft., if referring to a place of operation where only 1 vessel can operate, the first figure (30) indicates the usual draft allowed to vessel for operation and the second (33) indicates the maximum draft allowed to vessel if same is docked separated from pier or with part of the vessel remaining outside the pier.

In places of operation where 2 or more vessels can operate, if the installation is for example, a straight coastal dock, the first figure means the maximum draft allowed, and the second the minimum draft.

Finally it is important to note that docking or undocking operations at all piers, docks and terminals of the port of Havana can be effected either during day or night-time.

(a) Sierra Maestra Terminal *(Formerly Havana Docks Corp.):*

This installation consists of 3 concrete piers, all with railroad sidings connecting with the main tracks, and all suitable for trucking operations.

This terminal is used in the discharging and loading of general cargo, mainly bagged cargoes.

Sierra Maestra No. 1 Pier *(Formerly San Francisco Pier):*

North Side: Length 662 ft., width 210 ft., depths alongside from West to East 19 – 28 – 38 ft., draft 30 – 33 ft.

South Side: Length 662 ft., width 210 ft., depths alongside from West to East 21 – 30 – 38 ft., draft 30 – 33 ft.

Sierra Maestra No. 2 Pier *(Formerly La Machina Pier):*

North Side: Length 661 ft. 6 in., width 210 ft., depths alongside from West to East 24 – 30 – 39 ft., draft 30 – 33 ft.

South Side: Length 602 ft., width 210 ft., depths alongside from West to East 21 – 30 – 36 ft., draft 30 – 33 ft.

Sierra Maestra No. 3 Pier *(Formerly Santa Clara Pier):*

North Side: Length 625 ft., width 210 ft., depths from West to East 20 – 30 – 39 ft., draft 30 – 33 ft.

South Side: Length 562 ft., width 210 ft., depths alongside from West to East 21 – 30 – 34 ft., draft 30 – 33 ft.

(b) Margarito Iglesias Terminal (Formerly Paula Pier):
This terminal consists of 3 piers, and is only suitable for trucking operations.

Pier No. 1 is owned and operated by Caribbean Shrimp Fleet.

Pier No. 2 is owned and operated by the Cuban Coastal Trade Enterprise.

These two piers are used exclusively by units of each owner.

Pier No. 3 is owned by Empresa de Navegacion Mambisa, being the only one used as an operation place of the port, although very seldom. Mainly operates light general cargo.

Margarito Iglesias No. 3:
North Side: Length 443 ft., width 118 ft., depths from shore to pier head 11 – 24 – 26 ft., draft 18 – 20 ft.
South Side: Length 443 ft., width 118 ft., depths from shore to pier head 10 – 17 – 25 ft., draft 18 – 20 ft.

(c) Havana Central Pier:
This pier is used in the discharge and loading of general cargo.

It has railroad sidings connecting to the main tracks and also trucking operations can be performed.
North Side: Length 434 ft., berthing length 400 ft., width 200 ft., depths from shore end to pier head 6 – 26 – 29 – 31 ft., draft 26 – 28 ft.

Berthing length is reduced to 400 ft. due to last 34 ft. close to shore must be disregarded owing to shallowness of water.
South Side: Length 480 ft., width 200 ft., depths from shore end to pier head 19 – 26 – 32 ft., draft. 29 – 31 ft.

(d) Aracelio Iglesias Terminal *(Formerly Norgulf Terminal):*
This installation is capable of operating 3 vessels simultaneously, mainly loading or discharging general cargo.

It consists of a coastal dock known as "Almacen" and a pier, all built of concrete and each berth except South side pier has railroad sidings connecting with the main tracks, where trucking operations can also be performed because of being well paved.
Coastal Dock (known as Almacen): Length 573 ft. Width 44 ft. Depths from N.E. to S.W.: 26 – 23 – 20 ft., draft 27 ft.

On occasions vessel remains somewhat separated from the dock.
Pier North Side: Length 518 ft. Width 118 ft. Depths from shore end to pier head: 24 – 30 – 37 ft., draft 30 ft.
Pier South Side: Length 449 ft. Width 104 ft. Depths from shore end to pier head: 27 – 34 – 34 ft., draft 32 ft.

This side cannot perform trucking or railroad operations and discharge takes place from vessel's hold to upper floor or warehouse.

(e) Juan Manuel Diaz Terminal *(Formerly Ward Line Terminal):*
This terminal is able to operate 4 vessels simultaneously, mainly loading or discharging general cargo.

It consists of 2 coastal docks (known as Almacen No. 3 and Almacen No. 2) and a pier.

Built of concrete, each berth has railroad sidings connecting with the main tracks and can perform trucking operations because of being well paved.
Coastal Dock No. 3 (Also known as Almacen No. 3): Length 521 ft. Width 56 ft. Depths from N.E. to S.W.: 21 – 22 – 26 ft., draft 26 ft. if the vessel berths starboard-side to dock, the ship remaining somewhat separated from the dock.
Pier North Side: Length 500 ft. Width 125 ft. Depths from shore end to pier head: 20 – 30 – 35 ft., draft 28 ft.
Pier South Side: Length 530 ft. Width 125 ft. Depths from shore end to pier head: 24 – 30 – 34 ft., draft 31 ft.
Coastal Dock No. 2 (Also known as Almacen No. 2): Length 481 ft. Width 31 ft. Depths from N.E. to S.W.: 21 – 22 – 26 ft., draft 24 ft.

(f) Osvaldo Sanchez Dock *(Formerly Atares–Vaccaro Docks):*
At the present time this installation is out of service and undergoing complete rebuilding, and will be operated by the Cuban Fisheries Institute once the repairs are finished.

It consists of 2 coastal docks, 1 next to the other with no railroad sidings but suitable for trucking operations.
Coastal Dock No. 1 (Formerly Atares Dock): Length 428 ft. Width 30 ft. Depths from N.E. to S.W.: 22 – 23 – 24 ft., draft 24 – 25 ft. (berthing port side to dock).
Coastal Dock No. 2 (Formerly Vaccaro Dock): Length 511 ft. Width 30 ft. Depths from N.E. to S.W.: 26 – 21 – 17 ft., draft 25 ft. (berthing starboard side to dock).

At both docks draft will undoubtedly increase as a result of dredging taking place at this time.

(g) Puerto Pesquero de la Habana *(Havana Fishing Port):*
This is a new installation owned and operated by Cuban Fisheries Institute with modern and efficient facilities including large refrigerated warehouses.

By co-ordinating with the operators, these facilities are frequently used to handle import and export refrigerated cargoes, other than fish.

Drafts alongside operation places are 26 ft., except the portion where the former "Hacendados Dock" was located, where draft is 24 ft.

Operation places are: Dock No. 1, length 853 ft.; Dock No. 2, length 505 ft.; Dock No. 3, length 738 ft.

There are also other piers at the Fishing Port, but they are used only to perform repairs, deliver supplies to vessels, etc.

(h) Haiphong Terminal *(Formerly Terminal Maritima):*
This terminal of recent construction is the most modern and well equipped of the port of Havana, capable of operating 3 large dry cargo vessels.

It has double railroad track sidings and being well paved, can also perform trucking operations.

Equipment consists of 12 gantry cranes with lifting capacity from 5 to 8 tons.

Usual cargo handled by this installation are: general cargo, lumber, structural steels, steel scrap, etc.

Length 1,747 ft. Width 72 ft. Depths from 32 to 35 ft. throughout the entire length of the dock. Draft 32 to 33 ft.

(i) Terminal Maritima Pesquera *(Fishing Terminal):*
Like Havana Fishing Port, this installation is also owned and operated by the Cuban Fisheries Institute and occasionally is used to operate loading or discharging of dry cargo vessels.

In the near future, when repairs to Osvaldo Sanchez Dock are finished, the fishing enterprise will move to that dock and this Terminal will be operated by Terminales Mambisas, and will then be used permanently for discharging general cargo, lumber, structural steel, etc.
North Side: Length 714 ft. Draft 32 ft. 6 in. throughout its length.
South Side: Length 685 ft. Draft 26 ft. to 28 ft.

(j) J. A. Echeverria Silos Pier *(Formerly Burrus Silos Pier):*
This coastal dock is used for discharging of bulk grains for which operation it is equipped with elevator and silos, having a storage capacity of approximately 20,000 tons, which permits a discharging rate, under normal circumstances, of 1,200 tons per day; its principal specifications are the following:

Length 500 ft. Width 26 ft. Depths from S.W. to N.W.: 26 – 30 – 29 – 27 ft.

Draft 30 ft. 6 in. for vessels remaining 2 m. from the dock. Draft 31 ft. for vessels remaining 3 m. from dock.

Occasionally this pier is used for discharging of general and refrigerated cargoes.

It is paved for trucking operations.

(k) Manuel Porto Dapena Terminal *(Formerly Begueristain and Auxiliar Maritima Docks):*
This dock is suitable for loading and discharging of general cargo, lumber, refrigerated cargoes, etc. There are also installations for the discharge of used lubricating oil and petroleum products.

This Terminal will handle the shipping of empty containers, and for that purpose the land around it is being prepared.

Length 762 ft. Width 36 ft. Depth from S.W. to N.E: 23 – 25 – 26 – 29 ft., draft 29 ft. (Vessel remaining separate from dock).
Tanker Information: Fuel oil and other black petroleum products: 1 connection 8 in. diameter.

Diesel oil, gasoline, kerosene, etc: 2 connections 8 in. diameter.

(l) Commander Turcios Lima Grain Elevators *(Formerly Regla Coal Dock):*
This is a relatively new installation consisting of a dock and silos with capacity of 30,000 tons.

It handles all kinds of bulk grain with the exception of Durum Wheat which is discharged at J. A. Echeverria Dock.

This dock has railroad sidings connecting with the main tracks, where trucks can also operate.

General cargo, refrigerated cargoes, containers, etc., occasionally are discharged at this dock.

Length 779 ft. Width 30 ft. Depths from S.E. to N.W.: 25 – 27 – 31 – 32 ft., draft 32 ft.

(m) Facilidades Maritimas Dock *(Formerly Cuban Distilling or Aguilera Pier):*
This dock is used chiefly in the loading of molasses and the discharge of tallow or chemical products such as: Dodecylbenzene, edible vegetable oil, also cement, fertilisers and general cargo, etc.

It has nearby railroad sidings connecting with the main tracks and also is suitable for trucking operations.

At the N.W. extreme there is a large rock which renders worthless about 60 ft. of pier space.

Length 814 ft. Width 26 ft. Depths from N.W. to S.E.: 25 – 26 – 27 – 23 ft. Draft 27 ft.

Note: This pier in the near future will diminish in length because of port improvements plan (See Item No. 24).

(n) Nico Lopez Oil Terminal *(Formerly Standard and Shell Oil piers):*
This Terminal is used exclusively for the discharge of Crude Oil and Petroleum by-products and the loading for Coastal Trade of petroleum products for the outports.

Nico Lopez Pier No. 1 *(Formerly Standard Oil Pier):*
North Side: Length 1,027 ft. Depths from shore end to pier head: 36 – 35 – 34 ft., draft 36 ft. 6 in.
South Side: Length 1,027 ft. Depths from shore end to pier head: 36 – 35 – 34 ft., draft 36 ft. 6 in.

At the centre of the pier there is a loading and discharging platform measuring 240 ft. long by 40 ft. wide.

Nico Lopez Pier No. 2 *(Formerly Shell Oil Pier):*
North Side: Length 990 ft. Depths from shore end to pier head: 35 – 36 – 38 ft., draft 37 ft. – 38.25 ft.
South Side: Length 990 ft. Depths from shore end to pier head: 34 – 36 – 38 ft., draft 36 ft. – 37 ft.

In the centre of the pier there is a loading and discharging platform measuring 80 ft. long by 40 ft. wide.

For both piers, although Pier No. 2 is capable of docking a vessel drawing 38 ft. 3 in., a deeper draft than 37 ft. is not recommended due to the serious consequences it has on the steering of ships, since the access channel has an official draft of 38 ft.
Tanker Information: Although Refinery Terminal has a large stock of reducing fittings as well as inch/millimeter fittings, usual connection diameters at piers are:

Pier No. 1: 10 in. and 6 in.
Pier No. 2: 8 in. and 6 in.

All kinds of products are discharged or loaded by the referred connections.

(o) Andres Gonzalez Lines Dock *(Formerly Havana Coal, Casablanca):*

This coastal dock is used for the discharge of bulk fertilisers and coal, also for discharging equipment such as trucks, bulldozers, tractors, etc., and is equipped with an overhead crane. It has nearby railroad sidings connecting with the main tracks. Operations can be performed either by railroad or trucks, or a combination of both.

Length 1,090 ft. Depths from South to North: 22 – 26 – 26 – 29 – 30 – 24 – 23 – 17 – 19 ft.

Draft 30 ft. if berthing to half of the dock length, next to the interior of the bay, ship remaining separated from the pier. If not separated from pier then allowable draft is 28 ft.

At the other half of the pier allowable draft is 24 ft.

(23) PORT AUXILIARY EQUIPMENT: As the port of Havana owns and operates a large number of auxiliary equipment, only the most important of those are listed here:

Four floating cranes: (1 –100 tons) (3 – 35 tons) lifting capacity.

40 shore cranes: ranging from 30 to 5 tons lifting capacity.

Six cargo barges: 125/150 tons cargo capacity.

Nine tugboats: (1 – 1,200 h.p.) (1 – 860 h.p.) (1 – 540 h.p.) and remaining 6 are from 325 to 165 h.p.

(24) PLANS OR WORKS UNDER WAY FOR IMPROVEMENTS OF PORT FACILITIES: In addition to information given under Item No. 22 (Places of Operations) there is a plan to build a new terminal for discharge of bulk cargoes such as fertilisers, coal, etc. between the area comprised by the piers Quinto de Regla and Facilida des Maritimas (Aguilera).

Under this plan, Quinto pier and Chemical dock will cease to operate, and Facilidades Maritimas (Aguilera) dock will be shortened in its actual length (814 ft.).

ISABELA DE SAGUA: (See Late Plans)

(1) LOCATION: Isabela is located on the North coast of Cuba: Lat. 22° 52′ N., Long. 80° 00′ W.

Although the port of Isabela is not located in a bay and lies on a small peninsula oriented S.W./N.E., it is a fairly protected harbour because a barrier of cays, lined from N.W. to S.E., forms a protective levee against the roughness of the sea and the force of the winds.

Behind the port and town of Isabela, to the S.E., and as if splitting the small peninsula in two, Sagua La Grande river flows into the sea.

Isabela is mostly a sugar shipping port but also handles a rather important amount of import cargoes.

In the vicinity of Isabela, besides several sugar mills, there are an Electro-Chemical Industry and a very important foundry.

(2) PILOT. *Where Pilot should be taken and distance to Place of Operations.* Pilots board the vessels at about 1 or 2 miles out from No. 1 and No. 2 buoys, which mark the port entrance.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: The entrance channel, by stages, from outward to inward has sandy bottom, sand and coral and reef hard rock, mud and rock under mud; mud and clay.

It has some turns but none are regarded as dangerous.

There are also some narrows which by themselves offer no difficulties, but due to the strong current encountered through the course of the channel, precautions are to be taken. During rough weather spells it is advisable to delay entrance or sailing manoeuvres, for the sake of vessel's safety.

Limitations as to length and drafts of vessels are: 23 ft. draft and 500 ft. length, although vessels with a length up to 575 ft. have often entered this port.

Vessels can enter to or sail from this port only during daylight hours, because of lack of lights in the channel.

When channel is well lighted, vessels can also enter during night-time, but that fact must be ascertained in advance with port Agency.

Tugboat assistance is required for docking and undocking manoeuvres.

While approaching Isabela, the string of cays that form the mentioned barrier in front of the port, can be seen.

At the Eastern end of one of them Del Cristo Cay, in Pt. de los Practicos, Cayo del Cristo lighthouse can be seen, its white light flashing from a red iron skeleton, 44 ft. high, visible 10 miles away.

(4) ANCHORAGES: There are 3 anchorages areas at the port of Isabela but as they are used as operation places, they are described under Item No. 22 (Places of Operations).

(5) TIDAL VARIATION: Tidal variation at this port averages 2 ft. 6 in.

(6) BUNKERS: There are no bunkers available at Isabela.

(7) WATER: *(Potable or for boilers):* Fresh water can be supplied by means of a 30 ton capacity launch. Water is delivered to vessels docked to piers or at Inner Anchorages. Daily delivery rate: 30 tons. Price $2.00 per ton.

(8) PAPER/WOOD DUNNAGE: Dunnage material, specially wood dunnage, is difficult to obtain at Isabela.

Paper dunnage can be obtained if ordered well in advance.

(9) REPAIRS: There are reliable repair shops at Isabela and the nearby town of Sagua La Grande, where light repairs can be effected.

Requisition must be placed in advance in order that a technician can determine if repairs can be made, informing the cost to vessel's administration.

(10) PORT AUTHORITIES: All Port Authorities are located at the port of Isabela de Sagua.

When vessels remain at anchorage waiting for berth, Port Authorities are transported by tugboat for clearing purposes.

(11) WORKING HOURS:

Monday to Friday:	0700 – 1100 hrs. – 1300 – 1700 hrs.
Saturday:	0700 – 1100 hrs.

Above periods apply for both sugar loading and discharging general cargo, except for loading molassses, in which case operations are performed 24 hours of the day without interruptions.

(12) PORT OPERATIONAL CAPACITY: The port is able to operate 3 vessels simultaneously.

For instance: Two vessels loading or discharging dry cargo and a tanker loading molasses.

The port lacks labour to operate 3 dry cargo vessels simultaneously.

(13) KIND OF CARGOES HANDLED BY THE PORT: Importation: General cargo, bagged fertiliser, bagged malt, jute bales, etc.

Exportation: Bagged refined and raw sugar, molasses.

Coastal Trade: Bagged salt, general cargo.

(14) TRANSPORTATION: Means of transportation to and from Isabela are: train, bus or car.

From Isabela to Sagua La Grande there is a distance of about 17 km. by road or train.

From Sagua La Grande to Santa Clara there is a distance of about 50 km. by road.

From Santa Clara there are numerous means of communications to any place or city in Cuba.

There are bus lines Sagua/Cardenas, Sagua/Havana, Sagua/Santa Clara, Sagua/Isabela.

(15) COMMUNICATIONS: Means of communication available at Isabela are: Telegraph, local and long distance telephone, RCA radiograms and telex, the latter being the quickest means of communication with the port.

Vessels navigating to Cuba can communicate with Mambisas Isabela Agency through "CLA" Havana Radio Station, which relays the message promptly to Isabela.

Vessels cannot communicate directly with Isabela de Sagua.

Masters must send their ETA messages simultaneously to Mambisas Sagua La Grande and Mambisas Habana.

(16) MAIL AND PARCELS: Mail and parcels should be sent to our main offices at Havana from where it will be relayed to Isabela by the quickest means available deemed to ensure delivery.

(17) AGENCY ADDRESS:

Empresa Consignataria Mambisa,
Agencia Isabela de Sagua,
P.O. Box 18,
Isabela de Sagua, Prov. de Las Villas,
Telephone: 32 (office) 25 (night)
Telex: 041184
Cable; Mambisas Sagua La Grande

Pilot VHF works on Channel 16.

(18) OPERATIONS AT BAY OR ANCHORAGE: Occasionally operations are performed at both Inner and Outer anchorages.

(19) MEDICAL ATTENTION TO CREW MEMBERS: Crew members requiring medical or dental care are treated at Sagua La Grande Hospital, where they can be hospitalised if necessary. At Isabela there is only a Polyclinic.

(20) BAGS LOADED PER SLING: Raw sugar: 6 bags 100 kilos type; Refined sugar: 12 bags 50 kilos type.

(21) EQUIPMENT FOR LOADING BULK RAW SUGAR EX-BAGS: Although this port exports raw sugar, it lacks this equipment.

If bulk raw sugar ex-bags is shipped the trimming is done by shovellers.

(22) OPERATION PLACES: Isabela operation places (piers) are located on the North coast of the peninsular previously mentioned.

Formerly 4 piers were operated by the port but due to shallowness alongside Begueristain pier, nowadays the latter is used only for small craft and barges drawing 10 ft. maximum. Another berth, Garcia pier, is out of service undergoing repairs, the date of completion of which has not yet been determined.

(a) Amezaga Pier: This consists of a solid concrete well paved construction.

As double standard gauge railroad tracks run along the length of pier, operations can be performed either by rail-road or trucks, or a combination of both.

Although it has 2 sides, only the Eastern is used for vessel operations, because at the West side the depth alongside is 9 ft. only.

East Side: Length 324 ft., draft allowed 24 ft. 0 in. (7.32 m.), width 35 ft.

Cargo handled by this pier: General cargo, bagged cargoes, bagged raw and refined sugar, etc.

(b) Alfert pier: Draft allowed 21 ft. (6.4 m.) Ships max. length 557 ft. (170 m.).

This pier consists of an all-hardwood construction not in good condition, needing repairs, which are taking place.

It has standard gauge railroad tracks connecting with the main tracks and is not suitable for trucking operations.

East Side: Length 450 ft., Width 30 ft., draft allowed 21 ft. 6 in. (6.40 m.).

Tanker information: Molasses: 2 × 8 in. diameter connections.

Loading rate: 200 t.p.h.

Cargoes handled by this side: General cargo, molassses, bagged sugar.

West Side: Length 450 ft., width 30 ft., draft 21 ft. 6 in. (6.40 m.).

No operations performed at this side due to shallowness alongside.

(c) Beguiristain Pier: Max. vessel's length 525 ft. (160 m.), Draft. (West side) 18 ft. (5.40 m.).

Length 540 ft., width 30 ft.

East side of this pier is out of service due to shallowness alongside.

If enough draft was available it could be used for general cargo and sugar. (See item No. 24).

(d) Inner Anchorage No. 1: This anchorage is located about 300 m. N.W. from the piers and can be considered part of the manoeuvring basin.

Botton is soft mud but anchors hold well with 3 shackles of chain.

Draft allowed: 24 ft. or 25 ft. depending upon vessels length.

Swinging area: About 250 m.

Vessels load or discharge at this anchorage by means of barges.

(e) Inner Anchorage No. 2: This anchorage is located close to and South of Palomo Cay.

Bottom is soft and mud but anchors hold well with 3 shackles of chain.

Draft allowed: 4.4 m.

Swinging area: Unlimited.

Several vessels can be accommodated.

Vessels load or discharge at this anchorage by means of barges but it is chiefly used for vessels awaiting berth.

(f) Outer Anchorage: Located East of Del Cristo Cay and about 8 miles from the port of Isabela, and also known as Ingles Anchorage.

Bottom is mud and coral reefs but anchors hold well with 3 or 4 shackles of chain.

This anchorage is marked with a well lighted buoy.

Vessels can load safely up to 32 ft. 8 in. draft.

Loading or discharging is effected by means of barges.

Operations can be performed at this anchorage when there are good weather conditions.

(23) PORT AUXILIARY EQUIPMENT:

3 Tugboats (250 h.p. each).
1 Water launch (30 tons capacity).
6 Barges (200 tons cargo capacity each).
1 Transportation Launch.

(24) PLANS OR WORKS UNDER WAY FOR IMPROVEMENT OR PORT FACILITIES: In addition to information given under Item No. 22 (Places of Operations) there is a plan for the complete dredging of the port channel (Agent advises that work was completed in 1978).

JUCARO (and sub-port of Boca Grande):

(1) LOCATION: The port of Jucaro and its sub-port Boca Grande are located on the South coast of Cuba.

Jucaro: Lat. 21° 37′ N., Long. 78° 51′ W.
Boca Grande: Lat. 21° 33′ 09″ N., Long. 78° 40′ 21″ W.

As the characteristics of both the port of Jucaro and its sub-port Boca Grande are almost identical, the information given must be considered to apply for both, unless otherwise indicated.

Boca Grande is located about 15 miles East of Jucaro and is also known as "Baragua" after the former name of "Ecuador" Sugar Mill which ships its production through this port.

Jucaro only handles the exportation of fresh fruits and Boca Grande the exportation of bagged refined sugar and molasses, importation of fuel oil, and coastal trade discharge of fuel oil.

At both, Jucaro and Boca Grande, operations are performed at anchorage because draft at the coast piers is insufficient, being used only to load the barges.

(2) PILOT: Pilots board the vessels at the entrance of Breton Channel or at the entrance of Tunas Channel.

The geographical positions of the places where Pilots board the vessels are as follows:

Breton Channel: At buoy No. 2, located: Lat. 21° 08′ 18″ N., Long. 79° 30′ 24″ W.

Tunas Channel: At buoy No. 1, located: Lat. 21° 31′ 00″ N., Long. 79° 41′ 21″ W.

From either place where Pilots board vessels there is a distance of: 50 miles to Jucaro Anchorage, 64 miles to Boca Grande Anchorage.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: Port can be entered by two different channels:

Breton Channel, which is used by vessels exceeding 22 ft. draft or when coming from the East from Pt. Maisi, and Tunas Channel used by vessels drawing 22 ft. or less or when coming from the West from the Cape of San Antonio.

Entrance and transit through either channel can be effected day or night without the assistance of tugboat, except when weather is rough and may endanger the safety of the pilots launch.

Breton Channel: Its bottom is rocky-sandy and has no turns.

Maximum draft to enter to or sail from this port by this channel is 29 ft. with no length limitations.

Tunas Channel: Its bottom is sandy and its course is straight, without turns.

Maximum draft to enter to or sail from this port through Tunas Channel is 22 ft. with no length limitations.

(4) ANCHORAGES: As all operations at this port are performed at anchorage, see full information under Item No. 22.

(5) TIDAL VARIATION: Tidal variation at this port averages 1 ft. 6 in.

(6) BUNKERS: No bunkers available at this port.

(7) WATER: *(Potable or for boilers):* No water available at this port.

(8) DUNNAGE WOOD/PAPER: No dunnage materials available at this port.

(9) REPAIRS: There is no repair shop at this port.

(10) PORT AUTHORITIES: All Port Authorities are located at Jucaro except Port Doctor who is located at Ciego de Avila.

Authorities use launch service in clearing vessels.

(11) WORKING HOURS:

From Monday to Friday:	0600 – 1000 hrs. – 1200 – 1600 hrs.
Saturday:	0600 – 1000 hrs. – 1200 – 1600 hrs.
Sunday:	No work is performed, but in cases when work is done same periods apply.

(12) PORT OPERATIONAL CAPACITY: Only one vessel can be operated at each port (One at Jucaro and one at Boca Grande).

(13) KIND OF CARGOES HANDLED BY THE PORT: This port only exports bagged refined sugar in 100 kilos jute bags or 50 kilos cotton bags, molasses and fresh fruits.

Fuel oil is discharged either imported or by coastal trade.

(14) TRANSPORTATION: Public means of transportation are passenger trains and buses.

Jucaro has good transportation means, specially to Ciego de Avila, a nearby city located 27 km. inland and on the Central Highway.

From Ciego de Avila it is possible to travel to any part of the country.

From Jucaro to Boca Grande there is a distance of 15 miles and means of transportation is by launch, although occasionally it is possible to travel by road. Travelling time from Jucaro to Boca Grande is, by launch from 2 to 2.5 hours, by road 2 hours.

(15) COMMUNICATIONS: At Jucaro there are the following means of communications: Telephone, telegraph and Post Office.

Communications between Jucaro and Boca Grande is effected through radiotelephony of Jucaro's Port Captaincy.

Masters must send their ETA messages to Jucaro or Boca Grande simultaneously to Mambisas Nuevitas and Mambisas Habana.

(16) MAIL AND PARCELS: Should be sent to our main offices at Havana, from where it will be sent to Jucaro by the quickest means insuring delivery.

(17) AGENCY ADDRESS:

Empresa Consignataria Mambisa,
Agencia Nuevitas,
P.O. Box No. 350,
Puerto Tarafa, Nuevitas,
Prov. de Camaguey.
Telephone: 3-1435 (office),
3-6025 (night).
Telex: 031151.
Cable: Mambisas Nuevitas.

Mambisas Nuevitas Agency also attends at the port of Nuevitas.

Jucaro and Boca Grande are attended by Nuevitas Agency personnel.

Any information about vessels operating at Jucaro or Boca Grande should be requested from our main offices at Havana or to Nuevitas Agency because it is extremely difficult to communicate directly with the Agent attending the vessel. Agents at Jucaro and Boca Grande communicate periodically with Nuevitas Agency which relays the information to our main office.

(18) OPERATIONS AT BAY OR ANCHORAGE: As all operations at Jucaro and Boca Grande are performed at anchorage, see complete information under Item No. 22.

(19) MEDICAL ATTENTION TO CREW MEMBERS: Crew members requiring medical or dental attention are treated at either of the two hospitals in the nearby City of Ciego de Avila, distant 27 km. inland.

(20) BAGS LOADED PER SLING: 16 bags of refined sugar, 50 kilos type, 6 bags of refined sugar 100 kilos type.

(21) EQUIPMENT TO LOAD BULK RAW SUGAR EX-BAGS: As no raw sugar is shipped through this port there is no need for such equipment.

(22) PLACES OF OPERATIONS:

Jucaro:

(a) Anchorage No. 1: Located South of Obispo Cay, 6 miles from the port. Draft 24 ft.

(b) Anchorage No. 2: Located Southeast of Obispo Cay, 7 miles from the port. Draft 27 ft.

(c) Anchorage No. 3: Located 1 mile toward the East of No. 2 Anchorage and 8 miles from the port. Draft 30 ft.

All 3 anchorages have soft mud bottom, and only handle the exportation of fresh fruits, there are no limitations to length of vessels.

Boca Grande:

(d) Anchorage No. 1: Located 3 miles off Boca Grande Firth. Draft 24 ft.

(e) Anchorage No. 2: Located 5 miles off Boca Grande Firth. Draft 30 ft.

Both these anchorages have soft mud bottom.

Kind of cargoes handled. Importation, fuel oil. Exportation, bagged refined sugar, molasses. Coastal trade, discharge of fuel oil.

(23) PORT AUXILIARY EQUIPMENT: The port has the following equipment: 3 tugboats (one 165 h.p., two 200 h.p.); 6 barges (one 170 tons, two 220 tons, three 250 tons).

Barges connections diameter either for fuel oil or molasses: 8 in.

(24) PLAN OR WORKS UNDER WAY FOR IMPROVEMENT OF PORT FACILITIES: None at present.

MANZANILLO (and sub-ports of Ceiba Hueca, Media Luna, Niquero and Pilon): **(See Late Plan)**

(1) LOCATION: Manzanillo is located on the South coast of Cuba, on the Eastern part of Guacanayabo Gulf.

Lat.: 20° 20′ 26″ N. Long.: 77° 07′ 33″ W.

This port owes its importance to the fact of being centred on the sugar zone of the South and West of Oriente Province.

(2) PILOT: *Where Pilot should be taken and distance to Place of Operation:* The Pilots board the vessels at Cape Cruz, located at: Lat.: 19° 50′ 33″ N., Long.: 77° 43′ 33″ W.

On the Cape there is a small town, the pilot's station and a lighthouse.

The lighthouse rises to 113 ft. above sea level and its light is visible up to a distance of 17 miles.

The pilot station communicates with Manzanillo by radiotelephony.

The distance from where the Pilot boards the vessel to Manzanillo is 68 miles through Madrona Channel or 55 miles through Coloradas de Afuera Channel first and next Palomino Channel.

The exact place where Pilot should be taken is: Lat.: 19° 49′ 12″ N. – Long.: 77° 45′ 12″ W.; at this position the vessel is about one mile off the crown of reefs of Cape Cruz.

All vessels calling at Manzanillo or any of its sub-ports (including Pilon) should take Pilot at this place.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: The entrance to the port can be accomplished by two different routes, as explained in Item No. 2 "Pilot", depending on vessel's draft, and through the channels listed below:

Madrona Channel: This channel has some turns, some of them sharp and narrow. In the South channel's mouth is where precautions should be taken because "Windward Shoals" have a marked inclination to the channel.

The bottom is soft mud and sand.

Minimum depth of the channel is 35 ft., precisely at the South channel's mouth, and customarily the draft for entering/sailing is 30 ft., but frequently vessels drawing up to 33 ft. have entered/sailed from this port, leaving in those cases 2 ft. as safety margin.

Palomino Channel: This is an intermediate channel which leads either to Madrona Channel or Coloradas de Afuera Channel.

This channel also has turns, but some are less sharp because the channel is wider than Madrona Channel and the manoeuvres are easier. The average depth is 22–25 fathoms (130–150 ft.) but draft to vessels is limited to those of Madrona or Coloradas de Afuera Channels.

The bottom is rocky.

Coloradas de Afuera Channel: This channel reduces the distance to Manzanillo to only 55 miles, but can only be crossed by vessels drawing 20 ft. or less.

Actually due to lack of navigational signals and marks, this channel is temporarily out of use.

The transit of the above described channels can be performed without tugboat assistance.

There is another channel in this port which is listed as a matter of information:

Balandras Channel: This is an intermediate channel leading to Coloradas de Afuera Channel but can be crossed only by vessels drawing maximum 14 ft.

Because of the large tonnage of vessels actually operating in Cuba and also due to lack of proper navigational signals, this channel is not used.

Entrance to the Port of Manzanillo: At the sight of Cay Perla vessels drawing 24 ft. or less enter the Gua Passage (between Cay Perla and Gua Cays), and those drawing more than 24 ft. enter outward of Cay Perla.

For both routes the string of Manzanillo Cays, about 6 miles long, can be used as a visual orientation point.

(4) ANCHORAGES: All the operations in Manzanillo are performed at anchorage since there is not enough depth near the coast and therefore anchorages are considered operation places, of which, full information is available under Item 22(ii), (a), (b), (c) and (d).

(5) TIDAL VARIATION: The average tidal variation at this port is 1 ft. 6 in.

(6) BUNKERS: No bunkers are available at this port.

(7) WATER *(Potable or for Boilers):* No water is available at this port.

(8) PAPER/WOOD DUNNAGE: Vessels nominated for loading sugar in Manzanillo or any of its sub-ports must arrive supplied with wood dunnage because in the Manzanillo Jurisdiction it is extremely difficult to obtain wood dunnage.

Dunnage paper can be supplied if requested in advance.

(9) REPAIRS: There is a machine and foundry shop, under control of Industry Ministry, where light repairs to vessels' machine parts can be performed, which has appropriate equipment for this work.

It should be pointed out that the performance of these works is subject to approval by the management of said shop.

(10) PORT AUTHORITIES: All Port Authorities are located at Manzanillo. Vessels can proceed directly to any of the sub-ports (after having taken Pilot at Cape Cruz as indicated under Item No. 2 – Pilot) and providing an early advice of ETA has been sent by the Master.

The regulations of Manzanillo Jurisdiction provide that all vessels should call at Manzanillo for clearance, but if proper and early advice of ETA is accomplished by Masters, the Authorities travel to the sub-port to clear the vessel.

(11) WORKING HOURS:

From Monday to Friday: 0700 – 1100 hrs. – 1300 – 1700 hrs.
Saturday: 0700 – 1100 hrs.

(12) PORT'S OPERATIONAL CAPACITY: Two vessels can be operated simultaneously:

One loading or discharging dry cargo and a tanker discharging petroleum products.

(13) KIND OF CARGOES HANDLED BY THE PORT:

Importation: Bagged fertilisers, jute bales and general cargo.
Exportation: Bagged raw sugar.
Coastal Trade: Kerosene, gasoline and diesel oil (discharge).

(14) TRANSPORTATION: Usually transportation between Manzanillo and its sub-ports is performed by road, although sometimes launches are used.

The distance between Manzanillo and the sub-ports is:

	Miles by Sea	*Km. by Road*
Ceiba Hueca:	15	32
Media Luna:	23	45
Niquero:	45	79
Pilon:	90	130

Transportation by road to Pilon is by paved road up to 15 km. from Niquero, thence by embankment road for about 40 km.

During the rainy season the appropriate vehicle to travel to Pilon is a jeep.

The paved road to Pilon is now under construction.

(15) COMMUNICATIONS: There is direct communication between Manzanillo and its sub-ports by telephone or telegraph.

In Manzanillo there is a long distance telephone service, radiograms, telegrams and Post Office.

Ocean-going vessels navigating to Cuba can communicate by radiotelegraphy, contacting "CLA Havana" station, which relays the messages to Manzanillo by telex.

Vessels navigating in Cuban waters can communicate any message by means of radiotelephony, contacting "CLM Coastal Network", Manzanillo. CLM station relays the messages to Manzanillo Agency by direct telephone call.

The Manzanillo Agency is connected to the National Telex System and the Manzanillo number is 02321. This is the quickest method of communication with Manzanillo Agency.

ETA messages should be given simultaneously to "Mambisas Manzanillo" and "Mambisas Habana".

(16) MAIL AND PARCELS: All mail should be sent by airmail. Parcels and spare parts for vessels, should be sent by airmail or airfreight, depending on size and weight.

(17) AGENCY ADDRESS:

Empresa Consignataria Mambisa,
Sairiol No. 243 e/Dr. Codina y Saco,
Apartado No. 22,
Manzanillo, Prov. de Oriente.
Cable Address: Mambisas Manzanillo.
Telex: 02321 – Telephones: 2533 (Office) 2430 (Night).

(18) OPERATIONS AT BAY OR ANCHORAGE: All operations performed at this port are at anchorage.

(19) MEDICAL ATTENTION TO CREW MEMBERS: Crew members requiring medical care are attended at Manzanillo Hospital where, if necessary, they can be hospitalised for proper treatment.

(20) BAGS LOADED PER SLING: From 8 to 12 bags of raw sugar of 100 kilos each. In cases when winches or cranes work slowly, the number of bags is increased.

(21) EQUIPMENT FOR LOADING BULK RAW SUGAR EX-BAGS: At the moment the port does not have this kind of equipment, but it is intended to furnish it in the near future.

(22) PLACES OF OPERATION. DESCRIPTION: As explained before, this port does all its operations at several anchorages, by means of barges. In order to have a complete idea of the port, the places of operation are divided into:

(i) *Places of Operation of Barges:* At sugar mill "La Demajagua", town of Calicito, at a distance of 2 km. from the sugar mill, there is a small pier with a draft of 10 ft. where the barges are loaded with bagged raw sugar for vessels operating at Manzanillo.

At sugar mill "Francisco Castro Ceruto", town of Campechuela, at 500 m. from the sugar mill there is a pier with a draft of 12 ft. where barges are loaded with bagged raw sugar for vessels operating at Manzanillo or Ceiba Hueca.

For the discharge of barges with import cargoes the coastal pier of Manzanillo Fishing Port is used, about 3 km. distance from the city.

Bulk cargoes are not handled by this port except the discharge of petroleum products.

(ii) *Places of Operation of Vessels:*

(a) Inner Anchorage No. 1: This anchorage is located as follows:
Lat.: 20° 21′ 54″ N. – Long.: 77° 08′ 24″ W.

There is no length limitation for vessels and the official maximum draft is 24 ft.

Distance from the shore is about 1 mile and the transportation means are the tugboats of stevedore enterprise Terminales Mambisas.

The cargo handled is: *Importation:* General cargo. *Exportation:* Bagged raw sugar.

(b) Outward Anchorage No. 2: This anchorage is located as follows:
Lat.: 20° 22′ 36″ N. – Long.: 77° 08′ 40″ W.

There is no length limitation for vessels and the official maximum draft is 29 ft. – 30 ft.

Distance from shore is about 2 miles and the transportation means are the tugboats of stevedore enterprise Terminales Mambisas.

The cargo handled is: *Importation:* General cargo. *Exportation:* Bagged raw sugar.

(c) Outward Anchorage No. 3: This anchorage is located as follows:
Lat.: 20° 23′ 30″ N. – Long.: 77° 09′ 18″ W.

There is no length limitation for vessels and the official maximum draft is 33 ft.

Distance from shore is about 3.5 to 4 miles and the transportation means are the tugboats of stevedore enterprise Terminales Mambisas.

The cargo handled is: *Importation:* General cargo. *Exportation:* Bagged raw sugar.

(d) ICP Submarine Pipe-Line Anchorage: The submarine pipe-line anchorage is located as follows:
Lat.: 20° 21′ 12″ N. – Long.: 77° 10′ 21″ W.

There is no limitation to the length of vessels operating at this place and maximum official draft is 28 ft.

Distance from shore is about 2 miles and the transportation means are the tugboats of the stevedore enterprise Terminales Mambisas.

The vessel is secured to 4 buoys and the mooring is performed by Terminales Mambisas tugboats and personnel.

The prevailing winds are those of the first quadrant.

The pipe-line is 8 in. (203 mm.) in diameter and connection is 6 in. (152 mm.).

The cargo handled is: Discharge of kerosene, gasoline and diesel oil.

(23) AUXILIARY EQUIPMENT OF THE PORT: The port has 6 barges of 200 tons cargo capacity, 2 of 140 tons and 1 of 100 tons, this last one having a derrick capable of lifting up to 2 tons.

There are 3 tugboats servicing the port:

"Punta Morrillo" the biggest and most powerful, capable of towing 5 barges, "Aracelio Iglesias" and "Cdte. Turcios Lima" which can tow 3 barges each.

These tugboats are also used to transport shore/vessel personnel from shore to anchorage or vice versa.

There are no cranes or pay loaders in the port.

(24) PLAN OR WORKS UNDER WAY FOR IMPROVEMENT OF PORT FACILITIES: At this moment no works are being carried out in order to enlarge or improve port facilities but projects are undergoing investigation to this effect.

(a) SUB-PORT OF CEIBA HUECA:

(1) LOCATION: This port is located on the South coast of Cuba, at a distance of 15 miles S.W. of Manzanillo. Lat. 20° 13′ 24″ N., Long. 77° 19′ 26″ W.

Through this port the production of 3 sugar mills is exported: "Inidio Diaz M.", "Francisco Castro Ceruto" and "La Demajagua".

Also small tankers discharge fuel oil as coastal trade.

(2) PILOT: Pilots board the vessels in the vicinity of Cape Cruz at the following position: Lat. 19° 49′ 12″ N., Long. 77° 45′ 12″ W. (Please see Item No. (2) under Manzanillo).

From the place where Pilots board the vessels to Ceiba Hueca pier there is a distance of 46 miles, through Madrona Channel.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: Entrance to port is effected through Madrona Channel (see Item No. (3) under Manzanillo).

After passing Fustete Bank, Pt. Martillo and the sugar mill chimney are the best reference points.

Limitations to vessels are in keeping with the operation to be performed.

Vessels loading sugar have no other limitations than those imposed by Madrona Channel: No limitation as to length and max. draft 33 ft.

Vessels discharging fuel oil docked at the pier: max. length 325 ft. and max. draft 19 ft.

Vessels loading molasses: Length limitation of 500 ft. and max. draft 19 ft. (See Item No. (22) Place of Operation).

(4) ANCHORAGE: As this port is an open bay there is ample anchorage space.

Due to the actual conditions of Ceiba Hueca pier, sugar loading operations are performed in the bay. (See Item No. (18)).

(5) TIDAL VARIATION: Average is 1ft. 6 in.

(6) BUNKERS: No bunkers available at Ceiba Hueca.

(7) WATER: *(Potable or for Boilers):* Only very small quantities can be supplied to vessels due to low water pressure in the pipe-line.

Water supplied while docked – Price $1.50 per ton. Rate: 1 t.p.h.

(8) PAPER/WOOD DUNNAGE: (See Item No. (8) under Manzanillo).

(9) REPAIRS: There is no repair shop at this port.

(10) PORT AUTHORITIES: (See Item No. (10) under Manzanillo). Port Authorities travel by road to clear the vessels at Ceiba Hueca.

Under Cuban Custom Laws and Regulations, Ceiba Hueca is a sub-port of Manzanillo.

(11) WORKING HOURS:

From Monday to Friday: 0700 – 1100 hrs. – 1300 – 1700 hrs.
Saturday: 0700 – 1100 hrs.

(12) PORT OPERATIONAL CAPACITY: Two vessels can be operated simultaneously: One loading sugar and another discharging fuel or loading molasses at the pier.

(13) KIND OF CARGOES HANDLED BY THE PORT: Exportation: Raw bulk sugar and molasses. Coastal Trade: Discharge of fuel oil.

(14) TRANSPORTATION: Usual transportation from Ceiba Hueca to Manzanillo is by road. Distance between Manzanillo/Ceiba Hueca: 32 km. (See Item No. (14) under Manzanillo).

(15) COMMUNICATIONS: There is day and night telephone communication and telegraph service from 0600 to 1800 hrs. (See Item No. (15) under Manzanillo).

(16) MAIL AND PARCELS: (See Item No. (16) under Manzanillo).

(17) AGENCY ADDRESS: (See Item No. (17) under Manzanillo).

The port of Ceiba Hueca is attended by Manzanillo Agency personnel.

(18) OPERATIONS AT BAY OR ANCHORAGE: The pier is used only to dock small tankers discharging fuel oil, or larger ones at the head loading molasses.

The anchorage is located at about 1 mile N.W. of the pier.

The bottom is soft mud and allowable draft is 33 ft.

(19) MEDICAL ATTENTION TO CREW MEMBERS: Crew members requiring medical attention are treated at the Polyclinic of the nearby town of Campechuela.

When hospitalisation or specialised medical care is required, patients are sent to Manzanillo Hospital.

(20) EQUIPMENT TO LOAD BULK RAW SUGAR: The port has no such equipment.

(21) PLACES OF OPERATIONS: As Ceiba Hueca pier is in bad condition, it is only used currently to dock small tankers (325 ft. length) to discharge fuel oil, or to load molasses (max. 500 ft. length) across the head of the pier, securing ship to 2 mooring buoys port side and 2 starboard side.

(a) *Indio Diaz Machado Pier* (Formerly Ceiba Hueca Pier):
Length 130 m. (426 ft.), draft 19 ft.
Discharge of fuel oil: Connection 8 in. diameter.
Loading of molasses: Pipe-line 16 in., 2 connections 8 in. each.

(b) *Ceiba Hueca Anchorage:* Located at 1 mile N.W. of pier.
Max. draft allowed is 33 ft.
The bottom at anchorage is soft mud.

(22) PORT AUXILIARY EQUIPMENT: None.

(23) PLAN OR WORKS UNDER WAY FOR IMPROVEMENT OF PORT FACILITIES: Raw bulk sugar loaded by mechanical equipment.

(b) SUB-PORT OF MEDIA LUNA:

(1) LOCATION: This port is located on the South Coast of Cuba at about 23 miles Southwest of Manzanillo. Lat. 20° 10′ 30″ N., Long. 77° 26′ 25″ W.

For description purposes, Media Luna is located in between the ports of Niquero in the Southwest and Ceiba Hueca to the Northwest and loading at anchorage is effected at about 1.75 miles off Pt. Cocal.

It is an open bay and sometimes the winds and swells interrupt the loading operation, specially from April to November, when it rains frequently, usually early in the afternoon; there are scanty tropical storms.

Through this port is exported the production of the sugar mill Juan M. Marquez the largest of the Manzanillo region.

Also, on occasions, sugar mills Inidio Diaz and Francisco Castro Ceruto ship some of their production through Media Luna.

(2) PILOT: (See Item No. (2) under Manzanillo). Pilots board the vessels at Cape Cruz.

From the place where Pilots board the vessels to Media Luna Anchorage it is a distance of 40 miles, by Madrona Channel.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: (Please see Item No. (3) under Manzanillo information up to Fustete Bank).

The most conspicious points for visual orientation, after passing the Fustete Bank, are: Pt. Manacal, the chimneys of sugar mill Juan M. Marquez and the molasses tanks on the coast.

There is no limitation on vessel length or draft other than those imposed by the passing of Madrona Channel: Max. draft 33 ft. (See Item No. (3) under Manzanillo).

(4) ANCHORAGE: All loading operations are performed at anchorage (See Item No. 22).

(5) TIDAL VARIATION: There is an average of 1 ft. 6 in. between high and low tides.

(6) BUNKERS: No bunkers available at Media Luna.

(7) WATER: No water available at this port. (If necessary vessels can take water alongside Niquero pier about 20 miles to the Southwest, taking into consideration Niquero pier draft of 23 ft., see Item No. (7) under Niquero).

(8) PAPER/WOOD DUNNAGE: (See Item No. (8) under Manzanillo).

(9) REPAIRS: There is no repair shop at this port.

(10) PORT AUTHORITIES: (See Item No. (10) under Manzanillo).

Means of transportation used by Port Authorities to clear the vessels at Media Luna are: by automobile from Manzanillo to Media Luna, thence to the vessel by launch.

Under Cuban Customs laws and regulations, Media Luna is a sub-port of Manzanillo.

(11) WORKING HOURS:

From Monday to Friday: 0700 – 1100 hrs.–1300 – 1700 hrs;
Saturdays: 0700 – 1100 hrs.

The gangs which work on board the ships are supplied by the ports of Manzanillo and Niquero.

Personnel for loading the barges at pier are from Media Luna.

(12) PORT OPERATIONAL CAPACITY: Only one vessel can be operated as the sugar mills which ship through this port are able to transport to Media Luna only from 800 to 900 tons daily.

Juan M. Marquez from 600 to 650 tons and balance from sugar mills Inidio Diaz and/or Francisco Castro Ceruto.

(13) KIND OF CARGOES HANDLED BY THE PORT: Only bagged raw sugar in 100 kilo bags.

(14) TRANSPORTATION: Transportation between Media Luna and Manzanillo usually takes place by road, although occasionally launch can be used.

Distance between Media Luna and Manzanillo is 23 miles by sea and 45 km. by road.

There is a regular bus line from Manzanillo to Media Luna and travelling time is 1 hour.

(15) COMMUNICATIONS: There is direct telephone service with Manzanillo, also telegraph and post office.

(For other kind of messages, please see Item No. (15) under Manzanillo).

(16) MAIL AND PARCELS: (See Item No. (16) under Manzanillo).

(17) AGENCY ADDRESS: (See Item No. (17) under Manzanillo). Media Luna is attended by Manzanillo Agency personnel.

(18) OPERATIONS AT BAY OR ANCHORAGE: All operations performed at anchorage. (See detailed information Item No. (22) under Manzanillo).

(19) MEDICAL ATTENTION TO CREW MEMBERS: There is a hospital and also a polyclinic at Media Luna where sick crew members receive medical or dental care.

Whenever hospitalization or specialised medical care is required, patients are sent to Manzanillo Hospital.

(20) BAGS LOADED PER SLING: From 8 to 12 bags of raw sugar, 100 kilos each (When winches or cranes are slow the amount of bags is increased).

(21) EQUIPMENT FOR LOADING BULK RAW SUGAR EX-BAGS: This port does not have this kind of equipment.

(22) OPERATION PLACE: As stated before, vessels load at anchorage.

Media Luna Anchorage: There is no limitation to vessel's length and max. draft is 33 ft.

Anchorage is located in between Pt. Cocal and Pt. Manacal, but closer to the first and about 1.75 miles from shore.

Means of transportation from anchorage to shore and vice-versa are the launches and tugs of the stevedores enterprise.

Sugar is loaded on railroad cars of non standard gauge at the sugar mill which is less than 1 km. from the barge pier located at Point Cocal.

(23) PORT AUXILIARY EQUIPMENT: This port does not have auxilliary equipment. When needed it is brought from Manzanillo.

(24) PLAN OR WORKS UNDER WAY FOR IMPROVEMENT OF PORT FACILITIES: None at the present time.

(c) SUB-PORT OF NIQUERO:

(1) LOCATION: This port is located on the South coast of Cuba, at about 45 miles S.W. of Manzanillo.

This port lies 5 km. S.W. of the town of Niquero and the pier is located at Pt. Cachones.

From the pier to the sugar mill Roberto Ramirez Delgado, distant 5 km. inland, runs a non-standard railroad track by which flows all the sugar cargo to the pier.

Although Niquero mainly ships the sugar produced by sugar mill Roberto Ramirez Delgado occasionally some import cargo is handled.

(2) PILOT: Pilots board the vessels in the vicinity of Cape Cruz, at the following position: Lat. 19° 49′ 12″ N., Long. 77° 45′ 12″ W.

From this place to Niquero pier there is a distance of 36 miles (through Madrona Channel). (See Item No. (2) under Manzanillo).

(3) TIDAL VARIATION: There is an average of 1 ft. 6 in. between low and high tides.

(4) BUNKERS: No bunkers available at Niquero.

(5) WATER: *(Potable or for Boilers):* Supplied alongside pier by means of railroad tank-cars at an average of 40–50 tons daily.

As water delivery sometimes interferes with loading operations, delivery must be arranged to take place at times when vessel is not working. Price per ton: $3.00.

(6) PAPER/WOOD DUNNAGE: (See Item No. (8) under Manzanillo).

(7) REPAIRS: There is no repair shop at this port.

(8) PORT AUTHORITIES: (See Item No. (10) under Manzanillo).

Means of transportation used by Port Authorities to clear the vessels at Niquero are usually automobile and sometimes launch.

Under Cuban Customs Laws and Regulations, Niquero is a sub-port of Manzanillo.

(9) WORKING HOURS: From Monday to Friday: 0700 – 1100 hrs. – 1300 – 1700 hrs. Saturdays: 0700 – 1100 hrs.

(10) PORT OPERATIONAL CAPACITY: Although Niquero pier is capable of working 2 vessels, 1 docked to each side, the sugar delivery capacity of sugar mill is only sufficient to operate 1 vessel, unless overtime is worked, both at the sugar warehouses and at the pier.

Customarily only 1 vessel is operated.

The port personnel consist of 3 gangs but when required, extra personnel is sent from Manzanillo.

(11) KIND OF CARGO HANDLED BY THE PORT: Mostly raw bagged sugar (100 kilos jute bags) and occasionally import cargo such as bagged fertilisers, jute bales, railroad sleepers, etc.

(12) TRANSPORTATION: Transportation between Niquero and Manzanillo is by road. Distance is 79 km. and travelling time about 2 hours.

There is a regular bus-line Niquero-Manzanillo, with 5 departures daily at both ends, also 1 daily departure Niquero-Havana.

(For transportation from Manzanillo to Havana or any other place in Cuba, please see Item No. (14) under Manzanillo).

As the pier is 5 km. away from the town of Niquero, the sugar mill has established, specially for crew members, a regular service of railroad self-propelled cars at the price of $15.00 per round trip.

(13) COMMUNICATIONS: There is a long distance telephone service between Niquero and Manzanillo and communication can be established from the pier with the help of the local telephone service operated by the sugar mill.

(14) MAIL AND PARCELS: (See Item No. (16) under Manzanillo).

(15) AGENCY ADDRESS: Niquero is attended by Manzanillo Agency personnel and our enterprise has no offices at Niquero. (See Item No. (17) under Manzanillo).

(16) OPERATIONS AT BAY OR ANCHORAGE: All operations at this port are performed alongside pier.

Vessels remain at anchorage only when waiting for berth.

(17) MEDICAL ATTENTION TO CREW MEMBERS: All crew members requiring medical or dental attention are treated at Niquero Hospital, where they can be hospitalised if necessary.

(18) BAGS LOADED PER SLING: From 8 to 12 bags of raw sugar, 100 kilos each (when winches or cranes are slow, the amount of bags is increased).

(19) EQUIPMENT FOR LOADING BULK RAW SUGAR EX-BAGS: The port does not have this equipment.

(20) PLACE OF OPERATION: The channel for approaching the pier runs at a position of 295° and the pier position is 305°. Due to this fact and also taking in consideration that the manoeuvring basin around and in front of the pier is only 210 m. wide, the use of both sides of pier simultaneously must be determined by certain conditions and always one of the vessels has to be docked stern to shore.

The pier is located at Point "Cachones".

Draft alongside is 25 ft. 4 in. and official draft for operation is 23 ft.

Along the pier run 3 non standard railroad tracks: 1 at each side and another through the centre and there are 2 mooring buoys to help docking the ship, one at each side.

Niquero Pier: Length 160 m. (426 ft.), width 12 m. (40 ft.), max. vessel length 525 ft., draft actual 25 ft. 4 in. Official to perform operations 23 ft.

The pier is geographically orientated from East to West, vessels berthing North and South.

Water available. (See Item No. (5) Water).

No bunker available.

(21) PORT AUXILIARY EQUIPMENT: This port has no auxiliary equipment.

(22) PLAN OR WORKS UNDER WAY FOR IMPROVEMENT OF PORT FACILITIES: None at the present time.

(d) SUB-PORT OF PILON (Ensenada de Mora):

(1) LOCATION: The port of Pilon is located on the South coast of Cuba: Lat. 19° 54′ 28″ N., Long. 77° 18′ 58″ W.

This port is located at Ensenada de Mora and is known by either name but mostly as Pilon.

It is used for the exportation of the production of sugar mill Luis Enrique Carracedo formerly known as Cabo Cruz or Pilon.

(2) PILOT: *Where Pilot should be taken and distance to Place of Operation:* The Pilots board the vessels in the vicinity of Cape Cruz: Lat. 19° 49′ 12″ N., Long. 77° 45′ 12″ W.

(For complete details see Item No. (2) under Manzanillo).

From the place where Pilots board the vessels to Pilon pier there is a distance of 34 miles.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: From Cape Cruz to the mouth of Pilon port is open sea.

From the mouth of the port to Pilon pier the entrance is through a somewhat narrow channel of rocky bottom up to the Shoals of Pajaro Cay, and from then on the bottom is muddy.

The channel has three turns which must be taken with some precautions.

The max. draft permitted to vessels for entering and sailing is 20 ft. and entrance must be performed only during daylight.

Vessels length is limited as follows: For dry cargo vessels docking to the pier to load bagged sugar 450 ft. – 470 ft.

The docking capacity of pier is about 300 ft., remaining out of the pier the balance of vessel's length, which is moored to a solid dolphin and a mooring buoy.

Max. length for tankers is 500 ft. and they effect the loading operation at the head of the pier.

The most reliable points of visual orientation while approaching Pilon are:

Aguada Peak, which rises 1,248 ft. above sea level, located about 2.5 miles N.E. of Pilon Port, and once nearer the port, Hicacos Point and the stack of the sugar mill.

(4) ANCHORAGE: There is an area for anchorage 23 ft. deep, but because it is occasionally used as an operation place it is fully detailed under Item No. 22 (b).

(5) TIDAL VARIATION: Tidal variation at this port is 1 ft. 6 in.

(6) BUNKERS: No bunkers available at this port.

(7) WATER *(Potable or for Boilers):* Can be obtained with some difficulty, when docked to pier.

Price $1.50 per ton. Maximum rate attained daily is about 50 tons.

(8) PAPER/WOOD DUNNAGE: Vessels nominated for loading at Pilon must arrive supplied with all dunnage material required because dunnage wood is impossible to obtain and paper can be supplied from Manzanillo, but being so far apart, it is a costly operation.

(9) REPAIRS: There is no repair shop at this port.

(10) PORT AUTHORITIES: After having taken Pilot on board at Cape Cruz, vessels may proceed directly to Pilon, where the Authorities clear the vessel.

(Please see Item No. (10) under Manzanillo information, for complete information).

Under Cuban Customs Laws and Regulations, Pilon is a sub-port of Manzanillo.

(11) WORKING HOURS:

From Monday to Friday:	0700 – 1100 hrs. – 1300 – 1700 hrs.
Saturday:	0700 – 1100 hrs.
Sunday:	No work performed.

(12) PORT OPERATIONAL CAPACITY: Only 1 vessel can operate at this port at a time.

(13) KIND OF CARGOES HANDLED BY THE PORT: Exportation: Bagged raw sugar and molasses. Coastal trade: Occasionally general cargo.

(14) TRANSPORTATION: Transportation to and from Pilon is rather difficult. The best advisable means are as follows:

Six daily departures of buses are scheduled from Pilon to Media Luna, and vice versa: 0500 – 0700 – 1000 – 1200 – 1500 and 1900 hrs.

At Media Luna there are bus departures which combine with those of Pilon, to Manzanillo.

(See Item No. (14) under Manzanillo information).

(15) COMMUNICATIONS: There is a telegraph service and also a telephone service, local and long distance.

ETA messages should be given simultaneously to Mambisas Manzanillo and Mambisas Habana.

(16) MAIL AND PARCELS: Must be sent to Manzanillo Agency, mail or by air, and parcels by airmail or airfreight.

(17) AGENCY ADDRESS: (See Item No. (17) under Manzanillo).

The port of Pilon is attended by personnel of Manzanillo Agency.

Consignataria Mambisa has no office at Pilon.

(18) OPERATIONS AT BAY: (See Item No. 22 (b) for full details).

(19) MEDICAL ATTENTION TO CREW MEMBERS: Medical attention and dental care are rendered at Pilon Hospital.

(20) BAGS LOADED PER SLING: 6 bags of raw sugar of 100 kilos each.

(21) EQUIPMENT FOR LOADING BULK RAW SUGAR EX-BAGS: At the moment the port lacks this equipment but there are plans to furnish same in the near future.

(22) PLACES OF OPERATION/DESCRIPTION: Operations at this port are performed at a pier and occasionally at anchorage.

The pier is of wooden construction, and at the moment somewhat weakened and not properly cared for.

Ships docking alongside cannot work all their hatches at a time, and it is necessary to turn the vessel around to complete the loading at the allowable draft.

It has double non-standard gauge railroad tracks which run up to the sugar mill, located less than 0.25 mile from the pier.

(a) Pilon Pier: Length 150 m. (but only last 300 ft. used). Draft 20 ft., max. length of vessels permitted 450 ft. – 470 ft. (dry cargo), 500 ft. (tankers).

Tanker Information: Molasses: 12 in. pipeline, 1 connection 8 in. diameter.

(b) Pilon Anchorage: Draft 23 ft., located 0.5 mile from pier.

Loading is performed by means of barges. There is no length limitations to vessels.

Anchorage operations are very unusual and when performed barges and tugboats are brought from Manzanillo.

Cargo handled: Same as Pilon Pier.

(23) AUXILIARY EQUIPMENT OF THE PORT: Port has no auxiliary equipment. All necessary equipment, when needed, are brought from Manzanillo.

(24) PLAN OR WORKS UNDER WAY FOR IMPROVEMENT OF PORT FACILITIES: At this moment no works are being carried out in order to improve port facilities.

MARIEL (and sub-ports of Bahia Honda, Cabanas and Santa Lucia): (See Late Plans)

(1) LOCATION: Mariel is located on the North coast of Cuba, about 46 miles West of Havana: Lat. 23° 01′ N., Long. 82° 46′ W.

This is an ample landlocked harbour, about 2 miles long, North to South, and well sheltered.

In the harbour, depths vary from 30 ft. to 48 ft.

(2) PILOT. *Where Pilot should be taken and distance to Places of Operations:* Pilots board the vessels at 1 mile off buoy No. 1, which marks the port entrance.

Vessels nominated for operations at Bahia Honda and Cabanas must pick up Pilot at this same place.

Distance from place where Pilot boards the vessel to:

Pier Unit No. 1:	1.25 miles.
Anchorage:	2.50 miles.
Pier Unit No. 2:	2.75 miles.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: The entrance channel, where buoy No. 1 is situated, is a sandbank with 50 – 55 – 60 ft. depths and vessels steer on one course continuing up to No. 3 buoy, which is situated in 32 ft. of water on rocky bottom, but having close by a depth of 95 ft., and continuing with same course up to No. 5 buoy, situated in 30 ft. of water on sand, having close by a depth of 33 ft. This channel is approximately 328 ft. wide.

Max. draft with which vessels can enter to or sail from this port is 30 ft., and a max. length of 610 ft., but operational draft is 29 ft.

Vessels can enter/sail during day and night. This matter should be checked in each case sufficiently in advance of vessel's arrival, as on occasions the buoys are missing, thus making it impossible for vessels to enter during night time.

It is not necessary to wait for slack or favourable tide to enter or to sail from port.

No tugboat is required, except in case of tankers of between 532 ft. and 610 ft., in which case tugboat assistance is required.

(4) ANCHORAGES: The port has two anchorages:

General Anchorage: Draft 27 ft. Swinging area: 450 m.

Punta Gorda Anchorage: Draft 36 ft. Swinging area: 340 m.

(5) TIDAL VARIATIONS: Tidal variation at this port averages 1 ft. 4 in.

(6) BUNKERS: No bunkers available at this port.

(7) WATER: (Potable or for boilers): Can be supplied only at Unit No. 2 berth by means of tank-truck with a capacity of 5 tons. Average delivery, 50 tons daily.

In cases of extreme emergency, vessel can be supplied by pipe-line at Cement Plant Pier, if the need is advised well in advance.

Price by tank-truck or at pier: $2.50 per ton.

(8) PAPER/WOOD DUNNAGE: Dunnage materials are available if ordered well in advance.

(9) REPAIRS: There is no repair shop at this port.

(10) PORT AUTHORITIES: All port authorities are located within town limits or at the Port of Mariel.

To clear vessels at Cabanas, Bahia Honda, and Santa Lucia, authorities travel from Mariel by car.

(11) WORKING HOURS: From Monday to Saturday: 0700 – 1300 hrs., 1300 – 1900 hrs., 1900 – 0100 hrs.

(12) PORT OPERATIONAL CAPACITY: Port can operate 6 vessels simultaneously as follows:

Four dry cargo vessels discharging or loading.
One tanker discharging fuel oil.
One loading bulk raw sugar.

(13) KIND OF CARGOES HANDLED BY THE PORT:

Importation: Bulk Fertilisers, General Cargo, Lumber, Fuel Oil, etc.
Exportation: Bulk Raw Sugar, occasionally General Cargo.
Coastal Trade: Fuel Oil, occasionally General Cargo, Cement.

(14) TRANSPORTATION: Although close to Havana, transportation to and from Mariel by public means of communications is rather difficult.

Best advisable means of transportation is by taxi, which can be arranged through the Agency.

The following are distances by road from Mariel to:

Cabanas	57 km.	by car	– 1 hour 20 minutes
Bahia Honda	72 km.	„ „	– 2 hours
Santa Lucia	250 km.	„ „	– 4 to 5 hours
Havana	43 km.	„ „	– 45 minutes

(15) COMMUNICATIONS: Mariel's means of communication are: Telephone, Telegraph and Post Office.

Our Mariel Agency is connected to the National Telex System, which is the quickest means of communication with Mariel.

Vessels navigating to Cuba can communicate with Mariel Agency through "CLA" Havana Radio Station which relays the messages promptly to Mariel.

Masters must send their ETA messages simultaneously to "Mambisas Mariel" and "Mambisas Habana".

(16) MAIL AND PARCELS: Should be sent to our Main Offices at Havana, from where it will be reforwarded to Mariel by quickest means deemed to ensure prompt delivery.

(17) AGENCY ADDRESS: Consignataria Mambisa, Agencia Mariel, Ave. 65 No. 12411 entre 124 y 126, Apartado No. 5, Mariel. Tel. 63 (office), 69 (night). Telex: 051110. Cable: "Mambisas Mariel".

Pilot works VHF on Channel 16.

Mariel Agency also attends the ports of Bahia Honda, Cabanas and Santa Lucia.

(18) OPERATIONS AT BAY OR ANCHORAGE: No operations at bay or anchorage are performed at this port.

(19) MEDICAL ATTENTION TO CREW MEMBERS: There is no hospital at this port.

Crew members requiring medical care are treated at Comandante Fajardo Hospital, at Havana, where they can be hospitalised if necessary. Cases requiring dental care are attended at 10 de Octubre Dental Clinic, also at Havana.

(20) BAGS LOADED PER SLING: 9 bags, 100 kilos each of raw sugar.

(21) EQUIPMENT TO LOAD BULK RAW SUGAR EX-BAGS: The port does not have this equipment.

(22) PLACES OF OPERATIONS: All places of operation at this port are located on the East coast of the bay: Unit No. 1 close to the port entrance; Cement Plant pier located just in front of Pt. Gorda and Unit No. 2 located at the North of the town of Mariel.

All operations at Mariel piers are effected by means of trucks.

(a) Unit No. 1, Berth No. 2 (N.W.): Length 134 ft., max. draft allowed 22 ft. Used mostly for general cargo and bulk fertiliser.

No bunkers or water available.

(b) Cement Plant Pier: Length: 544 ft. Draft: Vessels with a length under 500 ft. can dock with a draft of 29 ft. even keel.

This pier is used only to discharge fuel oil destined either for the Cement or the Thermoelectric Plants.

Vessels over 500 ft. and up to 610 ft. can enter with a draft of 27 ft. fore and 29 ft. aft. Assistance of a large tugboat (850 h.p.) or 2 smaller ones is necessary for vessels exceeding 532 ft. and up to 610 ft. length.

Water available on exceptional occasions.

No bunker available.

Tanker information: Fuel Oil: 1×8 in. diameter.

(c) Unit No. 2: This installation is located at the North side of the town of Mariel.

It consists of 3 berthing spaces, that is, a pier 607 ft. long by 267 ft. wide, built of concrete, but earth filled and not properly paved.

Berth No. 5 (N.E.): Draft: 21 ft. fore and 23 ft. aft. Length: 607 ft.
Berth No. 6 (N.W.): Draft: 25 ft. fore and 27 ft. aft. Length 267 ft.
Berth No. 7 (S.E.): Draft 29 ft. even keel – Length: 607 ft.

Cargo handled by this unit: Bulk fertilisers, general cargo and lumber.

Water available by tank-truck.

No bunkers available.

(23) PORT AUXILIARY EQUIPMENT: This port has no auxiliary equipment.

(24) PLANS OR WORKS UNDER WAY FOR IMPROVEMENT OF PORT FACILITIES: None at the present time.

A new plant for shipping bulk raw sugar is operating at new pier, draft 30 ft.

(a) SUB-PORT OF BAHIA HONDA:

(1) LOCATION: This port is located on the North coast of Cuba: Lat. 22° 59′ N., Long. 83° 10′ W.

Bahia Honda harbour is nearly circular in shape and over 2 miles in diameter.

Its centre and shores are partially obstructed by coral reefs, but there is ample room for vessels to lie at single anchor.

Bahia Honda is the shipping port for Harlem sugar mill, formerly Bahia Honda.

(2) PILOT: *Where Pilot should be taken and distance to Place of Operation:* Pilots should be taken at Mariel (see Mariel – No. 2).

From the place where Pilots board the vessels to Bahia Honda pier there is a distance of 21 miles.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: The port is entered between Pt. Balandro on the West and Morrillo Fort on the East side, 0.75 miles apart. Shoals extend off these points.

The entrance channel has sandy bottom by Eastern side and rocky by Western side. It is approximately 150 m. wide up to Corojal Anchorage and is navigable on one course.

No tugboat is required for entry/sailing manoeuvres.

The following measures must be observed to enter to or sail from the port of Bahia Honda:

(i) Vessels must enter or sail during daylight hours, awaiting a slack favourable tide.
(ii) Max. draft allowed to vessels when sailing loaded: 19 ft.
(iii) Max. draft allowed to vessels to enter port up to Corojal Anchorage: 28 ft.
(iv) Max. length allowed to vessels assigned for operations at this port: 450 ft.
(v) No simultaneous crossing of entrance channel is allowed. Channel is navigable on one course.

(4) ANCHORAGE: *Corojal Anchorage:* Located just in front of Corojal Cove. Draft 28 ft. Swinging area 300 m.

(5) TIDAL VARIATION: Tidal variation at this port averages 1 ft. 4 in.

(6) BUNKERS: Bunkers cannot be obtained at Bahia Honda.

(7) WATER: *(Potable or for Boilers):* No fresh water available at this port.

(8) PAPER/WOOD DUNNAGE: Dunnage materials are very difficult to obtain at Bahia Honda and it is advisable that vessels assigned to load at this port arrive supplied with such materials.

(9) REPAIRS: There is no repair shop at this port.

(10) PORT AUTHORITIES: *(See Item No. (10) under Mariel):* Under Cuban Customs Laws and Regulations Bahia Honda is a sub-port of Mariel.

(11) WORKING HOURS:

Monday to Friday:	0700–1100 hrs. / 1300–1700 hrs.
Saturdays:	0700–1100 hrs.

(12) PORT OPERATIONAL CAPACITY: Only 1 vessel can be operated at a time.

(13) KIND OF CARGOES HANDLED BY THE PORT: Only the export of bagged raw sugar.

(14) TRANSPORTATION: As transportation is difficult to and from Bahia Honda, advisable means of transportation is taxi, which can be arranged through the Agent (see Item No. (14) under Mariel).

(15) COMMUNICATIONS: Only means of communication with Bahia Honda are telegraph and telephone.

As telephone service is very irregular and not to be depended upon, any instructions for vessels operating at Bahia Honda must be given with sufficient time in advance, taking into consideration above information.

(16) MAIL AND PARCELS: *(See Item No. (16) under Mariel).*

(17) AGENCY ADDRESS: *(See Item No. (17) under Mariel):* Bahia Honda is attended by Mambisas Mariel Agency personnel.
(18) OPERATIONS AT BAY OR ANCHORAGE: No operations at bay or anchorage performed at Bahia Honda.
(19) MEDICAL ATTENTION TO CREW MEMBERS: Crew members requiring medical care are attended at Bahia Honda Polyclinic. Those cases requiring hospitalisation or specialised medical treatment are sent to Havana (see Item No. (19) under Mariel).
(20) BAGS LOADED PER SLING: Six bags 100 kilos each of raw sugar.
(21) EQUIPMENT FOR LOADING BULK RAW SUGAR EX-BAGS: No equipment for loading raw sugar in bulk is available.
(22) PLACE OF OPERATION: The place of operation of Bahia Honda is the wharf, which lies at Punta Gerardo and having only one side, facing South. It has standard gauge railroad tracks along its length and also trucks can be used for loading operation, as wharf is well paved.
Harlem Wharf: Length: 360 ft. Max. length allowed: 450 ft. Draft: 19 ft. No water or bunkers available.
(23) PORT AUXILIARY EQUIPMENT: The port of Bahia Honda has no auxiliary equipment.
(24) PLAN OR WORKS UNDER WAY FOR IMPROVEMENT OF PORT FACILITIES: None at the present time.

(b) SUB-PORT OF CABANAS:

(1) LOCATION: Cabanas is located on the North coast of Cuba: Lat. 23° 00′ N., Long. 82° 59′ W.

It is a very good sheltered harbour for vessels drawing less than 22 ft.

Within its premises are good anchorages where vessels may find protection against all weather.

Port Cabanas light is shown from an iron skeleton structure situated about 0.25 mile W.N.W. of Pt. Pescadores, 29 ft. above sea level.

Cabanas is the sugar shipping port for Pablo de la Torriente Brau sugar mill, formerly Orozco.

(2) PILOT: *Where Pilot should be taken and distance to Place of Operation:* Pilots board the vessels at Mariel. (See Mariel – No. 2).

From the place where Pilots board the vessels (Mariel) to place of operation at Cabanas, there is a distance of 12 miles.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: Entrance channel is funnel shaped, gradually narrowing to about 70 m. Its bottom is sandy by the Eastern side and rocky by Western.

Channel is navigable on one course.

Limitations to enter to or sail from this port, to perform operations, are:
(i) Entrance/sailing to be effected only during daylight.
(ii) Max. vessel's draft 19 ft.
(iii) Max. vessel's length 450 ft.

The assistance of a tugboat is not necessary, neither is it necessary to wait for slack water while performing, entering or sailing manoeuvres.

If for any reason a tugboat is required, tugboat 'Caharata' is available, if requested in advance.

(4) ANCHORAGE: Excellent anchorage is available about 620 m. S.E. of Pt. Mangle, with draft well above port's operations draft.

This is a very desirable anchorage as it offers protection in all weathers.

There is another anchorage distant about 4.5 miles from Gloria Rock.

(5) TIDAL VARIATION: Tidal variation at this port averages 1 ft. 4 in.
(6) BUNKERS: No bunkers available at Cabanas.
(7) WATER *(Potable or for boilers):* There is no possibility of obtaining fresh water at this port.
(8) PAPER/WOOD DUNNAGE: Wood dunnage is difficult to obtain and is advisable to be requested at last port of call before Cabanas.

Paper dunnage available if requested well in advance.

(9) REPAIRS: There is no repair shop at Cabanas.
(10) PORT AUTHORITIES: Port Authorities travel by car from Mariel to clear the vessels at this port, except Port Captain and Immigration, who have sub-delegations at Cabanas.

Under Cuban Customs Laws and Regulations, Cabanas is a sub-port of Mariel.

(11) WORKING HOURS: Monday to Friday: 0700–1100 hrs. – 1300–1700 hrs. Saturdays: 0700–1100 hrs.
(12) PORT OPERATIONAL CAPACITY: Although there is berthing space for 2 vessels, it is not advisable to load 2 sugar vessels at a time, because the sugar mill cannot place enough sugar at the port for 2 vessels, and the port does not have enough personnel.
(13) KIND OF CARGOES HANDLED BY THE PORT: Only exportation of bagged raw sugar.
(14) TRANSPORTATION: Transportation to and from Cabanas is rather difficult.

Best advisable means of transportation is taxi, which can be arranged through the Agent.

(15) COMMUNICATIONS: Only means of communication at Cabanas is the telephone service which is very irregular and not to be depended upon.

Any instructions for vessels operating at Cabanas must be given with sufficient time in advance, taking into consideration above information.

Vessels assigned to load at Cabanas can communicate with Mariel Agency through "CLA" Havana Radio Station, which relays the message promptly by telegram or telex to Mariel.

Vessels cannot communicate directly with the port of Cabanas.

Masters must send their ETA messages simultaneously to Mambisas Mariel and Mambisas Habana.

(16) MAIL AND PARCELS: (See Item No. (16) under Mariel).
(17) AGENCY ADDRESS: (See Item No. (17) under Mariel).

Cabanas is attended by Mambisas Mariel Agency.

(18) OPERATIONS AT BAY OR ANCHORAGE: No operations at bay or anchorage performed at Cabanas
(19) MEDICAL ATTENTION TO CREW MEMBERS: Crew members requiring medical care are attended at Cabanas Polyclinic. In those cases requiring hospitalisation or specialised medical treatment, they are sent to Havana. (See Item No. (19) under Mariel).
(20) BAGS LOADED PER SLING: 6 bags 100 kilos each of raw sugar.
(21) EQUIPMENT FOR LOADING BULK RAW SUGAR EX-BAGS: Although raw sugar is shipped at Cabanas, the port lacks this equipment.
(22) PLACE OF OPERATION: The place of operation of Cabanas is the pier, located on the West coast of the bay, S.W. of Negro Cay and just in front of Pt. Jutia.

It is built of concrete and can accommodate 2 vessels, one at each side, North and South.

Conditions and facilities at each side of the pier are similar.

Pablo de la Torriente Brau Pier (formerly Orozco Pier): Length 360 ft., max. length allowed 450 ft., draft 19 ft.

No water or bunkers available.

Railroad tracks of standard gauge run along the length of pier.

(23) PORT AUXILIARY EQUIPMENT: None other than the mentioned tugboat.
(24) PLAN OR WORKS UNDER WAY FOR IMPROVEMENT OF PORT FACILITIES: None at the present time.

(c) SUB-PORT OF SANTA LUCIA:

(1) LOCATION: Santa Lucia is located on the North coast of Pinar del Rio Province and is the Westernmost port of the North coast of Cuba: Lat. 22° 44′ 13″ N., Long. 83° 59′ 15″ W.

Santa Lucia is the shipping port for the Copper Mining enterprise known as Minas de Matahambre, situated close to the port.

(2) PILOT: *Where Pilot should be taken and distance to Place of Operation:* Pilots board the vessels at Pasa Honda, 2 miles off the phosphorescent buoy.

As there is no pilot station, advices of ship's arrival must be given well in advance to the Mariel Agency in order to inform Pilots by telegram and also Port Authorities at Mariel who have to arrange transportation to Santa Lucia, 250 km. away.

It is of extreme importance that utmost care is exerted in sending ETA messages to Santa Lucia, owing to the information given above, which entails to all parties concerned with vessel's arrival a lot of effort and expense.

From the place where Pilots board the vessel to Santa Lucia's first anchorage there is a distance of 4 miles.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: Entrance channel to Santa Lucia average 200 m. width, but it has 2 turns that can be considered dangerous as the channel narrows precisely at those turns, having along all its course rocky bottom.

Crossing of channel as well as entering to or sailing from this port can be effected only during daylight hours.

(4) ANCHORAGES: There are 3 anchorages at the port but they are used as operations places (see Item No. 22).
(5) TIDAL VARIATIONS: Tidal variation at this port averages 1 ft. 6 in.
(6) BUNKERS: No bunkers available at this port.
(7) WATER *(Potable or for boilers):* There is no fresh water available at this port.
(8) PAPER/WOOD DUNNAGE: Not available at this port.
(9) REPAIRS: There is no repair shop at this port.
(10) PORT AUTHORITIES: (See Item No. (10) under "Mariel" and also Item No. (2) Pilot at this port).

Port Authorities travel from Mariel (250 km. distant from Santa Lucia) in order to clear the vessels.

Under Cuban Customs Laws and Regulations, Santa Lucia is a Sub-port of Mariel.

(11) WORKING HOURS: Work is performed all day (during daylight) including Saturday and Sunday.
(12) PORT OPERATIONAL CAPACITY: One vessel can be operated (Two vessels can load simultaneously but then the normal loading rate cannot be complied with).
(13) KIND OF CARGOES HANDLED BY THE PORT: Only loading of copper mineral.
(14) TRANSPORTATION: Transportation to and from Santa Lucia is extremely difficult and only advisable means of transportation is by car.
(15) COMMUNICATIONS: Only means of communication with Santa Lucia is telegraph, which is not to be depended upon in urgent cases due to the many relays needed for a telegraph message to reach this port.

Vessels navigating to Cuba can communicate with Mambisas Mariel Agency through "CLA" Havana Radio Station which relays the message promptly to Mariel by telegraph or telex.

Vessels cannot communicate directly with Santa Lucia.

Masters must send their ETA messages simultaneously to Mambisas Mariel and Mambisas Habana.

(16) MAIL AND PARCELS: *(See Item No. (16) under Mariel).*
(17) AGENCY ADDRESS: *(See Item No. (17) under Mariel).* Santa Lucia is attended by Mambisas Mariel Agency personnel.
(18) OPERATIONS AT BAY OR ANCHORAGE: All operations at this port are performed at anchorage by means of barges.
(19) MEDICAL ATTENTION TO CREW MEMBERS: Crew members requiring medical care are attended at Santa Lucia Polyclinic. Those cases requiring hospitalisation or specialised medical treatment are sent to Pinar del Rio Hospital, distance 80 km. from Santa Lucia.
(20) BAGS LOADED PER SLING: No sugar is shipped from this port.
(21) EQUIPMENT FOR LOADING BULK RAW SUGAR EX-BAGS: No sugar is shipped through this port.
(22) PLACES OF OPERATION: Places of operation in Santa Lucia are its 3 anchorages.

The system for loading vessels at this port is by grabs rigged to vessel's booms. In cases when the vessel has no booms but cranes, loading is carried out very slowly as buckets are then used, and on account of having to shovel the mineral into the buckets, the loading operation is slow. Therefore it is recomended that vessels assigned to load mineral at this port, be equipped with booms.

Average loading rate at this port is 900 tons daily, provided vessel has 3 or more hatches available for loading and that she be equipped with booms.

At first anchorage, although it has a depth of 30 ft., vessels are limited in sailing to a max. draft of 15 ft.

Second anchorage, although having a depth of 20 ft., vessels are limited in sailing to a max. draft of 18 ft.

Third anchorage is at open sea, without draft limitation.

(23) PORT AUXILIARY EQUIPMENT: The port has 2 tugs and several barges.

(24) PLAN OR WORKS UNDER WAY FOR IMPROVEMENT OF PORT FACILITIES: Dredging of the port is being done at the present time and it is believed that when the work is finished, it will improve greatly the draft allowances at first and second anchorages.

MATANZAS: (See Late Plans)

(1) LOCATION: This port is located on the North Coast of Cuba: Lat. 23° 03′ N., Long. 81° 34′ W.

Matanzas Bay is open and most ample, being about 5 miles long and 2.75 miles wide.

Its waters are deep and only start losing depth at about 150 yds. from shore; for this reason it is most suitable to accommodate large vessels, regardless of length or draft.

Occasionally the prevailing winds affect and interfere with docking and undocking manoeuvers.

Within bay limits, 3 rivers flow:

San Juan and Yumuri Rivers, which empty into the South-Western extreme of the bay, after crossing the city of Matanzas and Canimar which drains into the S.E. of the bay.

Matanzas is an important industrial city. And in its vicinity there are tourist attractions that visitors must not fail to see.

(2) PILOT: *Where Pilot should be taken and distance to Place of Operation:* Pilots board the vessels approximately 3 miles after the port mouth is sailed past, in front of the first port pier (Texas Pier now out of use).

From where Pilots board the vessels to the various places of operation there is a minimum distance of 200 m. and a maximum of 500 m.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: Matanzas port entrance is a safe and easy one, with no limitations. Limitations as to draft and length are only those imposed by each place of operation.

Entrance to or sailing from Matanzas can be effected either during day or night-time and the only possible inconvenience is that on reaching port, the strong winds may prevent the vessel from docking having to anchor at bay waiting for the wind to die down.

There are three entrance channels to the port and all three are straight without any obstacles to hinder navigation.

(i) North Channel: 50 ft. minimum depth with muddy bottom.
(ii) South Channel: 80 ft. minimum depth with rocky bottom.
(iii) Middle Channel: 22 ft. minimum draft. Because of the limited draft of this channel, it is seldom used.

The most remarkable points of visual orientation while approaching Matanzas are:

Point Maya Lighthouse, which rises 58 ft. above high tide, flashing white light visible up to 13 miles away, located on the East side of the port mouth.

To the West the Pan de Matanzas mountain and to the East the mountain range known as Tetas de Camarioca, 7 miles inland, with three distinct summits.

While entering the port at night-time, on the West side of the entrance, there is a huge brightly illuminated building of a tannery which can be used as a landmark to determine where to pick up Pilot, as the location is 700 m. after sailing past the building.

(4) ANCHORAGES: As explained in Item No. 1, Matanzas has an excellent bay suitable for large vessels regardless of draft.

There are ample anchorage areas. The following are the most used: Indio, South, Del Medio, West, North and Cascajales.

(5) TIDAL VARIATION: Tidal variation at this port averages 1 ft. 6 in.

(6) BUNKERS: No bunkers available at Matanzas.

(7) WATER: *(Potable or for Boilers):* Water available by pipe-line only while docked to the underlisted piers:

Reynold Garcia: Delivery rate: From 7 to 10 t.p.h.
Morales Bayona: Delivery rate: From 10 to 12 t.p.h.
Jose Luis Dubrocq: Delivery rate: From 5 to 7 t.p.h.

Price per ton at all piers $2.00.

There is no water barge.

(8) PAPER/WOOD DUNNAGE: Wood dunnage is difficult to obtain at Matanzas and it is advisable for vessels to take it at a prior port of call.

Paper dunnage can be obtained if requested at least 3 days in advance.

(9) REPAIRS: Light repairs can be handled. There is an electrical repair shop and a mechanical repair shop.

Matanzas being so close to Havana, it is possible to obtain other services, such as: radar, radio, etc.

(10) PORT AUTHORITIES: All Port Authorities are located within port and city limits.

Cars are hired by Authorities to clear the vessels.

(11) WORKING HOURS: Monday to Friday: 0700 – 1100 hrs., 1300 – 1700 hrs. Saturday: 0700 – 1100 hrs. Sundays: No work performed unless in special cases.

(12) PORT OPERATIONAL CAPACITY: The port can operate 6 vessels at a time, as follows: 2 at Reynold Garcia loading or discharging dry cargo. 2 at Jose Luis Dubrocq loading or discharging dry cargo. 1 at Morales Bayona loading molasses or alcohol. 1 at Frank Pais discharging petroleum products.

(13) KIND OF CARGO HANDLED BY THE PORT:

Importation: Bulk fertilizers, bulk sulphur, lumber, general cargo, occasionally liquid ammonia.

Exportation: Raw bulk sugar, bagged refined sugar, molasses, alcohol, liqueurs, dextrana, rayon.

Coastal Trade: Fuel oil, diesel oil, gasoline, kerosene, cement.

(14) TRANSPORTATION: Transportation to and from Matanzas is excellent.

There are good bus connections to any place or city.

There are several train departures and an electric train service Matanzas/Casa Blanca, the latter located on the Northern shore of Havana port entrance.

By the coast tourist highway the distance from Matanzas to Havana is 60 miles, and to Varadero Beach, 20 miles.

(15) COMMUNICATIONS: In Matanzas there is a long distance telephone service, radiograms, telegrams and Post Office.

Ocean going vessels navigating to Cuba can communicate with our Matanzas Agency by radiotelegraphy, contacting "CLA" Havana Station, which relays the messages immediately to Matanzas.

Our Matanzas Agency is connected to the National Telex System and its number is 05232. This is the quickest method of communication with Matanzas Agency.

Masters must send their ETA messages simultaneously to Mambisas Matanzas and Mambisas Habana.

Matanzas Agency VHF works on Channel 16 during office hours.

(16) MAIL AND PARCELS: As Matanzas has no air mail or air express service, all mail and parcels should be sent to the Havana Main Offices from where it will be relayed by the quickest means to Matanzas.

(17) AGENCY ADDRESS:

Empresa Consignataria Mambisa,
Agencia Matanzas,
Milanes No. 29427,
Apartado No. 245,
Matanzas.
Telephone: 2519 and 3079 (office), 3819 (night).
Telex: 05232.
Cable: Mambisas Matanzas.

(18) OPERATIONS AT BAY OR ANCHORAGE: No operations at bay or anchorage are performed.

(19) MEDICAL ATTENTION TO CREW MEMBERS: Crew members requiring medical or dental care are treated at Matanzas Civil Hospital, where they can be hospitalized if required.

Also there is a doctor on duty at the port to attend any emergency, or first aid cases; also an ambulance is available.

(20) BAGS LOADED PER SLING: 12 bags, 50 kilos each of refined sugar. 6 bags, 100 kilos each of refined sugar.

(21) EQUIPMENT TO LOAD BULK RAW SUGAR EX-BAGS: As all bulk raw sugar is shipped through the modern bulk raw sugar shipping plant at Reynold Garcia pier, there is no need for such equipment.

(22) PLACES OF OPERATIONS: At Matanzas Port there are 5 separate berthing installations of which, Jesus Menendez Pier, formerly known as Texas Pier, has been out of use for some time.

All port installations are located on the N.W. shore of the bay.

Jose Luis Dubrocq Pier was enlarged and rebuilt in 1970 and all piers and the bay have been recently dredged, these works having been completed at the beginning of 1973.

(a) Jesus Menendez Pier (formerly Texas Pier): Length 794 ft., draft 28 ft. Used to discharge fuel oil.

Presently no operations are performed at this pier due to the bad condition of its solid dolphins.

Pier itself is in good condition and may be used as soon as solid dolphins are replaced.

(b) Frank Pais Pier (formerly Armour Pier): It is a solid construction of concrete and stones.

Although it has two sides, only the West side is used, the East side being out of use.

Length 350 ft., draft 22 ft.

Cargo handled by this pier: Only coastal trade discharge of: Fuel oil, diesel oil, gasoline, kerosene and occasionally cement or general cargo.

No water or bunkers available.

Tanker Information: Discharge of fuel oil: 1 connection 6 in. diameter.

Discharge of gasoline/kerosene/diesel oil: 1 connection 6 in. diameter.

(c) Reynold Garcia Pier (formerly Terminal Maritima Pier): The pier is of solid concrete construction at the entrance of which the pilot station and the stevedores office are located.

North Side: Length 450 ft., draft 32 ft. Cargo handled by this side: Exportation: Bagged refined sugar, dextrana, rayon, liqueurs, etc. Import: Occasionally dry cargo (general cargo), liquid ammonia.

South Side: At this side of pier are the mechanical installations of the bulk raw sugar shipping plant. Length 529 ft., draft 32 ft.

Cargo handled by this side: Exportation: Bulk raw sugar, occasionally bagged refined sugar, dextrana, rayon, liqueurs, etc. Importation: Can be used if no sugar is scheduled to be shipped.

Water available at this pier by pipe-line.

No bunkers available.

(d) Morales Bayona Pier (formerly Cubadist Pier): It is a steel and concrete construction, consisting of a long narrow passage along which run the molasses and water pipe-lines, and a catwalk.

At this installation tankers berth to 2 solid dolphins and 2 mooring buoys fore and aft.

Max. length permitted to vessels 615 ft., draft 32 ft.

Cargo handled by this pier: Exportation of molasses and alcohol.

Water available by pipe-line 3 in. in diameter, connection also 3 in.

No bunkers available.

Tanker Information: Alcohol: Pipe-lines 10 in. diameter, 2 connections 8 in. diameter.

Molasses: Pipe-lines 12 in. diameter, 4 connections 8 in. in diameter.

(e) Jose Luis Dubrocq Pier (formerly Fomento Maritimo Pier):

Section No. 1: Recently enlarged and rebuilt; at this time 2 heavy overhead cranes are being installed for discharging of bulk fertilizers. This installation is a coastal pier.

Length 600 ft., draft 32 ft.

Cargo handled by this Section: Import: General cargo, bulk fertilizers, bagged cargoes, lumber, etc. Export: General cargo.

Section No. 2: Length 532 ft., draft 27 ft.

Cargo handled by this Section: Similar to Section No. 1.

Water available at both Sections, but no bunkers available.

Trucking operations are usual at this pier.

(23) PORT AUXILIARY EQUIPMENT: We have no exact data but the port has several fork lift trucks and pay loaders.

(24) PLAN OR WORKS UNDERWAY FOR IMPROVEMENT OF PORT FACILITIES: Besides the 2 overhead cranes reported in Item 22 (e) Section No. 1, two more are to be installed at Jose Luis Dubrocq Pier.

(25) IMPORTANT NOTICE: Regarding drafts shown at different places of operation, as explained before, the port has been dredged recently but official new drafts have not been released and drafts mentioned are only the result obtained by previous experience.

MOA (including sub-port of Punta Gorda):

(1) LOCATION: The port of Moa and the sub-port of Punta Gorda are located on the North coast of Cuba:

MOA: Lat. 20° 41′ 15″ N., Long. 74° 52′ 30″ W.

PUNTA GORDA: Lat. 20° 38′ 30″ N., Long. 74° 51′ 15″ W.

The port of Moa is situated in the rear part of Yaguasey bay, where in an artificial inner harbour lies the pier of Moa, and at the entrance of the inner harbour a small coastal trade pier.

Punta Gorda is located at about 3.5 miles East of Moa and consists of an anchorage where loading is effected by means of barges.

As the characteristics of Moa and Punta Gorda are almost identical, the information given must be considered to apply for both, unless otherwise indicated.

Both the port of Moa and the sub-port of Punta Gorda mainly handle the imports and exports of the huge mining enterprise, Major Pedro Soto Alba.

(2) PILOT: *Where Pilot should be taken and distance to Places of Operation:* Pilots board the vessels 2 miles off the port entrance. Distance from the point where Pilot boards the vessel to Moa pier is about 4 miles, to Moa anchorage 2 miles and to Punta Gorda anchorage 4.5 miles.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: Entrance channel to Moa is almost straight having two very slight turns, minimum depth on its course is 40 ft. and length and draft limitations to enter to or sail from this port are those imposed by Moa pier and inner harbour:

Draft: Vessels drawing 28 ft. 6 in. can enter/sail at any tide, those drawing more than 28 ft. 6 in. up to 30 ft. only at high tide.

Length: 500 ft.

Channel bottom from its head up to the pier is as follows: From the head to Grande or Del Medio Shoal, coral and rocks; then up to Yaguasey Bay, coral and mud; and on its final stretch to the pier, hard red mud.

Length of channel: 1,560 m.; minimum width 200 m. and maximum 720 m.

Entrance channel to Punta Gorda is the same as for Moa, and once the first stretch of it up to Del Medio Shoal is sailed past, it turns to the East, following a winding course, having four turns. The turns themselves are difficult but what makes them really dangerous is the lack of proper buoying and navigational signals.

Maximum width of channel is 300 m. and minimum 200 m. Maximum length and draft to enter to or sail from Punta Gorda are as follows: Length: 442 ft.; Draft: 28 ft.

For both, Moa and Punta Gorda, entrance to or sailing from, can only be performed during daylight.

As tidal currents average only 1.25 m.p.h., and since the inner harbour is almost devoid of currents, it is not necessary to wait for slack water for entering, sailing or crossing the channels.

Approaching the port of Moa, at both sides of port entrance, strings of breakwaters can be seen.

Behind the Western side breakwater, Moa Grande Cay is conspicuous and a lighthouse rises at about the middle of its North coast.

(4) ANCHORAGES. Moa: *Anchorage No. 1:* Located Northward of Fabrica River and S.E. of Pt. Pajaros: Lat. 20° 40′ 38″ N., Long. 74° 53′ 10″ W.

Minimum draft: 38 ft. Swinging area: 250 m.

Anchorage No. 2: Located Northward of Fabrica River and South of the Eastern extreme of Moa Grande Cay: Lat. 20° 40′ 35″ N., Long. 74° 53′ 28″ W.

Minimum draft 37 ft. Swinging area: 250 m.

Anchorage No. 3: Located N.W. of Del Medio Shoal: Lat. 20° 40′ 32″ N., Long. 74° 54′ 04″ W.

Minimum draft 68 ft. Swinging area: 300 m.

Anchorage No. 4: Located Northward of Del Medio Shoal: Lat. 20° 40′ 43″ N., Long. 74° 52′ 30″ W.

Minimum draft 41 ft. Swinging area: 250 m.

Although above anchorages are listed under the port of Moa, they can be used if necessary, for shipping or unloading cargoes destined to Punta Gorda.

Punta Gorda Anchorage: Located North of Punta Gorda and East of Pt. Yagrumage (see Item 22(c)).

(5) TIDAL VARIATION: Tidal variation at these ports averages 2 ft. 6 in.

(6) BUNKERS: No bunkers available at these ports.

(7) WATER *(Potable or for Boilers):* Vessels can be supplied water while operating at Moa pier, by 2.5 in. pipe-line.

Price: $2.00 per ton. Average rate of delivery: 10 t.p.h.

No water available at Punta Gorda.

(8) PAPER/WOOD DUNNAGE: No dunnage materials available at Moa or Punta Gorda.

(9) REPAIRS: There is no repair shop at these ports but arrangements can be made to make repairs, specially minor repairs, with the assistance of management of the mining enterprise.

(10) PORT AUTHORITIES: Under Cuban Customs laws and regulations Moa and Punta Gorda are sub-ports of Baracoa, where all Authorities are located. Nevertheless, there are delegations at Moa, and vessels can proceed directly either to Moa or Punta Gorda, where they are cleared.

(11) WORKING HOURS: Monday to Friday: 0700 – 1100 hrs., 1300 – 1700 hrs. Saturdays: 0700 – 1100 hrs.

(12) PORT OPERATIONAL CAPACITY: At Moa only one vessel can be operated at a time; likewise at Punta Gorda.

Due to piers dimensions only 4 batches can be worked at a time at Moa.

(13) KIND OF CARGOES HANDLED BY THE PORT:

Moa: Importation: Bulk sulphur, empty ore containers, and occasionally general cargo.

Exportation: Nickel and cobalt concentrate in containers or drums.

Coastal Trade: Discharge of fuel oil, diesel oil, kerosene, gasoline, sulphuric acid and general cargo.

Punta Gorda: Only bulk refractory chromium is loaded.

(14) TRANSPORTATION: Transportation to or from Moa is good.

There is a daily flight departing at 1350 hrs., destination Nicaro/Santiago/Havana.

Also there are other daily flights as follows: Nicaro/Santiago, Holguin, Guantanamo/Santiago, Santiago, Baracoa.

Bus transportation to Sagua de Tanamo about every 2 hours, from 0500 to 2000 hrs.

Two daily bus departures Moa/Sagua de Tanamo/Havana, one at 1030 and other at 1730 hrs.; to Mayari, one at 0900 and other at 1800 hrs.; to Holguin one at 0500 hrs. and to Baracoa one at 0500 and other at 0700 hrs.

(15) COMMUNICATIONS: There is telephone, telegraph and telex communication with Moa.

Vessels navigating to Cuba can communicate with Mambisas Moa through "CLA" Havana Radio Station and the message will be relayed to Moa by telegraph or telex.

Masters must send their ETA messages to Moa or Punta Gorda, simultaneously to Mambisas Moa and Mambisas Habana.

(16) MAIL AND PARCELS: Can be sent to Moa by air express, but to ensure delivery it is advisable to direct it to the main offices at Havana from where it will be relayed to Moa by the quickest means available.

(17) AGENCY ADDRESS:

Empresa Consignataria Mambisa,
Agencia Moa,
Reparto "Rolo Monterrey" No. 163,
Moa, Prov. de Oriente.
Telephone: 429 (day and night). Cable: Mambisas Moa.

Punta Gorda is attended by Mambisas Moa Agency personnel.

(18) OPERATIONS AT BAY OR ANCHORAGE: At Moa no operations at bay or anchorage are performed. Only operation effected at Punta Gorda is ore loading performed at anchorage (See Item 22(c)).

(19) MEDICAL ATTENTION TO CREW MEMBERS: Crew members requiring medical or dental attention are treated at Moa Hospital (Pedro Soto Alba Hospital), where they can be hospitalised if necessary.

(20) BAGS LOADED PER SLING: No sugar shipments are effected through these ports.

(21) EQUIPMENT TO LOAD BULK RAW SUGAR EX-BAGS: As sugar is not shipped through these ports there is no such equipment.

(22) PLACES OF OPERATIONS: Moa:

(a) Moa Pier (Also known as Moa Darsena).

It is a solid concrete construction in an artificial inner harbour. Berthing length: 308 ft. Max. length permitted to vessels: 500 ft. Draft: Vessels drawing 28 ft. 6 in. can enter/sail at any tide, those drawing more than 28 ft. 6 in. up to 30 ft. only at high tide.

Due to pier dimensions, only 4 hatches can be worked at a time, but despite above limitations, occasionally larger vessels have been operated.

Cargo handled by this pier: Importation: Bulk sulphur, empty ore containers, occasionally general cargo.

Exportation: Nickel and cobalt concentrate in containers and drums.

Coastal trade: Discharge of fuel oil, diesel oil, kerosene, gasoline, sulphuric acid.

Water available by pipe-line.

No bunkers available.

Tanker Information: Mining Enterprise: Gasoline/kerosene: one connection 6 in. diameter. Fuel oil: 4 connections 8 in. diameter.

ICP: Gasoline/kerosene/diesel oil: one connection 6 in. diameter.

(b) Coastal trade pier: It is a small coastal pier for small vessels, located at the entrance of the inner harbour. Constructed of piles and filled with earth.

Cargo handled by this pier: Coastal trade, general cargo.

No water or bunkers available by pipe-line or any other means.

Punta Gorda:

(c) Punta Gorda Anchorage: Located North of Punta Gorda and East of Pt. Yagrumage: Lat. 20° 38′ 55″ N., Long. 74° 51′ 13″ W.

Minimum draft: 31 ft. Max. draft allowed to vessels: 28 ft. Max. length allowed to vessels: 442 ft. Swinging area: 300 m.

Vessels operating at Punta Gorda load their cargo by means of barges.

Only cargo handled at this anchorage is loading of bulk refractory chromium.

No water or bunkers available.

(23) PORT AUXILIARY EQUIPMENT: 1 shore crane 30 tons with 3 tons grab; 4 contact grabs; 2 trucks 30 tons capacity each; 1 pay loader; 2 fork lift trucks; 1 stationary crane; 1 steel barge 500 tons capacity; 1 tugboat (2 diesel engines 180 h.p. each).

Punta Gorda: 2 wooden barges 130 tons capacity each; 1 tugboat; 2 trucks 10 tons capacity each; 1 pay loader; 1 shore crane.

(24) PLAN OR WORKS UNDER WAY FOR IMPROVEMENT OF PORT FACILITIES: At Moa no works under way at the present time, but there is a plan to enlarge the port and pier which will permit the operation of at least 2 vessels at a time.

At Punta Gorda none at the present time.

NUEVA GERONA (Isla de Pinos): (See Late Plans)

(1) LOCATION: The anchorage of Nueva Gerona is located on the North coast of Isla de Pinos: Lat. 21° 58′ N., Long. 82° 56′ W.

Isla de Pinos is the largest island of Los Canarreos Archipelago, located on the South coast of Cuba, just in front of Batabano Gulf and the boundary between Pinar del Rio and Havana provinces.

Isla de Pinos is 54 km. long from North to South and 58 km. from East to West. (2,200 sq. km.). The North coast is 229 km. long and the South coast 98 km.

Nueva Gerona Anchorage lies in front of the mouth of Las Casas River.

(2) PILOT: *Where Pilot should be taken and distance to Place of Operation:* Pilots board the vessels in the vicinity of Frances Point, located at Lat. 21° 37′ 00″ N., Long. 83° 11′ 24″ W. (Frances Point is the Westernmost part of Isla de Pinos)

From the place were Pilots board the vessels to Nueva Gerona Anchorage there is a distance of 34 miles.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: The entrance channel or the passage from the Gulf to the bank is ample, 2 miles wide more or less. The bottom throughout the 34 miles from the entrance to the anchorage (in front of Las Casas River) is muddy. There are no dangerous turns or narrows, however, it is not straight navigation. It is necessary to change course several times during the run of the 34 miles channel to navigate through the deeper water which is in the centre of the channel, in order to deviate from cays which exist in the zone. There are no dangerous currents which might affect navigation.

Vessels can enter/sail with a max. draft of 18 ft. 6 in./19 ft. Max. length unlimited. It is not necessary to wait for slack water for ships entering/sailing.

No tugboat is required for entering or sailing manoeuvres.

Vessels can enter/sail only during daylight.

Max. draft up to which vessels can load in the river is 19 ft. Vessels of any length can enter to operate.

Max. draft up to which vessels can operate in the interior of the river, where the docks are located is 14 ft. 6 in. Max. length is 295 ft.

(4) ANCHORAGE: As anchorage is used as place of operation, please see Item No. 22 (a).

(5) TIDAL VARIATION: Tidal variation at the port averages 1 ft.

(6) BUNKERS: No bunkers available at this port.

(7) WATER: *(Potable or for Boilers):* No water available at this port at anchorage. Available at dock in limited quantities.

(8) PAPER/WOOD DUNNAGE: No dunnage materials available at Nueva Gerona.

(9) REPAIRS: No repairs can be performed at this port.

(10) PORT AUTHORITIES: All Port Authorities are located at Neuva Gerona.

(11) WORKING HOURS:
Monday to Friday: 0700–1100 hrs. – 1300–1700 hrs.
Saturday: 0700–1100 hrs.

(12) PORT OPERATIONAL CAPACITY: Only 1 vessel can be operated at a time.

(13) KIND OF CARGOES HANDLED BY THE PORT: Export: Fresh fruits. Import: No import cargo is handled at this port. Coastal Trade: General cargo, petroleum products, etc.

(14) TRANSPORTATION: There are good transportation means at Nueva Gerona.

From Nueva Gerona to Batabano there is a ferry service and also a hydrofoil launch service.

There is a very efficient air service between Gerona and Havana.

(15) COMMUNICATIONS: Means of communication with Nueva Gerona are: Telephone, telegraph, radiograms and air mail services.

The sub-Agency at Nueva Gerona is connected to the National Telex System and this is the quickest means of communication available.

Vessels navigating to Cuba can communicate with Nueva Gerona sub-Agency through "CLA" Havana Radio Station which promptly relays the message to Nueva Gerona sub-Agency.

Master must send their ETA messages simultaneously to Cabotaje Gerona and Mambisas Habana.

(16) MAIL AND PARCELS: Although there is air mail and air express to Nueva Gerona, it is advisable to send all mail and parcels to the Main Offices at Havana, from where it will be sent to Gerona by the quickest means available.

(17) AGENCY ADDRESS: At Nueva Gerona, Empresa Nacional de Cabotaje, (Cuban Coastal Trade Enterprise) acts as sub-Agents of Consignataria Mambisas, and their full address is:

Empresa Nacional de Cabotaje,
Calle 14 entre 1ra y 3ra.
Nueva Gerona, Isla de Pinos.
Tel.: 33 – Telex: 051115
Cable: Mambisas – Nueva Gerona.

(18) OPERATIONS AT BAY OR ANCHORAGE: Operations at anchorage are performed (see Item No. 22 (a)).

(19) MEDICAL ATTENTION TO CREW MEMBERS: Crew members requiring medical care are treated at General Hospital Heroes de Baire, where they can be hospitalised if necessary.

Dental care is also available.

(20) BAGS LOADED PER SLING: No sugar is shipped by this port.

(21) EQUIPMENT TO LOAD BULK RAW SUGAR EX-BAGS: As no raw sugar is shipped through this port, there is no need for such equipment.

(22) PLACES OF OPERATIONS: Operation places at this port are: Anchorage, where vessel can load up to 19 ft. Pier, where vessels can load up to 14 ft. 6 in.

(a) Gerona Anchorage: Located just in front and close to the mouth of Las Casas river. Draft 19 ft. No limitations regarding length. Swing area is 600 ft.

Loading of fruits at anchorage is performed only when shipment is effected in vessels, the draft of which does not permit them to enter through the river.

(b) Nueva Gerona Pier: Located about 2 miles up river. Length 200 ft. Max. length allowed to vessels, 90 m. (295 ft.). Draft 14 ft. 6 in. Water available by pipe-line. No bunkers available.

(23) PORT AUXILIARY EQUIPMENT: Auxiliary equipment for exportation of fruits: 2 barges, 1 tugboat.

(24) PLANS OR WORKS UNDER WAY FOR IMPROVEMENT OF PORT FACILITIES: None at the present time.

NUEVITAS (See Late Plans)

(1) LOCATION: Nuevitas is located on the North coast of Cuba: Lat. 21° 33′ N., Long. 77° 16′ W.

The port lies on a peninsula orientated from West to East, and all port installations are located on the North of said peninsular: Tarafa on the Western extreme, Bufadero and Cement Pier at about 0.5 miles East of Tarafa, and Pastelillo at the Eastern extreme.

The city of Nuevitas is located about 4.5 km. to the S.W. of Tarafa.

The city spreads widely from the shores of Guincho Bay.

Neuvitas Bay has an extension of 57 square miles, but despite its extension, owing to its geographical configuration, is fairly well sheltered and can accommodate vessels of large tonnage. Bottom of the bay is mostly hard mud, but there are areas of sand and others where it is sandy/muddy.

Nuevitas, which years ago used to be only a sugar shipping port, nowadays is also an important port handling a great amount of import cargo.

(2) PILOT. *Where Pilot should be taken and distance to Places of Operations:*

Pilots board the vessels in the vicinity of Pt. Practicos Lighthouse and pilot station, Lat. 21° 37◯ N., Long. 77° 06′ W. is about 1 mile North of buoy No. 1, which marks the port entrance, if there is rough weather Pilot boards between Chicho Beach and Pt. Salteadores.

The following are the distances from the place where Pilot boards the vessel up to: Pastelillo: 8 miles; Bufadero: 10 miles; Tarafa: 10.75 miles.

Pilot station is located at Nuevitas and usual means of communications with it are telephone or car.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: The entrance to Nuevitas is through a narrow and crooked channel between Pt. Sotavento and Pt. Practicos, about 7 miles long, but vessels may safely use it although good care has to be taken because of the narrowness and sharp turns of the entrance and the velocity of tidal currents.

On account of above and as a security measure, entrance to or sailing from this port is only effected at slack water in order to avoid tidal currents.

Usually entrance or sailing from port is performed during daylight hours but incoming vessels, which have advised their ETA well in advance and draw 30 ft. or less can enter during night-time at slack water, if all the navigational signals and marks are in good order. If any lighted buoy is out of service, night entrance or sailing are not performed.

Channel bottom is rocky/sandy along most of its entire course but if crossing the channel with official draft allowed to vessels, there are no difficulties regarding draft as there is ample depth.

Limitations as to draft and length to enter to or sail from Nuevitas are as follows: draft 33 ft., length 650 ft.

Limitations as to draft for crossing the bay interior channels are:

Entrance channel up to Botijuela Anchorage:	35 ft.
La Estrella Channel up to Pastelillo:	33 ft.
Channel between Pastelillo and Tarafa:	26 ft. 6 in.

(4) ANCHORAGES: There are ample anchorage zones close to the places of operations, where vessels have good swinging area.

Anchorages are used as waiting places when piers are occupied, although occasionally loading or discharging operations are performed.

La Poza Anchorage: Located near Pt. Practicos.
Geographical position: Lat. 21° 36′ 46″ N., Long. 77° 05′ 11″ W.
Limitations: Draft 38 ft., length none.
Swinging area: Unlimited. Can accommodate one vessel.
Distance from shore: 400 m.

Botijuela Anchorage: Located S.E. of Ballenato Grande Cay.
Geographical position: Lat. 21° 31′ 34″ N., Long. 77° 10′ 39″ W.
Limitations: Draft 35 ft., length 650 ft.
Swinging area: 400 m.
Can accommodate 15 average type vessels.
Distance from shore: 2 miles.

Pastelillo Anchorage: Located East of Pastelillo.
Geographical Position: Lat. 21° 32′ 34″ N., Long. 37° 12′ 38″ W.
Limitations: Draft 20 ft., length 500 ft.
Swinging area: 200 m.
Can accommodate 2 vessels.
Distance from shore: 0.25 miles.

Guincho Anchorage: Located East of Pt. Guincho.
Geographical Position: Lat. 21° 31′ 57″ N., Long. 77° 14′ 00″ W.
Limitations: Draft 16 ft., length 250 ft.
Swinging area: 100 m.
Can accommodate 1 small vessel.
Distance from shore: 1.25 miles.

Tarafa Anchorage: Located to the N.W. of "D" pier.
Geographical position: Lat. 21° 34′ 30″ N. Long. 77° 14′ 45″ W.
Limitations: Draft 22 ft., length 525 ft.
Can accommodate 1 vessel.
Distance from shore: 400 m.

(5) TIDAL VARIATION: Tidal variation at this port averages 1 ft. 6 in.

(6) BUNKERS: Currently the only bunkers available at Nuevitas are Regular Fuel Oil, which is the type of fuel oil stored at shore tanks.

Deliveries are effected only at Pastelillo Pier by pipe-line gravity from the deposit tanks and due to the method used, are slow.

Bunkers must be requested well in advance.

(7) WATER *(Potable or for boilers):* There is no water available at Bufadero or the Cement pier.

At Tarafa and Pastelillo water is available by means of railroad tank-cars of about 34 tons capacity, at a price of $1.65 per ton.

Deliveries are effected during daylight working hours.

For delivery after working hours, besides the stipulated price per ton, it is necessary to request the use of a locomotive and pay for its use.

Maximum delivery per vessel: 150 tons.

(8) PAPER/WOOD DUNNAGE: Occasionally wood dunnage is difficult to obtain and to avoid inconveniences and possible delays it is advisable to place requisition well in advance.

(9) REPAIRS: There is a repair shop where light repairs can be effected.

Requisition must be placed in advance in order that a technician can determine if repairs can be made, informing the cost to vessel's administration.

(10) PORT AUTHORITIES: All Port Authorities are located at the city of Nuevitas and they travel to whichever berth the vessel is assigned, in order to clear her.

(11) WORKING HOURS:

From Monday to Saturday: 0700 – 1300 hrs., 1300 – 1900 hrs.

Sunday: No work is performed, unless urgent.

Occasionally if conditions as to weather and labour are favourable, an extra shift: 1900 – 0100 hrs. is worked.

(12) PORT OPERATIONAL CAPACITY: The port can operate 11 vessels simultaneously, loading or discharging, including tanker vessels.

(13) KIND OF CARGOES HANDLED BY THE PORT: Importation: General cargo, lumber, equipment and machinery, bagged cargoes, petroleum products, etc.

Exportation: Bagged raw and refined sugar, molasses, fresh and canned fruits, occasionally general cargo.

Coastal Trade: Bagged and bulk cement (loading) and discharge of general cargo, fuel oil, diesel oil, gasoline, kerosene.

(14) TRANSPORTATION: Transportation to and from Nuevitas is difficult, although railroad and bus transportation is available.

Best advisable means of transportation to any place or city of the nation is to travel by taxi or bus up to Camaguey, from which, transportation means are numerous and easily attainable.

Taxi can be arranged through Nuevitas Agency.

(15) COMMUNICATIONS: Nuevitas means of communication are:

Telephone, telegraph, radiograms RCA system, telex and Post Office, but airmail service is not available.

The Nuevitas Agency is connected to the National Telex System, which is the quickest means of communication.

Vessels navigating to Cuba can communicate with Mambisas Nuevitas Agency through "CLA" Havana Radio Station which relays the message promptly to Nuevitas.

When navigating in Cuban Waters nearing Nuevitas, vessels can communicate directly with "CLK" Coastal Radio Network Nuevitas by radiotelegraphy at 500 kc/s, general call, 446 kc/s, for working. Radiotelephony frequency 2760 or 2182.

This Coastal Network Station rapidly relays any message to Mambisas Nuevitas Agency.

Masters must send their ETA messages simultaneously on VHF Channel 16 to Mambisas Nuevitas and Mambisas Habana.

(16) MAIL AND PARCELS: Should be sent to our Main Offices at Havana from where it will be relayed by the quickest means available deemed to ensure delivery.

(17) AGENCY ADDRESS: Empresa Consignataria Mambisa, Agency Nuevitas, P.O. Box No. 350, Puerto Tarafa, Nuevitas, Prov. de Camaguey. Telephone: 3-1435 (office), 3-6025 (night). Telex: 031151. Cable: Mambisas Nuevitas.

Mambisas Nuevitas Agency also attends the port of Jucaro and sub-port of Boca Grande.

(18) OPERATIONS AT BAY OR ANCHORAGE: As a general rule, no operations at anchorages are performed but occasionally and very seldom they are.

(19) MEDICAL ATTENTION TO CREW MEMBERS: Crew members requiring medical care are treated at Nuevitas Regional Hospital, where they can be hospitalised if necessary.

Dental care is also available at this hospital.

(20) BAGS LOADED PER SLING: Raw Sugar: 6 bags, 100 kg. type. Refined sugar: 20 bags 50 kg. type.

(21) EQUIPMENT FOR LOADING BULK RAW SUGAR EX-BAGS: The port lacks this equipment but whenever this kind of operation is to be performed, the shippers bring the equipment from other ports.

(22) PLACES OF OPERATION:

(a) Tarafa Terminal: This terminal consists of 3 solid concrete piers, each with railroad sidings connecting with the main tracks and also suitable for trucking operations.

It is capable of operating 7 vessels simultaneously: 6 average size vessels and 1 medium or small.

Cargo handled at Tarafa Terminal: General cargo, equipment, machinery, bagged cargoes, fresh and canned fruits, sugar, etc.

Tarafa Pier "B": North Side: Length 480 ft., width 65 ft., max. draft 19 ft.

Depths alongside from shore end to pier head: 19 – 23 – 25 – 25 – 25 – 28 ft.

South Side: Length 480 ft., width 65 ft., max. draft 19 ft.

Depths alongside from shore end to pier head: 14 – 21 – 20 – 22 – 22 – 24 – 25 ft.

Tarafa Pier "C": North Side: Length 437 ft., width 61 ft., max. draft 26 ft.

Depths alongside from shore end to pier head: 26 – 25 – 26 – 29 – 31 ft.

South Side: Length 437 ft., width 61 ft., max. draft 26 ft.

Depths alongside from shore end to pier head: 23 – 23 – 25 – 25 – 25 – 26 – 27 ft.

Tarafa Pier "D": North Side: Length 768 ft., width 65 ft., max. draft 27 ft.

Depths alongside from shore end to pier head: 28 – 29 – 31 – 32 – 33 – 34 – 33 – 34 ft.

South Side: Length 477 ft., width 65 ft., max. draft 26 ft.

Depths alongside from shore end to pier head: 19 – 27 – 29 – 29 – 30 – 30 – 29 – 28 ft.

(b) Cement Dock: This is a concrete coastal dock where bulk cement is shipped by means of silo-trucks.

It is located West and close to Bufadero Pier.

Length 275 ft., width 31 ft.

Depths alongside from East to West: 14 – 16 – 18 – 16 – 16 ft.

(c) Pastelillo Pier: This is a solid concrete pier located at the end of the peninsula where all Nuevitas port installations are situated.

It is well cared for and recently underwent complete repairs, being the topping-off berth for sugar and molasses loading of the port, as well as the deep draft berth for vessels with import cargoes.

Petroleum products (fuel oil, diesel oil, gasoline and kerosene) for the use of the whole Camaguey province, are discharged at this pier.

The pier has railroad sidings connecting with the main tracks but is not suitable for trucking operations.

Vessels can be supplied fuel oil at this pier.

Pastelillo Pier: North Side: Length 458 ft., width 55 ft., max. draft 33 ft.

Depths alongside from shore end to pier head: 31 – 35 – 37 – 37 – 37 – 36 – 37 ft.

Cargo handled by this side: General cargo, equipment, machinery, bagged raw and refined sugar, molasses, etc.

South Side: Length 458 ft., width 55 ft., max. draft 33 ft.

Depths alongside from shore end to pier head: 24 – 33 – 34 – 33 – 36 ft.

There are no limitations as to length of vessels operating at Nuevitas other than those imposed by the length of piers, while operating dry cargo vessels.

(23) PORT AUXILIARY EQUIPMENT: The port owns and operates the following equipment: 6 fork lift trucks; 7 tractors; 3 trailers; 6 tow motors; 5 shore cranes (from 5 to 20 tons lifting capacity); 2×300 ton capacity cargo barges; 1 (1,200 h.p.) tugboat.

(24) PLANS OR WORKS UNDER WAY FOR IMPROVEMENT OF PORT FACILITIES: There is a plan for the dredging of the port in the near future.

PUERTO PADRE (Cayo Juan Claro – Puerto Carupano): (Including sub-port of Manati) **(See Late Plans)**

(1) LOCATION: Puerto Padre is located on the North coast of Cuba. Lat. 21° 18′ N., Long. 76° 32′ W.

It is a safe, sheltered and ample port, situated at one of the richest and important sugar cane zones of the nation.

In the neighbourhood of the port there are 2 sugar producing colossus: Antonio Guiteras sugar mill, 8 km. away and Jesus Menendez sugar mill, distance 18 km. Both of these mills are among the biggest and most modern in Cuba.

The port itself is located on the West coast of Cayo Juan Claro and is named Puerto Carupano.

Cayo Juan Claro is connected with the mainland at its extreme Southern tip by a narrow gauge railroad and parallel to the tracks runs a road recently built.

Both the railroad and the road communicates with the city of Puerto Padre, sugar mills of Antonio Guiteras and Jesus Menendez.

Cayo Juan Claro and Cayo Puerco, divide the bay into two parts. The part located at the West is Puerto Padre bay and that at the East is known as Chaparra Bay.

(2) PILOT: Pilots board the vessels at not less than 1 mile off buoy No. 1, at the entrance of the port.

The geographical position of this point is Lat. 21° 16′ 42″ N., Long. 76° 32′ 42″ W.

From this place to the Official Anchorage there is a distance of 3 miles and 2.5 miles to Cayo Juan Claro piers.

As is the case with Puerto Padre, there is no pilot station and Pilots are located at Cayo Juan Claro, therefore it is important to receive ETA messages from incoming vessels well in advance.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: The entrance to the port has the shape of a funnel leading to what can be called properly the port inner channel.

Its bottom is rocky and has two turns but take special care with Carenero Turn when vessels exceed 525 ft. in length.

Its narrowest part is 450 ft. wide and widest 720 ft., that is of course, once the funnel shaped mouth is sailed past, until the part where channel opens to form again a funnel shape, this time inverted, in front of Cayo Juan Claro and Cayo Puerco.

Entrance to or sailing from this port can be effected during day or night by vessels up to 525 ft. length. Vessels exceeding 500 ft. length can effect entrance or sailing only during daylight.

Channel depth is 28 ft. minimum at the entrance sand banks and at the Official Anchorage, and maximum of 55 ft. in the rest of the channel, which runs for about 2 miles.

Max. length allowed is 170 m. (557 ft.) and max. draft is 25 ft. for vessels up to 500 ft. length. For vessels exceeding 500 ft. length max. draft allowed is 24 ft.

The most remarkable points of visual orientation approaching Puerto Padre are:

During daylight: The chimneys of sugar mills Antonio Guiteras and Jesus Menendez and the radio tower of the Port Captaincy.

During nightime: Point Mastelero lighthouse located: Lat. 21° 16′ 45.9″ N., Long. 76° 32′ 15.5″ W.

Tidal currents at this port, as reported by the port charts, are between 1.9 to 2 m.p.h., but Pilots report having found at times currents as strong as 3 m.p.h.

Due to this fact, and as a security measure, entrance to or sailing from port is effected only at slack water.

(4) ANCHORAGES: *Quarantine Anchorage:* Located East of Cayo Juan Claro at Chaparra Bay, at about 2 miles from the piers.

Max. length permitted is 170 m. and draft is over the port official draft.

Vessels usually anchor by 3 or 4 shackles of chain, but there is enough swinging area even for 10 shackles.

Anchorage bottom is mud and shells.

Official Anchorage: Located at Puerto Padre Bay at following position: Lat. 21° 14′ 46″ N., Long. 76° 33′ 34″ W.

Max. length permitted 170 m.

Vessels usually anchor by 3 or 4 shackles of chain but there is enough swinging area for 8 or 9 shackles.

Draft allowed to vessels 25 ft. Anchorage bottom is mud and shells.

(5) TIDAL VARIATION: Tidal variation at this port averages 2 ft. 3 in.

(6) BUNKERS: Bunkers not available at this port.

(7) WATER: *(Potable or for boilers):* When water is delivered at this port it is done by railroad tank-cars which have to bring it a great distance. The tank-cars are emptied at a deposit from which it is pumped to vessel.

Due to combined factors of frequent dry spells and transportation problems, water deliveries at Puerto Padre are deficient and not reliable, and are only effected if the vessel is docked at pier No. 1.

Price: £2.80 per ton.

Delivery rate: Not possible to be determined.

(8) PAPER/WOOD DUNNAGE: No wood dunnage available at this port.

Paper dunnage must be requested well in advance because it is brought to port from the town of San German.

(9) REPAIRS: There is no repair shop at this port, however in case of winch damage or any other light repair, arrangements can be made with the shop management of Antonio Guiteras sugar mill to make the repair.

(10) PORT AUTHORITIES: Port Authorities are located at Puerto Padre city and Cayo Juan Claro, but vessels can proceed directly to Puerto Carupano, Cayo Juan Claro, where they are cleared by authorities.

(11) WORKING HOURS:

Monday to Friday: 0700–1100 hrs. – 1300–1700 hrs.
Saturday: 0700–1100 hrs.

(12) PORT OPERATIONAL CAPACITY: Four vessels can be operated simultaneously. One at pier No. 1 discharging dry cargo, one at pier No. 2 loading molasses or discharging fuel oil, one at the salt mill pier loading coastal trade of bagged salt and one at the new bulk raw sugar shipping plant pier.

(13) KIND OF CARGOES HANDLED BY THE PORT: Importation: Occasionally jute bales or general cargo.

Exportation: Bulk raw sugar and molasses.

Coastal Trade: Discharge of fuel oil and loading of salt.

(14) TRANSPORTATION: Transportation between Cayo Juan Claro and Puerto Padre is performed by road and also to Antonio Guiteras sugar mill.

Transportation to the Port of Manati is rather difficult and best advisable way of travelling is by road to Victoria de las Tunas then by passenger train to Argelia Libre sugar mill and finally another rail transport to Manati.

From Puerto Padre city to Havana or vice versa there is a schedule bus line with two daily departures.

From Cayo Juan Claro, there is a distance to:

Antonio Guiteras sugar mill (formerly Delicias)	8 km.
Puerto Padre City	13 km.
Manati (65 km. to Victoria de las Tunas and then 64 km. to Manati)	129 km.

There is also a bus line Cayo Juan Claro/Antonio Guiteras/Puerto Padre with several daily departures.

(15) COMMUNICATIONS: The only means of communications at Cayo Juan Claro are telephone and telex. There is a post office also, but no telegraph service.

Nearest telegraph service is available at Antonio Guiteras sugar mill and whenever telex connection cannot be obtained with the Agency, the message should be sent marked urgent to Mambisas Delicias and also a telephone call must be placed, depending on the importance and urgency of said message.

Vessels navigating to Cuba can communicate with "CLA" Havana Radio Station which relays the message immediately to the Puerto Padre Agency.

Masters must send their ETA messages simultaneously to Mambisas Puerto Padre and Mambisas Habana.

(16) MAIL AND PARCELS: Should be sent to the Main Offices at Havana, from where it will be sent to Puerto Padre by the quickest means insuring delivery.

(17) AGENCY ADDRESS: Office address:

Cayo Juan Claro (Puerto Carupano).
Tel.: 210-2 (office), 108-2 (night).
Cable: Mambisas Puerto Padre. Telex: 021122.

Agency works VHF on Channel 16.

Postal address:

Empresa Consignataria Mambisa, Agencia Puerto Padre,
Apartado No. 38,
Central Antonio Guiteras,
Delicias, Prov. de Oriente.

Puerto Padre Agency personnel also attends the port of Manati.

(18) OPERATIONS AT BAY OR ANCHORAGE: No operation at bay or anchorage is performed at this port.

(19) MEDICAL ATTENTION TO CREW MEMBERS: Crew members requiring medical attention are treated at Puerto Padre Regional Hospital, and those requiring dental care at Puerto Padre Dental Clinic.

When specialised medical care is required, patients are sent to Lenin Hospital in the city of Holguin, distance 70 km.

(20) PLACES OF OPERATIONS: Piers No. 1 and 2 are located on the West side of Cayo Juan Claro.

Salt Mill pier is located on the East coast of the entrance channel, just in front of Pt. Gracia, and about 1.75 miles from piers No. 1 and 2.

(a) Pier No. 1 (Formerly known as Sugar Pier): It is a coastal pier built entirely of hard wood.

Two narrow gauge railroad tracks run along the length of the pier.

Loaded cars enter by the North end of pier and after discharging are taken out by the South end.

Trucks can operate at this pier, but are not used for sugar cargoes.

Length 523 ft., max. length permitted to vessels 557 ft. Width 32 ft. Draft 27-28 ft.

Cargo handled by this pier:

Importation: Occasionally general cargo or jute bales.

Coastal trade: Occasionally general cargo.

No water or bunkers available by pipe-line. Water available by railroad tank-cars (see Item No. 7 Water).

Berthing operation performed only during daylight hours.

(b) Pier No. 2 (Formerly known as Molasses and Oil Pier): It is a steel and hard wood construction 271 ft. long, of which 235 ft. corresponds to a passage 7 ft. wide along which run the pipe-lines and a catwalk, ending in a platform 36 ft.×36 ft.

Vessels operating at this pier, berth across it, forming a "T" shape.

Length 271 ft., max. length permitted 557 ft. Draft 26-28 ft. Width 7 ft. Platform 36 ft.×36 ft.

Cargo handled by this pier:

Export: Molasses.

Coastal trade: Discharge of fuel oil.

Berthing operation performed only during daylight hours.

No water or bunkers available by pipe-line or any other means.

(c) La Salina Pier: Located at the entrance channel East coast, just in front of Pt. Gracia.

It is a small coastal pier built to ship coastal trade cargo of salt.

Berthing length 44 ft. Width 22 ft. Max. length allowed 192-200 ft. Draft 12 ft.

(21) PORT AUXILIARY EQUIPMENT: This port has no auxiliary equipment.

(22) PLAN OR WORKS UNDER WAY FOR IMPROVEMENT OF PORT FACILITIES: At the present time new deposit tanks for petroleum products are being built to increase greatly the port storage.

Also a water reservoir and an above ground tank will be built, and in the future it will be possible to supply water by pipe-line to vessels docked at pier No. 2.

(23) TANKER INFORMATION: Puerto Padre pier No. 2:

Fuel Oil: One connection 8 in. diameter.
Diesel Oil: One connection 8 in. diameter.
Molasses: Two connections 8 in. diameter.

SUB-PORT OF MANATI:

(1) LOCATION: This port is located on the North coast of Cuba: Lat. 21° 24′ 00″ N., 76° 47′ 40″ W.

The Port of Manati lies on an arm in the sea, through the centre of which runs a narrow and deep channel, leading to the shallow bay of Sabanalamar or Manati.

This arm in the sea is about 3 miles long and 800 m. wide at the entrance mouth, between Pt. Roma and Pt. Jesus, and 700 m. at its end, when it reaches Sabanalamar Bay.

Manati is located on the West coast of the arm in the sea, at about 2.5 miles from Pt. Roma and 0.5 miles from the end of it.

The port of Manati exports the production of sugar mill Argelia Libre formerly known as Manati.

(2) PILOT. *Where Pilot should be taken and distance to Place of Operation:* Pilots board the vessels at one mile off buoy No. 1, at the entrance of the port, but if there is rough weather, then only half mile off. From this place to Manati pier there is a distance of 3 miles.

As there is no pilot station at Manati it is important that ETA messages be received well in advance.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: Port is entered by a narrow and deep channel which averages depths from 50 ft. to 60 ft., with the exception of a pass near Carenero Shoal, where depth is 38 ft. at low tide.

The channel bottom is rather irregular, being sandy at some places and rocky at others, the latter prevailing on most of its course and bordered at both sides by shoals and banks.

The channel course is almost straight with very slight turns, which offer no difficulties for manoeuvres.

Vessels enter following the course of channel, that is from North to South and in arriving in front of the pier, they drop anchor in order to turn around and dock bow facing North, that is facing the port entrance.

For entering the port as well as for docking, manoeuvres are performed with the flood of high tide, because at ebb tide, tidal currents have a tendency to push the vessel against the pier.

Docking vessels bow facing North facilitates the sailing manoeuvres with the max. allowable draft 30 ft. 6 in.

Incoming vessels draft is limited due to the narrowness of the channel, which limits the swinging area to 600 ft. when turning vessel around in order to dock bow facing North.

It is not recommended to dock vessels bow facing South because it endangers the docking operation.

Incoming vessels draft limitations:

	Vessel length	*Max. draft*
Liberty type vessels	442 ft.	30 ft.
Vessels up to	500 ft.	26 ft.
Vessels up to	525 ft.	20 ft.
Vessels up to	560 ft.	17 ft.

In some exceptional cases 560 ft. length vessels have entered this port but it is advisable to nominate this type of vessels to operate at any other suitable ports because at Manati the max. advisable length allowed to vessels is 525 ft.

Entrance to port is effected only during daylight. Sailing from port can be effected in day or night-time. Sailings at night-time are accomplished by mutual agreement between Masters and Pilots, taking into consideration the length and manoeuvrability of vessel.

All port navigational signals are properly placed and in good working order.

Approaching Manati, at the West side of the port entrance Pt. Roma lighthouse can be seen, raising 42 ft. above high tide; its white light is visible up to 19 miles away.

(4) ANCHORAGE: Manati anchorage is located in front of the pier and at this place, from West shore to East shore there is only a distance of 700 m.

Anchorage swinging area is 600 ft. max.

From above information it should be understood that Manati anchorage does not meet minimum conditions, not even for medium size vessels.

During the last few years no vessels have anchored at Manati.

As the port can only berth one vessel and there is no possibility to anchor a vessel to wait for berth, it is most important that a close co-ordination is established between Puerto Padre Agency and previous port of call in order not to dispatch the ship to Manati until Puerto Padre Agency advise that Manati pier will be available for operations.

(5) TIDAL VARIATION: Tidal variation at this port averages 2 ft. 6 in.

(6) BUNKERS: No bunkers available at this port.

(7) WATER *(Potable or for Boilers):* Water is brought to the port by railroad tank-cars from Argelia Libre sugar mill, distance 20 km.

Tank-cars discharge at a deposit from which it is pumped to vessels alongside pier.

Due to combined factors of frequent dry spells and transportation problems, water supply at Manati is not to depended upon.

Price per ton $3.00.

Daily delivery rate is impossible to determine.

(8) PAPER/WOOD DUNNAGE: No dunnage materials available at Manati.

(9) REPAIRS: There is no repair shop at this port but in case of winch breakdown or any other light repair, there is a possibility to repair at sugar mill Argelia Libre repair shop.

(10) PORT AUTHORITIES: Under Cuban Custom laws and regulations, Manati is a sub-port of Puerto Padre, therefore all Authorities are located, as explained under No. 10, at Puerto Padre, nevertheless vessels nominated for operations at Manati can proceed directly to the port, where authorities clear the vessels.

(11) WORKING HOURS:

Monday to Friday: 0700–1100 hrs. – 1300–1700 hrs.
Saturday: 0700–1100 hrs.

(12) PORT OPERATIONAL CAPACITY: Only 1 vessel can be operated at a time. Only 1 vessel at a time can be within port premises, because pier can only berth 1 vessel and there is no anchorage at this port.

(13) KIND OF CARGOES HANDLED BY THE PORT: Importation: Railroad sleepers, bagged fertilisers, jute bales and occasionally general cargo.

Exportation: Bagged raw sugar and molasses.

Coastal Trade: Discharge of fuel oil.

(14) TRANSPORTATION: Transportation to and from Manati is rather difficult. Although road transportation is a possibility, it is not advisable due to bad condition of roads.

Best means of transportation is by train to Victoria de las Tunas, distant 64 km., and from there transportation is available to any place or city of the nation because through this city cross the main railroad system and the Central Highway.

(15) COMMUNICATIONS: At this port the only means of communication is telephone.

As all information to or from Manati is attained through Puerto Padre Agency, please see Puerto Padre under same number.

Masters must send their ETA messages simultaneously to Mambisas Puerto Padre and Mambisas Habana.

(16) MAIL AND PARCELS: At Manati there is no post office. All mail and parcels must be sent to the main office at Havana, from where it is relayed to Manati by the quickest means deemed to ensure delivery.

(17) AGENCY ADDRESS: Manati is attended by Mambisas Puerto Padre Agency personnel and there is no office at Manati, however, the Agent attending a vessel at Manati can be reached at Minaz office, tel. 146. At night and for urgent matters he can be reached at Manati Chief Pilot tel. 144-15 (Please see Item (17) under Puerto Padre).

(18) OPERATIONS AT BAY OR ANCHORAGE: No operations at bay or anchorage performed.

(19) MEDICAL ATTENTION TO CREW MEMBERS: Crew members requiring medical attention are treated at Manati Polyclinic, but the majority of cases are treated at Argelia Libre Hospital, where there is also a Dental Clinic.

Cases requiring surgical or specialised treatments are sent to Lenin Hospital at Holguin.

(20) BAGS LOADED PER SLING: As official rate, 4 bags of raw sugar 100 kilos each are supposed to be loaded per sling, but in order to expedite the loading operation 6 bags are actually loaded.

(21) EQUIPMENT TO LOAD BULK RAW SUGAR EX-BAGS: The port has 3 complete sets of equipment to load bulk raw sugar ex-bags, powered by electric motors.

(22) PLACE OF OPERATION: Manati pier has the shape of an "L" and projects from the West coast of the arm of sea toward the centre of it seeking the border of the deep channel.

It goes straight out and then turns Northward in a 90° angle.

The 90° angle constitutes its South end, and from there to the head of pier, or North end, it is 465 ft. long, having at this end a fixed red light.

As is clear by the above description, pier has an East and a West side, but only the East side is used because the West side does not have enough water to operate vessels.

It is a hard wood construction supported by concrete piles. Bottom alongside pier is soft (mud and sand) along three-quarters of its length from North to South except at the South end where it becomes shallow, hard and rocky, which renders worthless about 70 ft. of docking space.

Pier has double standard railroad tracks and a single narrow gauge track.

It is not possible to operate trucks at this pier.

Manati Pier (Also known as La Gloria Pier): Length 465 ft. Max. length allowed 525 ft. Max. draft 30 ft. 6 in.

No water or bunkers available by pipe-line.

Possibility of obtaining water by railroad tank-cars (see Item (7), Water).

Tanker Information:

Molasses: 2 connections 8 in. in diameter.

Fuel Oil: 1 connection 8 in. in diameter.

(23) PORT AUXILIARY EQUIPMENT: This port has no auxiliary equipment.

(24) PLAN OR WORKS UNDER WAY FOR IMPROVEMENT OF PORT FACILITIES: None at the present time.

SANTA CRUZ DEL SUR: (See Late Plans)

GUAYABAL (Sub-port of Santa Cruz del Sur):

(1) LOCATION: This port is located on the South coast of Cuba: Lat. 20° 42′ N., Long. 77° 36′ W.

Guayabal is a small town and port at a distance of about 20 miles East of Santa Cruz del Sur, both located on the extreme Northwestern part of the semi-circle of coasts that forms the Guacanayabo Gulf.

(2) PILOT. *Where Pilot should be taken and distance to Place of Operation:*

The Pilots board the vessels at the entrance of Cuatro Reales channel, at the following geographical position: Lat. 20° 27′ 00″ N., Long. 78° 00′ 30″ W.

At this place the vessel is at 1.5 miles East of Carapacho Cay, where the lighthouse of the same name is located.

From this point to Guayabal pier is a distance of 27 miles.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: The entrance to the port is effected through Cuatro Reales channel which in its lowest part is 45 ft. deep and 319 m. wide.

In this narrowest part of the channel there is a turn of about 20°, where precautions must be taken.

Transit of the channel may be performed during day or night and there is no limitation to the length or draft of the vessels but the conditions and limitations of Guayabal pier and inner harbour which must be taken into consideration and are fully explained under Item No. 22.

No tugboat assistance is required to enter or sail from this port.

From Guayabal pier to the South there is a dredged channel of 2,474 m. in length and 60 m. wide. At about 80 m. from the pier head, the channel opens in the shape of a funnel and forms Guayabal's inner harbour which is 255 m. wide.

The above mentioned channel was never racked and due to that fact its bottom is irregular with loose stones and deep caves, which causes anchors to foul and affects the vessels manoeuvres, but in the inner harbour there is no such problem.

Entrance to the port can be effected during day or night but sailing with draft of 32 ft. 6 in. is only possible with high tide.

(4) ANCHORAGE: There is ample anchorage area of hard mud bottom from the South of the buoys marking the entrance to the dredged channel which leads to the dock, up to about 3 miles to the S.W. The average draft is 40 ft.

(5) TIDAL VARIATION: The tidal variation of the port is 1 ft. 6 in.

(6) BUNKERS: Bunkers cannot be obtained at Guayabal.

(7) WATER *(Potable or for Boilers):* Can be supplied when docked at a price of $2.00 per ton by pipe-line to both sides of pier.

The average delivery rate is from 5 to 10 t.p.h. (See details under Item No. 22(a) and (b).)

(8) PAPER/WOOD DUNNAGE: In the operation of loading raw bulk sugar, paper or wood dunnage is not used, as a general rule, but if for some reason dunnage materials are needed, the vessel should arrive supplied with it, because in Guayabal it is impossible to obtain such materials.

(9) REPAIRS: There is no repair shop at this port.

(10) PORT AUTHORITIES: The Custom House and port doctor are both located at Guayabal. Port Captain and Immigration have delegations at Guayabal, and the remaining Authorities, including pilot station, are located in Santa Cruz del Sur.

Nevertheless, ships are cleared at Guayabal by all Authorities.

Under Cuban Custom Regulations, Guayabal is a sub-port of Santa Cruz del Sur.

(11) WORKING HOURS:
Monday to Friday: 0600 – 0800 hrs. – 0830 – 1100 hrs.–1200 – 1530 hrs.
Saturday:
Sunday: 0600 – 0800 hrs. – 0830 – 1030 hrs.
When it has been necessary, work has been performed.

(12) PORT OPERATIONAL CAPACITY: Two vessels can operate simultaneously, as per instance: One at the West side of the pier loading sugar and another at the East side loading molasses or alcohol or discharging fuel oil.

(13) KIND OF CARGOES HANDLED BY THE PORT:

Exportation: Raw bulk sugar, molasses or alcohol.

Importation: Fuel oil and occasionally empty jute bags or spares for the sugar mills of the vicinity.

Coastal Trade: Fuel oil (discharge).

(14) TRANSPORTATION: Transportation to and from Guayabal is difficult.

The best advisable means are the following:

From Havana there is 1 daily bus to "Amancio Rodriguez" Sugar Mill.

From Camaguey there are 3 daily departures to "Amancio Rodriguez".

From "Amancio Rodriguez" to Guayabal there are 2 daily departures of rail-bus and 3 daily departures of buses (during dry season only).

Bus travels by embankment road from "Amancio Rodriguez" to Guayabal, but a paved road between those 2 points is under construction.

(15) COMMUNICATIONS: Communications between Guayabal and Santa Cruz del Sur are rather poor.

By means of relays Guayabal/Amancio Rodriguez/Camaguey, telephone communication may be obtained with Havana and other Cuban ports, but owing to the relay system necessary to obtain communication, it is of dubious value in urgent matters.

Radiograms (RCA) can be sent/received by means of telephone call Guayabal – Camaguey.

In the Bulk Sugar Terminal there is telex, but due to limitations of lines it is frequent to encounter difficulties to obtain communication.

ETA messages from Masters should be sent Mambisas Santa Cruz del Sur and Mambisas Habana, simultaneously.

(16) MAIL AND PARCELS: Owing to the transport difficulties explained before, all mail should be sent to Mambisas Main Office at Havana. From there it will be sent to Guayabal by the fastest route.

(17) AGENCY ADDRESS:

Postal Address;
Empresa Consignataria Mambisa,
Agencia Guayabal,
Apartado No. 49,
Santa Cruz del Sur, Prov. de Camaguey.
Office Address:
Guayabal Bulk Sugar Terminal,
3rd Floor,
Telex: 031126,
Telephone: No. 45–6 and No. 8,
Cable: Mambisas Santa Cruz del Sur.

(18) OPERATIONS AT BAY OR ANCHORAGE: No operations at bay or anchorage are performed.

(19) MEDICAL ATTENTION TO CREW MEMBERS: At Guayabal medical services can be rendered by a Medical Consulting Office.

For X-rays of dental care patients are sent to "Amancio Rodriguez".

In cases requiring a specialist, surgical attention, etc., or for hospital treatment, patients are sent by ambulance to Camaguey Hospital, distance 135 km. from Guayabal.

(20) BAGS LOADED PER SLING: No bagged sugar is shipped at Guayabal.

(21) EQUIPMENT FOR LOADING RAW SUGAR EX-BAGS: All sugar is loaded by the Bulk Raw Sugar Terminal by modern methods, and no sugar ex-bags is loaded.

(22) PLACE OF OPERATIONS: All operations performed at this port are effected at Guayabal pier, of which full details are given under Item No. 22(a).

Notwithstanding, it is deemed necessary to clarify the general characteristics of the place before going into details.

The West side of the pier is specially conditioned for loading bulk raw sugar mechanically and is the deepest side where vessels can be loaded up to 32 ft. 6 in. for sailing at high tide or up to 30 ft. 6 in. to sail at any time.

It must be understood that such draft of 32 ft. 6 in. is given only for sailing loaded, but does not indicate that an arriving vessel with 32 ft. in. draft can dock, even at high tide.

This situation is originated by the dimensions of the manoeuvring area around the pier.

Max. draft allowable for vessels arriving to complete cargo at Guayabal (molasses, alcohol, or sugar) at the West side of pier is 27 ft.

A tanker nominated for discharging fuel oil at Guayabal must arrive with a max. draft of 30 ft. 6 in. to be docked at the West side, bow facing shore, and must discharge until a draft of 27 ft. or less is attained, in order to turn around and sail out.

At the East side of the pier vessels can dock bow facing shore, with max. draft of 24 ft. fore and 27 ft. aft.

Vessels nominated to load bulk raw sugar at Guayabal must arrive clean and ready to load.

Any undesirable material or any remaining dunnage materials, must be discharged at a previous port, because at Guayabal the only available personnel are those operating the equipment of the Bulk Raw Sugar Terminal and no stevedores are available.

When jute bales or any other cargo is discharged at Guayabal, stevedores from other ports are used.

The pier is a solid and well cared construction of concrete.

Guayabal Pier:

(a) West. Length 508 ft., max. draft allowed 32 ft. 6 in. (for sailing high tide), 30 ft. 6 in. (for sailing any tide), max length of vessel 200 m.

On this side is where the equipment for loading bulk sugar operates. The boom of the equipment can reach out up to 10.36 m. (34 ft.), from the outer edge of the pier.

Vessels loading bulk raw sugar can be supplied with water at a rate of 5 t.p.h. as long as the loading equipment is working and 10 t.p.h. when it is not working.

Kind of cargoes handled by this side: Bulk raw sugar, molasses and alcohol.

Occasionally: Fuel oil, jute bales and spare parts for sugar mills.

(b) East. Length 508 ft., max draft allowed 24 ft. fore and 27 ft. aft (bow facing shore), max. length 200 m.

On this side of the pier vessels can be supplied with water at a rate of 10 t.p.h.

Kind of cargoes handled by this side: Fuel oil, molasses and alcohol.

(23) AUXILIARY EQUIPMENT OF THE PORT: There is no auxiliary equipment at this port.

(24) PLAN OR WORKS UNDER WAY FOR IMPROVEMENT OF PORT FACILITIES: At the present time dredging of the inner harbour is under way in order to widen the space of manoeuvres, specially at the West side of the pier.

It is believed that on conclusion of the works the restrictions for vessels arriving loaded will be lifted or at least improved greatly.

Because it is impossible to close the port to accelerate the completion of dredging, the works are supposed to last up to a time yet not defined.

SANTIAGO DE CUBA (See Late Plans)

(1) LOCATION: This port is located on the South coast of Cuba, on the N.E. extremity of the bay also named Santiago de Cuba. Lat. 19° 50′ N., Long. 75° 52′ W.

It is the second and most important port of Cuba, after Havana.

The bay is ample, sheltered, landlocked by high grounds and mountains, offering vessels within its premises the security of a safe port.

(2) PILOT: *Where Pilot should be taken and distance to Places of Operations:* Pilots board vessels 1 mile off the port mouth and from that place there are the following distances to:

Port Piers: 5 miles.
Inner Anchorage: 4.5 miles.
Petroleum Refinery Pier: 2.5 miles.
Outer Anchorage: 2 miles.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: The entrance channel averages a width of 80 m. (263 ft.). Its course in the first half mile is hard bottom, the next mile is sand-muddy and the rest, about 2.5 miles, soft mud.

On its course there are some turns that do not offer great difficulties but it may be considered that channel and port entrance are narrow.

Vessels up to 702 ft. length and 36 ft. draft can enter to or sail from the port during morning hours, that is, from 0600 to 1100 hrs. at regular local time or 0700 to 1200 hrs. Summer local time.

Vessels not exceeding 600 ft. length can enter to or sail from port in the morning or in the afternoon.

The above detailed information applies to tanker vessels, which are the largest vessels calling at Santiago.

Limitations to dry cargo vessels and others are dependent upon the kind of cargo and the pier where vessel is to be operated, in which case it is recommended to check under Item No. 22. (Places of Operations).

(4) ANCHORAGES: *Inner Anchorage:*

Located from the North of Ratones Cay up to the West of buoy No. 20. Can accommodate several vessels.

Limitations to vessels: Draft 30 ft., length 702 ft.

Outer Anchorage: Located West of Pt. Gorda and just in front of refinery piers. Can accommodate 1 or 2 vessels and is used mainly by tankers.

Max. draft: 36 ft. Max. length allowed 702 ft.

(5) TIDAL VARIATION: Tidal variation at this port averages 1 ft. 3 in.

(6) BUNKERS: Vessels can be supplied with bunkers at this port.

Bunkers available are regular fuel oil and regular diesel oil, and by *regular* is meant whatever type of bunker is stored at shore tanks, because there are no possibilities to obtain I.F.O. mixtures (Intermediate Fuel Oil), also known as marine fuel oil, at Santiago.

Fuel oil is delivered by a 380 ton capacity barge.

Diesel oil is supplied to vessels by means of tank-trucks.

Diesel deliveries are limited as to quantities and are rather inconvenient at some piers, and at Frank Pais pier it is impossible to effect any delivery by truck.

Tanker vessels while operating at Refinery pier can obtain bunkers if the order is placed 48 hours before intended delivery.

(7) WATER *(Potable or for Boilers):* Fresh water is supplied to vessels by means of a 120 ton capacity barge.

Price: $2.00 per ton.

Vessels operating at Romero Pier, occasionally and dependent upon city water supply at the time of delivery, can obtain fresh water by pipe-line.

(8) PAPER/WOOD DUNNAGE: Vessels can obtain dunnage material at this port if requested well in advance; if navigating to Santiago by cable request to Mambisas–Santiago de Cuba or if in port by a letter to the Agent.

(9) REPAIRS: Repairs can be effected but requisition must be placed in advance in order that the technician may determine if repairs can be made, informing the cost of repair to vessel's administration.

(10) PORT AUTHORITIES: All Port Authorities are located within the limits of the city and port of Santiago de Cuba.

(11) WORKING HOURS:
Monday to Saturday: 0700 – 1300 hrs., 1300 – 1900 hrs.
Sunday: Worked if vessel will conclude her operations.

Although above working periods are the official working hours of this port, actually whenever port conditions (as to weather and personnel) permit performing extra shifts, work periods are as follows:

Monday to Saturday: 0600 – 1300, 1300 – 2040, 2040 – 0400 hrs.

(12) PORT OPERATIONAL CAPACITY: The port is able to operate 13 vessels simultaneously, that is, including tankers, bulk grain vessels, dry cargo vessels and coastal trade vessels, not counting the possibility of operating one vessel at anchorage.

Port personnel consists of 50 gangs.

(13) KIND OF CARGOES HANDLED BY THE PORT: Importation: Bulk wheat and corn, general and heavy cargoes, crude oil and by-products, cement, flour, steel, machinery, equipment, etc.

Exportation: Bagged raw sugar, minerals, molasses, rum, marble, coffee, etc.

Coastal Trade: General cargo, petroleum products and cement.

(14) TRANSPORTATION: Santiago de Cuba is well connected by railroad and highway with the cities and towns of Oriente province and the rest of the nation.

There are also several passenger airway services such as: Santiago/Havana, Santiago/Moa, Santiago/Guantanamo, Santiago/Nicaro, Santiago/Baracoa and Santiago/Manzanillo.

(15) COMMUNICATIONS: Santiago has very good means of communications: Telephone service, local, long distance and International; Western Union and RCA cable systems; Telegraph; Post Office, Airmail and Air-express.

The Agency is connected to the National Telex System, which is the quickest means of communication with Santiago.

Vessels navigating to Cuba can communicate with our Santiago Agency through "CLA" Havana Station which relays the messages promptly to Santiago.

While navigating in Cuban waters vessels can communicate with "CLM" Santiago Radiotelegraphy Station, which also relays the message to Santiago Agency immediately.

Masters must send their ETA messages simultaneously to Mambisas Santiago de Cuba and Mambisas Habana.

(16) MAIL AND PARCELS: Mail should be sent by Airmail, parcels and spare parts by Air-express.

Any mail or parcels received at Havana by our Main Office, destinated Santiago, are sent daily by Air-express to Santiago de Cuba Agency, which use the same method from Santiago to Havana.

(17) AGENCY ADDRESS:

Empresa Consignataria Mambisa
Agencia Santiago de Cuba,
Jose Antonio Saco No. 10,
Apartado No. 522,
Santiago de Cuba, Prov. de Oriente.
Telephones: 7489 and 2834 – Night: 3128
Telex: 02220
Cable: Mambisas Santiago de Cuba
Agency VHF works on Channel 16.

(18) OPERATIONS AT BAY OR ANCHORAGE: Discharging operations are performed frequently at Inner Anchorage.

(19) MEDICAL ATTENTION TO CREW MEMBERS: Crew members requiring medical care attend Santiago Provincial Hospital where they can be hospitalised if necessary. Dental care is also rendered at this hospital.

(20) BAGS LOADED PER SLING: 6 bags 100 kilos each of raw sugar.

(21) EQUIPMENT TO LOAD BULK RAW SUGAR EX-BAGS: There are 5 complete sets of equipment for loading bulk raw sugar ex-bags, powered by electric motors.

(22) PLACES OF OPERATION:

The places of operations of the port of Santiago de Cuba are concentrated mostly on the N.E. corner of the bay, just in front of the city, with the exception of Refinery Pier, which is located on the West coast.

(a) Luis F. Mena Gil Dock *(Formerly Malecon):* This installation comprises the whole zone known as Malecon del Puerto and consists, mainly, of a docking area 1,345 ft. long, which, being able to operate three vessels, are regarded as West, Centre, and East berths, but there is no mark or boundary between any of the berths.

West of the Western berth is under construction, but already in operation, a new berth, temporarily known as Western extreme berth and, East of the Eastern berth is a berthing space for barges.

This dock is built of concrete, and was rebuilt and paved recently. As standard gauge railroad tracks run along the length of dock, operations can be performed either by railroad or trucks, or a combination of both.

The particulars of each berth are:

Western Extreme Berth: (New berth): (Known as Malecon Extremo Oeste):

Max. length allowed: 100 m. Draft: 18 ft.

Cargo handled at this berth: general cargo, cement, etc.

Western Berth: (Known as Malecon Oeste):

Draft allowed: 24 ft. fore, 25 ft. aft.

Cargo handled at this berth: bagged raw sugar, general cargo and occasionally lubricating oil.

Centre Berth: (Known as Malecon Centro):

Draft allowed: For Loading: 28 ft., leaving pier at high tide. Under these conditions, vessels rest in 1 ft. of almost liquid mud but this does not interfere with sailing manoeuvres.

For Docking Loaded: 27 ft. even keel. Cargo handled at this berth: bagged raw sugar, general and heavy cargoes.

Eastern Berth: (Known as Malecon Este):

Draft allowed: 23 ft. fore, 26 ft. aft.

Cargo handled at this berth: light general cargo, molasses and petroleum products.

(b) Ferrocarril Pier: This pier out of use since 1972 but rebuilt recently. It is a concrete construction ending in a small platform but vessels do not moor directly to the dock but to 4 solid dolphins; first and last dolphins being 400 ft. apart. Vessels are also secured to belaying cleats situated on shore.

This installation is used for shipping molasses but there is a possibility that pipe-lines for petroleum by-products will be installed, although this has not been confirmed.

Length: 240 ft. Draft allowed: 26 ft.

(c) Rolando Roca Pacheco Pier (Formerly La Maritima): This pier is a complete concrete construction, (both platform and pilings) rebuilding of which was finished in 1973; the installation is in very good condition in all respects, permitting truck and trailer operations alongside vessel, as well as railroad operations, because tracks cross just in front of the pier shore entrance.

North Side: Length: 650 ft. Max. length allowed: 600 ft.

Draft allowed: 25 ft. fore, 26 ft. aft.

Cargo handled at this side: General cargo.

South Side: Length: 650 ft. Max. length allowed: 600 ft.

Draft allowed: 26 ft. fore, 27 ft. aft.

Cargo handled at this side: General cargo.

(d) Romero Pier: This pier is a concrete construction, and although in rather fair condition, needs repairs.

All cargo handled at this pier is on the basis of a trucking operation only.

It is used chiefly for coastal trade vessels but also by medium size vessels, such as refrigerated ships.

East Side: Length: 492 ft. Max. length allowed: 400 ft.

Draft allowed: 14 ft. fore, 19 ft aft.

Cargo handled at this side: general cargo, bagged cement, etc.

West Side: Length 492 ft. Max. length allowed: 400 ft.

Draft allowed: 20 ft. fore, 23 ft. aft.

Cargo handled at this side: General cargo, bagged cement, refrigerated cargo such as lard, butter, frozen fish, etc.

(e) Frank Pais Pier: (Formerly La Molinera): This installation consists of a long narrow passage, at the end of which the vessel is berthed across the installation to 4 solid dolphins. It is used for the discharge of bulk grain (wheat and maize) by mechanical means through conveyors and pipe-lines.

There is no limitation as to length of vessels.

Draft allowed: 30 ft.

(f) Cement Plant Pier: (Known as Muelle del Cemento): This berth is a coastal pier that can accommmodate one vessel.

It is used only for loading cement, either by silos/truck depending upon whether bulk or bagged cement is involved. This installation is well paved and all operations are performed by means of trucks.

As the pier is not long enough, there are solid dolphins at each end of pier, in order to berth securely vessels up to 460 ft. long.

Length: 290 ft. Max. length allowed: 460 ft.

Draft allowed: 22 ft. fore, 23 aft.

(g) Refinery Pier: This pier is located at a small peninsula on the West coast of the bay, its orientation being from North to South and therefore its sides are West and East.

It is a solid, well cared for, concrete construction, having similar facilities at both sides.

Length: 789 ft. Max. length allowed: 702 ft.

Draft: 40 ft. Max. draft allowed: 36 ft.

Bunkers available by pipe-line only to tankers operating at pier. Water available by pipe-line only in cases of extreme urgency and if the refinery, at the time of delivery, can make the water available without prejudice to its own production.

(23) PORT AUXILIARY EQUIPMENT:

One floating crane: 35 tons lifting capacity; 10 shore cranes: ranging from 16 to 5 tons lifting capacity; 40 tractors; 21 fork lift trucks: 70 h.p.; 13 trucks.

Besides, there are several tugboats ranging from 1,200 to 150 h.p., also several cargo barges and other minor port auxiliary equipment not listed.

(24) PLANS OR WORKS UNDER WAY FOR IMPROVEMENT OF PORT FACILITIES: Since 1973 all port facilities admitting repair or rebuilding are included in a plan in order to improve port facilities.

Through this plan several installations have already been rebuilt and others are undergoing repairs.

This plan also includes the installation of water pipe-lines to all piers where possible, in order to supply the vessels while operating.

Luis F. Mena Gil Wharf will be the first to have water installation to supply vessels.

There is a plan for the dredging of the port in the very near future.

TANAMO (See Late Plans)

(1) LOCATION: Tanamo is located on the North coast of Cuba: Lat. 20° 43′ N., Long. 75° 19′ 55″ W.

Tanamo Bay is moderately ample, landlocked, having numerous cays dispersed within.

High ground surrounds the bay, except by the East and S.E.

It is 3.5 miles long by 1.25 miles wide.

Tanamo is mainly a sugar shipping port, but also exports molasses and receives coastal trade shipments of fuel oil.

Tanamo exports the production of Frank Pais sugar mill, formerly Tanamo.

At about 12 km. from the port are the town of Cayo Mambi and Frank Pais sugar mill.

(2) PILOT: *Where Pilot should be taken and distance to Place of Operation:* Pilots board the vessel at about 1 mile off the port entrance. From this place to Punta Gorda Pier, where vessels operate, there is a distance of 5 miles, and to Cayo Mambi Pier, 7 miles.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: Entrance to port is effected through a channel in the form of an "S" with turns up to 90°.

The bottom is rock and sand, its maximum width being 175 m., located between the shoals at both sides of the entrance, and its minimum width 160 m., located in the vicinity of Pt. Gitana.

Channel tends to narrow in the middle of its course and it is here where precautions should be exerted, because it is considered dangerous.

In its deepest part the channel is 162 ft. deep, and its minimum depth is 66 ft.

Limitations as to length and draft of vessels to enter to or sail from this port are those imposed by the place of operation, Punta Gorda Pier:

Draft 19 ft. fore, 22 ft. aft, length 535 ft.

Due to the strong tidal currents it is necessary to wait for slack water, to enter to or sail from this port, which can be effected only in daylight hours.

Vessels up to 500 ft. length do not require tugboat assistance, but from 500 ft. up to 535 ft. tugboat assistance is required.

Due to pier's length, vessels nominated to load sugar should not exceed a length of 450 ft.

(4) ANCHORAGE: Del Medio Cay Anchorage:

Located at about 500 m. West of Bruja Cay.
Draft 28 ft., max. length allowed 535 ft.
Swinging area: About 350 m.
Soft mud bottom but anchors hold well.
It is sheltered from the winds, except those from the S.E.
In the rainy season, when rivers overflow, currents can be felt.

(5) TIDAL VARIATION: Tidal variation at this port averages 2 ft.

(6) BUNKERS: Bunkers cannot be obtained at Tanamo.

(7) WATER *(Potable or for Boilers):* Delivered while docked to Punta Gorda pier, by pipeline. Water is not pumped to vessels, it is supplied by gravity, therefore delivery rate depends upon pressure at pipe-line.

Price $1.00 per ton.

(8) PAPER/WOOD DUNNAGE: Can be obtained with difficulties.

Must be ordered at least 5 days before intended delivery.

Because dunnage materials are brought from Mayari, and transportation problems can interfere with delivery, it is advisable to request dunnage materials at previous port of call.

(9) REPAIRS: There is no repair shop at Tanamo.

(10) PORT AUTHORITIES: Under Cuban Customs laws and regulations, Tanamo is a sub-port of Antilla. Some of the Authorities have delegations at Cayo Mambi, others are located outside of Tanamo, but if ETA message is given sufficiently in advance, all Authorities travel to Tanamo, where they wait to clear the vessel.

(11) WORKING HOURS: Monday to Friday: 0700–1100 hrs. – 1300, 1700 hrs. Saturdays: 0700–1100 hrs. Sundays: No work performed.

(12) PORT OPERATIONAL CAPACITY: There is berthing space for two vessels, but due to lack of port personnel, it is advisable to operate only one vessel at a time.

(13) KIND OF CARGO HANDLED BY THE PORT: Exportation: Bagged raw and refined sugar and molasses.

Importation: None at the present time.

Coastal trade: Discharge of fuel oil.

(14) TRANSPORTATION: Transportation means to and from Tanamo are rather poor. Transportation between Tanamo and Antilla (and other nearby ports) is performed by car.

Last 4 km. of road to reach Tanamo are embankment roads in very bad condition which can be transited only by jeep or truck.

There is a rail car service up to Cayo Mambi.

Best advisable means of travelling is to travel to Nicaro by road and from there fly to Santiago or Havana.

(15) COMMUNICATIONS: Only means of communication at Tanamo is telephone service. However this service is not to be depended upon and it is advisable to notify Antilla Agency well in advance of any instructions or changes pertaining to vessels operations.

(See Item No. (15) under Antilla).

(16) MAIL AND PARCELS: (See Item No. (16) under Antilla).

(17) AGENCY ADDRESS: Tanamo is attended by Antilla Agency personnel.

(See Item No. (17) under Antilla).

(18) OPERATIONS AT BAY OR ANCHORAGE: No operations performed at bay or anchorage.

(19) MEDICAL ATTENTION TO CREW MEMBERS: There is no hospital at Tanamo.

Crew members requiring medical care are treated at Cayo Mambi.

If specialised treatment or hospitalisation is required, patients are sent to Mayari Hospital or Lenin Hospital at Holguin.

(20) BAGS LOADED PER SLING: 6 bags, 100 kg. each of raw sugar. 12 bags, 50 kg. each of refined sugar.

(21) EQUIPMENT TO LOAD BULK RAW SUGAR EX-BAGS: Although raw bagged sugar is shipped, the port lacks this equipment.

(22) PLACE OF OPERATIONS: The place of operation at Tanamo is the pier, located on the West coast of the bay at a small town named Punta Gorda. Pier is built of concrete but is not well cared for and is in need of repairs. Some wooden aggregate at South side of pier crumbled away and interferes with loading No. 1 hatch of vessels. Stern hatches are loaded first, and afterwards the vessel is run astern in order to load No. 1 hatch.

Pier has double narrow gauge railroad tracks at each side.

Sides of the pier are North and South.

Punta Gorda Pier: Length 357 ft., max. length allowed 450 ft.

Drafts: South Side: 19 ft. fore, 22 ft. aft.
North Side: 14 ft. fore, 19 ft. aft.

Water available by pipe-line.
No bunkers available.

Tanker Information: Max. length of 450 ft. for dry cargo vessels only.

Tanker vessels up to 535 ft. can enter and operate at pier.
Fuel oil: 1 connection 12 in. in diameter.
Molasses: 1 connection 8 in. in diameter.

(23) PORT AUXILIARY EQUIPMENT: The port of Tanamo has no auxiliary equipment.

(24) PLAN OR WORKS UNDER WAY FOR IMPROVEMENT OF PORT FACILITIES: None at the present time.

VITA: (See Late Plans)

(1) LOCATION: This port is located on the North coast of Cuba: Lat. 21° 05′ N., Long. 75° 07′ W.

Vita is a small, sheltered, landlocked bay on the North coast of Oriente province.

Vessels within its premises are well protected against all kinds of weather.

This port handles the export of the production of Rafael Freyre sugar mill, formerly Santa Lucia. As it is close to the town of Santa Lucia and due to the former name of the sugar mill, this port is also known as Santa Lucia Oriente.

(2) PILOT: *Where Pilot should be taken and distance to Place of Operation:*

Pilots board vessels 3 miles off the entrance of the port. From this place to the pier of Vita there is a distance of 5 miles.

(3) ENTRANCE TO PORT/CONDITIONS/LIMITATIONS: Entrance channel is narrow, with some turns which become hazardous due to the narrowness of the channel and precautions must be taken for the crossing of all its course.

Channel may be considered dangerous for vessels longer than 450 ft., length and max. allowed to vessels to enter to or sail from this port is 500 ft., max. draft 26 ft.

To enter to or sail from this port it is not necessary to wait for slack water, but entrance or sailing manoeuvres to be performed only during daylight hours.

For vessels longer than 450 ft. up to 500 ft. it is advisable to arrange tug assistance if possible.

While approaching Vita, on the East side of port entrance, Pt. Barlovento lighthouse can be seen, located: Lat. 21° 06′ 01.1″ N., Long. 75° 57′ 39.4″ W., 45 ft. high, above high tide, white light of which flashes twice every 6 secs., visible up to 10 miles away.

(4) ANCHORAGE: Vita anchorage is located at about 190 m. from the pier, but as there is insufficient swinging area, it is only recommended as suitable for medium sized vessels.

(5) TIDAL VARIATION: Tidal variation at this port averages almost 3 ft. (exactly 2.90 ft.).

(6) BUNKERS: Vessels can not be supplied with bunkers at this port.

(7) WATER *(Potable or for boilers):* Can only be supplied in exceptional cases. Occasionally it has been delivered (limited quantities) at the price of $2.00 per ton.

Delivery is effected by a 2 in. gravity pipe-line.
Delivery averages 2 to 3 t.p.h.

It is recommended that Masters always check availability in advance. Water deliveries at Vita are not be be depended upon.

(8) PAPER/WOOD DUNNAGE: Not available at this port.

(9) REPAIRS: There is no repair shop at Vita.

(10) PORT AUTHORITIES: All Port Authorities are located at nearby towns, but travel to Vita in order to clear vessels.

Under Cuban Custom laws and regulations, Vita is a sub-port of Gibara.

(11) WORKING HOURS:

Monday to Friday: 0700 – 1100, 1300 – 1700 hrs.
Saturday: 0700 – 1100 hrs.

(12) PORT OPERATIONAL CAPACITY: Only 1 vessel can be operated.

(13) KIND OF CARGOES HANDLED BY THE PORT: Importation: Jute bales, bagged fertilisers.

Exportation: Bagged raw sugar, molasses.

Coastal Trade: Discharge of fuel oil.

(14) TRANSPORTATION: Transportation to and from Vita is difficult and best advisable means is by car or to travel to the city of Holguin, from where transportation is available to any place or city of Cuba by bus, train or airway.

(15) COMMUNICATIONS: Means of communication of Vita are telephone and telegraph.

Telegraph service is slow for urgent matters. Telephone service at Vita is irregular due to bad lines and, sometimes, it is very difficult to establish communication.

These facts must be taken into consideration when a vessel is operating at Vita, because orders to Vita or information from the port almost always takes 2 or 3 days to reach destination.

Vessels navigating to Cuba can communicate with Antilla Agency through "CLA" Havana Radio Station which relays the message promptly to Antilla.

Vessels cannot communicate directly with Vita.

Masters must send their ETA messages simultaneously to Mambisas Antilla and Mambisas Habana.

(16) MAIL AND PARCELS: Must be sent to the main office at Havana, from where it will be relayed to Vita by the quickest means to ensure delivery.

(17) AGENCY ADDRESS: (See Item No. (17) under Antilla). The port of Vita is temporarily attended by Mambisas Antilla Agency personnel.

(18) OPERATIONS AT BAY OR ANCHORAGE: All operations at this port are performed while vessel is docked alongside pier.

(19) MEDICAL ATTENTION TO CREW MEMBERS: Crew members requiring medical attention are treated at Santa Lucia Hospital.

In cases where surgical or specialised medical treatment is required patients are sent to Gibara Hospital or Lenin Hospital at Holguin.

(20) BAGS LOADED PER SLING: Four bags 100 kg. each of raw sugar.

(21) EQUIPMENT FOR LOADING BULK RAW SUGAR EX-BAGS: Although raw sugar is shipped through this port, Vita lacks such equipment.

(22) PLACE OF OPERATIONS: The pier is located at a village named Vita on a peninsula which projects from the South shore of Vita bay.

The pier lies across the end of the mentioned peninsula, oriented from East to West; the berthing space is the North side since the South side is partially attached to shore.

Along the length of the pier and connected to Rafael Freyre sugar mill, runs single narrow gauge railroad tracks.

Vita Pier: Length 300 ft. Max. length allowed: 500 ft. Draft allowed: 26 ft.

(23) PORT AUXILIARY EQUIPMENT: This port has no auxiliary equipment.

(24) PLANS OR WORKS UNDER WAY TO IMPROVE PORT FACILITIES: None at the present time.

Egypt, Arab Republic of

SAFAGA: (also see page 290).

SHIPMASTER'S REPORT: January 1981.

PILOTAGE: Vessels enter the inner anchorage without Pilot, and are allocated an anchor position by the Harbour Master. Pilotage for berthing is compulsory, and the Harbour Master acts as Pilot.

Entry or departure at night is forbidden, without special permission from the Naval Authorities.

ANCHORAGES: Vessels are allocated an anchor berth in the inner harbour by the Harbour Master. Vessel anchored in the Northern part of the anchorage, in a position with Morewood Beacon bearing 135.5° × 2.8 miles, in 30 m. of water, with 6 shackles of cable out, and no difficulties were experienced, despite a period when wind from the North of force 5, gusting 6, occurred when the ship had a 3,000 tonne coaster alongside.

APPROACHES: Vessel arrived off Safaga Island at approximately 2130 hrs. and no difficulty was experienced in anchoring with Morewood Beacon bearing 334° × 11 cables. The N.E. point of Safaga Island, and the headland near Bir Safaga showed up well on radar, as did Morewood Beacon, once identified.

Upon entering harbour the next morning at first light, a little difficulty was experienced in locating the leading beacons. From outside the harbour, the most prominent object visible is the alumina silo and elevator, and this uncharted feature being mistaken initially for the charted phosphate transporter, we were looking in the wrong place. Once sighted, however, the beacons were found to show up well in the early morning light. (These leading beacons are fitted with Fixed Red lights, but these are only turned on when Naval Vessels are entering or leaving port by night). A can shaped mooring buoy situated in the middle of the inner anchorage just North of the leading line is of assistance, but the buoys marking the dredged channel are non-existent. This mooring buoy, is a handy turning point for ships proceeding to the Northern part of the anchorage.

A partly ruined beacon is visible on the sand spit at the Southern end of Safaga Island approximately 3 cables from Morewood Beacon.

Of the two stranded wrecks charted on the S.W. shore of the inner anchorage, the Northern one (marked PA) has been salvaged. The Southern one is conspicuous, and afloat at high water. It is reported that this one may well be salvaged soon.

There appeared to be little or no tidal stream or current to speak of in the inner anchorage, vessel lying to the wind most of the time.

MAX. SIZE: The largest size of ship handled is about 50,000 tonnes d.w.t., with a max. draft of about 11 m.

RADIO: There is no radio station at Safaga, and telephone/telex links are minimal. Harbour authorities wishing to communicate with ships entering use VHF sets of ships alongside. We maintained a normal sea watch (1 Radio Officer) both at anchor and alongside, and good communications were obtained with Portishead Radio.

TUGS: There are no tugs available.

BERTHING:

Commercial Wharf: Approximately 500 m. in length.

This has 3 berths at present. No. 1 Berth is the one at the N.E. end, No. 2 Berth in the middle, and the alumina berth at the S.W. end. Nos. 1 and 2 Berths are kept exclusively for the discharge of wheat; cement ships use the alumina berth by private arrangement. Depth alongside No. 2 Berth is officially 9.1 m., but reported deeper. (We berthed drawing 9.6 m.) and at No. 1 Berth the depth is stated to be 9.7 m. alongside, but 11.0 m. if barges are placed between the ship and the quay. Works are in progress to extend the commercial wharf N.Eastwards from No. 1 Berth almost up to the Naval Wharf, which extends as marked on the chart.

The Oil Jetty charted to the South of the town is reported to be part of the Naval Base.

CARGO HANDLING: Bulk wheat is discharged by portable pneumatic conveyors (vac-u-vators) into hoppers on the quay, where it is bagged and taken away by lorry. (Discharge rate for this vessel approximately 1,900 tonnes/day).

Alumina is discharged direct to the silo by fixed elevator.

CRANES: There are no cranes on the wharves. It was reported that there is a mobile floating crane, of 15 tonnes SWL at 35 m. radius, although this was not seen by us. A small floating crane is in use for the extension works.

MEDICAL: A doctor is available, and will visit ships at the inner anchorage. Cholera Vaccination Certificates are required, and the doctor will do vaccinations.

DENSITY: 1030.

FRESH WATER: There is a limited supply of fresh water, the quota being 500 tonnes a month for all ships, but this is expensive. A price of $12.00 per tonne was quoted.

FUEL: No fuel oil of any kind available.

CONSULS: None locally.

REPAIRS: The nearest repair facilities are at Suez.

GANGWAY/DECK WATCHMEN: Employment by the ship of shore watchmen is compulsory, and they have to be accommodated on board both alongside and at the inner anchorage. Whilst shore labour is onboard, a policeman is placed on board to guard the ship's accommodation.

SHORE LEAVE: Permitted, passes being issued when ships are alongside, although apart from one hotel there is very little to do in Safaga. Agents can arrange trips to the River Nile, Valley of the Kings, etc., but special passes are required.

GENERAL: *Provisions:* Fresh provisions are available in season, and a chandler will visit ships without prior appointment.

Cargo handled:

The principal activities of the port are:

(i) Import of wheat: approximately 100,000 tonnes/month.
(ii) Import of alumina: 60 – 75,000 tonnes/month. (3 – 4 ships).
(iii) Import of cement: 13 – 15,000 tonnes/month. (1 – 2 ships).
(iv) Export of phosphates: approximately 20,000 tonnes/month. (1 – 2 ships).

(i), (ii) and (iv) are all under the control of the Egyptian Government, (iii) is carried out privately.

SUEZ CANAL: (also see page 291).

SUEZ CANAL AUTHORITY NOTICES:

NOTICE: NO. 430490 (Issued by the Directorate of Transit on 30th November, 1980).

Tug Escort:

We have the pleasure to inform you that during the Transition Period, after completion of the first stage of the Canal Development, escorting of VLCC's, ULCC's, large bulk carriers and other vessels will be as follows:

(a) Loaded vessels under 100,000 d.w.t. will be escorted by one tug if for technical reasons the Suez Canal Authority finds it necessary.
(b) Loaded vessels from 100,000 d.w.t. to 150,000 d.w.t. will be escorted by one tug.
(c) Loaded vessels over 150,000 d.w.t. will be escorted by TWO tugs.
(d) Vessels in ballast over 200,000 d.w.t. will be escorted by one tug.

Above mentioned vessels (a): if over 45 ft. draft; (b), (c), (d) have to prepare TWO polypropylene ropes 16 in. circumference to join the stern to the tug during stopping operations.

The ropes should be eye-spliced to fit in the quick release hook on the tug and with adequate length to give distance between bow of the tug and stern of vessel at about 50 m.

On the vessel these ropes will be made fast on stern bitts port and starboard. The eyes will be hanging over the stern about 2 m. above water and lashed with rope stoppers to break loose when necessary.

NOTE: We have recently been advised that for the time being vessels not equipped with polypropylene ropes of 16 in. circumference may use their best floatable ropes which can resist the tension of the tug (60 tons pull) with allowance for safety and jerk shock loads.

This is the latest information, which will remain in force until a new notice is published.

NOTICE: NO. 430493.

Canal transit documentation:

We append hereunder text of Circular No. 430493, received from the Transit Department, Suez Canal Authority, Ismailia:

Quote:

Appendix to the documents to be produced before transitting the Canal. All vessels in ballast must produce:

(a) The manifest of cargo.
(b) The crew list bearing the rank and the wages of each member of the crew.

These documents are to be produced at the same time, and with the same degree of importance as the Suez Canal Special Tonnage Certificate, and the other official documents during the registration of vessels to take convoy.

NOTICE: NO. 431049 (Issued by the Directorate of Transit on 1st January, 1981).

*See "Suez Canal" page 294.

Reference to our circular No. 430335* concerning steps of increase of beam and draft of transitting vessels. We are pleased to announce that from 3rd January, 1981 vessels with the following beam and drafts will be allowed to transit the Canal.

1. *Large vessels in ballast:*

Vessels with beam up to 180 ft. 6 in. the draft being 28 ft. forward and 32 ft. aft.

2. *Loaded vessels:*

(a) *Southbound Vessels*

The first step for increase of draft as mentioned in our circular 430335 table (D)* is permitted. This step allows vessels with the following draft and beam to transit Southbound.

Beam (ft.)	up to 120	up to 150	over 150
Draft (ft.)	40	36	32

(b) *Northbound Vessels*

Also the first step for increase of draft mentioned in circular 430335* is permitted. This step states the following:

"B-1" *For Vessels transitting at 14 km.p.h.:*

Beam (ft.)	up to 120	up to 150	over 150
Draft (ft.)	42	36	32

"B-2" *For Tanker groups transitting at 13 km.p.h.:*

Beam (ft.-	up to 140	up to 150	over 150
Draft (ft.)	41	36	32

Pilotage:

1. Port Said:
   - (a) For Southbound ships authorised to enter from Port Said East channel Pilots will be boarding ships at waiting area (when weather conditions permit).
   - (b) For Northbound vessels passing through Port Said East channel Road Pilots will be relieving Canal Pilots at Km. 4 and will pilot vessels to Hect. 30.
2. Suez:
   - (a) For Southbound vessels Road Pilots will be relieving Canal Pilots at Km. 160 and will pilot vessels to Hect. 44 (if weather conditions permit).
   - (b) For Northbound vessels with draft more than 38 ft. which will join Northbound convoy direct from waiting area, Pilots will be boarding the vessels in waiting area (when weather conditions permit).

Searchlights:

All Northbound vessels with draft over 38 ft. entering Canal directly from waiting area should have their own searchlight.

NOTICE:
Suez Canal Developments:

Kindly note that from 15th February, 1981 the beam will be increased to max. 190 ft. as follows:

- (a) Southbound and Northbound
  Ballast vessels beam up to 190 ft. draft fore 28 ft., aft 32 ft.
- (b) Southbound general speed 14 km.p.h loaded
  Beam up to 120 ft. max. draft 40 ft.
  Beam up to 150 ft. max. draft 36 ft.
  Beam over 150 ft. and up to 190 ft. max. draft 32 ft.
- (c) Northbound general speed 14 km.p.h loaded
  Beam up to 120 ft. max. draft 42 ft.
  Beam up to 150 ft. max. draft 36 ft.
  Beam over 150 ft. up to 190 ft. max. draft 32 ft.
- (d) Northbound general speed 13 km.p.h. loaded (Tankers and Bulk Carriers group)
  Beam up to 140 ft. max. draft 41 ft.
  Beam up to 150 ft. max draft 36 ft.
  Beam over 150 up to 190 ft. max. draft 32 ft.

It is still unknown as to when the increase of drafts under Phase Two will come into force.

EUROPEAN ECONOMIC COMMUNITY

E.E.C. (Tanker Check List) (See next Page)

German Democratic Republic

ROSTOCK: (also see page 360).

SHIPMASTER'S REPORT: September 1980.

VHF: While the vessel is in port, telephone calls to anywhere inside or outside Germany can be made most conveniently through "Rostock Radio" on VHF Channel 16. The working Channel is 26.

CUSTOMS: The Customs only seal the cigarettes and coffee. Spirits are not sealed. Each crew member is allowed 200 cigarettes.

IMMIGRATION: Immigration are very strict. Shore passes are issued to all crew members. All supernumeraries (e.g. wives on board), have to obtain visas which cost DM5/– each, and have to be paid to the Immigration Authorities, directly by the Master. On completion of discharge the entire ship's company (with the exception of one deck watchkeeper and one engine watchkeeper) are required to remain in their cabins with Passports/Seaman's Books, until the vessel is thoroughly searched by the Authorities for stowaways.

TIME: Summertime, GMT plus 2 hours, is maintained during the Summer months. Standard time is GMT plus 1 hour.

DENSITY: The density of the water at the berth varies from 1000 to 1010 ozs./cu.ft.

Germany, Federal Republic of

KIEL: (also see page 370).

SHIPMASTER'S REPORT: September 1980.

PILOTAGE: The following may be useful to Masters wishing to transit the canal and approaching from the Baltic.

"Kiel Pilots" may be contacted on VHF Channel 16 and Channel 14, 2 hours before arriving at Kiel Lighthouse, and a Pilot for Kiel Harbour may be requested.

For vessels intending to transit the canal, send a message at least 3 hours in advance to "Forde Lotse" – Kiel by radio giving ETA, draft, g.r.t. and destination. Any request to arrange a Pilot at the other end may also be included in the message.

RESTRICTIONS: The maximum air draft allowed in the canal is 40 m. (from waterline to highest point of the ship).

Greece

PYLOS: (also see page 386).

Correct position: 36° 55′ N., 21° 42′ E.

Hong Kong

HONG KONG: (also see page 406).

SHIPMASTER'S REPORT: October 1980.

The following message was received from the Hong Kong Authorities yesterday.

"150455Z/FEB/79 MARDEP TO FOLLOW – TO ALL SHIPS – WITH IMMEDIATE EFFECT AND UNTIL FURTHER NOTICE ALL SHIPS BOUND FOR HONG KONG MUST OBTAIN PERMISSION FROM MARDEP BEFORE ENTERING THE WATERS OF HONG KONG STOP A CONTRAVENTION OF THIS DIRECTION WILL RENDER OFFENDING MASTERS LIABLE TO A FINE OF TWENTY THOUSAND DOLLARS AND TO IMPRISONMENT FOR ONE YEAR STOP WHEN APPLYING FOR PERMISSION TO ENTER THE WATERS OF HONG KONG MASTERS MUST PROVIDE THE FOLLOWING INFORMATION TO MARDEP (1) NATIONALITY (2) NUMBER OF PEOPLE ON BOARD (3) TYPE OF VESSEL (4) REASON FOR CALL (5) ETA ABEAM WANGLAN ISLAND STOP YOU ARE REQUIRED TO ANSWER ALL SIGNALS INCLUDING THOSE PASSED FROM ROYAL NAVY VESSELS PATROLLING THE APPROACHES TO H.K. WHEN APPROACHING HONG KONG – MARDEP HONG KONG 150455GMT/FEB/79".

Indonesia

SALAWATI: (also see page 455).

The following is an update of the text appearing on pages 455 – 458.

DOCUMENTS: Final clearance formalities will be carried out aboard the vessel, *either at the moorings or in the anchorage area, as circumstances dictate.*

RADIO: *Procedure for appointing Agent:*

Owners should appoint "Pertaminaship" Jakarta, as General Agent by cable/telex which in turn will appoint Pertamina Unit V as handling Agent to attend the vessel at Salawati Marine Terminal. Pertaminaship should be notified two weeks prior to tanker's arrival.

General Agent:	Pertamina Directorate of Shipping and Telecommunication 32 – 34 Jalan Yos Sudarso P.O. Box 327 Tanjung Priok, Jakarta Indonesia
Cable Address:	Pertaminaship Jakarta
Telex No.:	DKT 49285 Answerback Pertamina
Telephone:	491185 (11 lines) Ext. 225, 315, 335 & 350 (Tanker Agency & Operations)

LOADING: All ships using Salawati Marine Terminal must be able to connect their manifold to the 10 in. flanges. Masters are reminded that it is the ship's responsibility to provide such reducers as may be required to make the connection. The Terminal Official will report unsatisfactory conditions to the company Area Superintendent or his designated alternate, who may, in turn, reject the ship until corrections are fully made. All costs accruing there from will be for the ship's account.

Vessels which may consider the lifting capacity of their gear to be marginal should strengthen their gear accordingly. A common way to do so is to rig a second topping lift on the boom.

Typical Salawati Crude Analysis:

Gravity at 60°F	40° API
Reid Vapour Pressure	2.0 at 100°F
Sulphur, Wt.%	0.5%
Kinematic Viscosity at 100°F	4.2 cs
Pour Point, °F	+20°F
Carbon Residue	1.3% by weight
B S & W	0.1% by weight
Flash (PMCC), °F	Below 50°F

SENIPAH TERMINAL: (also see page 461).

MAX. SIZE: 150,000 s.d.w.t., however vessel can only load a maximum of 125,000 tons cargo.

Iran

GENERAL: (also see page 468).

Ships calling at Iranian Ports:

All ships heading for Iranian ports and islands upon passing Ras al Kuh are to report to Bandar Abbas Port Control Authorities, their ETA at Strait of Hormuz and destination. They are also to request clearance in order to continue to their destinations.

If no clearance granted, vessels will anchor at Bandar Abbas anchorage while awaiting clearance.

Crossing Restricted Area:

ULCC/VLCC's loaded and not inbound for Iranian ports intending to cross the restricted area stated in M.E.N.A.S. Notice to Mariners No. 135/80, are required to contact Iranian Navy Headquarters with following information 48 hours prior to their departure.

(a) Origin
(b) Destination
(c) Route
(d) Speed
(e) Time of departure
(f) Visual identification

Necessary clearances will be given through P.S.O. by Iranian Navy.

Relevant details of Notice No. 135/80 are as follows:

1. From C.-in-C. Iran Navy "We declare Iranian Maritime border near the coast a war area. The Iranian Government does not give any authorisation to vessels intending to proceed to Iraqi ports. For the safety of shipping in the Gulf the following route shall be strictly observed:
   Vessels after having passed Hormuz Strait will change route to pass 12 miles South of Abu-Musa Island, 12 miles South of Sirri Island South of Cable Bank Light, and 12 miles S.W. of Farsi Island. Iranian Government will not take responsibility for those vessels which do not pay consideration to this notice.
2. From State Organisation of Iraq:
   "Vessels warned that the area North of 29° 30′ N. is declared a war zone".

SIRRI ISLAND: (also see page 485).

Correct Position: 25° 54′ N., 54° 33′ E.

LOCATION: Sirri Island is in the Southern part of the Gulf and lies about 70 km. from the Iranian mainland between Latitudes 25° 53′ N. and 25° 56′ N. and Longitudes 54° 29′ E. to 54° 34′ E. (approximately). The island, roughly triangular in shape, is about 6 km. in length with an average width of 3 km. The S.E. part of the island is flat but rises to over 30 m. high in the North and West. Sirri Island is surrounded by deep water of sufficient depth for the largest tankers now in service. Crude oil is delivered to Sirri Island by submarine pipe-lines from off-shore oil fields.

The loading station is located in the S.E. part of the island, at 25° 54′ N., 54° 33′ 30″ E.

Landfall on the island presents no difficulty, by day or by night, for vessels coming in from the Strait of Hormuz or from one of the Gulf ports. The island gives a good radar echo at 17 miles.

At the loading station, vessels are generally moored port side to the dock, with a heading of 017°, bow-on to the prevailing winds.

The loading station is sheltered from the swell created by the West and N.W. winds, which are the most frequent.

Korea, Democratic Peoples' Republic of

CHUNGJIN: 41.47 N. 129. 50 E. (also see page 615).

(See Late Plans)

SHIPMASTER'S REPORT: December 1980.

There are 2 harbours in Chungjin, the Western harbour and the Eastern harbour which are about 2.5 miles apart. Western harbour is mostly for export of coal and iron and Eastern harbour for import of general and bulk cargo.

The following port information is for the Eastern harbour:

DOCUMENTS: Immigration, Customs and Quarantine Officials board the vessel at the pilot station. The Korean Authorities bring on board their own forms for ships stores, currency, valuables, binoculars, cameras, etc., and fill these in by using the information contained in the ship's forms. However they also take the original of the ship's paper.

Papers required for entry:

5 copies Crew List (IMCO Form).
1 copy Vaccination List (Cholera and Smallpox).
1 copy Crew's Effect Declaration (IMCO Form).
1 copy List of Currency and Valuables (Free Form).
1 copy Ship's Stores Declaration (IMCO Form).
1 copy Ports of Call List.
1 copy Maritime Declaration of Health.

A "General Information" sheet, containing such particulars as vessel's name, call sign, Port of Registry, official number and all the normal data contained in the ship's register, including cargo on board, amount and where loaded etc., was found to be of great help in filling out their forms and speeded-up the entry and clearance process. 5 copies of above should be made for distribution to Agent, Customs, Immigration, Harbour Master and Quarantine.

Master's Advice: It is important that all crew members strictly comply with the Rules and Regulations in Korea, especially concerning cameras and binoculars as photography and the use of binoculars is strictly prohibited in the harbour area as well as in the City and the surrounding area. If the Customs, during their second cabin check, find a camera or binoculars the matter will be treated very seriously.

For landing permit, Immigration will stamp the passports or the seaman's books. However I managed to persuade the Immigration Officer not to stamp the passports because of the trouble in certain countries when they see a D.P.R. Korean stamp but it took 2 days and higher Immigration Authorities to get this permission.

When filling out the Customs and Immigration Forms, the name North in North Korea should not be written on any of above mentioned forms or any other documents as well as on private letters. The Authorities don't accept a divided Korea and will cross out the name North, in any place it is written.

It is not necessary to take cash advance in Korean Won. American Dollars and Yen are most welcome.

PILOTAGE: *Method of contact:* VHF or radio contact not possible. Agent will inform the pilot station of vessel's ETA.

Boarding Position: 41° 42.8′ N., 129° 50.5′ E. (4 miles S.S.E. of breakwater). Pilot is compulsory.

Service Time: Daytime only.

ANCHORAGE: From 0.5 miles – 4 miles S.S.W. of Chungjin Harbour in 8 – 30 fathoms. Good anchorage in mud/sand and protected from Northerly wind. However during strong South-westerly wind there is a heavy sea and swell.

APPROACHES: Simple and straightforward. Practically due North along Korea's East coast until abeam of Cape Kozakof, then straight for the Pilot boarding position or anchorage.

RESTRICTIONS: *Entry:* 30 ft. even keel on entry to the harbour.

Special Regulations: Vessel received orders by cable to navigate off 15 miles from the Korean D.P.R. coast and pass through position 41° 38.9′ N., 129° 52′ E. en route to the pilot boarding position.

MAX. SIZE: Max. draft alongside at the grain and general pier was 28 ft. and in the harbour 30 ft.

HEALTH: Radio pratique not available.

RADIO: Contact through Congjin Coast Radio Station, call sign "HMC" frequency; Call on 500, work on 428 kHz., ships work 425 kHz. Traffic list every hour plus 20 minutes. After initial call on 500 kHz., usually followed by QRU.

MF only.

After arrival, radio station on board is sealed and there is no VHF in the port. However after arrival in the port, Agent will bring on board a small transmitter/receiver for daily communication between Master and Agent's office. The set working on 24 volts. Very few people speak English. I found only the Pilot and Agent had a fair command of English.

Arrival Notice: Five days then 72, 48 and 24 hours to Agent. Also 5 days and 3 days to receivers.

TUGS: Two tugs available, about 500 h.p. maximum. Tugs always take ship's line.

BERTHING: *Mooring Method:* Vessels drawing more than 28 ft. must first lighten her draft at anchor in the inner harbour. Vessel is brought up in a North/South direction in the harbour and moored aft to the bollards on the breakwater with 4 lines and port and starboard anchor forward, 6 shackles in the water (Mediterranean Mooring).

Along the grain pier, which is only 150 m. long, a strong mooring is recommended partly because the after part of the vessel overhangs the end of the pier and partly because of the occasionally heavy swell along the pier.

Grain Wharves: Vessels only allowed alongside with draft of 28 ft., but a sounding with a line showed about 32 ft. It was not possible to get exact information of water depth alongside the general pier. I found the total wharves length to be about 1,500 m. The grain pier is 150 m. long. Certain wharves in the Eastern part of the harbour, which are shown on BA. Chart No. 1271, do not exist anymore as usable wharves.

Facilities for Bulk Carriers: There are a total of 8 cranes in the harbour, each of about 10 tons capacity. Two of the cranes are serving the grain pier and connected with a conveyor belt system. No difficulty with height of vessel.

Cargo Operations: At the harbour anchorage (Mediterranean mooring) the cargo is discharged by ship's gear. Stevedores operating the cranes. Operation is slow and there is often damage to the vessel with grabs due to inexperienced stevedores.

Two cranes serve the vessel alongside the grain pier. They are able to discharge about 3,000 tonnes per day but actual quantity discharged per day (taken over a 7 days period) was only 1,600 tonnes, mostly due to lack of stowage space, transportation problems and crane break-downs.

Stevedores work 24 hours a day, 7 days a week.

The cranes bring the grain to a conveyor belt system which again brings the cargo to the store house. The store house has a maximum capacity of 12,000 tonnes.

There is a railroad system serving the grain and general pier. Stevedore damage must be reported to the foreman immediately. All damages are repaired before departure by shore repair workers.

MEDICAL: Services available.

DENSITY: 1026.

FRESH WATER: Good quality fresh water available at the pier. Charge Won 2.75 per ton (US$ 1.75). Fresh water can also be delivered by barge to the anchorage.

FUEL: Available but expensive.

REPAIRS: According to the Agent, all deck and machinery repairs can be carried out. I expect that to be correct as there is a big shipyard in Chungjin.

SURVEYORS: Local Surveyor only.

CUSTOMS: The Bonded Stores are not sealed but all cameras and binoculars are collected before entering the harbour and sealed in a locker. Radio room and echo sounder also sealed.

When the vessel has berthed alongside the pier, Customs will once more come on board and this time check thoroughly for binoculars and cameras throughout the ship. It is possible they will confiscate all cameras and binoculars found during the second check.

TIME: GMT plus 9 hours.

SHORE LEAVE: Crew members are not allowed outside the harbour area. Permission is only given for a visit to the Seaman's Club, just outside the gate, but only a walk, straight from the gate to the club. There is an armed guard at the gangway to whom crew members must present their passport or seaman's book and also once more at the harbour gate. Shore leave is from 0800 hrs. to 2300 hrs. There is a new Seaman's Club near Western harbour (about 8 km. from Eastern harbour – by car about 10 minutes). Transportation to and from this club costs US$ 7.00 per bus.

GENERAL: *Current:* Experienced a slight South-westerly set towards the shore in Kyongusogu Bay when approaching from the South.

Tide: Port not effected.

Charts: BA. 1271, 1316. J.A. 162.

Swell: A heavy swell can cause problems for vessels alongside the wharves, especially in July/August. At times the swell may cause vessels to leave the wharf and shift to the anchorage.

Distress: In case of distress a long blast followed by a short blast with the whistle and repeated 3 times, this will warn the Harbour Master who will take action.

Deratting: Deratting exemption certificate can be issued.

Laundry: Available and requires about 3 days. Laundry service is satisfactory.

Provisions: Available in limited quantities.

Kuwait

SHUAIBA: (also see page 633).

NOTICE: M.E.N.A.S. Notice No. 130/80

Anchorage off port of Shuaiba.

1. Masters are advised that as from 1st November, 1980, only those ships bound for Shuaiba Port, with cargo to load or discharge, or intending to use facilities supplied by the Port such as bunkering, will be permitted to use the Shuaiba Port anchorage.

2. Vessels which fall into the above categories must anchor between Latitudes 29° 02.75′ North and 29° 02.00′ North and between Longitudes 48° 15.11′ East and 48° 12.72′ East. Ships are not permitted to anchor to the West of longitude 48° 12.72′ East.

3. In the event of the anchorage becoming congested, ships may be directed to anchor in one of the following positions, situated within the co-ordinates of the Shuaiba Port anchorage as stated in paragraph 2:

A1	083°	– 2.76 nautical miles
A2	091°	– 2.76 nautical miles
B1	084°	– 3.20 nautical miles
B2	091°	– 3.18 nautical miles
C1	084.5°	– 3.62 nautical miles
C2	091°	– 3.56 nautical miles
D1	085°	– 4.00 nautical miles
D2	091°	– 4.00 nautical miles
E1	085.5°	– 4.00 nautical miles
E2	091°	– 4.00 nautical miles

The above bearings and distances are from the Shuaiba Signal Station in position: Latitude 29° 02.15′ North, Longitude 48° 09.81′ East.

4. No other ships, i.e. those which do not fall into the categories listed in paragraph 1, such as vessels waiting for orders or which have not been nominated for bunkers, are permitted to anchor in the Shuaiba Port Anchorage.

Malaysia

ROMPIN: (also see page 676).

Correct Position: 02° 43′ N. 103° 30′ E.

TAPIS MARINE TERMINAL: 05.31 N. 105.01 E.

(also see page 680) **(See Late Plans)**

OPERATORS: The Terminal is operated by Esso Production Malaysia Inc. (EPMI) on behalf of PETRONAS and itself. Esso Production Malaysia Inc. (EPMI) is referred to as the "Operator".

LOCATION: The Terminal is situated off the East coast of the Malaysian Peninsular in the South China Sea, approximately 115 miles East of Kuala Trengganu.

The "SALS" is situated in position Latitude 05° 30′ 53.5″ N., Longitude: 105° 01′ 21.3″ E. and fitted with a quick flashing white light.

NAVIGATIONAL AIDS: Navigation aids are located on the following facilities and structures:

The floating storage barge "Mercia" attached to the SALS is equipped with one navigation light, 2 miles visibility, which flashes the Morse code letter "U" every 15 seconds (light 0.5 sec./eclipse 0.5 sec./light 0.5 sec./eclipse 0.5 sec./light 1 sec./eclipse 12 sec.). The foghorn emits a 500 Hz sound at 30 second intervals (turned on during low visibility periods). The radio beacon of the barge emits the signal "MES" on 242 kHz frequency.

Production Platform designated "Tapis A Platform" is situated about 1.5 miles North of the SALS in position Latitude 05° 32′ 07.4″ N., Longitude 105° 01′ 35″ E. The platform is equipped with lights and automatic fog signal apparatus as follows:

1. Four Navigation lights mounted 55 ft. above water, one at each corner of the Platform.
2. Navigation lights are 2-mile type which flash Morse code letter "U" at 15 second intervals.
3. Fog horn emits a 500 Hz sound at 30 second intervals. (Turned on during low visibility periods).

About 200 ft. from the Western edge of the platform a gas flaring device is located. When under production a flare is visible for a distance of 20 miles or more. Adverse weather conditions will affect the visibility of the flares accordingly.

Production Platform designated "Pulai A Platform" is situated about 30 miles Eastward of the SALS in position Latitude 05° 19′ 46.7″ N., Longitude 105° 29′ 36.7″ E. This platform is equipped with lights, signals and flares similar to those described above for platform "Tapis A".

Production Platform designated "Bekok A" is in position Latitude 5° 26′ 13″ N., Longitude 105° 13′ 14″ E. This platform is equipped with lights, signals and flares similar to those described for platform "Tapis A".

Platform "Tapis C" is in position 5° 31′ 17″ N., 105° 03′ 12″ E. This platform is equipped with lights and signals similar to "Tapis A".

Platform "Bekok B" is in position 5° 24′ 50″ N., 105° 15′ 16″ E. This platform is equipped with lights and signals similar to platform "Tapis A".

In addition to the specified Navigational Aids, the Platform and the Floating Storage Barge will brightly illuminate the area around them at night through the use of lights for normal working purposes.

The platforms and the floating storage barge are good radar targets, normally identifiable on the screen from 20 – 30 miles distance.

PILOTAGE: The shuttle vessel will be boarded by the Marine Supervisor as directed at the "riding site", providing that the vessel is in all respects ready to commence loading, except for the necessary deballasting, the Notice of Readiness will be accepted at the time of the Marine Supervisor boarding.

Ships are requested to have safely and securely rigged on the starboard side, a combination of pilot ladder and ship's accommodation gangway, so arranged that personnel can first use pilot ladder until part way up the vessel's side, and then transfer to the accommodation ladder. Air operated pilot ladders are not acceptable. A light heaving line should be ready for taking aboard the Marine Supervisor's equipment. Vessel to provide a lee for the pilot boat when boarding and leaving.

ANCHORAGE: Depths too great.

Hydrographic Survey: During drilling operations and installation of the platforms hydrographic surveys were carried out. Surveys indicated depths in the area between 200 ft. and 350 ft., nature of the sea bottom: mud, coral and shingles.

RESTRICTIONS:

Restricted Area:

The restricted area is bounded by imaginary lines connecting the following points:

A	Latitude: 05° 30′ N.	Longitude: 104° 34′ E.
B	Latitude: 05° 10′ N.	Longitude: 105° 30′ E.
C	Latitude: 05° 20′ N.	Longitude: 105° 40′ E.
D	Latitude: 05° 46′ N.	Longitude: 105° 14′ E.
E	Latitude: 05° 46′ N.	Longitude: 104° 48′ E.

Vessels will not enter the Restricted Area.

Riding Area:

Shuttle vessels bound for Tapis Terminal should approach the "riding area" located Southward of the Terminal. In doing so they should avoid the restricted area and remain in the "riding area".

It is unlikely for the shuttle vessels to anchor in the area in view of the depth of water. However, they are to remain in the "riding area", awaiting berthing instructions from the Terminal.

The riding area is defined by a circle of 15 miles in diameter with centre at Latitude 05° 15′ N., Longitude 104° 55′ E.

MAX. SIZE: The size range of shuttle tankers acceptable at the Terminal is between 50,000 and 100,000 d.w.t.

RADIO: All radio traffic is to be channelled through Singapore Radio. Vessels to maintain radio watch on the same station.

Cables for EPMI to be addressed to: ESSOPROD KUALA LUMPUR TLX MA 30293 "URGENT FOR MARINE MANAGER GET HIM"

Singapore Radio works on the following frequencies:

Call sign	*Transmit (kHz)*	*Receive (kHz)*	*Watch (GMT)*	*Remarks*
9VG4	2182	2182	0000 – 2400	Call, reply and safety
9VG87	4125	4125	„	
9VG88	6215.5	6215.5	„	
9VG89	8790.9	8257	„	Common Calling Frequencies
9VG90	13162.8	12392	„	
9VG91	17294.9	16522	„	
9VG5	2760	2527	„	Working frequencies for passing of Radio-Telegrams
9VG60	4369.8	4075.4	„	
9VG63	8728.2	8204.3	„	
9VG67	13156.6	12385.8	„	
9VG52	2780	2685	On Demand	
9VG61	4376	4081.6	„	Connection to the Telephone System
9VG62	6509.5	6203.1	„	
9VG64	8762.3	8238.4	„	
9VG65	8790.2	8266.3	„

9VG68	17270.1	16497.2	„	
9VG69	17356.9	16584	„	
9VG70	22630.1	22034.1	„	

Traffic lists will be transmitted on the following listed frequencies, except during transmitter maintenance periods when the list will be broadcast on the two frequencies consecutively.

Transmit (kHz)	*Receive (kHz)*	*Time (GMT)*
2760	2527	0005, 0405 0805 and 1205
8728.2	8204.3	
2760	2527	1605
4369.8	4075.4	

Approximate geographical location of Singapore Radio Station: Latitude 01° 20′ N., Longitude 103° 40′ E.

Upon departure from last port of discharge or immediately after having received instructions to proceed to Tapis Terminal, Master is requested to cable to EPMI the following:

AAA	Name of vessel and radio call sign.
BBB	ETA Tapis Terminal, stating ETA in local time (notice Tapis Terminal time is GMT plus 7.5 hours throughout the year).
CCC	Name of Master.
DDD	Cargo requirements.
EEE	Deballasting time.
FFF	Maximum loading rate.
GGG	Vessel's draft on arrival.
HHH	If there is any sickness aboard or clean bill of health.
III	Last port of call.
JJJ	Any hull, bulkhead, valve or pipe-line leaks on vessel which could affect loading or cause pollution.
KKK	Length overall in feet.
LLL	Distance in feet from bow to vessel's loading manifold.
MMM	Maximum height of manifold above water line on completion of loading.
NNN	Flange dimensions of vessel's manifold and confirm fitted with 2×12 in. ASA reducers on port side.
OOO	Advise number of fairleads on portside main deck colon indicate by number and distance from stem.
PPP	Advise VHF Channel available and operational status.
QQQ	Combination of accommodation gangway and pilot ladder ready and in order.
RRR	Vessel equipped with wire or synthetic ropes and confirm that ropes are stored on and operated by self-storing winches.

Updated ETA to be re-confirmed 72, 48 and 24 hours prior arrival.

VHF: When within range, vessels equipped with VHF radio telephone should contact floating storage barge "ESSO MERCIA" initially on Channel 16 or Channel 9.

Language: The language of the Terminal is English.

STORAGE FACILITIES: The Tapis Marine Terminal consists of a storage barge, of Malaysian Registry designated "Mercia".

The Floating Storage Barge has an approximate d.w.t. of 167,000 and LOA of 1,010 ft. and beam 146 ft.

The Floating Storage Barge is permanently moored to a Single Anchor Leg System (SALS). This system consists of the following components:

A slim riser which is connected to a mooring base below and a rigid mooring yoke through a universal joint, above. The rigid mooring yoke, is, in turn, hinged to the storage barge by a series of bearings. Consequently, the Floating Storage Barge remains permanently moored but able to rotate 360° around the SALS.

In the rigid mooring yoke, a buoyancy tank is incorporated, which keeps the riser under pre-tension by way of its positive buoyancy.

Total crude oil cargo capacity of the Floating Storage Barge is 1,200,000 gross barrels. Loading of crude is done through 4 Brooks PAR-I-TY 10 in. turbine meters, each having a maximum capacity of 12,000 bbls.p.h.

The Tapis Marine Terminal offices are located on board the Floating Storage Barge.

MOORING: The shuttle vessel will moor alongside the starboard side of the Floating Storage Barge. For this purpose the Floating Storage Barge has been fitted with 6 large heavy duty pneumatic fenders and also carries smaller secondary fenders positioned at the starboard side of the forecastle head and on the starboard side of the poop.

Prior to berthing, the Marine Supervisor will inspect and ascertain that the main engines are fully manoeuvrable and that the vessel is equipped with good mooring lines and operational winches. Mooring wires are desirable, vessels equipped with synthetic ropes are acceptable providing these ropes are stored on and operated by self storing winches. Vessels not equipped with self storing winches are not acceptable at the Tapis Terminal. Experience indicates that without storing equipment it is difficult to maintain proper tension and the risk of breaking the mooring exists.

Small, portable, sacrificial fenders of rattan or manila should be available. The port side of the shuttle tanker must be clear of all obstructions.

After ensuring that the manoeuvring area is clear of other traffic, weather and sea conditions are suitable, the shuttle tanker will hold herself in readiness for the approach. The approach will be made from the starboard quarter of the Floating Storage Barge, with an aim to end parallel to the Floating Storage Barge at a short distance apart. The heading of the shuttle vessel will normally be such that she will have the wind ahead. A tug boat of suitable power and a mooring boat will be in attendance. The tug boat will make fast, either alongside or towing on the hook with a long line, on the starboard bow of the shuttle tanker and will assist the tanker in the final stages of the berthing. The mooring boat will assist in passing the lines from the shuttle tanker to the Floating Storage. Synthetic ropes will be used in the initial stages of the berthing. If necessary, and depending on weather conditions, the synthetic ropes will be augmented by wire ropes after the shuttle vessel is properly positioned and secured alongside.

BALLAST/POLLUTION: *Adequate Ballast:* Due to the exposed location of the crude oil loading berth, shuttle vessels are required to carry sufficient ballast for safe handling, having due regard to existing weather and sea conditions. A shuttle vessel found by the Marine Supervisor to not be adequately ballasted will be rejected.

The minimum required drafts are as follows:

	D.w.t.	*Feet*		*Metres*	
		Fwd.	*Aft*	*Fwd.*	*Aft*
From	50,000 to 60,000	19	26	5.80	7.90
	60,000 to 70,000	21	27	6.40	8.20
	70,000 to 90,000	23	28	7.00	8.50
	90,000 to 100,000	25	29	7.60	8.80

Pollution: Owners and Masters are responsible for observing International Conventions, Laws and Malaysian Government Regulations concerning pollution of the sea, having particular regard for the area where the Tapis Terminal is located.

Clean Ballast: As there are no ballast discharging facilities, shuttle vessels must arrive at the Terminal with clean ballast, ensuring that all pipe-lines, pumps and strainers have been flushed out prior to arriving.

The Marine Supervisor will inspect shuttle vessel's ballast on boarding and has the power to reject any shuttle vessel that he deems would cause pollution of the sea area, in which case shuttle vessel must proceed to sea and return only when ballast is completely free of oil. During discharge of ballast similar inspections will continue. Any shuttle vessels rejected because of dirty ballast will automatically Nullify its Notice of Readiness and will lose its priority in position for loading. Ballast discharge should not be commenced without the prior agreement of the Marine Supervisor.

Bilges: Bilges must not be discharged while at the Terminal or in the adjacent area.

Inspection During Loading: At night the sea area around the shuttle vessel shall be adequately lighted as frequent inspection by the Marine Supervisor will be made during the discharge of ballast. Any pollution whatsoever will be cause for rejection. Similarly, any hull leaks causing pollution during loading will be cause for rejection and the shuttle vessel will not be re-accepted unless satisfactory evidence of repairs has been certified by a qualified surveyor.

Cargo hose connections should be inspected during loading, drip pans should be placed under the manifold, all unused cargo connections should be blanked off, sea-valves should be closed and lashed upon completion of deballasting and all scuppers must be securely plugged. In addition to the lights usually displayed, shuttle vessels alongside the Floating Storage facility discharging ballast or loading cargo during darkness will brilliantly illuminate the sea around the ship, so that any pollution will be noticeable.

Shuttle vessels equipped with a separate system of ballast tanks will be allowed to discharge ballast, and load oil simultaneously, providing approval is first obtained from the Marine Supervisor.

Slops should be consolidated in one tank. Load-on-top procedure is acceptable with the written permission of the Consignee.

Fines and Claims: It is the responsibility of the shuttle vessel's Master to see that no oil of any kind is pumped or spilled overboard from his ship.

Masters are warned that inspection of ballast is strict.

The categories of pollution include oily water from bilges, crude residual from previous voyages, or any other matter that may result in pollution of the sea.

If, at anytime an overflow of crude oil occurs, loading will be suspended immediately, and not be resumed until the oil is cleaned up and removed from the decks of the shuttle vessel, and/or from the surface of the sea, and any damage is repaired and no further danger exists.

All spillages of oil must be reported immediately to the Marine Supervisor and, subsequently, a detailed report, in writing, submitted by the Master of the shuttle vessel concerned giving all relevant details.

Any fines imposed by governmental authority for pollution caused by the shuttle vessel shall be for the account of the Owners of the shuttle vessel.

In the event that the Operator has to settle any third party claims as a result of damages to property caused by pollution attributable in any way to the shuttle vessel, it will have the right to reimbursement by those responsible for the shuttle vessel for all expenses incurred.

Likewise, all labour and equipment costs for cleaning operations will be for the shuttle vessel's account.

LOADING: *Hose lifting derrick capacity:* Shuttle vessels must be equipped with a hose lifting derrick at the port manifold with a lifting capacity in conformance with the size of the vessel concerned. The weight of the cargo hoses will be supported by the cranes provided on the floating storage barge.

Manifold-connection sizes: The terminal is equipped with 2 cargo hoses of 12 in. diameter. Tanker manifolds should terminate in ASA series 150 flat face flanges. Unless the terminal is given adequate notice, shuttle vessels equipped with manifold flanges of other sizes or ratings will be rejected. In their arrival cable the shuttle vessel should specify the size of their manifold and should connect, prior to arrival, 2 spools reducing to 12 in. ASA to 2 non-adjacent connections of the port side manifold. This should be clearly confirmed in the arrival cable. Flanged spools to connect to 10 in. and 16 in. manifolds are available.

The floating storage barge uses a double string of 12 in. diameter hoses connected to the starboard midship manifold connection with the end hose suspended under a crane ready for passing to the shuttle tanker.

The shuttle vessel should have its cargo boom topped up on the port side with the cargo runner ready for passing over to the floating storage for hooking into the hose sling. Two 12 in. diameter discharge connections should be ready on the shuttle vessel for receiving the flange of the hose for connecting. Connection will be made using conventional nuts and bolts with a gasket.

As soon as the shuttle vessel is alongside the floating storage, a gangway will be passed over. Hose connection is done by the shuttle vessel's crew supervised by a responsible officer.

After the hose is connected it will be suspended during oil transfer by the crane on the floating storage and by hose boom at the cargo manifold of the shuttle vessel.

The rate of oil transfer will be up to 44,000 bbls.p.h. which amount is considered a safe rate for handling cargo. In every case, an agreed upon rate must be established for commencement of oil transfer as well as a maximum transfer rate depending upon condition of cargo lines and valves aboard the shuttle vessel.

Height of freeboard of the shuttle tanker and of the floating storage barge change continuously during the loading. This change of height and possible presence of swell requires a careful watch and adjustment of cargo hoses and mooring lines. It is imperative that a careful watch is maintained and that an efficient mooring management observed at all times.

Loading Rate: Maximum loading rate will be about 44,000 bbls.p.h. It is recommended that shuttle vessels take maximum flow with due regard to safety in order to expedite turn around time as well as to discharge ballast as quickly as possible. Care should be taken not to overload. When shuttle vessels are equipped with permanent ballast tanks, the ballast in these tanks should be retained on board until the shuttle vessel has taken on board sufficient cargo to be manoeuvrable. Vessels not so equipped should examine the possibility of safely loading and discharging ballast simultaneously, as such practice improves turnaround time and keeps the windage area down to acceptable levels. Conversely vessels should have plans to load first a certain parcel of cargo, then discharge the ballast, then resume the loading again and complete the cargo.

Closing Valves Against Oil Flow: Warning is given of the danger of closing valves against an incoming oil stream. This will create excessive pressure which may result in damage to the loading hoses and terminal facilities. Shuttle vessels will be held liable for damages resulting from failure to observe this precaution.

Radio Contact: During loading operations the shuttle vessel will contact the Floating Storage every half hour by the portable walkie-talkie assigned to the shuttle vessel to ensure that radio contact is being maintained. Pumping will be stopped immediately if it is found that radio contact with the ship has been lost.

It is stressed that during loading operations, the Marine Supervisor will immediately slow down the loading rate on receipt of a request for same from shuttle vessel. Pumping, in an emergency, can be stopped almost instantaneously.

All communications to be maintained between Master of shuttle vessel and operator's Marine Supervisor or between their authorized delegated personnel.

SAFETY: *Safety and Fire Regulations:* Safety and fire regulations will be strictly adhered to in accordance with the instructions and regulations.

Safety Requirements and Ship/Terminal Safety Check List: A letter concerning safety requirements will be given to the Master of each shuttle vessel by the Marine Supervisor. A ship/terminal safety check list will accompany this letter and is to be signed by a responsible official for the shuttle vessel and by the Marine Supervisor for the terminal.

Notice for Safety and Fire Regulations: The notice for safety and fire regulations will be posted in a prominent position on board by the Marine Supervisor.

Instructions in Case of Fire: In case of fire when shuttle vessel moored alongside the Floating Storage Barge. Do not hesitate to raise the alarm.

If fire aboard shuttle vessel, shuttle vessel to raise alarm by sounding with her whistle a series of blasts of not less than 10 seconds duration supplemented by a continuous sounding of the general alarm system.

The shuttle vessel personnel should immediately start to fight the fire and try to prevent fire spreading.

Cargo operations will be stopped immediately, all valves closed and personnel stand-by to disconnect hoses. Shuttle vessel's engines to be ready for manoeuvring.

If fire is aboard the Floating Storage Barge, a continuous ringing of general alarm bell system will be sounded. Cargo operations will be stopped, hoses disconnected and the shuttle vessel will be immediately unberthed.

FACILITIES: Tapis Terminal is located offshore and the only means of transportation available to and from the nearest point of the coast is by Operators' helicopter. As such the Operators can neither offer logistical support to the shuttle vessels calling at the terminal nor provide any service:

No shore leave
No crew changes
No provisions
No stores
No spare parts
No bunkers
No fresh water
No Consulates
No engineering repairs
No dirty ballast/slop disposal

No doctor or clinic, however in emergencies, exceptions to the foregoing may be permitted for humanitarian reasons.

Only authorised personnel are permitted on the Floating Storage Barge and/or shuttle vessel.

GENERAL:

Charts: Charts for the area are as follows:

1. U.S. Naval Oceanographic Office, New Chart No. 71024.
2. British Admiralty, Chart No. 3543.
3. British Admiralty, Chart No. 2414.
4. British Admiralty, Chart No. 2600A.

Sailing Directions: Sailing directions are in the following:

China Sea Pilot, Volume 1.

Mail/Spare: For convenience mail for personnel on incoming shuttle vessels may be sent to the Kuala Lumpur Office of the Operator for transmission to the shuttle vessel when it arrives at Tapis Terminal. It is suggested to have the mail marked for the attention of 'The Manager' in order to expedite sorting. Spare parts or other materials will not be accepted for delivery to incoming shuttle vessels.

Flag: During daylight hours the Malaysian Flag must be flown throughout the vessel's stay at the terminal.

Official Addresses:

Morocco

AGADIR: (also see page 700) (See Late Plans)

PILOTAGE: On VHF Channel 16, day and night.

MAX. SIZE: Max. LOA 160 m., however vessel with LOA 190 m. has been accepted.

TUGS: 1×1,500 h.p., 1×1,275 h.p. and 1×350 h.p.

BERTHING:

No. of Berths	*Length (m.)*	*Depth (m.)*	*Remarks*
4	150	9.0	—
1	110	7.0	Ro/Ro.
3	100	6.0	—
1	—	6.0	Used by Moroccan tankers only.
1	120	5.0	Equipped with fish pumps

STEVEDORES:

Working Hours: 0700 – 1200, 1400 – 1800, 2000 – 0600 hrs. (With 24 hours notice of ETA).

New times to be introduced but date not fixed: 0700 – 1500 and 1500 – 2300 hrs.

REPAIRS: Repairs possible to engines up to 500 b.h.p.

CRANES: One Titan crane of 100 tons capacity.

CONSULS:

HOLIDAYS: 1st January, 3rd March, 1st May, 6th November, 18th November.

The following days are movable feasts governed by the Arabian Calendar – 1/2 Choual, 10/11 Dialhijja, 1 Moharram, 12/13 Rabia I.

Work may be arranged on all holidays.

Nigeria

BONNY: (also see page 748).

REPORT: Dated 15th January, 1981.

According to the Bonny Pilots the vessel was as large as they have ever handled up the river. But the conditions of size and draft adhere exactly as stated in the "Guide to Port Entry 1979/80" except maximum length about 885 ft. was the limit.

We berthed at Inner Berth 'B' between 6 mooring buoys using 5 in. double wires to each buoy. Wires and mooring gangs provided by shore.

Basically the maximum draft allowed is datum i.e. 38 ft. 6 in. plus tide and less under keel clearance allowed for the particular time of the year which varies with the swell expected to be encountered in the Bonny Channel.

Our draft on sailing was 39 ft. 3 in. and the maximum permitted draft for the 14th was 40 ft. 8 in. The draft at the Inner Berths is governed only by the draft permitted in the Bonny Channel. The density of the water varies between almost fresh and salt.

LAGOS: (also see page 752).

NOTICE:

HARBOUR MASTERS' NOTICE No. 39/80
APAPA & TIN CAN ISLAND PORTS – DEPTHS
TEMPORARY NOTICE

Notice is hereby given that the maximum permissible drafts Apapa and Tin Can Island Ports are as under:

Pool Anchorage	8.23 m.
Bruce Mooring Buoys	8.23 m.
Marina Mooring Buoys	8.23 m.
Apapa Quays Nos. 1 to 14	8.23 m.
Apapa Quays Nos. 15 to 20	10.50 m.
Tin Can Island Port Berth 1 to 10	9.50 m.

CRANES: Floating crane 250 ton capacity available.

Norway

NARVIK: 68.25 N. 17.24 E. (See Late Plans)

(also see page 771)

The following information applies mainly to vessels arriving to load an ore cargo.

LOCATION: The Port of Narvik is located in position: 68° 25′ 30″ N., 17° 24′ 00″ E.

DOCUMENTS: All ships arriving from a foreign port will be boarded by Customs.

The following documents should be completed prior to arrival:
Maritime Declaration of Health Form 1 – 1012.
General Declaration IMCO Form 1 in quadruplicate.
Ship's Stores Declaration IMCO Form 3 in triplicate.
Crew's Effect Declaration IMCO Form 4 in triplicate.
Crew List in triplicate.

The above forms will be supplied by mail on request.

PILOTAGE: *Sea Pilot:* Sea Pilot will embark off Tranoy Pilot Station. Location 68° 11′ N. 15° 34′ E.

Distance from Tranoy to Narvik 46 nautical miles.

Note: Vessels bound for Narvik will have to pass through Restricted Area. It is compulsory for all foreign non-military vessels of not more than 50 g.r.t. to have a Norwegian State Pilot on board when approaching Restricted Areas in Norwegian Waters.

The Sea Pilot will assist during undocking and leave the vessel off Tranoy Pilot Station.

Harbour Pilot: The use of Harbour Pilot is compulsory during docking. When docking on arrival, the Harbour Pilot will board the vessel inside the harbour limits.

Ordering of Pilots: Vessels approaching from the sea shall order the Pilot at 24 hours notice in so far as possible and confirm arrival at pilot station at 2 hours notice.

Vessels in port: Luossavaara-Kiirunavaara AB will notify the Sea Pilot in due time before completion of loading. LKAB will also arrange for Harbour Pilot to assist during docking or when otherwise required by vessel's master.

ANCHORAGE: Anchoring must take place in the recommended areas as advised by the Pilot, i.e. inside the harbour basin or to the South West and West of "Framnesodden".

Warning: The bottom usually gives good anchorage but vessels are requested to keep continuous watch while at anchor. Frequent anchor bearings must be taken during adverse weather conditions.

Vessels at anchor inside the harbour basin are especially exposed to gusting winds from South East (locally named Beisfjord-winds).

HEALTH: The Master of a ship arriving from a foreign port, must hand to the Customs officers a Maritime Declaration of Health form signed by the Master. If there is a ship's Surgeon on board, the declaration to be countersigned by this person.

A valid Deratisation Certificate to be presented to the Customs on request.

RADIO: *ETA Notices:*

1. Please cable ETA to Malmexport Stockholm 6 days prior to arrival at loading port and to MALMEXPORT NARVIK as follows:

Sailing from last port and 48 hours and 24 hours before arrival.

If any change in ETA of more than 1 hour occurs after transmission of the 24 hour ETA, the vessel must send a corrected ETA.

2. Following should be included in the 48 hours ETA notice:
   a. Tonnage of cargo required and quantity in each hold.
   b. Cash advance requirement.
   c. Order for repairs, bunkers, stores, charts etc.
   d. In case of repatriation, please state name of crewmember(s) to be repatriated, destination and date of departure preferred.
3. Docking instructions – prospects.

Request for docking instructions, loading time etc. should preferably be included in the 48 hours ETA.

Docking instructions will also be advised by Pilot on arrival Tranoy Pilot Station.

4. Estimated time for ballast pumping after arrival should be advised with the 24 hours ETA.

TUGS: Tug service is compulsory at LKAB's Ore Piers.

Luossavaara-Kiirunavaara AB reserve the right to order the number of tugs (max. 3) which they consider necessary to ensure safe mooring and unmooring of a vessel.

Vessels above approximate 70,000 d.w.t. will normally be assisted by 3 tugs.

Main particulars of tugs available: M/V "Svarta Bjorn", g.r.t. 277, b.h.p. 1,640, bollard pull 23 tons, 11 knots. Fluid couplings and single reduction gearing. Reverse gear to screwshaft.

M/V "Rallaren", g.r.t. 435, b.h.p. 3,800, bollard pull 43 tons, 12.4 knots. Two Voith-Schneider directional propellers.

M/V "Rombak" g.r.t. 440, b.h.p. 4,000, bollard pull 47 tons, 12.5 knots. Two Voith-Schneider directional propellers.

Tugowners: A/S Bukserbater, Narvik.

Towing lines will be provided from the tugs.

Normal communication between tugs and Pilot is by VHF. Operating Channel 6 (156.3 mHz.).

Bilge Pumps: The tugs M/V "Rallaren" and M/V "Rombak" are equipped with 2 transportable bilge pumps. Average pumping capacity of each pump: 2,000 litres per minute.

Fire Fighting: Tugs M/V "Rallaren" and M/V "Rombak" are equipped with foam/water guns for fire fighting.

VHF: Contact with LKAB can be obtained by VHF (Channel 14) on a 24 hour basis. Vessels at anchor are requested to keep continuous VHF watch. It is also advisable for vessels alongside to have the VHF switched on. Messages to the Agent should be given by VHF.

Local and long distance calls can be ordered via Bodo Radio on VHF Channel 28.

BERTHING:

General Description: The Ore Berths, hereinafter described as Berths Nos. 3, 4 and 5, allow 3 ships to be berthed simultaneously.

The ore is transported from the stockyards to the shiploaders on conveyor belts. Both stockpiling and loading is automatically directed from a central control station. On the way to the pier belts, the ore is transferred via sampling stations which also include computer controlled screen analysis for pellets.

After having passed the sampling station, the ore is weighed by electronic belt scales with a very high degree of accuracy.

Mooring: Ships usually berth:
Starboard side to Berth No. 3.
Port side to Berth No. 4.
Starboard side to Berth No. 5.

It is the responsibility of the ship's Master to provide for and make sure that his ship has sufficient mooring ropes and wires ashore at all times, and that the moorings are properly and evenly tightened.

Ships berthing at No. 5 Berth should preferably use floating mooring ropes (nylon, polypropylene or similar) for head- and sternlines.

Berths Nos. 3 and 4: Consists of a slender reinforced concrete pier, supported by 13 heavy concrete pillars resting on steel piles which are rammed through clay and silt to solid rock some 30 m. – 35 m. below the pier deck, above which the superstructure, carrying the conveyor belts, rises about another 15 m.

The outer end of the concrete pier deck is based on a caisson, placed on a reinforced concrete foundation slab, resting on steel piles driven to rock base.

The caisson as well as the pier itself is equipped with heavy rubber fenders of Seibu type and with heavy rubber tyre fenders.

Shiploaders: There are 2 travelling boom loaders on each side of the pier with a working area of approximately 150 m.

If 2 ships are loaded simultaneously, only 1 shiploader can be used on each side.

Designed capacity of each shiploader is 4,500 tonnes per hour, but the average capacity should be calculated between 3,000 and 2,000 tonnes per hour depending on the kind of ore being loaded.

Berth No. 5: Is a concrete caisson berth, parallel to the shoreline.

The basement of the berth consists of 5 cylindric caissons resting on foundations connected to solid rock.

The face of the berth is fitted with heavy Seibu fenders, dimensioned to obtain pressure of a 40% ballasted ship of about 350,000 d.w.t., approaching at a speed of 0.15 m. per second.

The Shiploader: Is of a linear slewing type, turnable around a fixed point in the rear. The loader travels on rails along the berth in a length of 140 m. The shiploader boom can be elevated to any suitable height over a vessel's hatchcoamings. Maximum horizontal loading range is 220 m.

Designed capacity is maximum 11,000 tonnes per hour for lumpy ore and fines, and approximately 7,500 tonnes of pellets per hour.

Fagerneskaien: There is a deepwater quay, "Fagerneskaien", located to the South of the harbour.

Length of quay 250 m.

Depth alongside on LW 15 m.

The quay has easy access from the shore side and suitable for ships taking onboard heavy goods and provisions as well as for ships carrying out repairs.

There is a workshop with structural, plate and welding factory situated at the quay.

The quay is directly connected to the main railway.

Fresh water is available with connections conveniently located.

LOADING:

Docking Data for Ore Berths: (Measurements in metres, unless otherwise stated).

	Berth No. 3	*Berth No. 4*	*Berth No. 5*
Building completed (year)	1950 (Caisson in 1967)		1977
Type	Concrete Pier		Concrete Caisson Berth
Length	214.00	214.00	208.00
Breadth	13.50	13.50	Min. 8.25, Max. 18.00
Depth alongside at LWOST	*13.50	13.00	27.50
Height under shiploader (Airdraft) on HWOST	13.00	11.00	26.00
Max. outreach of shiploader from fender line	15.00	11.00	43.00 When perpendicular to wharf
Number of shiploaders	2	2	1
Suitable ship's size in d.w.t. (approx.)	40-75,000	5-45,000	70-250,000
Max. ship's size in d.w.t. depending on type and construction	90-100,000	45-50,000	over 300,000
Limitation of ship's length from bow (bulb) to aftermost loadpoint	200.00	175.00	No limitation
Max. length between ship's foremost and aftermost loadpoint loadable without warping	152.00	152.00	220.00

*Note: Maximum guaranteed draft at Berth No. 3 is 13 m. on LWOST (minimum 0.5 m. under-keel clearance required).

Loading to draft exceeding 13 m. may take place during favourable tide and weather conditions.

Iron Ore Qualities/Average Stowage Factors:

Ore Qualities	*tons cu.m.*	*cu.m. tons*	*tons cu.ft.*	*cu.ft. tons*
KBZ (Kiruna BZ)	3.30	0.30	0.093	10.8
KBS (Kiruna BS)	3.00	0.33	0.085	11.8
KBF (Kiruna B Fines)	3.20	0.31	0.091	10.9
KDZ (Kiruna DZ)	3.05	0.33	0.086	11.6
KDF (Kiruna D Fines)	3.00	0.33	0.085	11.8
KPB (Kiruna Pellets B)	2.05	0.49	0.058	17.2
MPB (Malmberget Pellets B)	2.25	0.44	0.064	15.6
PF (Pellets Fines)	2.50	0.40	0.071	14.1

Weighing: The ore is weighed continuously during loading by electronic belt scales.

Margin of error maximum ± 0.25%.

All weights as well as quantities issued in the Bills of Lading are expressed in metric tonnes (1,000 kg.).

Loadline Zones:

Winter: 1st November – 31st March.

Summer: 1st April – 31st October.

FRESH WATER: Can be supplied from all berths. Connections are conveniently located with hoses available on the dock.

Fresh water can also be delivered by tugs. An extra fee will then be charged.

Capacity per delivery: M.V. "Rallaren" 93 cu.m.
M.V. "Rombak" 112 cu.m.

FUEL: Bunkers are available on an emergency basis only. Orders for fuel and diesel should preferably be given in due time directly to the supplier. Fuel oil can only be supplied from coastal-tankers.

Diesel oil can be delivered by the tug M.V. "Rombak" at the daily market rate and from the supplier used by the tugboat company.

Capacity per delivery about 100 cu.m.

An extra fee will be charged for the tug per delivery.

It is also possible to supply diesel oil by tank wagons.

Capacity per delivery about 10 – 12 cu.m.

Lubricants: Can be procured, but due notice must be given as all types are not kept in stock.

REPAIRS: Minor repairs can be effected by local repair firms.

TELEPHONES: Vessels at berth may hire a telephone. A telephone watch should then be kept on board.

CUSTOMS OF THE PORT:

1. The ships will generally be loaded in regular turn, providing they present with starting hatches opened and holds properly cleaned and do not have ballast pumping which will exceed expected loading time.

2. For establishing turn of vessels a ship will be considered "Arrived" at the time of passing a line between the South West point of "Framnesodden" and "Batberget", or if anchored outside the Harbour limit, at the time of anchoring.

3. The time of arrival stated in the Notice of Readiness shall be the time when a ship has moored alongside loading berth, (finished with engines) or when loading berth is not available, at the time of anchoring.

4. Notice of Readiness shall be given by the Master on arrival whether in berth or not any time SHINC with the exception of certain holidays.

5. Loading plans, duly dated and signed, stating quantity in each hatch and rotation of loading, must be presented to the Agent on arrival and to the loading foreman as soon as the ship has moored.

6. All weights shown on the Bill of Lading will be the same as recorded on the weighing facilities of Luossavaara – Kiirunavaara AB. The weights will be given in tonnes of 1,000 kilogrammes (metric tonnes).

7. Pilots and tugs will be ordered in due time before loading is finished. The ship must leave the pier upon completion of loading when the cargo documents have been received. If any delays occur in preparing the cargo documents, or on occasion of missing crew members, or in case of any dispute or otherwise, the ship must leave the pier immediately when so ordered by the shippers, and matters will be settled while the ship is waiting in the roads.

8. Ore – Oil and Obo vessels will not be accepted for loading unless gas-free certificate has been obtained.

9. *Working Hours:*

Ordinary working hours 24 running hours.

Loading does not take place on the following holidays:

December 24th	1 p.m.	—	December 26th	10 p.m.
December 31st	1 p.m.	—	January 1st	10 p.m.
Maundy Thursday	2 p.m.	—	Easter Monday	10 p.m.
Whitsun Eve	2 p.m.	—	Whitmonday	10 p.m.
April 30th	10 p.m.	—	May 1st	10 p.m.
May 16th	10 p.m.	—	May 17th	10 p.m.

Note: The above stipulated working hours are subject to alteration without notice.

GENERAL:

Tide:

Range of tide:		
	Maximum approximately	3.30 m.
	Minimum approximately	0.50 m.
	Average	1.75 m.

Currents:

The existing currents are mainly caused by tide water. The average speed of the current varies from 1 – 3 knots.

During May – June there is a constant Northwesterly flood-current setting out from "Beisfjorden" (a narrow fjord to the South of the harbour).

This current reaches an estimated speed of 4 – 5 knots when it coincides with the fall of the tide.

The direction of the current in the harbour basin is exposed to seasonal and local variations owing to snow-melting and changes in water temperature.

It is important that the ship's Masters are aware of the fact that the existence of variable currents in the harbour may affect the manoeuvrability and bring vessels at anchorage in the bay to turn in dissimilar directions.

Winds: The local fall winds from Southeast occur suddenly and unexpectedly but are most frequent and strongest during the Winter season, when winds force 30 sec./m. have been measured.

Harbour Charts: Norwegian Chart No. 461 and British Admiralty Chart No. 3753.

Garbage: Trucks will remove garbage from vessels at berth on request. Garbage can also be removed by lighter if necessary from ships at anchor.

Launch Service: A regular launch service is operated and administrated by the Harbour Authorities.

Provisions and Stores available: Advance notice preferred.

Ship's Laundry: Can be taken care of.

Agency: Luossavaara-Kiirunavaara AB (LKAB) will handle the Agency and perform all normal service functions at this port. Telephone No. 082-41020. Cable address MALMEXPORT NARVIK. Telex No. 64022. Answer back code: lkabn n. VHF (24 hour basis) calling Channel 14, Working Channels 12 and 14. Call sign: LKAB.

Advance funds sufficient to cover estimated compulsory port expenses and additional outlays, such as cash to Master, must be remitted prior to vessel's arrival.

Bank remittances should be sent to LKAB's account No. 6370.05.01045 with Christiania Bank og Kreditkasse Narvik. Cable address "KREDITKASSEN" NARVIK. Telex No. 64081. Answer back code: cbknk n.

Philippines

VILLANUEVA: 08.34 N. 124.45 E. (See Late Plans) (also see page 830).

SHIPMASTER'S REPORT: January 1981.

VESSEL: LOA 259.0 m., beam 39.6 m., draft 52 ft. 6 in.

Discharged 109,000 tonnes of iron ore at Philippine Sinter Corp. Pier.

GENERAL: The pier of Philippine Sinter Corporation at Villanueva is located at the S.E. end of the "J"-shaped bay of Macajalar, in position Lat. 08° 34.45′ N., Long. 124° 45.24′ E., on the North coast of the Philippine island of Mindanao, in the province of Misamis Oriental. Villanueva is only a very small village. The nearest city is Cagayan de Oro, 24 km. (45 minutes) by car from the plant. Our Agent and almost all other offices of some importance, are located here.

DOCUMENTS: The Authorities and the Agents' representatives boarded the vessel at the anchorage (14 persons). The following lists were required:

10 Crew Lists.
8 Cargo Plans.
2 Vaccination Lists.
1 Maritime Declaration of Health.
6 Ship's Stores Lists.
6 Personal Effects Lists.

In addition, there were other lists, but the Agent had all of them made out in advance.

Telegraphic Free Pratique is obtainable. A telegram sent to the Agent 24 hours before arrival stating the number of Philippinos and Europeans is also compulsory.

Upon departure, no Philippino crew member is allowed to depart if his seaman's book has expired, so all seaman's books must be renewed before departure. Philippino citizens who are not seamen (wives, etc.) are not allowed to join the vessel in a Philippine port and stay with the vessel to its next port of call. Visiting was no problem, except that a special Customs Permit must be obtained.

PILOTAGE: Pilotage is compulsory both when anchoring and at docking/undocking. The Pilots have a portable CB radio, but no VHF. The pilot cutter is about 50 ft. long, with a large (for it's size) white superstructure. Pilot boarding ground is 08° 37′ N., 124° 42′ E. for inbound vessels. For outbound vessels, Pilot leaves as soon as the vessel is turned, and is about 5 cables off the pier.

ANCHORAGE: The Bay of Macajalar is a deep water bay, with the exception of a shallow area centered at 08° 40.75′ N., 124° 41.5′ E., and a strip of shallow water extending generally less than 0.5 miles off the coast.

The Villanueva Anchorage is the one exception on the East side of the bay. It is a ledge of less than 100 m. depth extending 1.4 miles Westward from 08° 37′ N., 124° 45.5′ E. on the shoreline, and it is 3.5 cables wide. The recommended anchorage is 8 cables due West of 08° 37′ N., 124° 45.5′ E. The depth here is 70 m. or less than 40 fathoms.

We anchored here and found it to be good holding ground. Not being more than 0.8 miles from the reefs in a "J" shaped bay, consequently open to wind and sea from West to North, I would not like to anchor there in any strong Northwesterly wind.

In our case the wind was from N.E. to S.E. which, according to the Pilot, were the prevailing wind directions. We did, however, experience quite a bit of swell.

BERTHING/UNBERTHING: Docking and undocking is only done during daylight. There are 4 tugs available in Villanueva, each of 3,500 h.p. The Pilot brought the vessel parallel to the pier about 0.2 miles off, and the 3 tugs we used (1 forward, 1 amidships and 1 aft) pushed us alongside without difficulty. We docked starboard side to. There was, according to the Pilot, no preference for docking starboard or port to, that is, for vessel's discharging.

Vessels loading must always dock port side to due to the construction of the shiploader.

The docking sonar had, in my opinion, the big fault that the Pilot had to rely upon verbal information via the CB radio. A display board visible from the bridge would have enabled us to form instant opinions.

Undocking was a reverse operation; we were pulled by 2 tugs until 0.2 miles off the pier, then the third pushed us around.

CARGO HANDLING FACILITIES: The pier is a concrete structure that rests on several large pipes that are sunk down to bedrock. It lays in direction 049° – 229°. There is a "gangway" connecting the pier to the shore. The pier itself is 380 m. long and about 50 m. wide. Large airfilled bags are used as fenders, 6 – 7 m. long with a radius of 1.5 m. – 2.0 m. So even with a relative heavy swell the ship lays very nicely alongside this cushion.

We tied up with 4 head/stern ropes, 2 spring and 2 breast ropes. The discharging cranes are of the same type as "Kawasaki" have in the port of Chiba, max. 6 tonnes with clamshells of 30 tonnes, portable cranes. Hourly average capacity on lump ore 1,100 tonnes per crane, and on fine ore 1,400 tonnes. We averaged 2,794 tonnes with 2 cranes.

The discharging operation was impressive, with regard to speed and precision.

The ship loader was a normal type conveyor belt with an airdraft of about 40 ft. Loading capacity 4,000 tonnes p.h. Free rail area at pier about 280 m., no shifting while loading for a ship of our size.

SERVICES: There is good drinking water available at the pier. Bunkers are obtainable but at what quantity and price I was not able to find out.

As of repair facilities, I had the impression that only simple repair work could be carried out.

The city of Cagayan de Oro has an airport with a twice daily direct flight to Manila, and once a day connections with Cebu and Davao. There are no international flights.

International telephone service is extremely poor. One must make the call directly from the telephone company's office, and a 2 – 3 hour waiting time for Europe and the U.S.A. must be expected. A call to Manila may come through in less than an hour. The Agent had telex and this is the only sensible communication with Cagayan de Oro.

With mail from Europe and the U.S.A., one must reckon on 2 to 3 weeks. It seems that all communications go through Manila, with the delays that this automatically causes.

The Agent had a minibus service from the plant to Cagayan de Oro. This proved a necessity, as taxis are scarce.

The ship chandler could only obtain foodstuff.

Qatar

Please Note: Alterations completed January 11th, 1981.

Saudi Arabia

JU'AYMAH. (also see page 864)

NOTICE: *Clearance of vessels.*

Quote:

With effect from the beginning of January 1981, Aramco Pilots have been instructed by the Frontier Forces (Coast Guards) that they are not allowed to board any vessel loading/bunkering at Ju'aymah terminals before the vessel has been cleared by appropriate Saudi Arabian Government Agencies. It is the Agents duty to take concerned Authorities on board the vessels.

Agents will do their utmost to clear on arrival, but ask for Principals understanding, since delayed arrivals, re-scheduled berthing, nomination conflicts and unfavourable weather might affect the possibilities.

Unquote:

SHIPMASTER'S REPORT: December 1980.

Ju'aymah LPG Terminal (N.G.L.):

Approaches: As for Ras Tanura, but use Main Channel only not Eastern Channel. Follow Main Channel to Beacon 3, proceed into Ju'aymah waiting area then proceed into "Ju'aymah LPG Anchorage" passing West of Buoy "J6".

Only vessels with authorisation from Ras Tanura Pilot Office will be allowed to proceed direct to LPG Anchorage. If waiting, the Northern Holding Anchorage is used as normal.

Departure: Depart by "Ju'aymah Departure Channel" under control of Ju'aymah Radar.

Control: Can be confusing. The LPG Terminal does not come under Ju'aymah Pilots but Ras Tanura Pilots which must be contacted at all times.

Listen to berthing schedule from "HZY" at 0700 hrs. GMT and 1900 hrs. GMT for berth number and time.

Call "Ras Tanura Pilots" as soon as possible before arrival to find out if loading at North Pier or Ju'aymah.

If cooling down, vessel can take coolant at one berth and load at another, Ju'aymah or North Pier and vice versa.

For transitting Ju'aymah SBM and Waiting Area, Ju'aymah Radar should be contacted.

VHF: At present very overloaded, with both Ras Tanura Pilots and Ju'aymah Pilots using Channel 14 and Ras Tanura Radar and Ju'aymah Radar using Channel 10.

Pilots: Board in Northern Area of LPG Anchorage South of SBM No. 36 from a tug. Pilot ladder-gangway arrangement used when in ballast.

Anchorage: About 1.5 miles to N.E. of pier, South of SBM's. Moderate holding ground so use plenty of cable.

Tugs: Two powerful tugs used. Secure in "American Style". Unberth using a long line. Tugs ropes used. Whilst ship is on LPG Berth both tugs on instant stand-by tied to buoys near Berth No. 52 (inside). It takes 15 minutes to get to Berth No. 51.

Aramco have 6 new tugs being built. 4 of which are Voith Schieder vane tugs of 5,000 h.p. 2 of these tugs will be used at the LPG Pier.

Notice of Readiness: Tender when ready to load, or if straight on berth at first line ashore. Berth Supervisor acknowledges only. Agent also gets acknowledgement from Aramco.

Conditions: Vessels berth on No. 51 (outside) with winds up to 30 knots but depends on swell and if tugs liable to damage vessel.

Unberth in most conditions at Berth No. 51.

Berth No. 52 (inside) is a bit more awkward and weather conditions are more carefully assesed.

Pier: Berth Head North at Berth No. 51 – port side to, and starboard side to at Berth No. 52. Pilots say there could be conditions such as weather and ship type that may warrant a departure from this rule.

A most imposing structure some 6 miles long with two LPG Berths at present heading S.E. 2 more berths are planned bearing N.W. on the other side of the pier making a "T" configuration.

Water depth at ILWS is 78 ft. at both berths.

Fenders are massive flat beds of timber and rubber and steel plates with rubber and hydraulic springs which I gather can withstand tremendous forces. The pier has been designed for 200,000 cu.m. LPG ships. We lay alongside Berth No. 51 in force 5 with large swell quite happily. The pier was not built for vessels of less than 75,000 cu.m. but due to lack of large vessels and trade conditions quite small ships of down to 15,000 cu.m. have been berthed.

Small vessels cause problems as they can fall inside the fenders on berthing and the Chiksans have to be fitted with spool pieces.

Gangway: A shore gangway on rollers and self levelling with hoist is landed on foredeck from forward end of Chiksan deck.

The berths have a tower crane between them for handling spool pieces and general maintenance. Ships derricks not used.

Loading Limitations:

Minimum Distance Manifold to Platform Deck Edge	20 ft.
Maximum Distance Manifold to Platform Deck Edge	50 ft.
Minimum Manifold Height above ILWS	25 ft.
Maximum Manifold Height above ILWS	100 ft.

At the lower operating limit fo the arms (i.e. 25 ft. above ILWS) because of the cut-off at maximum outreach, ships of a manifold height of less than 27 ft. would not be loaded.

Minimum distance apart of manifold lines centre to centre 4 ft. (from Official Aramco advice in Pilot Office).

The manifold distance apart (4 ft.) is overcome at present by the use of spools.

Loading: 16 in. Chiksans with auto-couplings (QCDC). 2 loading and 2 vapour each side of jetty.

Spool pieces are connected by ship's crew, Chiksans by shore personnel.

Rates of between 50 b.p.h. to 30,000 b.p.h. (4 to 2,500 tonnes p.h.) total on each product can be achieved. This may be less if 2 ships are taking same product.

Coolant and bulk can be taken on different berths either Berth Nos. 51 – 52 or at North Pier Nos. 6, 8 and 10. We were due to go to North Pier for bulk but in the end took both at Berth No. 51.

Different metering systems from 3 in. to 12 in. are used at each berth.

50 – 900 b.p.h. 1×3 in. meter for low rates such as coolant and topping off.

300 – 4,000 b.p.h. 2×6 in. meter intermediate.

1,900 – 16,000 b.p.h. 3×12 in. meter full rates (1 meter stand-by).

Lines can be inter-switched between products but maximum of about 30,000 b.p.h. on any one product.

Butane and Propane can be sub-cooled by 5°F by Freon chillers.

Moorings: Basic arrangement 3, 3, 2, each end. Springs first. But variation due to vessel configuration and size may be made.

Lines sent away by heaving line, mooring boats not used.

All lines on quick release hooks with Capstans alongside.

Fire Wire not to be loosely lashed on deck. Made fast with 5 turns on bitts and bight held up by heaving line.

Vapour Return: At present not charged and flared about 1 mile down pier. We were allowed to use it quite freely but this might change.

The amount of vapour being flared can be noted in the Control Room, situated between berths, and is very accurate.

Control Room: Between the two berths is an accommodation block with the Control Room on top with anti-glare windows. Various rooms for duty personnel are situated on different decks with the Pilot Office and Shift Supervisor on the bottom deck near the entrance.

The Agent can be phoned from here.

The Control Centre on top is well worth a visit, being most impressive.

Ships particulars are on a computer with any adverse points as well.

Access: Private cars not allowed on pier. The idea is that all personnel use the Aramco provided bus or helicopter service which lands on helipad at the North end of the berth.

Agent: Requires advance notice of ships movements and actual notice of movements at all stages. Aramco do not always advise Agents and due to distances involved confusion and delay can result.

Agent will arrange for medical attention to crew members. In an emergency call "Ras Tanura Pilots" who will arrange a Coastguard helicopter to come to berth or anchorage. This usually takes about 30 minutes from calling Pilot Office. Also advise Agent.

General: Bunkers are available from Chiksans at each end of loading arms. Used for both fuel and diesel. 8 in. couplings.

No fresh water available.

All usual conditions apply as for Ras Tanura.

All Air Bill items to anchorage.

Copy of Saudi Port Regulations required but does not apply to Ras Tanura area.

Agent brings down Customs who seal up and handle Immigration matters.

Berth owned by the Saudi Government Company "Petromin" not Aramco.

Aramco operate the berth on a management basis.

RAS AL-KHAFJI: (also see page 872).

The following paragraphs supersede those with the same heading on pages 873-876 for Ras Al-Khafji. Additional new information is also included.

The port is located in the offshore area of the Divided Zone of the Kingdom of Saudi Arabia and the State of Kuwait.

The onshore base lies in position approximately Lat. 28° 25′ N., Long. 48° 31′ E., and within a distance of 7 miles (13 km.) offshore the Company has two four-buoy system berths and two single-buoy-mooring system berths for loading tankers, and also an anchorage area for dry-cargo ships. Outside of this distance there is an anchorage area for tankers. These berths and anchorage areas are situated in the territorial waters of the Kingdom of Saudi Arabia.

OPERATORS: Arabian Oil Company Ltd.

DOCUMENTS:

(B) Cargo:

All the documents listed below except the Ship's Statement of Cargo (Ullage Report) are prepared onshore, and this takes about 1.5 hours after loading completion. The tanker is requested to designate the type of documentation, either early departure or ordinary documentation. The Company usually recommends early departure documentation, either Case I or II. But ordinary documentation can also be requested. In this case, however, it takes a further 30 – 60 minutes before the documents arrive at the tanker. Whenever necessary, the Mooring Master will sign the documents on behalf of the Company.

The following cargo documents are usually to be prepared onshore except (4):

(1) Notice of Readiness
(2) Bill of Lading
(3) Tanker Time Sheet
(4) Ship's Statement of Cargo (Ullage Report)*
(5) Certificate of Discharge**
(6) Master's Receipt of Documents

Note: *Ship's Statement of Cargo includes the items for "Clean Ballast Declaration" and "Dry Inspection" both together in one form, and is to be completed always on board the tanker regardless of Early Departure Documentation.

**Certificate of Discharge should be handed to the tanker's Agent at the port of discharge for certification by the Customs Authorities there. The Agent should then return the Certificates to the Company as soon as possible. Non compliance with this requirement could involve the tanker in serious difficulty as all the member states of the Arab League prohibit the export of any materials through their ports to Israel, and the purpose of the Certificates is to prove that the cargo was not discharged in Israel.

Masters are therefore advised to ensure that their Agents at each discharging port understand this and return the Certificates at the earliest possible moment.

APPROACHES: The approaches to Ras Al-Khafji are marked on the appropriate U.S.N.O. and British Admiralty Charts, and deep enough for the majority of vessels visiting the Port to proceed with normal caution using the buoys (Buoys No. 1 and No. 2) as centre line and both side markers (Buoys No. 3 – No. 8). A single patch with a depth of 56 ft. (17.07 m.) marked by Buoy No. 4 exists close to the passage. A patch of minimum depth of water 70 ft. (21.34 m.) exists in the passage 0.6 miles S.S.E. of Buoy No. 7.

All the geographical positions shown are intended for reference purpose only. Users are reminded that certain differences are known to exist between the positions herein and those on the U.S.N.O. and British Admiralty Charts of the area.

The U.S.N.O. Chart Nos. 62422 and 62430 are recommended for navigational use in this area.

For oil tankers arriving at Ras Al-Khafji without the necessary charts, the full information will be given by telegram upon request to "ARABIAOIL KUWAIT" (via "9KK Kuwait Radio Station") a few days before arrival. The same information will be given by telex upon request to the Company's Field Office. Alternatively, if the vessel has VHF, the buoy positions will be given to them upon request to "Ras Al-Khafji" as the vessel approaches, but prior notice of requiring this service should be given in the vessel's arrival message. The navigation message used reads as follows:

"FROM JEZIREH YE FARSI LIGHT 5 MILES OFF ABEAM STEER COURSE 300 DEGREES TRUE FOR 64 MILES TO REACH NUMBER ONE LIGHT BUOY LATITUDE 28° 36.0′ NORTH LONGITUDE 49° 10.0′ EAST RWVS ISOPHASE WHITE TEN SECONDS 10 MILES RAREFL – THENCE STEER 270 DEGREES TRUE FOR 9 MILES TO NUMBER TWO LIGHT BUOY LATITUDE 28° 36.0′ NORTH LONGITUDE 49° 00.0′ EAST RWVS LONG FLASHING WHITE TEN SECONDS 10 MILES RAREFL – THENCE STEER 254 DEGREES TRUE FOR 9.5 MILES TO POINT 0.8 MILE NORTHWARD OF NUMBER FOUR LIGHT BUOY LATITUDE 28° 32.6′ NORTH LONGITUDE 48° 49.0′ EAST RED GPFL FIVE RED TEN SECONDS 6 MILES RAREFL – THENCE STEER 270 DEGREES TRUE ABOUT 2 MILES TOWARD NUMBER SEVEN LIGHT BUOY LATITUDE 28° 33.4′ NORTH LONGITUDE 48° 45.7′ EAST GREEN FLASHING GREEN THREE SECONDS 4 MILES RAREFL – THENCE STEER 243 DEGREES TRUE TOWARD FOR 8 MILES NUMBER NINE LIGHT BUOY LATITUDE 28° 29.5′ NORTH LONGITUDE 48° 37.8′ EAST YELLOW GPFL FOUR YELLOW TEN SECONDS 7 MILES RAREFL MARKS TANKER ANCHORAGE WEST CORNER STOP NUMBER ONE AND TWO LIGHT BUOYS MARK CENTRE LINE OF APPROACH WHICH IS WIDE AND DEEP STOP TWO SHOAL PATCHES NORTHWARD OF APPROACH ARE MARKED BY NUMBER THREE LIGHT BUOY LATITUDE 28° 34.9′ NORTH LONGITUDE 48° 51.5′ EAST YELLOW ABOVE BLACK QUICK FLASHING SIX PLUS LONG FLASHING WHITE FIFTEEN SECONDS 10 MILES RAREFL AND NUMBER FIVE LIGHT BUOY LATITUDE 28° 33.8′ NORTH LONGITUDE 48° 48.0′ EAST YELLOW ABOVE BLACK VERY QUICK FLASHING SIX PLUS LONG FLASHING WHITE TEN SECONDS 10 MILES RAREFL STOP TANKER ANCHORAGE AND PILOT GROUND IS WITHIN 1 MILE RADIUS OF LATITUDE 28° 29.5′ NORTH LONGITUDE 48° 39.0 STOP"

NAVIGATION AIDS:

Conspicuous Marks: The flare stacks in the offshore field and onshore are normally visible at a far distance, but may occasionally be extinguished, and a well structure located 4.5 miles Northward from Light Buoy No. 2 also conspicuous.

No. 1 Flare	Lat. 28° 28.3′ N.	Long. 48° 57.0′ E.
No. 2 Flare	Lat. 28° 27.0′ N.	Long. 48° 54.8′ E.

Onshore Flare 2	Lat. 28° 23.7′ N.	Long. 48° 32.1′ E.
Well Structure	Lat. 28° 40.4′ N.	Long. 48° 57.8′ E.

Aids to Navigation: See M.E.N.A.S. Notice No. 08/81 after "Services".

READINESS: The Master of each arriving tanker should present a Notice of Readiness to the Company's Mooring Master who will sign it on behalf of the Company. The Notice of Readiness should be tendered at the time of the tanker's arrival at the anchorage area, which is understood to be either the time of dropping the anchor in the anchorage, or if the tanker does not anchor, the time when the Mooring Master boards the vessel.

PILOTAGE: Pilotage is compulsory for arriving tanker's berthing and unberthing at Ras Al-Khafji and a Company's Mooring Master will board the tanker at the anchorage area to take her to her assigned berth. The Company's Mooring Master shall advise the tanker's Master on the manoeuvre and operations relating to berthing, bunkering, connecting and disconnecting the loading hoses. After berthing, the Mooring Master will remain onboard the tanker until she is unberthed and the cargo documents are completed.

Notwithstanding the presence of the Company's Mooring Master onboard, the Master of the tanker remains responsible for his tanker at all times and in all respects.

In the event of any emergency, however, the necessary steps should be taken with the assistance of the Mooring Master.

The Master of each tanker shall give the Mooring Master all information necessary for the safe handling and the safe operation of the tanker while in the berth.

BOARDING: All vessels are required to provide a safe means of access for personnel boarding and leaving the vessel, and should have their accommodation ladder rigged on the port side. In the case of tankers assigned to Berth No. 3 or No. 4 an accommodation ladder which leads down forwards is liable to be blocked by the floating hoses, and in such a case the ladder should be rigged on the starboard side. A ladder aft is always suitable on the port side.

BALLAST: *Prevention of Sea Pollution by Oil:* THE DISCHARGE OF DIRTY BALLAST and/or OIL RESIDUE, BILGE and WASTE OIL by any vessel in the GULF area is STRICTLY PROHIBITED. The Company strongly requests all vessels to observe this rule of sea pollution prevention by oil in conformity with the Saudi Arabian Government's policy objectives as well as their Ports, Harbours and Lighthouses Regulations along with the relevant rules, which are substantially as follows:

In the event of oil pollution of the sea by any vessel, Masters are liable to possible imprisonment and fine, in addition to the refundment of all clean-up costs and damages sustained by any party. Should Masters fail to comply, they may be detained by the Authorities. Shipping Agents will be required to warrant Master's compliance.

Since the terminal has no facilities to receive dirty ballast, oil tankers arriving with dirty ballast will be requested to collect dirty ballast into one tank of the tanker, otherwise load crude oil on top of oil residue.

Recommended Ballast Condition on Arrival: All tankers arriving at this port are required to have sufficient ballast to give a safe draft for manoeuvring in the port. Tankers arriving with insufficient ballast may be required to increase it if the Mooring Master considers it necessary to do so. In good weather conditions, the Mooring Master will permit arriving tankers to start deballasting as they approach the berth in order to save time.

ANCHORAGE:

Ocean Tankers Anchorage Area: The oil tankers anchorage area is designated within 1 mile radius from: Lat. 28° 29.5′ N., Long. 48° 39.0′ E.

Two Light Buoys (No. 9 and No. 10) mark the Western limit and Southern limit of this area respectively. The depth of water varies from 70 ft. (21.34 m.) to 77 ft. (23.47 m.) with a good holding ground of clayey mud. Oil tankers awaiting berthing should anchor as close as possible to these buoys.

Dry-Cargo Ships Anchorage Area: The anchorage area for dry-cargo ships is located about 5.5 miles to the S.W. of the oil tanker anchorage area, and is centred in position: Lat. 28° 26.8′ N., Long. 48° 33.4′ E. at which position a yellow Light Buoy (No. 14) showing a flashing yellow light every 3 seconds has been laid. Dry cargo ships should anchor within 0.5 mile radius of this buoy, where the depths are between 36 ft. (10.97 m.) to 50 ft. (15.24 m.) in a good holding ground of clayey mud.

Prohibited Area from Navigation, Anchoring and Fishing: An area bounded by straight lines joining the following points is prohibited from anchoring and fishing due to the presence of Wellheads, Flow Stations, Gathering Station, etc. and the numerous pipe-lines and power transmission cables on the sea bed.

Additionally, the area bounded by the following 6 points (f) – (j) and (m) is prohibited from navigation of any oil tankers and vessels or craft except those operating on direct instructions from the Company.

(a) Lat. 28° 24′ 48″ N., Long. 48° 31′ 57″ E.
(b) Lat. 28° 25′ 33″ N., Long. 48° 32′ 55″ E.
(c) Lat. 28° 26′ 45″ N., Long. 48° 35′ 16″ E.
(d) Lat. 28° 25′ 50″ N., Long. 48° 35′ 40″ E.
(e) Lat. 28° 29′ 04″ N., Long. 48° 52′ 34″ E.
(f) Lat. 28° 32′ 00″ N., Long. 48° 54′ 00″ E.
(g) Lat. 28° 35′ 00″ N., Long. 49° 00′ 00″ E.
(h) Lat. 28° 32′ 00″ N., Long. 49° 04′ 00″ E.
(i) Lat. 28° 28′ 00″ N., Long. 49° 04′ 00″ E.
(j) Lat. 28° 24′ 00″ N., Long. 48° 52′ 00″ E.
(k) Lat. 28° 26′ 53″ N., Long. 48° 52′ 00″ E.
(l) Lat. 28° 23′ 13″ N., Long. 48° 31′ 48″ E.
(m) Lat. 28° 28′ 06″ N., Long. 48° 52′ 00″ E.

RESTRICTIONS: *Port Closure:* When the weather and sea conditions develop worse than the below mentioned permissible criteria at the port, mooring operations normally become extremely difficult and unsafe. Therefore, in such circumstances, the Company advises that the port is closed to approaching tankers by VHF and requests the tankers to wait at the Tanker Anchorage Area until the port is reopened.

The Company, however, reserves the right of selective berthing of some vessels with better manoeuvrability even during such period.

Permissible Criteria for all Berths:

Wind Velocity: Up to 20-25 knots depending on direction.
Sea Conditions: Up to 5 ft.

HEALTH: *Quarantine and Pratique:* Quarantine Office of the Saudi Arabian Government is maintained at the port, and a Quarantine Doctor or a Quarantine Officer may board the vessel, if he considers it necessary.

The Master is requested to submit the following documents for the Government filing through his Agent:

(a) Crew List
(b) Vaccination List
(c) Passenger List (if any)

3 copies each

All arriving vessels should despatch the following cable to Quarantine Office at the port 48 hours before their arrival at Ras Al-Khafji Port:

"QUARANTINE KHAFJI (ship's Agent cable address) ________ vessel's name ETA RAS AL-KHAFJI time and date FLAG ____ LAST PORT ________ DESTINATION ______ NO. OF CREW ______ NO. OF PASSENGERS ________ ALL HEALTHY NO SICKNESS NO DEATH VALID CERTIFICATE REQUEST FREE PRATIQUE.
MASTER ____________"

Quarantine fee is collected from any vessel according to her Net Registered Tonnage other than tankers lifting hydrocarbon cargoes.

RADIO: *Notice of Arrival:* Arriving vessels should advise their ETA Khafji at least 72 hours before their arrival through normal radio services. As an alternative to the route through Kuwait Radio Station (call sign: 9KK), these vessels may send their first message through Singapore, Bombay or Bahrain Radio. Confirmation of ETA should be made well in advance before arrival by calling "Ras Al-Khafji" on Channel 16 VHF. Shorter notices may result in delays and failure to give at least 24 hours will result in an addition to allowable laytime in the event a demurrage claim is filed against the Company. After anchoring, these vessels should advise their time of anchoring through VHF, and thereafter maintain a continuous watch on Channel 16 until the Company's Mooring Master boards. "Ras Al-Khafji" VHF station normally works 24 hours every day.

Radio Communications: All radio communications between the Company at Ras Al-Khafji and the vessel are made through the Kuwait Government Radio Station (9KK) in Kuwait, or directly to the Company's Field Office by telex.

Vessels may find it helpful to route their first message through Singapore, Bombay or Bahrain Radio Station as it is sometimes difficult to contact Kuwait Radio Station from a long distance.

All cables should be addressed to "ARABIAOIL KUWAIT". The first message should be sent according to the following form, but any items which are the same as a recent previous voyage to this port may be omitted.

(1) ETA Ras Al-Khafji
(2) Last port
(3) Deballasting time
(4) Quantity and type of cargo and bunker required
(5) Maximum loading rate
(6) Diameter of cargo and bunker connections
(7) Distance from manifold to ship's side
(8) Derrick capacity
(9) Estimated sailing drafts – fore and aft
(10) Whether Ras Al-Khafji is first or second port (when taking part cargo).

Note: Item (10) should only be answered in cases where tankers are taking part cargo at Ras Al-Khafji. If coming second port, the first loading port should be mentioned.

Short-range radio communication can be made with the Terminal Office by calling "Ras Al-Khafji" on VHF Channel 16.

TUGS: The undermentioned tugboats are available for mooring and unmooring purposes.

	g.r.t.	*b.h.p.*	*Towing Power (tons)*
"Chiyoda Maru No. 4"	236	2,200	28.3
"Shark"	360	4,200	45.0
"Shark II"	478	4,200	60.5

One of these tugs stands by near the berths as long as the tanker remains moored.

The undermentioned two mooring boats are used for handling ropes and hoses.

	g.r.t.	*b.h.p.*	*Towing Power (tons)*
"Al-Hout"	85	770	7.0
"Dhurgham"	85	796	7.0

BERTHING: Berths No. 1 and No. 2:

(a) Sea-Berth No. 1:

Position of manifold: Lat. 28° 26′ 10″ N., Long. 48° 34′ 57″ E.
Depth of water: 53 ft. (16.2 m.) at ISLW.
Permitted draft: 47 ft. (14.3 m.) max.
Type of berth: The berth is a conventional 4-buoy system where the tanker moors with 2 anchors and 1 buoy forward and to 3 buoys aft.
Length of berth: The berth is designed for tankers of 800 ft. (244 m.) length but can be used by tankers of any size, although tankers of less than 650 ft. (198 m.) overall length sometimes experience difficulty in mooring if their lines are less than a full 720 ft. (220 m.).
Submarine pipelines and hoses: From the ex-Loading Dock 1×26 in. crude oil line and 1×18 in. fuel oil line have been laid to the underwater manifold position. From there 2×10 in. rubber hoses for crude oil and 1×12 in. rubber hose for fuel oil are connected, approximately 270 ft. (82 m.) long and the maximum lifting weight of the 2 crude oil hoses together is 4.5 – 5.0 tons. For bunkering purpose one section of 6 in. hose is attached to the end of the 12 in. fuel oil hose.

(b) Sea-Berth No. 2:

Position of manifold: Lat. 28° 25′ 55″ N., Long. 48° 35′ 28″ E.
Depth of water: 56 ft. (17.1 m.) at ISLW.
Permitted draft: 50 ft. (15.2 m.) max.
Type of berth: Same as Berth No. 1.
Length of berth: Same as Berth No. 1.
Submarine pipelines and hoses: From the ex-Loading Dock 1×26 in. crude oil line and 1×10 in. bunker line have been laid to the manifold position. From there 2×10 in. rubber hoses for crude oil and 1×6 in. rubber hose for bunker are connected to the ship's manifold. All these hoses are approximately 360 ft. (110 m.) in length, and the maximum lifting weight of 2 crude oil hoses together is 4.5 – 5.0 tons.

(c) Loading Rates:

Crude oil loading rate at Berths No. 1 and No. 2 is 30,000 bbls./hr. or 4,000 tons/hr.

Fuel oil loading rate at Berth No. 1 is 4,000 bbls./hr. or 600 tons/hr., and at Berth No. 2 is 2,700 bbls./hr. or 400 tons/hr.

Preparation on Board before Berthing: Tankers assigned to Berth No. 1 or No. 2 should have the following ready:

(i) Both Anchors.
(ii) Three ropes forward and 9 ropes aft.
Some wires are acceptable in place of the equivalent number of ropes.
Neither ropes nor wires are available from the buoys.
All ropes and wires should be in good condition and preferably without splices.
(iii) Port derrick rigged for a minimum lift of 5 tons, using a wire runner and hook.
(iv) Two 10 in. ANSI 150 hose connections for crude oil, and 1×12 in. ANSI 150 for fuel oil cargo (at Berth No. 1 only), at the ship's port side manifold.
If ANSI 150 is not available, the company should be advised before arrival.

Mooring and Unmooring: On approaching the berth a ship's line is passed to one tugboat from the centre fairlead aft. This line should be of good strength and made well fast on board.

When in position off the berth, the starboard anchor is let go and slacked away easily to about 9 or 10 shackles on deck. The port anchor is then let go and paid out easily as the tanker swings round into the berth using the tugs and engines as required. At the same time, the starboard anchor is hove in to about 6 or 7 shackles on deck and then made ready for slacking away again.

As the tanker backs down the berth the anchors are slacked away as necessary, and the ropes are sent to the forward (No. 4) Buoy. When the stern passes close to the starboard quarter (No. 1) Buoy the ropes are sent away to this buoy, hove in tight and then put on the bitts ready for slacking if necessary.

Ropes are then run to the port quarter (No. 3) Buoy, hove tight, and the lateral position in the berth adjusted between the port and starboard quarter buoys.

Lastly, ropes are run to the stern (No. 2) Buoy and the tug line also passes to this buoy. The fore-and-aft position is then adjusted between the anchors and the sternlines. A second tug is used to assist in the lateral positioning of the tanker, and 2 mooring boats are used for running the lines to the buoys, these normally taking 3 ropes at a time.

In Wintertime 3 ropes are used to each buoy, but in Summer 2 of these may be dispensed with at the Mooring Master's discretion.

When properly positioned in the berth, the distance from the ship's side to the manifold marker buoy should be about 50 – 66 ft. (15 – 20 m.).

When hose disconnection is completed, the tanker unmoors usually by letting go all the lines on Buoys No. 3 and No. 4, followed by those on Buoy No. 2 and lastly those on Buoy No. 1. The tanker then heaves both anchors as necessary until they are up and clear, and the tanker can leave the berth. The tugs are used as required to keep the tanker away from the manifold marker and the mooring buoys.

Mooring Masters may vary this procedure according to the prevailing weather.

(f) Hose Connection and Disconnection: After the completion of mooring, the mooring boat will pull the hose marker buoys to the tanker, and connect them to the tanker's cargo hook of port derrick. The 2 crude oil hoses are lifted together from the seabed by the tanker's derrick, and connected directly to the manifold.

The fuel oil hose at Berth No. 1 is lifted separately and connected in similar manner.

The time taken for hose connection is about 1.0 – 1.5 hours depending on the number of hoses to be connected. Hose disconnection takes about 1 hour.

Connection and disconnection of the cargo and bunker hoses are to be performed by the crew of the loading tanker under the direction of the Mooring Master. Bolts, nuts, gaskets, reducers, etc. will be provided by the Company.

(g) Loading Restriction at Berths No. 1 and No. 2: Due to there being only 1 crude oil pipeline between the ex-Loading Dock and the shore, it is not possible to load tankers in Berths No. 1 and No. 2 simultaneously.

During the night time, berthing operation at Berths No. 1 and No. 2 shall not be carried out to prevent the accidents.

Berths No. 3 and No. 4:

(a) Berth No. 3:

Position of buoy: Lat. 28° 27′ 06″ N., Long. 48° 36′ 28″ E.
Depth of water: 62 – 64 ft. (18.9 – 19.5 m.), but 59 ft. (18.0 m.) over the pipelines, at ISLW.
Permitted draft: Normally 54 ft. (16.5 m.), but 56 ft. (17.1 m.) permissible using rise of tide.
Type of berth: The berth is a single-buoy-mooring system consisting of a buoy 36 ft. (11.0 m.) in diameter, moored to 6 pendant legs of 3.75 in. extra high strength chain of 720 ft. (220 m.) long, and having a rotating deck carrying the pipe-line and mooring connections.
Mooring: Attached to the mooring connections on the buoy are 2 double 15 in. nylon ropes (120 mm. diameter, breaking strain 250 tons/line), these main ropes supported by floats are 160 ft. (49 m.) long, and have at their free end a 35 ft. (10.7 m.) long stud link chain which includes a "Sister-plate" and a "Slender-link" for receiving the shackles used on the deck of the tanker. From the outer end of this chain there is connected a 10 in. (80 mm. dia.), polypropylene "Pick-up" rope about 165 ft. (50 m.) in length. The chain is hung by large iron buoys coloured red and green.
A 12 in. nylon "Bollard rope" (97 mm. dia., breaking strain 150 tons/line) about 150 ft. (46 m.) in length is connected between each "Sister-plate" and ship's bollard while tankers moor in berth.

Submarine pipe-lines and hoses:	1×36 in. crude oil line and 2×12 in. fuel oil lines are laid approximately 30,000 ft. (9,140 m.) from the shore to a position off the underwater manifold close under the buoy through the Valve Station, which is located at about 4,000 ft. (1,220 m.) Westward of the buoy. From the underwater manifold the crude oil goes to the buoy through a 20 in. submarine hose; the fuel oil lines are joined at the underwater manifold and the fuel oil is led to the buoy through 1×10 in. submarine hose. From the deck of the buoy the 20 in. crude oil hose and the 10 in. fuel oil hose, which are floating, have a length of 720 ft. (220 m.) to a hose raft, at which position the crude oil hose is divided into 3 strings of 12 in. floating hoses. These, together with the fuel oil hose, extend for a further 150 ft. (46 m.) making a total length of 870 ft. (265 m.) including the raft. At their free end the hoses are paired and connected to 2 large marker buoys each 5 ft. in diameter.

(b) Berth No. 4:

Position of buoy:	Lat. 28° 27′ 54″ N., Long. 48° 38′ 36″ E.
Depth of water:	70 – 73 ft. (21.3 – 22.3 m.), but 69.5 ft. (21.2 m.) above the pipe-lines, at ISLW.
Permitted draft:	Normally 64 ft. (19.5 m.), but 66 ft. (20.1 m.) is permissible using rising of tide.
Type of berth:	The berth is a single-buoy-mooring system consisting of a buoy 35 ft. (10.7 m.) in diameter, moored to 6 pendant legs of 3.75 in. extra high strength chain of 855 ft. (261 m.) long, and having a rotating deck carrying the pipe-line and mooring connections.
Mooring:	The particulars of mooring are exactly the same as those of Berth No. 3.
Submarine pipe-lines and hoses:	1×36 in. crude oil and 2×12 in. fuel oil lines from onshore are branched at the Valve Station, which is located at about 16,600 ft. (5,060 m.) Westward of the buoy, by 1×48 in. crude line and 1×16 in. fuel line to Berth No. 4. There is also a 30 in. connecting crude line between the ex-Loading Dock and the Valve Station to raise up the loading rate at Berth No. 4. The above 1×48 in. crude line and 1×16 in. fuel line are laid from the Valve Station to a position off the underwater manifold close under the buoy. From there the crude oil goes to the buoy through a 24 in. submarine hose, the fuel oil is led to the buoy through a 10 in. submarine hose. From the deck of the buoy the 24 in. crude oil hose and the 10 in. fuel oil hose, which are floating hoses, have a length of 810 ft. (247 m.) to a hose raft, at which position the 24 in. hose is divided into 3 strings of 14 in. floating hoses. These, together with the 10 in. fuel oil hose, extend for a further 120 ft. (36.6 m.) including the raft. At their free end, these hoses are connected to large marker buoys each 5 ft. in diameter.

(c) Loading Rates at Berths No. 3 and No. 4: The maximum loading rates of crude and fuel oil at Berth No. 3 are 45,000 bbls.p.h. (6,200 t.p.h.) and 2,700 bbls.p.h. (400 t.p.h.) respectively. At Berth No. 4 these are 62,000 bbls.p.h. (8,500 t.p.h.) and 3,400 bbls.p.h. (500 t.p.h.).

(d) Preparation Onboard before Berthing at Berths No. 3 and No. 4: Before arriving at the anchorage, tankers assigned to Berth No. 3 or No. 4 should have ready the following:

(i) Two mooring messenger ropes forward, together with rope stoppers, and also 1 or 2 crow bars.
(ii) Port derrick rigged for 10 tons.
(iii) 3×12 in. ANSI 150 at Berth No. 3 or 3×14 in. ANSI 150 at Berth No. 4 hose connections for crude oil, and 1×10 in. ANSI 150 for fuel oil at the port side manifold. If ANSI 150 is not available, the Company should be advised before arrival.

(e) Mooring at Berths No. 3 and No. 4: The Mooring Master will board from a tugboat which carries the mooring and hose connection materials. Tankers should have their crew stand-by to receive these materials, and should maintain a lee until this is completed.

The Mooring Master will instruct the crew in the setting up of the forward moorings, where 12 in. bollard ropes are made fast round the port and starboard bollard posts with their attached shackles about 12 ft. (3.7 m.) inboard from the panama leads or fairleads as far forward as possible. The size of the fairlead opening should be at least 14 in. to prevent the chain jamming in the fairlead.

On approaching the berth, the tanker should lower a mooring messenger rope from each bow. The mooring boat will take the port rope first, and connect it to the port "Pick-up" rope which should be hove in while the boat returns to take the starboard rope for connection to its "Pick-up" rope. These 2 ropes are then hove in until the chains come into the fairleads, and the shackles can be made fast to the "Sister-plates". The "Pick-up" ropes are then slacked back until the bollard ropes have the weight.

Mooring is then completed, and the usual time from sending away the first line until all fast is about 30 minutes.

Immediately after the tanker moors to SBM, her stern line shall be given to the stand-by tugboat through her middle fairlead to help maintain the tanker in safe position while the tanker is in the berth.

(f) Unmooring from Berths No. 3 and No. 4: After hose disconnection is completed, the weight is taken on the "Pick-up" ropes, the bollard ropes are unshackled, and as the tanker backs off the berth the "Pick-up" ropes are slacked off and then dropped into the water. The tug will come alongside either before or after the tanker backs off the berth, whichever is convenient, and the bollard ropes and the two big shackles are passed to the tug. Unmooring time is usually 10 minutes.

(g) Hose Connection and Disconnection at Berths No. 3 and No. 4: After the completion of mooring, the mooring boat which has been holding the hoses clear during berthing, will bring the hoses to the tanker and connect the hook to the buoy having 1 or 2 hoses, which are usually lifted aboard and connected directly to the tanker's manifold.

The hoses are hung off on 2 in. diameter nylon ropes and lashed to the rail to prevent shock load due to wave action being transmitted to the manifold flanges.

After the first hose has been connected, the second buoy is lifted and the remaining hoses are connected in similar manner. If an arriving tanker requires a loading rate of 5,000 t.p.h. or less at Berth No. 3 and 6,000 t.p.h. or less at Berth No. 4, only 2 crude oil hoses are connected. Hose connection usually takes 2 – 3 hours. Hose disconnection is done in a reverse manner to connection, and takes about 1.5 – 2.0 hours.

Connection and disconnection of the cargo and bunker hoses are to be performed by the crew of the loading tanker under the direction of the Mooring Master. Bolts, nuts, gaskets, reducers, etc., will be provided by the Company.

(h) Loading Restriction at Berths No. 3 and No. 4: Due to there being only 1 crude pipe-line between the Valve Station and shore, it is not possible to load tankers in Berths No. 3 and No. 4 simultaneously.

LOADING: *Dry Inspection:* Upon completion of deballasting the Mooring Master will inspect the tanker's tanks. If the tanks are not satisfactory, he may require further pumping until they reach the required standard.

Loading Operations: When the tanker is ready in all respects for loading, the tanker's officer must inform the Mooring Master who will transmit the necessary orders to the Central Control Room onshore.

Loading is started by a booster pump, and after everything has been checked and found satisfactory on board, then the loading rate will be gradually increased by starting further booster pumps and then main pumps in sequence until the required loading rate is reached; provided always that the required loading rate is within the capacity of the pumps.

Loading rates can be varied at any time during loading upon 5 – 10 minutes advance notice to the Mooring Master on board. In case of EMERGENCY, the IMMEDIATE STOPPING of all loading can be accomplished.

During loading, any valve operation on the tanker should be reported to the Mooring Master in advance. Especially at the time of Topping Off, the tanker's officer on duty should request the Mooring Master to reduce loading rate prior to any valve closing, in order to avoid any pressure on rubber loading hoses.

When loading is completing, the rate is gradually reduced by stopping first the main pumps and then the booster pumps, one by one according to the request of the tanker's officer. At the final stage of loading only booster pumps should be on the line, and the tanker's officer should tell the Mooring Master to "Stand-by" at least 5 – 10 minutes before finishing it.

Shore pumps will stop about 15 seconds after their control buttons are pressed, but the oil will continue to flow for several minutes.

Any stop notice of loading completion must be given by the tanker's officer as "Shore-stop" is NOT practiced at this port.

Overflows and Spillage: In the event of an overflow or spillage during loading, loading will be stopped immediately and will remain stopped unless the Mooring Master is satisfied that all the overflowed oil has been cleared off the deck and there is no longer any unusual danger for resuming loading.

Ullaging and Gauging: After loading is completed, the Mooring Master will witness the final ullaging on board so that the tanker's figures can be calculated.

Onshore the Government and the Company gaugers will take manual gauges of the shore tanks before and after loading to calculate the figures of the Bill of Lading.

MEDICAL: The Company has its hospitals at Ras Al-Khafji. Medical and dental treatment can be given in cases of emergency or serious illness or injury. Epidemic diseases or cases of serious injury or disease requiring operations, etc. are normally transferred to the hospitals in Dammam or in Kuwait. The Company's doctor will not normally attend on board unless the patient is incapable of attending the hospital. Requests for medical attention should be given to the ship's Agent as early as possible before arrival.

FUEL: *General Information:* Intermediate fuel oil (IFO) and marine diesel oil (MDO) are supplied as bunker fuel oil to tankers calling at Ras Al-Khafji. Each loading berth has a pipe-line which can deliver intermediate fuel oil. Marine diesel oil is supplied from a barge with a capacity of 200 metric tons for which no extra charge is made.

Bunker Nomination: Owners, Operators or Charterers should nominate their tankers' bunker requirements to the Company's Head Office in Tokyo.

Tankers are requested to confirm the grade and quantity of bunkers required to "ARABIAOIL KUWAIT" via "9KK" through normal radio services at least 72 hours before arrival; or in cases where tankers receive their bunker instructions less than 72 hours away, they should advise their bunker requirements as soon as possible.

Bunkering Operation: Bunker supply to tankers in the berths is normally made while the tankers are discharging ballast and or loading crude oil. MDO-supply from a barge will be done usually before loading cargo.

Tanker engineers are requested to give all necessary information and assistance to the shore staff attending the bunkering and to pay constant attention to the bunker supply.

Responsibility: Notwithstanding the presence of the shore staff attending the bunkering operation on board, the Master of the tanker remains solely responsible for his tanker at all times and in all respects.

Size of Bunker Connections and Bunkering Rates:

Berth	*IFO*	*MDO (supply from a barge)*
No. 1 (6 in.)	600/300 t.p.h.	80 t.p.h. (4 in.)
No. 2 (6 in.)	400/300 t.p.h.	80 t.p.h. (4 in.)
No. 3 (10 in.)	400/300 t.p.h.	80 t.p.h. (4 in.)
No. 4 (10 in.)	500/300 t.p.h.	80 t.p.h. (4 in.)

Note: In Winter time the rate for IFO decreases due to the low sea-water temperature which increases the viscosity of the oil.

Bunkering for Dry-Cargo Ships: Bunker supply to dry-cargo ships is not available at this port.

CUSTOMS: *Customs Formalities:* Upon arrival, the Master is required to submit to the Customs a manifest of any cargo to be landed at Ras Al-Khafji and to sign a declaration that no intoxicating liquor or drugs will be landed.

A Coastguard accompanied by the ship's Agent boards to seal bonded stores. Dry-cargo ships are boarded by a Customs Officer, a Coastguard and a Quarantine Officer for sealing stores, checking valid certificates and health inspections.

Import of the following articles is strictly forbidden:

(a) Alcoholic beverages, including beer, wine and liquor.
(b) Pornographic literature, photographs, pictures and films.
(c) Explosives.
(d) Fire arms or implements of war of any kind.
(e) Religious matters not pertaining to the Moslem faith.
(f) Gambling devices.

WATCHMEN: The tanker always has to post at least 2 watchmen on duty: one on the forecastle head to watch and monitor the condition of the mooring ropes and the behaviour of the tanker by forces of wind and tidal current, and another on deck near or within sight of the manifold. They have to report to the Master and the Mooring Master whenever they observe the tanker drifting too close to the berth, or the loading hoses twisted or whenever they recognise anything unusual, so that the Master may properly manoeuvre the tanker and any mishap may be averted.

WEATHER: The local weather at Ras Al-Khafji is similar to that of Kuwait, being hot and dry with little cloud during the long Summer from May to September and considerably colder in December and January.

The prevailing wind in this area is Northwesterly, however winds of varying strength may come from any direction. In Summer, the diurnal sea breeze is light Easterly at about 5 – 7 m. per second (10 – 14 knots), and only rarely it increases to 12 m. per second (23 knots). In Winter South-Southeasterly winds of up to 20 m. per second (39 knots) may last one or two days and then veer suddenly to the N.W., often accompanied by gusts or squalls in excess of 20 m. per second. On occasion a type of line squall passes over and winds up to as much as 30 m. per second (58 knots) may be experienced for a short time before settling down to blow for longer periods at 20 m. per second. Little or no warning of these strong squalls is given; they just appear suddenly, often accompanied by thick sand and dust.

In the area of the Sea Berths the waves are prevented from developing by the short fetch of the Northwesterly wind, but waves up to 5 – 6 ft. do occur from this direction. Southeasterly winds raise a short steep sea which quickly reaches 7 – 8 ft. high. This lengthens and increases as the wind freshens and has been known to reach 14 – 15 ft. in the area of the Sea Berths. When the Southeasterly wind veers the swell rapidly decreases but persists for about 24 hours thereafter.

Visibility in the area is generally good, but Northwesterly winds cause rising dust and sand which may reduce visibility to almost zero at times. Haze is common, and on calm hot days mirages are frequent. "Steam fog" may occur at times in the early morning hours resulting in very poor visibility.

TIDES/CURRENTS: The depths shown on the chart are based on ISLW. The diurnal rise of tide is approximately 6 ft. at the Springs and 5 ft. at Neaps, and the ISLW is 4 ft. below the Mean Sea Level.

The heights of both high and low water are considerably affected by the prevailing weather conditions. Northerly winds tend to reduce the heights of tides and retard them, and Southerly winds increase the heights slightly.

Near the Sea Berths the current flows roughly parallel with the shore, and reverses its direction about 1 hour earlier than the time of high or low water inshore at Ras Al-Khafji. The velocity of the current is approximately 1.5 knots at the maximum.

Both the direction and velocity of the tidal current are much affected by the prevailing weather conditions.

The tidal data for Ras Al-Khafji as compared with that of Mina Al-Ahmadi is given as follows:

Flood tide: Occurs approximately 30 minutes later than Mina Al-Ahmadi.
Height approximately 0.73 times that of Mina Al-Ahmadi.
Ebb Tide: Occurs approximately 20 minutes later than Mina Al-Ahmadi.
Height approximately 1.04 times that of Mina Al-Ahmadi.

"Tide and Current Table" published annually is available from the Company upon request.

REPAIRS: Some minor repairs on board vessels may be made using shore assistance in case of extreme emergency, but such Company's assistance will be provided only on the Master's and the shipping Agent's acceptance for undertaking to pay to the Company all expenses incurred. Preferably all repairs should be carried out at the anchorage area. In all cases when shore assistance is required, the Master should notify the vessel's Agent well in advance.

SERVICES: *Provisions, Deck Stores:* Provisions and deck stores are available from ship chandlers at the Port in limited kinds and quantities. In all cases the ship's Agent should be advised of the requests at the earliest possible time before arrival.

RAS AL-KHAFJI CONTINUED OVERLEAF

NOTICE: M.E.N.A.S. Notice No. 08/81

RAS AL KHAFJI APPROACH AND CHANNEL BUOYS
CHANGE TO I.A.L.A. SYSTEM "A"
(RED TO PORT)

The following alterations are due to take place at the end of February 1981 (Still being carried out 10th March 1981). Further notice will be issued on completion of the work.

OUTER CHANNEL LIGHT BUOYS

SUMMARY OF RAS TANURA MAIN CHANNEL, EAST CHANNEL AND JU'AYMAH CHANNEL
ALTERATIONS TO I.A.L.A. SYSTEM "A" (RED TO PORT) AND NEW BUOYS TO BE LAID

The following changes to I.A.L.A. System A and additional buoys to be laid are due to take place between April 23rd and May 17th, 1981. A further Notice will be issued on completion of this task.

RAS TANURA/JU'AYMAH:
(also see pages 876 and 864).

REPORT: *More stringent safety checks:*
Quote:

Due to recent accidents involving tankers at terminals, Aramco have tightened up their safety checks and closely follow the issued safety regulations.

Aramco, as terminal operator of Ras Tanura/Ju'aymah, inspect all vessels before loading. Anything found not up to the standard of guidelines and recommendations compiled by Oil Companies International Marine Forum are noted, the Master is given a letter of protest, and the Owner is advised to correct deficiencies. At the same time all remarks and recommendations are computer-stored for easy access in the future.

Aramco have found that many recommendations are neglected and some vessels are repeatedly given the same remarks.

To prevent this, new actions are being taken by Aramco. Vessels which in the past have received recommendations and not followed the same have recently been refused permission to load at Ras Tanura/Ju'aymah.

That a vessel was allowed to load at her last call is not a guarantee that she will be allowed again.

Unquote.

Further to the above, we have been advised that since these deficiency letters do not allow these vessels to berth at the Ju'aymah Terminal's SBM's, vessels will be diverted to either of the three suitable berths at Sea Island. Time lost from berth available at Ju'aymah to berth available at Sea Island will be on the vessel's account.

This will affect vessels between 200,000 – 275,000 d.w.t.

YANBU (Industrial Port): (also see page 887).

PETROLINE MARINE TERMINAL: Expected to be operational Mid-1981.

TERMINAL:

Terminal Facilities: The Yanbu Terminal serves as an in-transit crude oil storage facility and also as a tanker loading terminal for the 48 in. crude oil pipe-line from Abqaiq, Eastern Province, Saudi Arabia, to Yanbu, Red Sea, Saudi Arabia.

The incoming crude oil is reduced in pressure, cooled, metered and stored in 11 floating roof crude oil tanks before it is pumped to tankers berthed at the Offshore Marine Terminal. Each crude oil storage tank has a nominal capacity of approximately 1,000,000 barrels, with a working capacity of approximately 850,000 barrels.

Storage is also provided onshore for bunker fuel oil. Bunkers are pumped into 2 storage tanks from tankers at Jetty No. 1 and distributed to crude oil tankers at all jetties as requested. Each bunker fuel storage tank has a capacity of approximately 250,000 barrels.

Offshore Marine Terminal: The Offshore Marine Terminal consists of a jetty trestle with 3 loading berths connected to shore by a free-standing trestle and a causeway. All 3 loading berths are fixed structures with fixed loading platforms, breasting dolphins, and mooring dolphins.

BERTHING:

Berth No. 1:

Tanker size (approximately): 80,000 – 275,000 d.w.t. (See Note).
Deck level of loading platform: 40 ft.
Depth alongside Berth No. 1: 99 ft. ISLW.
Loading arms (number and size): 4×20 in.
Quick disconnect coupling size: 16 in., 20 in., 24 in.
Bunker fuel arms (number and size): 2×12 in.
Quick disconnect coupling size: 8 in., 10 in., 12 in.
Max. rate per loading arm: 32,500 bbls.p.h.
Max. rate per bunker arm (offloading): 8,900 bbls.p.h.
Number of breasting dolphins: 4.
Number of mooring dolphins: 4.
Available mooring hooks: 24 (SWL 70 tonnes).
Distance between centre of inner breasting dolphins: 239 ft. (73 m.).

Note: In addition to loading crude oil, Berth No. 1 will be used for offloading bunker fuel from 50,000 d.w.t./80,000 d.w.t. sized tankers. Maximum discharge rate is 8,900 bbls.p.h. per bunker fuel loading/unloading arm.

Berth No. 2:

Tanker size (approximately): 275,000 – 500,000 d.w.t. (See Note).
Deck level of loading platform: 40 ft.
Depth alongside Berth: 107 ft. ISLW.
Loading arms (number and size): 4×20 in.
Quick disconnect coupling size: 16 in., 20 in., 24 in.
Bunker arms (number and size): 2×12 in.
Quick disconnect coupling size: 8 in., 10 in., 12 in.
Max. rate per loading arm: 32,500 bbls.p.h.
Max. rate per bunker arm (bunkering): 10,000 bbls.p.h.
Number of breasting dolphins: 2.
Number of mooring dolphins: 6.
Available mooring hooks: 26 (SWL 70 tonnes).
Distance between centre of breasting dolphins: 449 ft. (137 m.).

Note: Tankers of less than 275 m.d.w.t. may be accepted if the light water line flat size forward and aft of the manifold is at least 75 m. (246 ft.).

Berth No. 3:

Tanker size (approximately): 120,000 – 275,000 d.w.t. (See Note).
Deck level of loading platform: 40 ft.
Depth alongside Berth: 108 ft. ISLW.
Loading arms (number and size): 4×20 in.
Quick disconnect coupling size: 16 in., 20 in., 24 in.
Bunker arms (number and size): 2×12 in.
Quick disconnect coupling size: 8 in., 10 in., 12 in.
Max. rate per loading arm: 32,500 bbls.p.h.
Max. rate per bunker arm (bunkering): 10,000 bbls.p.h.
Number of breasting dolphins: 2.
Number of mooring dolphins: 5.
Available mooring hooks: 23 (SWL 70 tonnes).
Distance between centre of breasting dolphins: 420 ft. (128 m.).

Note: Tankers of less than 120 m.d.w.t. may be accepted if the light water line flat size forward and aft of the manifold is at least 70 m. (230 ft.).

Only 2 berths of the Offshore Marine Terminal can be loaded at the same time. Maximum loading rate to 2 crude berths simultaneously is 260,000 bbls.p.h. through 8×20 in. loading arms.

Environmental Monitoring System: An environmental monitoring system is installed at Berth No. 1 dock control room with repeater units located in dock control rooms at Berths Nos. 2 and 3. The system indicates wind velocity and direction, atmospheric pressure and temperature, current velocity and direction and wave height and period.

Berthing Criteria: The following table gives the maximum allowable berthing criteria for the crude oil loading berths.

	Approach Velocity m./min.	*Wind* knots	*Current* knots	*Maximum Wave Height* ft.
Berth No. 1	9	20	1.0	6.5
Berth No. 2	9	20	1.0	6.5
Berth No. 3	9	20	1.0	6.5

The approach angle when docking should not exceed 7 degrees.

For unberthing purposes under normal conditions, wind speed should not exceed 25 knots.

From time to time it may be necessary, because of bad weather, to close the port or some terminals located in the port. The weather conditions under which such action shall apply will be determined by the port or terminal authority.

Mooring Arrangements: Each mooring dolphin, breasting dolphin, and loading platform is equipped with either double or triple quick-release mooring hooks and with a mooring capstan.

The terminal will furnish a required mooring arrangement for the loading berth the vessel is nominated to. The mooring arrangement shows the number of mooring hooks provided on the berth. These mooring hooks are designed to service 1 mooring line per hook.

In order to ensure the integrity of the marine offshore terminal, VLCCs are required to moor with a minimum of 12 mooring wires. VLCCs with a total synthetic mooring system will be permitted alongside only if the synthetic lines are made of low elasticity material. Mixing of wires and synthetic mooring lines in the same service will be prohibited except for the first line ashore.

Mooring launches will be used to assist the tanker in running mooring lines to the mooring dolphins and breasting dolphins at each berth. The terminal will provide suitable messengers for heaving in mooring lines.

All mooring lines should be of similar size and material and must be in good condition. An "all wire" mooring arrangement is the preferred mooring system. Manual brakes have to be set and to be secured on all tension winches once the tanker is moored. Ship's crews must tend all moorings to keep the ship in position and mooring lines have to be taut at all times.

Each loading berth is equipped with a mooring load monitor/hook release system. The system is designed to monitor the loads on each mooring hook and to provide an alarm should the loads on a mooring hook exceed the system's set points. Berth operating personnel will monitor the mooring loads and, based on the read-outs, they will advise the responsible officer onboard the tanker of any deviation in the loads between the various moorings. The responsible officer is expected to immediately correct any undesirable mooring situation.

The mooring load monitoring system does not relieve the vessel's Master from his responsibility to ensure adequate and safe moorings at all times when berthed alongside the offshore loading terminal.

Gangway: The Offshore Marine Terminal will provide a gangway to the ship at each berth.

Each loading platform has a gangway tower equipped with a self-adjusting gangway. The gangway provides access to and from the tanker and is the only permissible means for any personnel to enter or leave the ship.

Loading Arms: There are four 20-in. crude oil loading arms at each of the loading platforms at Berths 1, 2 and 3. Each crude oil loading arm is capable of handling 32,500 bbls.p.h. maximum. The maximum flow rate per berth is 130,000 bbls.p.h., using 4 arms.

The hydraulic controls for the loading arms are located in the control desk on the loading platform adjacent to the loading arms. All loading arms are fully hydraulically powered and counter-balanced when empty. Each loading arm is fitted with a "Quick Disconnect Coupler".

All loading/bunker connections are equipped with electrical insulating flanges. Therefore, ship to shore bonding cables are not required.

Loading Plan Agreement: After the ship is properly secured in the correct position alongside the loading berth, the Terminal Offshore Supervisor will contact the officer in charge for the loading operation on board the tanker and discuss and agree on the loading plan.

The loading agreement consists of:

(a) Maximum acceptable loading rates, starting rate, topping off rates, and standby notice requirements. (During loading; all anticipated changes in cargo transfer rates are to be communicated in a timely manner to ship or shore.)

(b) Cargo quantities required by tanker's Master and comparison with terminal loading instructions.

(c) Cargo characteristics, required samples and tests.

(d) Assignment of cargo to vessel tanks and preferred order of loading.

(e) Details of last cargo, condition of tanks and pipe-lines, and ballast conditions and deballast time. Inspection of all cargo tanks prior to loading and signing of the dry certificate.

(f) Load-on-top procedures.

(g) Quantity of slop oil on board and quantity of free water in slops.

(h) Quantity of bunkers ordered prior to arrival.

(i) Estimated loading time required and estimated departure time.

Crude Oil Characteristics:

Arabian Light

Temperature	:	120° – 150° F.
API Gravity	:	33.2 – 33.8
Reid Vapour Pressure	:	3.6 – 5.0 PSIA
Pour point	:	Below 20° F.
Viscosity	:	57 SUS at 70° F.
BS & W	:	Less than 0.05%
H_2S Content	:	Less than 10 p.p.m.

Clean Ballast: As there are no ballast discharge facilities at Petromin's crude oil offshore terminal, tankers must arrive at the terminal with clean ballast, ensuring that all pipe-lines, pumps, and strainers have been flushed out prior to arrival.

Deballasting: Only clean ballast water which does not leave any traces of oil on the surface of the water is permitted for discharge overboard.

Slop Residues: Slop residues cannot be discharged ashore at Petromin's crude oil terminal.

Cargo Tank Inspection: All cargo tanks on board the tanker will be inspected by the offshore Supervisor prior to commencement of cargo transfer.

A responsible officer from the tanker should witness the tank inspection.

Inerted Cargo Tanks: Tankers which arrive with all tanks inerted have to enable ullage inspections of all cargo tanks prior to start of cargo transfer operations and after completion of cargo transfer operations.

Load-on-Top Procedures: If the tanker requests load-on-top procedures, measuring of the quantity of oil and water in the slop tank(s) will be witnessed by the Offshore Supervisor.

Sea Valves: All sea valves and overboard valves connected to the tanker's cargo system have to be closed and lashed prior to commencement of cargo transfer operations.

Loading Signal: During loading the international code flag "B" shall be displayed during daylight hours. During darkness a red loading light shall be displayed.

Emergency Towing Wires: While at the Offshore Marine Terminal, tankers have to provide emergency towing wires of adequate strength to move the tanker off the dock. The towing wires are to be positioned on the offshore bow and stern quarter of the tanker and the outboard eye should be maintained approximately 1 m. above water level at all times.

Bunkering: Bunkering fuel is available at all berths of the offshore Marine Terminal, and two (2) bunker loading arms are located on each loading platform, size 12 in. Maximum flow rate per bunker loading arm is 10,000 bbls.p.h. To ensure a fast turnaround of tankers, bunkering has to be accomplished concurrently with cargo transfer operations.

Hydrogen Sulphide Hazards (H_2S): Arabian crude loaded at the Offshore Marine Terminal has been treated for H_2S removal prior to shipping.

However, the crude oil may still contain Hydrogen Sulphide in concentrations which may be harmful to personnel. Personnel on board tankers who may be exposed to concentrations of H_2S gas should observe safety precautions applicable to harmful gases.

Early Departures Procedures: Early departure procedure is available if requested by the ship and if the loaded passage allows for sufficient time to forward cargo documents to the cargo receiving terminal.

DEVELOPMENTS: The tanker and LPG berths are expected to be completed in mid 1981, while container berths and berths for general cargo are due to be ready in 1983.

Water depths at berths (anticipated):

Berth Type	*Max. Ship Size*	*Loaded Draft (m.)*	*Water Depth (m.)*
Natural Gas Liquids	125,000 cu.m.	11	12.5
	200,000 cu.m.	14	15.5
Ultra Large Crude Carriers	500,000 d.w.t.	28	31.0
Very Large Crude Carriers	300,000 d.w.t.	25	27.5
Crude Suez and Large Products Liquids	125,000 d.w.t.	16	18.0
Products Liquid	50,000 d.w.t.	12	13.5
Products Bulk	125,000 d.w.t.	15	16.5
Containers	42,000 d.w.t.	12	13.5
Freighters	20,000 d.w.t.	10	11.0

NOTICE: Telex advice received March 1981.

First tanker will load on 10th July, 1981.

The smallest tanker to be handled will be 80,000 tons and the largest 500,000 tons. No smaller tankers will be handled except for bringing bunkers. These tankers will not be smaller than 50,000 tons.

Thus bunker facilities will be available from ashore.

There will be 3 docks.

(1) 80,000 – 275,000 tons.
(2) 275,000 – 500,000 tons.
(3) 120,000 – 275,000 tons.

There will be no LOA restrictions. On dock No. 3 max. draft 94 ft. otherwise no restrictions.

There will be 4 loading arms each 20 in. quick disconnect couplings, 10 in., 20 in. and 24 in.

Bunker fuel arms: 2×12 in.

Quick disconnecting couplings: Size 8 in., 10 in. and 12 in.

Max. loading capacity 130,000 bbls.p.h. which means 32,500 bbls.p.h. per loading arm.

All VLCC's must have 12 mooring wires. Tankers between 80,000 – 160,000 tons must have a minimum of 8 mooring wires.

There will be shore gangways.

Mooring load monitor system available. Documentation procedure will be same as Ras Tanura.

Sierra Leone

FREETOWN: (also see page 891).

NOTICE: Port Authority circular No. HM/241/354 dated 14th January, 1981.

Oil tankers berthing Kissy Oil Jetty: In view of the strain experience on the forward back springs during ebb tide on above-named jetty, vessels are to moor using double or more forward back springs.

This is necessary to avoid any damage to the discharge/loading arms on jetty.

Agents are advised to inform shipping companies that vessels are required to carry the necessary extra mooring ropes or wires.

Port Authority Pilots are to ensure prior to berthing vessels that sufficient moorings are onboard for extra forward back springs and separate bollards on jetty head are used for each spring.

RUWAIS: (also see page 1055).

NOTICE: The following telex was received in February 1981.

Please be advised that ADPPOC has provided a new cargo handling service at the Port of Jebel Dhanna-Ruwais, commencing January 1981.

ADPPOC as port operators are undertaking the service on an independent basis as an additional port service, primarily to serve the construction and commissioning of the ADNOC and GASCO refineries and petroleum export terminals. Nevertheless ADPPOC will be pleased to handle cargo consigned to other third parties and destinations which can be routed through the Ruwais jetty facilities.

Initially, due to the low volume of import cargo presently anticipated, the service will be limited to the following for ships discharging at the Ruwais anchorage:

(A) Equipment:
2×150 ft. (800 ton) barges;
Shore crane (150 ton Manitowac) accommodating lifts up to 80 tons approx.;
Fork lifts, mobile cranes, trailers, 60 ton low-loader and tractor;
Two stevedore ship working gangs;
Tugs, launches and mooring vessels as required.

(B) Work Limitation:
Weather permitting, daylight hours only;
Target minimum for general cargo 700 freight tons per day;
(In special circumstances these limitations may be modified).

(C) Miscellaneous:

(1) Heavy lifts in excess of 80 tons approximately at quay require special arrangements on request, and adequate notice.

(2) Discharge of heavy lifts in excess of ship's handling equipment also require floating crane hire on request, and adequate notice.

(3) Consignee (or Agent) must sign Cargo Indemnity form before discharge and vessel's Master must sign Port's "Conditions of Use" receipt before entering port and berthing. (The depth of water into the Construction Harbour is currently 4.2 m. LW).

(4) All Customs cargo documentation and clearance of vessels is the responsibility of the shipping Agent/Consignee. Tally receipts will be supplied by the ADPPOC Cargo Representative on site.

(5) Owners of tugs and barge entering Ruwais for working cargo for the first time will pay Port Dues in accordance with Regulations, 1980. Regular trading Masters may then apply for Pilot Exemption Certificate, and tugs/small craft 100 – 600 n.r.t. may then enter for Dh. 1,000 per visit.

(6) *The Port Dues for Jebel Dhanna – Ruwais as per Regulations 1980 are valid to April 1st, 1981,* whereafter a revised tariff will be implemented. The new tariffs will be promulgated on or about March 5th, 1981.

(7) Agents and/or Consignees should advise their requirements, vessel ETA's and supply Cargo Manifests and Stowage Plans to:
The Harbour Master, Jebel Dhanna – Ruwais Port, ADPPOC,
Jebel Dhanna, P.O. Box 61, Abu Dhabi.
Tel: Jebel Dhanna 71030 (daytime)
Port Control 71127 (24 hours)
Telex: 23117 "APOCJD EM".

Note: An office has been opened at Ruwais Construction Customs Pound for direct contact with the Cargo Superintendent and a telephone will be installed.

To ensure complete co-ordination and service, and/or in the event of communications breakdown at the port, vessel ETA's and general cargo information and requirements should also be sent to:

ADPPOC, "ARCH" Division,
P.O. Box 61, Abu Dhabi.
Tel: 336700 Abu Dhabi,
Telex: 22209 "ADPPOC EM".

Correct Position: 42° 21′ N., 71° 05′ W.

FORT PIERCE: Florida, 27.27 N., 80.19 W.

*Updated by Port Authority in February 1981.

PILOTAGE: Compulsory. Pilot boards at sea buoy. Send vessel's ETA to agent 72 hours, 48 hours and 24 hours prior to arrival.
ANCHORAGE: Vessel anchors and awaits Pilot 0.5 miles seaward of sea buoy.
RESTRICTIONS: Vessel is able to berth and unberth during hours of darkness if the weather is clear. The leading lights are good but the channel is narrow and marked by unlit buoys. Diameter of turning basin 1,000 ft. Least depth of water in the channel from sea to berth 26 ft. (dredging in progress).
MAX. SIZE: Max. draft 25 ft. (1 ft. keel clearance in the turning basin required). Range of tide 1 ft. 3 in.
TUGS: One 500 h.p. tug and one 1,000 h.p. tug available. Not advisable to manoeuvre without use of tug.
RADIO: Lantana Radio.
VHF: Channels 16 and 13. Watch only maintained when vessel expected.
BERTHING: The berth is located in Fort Pierce inlet. Length of jetty 411 ft. At present only 1 berth available on the North side of the jetty. Dredging is under way on the South side. Distance from entrance to berth 3 miles.

All moorings placed on the jetty and vessels lay quietly alongside. However, with a S.E'ly wind it may be difficult to keep the after end of the vessel alongside. Vessels are able to dock and undock at any stage of the tide, however, if vessel's draft is over 25 ft. suggest vessel waits for HW.
CARGO HANDLING FACILITIES: There are no facilities for bulk cargoes. No quay cranes. Ro/Ro facilities available for island type trade. There is sufficient mechanical equipment for handling palletised cargoes. Equipment or storage space for containers is available. An insulated/refrigerated storage shed has been built at the jetty.
FRESH WATER: Available.
FUEL: Not available in the port but could be supplied by barge or tanker truck.
MEDICAL: Doctor and hospital available.
AIRPORT: Local airport 5 miles from port, nearest international airport is within 2 hours by car.
SERVICES: Fresh provisions, laundry services, groceries and meats available.
REPAIRS: No facilities available.
GENERAL: Fort Pierce harbour is at present in the early stage of development. For many years the port has been used only for barge traffic and small craft and the inlet allowed to silt up. Over the last year a company, DNE Sales International, headed by Mr. Egan has bought the jetty and the adjacent land for the initial purpose of exporting Florida citrus, many local plantations of which are owned by Mr. Egan.

The jetty has been completely rebuilt, and is 411 ft. long, of solid construction with good fendering. An insulated/refrigerated holding shed has been built. Only the North side of the jetty has been dredged, the South side being dredged at the present.

The stevedoring company packing sheds are all owned by DNE Sales International. Ship chandlery is available.

At present depths in the turning basin which is approximately 1,000 ft. are no more than 26 ft. and the basin is not marked at its extremities so care should be taken to swing as near as possible on the leading lights. Alongside the wharf depths are 27 ft. with soft sand bottom and in the channel the least depth is 26 ft. but there are no official surveys yet in print. The latest information on U.S. chart 11475, gives depths of 25.7 ft. in entrance range and 20.5 ft. to 22.3 ft. for inner range, latest information in British Notice to Mariners gives 26 ft. depth, which in fact has been confirmed.

The buoys marking the edge of channel are unlit, although U.S. chart shows lighted buoys.

It is early days for this port, dredging is in progress and if all the projected improvements are carried through, including the deepening of the channel Fort Pierce will be a safe and efficient port. The controlling factor for "fruit vessels" is the length of the jetty, however if exports increase as anticipated there is a proposal to lengthen the jetty by 100 ft.

Most vessels arrive or depart at any tide or hour.

Stevedores are good and excel in citrus loading.

All Agency and stevedoring personnel are keen, helpful and anxious to co-operate fully to promote good relations.
AUTHORITY: Fort Pierce Port & Airport Authority.

Venezuela

GUANTA: (also see page 1226).

Correct Position: 10° 15′ N. 64° 35′ W.
